3. *Our company has not complied with some statutory provisions of the Companies Act. Such non-compliance may attract penalties against our Company which could impact the financial position of us to that extent.*

Our Company has not complied with certain statutory provisions under the Companies Act 1956 /2013, for instance our Company in the past has accepted certain amounts which are classified as deposits under the purview of Section 73 of the Companies Act, 2013. However all the unsecured loan falling outside the exemption from deposits provided under the Companies (Acceptance of Deposit) Rules have been repaid, and there are no such unsecured loans outstanding as on March 31, 2017.

Further, there are certain discrepancies noticed in some of our corporate records relating to forms filed with the Registrar of Companies. Any penalty or action taken by any regulatory authorities in future for non-compliance with provisions of corporate and other law could impact the financial position of the Company to that extent. Our Company has made some clerical mistakes in documents and form filed in registrar of Companies, for instance, in Annual Returns filed by our Company in past years, some errors inadvertently made by Company in disclosure in respect of share holding details of the shareholders. Further, also there are some cases where forms have been filed belatedly in Registrar of Companies for which requisite delayed fees was paid by the Company. Additionally, our Company has not complied with some Accounting Standards in the past such as AS-3 and AS-18. However, now the Company has made necessary compliance in the re-stated financial statements of the Company.

Also, the provisions of Section 196 of Companies Act, 2013 regarding appointment of Managing Director and Whole-time directors of the company for not more than 5 years at a time became applicable to the private companies with effect from 1st April 2014. Our Company had Mr. Mukesh Kacholia as Managing Director (MD) and Mr. Ayush Kacholia, Whole Time Director (WTD) since incorporation of the Company with no fixed term. Post applicability of provisions of Companies Act, 2013 as stated *ibid*, the Company has re-appointed our MD and WTD for a period of 5 years with effect from April 18, 2016 on the assumption of their first appointment being for 5 years ending on 17th April 2016. Although no show cause notice have been issued against the Company till date in respect of above, in the event of any cognizance being taken by the concerned authorities in respect of above, penal actions

may be taken against the Company and its directors, in which event the financials of the Company and its directors may be adversely affected.

4. *Our revenue is substantially dependent on sales income from Organic Feed & Grain Inc.(Bushman). Loss of business or breach of any terms of the agreement with Organic Feed & Grain Inc.(Bushman) may have an adverse effect on our revenue and profitability.*

Our Company alongwith our Promoter Group entity, M/s Agri Wing International has entered into an exclusive agreement dated May 19, 2015 with Organic Feed & Grain Inc.(Bushman), a United States corporation wherein our Company has agreed to produce on an exclusive basis, Organic Soymeal of Indian Origin for Organic Feed & Grain Inc. as per the specifications as mentioned in the agreement. Further, the agreement restricts our Company to sale organic soymeal produced from Insta Pro Extruders and Insta-Pro Oil Presses to the third parties. However, we may sell soymeal produced from non Insta-Pro extruders to other Customers. During the year ended March 2017, the revenue from Organic Feed & Grain Inc.(Bushman) was Rs. 71.55 crores which constitutes around 63% of the total revenue from operations as per restated financial statements. The company is taking all necessary steps to increase its revenue from other sources and reduce the dependency on the said arrangement however any breach of the terms of condition of the said agreement by any of the parties may lead to termination of the agreement and loss of customer which may adversely affect our revenues and profitability.

5. *Any fluctuations in prices of raw materials or shortage in supply of raw material for manufacturing our products, could adversely impact our business.*

Our Company is dependent mainly on the various raw materials and packaging materials required for the manufacturing of our products. Thus, we are exposed to risk of upward fluctuations in the prices of various raw materials and packing materials and their availability. Also, we have not entered into any supply agreements with our suppliers and all raw materials are bought by our Company from various suppliers on order to order basis. Any upward fluctuation in the prices of the major raw materials or shortage in supply of any major raw material would result in increase of cost of production which may adversely impact the business and profitability of the Company. In case we are not able to pass on any such increase to the consumers because of competition or otherwise, it may affect the profitability of the Company.

6. *Our business is seasonal in nature as it is dependent on the availability of agri-commodities, which in turn is impacted by several factors including weather condition. Poor weather conditions could result in unavailability of agri-commodities, which could adversely affect our business, financial condition and results of operations.*

Our business activities are dependent upon numerous factors including the production and consumption levels of agri-commodities. Production of agri-commodities is linked to various factors, including the weather conditions and natural disasters, change in cropping pattern, and fertility of land and other factors beyond the control of our Company. There is also the possibility that farmers currently growing agri-commodities may shift their efforts toward the production of other crops that we may not deal in or are not profitable for our services. To this extent our business is seasonal in nature. Poor weather conditions, amongst other such factors, could result in unavailability of agricommodities for our business, which could adversely affect our business, financial condition and results of operations.

7. *We have recently ventured into manufacturing of Soya Products. Due to limited operating history of our Company and limited experience of existing promoters in the line of soya products production, we may face new business and financial challenges which may adversely affect our profitability and results of operations.*

Our Company was incorporated in 2011 by conversion of partnership firm “M/s Shanti Overseas” into Company and has been engaged in the business of processing of agri - commodities. In F.Y. 2015-16, with an available business opportunity, our Company ventured into manufacturing of soya products i.e. Soya de-oiled cake (soya meal) and soya crude oil by setting up factory unit in Sonvai, Indore. Further, we entered in an exclusive agreement dated May 19, 2015 with Organic Feed & Grain Inc.(Bushman), a United States corporation wherein our Company agreed to produce on an exclusive basis, Organic Soymeal of Indian Origin for Organic Feed & Grain Inc.

Our Company has proposed to expand our manufacturing business by setting up of Soyabean plant in Dhannad, Indore. However, the Promoters of our Company have very limited prior experience in the manufacturing business, as they are engaged in the business of processing of agri-commodities. Due to limited operating history of our Company and limited experience of existing promoters in manufacturing of soya products, we may face new business and financial challenges which may adversely affect our profitability and results of operations.

Also, as a Company, we have limited financial history and our prior period financial results may not accurately represent our future financial performance and therefore prospective investors may not be able to assess our Company's prospects based on past results.

8. *Our business prospects and results of operations may be adversely affected if any future capacity expansion plans are not successfully implemented.*

We intend to use a portion of the Net Proceeds towards setting up of factory unit in Dhannad, Indore for manufacturing of soya products. We have already acquired the land admeasuring 2.055 hectares at Dhannad and have started building construction work. For details, please refer Chapter titled "**Objects of the Issue**" beginning on page 74 of this Prospectus. As we continue our proposed project, we may encounter regulatory, personnel and other difficulties that may increase our expenses, which could delay our plans or impair our ability to become profitable. A delay in the construction, commissioning or operation of proposed factory unit or an increase in the cost of construction or future manufacturing facilities not being as efficient as planned could have a material and adverse effect on our business and results of operations. In addition, we may have to make significant investment in upgrading our plant, machinery and other infrastructure at our manufacturing facilities. There can, however, be no assurance that such modernization plans will be successfully implemented or completed or that if completed, they will result in the anticipated growth in our revenues or improvement in the results of operations we anticipate from the implementation of such initiatives. In addition, the installed capacities at our manufacturing facilities was not fully utilised for the last three fiscals. For details, see Chapter titled "**Our Business**" on page 97 of this Prospectus. We cannot assure you that we will be able to completely utilize, in part or full, the proposed expansion of the installed capacities of our manufacturing facilities.

9. *Quality of product is very important in our industry and the success of our company is dependent on the quality of our product and any failure to maintain the quality of our products may have an adverse affect our reputation and business.*

We believe that our success is dependent on our quality of our product. Our quality control department ensures quality control at every stage of production, packaging and dispatch. We are also required to follow the proper control during our manufacturing process. We believe that we have built strong relationships with our customers due to the quality of our products which has translated into operational growth. We are subjected to inspection of the manufacturing process and product from various agencies. In the event we are unable to maintain our quality, for any reason whatsoever, our business, reputation and results of operations would be adversely affected

10. *Any delay in production at, or shutdown of, any of our manufacturing facilities, could adversely affect our business, results of operations and financial condition.*

The success of our manufacturing activities depends on, among others, the productivity of our workforce, compliance with regulatory requirements and the continued functioning of our manufacturing processes and machinery. Disruptions in our manufacturing activities could delay production or require us to shut down the affected manufacturing facility, which could adversely affect our finance and operations. Further our manufacturing facility is located in Indore, Madhya Pradesh any disruption in the location where our manufacturing facility is situated may also have an adverse impact on our operations.

11. *Our business is substantially dependent on our key clients from whom we derive a significant portion of our revenues. The loss of any significant clients may have a material and adverse effect on our business and results of operations.*

We derive a significant portion of our revenues from a limited number of clients. For the year ended March 31, 2017 our top five clients cumulatively accounted for aprox 83% of our total revenue from operations as per restated financial statements. In the event any one or more customers cease to continue doing business with us, our business may be adversely affected. The loss of such clients may be caused mainly because of competition. There may be factors other than our performance, which may not be predictable, which could cause loss of clients. Further, any significant reduction in demand for our products from our key clients, any requirement to lower the price offered by these clients, or any loss or financial difficulties caused to these clients, change in relationship with the clients could have a material adverse effect on our business, result of operations, financial conditions and cash flow.

While we are constantly striving to increase our customer base and reduce dependence on any particular customer, there is no assurance that we will be able to broaden our customer base in any future periods, or that our business or results of operations will not be adversely affected by a reduction in demand or cessation of our relationship with any of our major customers.

12. *Our Company has during the preceding one year from the date of the Prospectus have allotted Equity Shares at a price which is lower than the Issue Price.*

The Issue Price is not indicative of the price that will prevail in the open market following listing of the Equity Shares.

13. Any change in the technology may render our current technologies obsolete or require us to make substantial capital investment to cope with the market.

Technology upgradation is a regular process and it is also essential for providing the desired quality to the customers. We are taking all the possible steps to keep our manufacturing facilities in line with the latest technology. However any further upgradation in the technology may render our current technology obsolete and require us to upgrade the existing technology or implement new technology. Further implementing new technology may require us to incur huge capital expenditure which could affect our cash flows and result of operations.

14. Obsolescence, destruction, theft, breakdowns of our major plants or machineries or failures to repair or maintain the same may affect our business, cash flows, financial condition and results of operations

Obsolescence, destruction, theft or breakdowns of our major plants or machineries may significantly increase our machineries purchase cost and the depreciation of our plants and machineries, as well as change the way our management estimates the useful life of our plants and machineries. In such cases, we may not be able to acquire new plants or machineries or repair the damaged plants or machineries in time or at all, particularly where our plants or machineries are not readily available from the market or require services from original machinery manufacturers. Some of our major machineries or parts may be costly to replace or repair. We may experience significant price increases due to supply shortages, inflation, transportation difficulties or unavailability. Such obsolescence, destruction, theft, breakdowns, repair or maintenance failures or price increases may not be adequately covered by the insurance policies availed by our Company and may have an effect on our business, cash flows, financial condition and results of operations. For further details of our Plant and Machineries, please refer to chapter titled “*Our Business*” beginning on page 97 of the Prospectus.

15. Dependence upon transportation services for supply and transportation of our products are subject to various uncertainties and risks, and delays in delivery may result in rejection of products by customer.

We depend on transportation services to deliver our products. We rely on third parties to provide such services. Disruptions of transportation services because of weather related problems, strikes, lock-outs, inadequacies in road infrastructure or other events could impair our procurement of raw materials and our ability to supply our products to our customers. There is no assurance that such disruptions will not occur in the future. Any such disruptions could materially adversely affect our business, financial condition and results of operations.

16. Our Company has not yet placed orders for machineries aggregating Rs. 274.10 lacs required by us for the proposed expansion. Any delay in placing the orders / or supply of plant and machinery may result in time and cost overruns, and may affect our profitability.

Our Company proposes to acquire machineries aggregating Rs. 274.10 lacs for our proposed expansion plan, which is 27.36% of the Issue Proceeds. Our Company has identified the machineries to be acquired and has received the quotations from the suppliers, but we have not placed final orders for plant and machinery aggregating to Rs. 274.10 lacs which are proposed to be acquired for our expansion plan, however nominal advance amount has been paid to them. Our Company is further subject to risks on account of inflation in the price of plant and machinery.

Since the funding for the plant and machinery is from the IPO proceeds, any delay in access to IPO proceeds would eventually delay the process of placing the orders. The purchase of machineries would require us to consider factors including but not limited to pricing, delivery schedule and after-sales maintenance. There may be a possibility of delay at the supplier’s end in providing timely delivery of these equipments, which in turn may delay the implementation of our expansion plan. For further details read section “*Objects of the Issue*” beginning on page 74 of the Prospectus.

Such issues could have adverse effect on our business, and results of operations.

24. We have incurred substantial indebtedness which exposes us to various risks which may have an adverse effect on our business and results of operations

Our ability to borrow and the terms of our borrowings will depend on our financial condition, the stability of our cash flows, general market conditions, economic and political conditions in the markets where we operate and our capacity to service debt. As on May 31, 2017, our total outstanding indebtedness was ₹ 2449.47 Lakhs.

As a result of the same they will be able to exercise significant influence over the control of the outcome of the matter that requires approval of the majority shareholders vote. Such a concentration of the ownership may also have the effect of delaying, preventing or deterring any change in the control of our company. In addition to the above, our promoters will continue to have the ability to take actions that are not in, or may conflict with our interest or the interest of some or all of our minority shareholders, and there is no assurance that such action will not have any adverse effect on our future financials or results of operations.

46. Certain data mentioned in this Prospectus has not been independently verified.

We have not independently verified data from industry publications contained herein and although we believe these sources to be

reliable, we cannot assure that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the limitation that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

EXTERNAL RISK FACTORS

47. The Companies Act, 2013 and SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 have effected significant changes to the existing Indian company law/ listing framework, which may subject us to higher compliance requirements and increase our compliance costs.

A majority of the provisions and rules under the Companies Act, 2013 have come into effect. The Companies Act, 2013 has brought into effect significant changes to the Indian company law framework, such as in the provisions related to issue of capital (including provisions in relation to issue of securities on a private placement basis), disclosures in offering documents, corporate governance norms, accounting policies and audit matters, related party transactions, introduction of a provision allowing the initiation of class action suits in India against companies by shareholders or depositors, a restriction on investment by an Indian company through more than two layers of subsidiary investment companies (subject to certain permitted exceptions), prohibitions on loans to directors and insider trading and restrictions on directors and key managerial personnel from engaging in futures trading. Further, the Companies Act, 2013 imposes greater monetary and other liability on us and our directors for any non-compliance.

To ensure compliance with the requirements of the Companies Act, 2013 and SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention. The Companies Act, 2013 introduced certain additional requirements which do not have corresponding equivalents under the Companies Act, 1956. Accordingly, we may face challenges in interpreting and complying with such provisions due to the limited jurisprudence on them. In the event our interpretation of such provisions of the Companies Act, 2013 differs from, or contradicts with, any judicial pronouncements or clarifications issued by the Government in the future, we may face regulatory actions or we may be required to undertake remedial steps. Further, we cannot currently determine the impact of provisions of the Companies Act, 2013 which are yet to be notified. Any increase in our compliance requirements or in our compliance costs may have an adverse effect on our business and results of operations.

48. Regional hostilities, terrorist attacks, communal disturbances, civil unrest and other acts of violence or war involving India and other countries may result in a loss of investor confidence and adversely affect the financial markets and our business.

Terrorist attacks, civil unrest and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. In addition, the Asian region has from time to time experienced instances of civil unrest and hostilities among neighboring countries. Hostilities and tensions may occur in the future and on a wider scale. Military activity or terrorist attacks in India, may result in investor concern about stability in the region, which may adversely affect the price of our Equity Shares. Events of this nature in the future, as well as social and civil unrest within other countries in the world, could influence the Indian economy and could have an adverse effect on the market for securities of Indian companies, including our Equity Shares.

49. Changing laws, rules and regulations and legal uncertainties in India, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. For further details please refer to the chapter "***Government and Other Approvals***" on page 246 for details of the laws currently applicable to us. There can be no assurance that the central or the state governments in India may not implement new regulations and policies which will require us to obtain approvals and licenses from the central or the state governments in India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the implementation of the new regulations may have a material adverse effect on all our business, financial condition and results of operations. In addition, we may have to incur capital expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. For instance, the Government has proposed a comprehensive national goods and services tax ("***GST***") regime that will combine taxes and levies by the Central and state Governments into a unified rate structure. Given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to the tax regime following implementation of the GST. The implementation of this new structure may be affected by any disagreement between certain state Governments, which could create uncertainty. Any such future amendments may affect our overall tax efficiency, and may result in

significant additional taxes becoming payable.

50. *Instability in financial markets could materially and adversely affect our results of operations and financial condition.*

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

51. *Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

52. *Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares.*

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in effect in India, transfer of shares between non residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

53. *If certain labour laws become applicable to us, our profitability may be adversely affected.*

India has stringent labour legislations that protect the interests of workers, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Any change or modification in the existing labour laws may affect our flexibility in formulating labour related policies.

54. *Political, economic and social changes in India could adversely affect our business.*

Our business, and the market price and liquidity of our Company's shares, may be affected by changes in Government policies, including taxation, social, political, economic or other developments in or affecting India could also adversely affect our business. Since 1991, successive governments have pursued policies of economic liberalization and financial sector reforms including significantly relaxing restrictions on the private sector. In addition, any political instability in India may adversely affect the Indian economy and the Indian securities markets in general, which could also affect the trading price of our Equity Shares.

SECTION III: INTRODUCTION

SUMMARY OF OUR INDUSTRY

Global Scenario

Global economic activity and trade picked up modestly from the later part of 2016. The firming up of commodity prices led to some uptick in inflation in major advanced economies (AEs). Recessionary conditions ebbed in key commodity exporting emerging market economies (EMEs), setting the stage for a turnaround in EMEs as a group.

Since the MPR of October 2016, global growth picked up modestly towards end-2016, and is projected to improve further in 2017 by multilateral agencies. Growth in EMEs moderated in 2016, but is set to improve with the ebbing of recessionary conditions in key commodity exporting countries. Even though world trade appeared to have emerged out of a trough, new risks have emerged from an increasing tendency towards protectionist policies and heightened political tensions. Commodity prices have risen since late 2016 on improvement in US economic indicators such as strong labour market and consumer spending; infrastructure spending in China; and geopolitical concerns. Crude oil prices firmed after the OPEC announced curtailment of production. Inflation edged up on expectations of reflationary fiscal policies in the US, rising energy prices and a mild strengthening of demand.

International financial markets were impacted by the US election results and expectations of monetary policy tightening by the Federal Reserve, underpinned by hawkish forward guidance. Financial markets in EMEs briefly turned volatile after the US election due to large capital outflows leading to plunges in currency and equity markets. Nevertheless, average volatility remained contained by historical standards since Q4:2016. Bond yields hardened across the globe in tandem with US yields, before softening somewhat since mid-March. Strengthening of the US economy further buoyed the equity markets, while the increasing likelihood of more rate hikes by the Federal Reserve in 2017 hardened bond yields in AEs. The US dollar appreciated to a multi-year high in December and remained bullish.

IMF views on India:

India continues to be the fastest growing major economy in the world. As per provisional estimates, real GDP grew by 7.9 percent in 2015-16 compared with 7.2 per cent in 2014-15. The second advance estimate for GDP growth for 2016-17 is placed at 7.1 percent. The currency reform initiative will move the Indian economy to a less cash trajectory, increase tax compliance and reduce the threats from counterfeit currency which acts as a source of terror funding. Growth is expected to gain strength in the following years due to externalities derived from deep structural reforms implemented by our Government and robust aggregate demand. Indian economy Overview

India continues to be the fastest growing major economy in the world. As per provisional estimates, real GDP grew by 7.9 percent in 2015-16 compared with 7.2 per cent in 2014-15. The second advance estimate for GDP growth for 2016-17 is placed at 7.1 percent. The currency reform initiative will move the Indian economy to a less cash trajectory, increase tax compliance and reduce the threats from counterfeit currency which acts as a source of terror funding. Growth is expected to gain strength in the following years due to externalities derived from deep structural reforms implemented by our Government and robust aggregate demand.

CPI inflation which has been easing since August 2016 increased modestly to 3.65 percent in February 2017 against 3.17 percent in January 2017. Though it has marginally raised to 3.81 percent in March, 2017, it is well within the medium term CPI inflation target of 4 percent.

At the system level, our banks are adequately capitalized. At the same time, we are deeply aware of the problem of non-performing loans (NPLs) which are in the process of being effectively resolved. Policies for resolution of NPLs including optimal structuring of credit facilities, change in ownership/management, deep restructuring of stressed assets and facilitation of speedy exit from unviable accounts have been put in place. Additionally, the amendments to debt recovery laws as well as the enactment of Insolvency and Bankruptcy Code 2016 would provide enabling infrastructure to deal effectively with the recovery of NPLs in a time bound manner.

The Government is infusing capital in Public Sector Banks (PSBs) to meet their capital requirements in line with global risk norms and to spur credit growth. Recent announcements made by our Prime Minister for the provision of cost effective credit to farmers and housing loans to the poor including enhanced access of credit for MSMEs would enlarge the scope of institutional credit delivery to the hitherto under-banked segments of the economy.

The progress of our financial inclusion efforts has been remarkable with 282 million accounts opened by banks under the no-frills PMJDY so far. The objective of the scheme is to provide all households in the country with financial services, with special focus on empowering the weaker sections of society, including women, small and marginal farmers and laborers, both rural and urban. Attractive low cost life and health insurance and pension plans introduced by the Government have expanded the social safety net for weaker sections of the society. Micro Units Development and Refinance Agency (MUDRA) is active in facilitating structured microcredit deliveries to small scale entrepreneurs for productive activities. Supported by AADHAR, the biometric based unique identity system for individuals, the ongoing rapid expansion of digital payment mechanisms will provide large push to our financial inclusion efforts.

The wide ranging liberalisation of the FDI policy in recent years is expected to provide major impetus to employment and job creation. Most of the sectors, except a small negative list, are now under the automatic approval route. India is now the most open economy in the world for FDI. Net FDI inflows during April-February 2016-17 increased to US \$ 35.25 billion from US \$ 34.49 billion during the same period in the previous year. The increasing strength of economic fundamentals has made India the most sought after destination for investments.

India's foreign exchange reserves were placed at US \$ 368.99 billion as of April 7, 2017. The Current Account Deficit (CAD) was very much at sustainable level of 1.3 percent and 1.1 percent in 2014-15 and 2015-16, respectively. The CA deficit for the three quarters of 2016-17 improved further to 0.7 percent of GDP.

Introduction

Indian Food Processing Sector

The Food Processing sector in India, a sunrise sector, is poised for immense growth and greater contribution to the world food trade. The sector has witnessed a number of initiatives undertaken by the Government since June 2014 primarily aimed at scaling up infrastructure for storage and transport, tackling the issue of food wastage in the country and creating value addition that will benefit both producers and consumers in the country through facilitating domestic and foreign investment in the sector. The growth rate of Gross Value Added (GVA) in food Processing industries has increased from 1.91% in 2013-14 to 5.78% in 2014-15 at constant prices. India is the largest producer of milk and second largest producer of a variety of fruits and vegetables in the world. However, food is being wasted at the harvest point and during transportation. India witnesses nearly 4.6 - 15.9 % wastage in fruits and vegetables annually, due to lack of modern harvesting technologies and cold chain infrastructure. The wastage levels in other perishables are also significantly high; 5.2 % in inland fish, 10.5 % in marine fish, 2.7 % in meat and 6.7 % in poultry.

To tackle this critical issue, Government is sanctioning and operationalizing more cold chain infrastructure in the country with the objective of reducing food wastage by 50% over next 2 years. In addition, by opening up the sector, the Government is keen to bring in advanced technology into the supply chain thereby combating the losses incurred during the value chain. The food industry, which was valued at USD 39.71 billion in 2013 is expected to grow at a Compounded Annual Growth Rate (CAGR) of 11 percent to USD 65.4 billion by 2018. The Indian food and grocery market is the world's sixth largest, with retail contributing 70 percent of the sales. Food has also been one of the largest segments in India's retail sector, which was valued at USD 490 billion in 2013. The Indian food retail market is expected to reach USD 894.98 billion by 2020. Similarly, the online food ordering business in India is in its nascent stage, but witnessing exponential growth. The organized food business in India, which is worth USD 48 billion, of which food delivery is valued at USD15 billion, has a huge potential.

OVERVIEW OF SOYBEAN SECTOR

Soybean has an important place in world's oilseed cultivation scenario, due to its high productivity, profitability and vital contribution towards maintaining soil fertility. The crop also has a prominent place as the world's most important seed legume, which contributes 25% to the global vegetable oil production, about two thirds of the world's protein concentrate for livestock feeding and is a valuable ingredient in formulated feeds for poultry and fish. About 85% of the world's soybeans are processed annually into soybean meal and oil. Approximately 98% of the soybean meal is crushed and further processed into animal feed with the balance used to make soy flour and proteins. Of the oil fraction, 95% is consumed as edible oil; the rest is used for industrial products such as fatty acids, soaps

and biodiesel. The major soybean producing nations are the United States, Brazil and Argentina. The three countries dominate global production, accounting for 80% of the world's soybean supply.

(Source: - <http://ficci.in/spdocument/20539/SOYBEAN-Report.pdf>)

CURRENT STATUS OF SOYBEAN IN INDIA

India currently grows about 10 million tons of soybean, which is only about 4% of world production. But we are the only country in the world to grow Non-GMO soybean which gives the Indian farmers an unique advantage. As demand for Non-GMO products grows, Indian farmer can command a premium on its products on a long term sustainable basis. However, low yield is the one major disadvantage we face which must be addressed.

Reasons for low productivity:

- Two-thirds of Indian agriculture is largely dependent on rainfall.
- Small and marginal farm size.
- Poor dissemination of farming techniques.
- Erratic supply of good quality and sufficient quantity of inputs.
- Poor soil and water management.
- Lack of high yielding varieties, suitable for different agro climatic zones.
- Poor storage conditions and inadequate post harvest supply chain.

Product Portfolio and Business Activities

The details of our product portfolio and business activities are as under :-

S. No.	Activity/Products	Description
1.	Seed processing and Oil Extraction through Mechanical Process	Our seed processing and oil extraction activities produce: 1. Expeller preseed Soya Crude oil 2. Soya Meal
2.	Production of Soya Lecithin and Degummed Oil from Soya Crude Oil	Presently, we outsource the production of Soya Lecithin and Degummed Oil to third parties.
3.	Primary Processing & Trading of Agri Commodities	Primary processing is the first step in the processing of agricultural produce without changing its physical form. This involves basic steps like cleaning, grading, sorting, packing, etc. to make it fit for consumption.

Seed processing and Oil Extraction through Mechanical Process

We carry seed processing and oil extraction activities of soyabean seeds through a mechanical process, which results in production of organic soyameal and organic soya crude oil. We do not use any solvent to release the soyabean oil from the seeds. The seeds are pressed mechanically and processed to extract crude oil leaving behind de-oiled cakes as the residue. Soya Meal (De-oiled cake) is the most preferred component of cattle feed due to its high protein.

Production of Soya Lecithin and Degummed Oil

Presently, we outsource the production of Soya Lecithin and Degummed Oil to third parties. Soya Lecithin is the co product of degumming Soya Oil. Lecithin has many properties as an emulsifier, antioxidant, lubricant, anti dusting agent, mixing and blending agent and wetting & separating agent. Lecithin has multiple uses in food and beverages, animal feed, health and nutrition products, cosmetics and industrial coatings. Organic Soya Lecithin is a safe and natural product, with no solvents other than water being used in the Lecithin extraction process. Organic Soya Lecithin is non-hydrogenated and is free from trans-fatty acids.

INDUSTRY OVERVIEW

The information in this section has been extracted from various websites and publicly available documents from various industry sources. The data may have been re-classified by us for the purpose of presentation. Neither we nor any other person connected with the issue has independently verified the information provided in this section. Global Scenario

Global economic activity and trade picked up modestly from the later part of 2016. The firming up of commodity prices led to some uptick in inflation in major advanced economies (AEs). Recessional conditions ebbed in key commodity exporting emerging market economies (EMEs), setting the stage for a turnaround in EMEs as a group.

Since the MPR of October 2016, global growth picked up modestly towards end-2016, and is projected to improve further in 2017 by multilateral agencies. Growth in EMEs moderated in 2016, but is set to improve with the ebbing of recessionary conditions in key commodity exporting countries. Even though world trade appeared to have emerged out of a trough, new risks have emerged from an increasing tendency towards protectionist policies and heightened political tensions. Commodity prices have risen since late 2016 on improvement in US economic indicators such as strong labour market and consumer spending; infrastructure spending in China; and geopolitical concerns. Crude oil prices firmed after the OPEC announced curtailment of production. Inflation edged up on expectations of reflationary fiscal policies in the US, rising energy prices and a mild strengthening of demand.

International financial markets were impacted by the US election results and expectations of monetary policy tightening by the Federal Reserve, underpinned by hawkish forward guidance. Financial markets in EMEs briefly turned volatile after the US election due to large capital outflows leading to plunges in currency and equity markets. Nevertheless, average volatility remained contained by historical standards since Q4:2016. Bond yields hardened across the globe in tandem with US yields, before softening somewhat since mid-March. Strengthening of the US economy further buoyed the equity markets, while the increasing likelihood of more rate hikes by the Federal Reserve in 2017 hardened bond yields in AEs. The US dollar appreciated to a multi-year high in December and remained bullish.

The US economy bounced back strongly in Q3:2016, underpinned by robust consumer spending and continuing improvement in the labour market. GDP growth decelerated sharply in Q4:2016 due to a large slippage in net exports, even though retail sales, consumer confidence and the purchasing manufacturers' index (PMI) suggested sustained momentum. Domestic demand grew (q-o-q) at the fastest pace in almost two years. Consumer confidence reached a 16-year high in March, though retail sales had slowed down in February. The Institute for Supply Management's (ISM) index suggested manufacturing expanded at its fastest pace in three years in February.

In the Euro area, GDP growth accelerated in H2:2016. Relatively low oil prices and sustained employment gains have provided support to household incomes. Improving consumer confidence and the PMI, which rose to a six-year high in March, indicate that activity continued to expand in Q1:2017. Nonetheless, the region remains vulnerable to a number of headwinds such as the formal beginning of the Brexit process, upcoming elections in several constituent countries and tightening of financial conditions.

The Japanese economy continued to recover at a modest pace even as the momentum weakened in H2:2016. Increases in private consumption and fixed investment were moderate, although there was some uptick in exports and industrial production towards end-2016. The manufacturing PMI improved during January and February but moderated again in March 2017.

In the UK, economic growth gained momentum in H2: 2016, notwithstanding the uncertainties surrounding the negotiations relating to Brexit, as exports rose substantially following the weakening of the pound. However, manufacturing growth weakened for two consecutive months in February, indicating the possibility of a slowdown in 2017.

Economic activity in EMEs continued to be divergent. In China, even though y-o-y GDP growth improved in Q4:2016, supported by policy stimulus and the rising property market, q-o-q growth showed a sharp loss of momentum. Industrial production and PMI stabilised, but there are rising concerns about high indebtedness and financial stability. Consequently, the growth target for 2017 has been reduced to about 6.5 per cent by the government. In Brazil, the economic situation seems to have improved with the rise in commodity prices and several measures such as reforming the bankruptcy law announced by the authorities to revive growth. Economic contraction has eased in Russia, with the improvement in the mining and manufacturing sectors, rise in oil prices and policy initiatives that included a more flexible exchange rate and bank recapitalisation. In South Korea, Thailand and Mexico, GDP growth lost some momentum in Q3 and Q4:2016. According to the IMF, growth in both AEs and EMEs will pick up in 2017. The OECD's composite leading indicators (CLIs) point to growth accelerating in the US, Japan, China, Brazil and Russia, stable momentum in the Euro area and tentative signs of emerging momentum in the UK. However, manufacturing activity remains weak in some countries as underscored by the PMIs

Global growth: moderate recovery expected.

Global growth is estimated to have fallen to 2.3 percent in 2016—the weakest performance since the global financial crisis (Figure 1.A). Anemic global investment was accompanied by a further weakening of global trade. Mitigating these headwinds for emerging market and developing economies (EMDEs), commodity prices strengthened. However, the rapid rise in U.S. bond yields and appreciation of U.S. dollar towards the end of the year led to a notable tightening of financing conditions for EMDEs, and in some cases significant portfolio outflows. In 2017, global growth should pick up to 2.7 percent, with the recovery mainly driven by receding obstacles to activity in commodity-exporting EMDEs.

Growth in Advanced Economies:

Advanced economies continue to be afflicted by weak underlying growth and low inflation, while uncertainty about future policy direction increased. Growth is projected to recover modestly to 1.8 percent in 2017 (from 1.6 percent in 2016), although the range of possible outcomes has markedly widened after the electoral outcome in the United States and the United Kingdom’s decision to leave the European Union. In particular, current forecasts do not incorporate the potential effects of policy proposals suggested by the new U.S. administration, as their scope is still highly uncertain. Fiscal stimulus, if implemented, could result in stronger U.S. growth than currently predicted. However, some other policy changes, or persistent policy uncertainty, could dampen U.S. and international growth prospects.

Growth in Developing Countries:

EMDE growth is expected to accelerate to 4.2 percent in 2017 and to an average of 4.7 percent in 2018-19 (Figure 1.B). EMDEs are forecast to contribute 1.6 percentage points to global growth in 2017, accounting for about 60 percent of global growth for the first time since 2013. Given the expected increases in commodity prices, particularly for oil, the divergence in growth outlooks between commodity exporters and importers is on track to narrow. However, the outlook for EMDE regions with large numbers of commodity exporters remain mixed. Growth in Latin America and the Caribbean, and in Europe and Central Asia, is expected to accelerate in 2017, mainly reflecting a bottoming out in activity in Brazil and Russia. Growth in the Middle East and North Africa will pick up modestly as oil prices recover. While growth should also rebound in Sub-Saharan Africa, the improvement is notably weaker than previously expected, as some commodity exporters struggle to adjust to past deterioration in their terms of trade. EMDE regions with substantial number of commodity-importing economies—East Asia and the Pacific, and South Asia—are projected to continue to experience solid growth.

IMF views on India:

India continues to be the fastest growing major economy in the world. As per provisional estimates, real GDP grew by 7.9 percent in 2015-16 compared with 7.2 per cent in 2014-15. The second advance estimate for GDP growth for 2016-17 is placed at 7.1 percent. The currency reform initiative will move the Indian economy to a less cash trajectory, increase tax compliance and reduce the threats from counterfeit currency which acts as a source of terror funding. Growth is expected to gain strength in the following years due to externalities derived from deep structural reforms implemented by our Government and robust aggregate demand.

Figure 1: Global Outlook and Risks

After reaching a post-crisis low of 2.3 percent, global growth is expected to recover to 2.7 percent in 2017, mainly supported by stronger growth in EMDEs. Growth in commodity exporters is expected to pick up, while growth in commodity importers is projected to remain robust. Downside risks to global growth still dominate. They are associated with heightened policy uncertainty, protectionist pressures, and risk of financial market disruptions. A prolonged period of elevated policy uncertainty could weigh on EMDE investment growth. In turn, weak investment could adversely affect productivity growth, which has slowed considerably in the post-crisis period.

Indian economy Overview

India continues to be the fastest growing major economy in the world. As per provisional estimates, real GDP grew by 7.9 percent in 2015-16 compared with 7.2 per cent in 2014-15. The second advance estimate for GDP growth for 2016-17 is placed at 7.1 percent. The currency reform initiative will move the Indian economy to a less cash trajectory, increase tax compliance and reduce the threats from counterfeit currency which acts as a source of terror funding. Growth is expected to gain strength in the following years due to externalities derived from deep structural reforms implemented by our Government and robust aggregate demand.

CPI inflation which has been easing since August 2016 increased modestly to 3.65 percent in February 2017 against 3.17 percent in January 2017. Though it has marginally raised to 3.81 percent in March, 2017, it is well within the medium term CPI inflation target of 4 percent.

At the system level, our banks are adequately capitalized. At the same time, we are deeply aware of the problem of non-performing loans (NPLs) which are in the process of being effectively resolved. Policies for resolution of NPLs including optimal structuring of credit facilities, change in ownership/management, deep restructuring of stressed assets and facilitation of speedy exit from unviable accounts have been put in place. Additionally, the amendments to debt recovery laws as well as the enactment of Insolvency and Bankruptcy Code 2016 would provide enabling infrastructure to deal effectively with the recovery of NPLs in a time bound manner.

The Government is infusing capital in Public Sector Banks (PSBs) to meet their capital requirements in line with global risk norms and to spur credit growth. Recent announcements made by our Prime Minister for the provision of cost effective credit to farmers and housing loans to the poor including enhanced access of credit for MSMEs would enlarge the scope of institutional credit delivery to the hitherto under-banked segments of the economy.

The progress of our financial inclusion efforts has been remarkable with 282 million accounts opened by banks under the no-frills PMJDY so far. The objective of the scheme is to provide all households in the country with financial services, with special focus on empowering the weaker sections of society, including women, small and marginal farmers and laborers, both rural and urban. Attractive low cost life and health insurance and pension plans introduced by the Government have expanded the social safety net for weaker sections of the society. Micro Units Development and Refinance Agency (MUDRA) is active in facilitating structured microcredit deliveries to small scale entrepreneurs for productive activities. Supported by AADHAR, the biometric based unique identity system for individuals, the ongoing rapid expansion of digital payment mechanisms will provide large push to our financial inclusion efforts.

The wide ranging liberalisation of the FDI policy in recent years is expected to provide major impetus to employment and job creation. Most of the sectors, except a small negative list, are now under the automatic approval route. India is now the most open economy in the world for FDI. Net FDI inflows during April-February 2016-17 increased to US \$ 35.25 billion from US \$ 34.49 billion during the same period in the previous year. The increasing strength of economic fundamentals has made India the most sought after destination for investments.

India's foreign exchange reserves were placed at US \$ 368.99 billion as of April 7, 2017. The Current Account Deficit (CAD) was very much at sustainable level of 1.3 percent and 1.1 percent in 2014-15 and 2015-16, respectively. The CA deficit for the three quarters of 2016-17 improved further to 0.7 percent of GDP.

As envisaged, the Gross Fiscal Deficit (GFD) was contained at 3.5 percent in 2016-17 following a steady path of fiscal consolidation without compromising on the public investment requirements of the economy and spending on programs for poverty alleviation. The quality of fiscal adjustment is reflected in the improvement in revenue deficit to 2.1 percent in the revised budgetary estimate vis-à-vis 2.5 percent in 2015-16. Next year the revenue deficit will be reduced further to 1.9 percent to below 2 percent mandated by the FRBM Act. The GFD for the year 2017-18 is pegged at 3.2 percent with a commitment to achieve 3 percent in the following year. The steady approach towards fiscal consolidation is being judiciously adopted to avoid excessive curtailment of public investment- in view of the need for higher public expenditure in the context of sluggish private sector investment and subdued global growth.

For the current financial year, the Union Budget 2017-18 has significantly increased resource allocation for infrastructure as well as rural, agricultural and allied sectors. The allocation for the rural employment guarantee scheme has also been increased

substantially. The government would continue to increase fiscal resilience through greater focus on the quality of expenditure and higher tax realizations including those that would accrue from large cash deposits made in banks due to demonetization. The Budget for 2017-18 shows our firm resolves to boost investment in agriculture, social sector, infrastructure and employment generation on the one hand and simultaneously pursue the path of fiscal consolidation on the other. The delivery of AADHAAR based direct benefit transfers (DBT) has succeeded in plugging unwarranted leakages resulting in substantial savings to the Government. We are also fully on course to implement the Goods & Service Tax (GST) by July 1, 2017. The GST will deliver significant externalities by way of improved taxation efficiency and the ease of doing business and will convert India into one common market.

Since 2014, we have taken efforts to implement deep structural reforms to unlock the full potential of our economy. Widely encompassing reforms have been put in place which, inter alia, include the Goods and Services Tax Act, AADHAAR (Targeted Delivery of Financial and Other Subsidies, Benefits and Services) Act 2016, rationalization of subsidies, enactment of Insolvency and Bankruptcy Code 2016 and operationalization of National Company Law Tribunal (NCLT) and National Company Law Appellate Tribunal (NCLAT) for the new corporate insolvency framework. Other policy initiatives include implementation of the hybrid annuity model for PPP, passage of Mines and Mineral Amendment Act, announcement of National Capital Goods Policy, directions to PSEs for expediting arbitration in construction sector, roadmap for rapid adoption of digital payments system, extensive liberalization of the FDI regime and improvements in governance processes in infrastructure delivery. Alongside steady progress in India's ranking in Ease of Doing Business, the Government's flagship program 'Make in India' encourages new processes, new infrastructure, new sectors and new mindset to boost entrepreneurial energy. Affirmative policies to arrest declining Child Sex Ratio (CSR) and empowerment of women over the lifecycle continuum and those for enhancing female employment are being vigorously pursued.

India's increasing importance to Global growth

India's growth in the first half of FY2017 was underpinned by robust private and public consumption, which offset slowing fixed investment, subdued industrial activity, and lethargic exports. Consumption was supported by lower energy costs, public sector salary and pension increases, and favorable monsoon rains, which boosted urban and rural incomes. Economic activity also benefitted from a pickup in foreign direct investment (FDI) and an increase in public infrastructure spending. Unexpected 'demonetization'—the phasing out of large-denomination currency notes which were subsequently replaced with new ones—weighed on growth in the third quarter of FY2017.¹ Weak industrial production and manufacturing and services purchasing managers' indexes (PMI), further suggest a set back to activity in the fourth quarter of FY2017.

With the effects of demonetisation turning out to be short-lived and modest relative to some doomsday expectations, the outlook for 2017-18 has been brightened considerably by a number of factors. First, with the accelerated pace of remonetisation, discretionary consumer spending held back by demonetisation is expected to have picked up from Q4:2016-17 and will gather momentum over several quarters ahead. The recovery will also likely be aided by the reduction in banks' lending rates due to large inflows of current and savings accounts (CASA) deposits, although the fuller transmission impact might be impeded by stressed balance sheets of banks and the tepid demand for bank credit.

Second, various proposals in the Union Budget 2017-18 are expected to be growth stimulating: stepping up of capital expenditure; boosting the rural economy and affordable housing; the planned roll-out of the GST; and steps to attract higher foreign direct investment (FDI) through initiatives like abolishing the Foreign Investment Promotion Board (FIPB).

Third, global trade and output are expected to expand at a stronger pace in 2017 and 2018 than in recent years, easing the external demand constraint on domestic growth prospects. However, the recent increase in the global commodity prices, if sustained, could have a negative impact on our net commodity importing domestic economy. Finally, the pace of economic activity would critically hinge upon the outturn of the south-west monsoon, especially in view of the rising probability being assigned to an el niño event in July-August, 2017.

Introduction

Indian Food Processing Sector

The Food Processing sector in India, a sunrise sector, is poised for immense growth and greater contribution to the world food trade. The sector has witnessed a number of initiatives undertaken by the Government since June 2014 primarily aimed at scaling up infrastructure for storage and transport, tackling the issue of food wastage in the country and creating value addition that will benefit both producers and consumers in the country through facilitating domestic and foreign investment in the sector. The growth rate of Gross Value Added (GVA) in food Processing industries has increased from 1.91% in 2013-14 to 5.78% in 2014-15 at constant prices.

India is the largest producer of milk and second largest producer of a variety of fruits and vegetables in the world. However, food is being wasted at the harvest point and during transportation. India witnesses nearly 4.6 - 15.9 % wastage in fruits and vegetables annually, due to lack of modern harvesting technologies and cold chain infrastructure. The wastage levels in other perishables are also significantly high; 5.2 % in inland fish, 10.5 % in marine fish, 2.7 % in meat and 6.7 % in poultry.

To tackle this critical issue, Government is sanctioning and operationalizing more cold chain infrastructure in the country with the objective of reducing food wastage by 50% over next 2 years. In addition, by opening up the sector, the Government is keen to bring in advanced technology into the supply chain thereby combating the losses incurred during the value chain. The food industry, which was valued at USD 39.71 billion in 2013 is expected to grow at a Compounded Annual Growth Rate (CAGR) of 11 percent to USD 65.4 billion by 2018. The Indian food and grocery market is the world's sixth largest, with retail contributing 70 percent of the sales. Food has also been one of the largest segments in India's retail sector, which was valued at USD 490 billion in 2013. The Indian food retail market is expected to reach USD 894.98 billion by 2020. Similarly, the online food ordering business in India is in its nascent stage, but witnessing exponential growth. The organized food business in India, which is worth USD 48 billion, of which food delivery is valued at USD15 billion, has a huge potential.

Credit support for Food Processing Industry

Special Fund in NABARD

A Special Fund in NABARD worth INR 2,000 crore, designated as Food Processing Fund, was set up in budget 2014-15 for providing affordable credit to food processing units in Mega & Designated Food Parks. The fund was set up to provide loans for a period of 7 years at concessional interest rates of 8-9%. Loans are being provided for Mega Food Parks, Designated Food Parks and Food Processing Units location therein. Up to July 2016, NABARD has sanctioned a loan for INR 504.6 crore in 12 Mega Food Park projects and INR 40.12 crore has been disbursed under the fund.

Priority Sector Lending

As per notification dated April 23, 2015, Food and Agro-based processing units and cold chain projects have been classified under agriculture activities as Priority Sector Lending, subject to aggregate sanctioned limit of INR 100 crores per borrower from the banking system, which will ensure greater flow of credit to entrepreneurs for setting up of food processing units for further augmenting capacity.

Mega Food Parks

The Government's Scheme for Infrastructure Development provides State-of-the-Art infrastructure for Mega Food Parks. The scheme has a provision of Grants-in-aid @50% of the eligible project cost in general areas and @75 % in difficult areas subject to a maximum of ₹50 crore. Government has sanctioned 42 Mega Food Parks out of which eight have been operationalized. 6 Mega

Food Parks were operationalized in between May 2014 to May 2016. Each mega food park is expected to create direct & indirect employment to about 5,000-6,000 persons and benefit approx. 25,000-30,000 farmers. 12 Lac MT of actual processing and preservation capacity has been created through schemes of Mega Food Parks and Cold Chain. The value of processed and preserved produce would be ₹3000 crores.

Ease of Doing Business

- A Food Map identifying surplus and deficit areas of various agricultural and horticulture produce in the country has been developed and made available on the Ministry's website. This will aid investors in identifying availability of raw materials in various regions of the country.
- To facilitate Single Window Clearance for customs, online connectivity has been established between Customs and Government Partner Agencies such as Food Safety and Standards Authority of India (FSSAI), Department of Plant Protection, Quarantine and Storage (DPPQ&S), Drug Controller (CDSCO), Animal Quarantine (AQCS), Wild Life Crime Control Bureau (WCCB) and Textile Committee. Clearances can now be obtained online and no hard copy of 'No Objection Certificate' (NOC) is required for clearance of goods thereby reducing dwell time and cost of doing business. This facility is currently available at Jawaharlal Nehru Port Trust, Tughlakabad Inland Container Depot (ICD), and Patparganj ICD.
- A Single Window Facilitation Cell has been set up by MoFPI since May 17, 2016 for addressing queries, facilitating and hand holding foreign investors investing in the food processing sector in India.
- Invest India; the investment promotion agency of the Government has also created a HelpDesk for this sector. 1590 queries have been answered as of July 2016.
- Streamlining of processes:
 - online processing of claims has been setup for release of grants under the Scheme on Mega Food Park to bring in more transparency and speed in release of grants to the projects.
 - Launch of an online system for food licensing and registration of Food Business Operators, which includes online and real time registration of ESIC and EPFO, provision for online payment of EPFO and ESIC contributions. Requirement of bank account for registration with EPFO and ESIC has been eliminated.
- Application Forms of all the schemes currently being implemented by Ministry of Food Processing Industries have been simplified.
- A Committee of Independent Monitors has been set up by MoPFI to hear grievances of investors/promoters and make recommendations for redressal of grievances. All grievances are responded within 30 days.

Skill Development

Increasing investments in the sector have led to higher demand for more qualified people. The Government has set up a Food sector skill council called Food Industry Capacity & Skill Initiatives (FICSI), which has 46 affiliated Training Partners and 192 Training Centers across 26 States in the country.

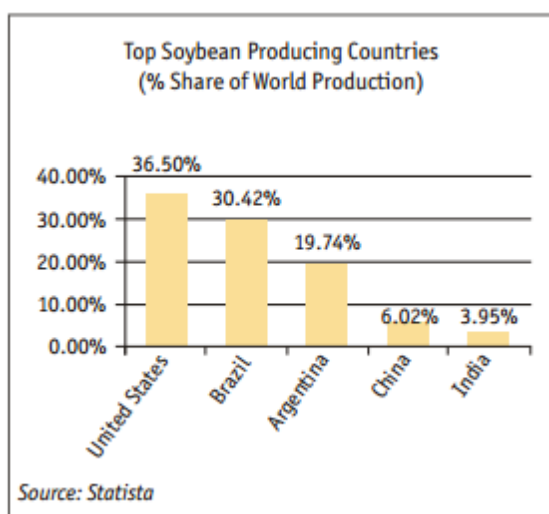

The two institutions under the administrative control of MoFPI, i.e. National Institute of Food Technology Entrepreneurship and Management (NIFTEM), Haryana and Indian Institute of Crop Processing Technology (IICPT), Tanjavur, Tamil Nadu are conducting regular trainings in Food Processing on self-financing basis & sponsored funds from others sources including under Pradhan Mantri Kaushal Vikas Yojana (PMKVY). FICSI was allocated a target of 30,810 to be completed by March 2016 (for FY 2015-16). 28,199 persons have enrolled and completed the trainings. In case of Recognition of Prior Learning (RPL), target of 14,000 persons was to be completed by March 2016. FICSI has allocated 8070 persons to Training Partners and have completed certification of 496 persons. National Institute of Food Technology, Entrepreneurship & Management (NIFTEM), Kundli, Sonapat is a deemed to be University under de novo category imparting B.Tech, M.Tech & Ph.D courses. The institute has achieved 100% placement of its M.Tech students who graduated during 2014 & 2016.

OVERVIEW OF SOYBEAN SECTOR

Soybean has an important place in world's oilseed cultivation scenario, due to its high productivity, profitability and vital contribution towards maintaining soil fertility. The crop also has a prominent place as the world's most important seed legume, which contributes 25% to the global vegetable oil production, about two thirds of the world's protein concentrate for livestock feeding and is a valuable ingredient in formulated feeds for poultry and fish. About 85% of the world's soybeans are processed annually into soybean meal and oil. Approximately 98% of the soybean meal is crushed and further processed into animal feed with the balance used to make soy flour and proteins. Of the oil fraction, 95% is consumed as edible oil; the rest is used for industrial products such as fatty acids, soaps and biodiesel. The major soybean producing nations are the United States, Brazil and Argentina. The three countries dominate global production, accounting for 80% of the world's soybean supply.

Importance of Soybean in Indian Economy

Soybean contributes significantly to the Indian edible oil pool. Presently soybean contributes 43 % to the total oilseeds and 25% to the total oil production in the country. Currently, India ranks fourth in respect to production of soybean in the world. The crop helps earn valuable foreign exchange (Rs. 62000 millions in 2012-13) by way of soya meal exports. Soybean has largely been responsible in uplifting farmer's economic status in many pockets of the country. It usually fetches higher income to the farmers owing to the huge export market for soybean de-oiled cake. While on one hand production of Soybean in India has increased at a CAGR of 9.60 per cent from 6.87 million tonnes in 2004-05 to 15.68 million tonnes in 2012-13. On the other hand Soybean meal consumption has also increased at a CAGR of 10.82 per cent over the last eleven years from 1365 thousand million tonnes in 2004-05 to 4225 thousand million tonnes in 2014-15. Therefore to keep pace with the increasing demand it is imperative to increase the productivity level of Soybean in the country. The graph below shows that there is ample scope for improvement of productivity of Soybean crop in India when compared to other benchmark countries.

CURRENT STATUS OF SOYBEAN IN INDIA

India currently grows about 10 million tons of soybean, which is only about 4% of world production. But we are the only country in the world to grow Non-GMO soybean which gives the Indian farmers an unique advantage. As demand for Non-GMO products grows, Indian farmer can command a premium on its products on a long term sustainable basis. However, low yield is the one major disadvantage we face which must be addressed.

Reasons for low productivity:

- Two-thirds of Indian agriculture is largely dependent on rainfall.
- Small and marginal farm size.
- Poor dissemination of farming techniques.
- Erratic supply of good quality and sufficient quantity of inputs.
- Poor soil and water management.
- Lack of high yielding varieties, suitable for different agro climatic zones.
- Poor storage conditions and inadequate post harvest supply chain.

Manufacturing Process

Seed processing and Oil Extraction through Mechanical Process

Unloading, Cleaning and Storage of Soya Seeds:-

The soya seeds are unloaded to seed hopper and then transported by conveyor belt into seed cleaner machines(classifier and destoner) where the foreign material (such as stick, stones, mud, metal & unwanted material) are removed, after which cleaned seeds are stored in day bin with the help of elevator.

The cleaning process is carried through following process/machines:-

Classifier Machine:-

It Remove the fine mud from the seed for avoid the sand silica in meal.

De- Stoner Machine:-

It separates the stone & over size Mud from seeds by the aspiration system.

Cracking of Soya Seeds and feeding into Extruder

The cleaned seeds are cracked with the hammer mill into two parts for better extruding. The cracked seeds are feeded into the Extruder, which is a very important part of the process system. Extruder Machine generates heat through friction to accomplish numerous processes including: cooking, expanding, sterilizing, stabilizing, dehydrating and texturizing of soyabean seeds. The extruder creates various pressures and temperatures resulting in quality feed. After extrusion, the cracked soyabeans are feeded into expeller machine through conveyor.

Extraction of Oil through Expeller Machine

Oil is recovered from soybeans by applying mechanical pressure through Expeller Machine. Expeller Machine consists of mechanical screw which rotates and forces cracked soybeans to expel oil from them. The oil so extracted through expeller machine is sent for filtering by pumping system. After filtration, the oil is stored in oil storage tank. The residual soya meal/cake are then broken with the hammer mill and converted into granule shape (like size of 1 mm to 3 mm)

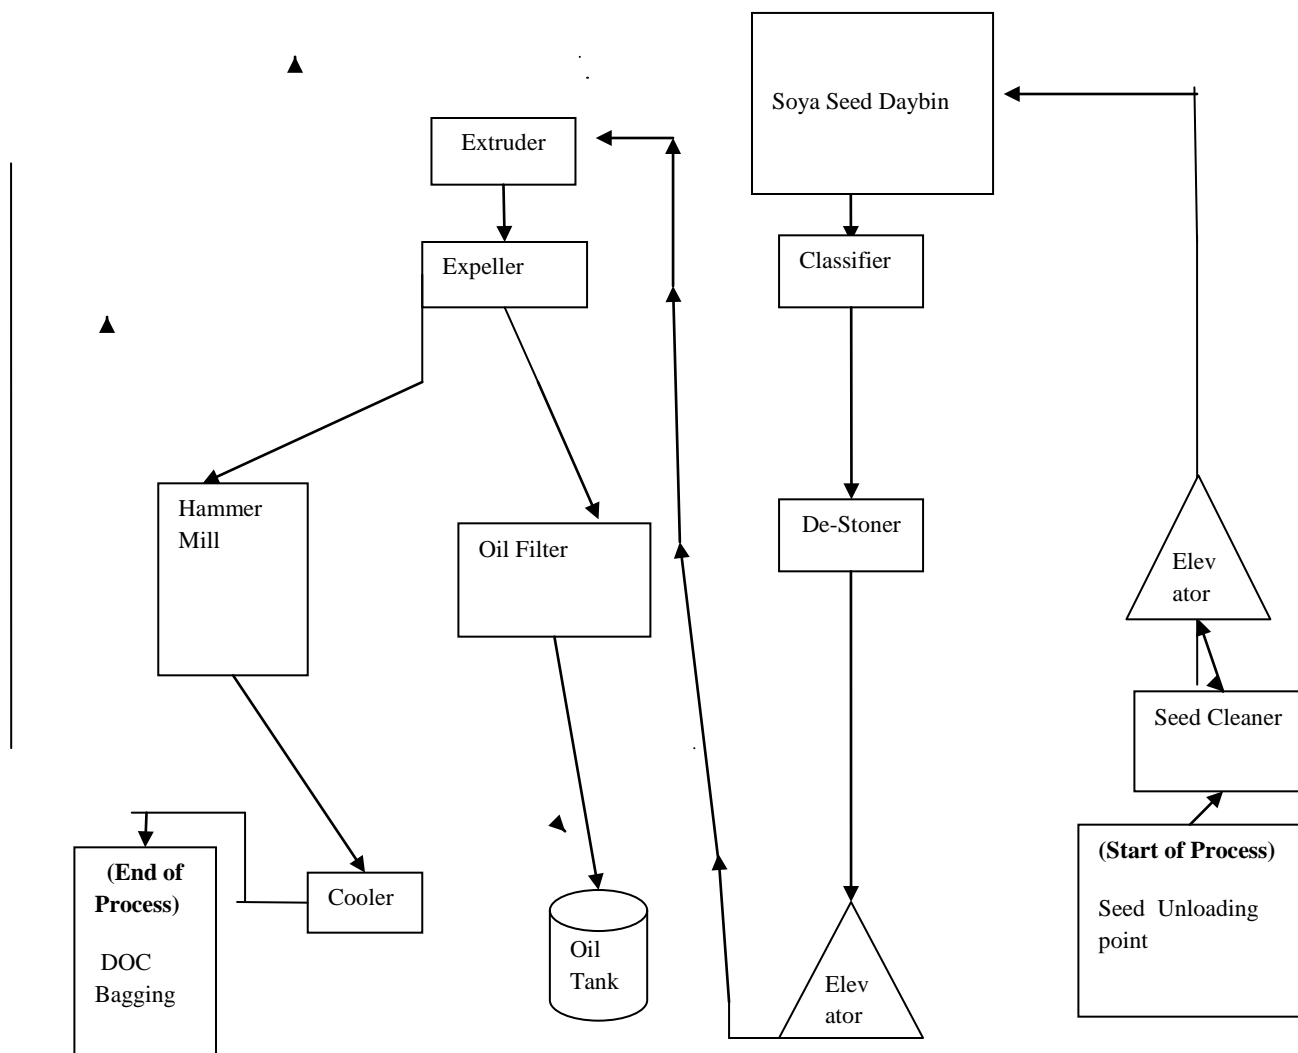

Cooling of Soya meal:-

The soya meal received from expeller machine is of high temperature (75°C to 85°C). Meal Cooler is the air seal cooling system wherein soymeal is cooled to 40°C.

Storage and Baggage of Soya meal:-

The cooled soya meal is then sent for bagging which is done with automatic bagging system and then stored for dispatching the final product.

Process flow chart for Soyabean seed procesing:-

Activities involved in Primary Processing:

Primary processing is the first step in the processing of agricultural produce without changing its physical form. This involves basic steps like cleaning, grading, sorting, packing, etc. to make it fit for consumption. Secondary and tertiary processing industries usually deal with higher levels of processing where new or modified food products are manufactured. Primary processing is also important because it has the advantage of slowing the decay process of agri-commodities. Once the agricultural produce is harvested, it begins to decay which makes it unfit for consumption after a certain amount of time. Processing delays the decay and allows for storage for a longer duration. This helps the farmers as it enables food to be stored for use in times of food shortage without compromising on the quality of the produce. Further, it enables farmers to sell their produce with some delay when prices increase.

2. USE OF ESTIMATES

The preparation of financial statements in conformity with generally accepted accounting principles (“GAAP”) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent liabilities on the date of the financial statements. Actual results could differ from those estimates. Any revision to accounting estimates is recognized prospectively in current and future periods.

3. FIXED ASSETS

The company has adopted cost model as prescribed in Accounting Standard AS-10 (Revised) “Property, Plant & Equipment”.

Recognition

The cost of an item of property, plant and equipment is recognized as an asset if, and only if:

- (a) it is probable that future economic benefits associated with the item will flow to the enterprise; and
- (b) the cost of the item can be measured reliably.

Subsequent Cost

The Company recognizes in the carrying amount of an item of Property, Plant & Equipment, the cost of replacing a part of an item, when that cost is incurred provided the recognition criteria as mentioned above are met. The carrying amount of those parts that are replaced is derecognized in accordance with the de-recognition provisions mentioned in the Accounting Standard. The cost of day to day servicing of an item of Property, Plant & Equipment is recognized in the Statement of Profit & Loss as and when incurred.

Measurement

Fixed assets are stated at acquisition cost less accumulated depreciation. The cost of fixed assets comprises its purchase price including import duties and other non-refundable taxes or levies and any directly, attributable cost of bringing the asset to the working condition for its intended use.

Capital Work in Progress

Capital Work-In-Progress includes the cost of fixed assets that are not ready to use at the Balance Sheet date. Advances paid for Capital Assets are not considered as Capital Work-in-Progress but classified as Long Term Advances.

4. DEPRECIATION

Tangible Fixed Assets

Depreciation on tangible fixed assets is computed based on useful life as specified in Part 'C' of Schedule - II of the Companies Act, 2013 in FY 2014-15, 2015-16 and 2016-17. For FY 2012-13 and 2013-14, the Company has calculated depreciation on WDV Method at the rates prescribed in Schedule XIV of the Companies Act, 1956.

Pursuant to Companies Act, 2013 ('the Act') being effective from April 1, 2014, the Company has revised depreciation rates on tangible fixed assets as per useful life specified in Part 'C' of Schedule II of the Act. And due to the same there has been a change in the estimated useful life of depreciable tangible assets which affects the depreciation in the current period and in each period during the remaining useful life of the assets. As the change is only in regard to accounting estimate requiring an adjustment of the carrying amount of tangible assets, the same do not require adjustment in the financial information for the years ended on March 31, 2014, 2013, and 2012. The Company has consistently calculated depreciation based on WDV method.

In respect of assets whose useful life had already exhausted as on 1 April 2014, **Rs.38,576/-** has been adjusted in Reserves and Surplus as on 31.03.2015 in accordance with requirements of Para 7 of Part C of Schedule II of the Act.

5. BORROWING COSTS

The borrowing costs that are directly attributable to the acquisition, construction or productions of a qualifying asset are capitalized as part of the cost of that asset. The amount of borrowing cost eligible for capitalization is determined in accordance with Accounting Standard (AS) 16- Borrowing Costs issued by the Institute of Chartered Accountants of India (ICAI) and specified u/s 133 of the Act read with Rule 7 of the Companies (Accounts) Rule, 2014.

6. IMPAIRMENT OF ASSETS

The Company assesses at each balance sheet date whether there is any indication that an asset or a group of assets (Cash Generating Unit) may be impaired. If any such indication exists, the Company estimates the recoverable amount of the asset or a group of assets. If such recoverable amount of the asset or the recoverable amount of the Cash Generating Unit to which the asset belongs is less than its carrying amount, the carrying amount is reduced to its recoverable amount. The reduction is treated as an impairment loss and is recognized in the Statement of Profit & Loss. If at the Balance Sheet date there is an indication that a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the asset is reflected at the recoverable amount subject to a maximum of depreciable historical cost.

7. INVESTMENTS

Investments, which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments.

However, provision for diminution in value is made to recognize a decline other than temporary in the value of the investments.

On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of profit and loss.

8. INVENTORIES

In the event of issue of bonus shares, or share split the number of equity shares outstanding is increased without an increase in the resources. The number of Equity shares outstanding before the event is adjusted for the proportionate change in the number of equity shares outstanding as if the event had occurred at the beginning of the earliest period reported.

1.1 Principles of Consolidation

The Consolidated Financial Statements related to Shanti Overseas (India) Limited (‘the Holding Company’), and its subsidiaries share the profits. The Consolidated Financial Statements have been prepared on the following basis:

- a) The financial statements of the subsidiary companies used in the consolidation are drawn upto the same date as that of the Holding Company i.e. 31st March 2017.
- b) The financial statements of the Holding Company and its subsidiaries have been consolidated on a line-by-line basis by adding together like items of assets, liabilities, income, expenses after eliminating intra-group balances, intra-group transactions and resulting unrealised profits or losses in accordance with Accounting Standard (AS) 21- “Consolidated Financial Statements”.

Shaan Agro Oils & Extraction Private Limited	Subsidiary	100 %
Biograin Protinex Private Limited	Subsidiary	100 %

2. USE OF ESTIMATES

The preparation of consolidated financial statements in conformity with generally accepted accounting principles (“GAAP”) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent liabilities on the date of the financial statements. Actual results could differ from those estimates. Any revision to accounting estimates is recognized prospectively in current and future periods.

3. FIXED ASSETS

The company has adopted cost model as prescribed in Accounting Standard AS-10 (Revised) “Property, Plant & Equipment”.

Recognition

The cost of an item of property, plant and equipment is recognized as an asset if, and only if:

- (a) it is probable that future economic benefits associated with the item will flow to the enterprise; and
- (b) the cost of the item can be measured reliably.

Subsequent Cost

The Company recognizes in the carrying amount of an item of Property, Plant & Equipment, the cost of replacing a part of an item, when that cost is incurred provided the recognition criteria as mentioned above are met. The carrying amount of those parts that are replaced is derecognized in accordance with the de-recognition provisions mentioned in the Accounting Standard. The cost of day to day servicing of an item of Property, Plant & Equipment is recognized in the Statement of Profit & Loss as and when incurred.

Measurement

Fixed assets are stated at acquisition cost less accumulated depreciation. The cost of fixed assets comprises its purchase price including import duties and other non-refundable taxes or levies and any directly, attributable cost of bringing the asset to the working condition for its intended use.

Capital Work in Progress

Capital Work-In-Progress includes the cost of fixed assets that are not ready to use at the Balance Sheet date. Advances paid for Capital Assets are not considered as Capital Work-in-Progress but classified as Long Term Advances.

4. DEPRECIATION

Tangible Fixed Assets

Depreciation on tangible fixed assets is computed based on useful life as specified in Part ‘C’ of Schedule - II of the Companies Act, 2013 in FY 2016-17.

5. BORROWING COSTS

The borrowing costs that are directly attributable to the acquisition, construction or productions of a qualifying asset are capitalized as part of the cost of that asset. The amount of borrowing cost eligible for capitalization is determined in accordance with Accounting Standard (AS) 16- Borrowing Costs issued by the Institute of Chartered Accountants of India (ICAI) and specified u/s 133 of the Act read with Rule 7 of the Companies (Accounts) Rule, 2014.

6. IMPAIRMENT OF ASSETS

The Company assesses at each balance sheet date whether there is any indication that an asset or a group of assets (Cash Generating Unit) may be impaired. If any such indication exists, the Company estimates the recoverable amount of the asset or a group of assets. If such recoverable amount of the asset or the recoverable amount of the Cash Generating Unit to which the asset belongs is less than its carrying amount, the carrying amount is reduced to its recoverable amount. The reduction is treated as an

impairment loss and is recognized in the Statement of Profit & Loss. If at the Balance Sheet date there is an indication that a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the asset is reflected at the recoverable amount subject to a maximum of depreciable historical cost.

7. INVESTMENTS

Investments, which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments.

Current investments are carried in the financial statements at lower of cost and fair value determined on an individual investment basis. Long-term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of the investments.

On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of profit and loss.

8. INVENTORIES

- (a) Inventories are valued at cost or net realizable value whichever is lower.
- (b) The cost of inventories comprise all costs of purchase including duties and taxes (other than those subsequently recoverable from the taxing authorities), conversion cost and other costs incurred in bringing the inventories to their present location and condition.
- (c) The cost formulas used are Weighted Average Cost in case of Raw Material.

9. REVENUE RECOGNITION

- (a) Revenue from sale of products is recognized on transfer of all significant risk and rewards of ownership of products to the customers, which is generally on dispatch of goods. Sales are stated exclusive of Value Added Tax.
- (b) Dividend income is recognized when the right to receive the dividend is established.
- (c) Interest income is recognized on the time proportion basis.
- (d) Export incentives receivable are accounted for when the right to receive the credit is established and there is no significant uncertainty regarding the ultimate collection of export proceeds.

10. FOREIGN CURRENCY TRANSACTIONS

Transactions denominated in foreign currency are recorded at the exchange rate prevailing on the date of transactions. Exchange differences arising on foreign exchange transactions settled during the year are recognized in the Statement of Profit and Loss for the year.

Monetary assets and liabilities in foreign currency, which are outstanding as at the year-end, are translated at the closing exchange rate and the resultant exchange differences are recognized in the Statement of Profit and Loss.

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government, the FDI Policy (as defined below) and FEMA. The government bodies responsible for granting foreign investment approvals are FIPB and the RBI.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”), issued consolidated FDI Policy, which with effect from June 07, 2016 consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on June 7, 2016. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidation FDI Policy will be valid until the DIPP issues an updated circular.

Subscription by foreign investors (NRIs/FPIs)

FPIs are permitted to subscribe to Equity Shares of an Indian Company in a public offer without the prior approval of the RBI, so long as the price of the Equity Shares to be issued is not less than the price at which the Equity Shares are issued to residents. SEBI registered FPIs have been permitted to purchase shares of an Indian company through offer, subject to total FPI investment being within the individual FPI/sub account investment limit of 10 per cent subject to the total sectoral cap of all FPIs/sub-accounts put together being 24 per cent of the paid-up capital of the Indian company.

The transfer of shares between an Indian resident and a Non-resident does not require prior approval of FIPB or RBI, subject to fulfillment of certain conditions as specified by DIPP / RBI, from time to time. Such conditions include (i) the activities of the investee company are under the automatic route under the foreign direct investment (“FDI”) Policy and the non-resident shareholding is within the sectoral limits under the FDI policy; and (ii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI.
