SECTION II – RISK FACTORS

An investment in Equity Shares involves a high degree of risk. You should carefully consider all the information in this Prospectus, including the risks and uncertainties described below, before making an investment in our Equity Shares. In making an investment decision prospective investors must rely on their own examination of our Company and the terms of this offer including the merits and risks involved. Any potential investor in, and subscriber of, the Equity Shares should also pay particular attention to the fact that we are governed in India by a legal and regulatory environment in which some material respects may be different from that which prevails in other countries. The risks and uncertainties described in this section are not the only risks and uncertainties we currently face. Additional risks and uncertainties not known to us or that we currently deem immaterial may also have an adverse effect on our business. If any of the following risks, or other risks that are not currently known or are now deemed immaterial, actually occur, our business, results of operations and financial condition could suffer, the price of our Equity Shares could decline, and you may lose all or part of your investment. Additionally, our business operations could also be affected by additional factors that are not presently known to us or that we currently consider as immaterial to our operations.

Unless otherwise stated in the relevant risk factors set forth below, we are not in a position to specify or quantify the financial or other implications of any of the risks mentioned herein. To obtain a complete understanding, you should read this section in conjunction with the chapters titled “Our Business” beginning on page 108, “Our Industry” beginning on page 101 and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on page 245 respectively, of this Prospectus as well as other financial information contained herein.

The following factors have been considered for determining the materiality of Risk Factors:

- *Some events may not be material individually but may be found material collectively;*
- *Some events may have material impact qualitatively instead of quantitatively;*
- *Some events may not be material at present but may have material impact in future.*

The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are risk factors where the impact may not be quantifiable and hence the same has not been disclosed in such risk factors. Unless otherwise stated, the financial information of the Company used in this section is derived from our financial statements under Indian GAAP, as restated in this Prospectus. Unless otherwise stated, we are not in a position to specify or quantify the financial or other risks mentioned herein. For capitalized terms used but not defined in this chapter, refer to the chapter titled “Definitions and Abbreviations” beginning on page 3 of this Prospectus. The numbering of the risk factors has been done to facilitate ease of reading and reference and does not in any manner indicate the importance of one risk factor over another.

The risk factors are classified as under for the sake of better clarity and increased understanding:

A. INTERNAL RISK FACTORS

I. Business Risks/ Company specific Risk

1. ***Our business is subject to extensive government regulation, which may restrict the types of services we are permitted to offer or result in additional tax or other costs that reduce our revenues and earnings.***

The staffing service sector is subject to complex laws and regulations. These laws and regulations cover the following such as Minimum Wages Act, ESI Act, CLRA Act, EPF Act and ID Act, which vary from state to state in India and are subject to change. These laws and regulations sometimes limit the size and growth of HR services markets. Changes in laws or government regulations may result in prohibition or restriction of certain types of employment services we are permitted to offer, or the imposition of new or additional licensing or tax requirements that could reduce our revenues and earnings. There can be no assurance that we will be able to increase the fees charged to our clients in a timely manner and by a sufficient amount to cover increased costs as a result of any changes in laws or government regulations. Any future changes in laws or government regulations, including changes in tax laws and rates of taxation, may make it more onerous for us to provide staffing services and could have a material adverse effect on our business, financial condition and results of operations. Further, labour laws in India are complex and subject to sporadic change, and non-compliance with any requirements thereunder may result in penalties, loss of business and damage to our reputation. These effects may occur notwithstanding the assurance over key risks that our internal processes to identify risks, allocate risk owners and monitor actions provide.

For further details on the laws and regulations applicable to us, please refer to the section “Key Industry Regulation and Policies” beginning on page 130 of this Prospectus.

2. ***Our top two sectors contribute 80.83% of our consolidated revenues for the year ended March 31, 2017. Any loss of business from any one or both sectors may adversely affect our revenues and profitability.***

Our top two sectors, Oil & Gas and Engineering contribute 80.82% of our revenues for the year ended March 31, 2017. Any decline in our quality standards, growing competition and any change in the demand for our services in these sectors may adversely affect our ability to retain clients from these sectors. We cannot assure that we shall generate the same quantum of business, or any business at all, from these sectors, and loss of business from any one or both sectors may adversely affect our revenues and profitability. However, the composition and revenue generated from these sectors might change as we continue to add new clients in normal course of business. We intend to retain our customers by offering solutions to address specific needs in a proactive, cost effective and time efficient manner. This helps us in providing better value to each customer thereby increasing our engagement with our new and existing customer base that presents a substantial opportunity for growth.

3. ***Our business is significantly affected by fluctuations in general economic activity.***

Demand for Engineering and Technical manpower is significantly affected by the general level of commercial activity and economic conditions in the regions and sectors in which we operate. An economic downturn in a region or sector in which we operate may adversely affect our operations in that region or sector. Our clients are located in India as well as in abroad and a downturn in the global markets may adversely affect their operations, thereby affecting our business, financial conditions or results of operations. We may also experience more competitive pricing pressure during periods of economic downturn.

4. ***Within the parameters as mentioned in the chapter titled ‘Objects of this Issue’ beginning on page 90 of this Prospectus, our Company’s management will have flexibility in applying the proceeds of this Issue. The fund requirement and deployment mentioned in the Objects of this Issue have not been appraised by any bank or financial institution.***

The fund requirement and deployment, as mentioned in the “Objects of the Issue” on page 90 of the Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan and order position. We cannot assure that the current business plan will be implemented or order shall be executed in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter “Objects of the Issue” is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency.

5. ***Any variation in the utilisation of the Net Proceeds or in the terms of any contract as disclosed in the Prospectus would be subject to certain compliance requirements, including prior shareholders’ approval.***

We propose to utilise the Net Proceeds as stated under section titled "Objects of the Issue". For further details of the proposed objects of the Issue, please refer to section titled "Objects of the Issue" beginning on page 90 of the Prospectus. At this stage, we cannot determine with any certainty if we would require the Net Proceeds to meet any other expenditure or fund any exigencies arising out of competitive environment, business conditions, economic conditions or other factors beyond our control. In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilisation of the Net Proceeds or in the terms of any contract as disclosed in the Prospectus without obtaining the shareholders’ approval through a special resolution. In the event of any such circumstances that require us to undertake variation in the disclosed utilisation of the Net Proceeds, we may not be able to obtain the shareholders’ approval in a timely manner, or at all. Any delay or in ability in obtaining such shareholders’ approval may adversely affect our business or operations.

Further, our Promoters or controlling shareholders would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to change the objects of the Issue or vary the terms of such contracts, at a price and manner as prescribed by SEBI. Additionally, the requirement on Promoters or controlling shareholders to provide an exit opportunity to such dissenting shareholders may deter the Promoters or controlling shareholders from agreeing to the variation of the proposed utilisation of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoters or the controlling shareholders of our Company will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price prescribed by SEBI.

In light of these factors, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Fresh Issue, if any, or vary the terms of any contract referred to in the Prospectus, even if such variation is in the interest of our Company. This may restrict our Company’s ability to respond to any change in our business or financial condition by re-deploying the unutilised portion of Net Proceeds, if any, or varying the terms of contract, which may adversely affect our business and results of operations.

6. ***We rely on our systems including information technology systems to manage our business processes and reporting and their failure could adversely affect our operations.***

We rely on our information technology systems to manage our business processes, operations and reporting. Any failure or malfunction in these information technology systems could result in business interruptions, including disruption in tracking, recording and analyzing work in progress, processing

financial information, managing creditors/debtors or engaging in normal business activities. This could adversely affect our reputation, competitive position and operational efficiencies.

7. *We may fail to attract and retain enough sufficiently trained employees to support our operations, as competition for highly skilled personnel is intense and we experience significant employee turnover rates.*

The staffing industry is highly labour intensive and our success depends to a significant extent on our ability to attract, hire, train and retain qualified employees, including our ability to attract employees with needed skills in the geographic areas in which we operate. The industry, including our Company, experiences high employee turnover. There is significant competition for professionals in India with skills necessary to perform the services we offer to our clients. Increased competition for these professionals, in the staffing industry or otherwise, could have an adverse effect on us. High attrition rates among our highly skilled employees, in particular, could result in a loss of domain and process knowledge, which could result in poor service quality and lead to breaches by us of our contractual obligations. High turnover rates increase our expenditures and therefore impact our profit margins due to higher recruitment, training and retention costs as a result of maintaining larger hiring, training and human resources departments and higher operating costs due to having to reallocate certain business processes among our operating facilities where we have access to the skilled workforce needed for the business. A lack of sufficiently qualified personnel could also inhibit our ability to establish operations in new markets and our efforts to expand geographically. Our failure either to attract, train and retain personnel with the qualifications necessary to fulfill the needs of our existing and future clients or to assimilate new employees successfully could have a material adverse effect on our business, results of operations, financial condition and cash flows. For further risk related to employee misconduct, kindly refer risk factor no. 8 on page no. 22 of the Draft Prospectus.

8. *We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.*

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

9. *Our Company has contingent liabilities which if materialises may adversely affect the financial position of the Company.*

As on March 31, 2017 our Company has contingent liabilities of towards bank guarantees, tax demands and gratuity not provided for to the tune of Rs. 1,444.67 Lakhs. The said contingent liabilities if materialises may adversely affect the financial position of our Company.

10. *Our Company has not followed Accounting Standard – 15 regarding Employee Benefits prescribed by the Institute of Chartered Accountants of India (ICAI).*

The Accounting Policy followed by us is not in conformity with the Accounting Standard prescribed by the Institute of Chartered Accountants of India, regarding disclosure of Present Value of Obligations with respect to the Retirement Benefits such as Gratuity and Leave Encashment to be paid to the employees. The Accounting Standard stipulates that these liabilities should be accounted in the Books on Accrual Basis.

11. Our revenues and expenses are difficult to predict and can vary significantly from period to period, which could cause our share price to decline.

Our revenue and profitability have grown in certain years and are likely to vary significantly in the future from period to period. Therefore, we believe that period to period comparisons of our results of operations are not necessarily meaningful and should not be relied upon as an indication of our future performance. It is possible that in future our results of operations may be below market expectations, which could cause the share price of our equity shares to decline significantly.

12. One of our Subsidiary has incurred losses in the past and may incur losses in future.

Sales of our wholly owned subsidiary, Aarvi Engineering & Consultants Private Limited has been on downtrend for last three financial years and it has also incurred losses in the last two financial years. If the downtrend further continues, we may have to impair our assets which will erode our profitability on consolidation basis.

Financial details are as under:

|---|----------------|----------------|----------------|
| Total Income | 1.68 | 74.67 | 169.85 |
| Profit after Tax | (38.31) | (26.44) | 1.03 |
| Earnings Per Share (Basic) (Rs.) | (192.00) | (132.00) | 5.00 |
| Net worth | 27.88 | 68.12 | 95.05 |
| Net Asset Value per Share of Rs. 100/- each (Rs.) | 139.40 | 340.62 | 475.27 |

For further details regarding our Subsidiaries, please refer to Chapter titled “Our Subsidiary” beginning on page 164 of the Draft Prospectus.

13. Our inability to meet our working capital requirements may have an adverse effect on our results of operations.

The Industry in which we operate is highly working capital intensive. A significant portion of our working capital is utilized towards trade receivables and other current assets. We intend to continue growing by expanding our business operations. Our inability to maintain sufficient cash flow, credit facility and other sources of fund in a timely manner, or at all, to meet the requirements of working capital could adversely effect on our financial condition & results of operations. For further details kindly refer page no .91 of the Draft Prospectus.

14. We have not made any alternate arrangements for meeting our working capital requirements for the Objects of the Issue. Further we have not identified any alternate source of financing the ‘Objects of the Issue’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.

As on date, we have not made any alternate arrangements for meeting our working capital requirements for the Objects of the Issue. Further, we have not identified any alternate source of working capital funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds could adversely affect our growth plans. We meet our working capital requirements through our owned funds, internal accruals and debt. Any shortfall in our net owned funds, internal accruals and our inability to raise debt would result in us being unable to meet our working capital requirements, which in turn will negatively affect our financial condition and results of operations. For further details please refer to the chapter titled “Objects of the Issue” beginning on page 90 of this Prospectus.

15. *We propose to utilize part of the Net Proceeds to undertake an acquisition for which the target has not been finalised.*

We propose to utilize our Net Proceeds towards acquisitions and other strategic investments. We propose to use part of Net Proceeds to acquire the target which is yet to be finalised. As on date of filing the Draft Prospectus, we have not entered into any definitive agreements towards such Acquisitions. The estimates are based solely on management estimates of the amounts to be utilised towards an acquisition and other relevant considerations. The actual deployment of funds will depend on a number of factors, including the timing, nature, size and number of strategic initiatives undertaken etc. For further details in relation to this object, please see section titled “Objects of the Issue” on page 90 of the Draft Prospectus.

16. *Our Company does not have much long term agreements for manpower outsourcing services with any clients in India and Overseas which may adversely affect our results of operations.*

Our Company does not have much long term commitments for manpower outsourcing services with any clients in India. There is no assurance that our Company will continue to receive requirements from the same clients either on substantially the same terms or at all, which could have an adverse effect on our Company’s operations and profitability.

17. *We face foreign exchange risks, primarily in our export of services that could adversely affect our results of operations.*

We export our services to other countries like United Arab Emirates and other Middle East countries that are generally priced in foreign currency. For the financial year ended March 31, 2017, March 31, 2016 and March 31, 2015, our revenues from operations to United Arab Emirates and other Middle East countries constitutes 1.22 %, 4.65% and 9.57% respectively. Accordingly, any increase in the value of rupee would lead to less realisation and consequently affect our profitability. Although we closely follow our exposure to foreign currencies and selectively enter into hedging transactions in an attempt to reduce the risks of currency fluctuations, these activities are not always sufficient to protect us against incurring potential losses if currencies fluctuate significantly. Any such losses on account of foreign exchange fluctuations may adversely affect our results of operations.

18. *In case of our inability to obtain, renew or maintain the statutory and regulatory licenses, permits and approvals required to operate our business it may have a material adverse effect on our business.*

We require certain statutory and regulatory permits, licenses and approvals to operate our business. We believe that we have obtained all the requisite permits and licenses which are adequate to run our business. However, there is no assurance that there are no other statutory/regulatory requirements which we are required to comply with.

Some of the approvals are granted for a fixed period of time and need renewal from time to time. We are required to renew such permits, licenses and approvals. Further, certain licenses and registrations obtained by our Company contain certain terms and conditions, which are required to be complied with. Any default by our Company in complying with the same, may result in interalia the cancellation of such licenses, consents, authorizations and/or registrations, which may adversely affect our operations. There can be no assurance that the relevant authorities will issue or renew any of such permits or approvals in time or at all. Failure to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business.

Further, we are also in process of availing approvals like PAN, GST, ESIC, PF and other statutory approvals in name of Aarvi Encon Limited pursuant to conversion of our Company into public limited. There can be no assurance that the relevant authorities will issue or renew any of such permits or approvals in time or at all. Failure to obtain the required permits or approvals in name of ‘Aarvi Encon

Limited' in time may result in the interruption of our operations and may have a material adverse effect on our business.

We have regular system of checking for any regulatory license being expiring & to apply for renewal within stipulated time. For further details, please refer to section titled "Government and Other Statutory Approvals" beginning on page 263 of this Prospectus.

19. Our Company's failure to maintain the quality standards of world-class engineering and manpower outsourcing services could adversely impact our business, results of operations and financial condition.

We cannot assure that our services will always be able to satisfy our clients/customer's quality standards. Any negative publicity regarding our Company, or services, including those arising from any deterioration in quality of our services from our clients, or any other unforeseen events could adversely affect our reputation and our operations any failure on our part to meet their expectation could adversely affect our business, result of operations and financial condition.

20. We face competition in our business from domestic and international competitors. Such competition would have an adverse impact on our business and financial performance.

The industry, in which we are operating, is competitive and our results of operations and financial condition are sensitive to, and may be materially adversely affected by, competitive pricing, skilled manpower and other factors. Competition may result in pricing pressures, reduced profit margins or lost market share or a failure to grow our market share, any of which could substantially harm our business and results of operations. There can be no assurance that we can effectively compete with our competitors in the future, and any such failure to compete effectively may have a material adverse effect on our business, financial condition and results of operations.

21. Loss of major clients or the deterioration of their financial condition or prospects could have a material adverse effect on our business.

While our strategy is intended to enable us to increase our revenues and earnings from our major corporate clients, the strategy also exposes us to increased risks arising from the possible loss of major client's accounts. In addition, some of our clients are in industries that have experienced adverse business and financial conditions during economic downturn. The deterioration of the financial condition or business prospects of these clients could reduce their need for temporary employment services, and result in a significant decrease in the revenues and earnings we derive from these clients. The bankruptcy of a major client could have a material adverse impact on our ability to recover monies from them & consequently to meet our working capital requirements.

22. There are outstanding litigation by/against our Company, our Promoters, our Directors and our Group Entities and any adverse outcome in any of these proceedings may adversely affect our profitability and reputation and may have an adverse effect on our results of operations and financial condition.

24. Certain agreements may be inadequately stamped or may not have been registered as a result of which our operations may be adversely affected.

Our lease agreements have not been stamped & registered. The effect of inadequate stamping is that the document is not admissible as evidence in legal proceedings and parties to that agreement may not be able to legally enforce the same, except after paying a penalty for inadequate stamping. Any potential dispute due to non-compliance of local laws relating to stamp duty and registration may adversely impact the operations of our Company.

25. Our indebtedness and the restrictive covenants imposed upon us in certain debt facilities could restrict our ability to conduct our business and grow our operations, which would adversely affect our financial condition and results of operations.

Any failure to comply with the financial or other covenants or obtain the consents necessary to take the actions may affect our business and operations. We employ security systems, including firewalls and password encryption, designed to minimize the risk of security breaches but there can be no assurance that these security measures will be successful. Breaches of our security measures could affect the security of information stored in and transmitted through these computer systems and network infrastructure. A failure in security measures could have a material adverse effect on our business and our future financial performance. Our business relies on information technology to operate on a daily basis. The

success of our businesses depends in part upon the ability to store, retrieve, process and manage substantial amounts of information. Any disruption in our information technology systems could render us unable to operate our business. This could adversely affect our business, reputation and revenues.

37. Loans availed by our Company have been secured on personal guarantees of our Promoters and Promoter Group members. Our business, financial condition, results of operations, cash flows and prospects may be adversely affected in case of invocation of any personal guarantees or collateral securities provided by our Promoters and Promoter Group members.

This control could delay, defer or prevent a change in control of the Company, impede a merger, consolidation, takeover or other business combination involving the Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of the Company even if it is in the Company's best interest. In addition, for so long as our Promoters and the members of our Promoter Group continue to exercise significant control over the Company they may influence the material policies of the Company in a manner that could conflict with the interests of our other shareholders. Our Promoters and the members of our Promoter Group may have interests that are adverse to the interests of our other shareholders and may take positions with which our other shareholders do not agree.

41. The Goods and Services Tax (GST) regimes enacted by the Government of India may have material impact on our operations.

The Government of India has enacted a comprehensive national Goods and Services Tax (GST) regime that will combine taxes and levies by the Central and State Governments into unified rate structure which has become effective from July 01, 2017. Any future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. Though the government is taking necessary steps to guide the impact of GST, We are unable to provide the impact of this tax regime on our operations.

II. Risk related to this Issue and our Equity Shares

42. Any future issue of Equity Shares may dilute your shareholding and sales of our Equity Shares by our Promoters or other major shareholders may adversely affect the trading price of the Equity Shares.

Any future equity issues by us, including in a primary offering, may lead to the dilution of investors' shareholdings in us. Any future equity issuances by us or sales of its Equity Shares by the Promoters may adversely affect the trading price of the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares.

The amount of our future dividend payments, if any, will depend upon our Company's future earnings, financial condition, cash flows, working capital requirements, capital expenditures, applicable Indian legal restrictions and other factors. There can be no assurance that our Company will be able to pay dividends.

B. EXTERNAL RISK FACTORS

44. Natural calamities and force majeure events may have an adverse impact on our business.

Natural disasters may cause significant interruption to our operations, and damage to the environment that could have a material adverse impact on us. The extent and severity of these natural disasters determines their impact on the Indian economy. Prolonged spells of deficient or abnormal rainfall and other natural

calamities could have an adverse impact on the Indian economy, which could adversely affect our business and results of operations.

45. *The Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Issue.*

The Issue Price of the Equity Shares will be determined by our Company in consultation with the LM and will be based on numerous factors. For further information, see the section titled “Basis for Issue Price” on page 96 of this Prospectus. The Issue Price may not be indicative of the market price for the Equity Shares after the Issue. The market price of the Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. There can be no assurances that applicants who are allotted Equity Shares through the Issue will be able to resell their Equity Shares at or above the Issue Price.

46. *You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.*

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months is not subject to capital gains tax in India if securities transaction tax (“STT”) is paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Any gain realized on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax. Any change in tax provisions may significantly impact your return on investments.

Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares. For further details, see the section titled “Statement of Tax Benefits” on page 99 of this Prospectus.

In Finance Bill 2017, section 10(38) was amended to provide that exemption under this section for income arising on transfer of equity share acquired on or after 1st day of October, 2004 shall be available only if the acquisition of share is chargeable to Securities Transactions Tax (STT) under Chapter VII of the Finance (No 2) Act, 2004. In case this provision becomes effective, sale shares acquired on or after 1st day of October, 2004 on which STT was not charged will attract tax under provisions of Long Term Capital Gains.

47. *We have not prepared, and currently do not intend to prepare, our financial statements in accordance with the International Financial Reporting Standards (“IFRS”). Our transition to IFRS reporting could have a material adverse effect on our reported results of operations or financial condition.*

Public companies in India, including us, may be required to prepare annual and interim financial statements under IFRS in accordance with the roadmap for convergence with IFRS announced by the Ministry of Corporate Affairs, Government of India through a press note dated January 22, 2010 (the “IFRS Convergence Note”). The Ministry of Corporate Affairs by a press release dated February 25, 2011 has notified that 35 Indian Accounting Standards are to be converged with IFRS. The date of implementation of such converged Indian accounting standards has not yet been determined. Our financial condition, results of operations, cash flows or changes in shareholders’ equity may appear materially different under IFRS than under Indian GAAP or our adoption of converged Indian Accounting Standards may adversely affect our reported results of operations or financial condition. This may have a material adverse effect on the amount of income recognized during that period and in the corresponding (restated) period in the comparative Fiscal/period.

48. *Political instability or changes in the Government could adversely affect economic conditions in India generally and our business in particular.*

Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Elimination or substantial change of policies or the introduction of policies that negatively affect the Company’s business could cause its results of operations to suffer. Any

significant change in India's economic policies could disrupt business and economic conditions in India generally and the Company's business in particular.

49. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

50. Economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

51. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the Mumbai terrorist attacks and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

52. Investors may be adversely affected due to retrospective tax law changes made by the GoI affecting us.

Certain recent changes to the Income Tax Act provide that income arising directly or indirectly through the sale of a capital asset of an offshore company, including shares, will be subject to tax in India, if such shares derive indirectly or directly their value substantially from assets located in India. The term "substantially" has not been defined under the Income Tax Act and therefore, the applicability and implications of these changes are largely unclear. Due to these recent changes, investors may be subject to Indian income taxes on the income arising directly or indirectly through the sale of the Equity Shares. In the past, there have been instances where changes in the Income Tax Act have been made retrospectively and to that extent, there cannot be an assurance that such retrospective changes will not happen again.

SECTION III- INTRODUCTION

SUMMARY OF OUR INDUSTRY

The information in this section includes extracts from publicly available information, data and statistics and has been derived from various government publications and other industry sources. Neither we nor any other person connected with this Issue have verified this information. The data may have been re-classified by us for the purposes of presentation. Industry sources and publications generally state that the information contained therein has been obtained from sources generally believed to be reliable, but their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured and, accordingly investment decisions should not be based on such information.

OVERVIEW OF INDIAN ECONOMY

India's diverse economy encompasses traditional village farming, modern agriculture, handicrafts, a wide range of modern industries, and a multitude of services. Slightly less than half of the work force is in agriculture, but services are the major source of economic growth, accounting for nearly two-thirds of India's output but employing less than one-third of its labour force. India has capitalized on its large educated English-speaking population to become a major exporter of information technology services, business outsourcing services, and software workers.

Thus, the country is attracting many global majors for strategic investments owing to the presence of vast range of industries, investment avenues and a supportive government. Huge population, mostly comprising the youth, is a strong driver for demand and an ample source of manpower.

With 1.33 billion people and the world's fourth-largest economy, India's recent growth and development has been one of the most significant achievements of our times. Over the six and half decades since independence, the country has brought about a landmark agricultural revolution that has transformed the nation from chronic dependence on grain imports into a global agricultural powerhouse that is now a net exporter of food. Life expectancy has more than doubled, literacy rates have quadrupled, health conditions have improved, and a sizeable middle class has emerged. India is now home to globally recognized companies in pharmaceuticals and steel and information and space technologies, and a growing voice on the international stage that is more in keeping with its enormous size and potential.

STAFFING INDUSTRY

Overview

The Indian staffing industry is set to grow up to 12 per cent in 2016 and up to 10 per cent in 2017, as per a report by Staffing Industry Analysts. The Indian staffing industry was estimated to be worth Rs 270 billion in 2015. The five largest staffing companies in India based on revenues in 2015 are TeamLease at Rs 19,869 million, Quess at Rs 19,594 million, Adecco at Rs 15,000 million, Randstad at Rs 13,485 million and Manpower Group at Rs 7,991 million. "Demonetization and implementation of GST in recent times shall definitely be a force multiplier to the growth of staffing in India."

According to a report from the Indian Staffing Federation, "Indian Flexi Staffing Industry Research 2016: Sectoral and State Analysis", India is expected to employ 2.9 million 'flexi staff' by 2018, becoming the third largest country to employ contract employees globally.

The report showed that in 2015, 15 sectors employed 1.81 million flexi staff. It stated that with a growth rate of 12.3% over 2015-18 for 11 states, flexi-staffing is becoming the job creation engine where over 9 million youth would be added to the organised workforce in the next 20 years. The highest growth is expected in Maharashtra, Karnataka, Uttar Pradesh, Tamil Nadu, Delhi, and Gujarat.

According to the report, with every 1% conversion of informal workers to flexi, 1.5 million gain access to social security. A legal framework to protect the interest of this growing fraternity and many more ready to be tapped is the need of the hour. "There should be national regulatory framework for flexi staffing in the country as it would address the concerns of trade unions whose utmost concern is fair wages for the workers," ISF president Rituparna Chakraborty said. "India is one of the very few countries which has the younger workforce with every month a million kids getting added to India's workforce and potentially to the world's workforce," Chakraborty said. Managing Director of International Confederation of Private Employment Agencies (Ciett) Denis Pennel also advocated for national regulatory framework for flexi staffing to encourage employment under this mode. The Staffing Industry includes companies which list employment vacancies, place applicants in employment, supply temporary workforce and all other employment related services. Market size of the Indian staffing industry was INR 26,650 crore in 2014 and is growing between 10-15% year on year. In 2016, the global staffing market generated USD 428 billion (EUR 386 billion) of revenue. Three markets (US, Japan, UK) made up a majority of global staffing revenue in 2016. We project global staffing revenue to grow 5% in 2018 on a constant currency basis.

The industry is broadly classified as:

Temporary/Flexi Staffing: Firms which retain workers and supply temporary workforce to other companies for specific assignments. This is the largest segment with a market size of INR 19,900 crores which is 75% of the market. This is primarily because of pass through salary costs included in the revenue of such firms.

Permanent recruitment: Sourcing, screening, and on-boarding of candidates from junior level to positions to CXO-level positions (CXO level hiring is called Search). The industry forms about 12% market with a size of INR 3,250 crores. It includes only the net fees from each successful referral/hire.

Other Employment Services: Market size of other employment services is at INR 3,500 crores which is 13% of the overall market. Other categories primarily include

- Payroll administration
- Recruitment process outsourcing
- HR management and consulting

- Employment training
- Online job portals

The turnover & profitability for the FY 2015-16 was low as compared to previous years because there was a glut in oil & gas sector. As a result, most of the projects were put on hold both in India and Gulf countries. Our Company had good margins from these projects. However, the trend has been reversed from FY 2016-17 and our Company was able to secure contracts at better pricing.

Also in the same year, the salary limit for EPF was increased from Rs. 8,500 to Rs. 15,000, entailing an extra outflow towards contractual payments without any recovery from clients.

SECTION IV – ABOUT THE COMPANY

OUR INDUSTRY

The information in this section includes extracts from publicly available information, data and statistics and has been derived from various government publications and other industry sources. Neither we nor any other person connected with this Issue have verified this information. The data may have been re-classified by us for the purposes of presentation. Industry sources and publications generally state that the information contained therein has been obtained from sources generally believed to be reliable, but their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured and, accordingly investment decisions should not be based on such information.

OVERVIEW OF INDIAN ECONOMY

India's diverse economy encompasses traditional village farming, modern agriculture, handicrafts, a wide range of modern industries, and a multitude of services. Slightly less than half of the work force is in agriculture, but services are the major source of economic growth, accounting for nearly two-thirds of India's output but employing less than one-third of its labor force. India has capitalized on its large educated English-speaking population to become a major exporter of information technology services, business outsourcing services, and software workers.

Thus, the country is attracting many global majors for strategic investments owing to the presence of vast range of industries, investment avenues and a supportive government. Huge population, mostly comprising the youth, is a strong driver for demand and an ample source of manpower.

With 1.33 billion people and the world's fourth-largest economy, India's recent growth and development has been one of the most significant achievements of our times. Over the six and half decades since independence, the country has brought about a landmark agricultural revolution that has transformed the nation from chronic dependence on grain imports into a global agricultural powerhouse that is now a net exporter of food. Life expectancy has more than doubled, literacy rates have quadrupled, health conditions have improved, and a sizeable middle class has emerged. India is now home to globally recognized companies in pharmaceuticals and steel and information and space technologies, and a growing voice on the international stage that is more in keeping with its enormous size and potential.

GDP AND OTHER INDICATORS

Demonetisation had negative impact on India's growth which slowed down to 7.1% in 2016-17, despite a very good showing by the agricultural sector. India also lost the tag of the fastest growing economy to China in the March quarter with a GDP growth of 6.1%. The GDP, as per the new series with base year of 2011-12, had expanded by 8% in 2015-16. It was 7.9% as based on the old series.

According to the data released by the Central Statistics Office (CSO), the Gross Value Added (GVA) slipped sharply to 6.6% in 2017 ended March 31, from 7.9% growth in 2015-16. Almost all sectors, with the exception of agriculture, showed deceleration in the aftermath of demonetisation. While the manufacturing sector output in the fourth quarter slowed to 5.3% versus 12.7% in the same period of last year, the construction sector slipped into the negative territory.

The Q1 2017-18 GDP slowed down to 5.7% as compared to 7.9% on YoY basis and against 6.1% on QoQ basis, showed the data released by the Central Statistics Office (CSO), Ministry of Statistics and Programme Implementation. The Q1 GDP has hit its 13-quarter low.

STAFFING INDUSTRY

Overview

The Indian staffing industry is set to grow up to 12 per cent in 2016 and up to 10 per cent in 2017, as per a report by Staffing Industry Analysts. The Indian staffing industry was estimated to be worth Rs 270 billion in 2015. The five largest staffing companies in India based on revenues in 2015 are TeamLease at Rs 19,869 million, Quesst at Rs 19,594 million, Adecco at Rs 15,000 million, Randstad at Rs 13,485 million and Manpower Group at Rs 7,991 million. "Demonetization and implementation of GST in recent times shall definitely be a force multiplier to the growth of staffing in India."

According to a report from the Indian Staffing Federation, "Indian Flexi Staffing Industry Research 2016: Sectoral and State Analysis", India is expected to employ 2.9 million 'flexi staff' by 2018, becoming the third largest country to employ contract employees globally.

The report showed that in 2015, 15 sectors employed 1.81 million flexi staff. It stated that with a growth rate of 12.3% over 2015-18 for 11 states, flexi-staffing is becoming the job creation engine where over 9 million youth would be added to the organised workforce in the next 20 years. The highest growth is expected in Maharashtra, Karnataka, Uttar Pradesh, Tamil Nadu, Delhi, and Gujarat.

According to the report, with every 1% conversion of informal workers to flexi, 1.5 million gain access to social security. A legal framework to protect the interest of this growing fraternity and many more ready to be tapped is the need of the hour. "There should be national regulatory framework for flexi staffing in the country as it would address the concerns of trade unions whose utmost concern is fair wages for the workers," ISF president Rituparna Chakraborty said. "India is one of the very few countries which has the younger workforce with every month a million kids getting added to India's workforce and potentially to the world's workforce," Chakraborty said. Managing Director of International Confederation of Private Employment Agencies (Ciett) Denis Pennel also advocated for national regulatory framework for flexi staffing to encourage employment under this mode. The Staffing Industry includes companies which list employment vacancies, place applicants in employment, supply temporary workforce and all other employment related services. Market size of the Indian staffing industry was INR 26,650 crore in 2014 and is growing between 10-15% year on year. In 2016, the global staffing market generated USD 428 billion (EUR 386 billion) of revenue. Three markets (US, Japan, UK) made up a majority of global staffing revenue in 2016. We project global staffing revenue to grow 5% in 2018 on a constant currency basis.

The industry is broadly classified as:

Temporary/Flexi Staffing: Firms which retain workers and supply temporary workforce to other companies for specific assignments. This is the largest segment with a market size of INR 19,900 crores which is 75% of the market. This is primarily because of pass through salary costs included in the revenue of such firms.

Permanent recruitment: Sourcing, screening, and on-boarding of candidates from junior level to positions to CXO-level positions (CXO level hiring is called Search). The industry forms about 12% market with a size of INR 3,250 crores. It includes only the net fees from each successful referral/hire.

Other Employment Services: Market size of other employment services is at INR 3,500 crores which is 13% of the overall market. Other categories primarily include

- Payroll administration
- Recruitment process outsourcing

- HR management and consulting
- Employment training
- Online job portals

Service Sector Overview

The services sector is not only the dominant sector in India's GDP, but has also attracted significant foreign investment flows, contributed significantly to exports as well as provided large-scale employment. The services

sector is the key driver of India's economic growth. The sector contributed around 66.1 per cent of its Gross Value Added growth in 2015-16, thereby becoming an important net foreign exchange earner and the most attractive sector for FDI (Foreign Direct Investment) inflows. As per the first advance estimates of the Central Statistics Office (CSO), the services sector is expected to grow at 8.8 per cent in 2016-17. Services sector growth is governed by both domestic and global factors. The Indian facilities management market is expected to grow at 17 per cent CAGR between 2015 and 2020 and surpass the \$19 billion mark supported by booming real estate, retail, and hospitality sectors. The Indian economy has witnessed steady growth over the last few years. The country's gross domestic product (GDP) grew at 6.9% in fiscal 2014, up from 5.1% in fiscal 2013.

According to the World Bank India Development Update 2015, the Indian economy grew by 7.3% in fiscal 2015. Services are the largest contributor to India's GDP growth. The service sector grew at an average of 9% during 2005 -2015, higher than the average industry growth of 7.2% and the average agriculture growth of 3.6% during the same period. Indian services sector GDP grew at a CAGR of 8.7% from the year 2001 to 2013, as compared to the world average of 2.5% over the same period. Further, an easing of various policy and legislative restrictions will drive growth in services in the future. The raising of foreign investment cap in multi-brand retail and insurance is one example. Notably, the growth of the Indian service sector was driven by exports. While the service sector grew at a CAGR of 8.7% during 2001 to 2013, Indian service sector exports grew at a CAGR of 20.1% during the same period indicating the rising demand for Indian services across the world. India is emerging as the services hub of the world with the world's 11th largest services sector in 2013. The services sector has been the largest creator of employment opportunities, after agriculture in the Indian economy. One of the key sectors that have been driving the growth of the service sector in the Indian economy is IT and ITeS, which was also the largest contributor to the service sector growth in India.

GVA – Gross value added

(Source : CSO)

The upward revision of the 2015-16 data was mostly due to a significant increase in growth estimates for the industrial and services sectors. While the industrial sector is now estimated to have grown at 8.2% against the earlier estimation of 7.4%, the services sector is estimated to have grown at 9.9% against 8.9% earlier. The farm sector growth rate was, however, cut to 0.76% from 1.2% estimated earlier.

Gross fixed capital formation, the proxy for investment demand in the economy, was also underestimated earlier. It is now revised to 6.1% from the earlier estimate of 3.9% for 2015-16. Private consumption demand, however, has been marginally revised downward, from 7.4% to 7.3% for 2015-16.

Oil and Gas Sector Overview

The oil and gas sector is among the six core industries in India and plays a major role in influencing decision making for all the other important sections of the economy. India is expected to be one of the largest contributors to non-OECD petroleum consumption growth globally. Total oil imports rose 4.24 per cent year-on-year to US\$ 86.45 billion in April-March 2016-17. India's oil consumption grew 8.3 per cent year-on-year to 212.7 million tonnes in 2016, as against the global growth of 1.5 per cent, thereby making it the third-largest oil consuming nation in the world. India is the fourth-largest Liquefied Natural Gas (LNG) importer after Japan, South Korea and China, and accounts for 5.8 per cent of the total global trade.³ Domestic LNG demand is expected to grow at a CAGR of 16.89 per cent to 306.54 MMSCMD by 2021 from 64 MMSCMD in 2015. The demand of Petroleum Oil and Lubricants grew at a Compound Annual Growth Rate (CAGR) of 5.6 per cent under the 12th Five Year Plan (2012-17)

The country's gas production is expected to touch 90 Billion Cubic Metres (BCM) in 2040 from 23.09 BCM in FY2016-17 (till December 2016). Gas pipeline infrastructure in the country stood at 16,240.4 km in November 2016.

State-owned Oil and Natural Gas Corporation (ONGC) dominates the upstream segment (exploration and production), and produced around 1,847 thousand metric tonnes (TMT) of crude oil, as against the country's 2,939 MT oil output in April 2017. The company also accounted for 57 percent of the country's domestic crude oil production in 2016-17.

Oil consumption is estimated to expand at a CAGR of 3.3 per cent during FY2008–16E to reach 4.0 mbpd by 2016. Due to the expected strong growth in demand, India's dependency on oil imports is likely to increase further. Rapid economic growth is leading to greater outputs, which in turn is increasing the demand of oil for production and transportation. With rising income levels, demand for automobile is estimated to increase

Engineering Sector Overview

The Indian Engineering sector has witnessed a remarkable growth over the last few years driven by increased investments in infrastructure and industrial production. The engineering sector, being closely associated with the manufacturing and infrastructure sectors, is of strategic importance to India's economy. India on its quest to become a global superpower has made significant strides towards the development of its engineering sector. The Government of India has appointed the Engineering Export Promotion Council (EEPC) as the apex body in charge of promotion of engineering goods, products and services from India

The capital goods & engineering turnover in India is expected to reach US\$ 125.4 billion by FY17. India exports its engineering goods mostly to the US and Europe, which accounts for over 60 per cent of the total exports. Recently, India's engineering exports to Japan and South Korea have also increased with shipments to these two countries rising by 16 and 60 per cent respectively. Sri Lanka, Nepal and Bangladesh have also emerged as the major destinations for India's engineering exports. According to data from the Engineering Export Promotion Council of India, engineering exports from India grew 11.33 per cent year-on-year to reach US\$ 65.23 billion in FY 2016-17. The engineering sector in India attracts immense interest from foreign players as it enjoys a comparative advantage in terms of manufacturing costs, technology and innovation. The above, coupled with favourable regulatory policies and growth in the manufacturing sector has enabled several foreign players to invest in India. The foreign direct investment (FDI) inflows into India's miscellaneous mechanical and engineering industries during April 2000 to March 2017 stood at around US\$ 3.31 billion, as per data released by the Department of Industries Policy and Promotion (DIPP).

Cumulative FDI inflows increased to US\$ 28.22 billion in FY16 from US\$ 8.9 billion in FY10. The government's increasing focus on attracting foreign investors in manufacturing and infrastructure is likely to boost FDI in the sector.
