## A. INTERNAL RISK FACTORS

### A. Business Risks/ Company specific Risk

1. *We may not be able to qualify for, compete and win projects, which could adversely affect our business and results of operations.*

We obtain a majority of our project work through a competitive bidding process. In selecting contractors for major projects, clients generally limit the tender to contractors (or sub-contractors) who have pre-qualifications qualified based on several criteria including experience, technical and technological capacity, previous performance, reputation for quality, safety record, the financial strength of the bidder as well as its ability to provide performance guarantees. However, price competitiveness of the bid is typically one of the most important selection criterion. In some cases we may enter into consortium arrangements with other companies to bid for contracts where we may not qualify on our own. We are currently qualified to bid for projects up to a certain value and size and therefore may not be able to compete for larger projects. Our ability to bid for and win major projects is also dependent on our ability to show experience of working on other similar sector and developing a track record of executing more technically complex projects. If we are unable to pre-qualify for projects that we intend to bid on, or successfully compete for and win such projects, our business, results of operations and financial condition may be adversely affected.

2. *Our revenue is dependent upon business from state electricity boards and other power companies hence we are indirectly exposed to the risks associated with growth of power sector in India and the growth of such companies.*

Our revenue is highly dependent upon business from state electricity boards and other power companies. The frequency and value of tenders invited by these electricity companies and state electricity boards are wholly dependent on the growth of such companies, economic development in the country, infrastructural development, industrial development and government policies and programmes. Any downfall or disruption in these activities will have an adverse effect on the demand for our product, having a material adverse effect on our business, financial condition, results of operation and cash flows.

3. *Our top three clients contribute approximately 79.45 % of our revenues for the period ended February 28, 2017. Any loss of business from one or more of them may adversely affect our revenues and profitability.*

Our top three clients contribute approximately 79.45 % of our revenues for the period ended February 28, 2017 and 92.76 % for financial year ended March 31, 2016.

- Following are the details of Top 3 clients as on February 28, 2017:

Sr. No.	Name of Client	Percentage of Total Revenue
1.	Madhya Pradesh Paschim Kshetra Vidyut Vitaran Company Limited	71.02 %
2.	Intelliplanner Software System India Pvt. Ltd.	4.62 %
3.	BSES Yamuna Power Ltd.	3.81 %
	<b>Total</b>	<b>79.45 %</b>

- Following are the details of Top 3 clients as on March 31, 2016:

Sr. No.	Name of Client	Percentage of Total Revenue
1.	Madhya Pradesh Paschim Kshetra Vidyut Vitaran Company Limited	71.56 %
2.	Maharashtra State Electricity Distribution Co. Ltd.	14.00 %
3.	BSES Yamuna Power Limited	7.20 %
	<b>Total</b>	<b>92.76 %</b>

Any decline in our quality standards, growing competition and any change in the demand for our products by these customers may adversely affect our ability to retain them. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our revenues and profitability. However, the composition and revenue generated from these clients might change as we continue to add new clients in normal course of business. We intend to retain our customers by offering solutions to address specific needs in a proactive, cost effective and time efficient manner. This helps us in providing better value to each customer thereby increasing our engagement with our new and existing customer base that presents a substantial opportunity for growth.

4. ***Our business is substantially dependent on projects awarded or funded by the Central or State Governments and we derive substantial revenues from contracts with a limited number of government entities. Any changes in the Central or State Government policies or focus, or delay in payment may affect our business and results of operations.***

Our business increasingly relies on projects in India awarded or funded by the Government or State Governments. We have various government clients and our top client is Madhya Pradesh Paschim Kshetra Vidyut Vitaran Company Limited (MPPKVVCL) which is a wholly owned company of Madhya Pradesh Govt. As of February 28, 2017, 71.02% of our revenue and as of March 31, 2016, 71.56% of our revenue and of our revenue was derived from contracts awarded by MPPKVVCL. Our business is thus subject to risks relating to or arising from the Government or State Governments, including but not limited to:

- personnel, structural, or policy changes or any changes in practices or focus at the Government or State Government level; due to our business concentration in Madhya Pradesh, we are particularly vulnerable to adverse policy changes by Madhya Pradesh Government;
- changes in government initiatives, agenda or budgetary allocations or fund deficiencies resulting in capital reduction in the power sector;
- non-payment by or delays in collection from the Government or State Governments, or the entities and financial institutions they control due to regulatory scrutiny and long procedural formalities including any audit by the Comptroller Auditor General of India;

There can be no assurance that the Government or the State Governments will continue to place emphasis on the power sector. In the event of any adverse change in budgetary allocations for power transmission or a downturn in available work in the sector, we may suffer significant losses or incur substantial costs.

5. ***The products we manufacture deal with high voltage current and other materials which may catch fire during the process of manufacture.***

The products we manufacture i.e. Transformers deal with high voltage current, oil and other materials which may catch fire during the process of manufacture. Though we have covered ourselves with Insurance and we take all the care and precautionary measures but we cannot completely rule out every possibility of mishap or accident. Any such accident may result in manufacturing stoppage or other liability on our company as have happened in past on March 29, 2012 due to electricity fluctuations our manufacturing facility caught fire in which noticeable amount of stocks and machinery was damaged although we were covered with insurance.

**6. The average cost of acquisition of our promoters is less than the Issue price.**

Our promoters Mr. Nilesh Kumar Jhalani, Mr. Rohit Kumar Jhalani and Mr. Devraj Jhalani have acquired the equity shares in our company at Rs. 3.74, Rs. 6.87 and Rs. 3.04 per share respectively which is lower than the issue price of Rs. 19 per share. For further details regarding average cost of acquisition of equity shares by our promoters in our Company, please refer to the chapter titled “Capital Structure” beginning on page 55 of this Prospectus.

**7. Our Order Book does not represent our future revenues and our actual income may be significantly less than the estimates reflected in our Order Book, which could adversely affect our results of operations.**

The Company has orders from which it expects future revenue and profit. Order Book refers to a compilation of our expected revenues from uncompleted projects received. Projects in the order book represent business that is considered firm. Our Order Book does not necessarily indicate future earnings related to the performance of that work, as cancellations or unanticipated variations or scope or schedule adjustments may occur. Due to changes in project scope and schedule, we cannot predict with certainty when or if contracts in our Order Book will be performed. In addition, even where a project proceeds as scheduled, it is possible that contracting parties may default and fail to make the payments due. We cannot guarantee that the income anticipated in our Order Book will be realized, or, if realized, will be realized on time or result in profits. Any project cancellations or scope adjustments, which may occur from time to time, could reduce the amount of our Order Book and the income and profits that we ultimately earn from the contracts. Any delay, cancellation or payment default could have a material adverse effect on our business. For some of the contracts in our Order Book, our clients are obliged to perform or take certain actions, such as acquiring land, securing the right of way, clearing forests, providing owner supplied material, securing required licenses, authorizations or permits, making advance payments or opening of letters of credit, approving designs, approving supply chain vendors and shifting existing utilities. If a client does not perform such actions in a timely manner, and the possibility of such failure is not provided for in the contract, our projects could be delayed, modified or cancelled. Accordingly, the realization of our Order Book and the effect on our results of operations may vary significantly from reporting period to reporting period depending on the nature of such contracts, actual performance of such contracts, as well as the stage of completion of such contracts as of the relevant reporting date as it is impacted by applicable accounting principles affecting revenue and cost recognition.

**8. Our Company had negative cash flows from our operating activities, investing activities as well as financing activities in some of the previous year(s):**

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. **9. *In case of our inability to obtain, renew or maintain the statutory and regulatory licenses, permits and approvals required to operate our business it may have a material adverse effect on our business.***

We require certain statutory and regulatory permits, licenses and approvals to operate our business. We believe that we have obtained all the requisite permits and licenses which are adequate to run our business. However, there is no assurance that there are no other statutory/regulatory requirements which we are required to comply with.

However, some of the approvals are granted for a fixed period of time and need renewal from time to time. We are required to renew such permits, licenses and approvals. Further, certain licenses and registrations obtained by our Company contain certain terms and conditions, which are required to be complied with. Any default by our Company in complying with the same, may result in interalia the cancellation of such licenses, consents, authorizations and/or registrations, which may adversely affect our operations. There can be no assurance that the relevant authorities will issue or renew any of such permits or approvals in time or at all. Failure to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business.

## OVERVIEW OF INDIAN POWER - TRANSMISSION / DISTRIBUTION EQUIPMENT INDUSTRY

### Introduction

Power is one of the most critical components of infrastructure crucial for the economic growth and welfare of nations. The existence and development of adequate infrastructure is essential for sustained growth of the Indian economy.

India's power sector is one of the most diversified in the world. Sources of power generation range from conventional sources such as coal, lignite, natural gas, oil, hydro and nuclear power to viable non-conventional sources such as wind, solar, and agricultural and domestic waste. Electricity demand in the country has increased rapidly and is expected to rise further in the years to come. In order to meet the increasing demand for electricity in the country, massive addition to the installed generating capacity is required.

India ranks third among 40 countries in EY's Renewable Energy Country Attractiveness Index, on back of strong focus by the government on promoting renewable energy and implementation of projects in a time bound manner.

### Market Size

Indian power sector is undergoing a significant change that has redefined the industry outlook. Sustained economic growth continues to drive electricity demand in India. The Government of India's focus on attaining 'Power for all' has accelerated capacity addition in the country. At the same time, the competitive intensity is increasing at both the market and supply sides (fuel, logistics, finances, and manpower).

Total installed capacity of power stations in India stood at 308834 Megawatt (MW) as of November, 30<sup>th</sup> 2016. Electricity generation rose 5.62% year-on-year to 1108 MW during in financial year 2015-16. The Planning Commission's 12th Five-Year Plan estimates total domestic energy production to reach 669.6 Million Tonnes of Oil Equivalent (MTOE) by 2016–17 and 844 MTOE by 2021–22. India's wind power capacity, installed in 2016, is estimated to increase 20% over last year to 2,800 MW@, led by favourable policy support that has encouraged both independent power producers (IPP) and non-IPPs. India is expected to add nearly 4,000 MW# of solar power in 2016, nearly twice the addition of 2,133 MW in 2015.

India's wind energy market is expected to attract investments totalling Rs 1,00,000 crore (US\$ 14.91 billion) by 2020, and wind power capacity is estimated to almost double by 2020 from over 23,000 MW in June 2015, with an addition of about 4,000 MW per annum in the next five years. With a production of 1368 TWh (Terawatt hours) in 2015, India is the third largest producer and the fourth largest consumer of electricity in the world.

**World's leading electricity producers in 2015 (TWh)**

## Power Generation in India

With electricity production of 1,107.8 BU in India in FY16, the country witnessed growth of around 5.62% over the previous fiscal year. Over FY10-16, electricity generation grew at CAGR of 6.21%. During April-September 2016, electricity production in India reached 584.22 BU.

### History

Late Sh. Shiv Kumar Jhalani (Ex. MLA of Ratlam city, Ex- Chairman of Maulana Azad University) with his brothers Sh. Chetanya Kumar Jhalani, Sh. Indranarayan Jhalani, Sh. Trilok Kumar Jhalani and Sh. Umesh Kumar Jhalani founded our Company and all the group entities. It all started in the year 1959-60 with M/s Ratlam Electric Store which was formed for distribution and trading of electrical products. The group gradually entered into the field of Electrical Engineering - Manufacturing by setting up its first Manufacturing unit in Ratlam in the year 1967 in the name of M/s Shri Ram Industries, a partnership firm. Later we setup another group entity M/s Shri Ram Switchgears, (Ratlam) in the year 1976 for manufacturing of electrical products. In 1984, we set up M/s Shri Ram Switchgears (Maharashtra) to expand our reach and operations in the state of Maharashtra.

After the Incorporation of our company, our company signed a lease agreement with the Madhya Pradesh Government for allotment of Plot 14-15, Industrial Estate, Ratlam, MP on lease for 99 years to manufacture Distribution boxes initially. The current promoters of our Company took over the business from their grand parents.

We executed our first major order worth Rs. 2.12 Crores from Maharashtra State Electricity Distribution Company Limited for supplying Distribution Boxes in the year 1994. Later in 1999 we included Transformers in our manufacturing portfolio. To enhance the production and bring precision in our products we modernized our processes and imported Optical Fiber Laser Cutting Machine from Italy in the year 2014.

Further, the Market Maker(s) shall inform the Exchange in advance for each and every black out period when the quotes are not being offered by the Market Maker(s).

6. There would not be more than five Market Makers for a script at any point of time and the Market Makers may compete with other Market Makers for better quotes to the investors. At this stage, Choice Equity Broking Private Limited is acting as the sole Market Maker.
7. On the first day of the listing, there will be pre-opening session (call auction) and there after the trading will happen as per the equity market hours. The circuits will apply from the first day of the listing on the discovered price during the pre-open call auction.
8. The Market Maker may also be present in the opening call auction, but there is no obligation on him to do so.
9. There will be special circumstances under which the Market Maker may be allowed to withdraw temporarily/fully from the market – for instance due to system problems, any other problems. All controllable reasons require prior approval from the Exchange, while force-majeure will be applicable for non-controllable reasons. The decision of the Exchange for deciding controllable and non-controllable reasons would be final.
10. The Market Maker(s) shall have the right to terminate said arrangement by giving one month notice or on mutually acceptable terms to the Merchant Banker, who shall then be responsible to appoint a replacement Market Maker(s).

In case of termination of the above mentioned Market Making agreement prior to the completion of the compulsory Market Making period, it shall be the responsibility of the Lead Manager to arrange for another Market Maker(s) in replacement during the term of the notice period being served by the Market Maker but prior to the date of releasing the existing Market Maker from its duties in order to ensure compliance with the requirements of regulation 106V of the SEBI (ICDR) Regulations, 2009. ## BASIS OF ESTIMATION

The incremental working capital requirements are based on historical Company data and estimation of the future requirements in FY 2016-17 considering the growth in activities of our Company and in line with norms generally accepted by banker(s).

We have estimated future working capital requirements based on the following:

(No. of Days)

Particulars	Basis	2014-15	2015-16	2016-17	2017-18
Receivables	Collection Period	5.84	7.24*	3.00	3.00
Inventory					
- Raw Material	Cost of Purchase	2.86	2.52	1.00	1.00
- Work In Progress	Cost of Production	1.80	2.49	2.00	2.00
- Finished Goods	Cost of Sales	0.67	0.60	0.40	0.40
Payables	Credit Period	2.37	4.24*	2.00	2.00

\*During the financial year 2015-16, debtors are on higher side because the delivery of materials for projects were generally made at the end of the year for which payments were received in subsequent months. Likewise, creditors are on higher side as we could not make payment for material purchased from them at the year-end as our payment from debtors were not received.

#### OVERVIEW OF INDIAN ECONOMY

India, a South Asian nation, is the seventh-largest country by area, the second-most populous country with over 1.25 billion people, and the most populous democracy in the world. India is the fourth largest economy in the world in terms of purchasing power parity (PPP). India has emerged as the fastest growing major economy in the world as per the Central Statistics Organisation (CSO) and International Monetary Fund (IMF). According to the Economic Survey 2015-16, the Indian economy will continue to grow more than 7% in 2016-17. The improvement in India's economic fundamentals has accelerated in the year 2015 with the combined impact of strong government reforms, RBI's inflation focus supported by benign global commodity prices.

India was ranked the highest globally in terms of consumer confidence during October-December quarter of 2015, continuing its earlier trend of being ranked the highest during first three quarters of 2015, as per the global consumer confidence index created by Nielsen.

According to IMF World Economic Outlook Update (January 2016), Indian economy is expected to grow at 7-7.75% during FY 2016-17, despite the uncertainties in the global market. The Economic Survey 2015-16 had forecasted that the Indian economy will growing by more than 7% for the third successive year 2016-17 and can start growing at eight% or more in next two years.

The steps taken by the government in recent times have shown positive results as India's gross domestic product (GDP) at factor cost at constant (2011-12) prices 2015-16 is Rs 113.5 trillion (US\$ 1.668 trillion), as against Rs 105.5 trillion (US\$ 1.55 trillion) in 2014-15, registering a growth rate of 7.6%. The economic activities which witnessed significant growth were 'financing, insurance, real estate and business services' at 11.5% and 'trade, hotels, transport, communication services' at 10.7%.

Indian GDP (at 2011-12 prices) revived to 7.3% in Q2FY17 as compared to 7.1% in the previous quarter and 7.7% in Q2FY16. The acceleration in the GDP growth was driven by the marked improvement in the agriculture sector, while this growth momentum is not likely to sustain in the coming quarter due to the disruption in the economy caused by government's latest move to abolish high-denomination notes.

Gross value added (GVA), which is adjusted for subsidies and taxes to arrive at GDP, grew at 7.1% v/s 7.3% (each) in Q1FY17 and Q2FY17. Within the three broad sectors of the economy, growth in industry and services sectors eased compared to previous quarter, while agriculture showed the significant improvement. Agriculture sector output increased to a 10-quarter high at 3.3% in the just-concluded quarter v/s 1.8% in Q1FY17 and 2.0% in Q2FY16 as near normal monsoon this season has boosted kharif crops production. Services sector GVA eased to 8.9% (9.6% in Q1FY17 and 9.0% in Q2FY16) on the bank of low growth in trade, hotel and restaurants segment and financial services. Meanwhile, the growth in services sector was supported by the improved output of public adm., defence and other services segment (12.5% in Q2FY17 v/s 12.3% in Q1FY17 and 6.9% in Q2FY16) sharply benefitted from the rise in the growth of the union government's total expenditure. Industrial output grew by just 5.2% in reported quarter (6.3% in Q2FY16 and 6.0% in Q1FY17) on account of poor performance of mining and manufacturing sectors.

### Current Account Deficit

For the entire 2015-16 fiscal, CAD stood at 22.1 billion 1.1% of the GDP as against 26.8 billion 1.8% for 2014-15, according to Reserve Bank of India data. India's current account deficit (CAD) declined sharply to \$0.3 billion 0.1% of Gross Domestic Product in the fourth quarter of ended March 2016 (FY16) from \$ 7.1 billion 1.3%, in third quarter ended December 2015, on account of lower trade gap. The trade deficit in the fourth quarter of FY16 stood at \$24.8 billion compared to \$31.6 billion in Q4 of 2014-15. The country's trade deficit was \$130.1 billion for FY16 while for FY15 it stood at \$144.9 billion. India posted a current account deficit (CAD) of \$277 million, or 0.1% of gross domestic product (GDP), in the April-June quarter—same as in the preceding quarter—belying expectations of a surplus, data released by the Reserve Bank of India (RBI) showed.

### Index of Industrial Production

India's factory output, as measured by index of industrial production (IIP), contracted 1.9% in October after rising 0.7% in September. Data released by the Central Statistics Office showed that in October, both mining and manufacturing contracted while electricity registered positive growth. While mining shrank 1.1%, manufacturing contracted by 2.4%. Electricity generation grew 1.1%. But worryingly, capital goods production—a key indicator of the investment demand in the economy—contracted for the twelfth consecutive month, by 26%. Consumer goods production also contracted in October after registering positive growth for five consecutive months. Consumer goods declined by 1.2%, with non-durable goods falling by 3.0% and growth in consumer durable goods moderating to 0.2%.

### Foreign Direct Investments

According to Department of Industrial Policy and Promotion (DIPP), the total FDI investments India received in FY 2015-16 (April 2015-March 2016) was US\$ 40 billion, indicating that government's effort to improve ease of doing business and relaxation in FDI norms is yielding results.

Data for FY 2015-16 indicates computer hardware and software segment attracted the highest FDI equity inflow of US\$ 6.9 billion, followed by the computer hardware and software sector (US\$ 5.9 billion). Most recently, the total FDI equity inflows for the month of March 2016 touched US\$ 2.47 billion as compared to US\$ 2.12 billion in the same period last year.

Healthy inflow of foreign investments into the country helped India's balance of payments (BoP) situation and stabilised the value of rupee.

FDI in India witnessed an increase of 29% and reached US\$ 40 billion during April 2015-March 2016 as compared to US\$ 30.93 billion in the same period last year.

According to the data released by Grant Thornton India, the total merger and acquisitions (M&A) and private equity (PE) deals in the month of April 2016 were valued at US\$ 5.5 billion (100 deals), which is 2.2 times higher as compared to April 2015.

India has also overtaken China as world's top foreign direct investment (FDI) destination with US\$ 63 billion of FDI announced in 2015 including high-value project announcements across the coal, oil and natural gas, and renewable energy sectors.

## **OVERVIEW OF INDIAN POWER - TRANSMISSION / DISTRIBUTION EQUIPMENT INDUSTRY**

### **Introduction**

Power is one of the most critical components of infrastructure crucial for the economic growth and welfare of nations. The existence and development of adequate infrastructure is essential for sustained growth of the Indian economy.

India's power sector is one of the most diversified in the world. Sources of power generation range from conventional sources such as coal, lignite, natural gas, oil, hydro and nuclear power to viable non-conventional sources such as wind, solar, and agricultural and domestic waste. Electricity demand in the country has increased rapidly and is expected to rise further in the years to come. In order to meet the increasing demand for electricity in the country, massive addition to the installed generating capacity is required.

India ranks third among 40 countries in EY's Renewable Energy Country Attractiveness Index, on back of strong focus by the government on promoting renewable energy and implementation of projects in a time bound manner.

### **Market Size**

Indian power sector is undergoing a significant change that has redefined the industry outlook. Sustained economic growth continues to drive electricity demand in India. The Government of India's focus on attaining 'Power for all' has accelerated capacity addition in the country. At the same time, the competitive intensity is increasing at both the market and supply sides (fuel, logistics, finances, and manpower).

Total installed capacity of power stations in India stood at 308834 Megawatt (MW) as of November, 30<sup>th</sup> 2016. Electricity generation rose 5.62% year-on-year to 1108 MW during in financial year 2015-16. The Planning Commission's 12th Five-Year Plan estimates total domestic energy production to reach 669.6 Million Tonnes of Oil Equivalent (MTOE) by 2016-17 and 844 MTOE by 2021-22. India's wind power capacity, installed in 2016, is estimated to increase 20% over last year to 2,800 MW@, led by favourable policy support that has encouraged both independent power producers (IPP) and non-IPPs. India is expected to add nearly 4,000 MW# of solar power in 2016, nearly twice the addition of 2,133 MW in 2015.

India's wind energy market is expected to attract investments totalling Rs 1,00,000 crore (US\$ 14.91 billion) by 2020, and wind power capacity is estimated to almost double by 2020 from over 23,000 MW in June 2015, with an addition of about 4,000 MW per annum in the next five years. With a production of 1368 TWh (Terawatt hours) in 2015, India is the third largest producer and the fourth largest consumer of electricity in the world.

**World's leading electricity producers in 2015 (TWh)**

**Power Generation in India**

With electricity production of 1,107.8 BU in India in FY16, the country witnessed growth of around 5.62% over the previous fiscal year. Over FY10-16, electricity generation grew at CAGR of 6.21%. During April-September 2016, electricity production in India reached 584.22 BU.

The 12th five-year plan projects that, by 2016-17, total domestic energy production would reach 669.6 Million Tonnes of Oil Equivalents (MTOE) and would further increase to 844 MTOE by 2021-22.

## Sources of Power with Share in Total Installed Capacity

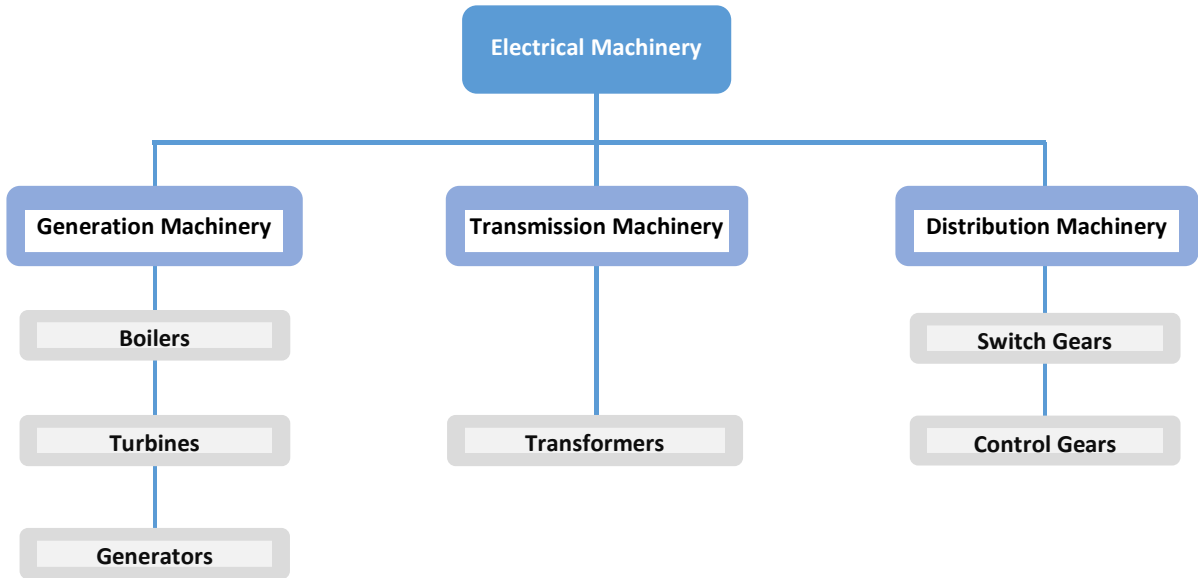

## Indian Electrical Machinery, Transformer, Transmission & Distribution Industry

A transformer is a voltage changer, used to either step down or step up power depending on its installation base. There are largely two categories of transformers based on function i.e. power and distribution transformers. Other special transformers that are differentiated on usage include welding, traction, furnace etc. Many players have the capability to manufacture up to 400 kV, however with Ultra Mega Power Plants coming up, need for higher rating transformers is felt, which has opened doors for 765 kV rating transformers.

A Power Transformer is installed at the generation site right up to the last substation just before distribution activities commence. This transformer is used to either step up or step down power to match the voltage requirements. They are oil filled transformers with its range spanning from 11kV – 765kV. Power transformers would account for about 65-68% of the total value of the transformer industry.

## Electrical Machinery Segment Structure

A distribution transformer is used to transfer power from a substation to the final point of consumption. The basic purpose of a distribution transformer is to provide end users with low voltage power. A distribution transformer could either be oil filled or dry type by nature, with range spanning from 1.1 – 11kV. Distribution transformers would account for the remaining 32-35% of the total value of the transformer industry.

A dry type transformer is used where there is space constraint and higher chances occurrences of fire. These are mostly used by industrial and corporate clients at software parks, hotels, hospitals, high rise buildings, etc. These transformers are categorized as distribution transformers due to their nature of operation, i.e. at end user's locations.

In India, many players belong to the unorganized segment of the industry and cater to the smaller ratings distribution transformer demand. This is due to lack of infrastructure, testing facilities and technical skill sets available with them. However, over the period of time, many of these smaller players moved up the value chain and graduated to the higher rating transformers. Despite this the number of players qualified for the larger variants of transformers is still small to serve upcoming demand expected over the forthcoming years.

SEBs act as nodal points for execution of government projects as they are authorized to float tenders and allot contracts depending on the bidder's compliance with various parameters. SEBs in the past accounted for 75-80% of the total transformer demand, followed by industrial (15%) and export demand (5-10%). Private segment demand has been from various power consuming industries viz steel, aluminium, cement, oil and gas, automobiles, engineering, mining and minerals, paper pulp, chemical and petrochemicals etc.

As a nation, our overall transformation norm stood at 7MVA/MW levels in 2008 and the policy makers had a plan to reach the levels of 11MVA/MW levels in the 12th plan. But, due to various factors and the state of DISCOMS largely, we are still hovering around the 8 to 8.5 MVA/MW levels. Over the last 2 years, the lack of new Transmission project orders, poor state of the DISCOMS and the tepid industrial activity had kept the industry in a low performing state with demand stagnation. This also led to an increased price pressure and smaller players losing out closing down operations.

### **New hope of revival in the Industry**

The aggressive activities of the NDA 2 Government in the Energy sector and overall positive investment climate has led to most players feeling more hopeful on the industry prospects. Even though the actions have not led to a huge increase in order booking yet but most industry players are seeing signs of revival and expect this to open in the near future. Some key initiatives and actions that have led to this cautious optimism are:

1. Existing and planned projects and orders from the RE projects in India – Solar Parks and Projects and Wind projects
2. The opening up of new transmission projects and the de-bottlenecking of old stuck projects has led to order wins by many firms in the recent past for the Power Transformers.
3. The upcoming new transmission projects and the Green Energy Corridors will see more uptick in the Power Transformer Segment going forward.
4. The announcement of UDAY and the participation of 15 states already in the program has given many players some hope that the fiscal conditions of DISCOM's would improve and this would lead to more aggressive DTR purchases in the next few years to reduce the losses.
5. Even though the Government had announced 2 major schemes of Integrated Power Development Scheme (IPDS for the Urban areas) and Deendayal Upadhyaya Gram Jyoti Yojana (DDUGJY for the Rural areas), nothing of note till now has been seen on ground from these schemes. But now, with UDAY being implemented in many states, this will provide a framework for most utilities to absorb the additional investments in IPDS and DDUGJY programs and implement them on the ground more effectively.
6. The revival of investment in manufacturing and new CAPEX investments due to 'Make In India' has not yet happened but most industry players are cautiously optimistic about the same.

### History

Late Sh. Shiv Kumar Jhalani (Ex. MLA of Ratlam city, Ex- Chairman of Maulana Azad University) with his brothers Sh. Chetanya Kumar Jhalani, Sh. Indranarayan Jhalani, Sh. Trilok Kumar Jhalani and Sh. Umesh Kumar Jhalani founded our Company and all the group entities. It all started in the year 1959-60 with M/s Ratlam Electric Store which was formed for distribution and trading of electrical products. The group gradually entered into the field of Electrical Engineering - Manufacturing by setting up its first Manufacturing unit in Ratlam in the year 1967 in the name of M/s Shri Ram Industries, a partnership firm. Later we setup another group entity M/s Shri Ram Switchgears, (Ratlam) in the year 1976 for manufacturing of electrical products. In 1984, we set up M/s Shri Ram Switchgears (Maharashtra) to expand our reach and operations in the state of Maharashtra.

After the Incorporation of our company, our company signed a lease agreement with the Madhya Pradesh Government for allotment of Plot 14-15, Industrial Estate, Ratlam, MP on lease for 99 years to manufacture Distribution boxes initially. The current promoters of our Company took over the business from their grand parents.

We executed our first major order worth Rs. 2.12 Crores from Maharashtra State Electricity Distribution Company Limited for supplying Distribution Boxes in the year 1994. Later in 1999 we included Transformers in our manufacturing portfolio. To enhance the production and bring precision in our products we modernized our processes and imported Optical Fiber Laser Cutting Machine from Italy in the year 2014.

## **What Do We Manufacture**

### **A. Transformers**

A transformer is an electrical device that transfers electrical energy between two or more circuits through electromagnetic induction. Commonly, transformers are used to increase or decrease the voltages of alternating current in electric power applications.

#### Benefits of our Transformers:

- A. Low fire risk
- B. Non-hydroscopic
- C. High short circuit strength
- D. Free from partial discharge
- E. Low cost maintenance
- F. Space saving
- G. Environment friendly
- H. Higher overload capacity

#### Variants of Transformers

1. EHV (Extra High Voltage) Transformers
2. Power Transformers
3. Distribution Transformers
4. Unitized Sub-station
5. Special Application Transformers, etc.

### **EHV (Extra High Voltage) Transformers**

Transformers with primary voltage of 66 kV and above are conventionally termed as Extra High Voltage (EHV) Transformers. These transformers are generally used in the transmission sector. We have facility to manufacture EHV transformer upto 5 mVA - 132 kV class.

### **Power Transformers**

Transformers with primary voltage of 33 kV and above are conventionally termed as Power Transformers. These transformers are generally used in the transmission as well as distribution sector. We have the facility to manufacture Power transformer upto 10 mVA in 33 kV class.

### **Distribution Transformers**

Distribution transformers are used in the last leg of Power distribution to feed electricity to residential, industrial and bulk consumers. Transformers with primary voltage of 11 kV and below are termed as Distribution Transformers. We have a huge integrated facility to manufacture Oil cooled Distribution Transformers upto 3 mVA in 33 kV class.

*Distribution Transformers*

*Oil Tank at our factory for making Oil cooled Transformers*

### Unitised Sub-stations

A Unitised Sub-Station (USS) also known as a Packaged Sub-Station (PSS) or Compact Sub-Station (CSS) is a cost effective nutshell product. A USS comprises of various sub-station equipments housed inside a metal enclosure. The equipments include a step down transformer, a Vacuum Circuit Breaker (VCB) or a Ring Main Unit (RMU) on High Voltage (HV) side and Low Voltage (LV) distribution panel in LV side compartment. It is a pre-fabricated sub-station engineered to reduce size, increase safety and provide the customer with “One stop product” for all his power distribution needs. With our whole gamut of Power Distribution products, manufacturing of USS is just an extension of our engineering prowess.

We manufacture USS upto 3 mVA 33 kV class with Oil-Cooled Distribution Transformer. These USS are particularly useful in areas where there is a space constraint and safety issues like basement of high rise buildings, steel plants, refineries, mines, malls, theatres, IT & ITes companies etc.

*Unitized Sub-station with logo of the Customers as desired by them.*

### Special Application Transformers

A number of industry applications require specific industrial transformers due to the usage of electrical power as a major resource for production. These Special Application Transformers are like Isolation Transformers, Lighting Transformers, Electric arc furnace transformers (EAF), etc.

*Internal parts of Special Application Transformers*

We also manufacture sheet metal parts like control panels, etc. & switchgears which are used in the manufacturing of a Transformer. Some parts are also bought out from other manufacturers / traders including our group entities. In these parts, switchgears play a vital role in a Transformer. A switchgear is the combination of electrical disconnects switches, fuses or circuit breakers used to control, protect and isolate electrical equipment. Switchgear is used both to de-energize equipment to allow work to be done and to clear faults downstream. This type of equipment is directly linked to the reliability of the electricity supply. Our Company deals in Low Tension (L.T.) & High Tension (H.T.) Switchgear and Panel manufacturing. We have the whole range of Switchgears and Distribution products which are manufactured in our state of art plant in Ratlam (M.P.).

### B. Feeder Pillar

Feeder pillar is an effective electrical enclosure to provide electrical services for low voltage electrical distribution applications. It is designed as compact and robust for vandalism protection. The metal enclosure is made of sheet steel of minimum 2mm thickness mounted on a steel base frame of minimum 3mm thickness. Enclosure is suitable for outdoor application.

### C. Distribution Boxes

A Distribution Box is used in a larger system that helps to regulate the flow of electricity through a distribution board. The concept behind the box is to provide for the orderly flow of current so that circuitry is not overloaded, leading to potentially dangerous situations.

The typical electrical distribution box is equipped with a solid case made of metal that is capable of protecting the interior components from various adverse conditions, such as excessive exposure to heat or cold. The wiring and other parts that are contained within the box are usually mounted within the interior, helping to lessen the potential for the components to be damaged during any type of shifting that would otherwise create some type of abrasive action on wire coverings and other elements.

## COMPETITION

We operate in an increasingly high competitive market, with participants in the organized and the unorganized sector. We face competition from other manufacturers, traders, suppliers and importers of electric equipment in relation to our offerings. Suppliers in the electric equipment industry are based on key attributes including technical competence, product quality, strength of sales and distribution network, pricing and timely delivery. While our competitors in the organized sector focus more on technology and quality of their products, their unorganized counterparts supply their products at extremely competitive prices, which we may be unable to effectively compete with. For instance, we face competition from electric equipment of Chinese origin, primarily in the switchgear and lighting equipment verticals, which have gained significant presence in the Indian electric equipment market and which may be sold at more competitive prices than what we offer.

The deployment of manpower in manufacturing processes was limited to a few select industries such as jute, textile, chemicals etc. The legislation on creation and development of a fool proof multi-dimensional Social Security system, when the country's economy was in a very fledgling state was obviously a remarkable gesture towards the socio-economic amelioration of a workforce though limited in number and geographic distribution. The ESI Act, 1948, encompasses certain health related eventualities that the workers are generally exposed to; such as sickness, maternity, temporary or permanent disablement, Occupational disease or death due to employment injury, resulting in loss of wages or earning capacity-total or partial. Social security provision made in the Act to counterbalance or negate the resulting physical or financial distress in such contingencies, are thus, aimed at upholding human dignity in times of crises through protection from deprivation, destitution and social degradation while enabling the society the retention and continuity of a socially useful and productive manpower.

It also provides for the manner and time period within which a complaint shall be made to the Internal Complaints Committee i.e. a written complaint is to be made within a period of 3 (three) months from the date of the last incident. If the establishment has less than 10 (ten) employees, then the complaints from employees of such establishments as also complaints made against the employer himself shall be received by the Local Complaints Committee. Deferred tax expenses or benefit is recognized on timing differences being the difference between taxable income and accounting income tax originate in one period and is likely to reverse in one or more subsequent periods. RBI on March 13, 2014 amended the FEMA Regulations and laid down conditions and requirements with respect to investment by FPIs in Indian companies.

In terms of the SEBI FPI Regulations, any qualified foreign investor or FII who holds a valid certificate of registration from SEBI shall be deemed to be an FPI until the expiry of the block of three years for which fees have been paid as per the SEBI FII Regulations. An FII shall not be eligible to invest as an FII after registering as an FPI under the SEBI FPI Regulations. Further, a qualified foreign investor who had not obtained a certificate of registration as an FPI could only continue to buy, sell or otherwise deal in securities until January 06, 2015. Further, in terms of the FEMA Regulations, the total holding by each FPI shall be below 10.00% of the total paid-up Equity Share capital of our Company and the total holdings of all FPIs put together shall not exceed 24.00% of the paid-up Equity Share capital of our Company. The aggregate limit of 24.00% may be increased up to the sectorial cap by way of a resolution passed by the Board of Directors followed by a special resolution passed by the Shareholders of our Company and subject to prior intimation to RBI. In terms of the FEMA Regulations, for calculating the aggregate holding of FPIs in a company, holding of all registered FPIs as well as holding of FIIs (being deemed FPIs) shall be included. The existing individual and aggregate investment limits an FII or sub account in our Company is 10.00% and 24.00% of the total paid-up Equity Share capital of our Company, respectively.
