11. Some of our corporate records including share transfer deeds and forms filed with Registrar of Companies not traceable.

Our Company is unable to trace certain corporate and other documents in relation to our company including the forms filed with Registrar of Companies prior to the year 2006. This may be due to change in registered office of the company, change in methods of record keeping on account of technological advancement and computerization. Over the years, certain forms filed with ROC prior to the year 2006 like Return of Allotment, Registration of charges and modification of charges, transfer deeds, annual return etc. could not be traced by our company. Further, online filing of Roc Documents was initiated in the year 2006 and all forms prior to the said year were physically filed, hence certain of these forms could not be retrieved from Ministry of Corporate Affairs (MCA) portal. Our Company has carried out the limited purpose search for the physical copies of the untraceable forms at the RoC office but the forms are not available at the office of Registrar of Companies as well. Our Statutory Auditors T. K. Gupta & Associates, Chartered Accountants, have provided disclaimer of opinion on the Internal Financial Controls over the Financial Reporting for the year ended on March 31, 2016. The auditors have mention that “we are unable to obtain sufficient appropriate audit evidence to provide a basis for our opinion whether the company has adequate internal financial controls over financial reporting and whether such internal financial controls were operating effectively as at March 31, 2016”. Although for the financial year ended on March 31, 2017 the auditor has given clean report for the same. The consequential effect of the above on assets and liabilities as at March 31, 2016 and on profit or loss for the year ended 31st March, 2016 is not ascertainable. The financial impact of the said qualifications is not quantifiable.

13. We have not entered into any definitive agreements to utilize a portion of the Net Proceeds. Any failure to enter into arrangements on favourable terms and conditions, in a timely manner or at all, may have an adverse affect on our business and financial results.

We intend to use a portion of the Net Proceeds for expenditure on establishment of a Branch of our Company. For further details regarding such utilization, please see the chapter titled “*Objects of the Issue*” beginning on page 88 of this Prospectus. We have presently not identified the location of the Branch nor entered into any definitive agreements for establishment of such Branch. There can be no assurance that we will be able to conclude definitive agreements for such expenditures on terms anticipated by us. Further, we have estimated the cost on the basis of our internal management estimates and other publically available data. Any failure to enter into utilization arrangements on favourable terms and conditions in a timely manner or at all may have an adverse affect on our business and our financial results.

14. Significant security breaches in our computer systems and network infrastructure, fraud, systems failures and calamities would adversely impact our business.

We are required to protect our computer systems and network infrastructure from physical break-ins as well as security breaches and other disruptive problems caused by our increased internet connectivity. Computer break-ins and power disruptions could affect the security of information stored in and transmitted through these computer systems and networks. These concerns will intensify with our increased dependence on technology. We employ security systems, including firewalls and password encryption, designed to minimise the risk of security breaches but there can be no assurance that these security measures will be successful. Breaches of our

security measures could affect the security of information stored in and transmitted through these computer systems and network infrastructure. A significant failure in security measures could have a material adverse effect on our business and our future financial performance.

15. Downturns or disruptions in the securities markets could reduce transaction volumes, and could cause a decline in the business and impact our profitability.

Our revenues, level of operations and, consequently, our profitability are dependent on favourable capital market conditions, regulatory and political environment, investor sentiment, price levels of securities and other factors that affect the volume of stock trading in India and the level of interest in Indian business developments. In recent years, the Indian and world securities markets have fluctuated considerably and a downturn in these markets could adversely affect our operating results. Further our company is also engaged in proprietary trading and any downward price movement in the stock market could have an adverse affect on our business and profitability. When markets are highly volatile, we run the risk of bad debts and losses and also litigation. Revenues are likely to decline during sustained periods of reduced trading volumes and our profit margins may be adversely affected if we are unable to reduce our expenses at the same pace as the decline in revenues. When trading volume is low, our profitability will be adversely affected because our revenues will be reduced and some of our operating costs are fixed. Decreases in equity prices or decreased trading activity could have an adverse effect on our business, financial condition and operating results.

16. Our company have been acquired by the current promoters and thus the management of our company was changed in year 2000 and hence we have limited knowledge and records of litigations, disputes etc. of the old management.

Our company was taken over by the Current promoters of our company and their relatives during the year 2000. Share owned by the erstwhile promoters of the company were transferred to the current promoters and their relatives during the year 2000. Our Company has achieved much better operational performance since then and there has not been any new dispute or litigation which has originated after this change in management and which is still outstanding except as disclosed in this Prospectus. However, there may be certain old cases or disputes which were initiated by or against the old management which we may be not aware off. The disclosures in this offer document pertaining to the litigations and legal matters are subject to information readily available from public domains and our management shall not be liable for data which we do not possess due to the change in management.

17. We have limited experience in the field of Research analyst and Portfolio management services and thus there can be no assurance that we will achieve the desired results from the same.

Our company is currently engaged in the business of equity broking, investing and trading activities. Along with this we are also providing the services as a Depository Participant, Research Analyst, Mutual Fund Advisor/Distributor and also an application has been filed with Securities and Exchange Board of India for the registration of Company as a Portfolio Manager. Our Company got registered with SEBI as Stock Broker (Member of BSE) in the year 2000 and started the Stock Brokering operations. With a plan to further diversify the operations of the company from share trading and brokering service our company has entered into the Research Analyst and also applied for the registration for Portfolio management services in 2017. Our company as well as its promoters/directors, therefore, has limited experience in Research Analyst and Portfolio management Service, which may increase our vulnerability to various associated risks. We are also subject to business risks and uncertainties associated with any new business enterprise, including the risk that we will not achieve our business objective and that our investment could not give the desired results.

18. The revenues earned from our investment and trading of securities business have been inconsistent in the past and may continue to be inconsistent due to the very nature of this business which is dependent on the overall volatility in the Capital Markets in India.

We are engaged in the business of investments and trading in listed / unlisted securities and financial products. Despite our efforts to earn favorable returns on our capital employed in these uncertain and volatile financial markets we cannot assure that we will be able to anticipate or predict the move of the Stock market. We propose to continue to invest in this vertical and depending on the overall period to period overall volatility in the Capital Markets in India our future revenues from this vertical could be volatile and inconsistent.

19. Credit risk exposes us to losses caused by financial or other problems experienced by third parties.

We are exposed to the risk that third parties that owe us money, securities or other assets will not perform their obligations. We particularly are exposed to risk attributable to our customers, counterparties, clearing agents, exchanges, clearing houses, and other financial intermediaries as well as issuers whose securities we hold. These parties may default on their obligations owed to us due to insolvency, lack of liquidity, operational failure, government or other regulatory interventions or other reasons. Significant failures by third parties to perform their obligations owed to us in a timely manner or at all could materially and adversely affect our revenues, business, financial conditions and results of operations.

20. We have not made any provisions for decline in value of our investments.

We have made certain investments the value of such stock may initially decline and after a certain period move back over and above its original acquisition price depending on market and other forces. Hence, we may hold investments on our books which are valued below their book values, but we do not make provisions for the decline in value of these assets and instead book profits or losses on investments only upon final sale of these assets and realization of sale proceeds. As on March 31, 2017, the value of our investment stood at ₹ 2980.17 lacs which includes the value of the investment in Subsidiary company, associate company, current investment and investment lying under Stock in trade. If, we are unable to realize cost value and we liquidate investments at a price below its cost value, we may incur a substantial loss in a particular period and hence may affect our share prices as well as financial conditions.

21. Our Company in the past has entered into Related Party Transactions and may continue to do so in future also, which may affect our competitive edge and better bargaining power if entered with non-related parties resulting into relatively more favourable terms and conditions and better margins.

Our Company has entered into various transactions with our Directors, Promoter, Promoter Group and Subsidiary Companies. These transactions, inter-alia includes issue of shares, remuneration, rent payments, loans and advances, etc. Our Company has entered into such transactions due to easy proximity and quick execution. However, there is no assurance that we could not have obtained better and more favourable terms than from transaction with related parties. Additionally, our company belief that all our related party transactions have been conducted on an arm's length basis, but we cannot provide assurance that we could have achieved more favourable terms had such transactions been entered with third parties. Our Company may enter into such transactions in future also and we cannot assure that in such events there would be no adverse affect on results of our operations, although going forward, all related party transactions that we may enter will be subject to board or shareholder approval, as under the Companies Act, 2013 and the Listing Regulations. For details of transactions, please refer to "***Annexure R***" on "Related Party Transactions" of the Auditor's Report under Section titled "***Financial Information of the Company***" and Chapter titled "***Capital Structure***" beginning on page 194 and 57 respectively of this Prospectus.

22. Excessive reliance on our information technology systems and their failure could harm our relationship with customers, expose us to lawsuits or administrative sanctions or otherwise adversely affect our provision of service to customers and our internal operations

As part of our business strategy, we use our information systems and the Internet to deliver services to and perform transactions on behalf of our customers. We have in the past not experienced disruptions of service to customers, but there can be no assurance that we will not encounter disruptions in the future due to substantially increased numbers of customers and transactions or for other reasons. If we experience system interruptions, errors or downtime which could result from a variety of causes, including changes in technological failure, changes to systems, linkages with third-party systems and power failures or are unable to develop necessary technology, our business, prospects, financial condition and results of operations could be materially adversely affected.

Our hardware and software are also subject to damage or incapacitation by human error, natural disasters, power loss, sabotage, computer viruses and similar events or the loss of support services from third parties such as Internet service providers. We may encounter delays or other difficulties incorporating new services and businesses into our information technology systems and there can be no assurance that we will realize the efficiencies and other benefits we anticipate from doing so.

23. In case our services to the clients are not satisfactory it may cause damage to our professional reputation and legal liability.

We are into service industry and our business is dependent mainly on how we maintain our relationship with our existing clients who helps to retain existing clients and to attract the existing ones. Hence an unsatisfied client may be more damaging in our business than in other businesses. Our activities may subject us to the risk of significant legal liabilities to our clients and aggrieved third parties. In recent years, the volume of claims and amount of damages claimed in litigation and regulatory proceedings against financial intermediaries have been increasing due to strict regulations and investor awareness. These risks often may be difficult to assess or quantify and their existence and magnitude often remain unknown for substantial periods of time. Hence, we may incur significant legal expenses in defending against litigation. Substantial legal liability or significant regulatory action against us could have material financial effects on our Company or could even cause significant harm to our reputation, which could harm our business prospects.

24. We do not own the Registered Office, corporate office and few of the premises from where we are currently operating and the same has been taken on lease. Any failure on our part to meet the terms of those lease agreements, arrangements could affect our operations.

We do not own the registered office of our Company situated at 6th Milestone, New Bhai-Chara Complex, opp Mata Mandir, Chikambarpur UP Border Sahibabad Uttar Pradesh - 201006 and the same is on lease for a period of 11 months i.e. from July 01, 2017 to May 31, 2018. Apart from the registered office, our Company operates through our corporate office and the Branched which have been taken on lease basis. If any of the owners of these leased/license/ arranged premises do not renew the agreements/ arrangements under which we occupy the premises, we may suffer a disruption in our operations and might have to relocate. For further details, please see the section “Our Business” beginning on page no 106 of the Prospectus. We have been operating through the present registered office for a period of time and the lease for the same have been renewed periodically. Further, we do not foresee any problem in renewing the same. Also, we are sharing the registered office of our Company with our Associate Company namely “Share India Commodity Brokers Private Limited. In case there is any disturbance for the use of the said property between our company and our associate company could have an adverse affect on our business operations.

25. Our Company has during the preceding one year from the date of the Prospectus have allotted Equity Shares at a price which may be lower than the Issue Price.

In the last 12 months, we have made allotments of Equity Shares to the promoters and their relatives details of which are as follows:-

- Bonus issue in the ratio of 3:1 dated July 22, 2017 issued 1,38,69,441 Equity shares face value ₹10/- per Equity Share for consideration other than cash.

The Equity Shares allotted to investors pursuant to this Issue may be priced significantly higher due to various reasons including better performance by the Company, better economic conditions and passage of time. For Further details of equity shares issued, please refer to the chapter titled “*Capital Structure*” and “*Basis for Issue Price*” beginning on page 57 and 95 of this Prospectus

26. We often extend credit to our clients for dealing in securities and any default by a client or any downturn in the market could result in substantial losses.

We allow some of our clients to trade in the stock market and take position on particular stocks by depositing only upfront margin amount. The client is then required to pay/ deposit with us the balance amount, before the pay-in date. In case, the said client is not able to pay the balance amount to us before the pay-in date of the exchange for the said transaction, we, at times extend credit to such clients for the pay-in of the stock exchange. Stock markets are prone to volatility. Hence, in case of highly volatile market or adverse movements in share price, it may be possible that the client may not honour their commitment. Hence, by permitting our customers to purchase securities on margin, we are subject to risks inherent in extending credit, especially during periods of rapidly declining markets in which the value of the collateral held by us could fall below the amount of a customer’s indebtedness. In the event of an occurrence of any unforeseen magnitude our business may have a negative impact due to increase in Bad Debts and simultaneous increase in our losses.

27. Error in Punching of trade orders

Some of the orders by our clients are placed over the phone. Thus, we sometimes face the risk of making errors in punching the orders. The entire risk/ loss incurred by our client due to error on our part are to be borne by us. In case of any such event could have an adverse effect on our business operations, profitability and operations.

28. Our risk management policies and procedures may leave us exposed to unidentified risks or unanticipated levels of risk which could lead to material losses.

Our risk management techniques and strategies may not be fully effective in mitigating our exposure to risks and may not cover risks that we fail to identify or anticipate. Some methods of risk management are based on the use of observed historical market behavior. We apply statistical and other tools to these observations to arrive at quantifications of our risk exposures. These tools and metrics may fail to predict future risk exposures. Our losses could therefore be significantly greater than those which the historical measures indicate. Our more qualitative approach to managing those risks could prove insufficient, exposing us to material unanticipated losses. Other risk management methods depend on evaluation of information regarding markets, clients or other matters that are publicly available or otherwise accessible by us. This information may not be accurate, complete, up-to-date or properly evaluated. Management of operational, legal and regulatory risk requires, among other things, policies and procedures to properly record and verify a large number of transactions and events. We cannot assure you that our policies and procedures will effectively and accurately record and verify this information. We seek to monitor and control our risk exposure through a variety of separate but complementary financial, credit, operational and legal reporting systems. Nonetheless, the effectiveness of our ability to manage risk exposure cannot be completely or accurately predicted or fully assured. For example, unexpectedly large or rapid movements or disruptions in one or more markets or other unforeseen developments could have a material adverse effect on our results of operations and financial condition. The consequences of these developments could include losses due to adverse changes in inventory values, decreases in the liquidity of trading positions, higher volatility in systemic risk.

29. Risks associated with our branches, sub-brokers and authorized person.

We face several risks associated with our branches, sub-brokers and authorized person, including whether they have the experience and financial resources to be effective operators and remain aligned with us on operating, promotional and capital-intensive initiatives, especially during periods of underperformance, and the potential impact on us if they experience other operational problems or project a image inconsistent with our values, particularly if our contractual and other rights and remedies are limited, costly to exercise or subject to litigation.

30. We depend on third party vendors and service providers.

We rely on third parties for some of our technological infrastructure that support our capital market businesses. Failure to continue to access these third party technologies on commercially acceptable terms could limit our ability to offer competitive service offerings and adversely impact our future operating results. We also rely on several local service providers for delivering our services and any failure to continue these arrangements on commercially acceptable terms could adversely impact our future operating results.

31. Our operations are significantly located in the northern India region any failure to expand our operations may restrict our growth and adversely affect our business

Currently, we are carrying our business mainly in the northern India region and hence our major revenues are generated from operations in these regions only. In the event that demand for equity trading activities in general reduces or stops by any reason including political discord or instability or change in policies of State, then our financial condition and operating results may be materially and adversely affected. Geographical and functional expansion of our business domain requires establishment of adequate network. As we seek to diversify our regional focus we may face the risk that our competitors may be better known in other markets, enjoy better relationships with customers. Our lack of exposure in geographical boundaries outside our operating regions could impact our future revenues.

32. Our inability to manage growth could disrupt our business and reduce our profitability.

A principal component of our strategy is to continue to grow by expanding the size and geographical scope of our businesses, as well as the development of our new business streams. This growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial and internal controls. Continuous expansion increases the

challenges involved in financial management, recruitment, training and retaining high quality human resources, preserving our culture, values and entrepreneurial environment, and developing and improving our internal administrative infrastructure. Any inability on our part to manage such growth could disrupt our business prospects, impact our financial condition and adversely affect our results of operations.

33. Major fraud, lapses of internal control or failures on part of the employees could adversely impact the company's business.

Our Company is vulnerable to risk arising from the failure of employees to adhere to approved procedures, system controls, fraud, system failures, information system disruptions, communication systems failure and interception during transmission through external communication channels or networks. Failure to protect fraud or breach in security may adversely affect our Company's operations and financial performance. Our reputation could also be adversely affected by significant fraud committed by our employees, agents, customers or third parties.

34. We face intense competition in our businesses, which may limit our growth and prospects.

Our Company faces significant competition from other stock brokers. In particular, we compete with other Indian and foreign brokerage houses operating in the markets in which we are present. We compete on the basis of a number of factors, including execution, depth of product and service offerings, innovation, reputation and price. Our competitors may have advantages over us, including, but not limited to:

- Substantially greater financial resources;
- Longer operating history than in certain of our businesses;
- Greater brand recognition among consumers;
- Larger customer bases in and outside India; or
- More diversified operations which allow profits from certain operations to support others with lower profitability.

These competitive pressures may affect our business, and our growth will largely depend on our ability to respond in an effective and timely manner to these competitive pressures.

35. We have incurred substantial indebtedness which exposes us to various risks which may have an adverse effect on our business and results of operations

Our ability to borrow and the terms of our borrowings will depend on our financial condition, the stability of our cash flows, general market conditions, economic and political conditions in the markets where we operate and our capacity to service debt. As on March 31, 2017, our total outstanding indebtedness was ₹ 2042.95 Lakhs. Our significant indebtedness results in substantial amount of debt service obligations which could lead to:

- increasing our vulnerability to general adverse economic, industry and competitive conditions;
- limiting our flexibility in planning for, or reacting to, changes in our business and the industry;
- affecting our credit rating;
- limiting our ability to borrow more money both now and in the future; and
- increasing our interest expenditure and adversely affecting our profitability.

The above Loan amount includes an unsecured loan from our Group Company namely Windpipe Finvest Private Limited the outstanding amount of which as on March 31, 2017 is ₹ 1037.83 Lacs. If the loans are recalled on a short notice, we may be required to arrange for funds to fulfil the necessary requirements. The occurrence of these events may have an adverse effect on our cash flow and financial conditions of the company. For further details regarding our indebtedness, see "*Statement of Financial Indebtedness*" on page 226 of this Prospectus.

36. Loans availed by our Company have been secured on personal guarantees of our Promoter and Promoter Group members. Our business, financial condition, results of operations, cash flows and prospects may be adversely affected in case of invocation of any personal guarantees or securities of the collateral provided by our Promoter and Promoter Group members.

Our Promoter and Promoter Group Members has provided personal guarantees and provided their personal property as security to secure a significant portion of our existing borrowings taken from HDFC Bank Limited

and ICICI Bank Limited, and may continue to provide such guarantees and other security post listing. In case of a default under our loan agreements, any of the personal guarantees provided by our Promoter and Promoter Group Members may be invoked and/ or the security may also be enforced, which could negatively impact the reputation and networth of the Promoters. Also, we may face certain impediments in taking decisions in relation to our Company, which in turn would result in a material adverse effect on our financial condition, business, results of operations and prospects and would negatively impact our reputation. In addition, our Promoter and Promoter Group Members may be required to liquidate his shareholding in our Company to settle the claims of the lenders, thereby diluting his shareholding in our Company. We may also not be successful in procuring alternate guarantees/ alternate security satisfactory to the lenders, as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows. For further details regarding loans availed by our Company, please refer “*Statement of Financial Indebtedness*” on page no 226 of this Prospectus.

37. We are heavily dependent on our Promoters and Key Managerial Personnel for the continued success of our business through their continuing services and strategic guidance and support.

Our success heavily depends upon the continued services of our Key managerial personnel, along with support of our Promoter. We also depend significantly on our Key Managerial Persons for executing our day to day activities. The loss of any of our Promoter and Key Management Personnel, or failure to recruit suitable or comparable replacements, could have an adverse effect on us. The loss of service of the Promoters and other senior management could seriously impair the ability to continue to manage and expand the business efficiently. If we are unable to retain qualified employees at a reasonable cost, we may be unable to execute our growth strategy. For further details of our Directors and key managerial personnel, please refer to Section “*Our Management*” on page 136 of this Prospectus.

In the event we breach any financial or other covenants contained in any of our financing arrangements, we may be required under the terms of such financing arrangements to immediately repay our

borrowings either in whole or in part, together with any related costs. This may adversely impact our results of operations and cash flows.

The delay/shortfall in receiving these proceeds could result in inadequacy of funds or may result in borrowing funds on unfavorable terms, both of which scenarios may affect the business operation and financial performance of the company. Further the deployment of the funds raised in the issue will be entirely at the discretion of the management and any revision in the estimates may require us to reschedule our projected expenditure and may have a bearing on our expected revenues and earnings.

In addition to the above, our promoters will continue to have the ability to take actions that are not in, or may conflict with our interest or the interest of some or all of our minority shareholders, and there is no assurance that such action will not have any adverse effect on our future financials or results of operations.

49. Increased competition for skilled employees and salary increases for our employees may reduce our profit margin.

Due to sustained economic growth in India and increased competition for skilled employees in India over the last few years, wages of skilled employees are increasing at a fast rate. External Risk Factors

54. Any downgrading of India’s debt rating by a domestic or international rating agency could have a negative impact on our business.

India’s sovereign debt rating could be downgraded due to various factors, including changes in tax or fiscal policy or a decline in India’s foreign exchange reserves, which are outside our control. Any adverse revisions to India’s credit ratings for domestic and international debt by domestic or international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could have a material adverse effect on our business and financial performance, ability to obtain financing for capital expenditures and the price of our Equity Shares.

In addition, the Asian region has from time to time experienced instances of civil unrest and hostilities among neighboring countries. 56. Instability in financial markets could materially and adversely affect our results of operations and financial condition.

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in effect in India, transfer of shares between non residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

59. If certain labour laws become applicable to us, our profitability may be adversely affected.

India has stringent labour legislations that protect the interests of workers, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Any change or modification in the existing labour laws may affect our flexibility in formulating labour related policies.

60. Political, economic and social changes in India could adversely affect our business.

Our business, and the market price and liquidity of our Company's shares, may be affected by changes in Government policies, including taxation, social, political, economic or other developments in or affecting India could also adversely affect our business. Since 1991, successive governments have pursued policies of economic liberalization and financial sector reforms including significantly relaxing restrictions on the private sector. SECTION III – INTRODUCTION

SUMMARY OF OUR INDUSTRY

GLOBAL ECONOMY: RECENT DEVELOPMENTS

The global economic recovery in 2015-16 remained at an ever slowing and increasingly fragile pace. Recovery in advanced economies was still hampered by the legacies of the global financial crisis, low growth in productivity and unfavourable demographic developments. Major macroeconomic realignments are affecting prospects differentially across countries and regions. These include the slowdown and rebalancing in China; a further decline in commodity prices, especially for oil, with sizable redistributive consequences across sectors and countries; a related slowdown in investment and trade; and declining capital flows to emerging markets and developing economies. The world output was projected to have grown by 3.1 per cent in 2015 (3.4 per cent in 2014) with the advanced economies growing by 1.9 per cent (1.8 per cent in 2014), the emerging market and developing economies (EMDEs) by 4.0 per cent (4.6 per cent in 2014) and the emerging and developing Asia by 6.6 per cent (6.8 per cent in 2014); 2015, thus, marked the fifth consecutive year of declining growth for EMDEs.

In the United States, in spite of overall improvement in labour market conditions, economic growth weakened with weaker external as well as domestic demand and a decline in non-residential investments. The euro area recovered on the back of strengthening domestic demand, while Japan continued to reel from a sharp drop in private consumption. Concerns heightened during 2015 about the unwinding of prior excesses in China as it transitioned to a more balanced growth path, the recession in Brazil and Russia and weaker terms of trade and tighter external financial conditions in many of the oil exporting countries. As per the IMF estimates, in 2015, the United States is projected to have grown by 2.4 per cent (2.4 per cent in 2014), the euro area by 1.6 per cent (0.9 per cent in 2014), Japan by 0.5 per cent (0.0 per cent in 2014), China by 6.9 per cent (7.3 per cent in 2014), while Brazil registered a decline in output of 3.8 per cent (growth of 0.1 per cent in 2014) and Russia too shrunk by 3.7 per cent (growth of 0.7 per cent in 2014).

The sharp fall in commodity prices brought about headline inflation in advanced economies of 0.3 per cent in 2015 (1.4 per cent in 2014), the lowest since the global financial crisis. Lower oil and commodity prices exerted downward pressure on inflation in many EMEs, though inflation rose in some countries like Brazil and Russia due to sizable currency depreciations. On average, inflation hovered at 4.7 per cent in EMDEs in 2015 (4.7 per cent in 2014).

Concerns about lack of policy space in advanced economies to respond to a potential worsening in the outlook, the impact of very low oil prices and the slowdown in China triggered volatility in global financial markets in 2015. The IMF attributed the market turbulence largely to concerns regarding the prospects of the financial sector relating to fears of a persistent softening in global growth and its impact on already weak profitability, unaddressed debt overhang legacies, changes in the regulatory environment in Europe, exposure to the commodity sector and persistently low interest rates.

The policy stance remained very accommodative but with asymmetric shifts. In December 2015, while the US Federal Reserve raised policy rates above the zero lower bound for the first time since 2009 and communicated that any further policy actions will remain data dependent, the European Central Bank (ECB) moved further in following an unconventional monetary policy. The Bank of Japan (BoJ) introduced a negative interest rate on marginal excess reserves in January 2016. Many of the commodity exporting EMDEs raised policy rates in 2015 to rein in currency depreciation and associated changes in inflation and inflation expectations.

Indian Economy Outlook

India remains the fastest growing economy in the world - economic fundamentals are strong, and reform momentum continues. GST is on track for implementation in the second quarter of the fiscal year, and is expected to yield substantial growth dividends from higher efficiencies, and raise more revenues in the long term, according to a new World Bank report released today. While, agriculture growth delivered in 2016-2017, the report notes that investment growth remains subdued, partly because of banking sector stress.

The report also highlights the low and falling participation of women in the labor market. For India to achieve higher growth, it needs to create safe, flexible and well-paying jobs for a large number of women who are currently not in the labor market.

The report says the fundamentals of the Indian economy remain strong, with robust economic growth, strong fiscal consolidation, low current account deficit, higher agricultural output, growing FDI, low inflation and higher wages in rural areas. Favorable monsoons boosted agriculture and rural consumption, while urban consumption remained robust and exports rebounded in the third quarter of 2016-2017.

Timely and smooth implementation of landmark reforms such as the GST and a new code to deal with bankruptcies, as well as decisive action to resolve the NPA challenge of public sector banks, is crucial to enhance the economy's potential growth, says the May 2017 edition of the Indian Development Update.

The report notes that India will achieve a major reform of indirect taxes through the GST without increasing the burden on the poor. Given the efficiency and revenue gains that the reform will eventually achieve, the overall impact of the GST on equity and poverty is likely to be positive.

“India remains the fastest growing economy in the world and it will get a big boost from its approach to GST which will - reduce the cost of doing business for firms, reduce logistics costs of moving goods across states, while ensuring no loss in equity,” said Junaid Ahmad, World Bank Country Director in India. “Low female labor force participation, however, remains a serious concern. Higher levels of women participation in the economy can help propel India closer to double digit growth”.

Demonetization has potential to bring positive transformation

India's economy was slowing down in early FY17, until the favorable monsoon started lifting the economy, but the recovery was temporarily disrupted by the government's "demonetization" initiative. On November 8, 2016, the government demonetized (i.e. removed legal tender status from) an estimated 23 billion INR 500 and INR1000 banknotes, corresponding to 86 percent of India's currency in circulation. Demonetization caused an immediate cash crunch, and activity in cash reliant sectors was affected. GDP growth slowed to 7.0 per cent year-on-year (y/y) during the third quarter of 2016-2017 from 7.3 percent in the first quarter.

As a result, a modest slowdown is expected in the GDP growth in FY 2016-2017 to 6.8 percent. According to the Update, growth is expected to recover in FY 2017-2018 to 7.2 percent and is projected to gradually increase to 7.7 percent in FY 2019-2020.

TRENDS AND OPERATIONS IN THE SECURITIES MARKET

PRIMARY SECURITIES MARKET

In 2015-16, activity in the primary market showed signs of moderate growth as reflected in resource mobilisation by the corporate sector. A healthy and regulated primary market is vital for maintaining the confidence of issuers, intermediaries and investors. In order to keep pace with the changing economic environment and to address concerns of various market participants, especially issuers and the investing community, regulations governing the primary market have been amended from time to time. Such reviews are intended to facilitate easy capital mobilisation by companies while ensuring adequate investor protection. Streamlining of the public issue process, facilitating capital raising by start-ups, simplifying the procedure of delisting by small companies and SEBI's notification (Listing Obligations and Disclosure Requirements) Regulations, 2015 were some important developments that took place in 2015-16.

During 2015-16, 108 companies accessed the primary market and raised ₹ 58,166 crore through 95 public and 13 rights issues, as against 88 companies which raised ₹ 19,202 crore in 2014-15 through public (70) and rights issues. At 74, the number of IPOs in 2015-16 was higher as compared to 46 in 2014-15. Of the 74 IPOs, 50 have been listed on the SME platform. The amount raised through IPOs in 2015-16 was higher at ₹ 14,815 crore as compared to ₹ 3,039 crore during 2014-15. As in the previous year, there was no FPO in 2015-16. The share of public issues in the total resource mobilisation increased to 84.1 per cent during 2015-16 from 64.8 per cent during 2014-15; while the share of rights issues decreased from 35.2 per cent in 2014-15 to 15.9 per cent in 2015-16. The share of debt issues in total resource mobilisation stood at 58.6 per cent and that of equity issues at

41.4 per cent in 2015-16. The IPO issues that opened in 2015-16 received an overwhelming response from the investors as out of 24 issues that opened during the year, seven were oversubscribed more than 20 times. Three IPOs were oversubscribed 30-40 times, while one IPO was oversubscribed by 70-80 times.

The SME platform of the exchange is intended for small and medium sized companies with high growth potential and post issue paid up capital less than or equal to ₹ 25 crore. GLOBAL ECONOMY: RECENT DEVELOPMENTS

The global economic recovery in 2015-16 remained at an ever slowing and increasingly fragile pace. Recovery in advanced economies was still hampered by the legacies of the global financial crisis, low growth in productivity and unfavourable demographic developments. Major macroeconomic realignments are affecting prospects differentially across countries and regions. These include the slowdown and rebalancing in China; a further decline in commodity prices, especially for oil, with sizable redistributive consequences across sectors and countries; a related slowdown in investment and trade; and declining capital flows to emerging markets and developing economies. The world output was projected to have grown by 3.1 per cent in 2015 (3.4 per cent in 2014) with the advanced economies growing by 1.9 per cent (1.8 per cent in 2014), the emerging market and developing economies (EMDEs) by 4.0 per cent (4.6 per cent in 2014) and the emerging and developing Asia by 6.6 per cent (6.8 per cent in 2014); 2015, thus, marked the fifth consecutive year of declining growth for EMDEs.

In the United States, in spite of overall improvement in labour market conditions, economic growth weakened with weaker external as well as domestic demand and a decline in non-residential investments. The euro area recovered on the back of strengthening domestic demand, while Japan continued to reel from a sharp drop in private consumption. Concerns heightened during 2015 about the unwinding of prior excesses in China as it transitioned to a more balanced growth path, the recession in Brazil and Russia and weaker terms of trade and tighter external financial conditions in many of the oil exporting countries. As per the IMF estimates, in 2015, the United States is projected to have grown by 2.4 per cent (2.4 per cent in 2014), the euro area by 1.6 per cent (0.9 per cent in 2014), Japan by 0.5 per cent (0.0 per cent in 2014), China by 6.9 per cent (7.3 per cent in 2014), while Brazil registered a decline in output of 3.8 per cent (growth of 0.1 per cent in 2014) and Russia too shrunk by 3.7 per cent (growth of 0.7 per cent in 2014) (Table 1.1).

The sharp fall in commodity prices brought about headline inflation in advanced economies of 0.3 per cent in 2015 (1.4 per cent in 2014), the lowest since the global financial crisis. Lower oil and commodity prices exerted downward pressure on inflation in many EMEs, though inflation rose in some countries like Brazil and Russia due to sizable currency depreciations. On average, inflation hovered at 4.7 per cent in EMDEs in 2015 (4.7 per cent in 2014).

Concerns about lack of policy space in advanced economies to respond to a potential worsening in the outlook, the impact of very low oil prices and the slowdown in China triggered volatility in global financial markets in 2015. The IMF attributed the market turbulence largely to concerns regarding the prospects of the financial sector relating to fears of a persistent softening in global growth and its impact on already weak profitability, unaddressed debt overhang legacies, changes in the regulatory environment in Europe, exposure to the commodity sector and persistently low interest rates.

The policy stance remained very accommodative but with asymmetric shifts. In December 2015, while the US Federal Reserve raised policy rates above the zero lower bound for the first time since 2009 and communicated that any further policy actions will remain data dependent, the European Central Bank (ECB) moved further in following an unconventional monetary policy. The Bank of Japan (BoJ) introduced a negative interest rate on marginal excess reserves in January 2016. Many of the commodity exporting EMDEs raised policy rates in 2015 to rein in currency depreciation and associated changes in inflation and inflation expectations.

Indian Economy Outlook

India remains the fastest growing economy in the world - economic fundamentals are strong, and reform momentum continues. GST is on track for implementation in the second quarter of the fiscal year, and is expected to yield substantial growth dividends from higher efficiencies, and raise more revenues in the long term, according to a new World Bank report released today. While, agriculture growth delivered in 2016-2017, the report notes that investment growth remains subdued, partly because of banking sector stress.

The report also highlights the low and falling participation of women in the labor market. For India to achieve higher growth, it needs to create safe, flexible and well-paying jobs for a large number of women who are currently not in the labor market.

The report says the fundamentals of the Indian economy remain strong, with robust economic growth, strong fiscal consolidation, low current account deficit, higher agricultural output, growing FDI, low inflation and higher wages in rural areas. Favorable monsoons boosted agriculture and rural consumption, while urban consumption remained robust and exports rebounded in the third quarter of 2016-2017.

Timely and smooth implementation of landmark reforms such as the GST and a new code to deal with bankruptcies, as well as decisive action to resolve the NPA challenge of public sector banks, is crucial to enhance the economy's potential growth, says the May 2017 edition of the Indian Development Update.

The report notes that India will achieve a major reform of indirect taxes through the GST without increasing the burden on the poor. Given the efficiency and revenue gains that the reform will eventually achieve, the overall impact of the GST on equity and poverty is likely to be positive.

“India remains the fastest growing economy in the world and it will get a big boost from its approach to GST which will - reduce the cost of doing business for firms, reduce logistics costs of moving goods across states, while ensuring no loss in equity,” said Junaid Ahmad, World Bank Country Director in India. “Low female labor force participation, however, remains a serious concern. Higher level of women participation in the economy can help propel India closer to double digit growth”.

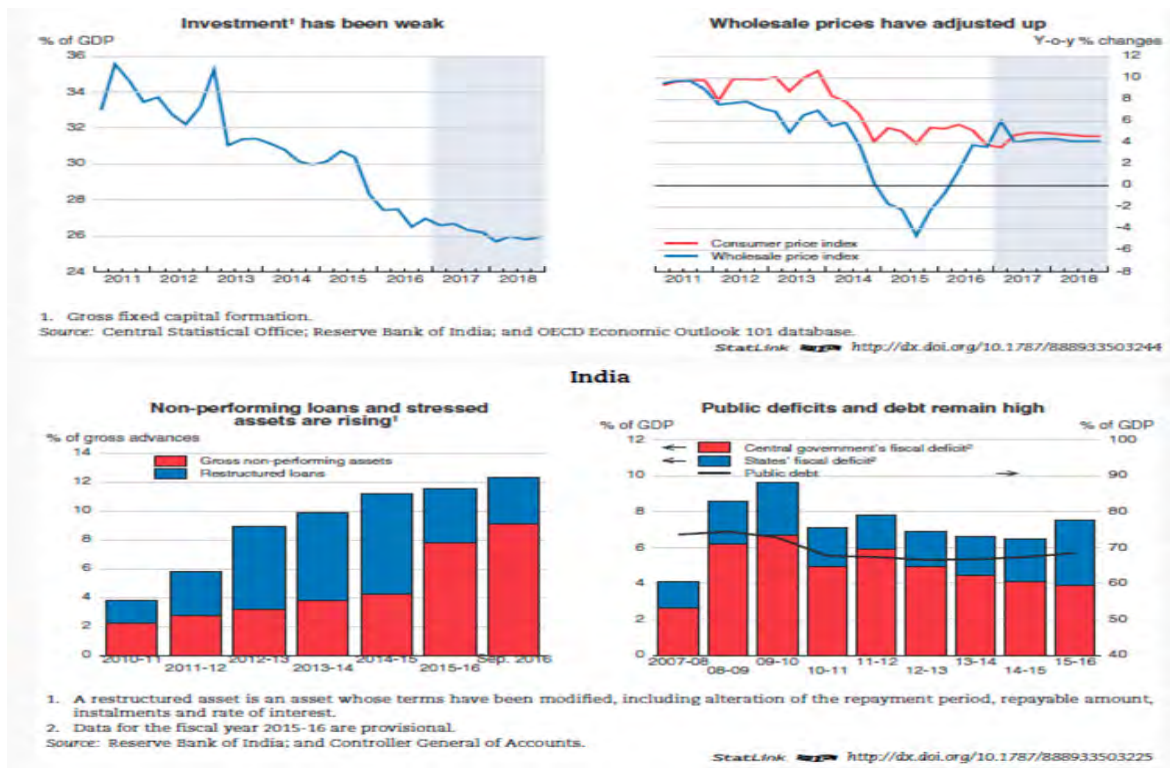

Demonetization has potential to bring positive transformation

India's economy was slowing down in early FY17, until the favorable monsoon started lifting the economy, but the recovery was temporarily disrupted by the government's "demonetization" initiative. On November 8, 2016, the government demonetized (i.e. removed legal tender status from) an estimated 23 billion INR 500 and INR1000 banknotes, corresponding to 86 percent of India's currency in circulation. Demonetization caused an immediate cash crunch, and activity in cash reliant sectors was affected. GDP growth slowed to 7.0 per cent year-on-year (y/y) during the third quarter of 2016-2017 from 7.3 percent in the first quarter.

As a result, a modest slowdown is expected in the GDP growth in FY 2016-2017 to 6.8 percent. According to the Update, growth is expected to recover in FY 2017-2018 to 7.2 percent and is projected to gradually increase to 7.7 percent in FY 2019-2020.

TRENDS AND OPERATIONS IN THE SECURITIES MARKET

PRIMARY SECURITIES MARKET

In 2015-16, activity in the primary market showed signs of moderate growth as reflected in resource mobilisation by the corporate sector. A healthy and regulated primary market is vital for maintaining the confidence of issuers, intermediaries and investors. In order to keep pace with the changing economic environment and to address concerns of various market participants, especially issuers and the investing community, regulations governing the primary market have been amended from time to time. Such reviews are intended to facilitate easy capital mobilisation by companies while ensuring adequate investor protection. Streamlining of the public issue process, facilitating capital raising by start-ups, simplifying the procedure of delisting by small companies and SEBI's notification (Listing Obligations and Disclosure Requirements) Regulations, 2015 were some important developments that took place in 2015-16.

During 2015-16, 108 companies accessed the primary market and raised ₹ 58,166 crore through 95 public and 13 rights issues, as against 88 companies which raised ₹ 19,202 crore in 2014-15 through public (70) and rights issues. At 74, the number of IPOs in 2015-16 was higher as compared to 46 in 2014-15. Of the 74 IPOs, 50 have been listed on the SME platform. The amount raised through IPOs in 2015-16 was higher at ₹ 14,815 crore as compared to ₹ 3,039 crore during 2014-15. As in the previous year, there was no FPO in 2015-16. The share of public issues in the total resource mobilisation increased to 84.1 per cent during 2015-16 from 64.8 per cent during 2014-15; while the share of rights issues decreased from 35.2 per cent in 2014-15 to 15.9 per cent in 2015-16. (Chart 2.1) The share of debt issues in total resource mobilisation stood at 58.6 per cent and that of equity issues at 41.4 per cent in 2015-16. The IPO issues that opened in 2015-16 received an overwhelming response from the investors as out of 24 issues that opened during the year, seven were oversubscribed more than 20 times. Three IPOs were oversubscribed 30-40 times, while one IPO was oversubscribed by 70-80 times.

The SME platform of the exchange is intended for small and medium sized companies with high growth potential and post issue paid up capital less than or equal to ₹ 25 crore. In 2015-16, 50 companies were listed on

SME platform raising a total amount of ₹ 379 crore as compared to ₹ 278 crore raised through 39 issues in 2014-15, registering an increase of 36.6 per cent in resource mobilisation.

The Goods and Services Tax Act, 2017

Goods and Services Tax (GST) is considered to be the biggest tax reform in India since independence. It will help realise the goal of “One Nation-One Tax-One Market.” GST is expected to benefit all the stakeholders – industry, government and consumer.

Goods and Services Tax (GST) is an indirect tax throughout India and was introduced as The Constitution (One Hundred and Twenty Second Amendment) Act 2017, following the passage of Constitution 122nd Amendment Bill. The GST is governed by GST Council and its Chairman is Union Finance Minister of India – Arun Jaitley. This Act has been made applicable with effect from 1st July 2017.

With the introduction of GST all central, state level taxes and levies on all goods and services have been subsumed within an integrated tax having two components – central GST and a state GST. Thus there will be a comprehensive and continuous mechanism of tax credits.

The Central government passed four sets of GST Acts in the Budget session this year. These were Central GST Act, 2017; Integrated GST Act, 2017; Union Territory GST Act, 2017 and GST (Compensation to States) Act, 2017. The Acts were approved by the Parliament after they were introduced as the part of the Money Bill. Following the passage of GST Acts, the GST council has decided 4 tax rate slabs viz., 5%, 12%, 18% and 28% on supply of various goods and services.

India has adopted a dual GST model, meaning that taxation is administered by both the Union and State Governments. Transactions made within a single State will be levied with Central GST (CGST) by the Central Government and State GST (SGST) by the government of that State. For inter-state transactions and imported goods or services, an Integrated GST (IGST) is levied by the Central Government. GST is a consumption-based tax; therefore, taxes are paid to the State where the goods or services are consumed and not the State in which they were produced.

Following laws which have been subsumed in GST Acts were applicable to the Company till 30th June 2017 and shall remain applicable here after as stated in the GST Acts:

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government, the FDI Policy (as defined below) and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are FIPB and the RBI.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”), issued consolidated FDI Policy, which with effect from June 07, 2016 consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on June 7, 2016. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidation FDI Policy will be valid until the DIPP issues an updated circular.

Subscription by foreign investors (NRIs/FPIs)

FPIs are permitted to subscribe to Equity Shares of an Indian Company in a public offer without the prior approval of the RBI, so long as the price of the Equity Shares to be issued is not less than the price at which the Equity Shares are issued to residents. SEBI registered FPIs have been permitted to purchase shares of an Indian company through public offer, subject to total FPI investment being within the individual FPI/sub account investment limit of 10 per cent subject to the total sectoral cap of all FPIs/sub-accounts put together being 24 per cent of the paid-up capital of the Indian company.

The transfer of shares between an Indian resident and a Non-resident does not require prior approval of FIPB or RBI, subject to fulfillment of certain conditions as specified by DIPP / RBI, from time to time. Such conditions include (i) the activities of the investee company are under the automatic route under the foreign direct investment (“FDI”) Policy and the non-resident shareholding is within the sectoral limits under the FDI policy; and (ii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI. Investors are advised to refer to the exact text of the relevant statutory provisions of law before investing and / or subsequent purchase or sale transaction in the Equity Shares of Our Company.
