3. Changes in market trends, fashion and consumer preferences and increase in competition that are largely beyond our control could adversely affect our business, financial condition, results of operations and prospects.

Fashion industry is very sensitive to change as per market trend. Any change in the latest fashion can render the old stock obsolete and increase in competition with close competitors will reduce the demand. Also Factors such as change in trend, fashion and customer preference are generally beyond our control. Some or all of our concepts may become less attractive in light of changing consumer preferences or better design by competitors, and we may be unable to adapt to such changes in a timely manner. Any change in consumer preferences that decreases demand could adversely affect our business, financial condition, results of operations and prospects.

Our Company and our Promoters have built relations with suppliers, clients and other persons who are connected with our business. Further, our Key Managerial Personal also possesses the requisite domain knowledge to provide efficient services to our clients. (Rs. in Lakhs)

Particulars	As on 31st March				
	2016	2015	2014	2013	2012
Cash flow from / (used in) Operating Activities	40.42	(170.65)	(154.70)	2.36	(0.27)
Cash flow from /(used in) Investing activities	(29.08)	(11.16)	19.71	(36.85)	(6.31)
Cash flow from/ (used in) Financing activities	(3.73)	181.30	143.88	21.70	(0.18)

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. However, if we are not able to generate sufficient cash flows in future, it may adversely affect our business and financial operations.

All of our Showrooms, apart from mentioned above, are not owned by us but are taken of lease of varying tenures. These leases are renewable on mutually agreed terms. Upon termination of the lease we are required to return the said business premises to the lessor/licensor, unless renewed. There is no assurance that the terms of agreements will be renewed in the event that lessor/licensor terminates or does not renew the agreements on commercially acceptable terms or at all. We shall be required to vacate the showrooms and we may be required to identify alternate premises and enter into fresh lease and license agreements. We believe our success depends in large part on our brand image. We believe that our trademarks and other Proprietary rights have significant value and are important to identifying and differentiating our products from those of our competitors and creating and sustaining demand for our products. Additionally, we cannot assure you that obstacles will not arise as we expand our product line and the geographic scope of our sales and marketing. Third parties may assert intellectual property claims against us, particularly as we expand our business and the number of products we offer. Our defence of any claim, regardless of its merit, could be expensive and time consuming and could divert management resources. Successful infringement claims against us could result in significant monetary liability or prevent us from selling some of our products. In addition, resolution of claims may require us to redesign our products, license rights from third parties or cease using those rights altogether. Any of these events could harm our business and cause our results of operations, liquidity and financial condition to suffer.

We do not have any long-term agreement or contract for the supply of material. We are dependent on our suppliers for our materials requirements. However, we do not have any long-term supply agreements or commitments in relation to the same or for any other materials used in our fabrication process. Any interruptions in the manufacturing operations of the suppliers could affect our ability to receive an adequate supply of quality products at reasonable prices. Additionally, any price volatility of these materials and our inability to adjust to the same could adversely affect our results of operations and profitability. Further any deterioration in the quality of the material procured could adversely affect our results of operations and profitability.

We plan our products based on the forecast of consumer buying patterns as well as on the forecast of fashion and trends in the forthcoming seasons. Any mismatch between our forecasts, our planning and the actual purchase by customers can impact us adversely, leading to excess inventory and requiring us to resort to higher markdown and thus lower margins in order to clear such inventory. There can be no assurance that we shall get repeat order flow from our customers. While we believe that our brand is well known in the market and our qualitative supply at competitive prices shall ensure that we get sufficient orders, there can be no assurance that we shall be able to create sufficient demand for our products. Any contraction in our customer base or lack of order may adversely affect our revenue from operations and consequently our profitability.

- 16. *Our cost of fabrication is exposed to fluctuations in the prices of material.***

Our Company is dependent on third party suppliers for procuring the materials. We are exposed to fluctuations in the prices of the materials as well as its unavailability, particularly as we do not enter into any long-term supply agreements with our suppliers and our major requirement is met in spot market. We also face the risk associated with compensating for or passing on such increase in our cost on account of such fluctuations in the prices of our customers. Upward fluctuations in the prices of materials may thereby affect our margin and profitability, resulting in material adverse effect on our business, financial condition and results of operations. INDIAN TEXTILE INDUSTRY

Overview

India's textiles sector is one of the oldest industries in Indian economy dating back several centuries. Even today, textiles sector is one of the largest contributors to India's exports with approximately 11 per cent of total exports. The textiles industry is also labour intensive and is one of the largest employers. The industry realised export earnings worth US\$ 41.4 billion in 2014-15, a growth of 5.4 per cent. The textile industry has two broad segments. First, the unorganised sector consists of handloom, handicrafts and sericulture, which are operated on a small scale and through traditional tools and methods. The second is the organised sector consisting of spinning, apparel and garments segment which apply modern machinery and techniques such as economies of scale.

The textile industry employs about 40 million workers and 60 million indirectly. India's overall textile exports during FY 2015-16 stood at US\$ 40 billion.

The Indian textiles industry is extremely varied, with the hand-spun and handwoven textiles sectors at one end of the spectrum, while the capital intensive sophisticated mills sector at the other end of the spectrum. The decentralised power looms/ hosiery and knitting sector form the largest component of the textiles sector. The close linkage of the textile industry to agriculture (for raw materials such as cotton) and the ancient culture and traditions of the country in terms of textiles make the Indian textiles sector unique in comparison to the industries of other countries. The Indian textile industry has the capacity to produce a wide variety of products suitable to different market segments, both within India and across the world.

Choice Equity Broking Private Limited, registered with SME segment (NSE-EMERGE) of NSE will act as the market maker and has agreed to receive or deliver the specified securities in the market making process for a period of three years from the date of listing of our Equity Shares or for a period as may be notified by amendment to SEBI (ICDR) Regulations.

The Market Maker shall fulfill the applicable obligations and conditions as specified in the SEBI (ICDR) Regulations, as amended from time to time and the circulars issued by the NSE and SEBI in this matter from time to time.

Following is a summary of the key details pertaining to the Market Making arrangement:

1. The Market Maker(s) (individually or jointly) shall be required to provide a 2-way quote for 75% of the time in a day. The same shall be monitored by the Stock Exchange. Further, the Market Maker(s) shall inform the Exchange in advance for each and every black out period when the quotes are not being offered by the Market Maker(s).
2. The minimum depth of the quote shall be Rs. 1,00,000/-. However, the investors with holdings of value less than Rs. 1,00,000/- shall be allowed to offer their holding to the Market Maker(s) (individually or jointly) in that scrip provided that he sells his entire holding in that scrip in one lot along with a declaration to the effect to the selling broker.
3. After a period of three (3) months from the market making period, the market maker would be exempted to provide quote if the Shares of market maker in our Company reaches to 25 % of Issue Size (Including the 1,04,000 Equity Shares out to be allotted under this Issue.) Any Equity Shares allotted to Market Maker under this Issue over and above 1,04,000 Equity Shares would not be taken in to consideration of computing the threshold of 25% of Issue Size. As soon as the Shares of market maker in our Company reduce to 24% of Issue Size, the market maker will resume providing 2-way quotes.
4. There shall be no exemption/threshold on downside. However, in the event the market maker exhausts his inventory through market making process, the concerned stock exchange may intimate the same to SEBI after due verification.
5. Execution of the order at the quoted price and quantity must be guaranteed by the Market Maker(s), for the quotes given by him.
6. There would not be more than five Market Makers for a script at any point of time and the Market Makers may compete with other Market Makers for better quotes to the investors. At this stage, Choice Equity Broking Private Limited is acting as the sole Market Maker.

7. On the first day of the listing, there will be pre-opening session (call auction) and there after the trading will happen as per the equity market hours. The circuits will apply from the first day of the listing on the discovered price during the pre-open call auction.
8. The Market Maker may also be present in the opening call auction, but there is no obligation on him to do so.
9. There will be special circumstances under which the Market Maker may be allowed to withdraw temporarily/fully from the market – for instance due to system problems, any other problems. All controllable reasons require prior approval from the Exchange, while force-majeure will be applicable for non-controllable reasons. The decision of the Exchange for deciding controllable and non-controllable reasons would be final.
10. The Market Maker(s) shall have the right to terminate said arrangement by giving one month notice or on mutually acceptable terms to the Merchant Banker, who shall then be responsible to appoint a replacement Market Maker(s).

In case of termination of the above mentioned Market Making agreement prior to the completion of the compulsory Market Making period, it shall be the responsibility of the Lead Manager to arrange for another Market Maker(s) in replacement during the term of the notice period being served by the Market Maker but prior to the date of releasing the existing Market Maker from its duties in order to ensure compliance with the requirements of regulation 106V of the SEBI (ICDR) Regulations, 2009. Further the Company and the Lead Manager reserve the right to appoint other Market Maker(s) either as a replacement of the current Market Maker or as an additional Market Maker subject to the total number of Designated Market Makers does not exceed 5 (five) or as specified by the relevant laws and regulations applicable at that particular point of time. The Market Making Agreement is available for inspection at our Registered Office from 11.00 a.m. to 5.00 p.m. on working days.

11. Emerge of NSE will have all margins which are applicable on the NSE Main Board viz., Mark-to-Market, Value-At-Risk (VAR) Margin, Extreme Loss Margin, Special Margins and Base Minimum Capital etc. NSE can impose any other margins as deemed necessary from time-to-time.
12. Emerge of NSE will monitor the obligations on a real time basis and punitive action will be initiated for any exceptions and/or non-compliances. Penalties / fines may be imposed by the Exchange on the Market Maker, in case he is not able to provide the desired liquidity in a particular security as per the specified guidelines. These penalties / fines will be set by the Exchange from time to time. The Exchange will impose a penalty on the Market Maker(s) in case he is not present in the market (offering two way quotes) for at least 75% of the time. The nature of the penalty will be monetary as well as suspension in market making activities / trading membership.

The Department of Surveillance and Supervision of the Exchange would decide and publish the penalties/ fines/ suspension for any type of misconduct/ manipulation/ other irregularities by the Market Maker from time to time.

13. The price band shall be 20% and the Market Maker Spread (difference between the sell and the buy quote) shall be within 10% or as intimated by Exchange from time to time.

DETAILS OF UTILIZATION OF ISSUE PROCEEDS

1. Set up 4 new Stores

We plan to leverage the brand equity enjoyed by our brand, “LIBAS RIYAZ GANGJI” to selectively expand within domestic markets. Currently, we have stores in Maharashtra & Punjab and we have an International store in Dubai (UAE). As we aim to expand our business, we are targeting to open new stores in Chennai/Hyderabad, Kolkata and 2 new stores in Delhi NCR. We propose to utilize a sum of Rs. 400.00 lakhs towards setup of new stores in the FY 2016-17. The time period for set up of a store is dependent on its size and geographical location of the store.

We have identified locations for setting up of new stores. All the expenses for such setup will be paid through the Issue Proceeds. We have not entered into any specific agreement for the proposed setup of stores but have severally identified the locations and cost estimates for opening of each store. The cost of store is merely an estimate and actual price at which the stores will be taken on lease may be different.

The estimated cost for establishment of the new stores primarily comprises of costs towards:

- (i) Payment of security deposit;
- (ii) Interior costs;
- (iii) Inauguration costs.

The table below sets forth the total estimated costs for establishment of 4 new stores:

Particulars	Total Estimated Costs (Rs in Lakhs)
Security Deposits	48.00
Interior Costs	304.00
Inauguration Costs	48.00
Total	400.00

Security Deposits: We propose to utilize an amount of Rs 12.00 lakhs per store i.e. Rs. 48.00 lakhs in aggregate out of the Net proceeds of the Issue towards payment of security deposit for new stores. This amount is computed on the basis of approximately three months rent to be paid in advance, which is based on our internal estimates of rent payable for the new stores.

Interior Costs: Interior costs will include expenses in relation to furniture, fixtures, fit-outs, painting, plumbing & drainage works, fire-fighting and safety equipment. We have estimated that interior costs will aggregate approximately to Rs. 76.00 lakhs per store i.e. Rs. 304.00 Lakhs in aggregate.

Inauguration Costs: We propose to make grand openings of our stores which will cost us a considerable amount. The costs here includes refreshment, decoration and inviting celebrities. We propose to utilize an amount of Rs 12.00 lakhs per store i.e. Rs. 48.00 lakhs in aggregate out of the Net proceeds.

None of our Promoters or Directors or Group Companies have any interest in the proposed procurement of any store as stated above. The Promoters do not have any interest in any entities from whom quotations have been obtained.

INDIAN TEXTILE INDUSTRY

Overview

India's textiles sector is one of the oldest industries in Indian economy dating back several centuries. Even today, textiles sector is one of the largest contributors to India's exports with approximately 11 per cent of total exports. The textiles industry is also labour intensive and is one of the largest employers. The industry realised export earnings worth US\$ 41.4 billion in 2014-15, a growth of 5.4 per cent. The textile industry has two broad segments. First, the unorganised sector consists of handloom, handicrafts and sericulture, which are operated on a small scale and through traditional tools and methods. The second is the organised sector consisting of spinning, apparel and garments segment which apply modern machinery and techniques such as economies of scale.

The textile industry employs about 40 million workers and 60 million indirectly. India's overall textile exports during FY 2015-16 stood at US\$ 40 billion.

The Indian textiles industry is extremely varied, with the hand-spun and handwoven textiles sectors at one end of the spectrum, while the capital intensive sophisticated mills sector at the other end of the spectrum. The decentralised power looms/ hosiery and knitting sector form the largest component of the textiles sector. The close linkage of the textile industry to agriculture (for raw materials such as cotton) and the ancient culture and

traditions of the country in terms of textiles make the Indian textiles sector unique in comparison to the industries of other countries. The Indian textile industry has the capacity to produce a wide variety of products suitable to different market segments, both within India and across the world.

India's Fashion Retail Market

The proliferation of affordable smartphones, a young demographic, greater disposable income and favorable government policies have transformed retail into India's most exciting sectors. Retail trade has already been acknowledged as the country's largest service sector employer. During this year's budget, the government threw a surprise by declaring 100% FDI in multi-brand processed food retailing. Thus sending a positive sign for global retailers to set up shop in the country.

In FY16 32 foreign fashion retailers set up online shops in India, while 22 chose the brick-and-mortar route. It is worth noting that as many as 44% of the foreign fashion online retailers were from the UK. Also, most of the brands which opted to set up stores chose Mumbai and Delhi as their preferred geographies. E-commerce has gained a firm grip in India and our analysis tells us that by 2020, it is going to make a dent in the revenues of brick and mortar retailers. Intelligence Node predicts that organized retail will grow at a CAGR of 21% between 2015 and 2020 reaching an overall figure of \$180 billion. This growth will be equally driven by online and offline organized sectors. We expect fashion to contribute nearly 50% of the staggering growth in e-tail revenues. Indian behemoths Aditya Birla Group, Tata Group and Reliance Industries Limited (RIL) have not been oblivious to the rise of e-commerce in the country. The Aditya Birla Group launched Abof.com, a fashion e-commerce portal that is targeted towards millennials. In contrast to its existing peers, Abof aims to provide a curated shopping experience where customers can shop by looks featured on the portal. With its 3D trial room, Abof has augmented its commitment to provide a differential shopping experience. RIL on the other hand is gearing up to launch its fashion portal sometime this year. It aims to sell 60% of its merchandise, comprised of national and international brands through the new portal. Not to be left too far behind, the Tata Group will be focusing on fashion, smartphones and consumer electronics through its soon to be launched portal. If rumors are to be believed, the Future Group is in the process of launching their e-commerce portal too.

Future Trends

Our analysis of the Indian retail market points to a steep rising trend for the next 4 years. We predict that e-commerce will be a market worth USD 110 billion and organized will be USD 165 billion. The composition of organized retail in the overall retail market has grown from 4% in 2012 to 8% in 2015 and we expect it to maintain this trajectory until it reaches 14% in 2020. Likewise online retail is slated to grow from 2% in 2012 to 10% in 2020.

The Indian market is going to witness a sharp adoption of smartphones by 2020. Increasingly affordable smartphones and brands in that category will drive this trend. Needless to say, mobile commerce will get a boost due to this. We are going to witness a blurring between online and offline retail in the future. This development will be shaped by millennials who are currently comprised of 1.8 billion of the total world population. We conducted a survey of 2500 millennials of which 55% expressed their desire to buy everything online if they could. They choose to research the products they want to buy even when they are in the store. The three main areas where millennials spend the most are food & grocery, electronics and apparel. Technology will play a pivotal role in driving growth of the fashion sector. To be more specific, technology driven Omni-channel retailing is the future. Retailers who see digital as an integral part of their business will thrive in fashion. Big data analytics has the power to integrate brick and mortar with digital. Through present day retail analytics, we have only just begun scratching the surface by harnessing POS data as well as catalog and pricing movement data from across marketplaces. There's a lot more to be gained through unification of data from social networks, CRM, POS, fleet management systems, retail-store beacons, websites, mobile apps and e-commerce portals. Technology will break silos that come in the way of providing a seamless customer shopping experience.

Growth Drivers

Changing Demographics: The IMF expects India's population to touch 1.34 billion by end – 2019, India's growing population has been a key driver of textile consumption growth in the country. Moreover, according to World Bank, urban population accounts for 32 per cent of the total population of India. This also works as demand driver due to changing taste and preferences in the urban part of India.

Rising Disposable Income: Rising incomes has been a key determinant of domestic demand for the sector; with incomes rising in the rural economy as well, the upward push on demand from the income side is set to continue.

Evolution of E-commerce an online shopping: Due to easy online access nowadays, people have become more aware of the high-end luxury brands, their origin, services, and their speciality. With the ever-growing E-commerce market, luxury brands have easily entered to their homes. People in India are now more aware of the various global fashion and luxury trends and more inclined to accept these trends in their daily lives.

Rising middle class: The rise of middle class in the emerging luxury retail market offers opportunity to the retailer to invest more and earn more, since the consumption rate becomes higher. Luxury brands are now focusing their attention beyond the rich and elite to cover the demand of rising middle class in India.

EMI, Cash on Delivery and other: Buyers are looking for more convenience and more value for their hard earned money. They are not just looking for more competitive prices but also more perks. The bigger players have grasped this need of the Indian buyers and offer the convenience features like easy EMI, Cash on Delivery, free return and free delivery policies. BUSINESS /TRADE RELATED LAW

NATIONAL TEXTILE POLICY - 2000

The Government of India in November 2000 announced the National Textile Policy 2000, thereby replacing the previous textile Policy of 1985. Though it is to be noted that a revised national Textile policy is in framework stage, however the same is yet to be notified. The main objective of the NTxP – 2000 was to enable the Industry to attain and sustain a pre-eminent global standing in the manufacture and export of clothing. It aimed at achieving textile and apparel exports of upto \$ 50 billion by 2010 from the present \$ 11 billion. The NTxP – 2000 took note the new challenges and opportunities presented by the changing global environment, particularly the intention of the process of gradual phasing out of quantitative restrictions on imports and the lowering of tariff levels for an integration of the world textile and clothing markets by the end of 2004.

THE TEXTILE COMMITTEE ACT, 1963

The Textile Committee Act, 1963 (“TCA”) was enacted in 1963. The Textile Committee has been established under TCA (hereinafter referred to as the “Textile Committee”) with primary objective of ensuring a standard quality of textiles both for domestic and export market as well as standardization of the type of textile machinery used for production. The Textiles Committee’s function includes, among others the promotion of India Textile and textile exports, researching in technical and economic fields, establishing standards for Indian Textiles and Textile Machinery, setting up of laboratories, and data collection. Additionally, the Committee regulates the Imposition of cess on textile and textile machinery that is manufactured in India under the Textiles Committee Act. The Additional Duties of Excise (Textile and Textile Articles) Act, 1978 prescribes and provides for the levy and collection of an additional excise duty on certain textile and textile articles.

TEXTILE (DEVELOPMENT AND REGULATION) ORDER, 2001 (“TEXTILE ORDER”)

The ESI Act, 1948, encompasses certain health related eventualities that the workers are generally exposed to; such as sickness, maternity, temporary or permanent disablement, Occupational disease or death due to employment injury, resulting in loss of wages or earning capacity-total or partial. Social security provision made in the Act to counterbalance or negate the resulting physical or financial distress in such contingencies, are thus, aimed at upholding human dignity in times of crises through protection from deprivation, destitution and social degradation while enabling the society the retention and continuity of a socially useful and productive manpower.

Bombay City Civil Court: Case no: 1948 of 2006

Dr. Labhuben S. Soneji, Nishant Mitrasen Mahimtura’s Aunt was unmarried. She died on 11th Jan. 2005.

Her surviving aunt, Mrs. Rekha V. Khakhar had filed a suit in March 2005 in the Hon’ble Mumbai High Court claiming that she was the sole surviving heir of her deceased aunt, Dr. Ms. Labhuben S. Soneji.

Justice Karnik ruled that as Dr. Labhuben S. Since the eldest sister, Dr. Mrs. Jayanti Mahimtura was not alive, her share shall vest upon her children, namely, Dr. Asha K. Haji and Nishant M. Mahimtura.

Subsequently, Mrs. Khakhar withdrew her claim and made a settlement with Nishant M. Mahimtura and Dr. Asha K. Haji on the partition of the estate of late Dr. Labhuben S. Soneji.

Thereafter, she went to court and filed the ongoing case in the Hon’ble Mumbai High Court, which then transferred to the Bombay City Civil court for a property and jewellery and other belongings. This case is pending in the Bombay City Civil Court.
