There can be no assurance that these litigations will be decided in favour of our Promoter and Director and consequently it may divert the attention of our management and Promoter and waste our corporate resources and our Director and Promoter may incur significant expenses in such proceedings. If such claims are determined against our Director and Promoter, there could be a material adverse effect on our reputation, business, financial condition and results of operations, which could adversely affect the trading price of our Equity Shares. For the details of the cases filed by and against our Company, Group Companies, our Subsidiary, our Promoters and Directors, please refer to the chapter titled “*Outstanding Litigations and Material Developments*” on page no. 187 of this Prospectus.

2. *Our Company and our Subsidiary require certain approvals and licenses in the ordinary course of business and are required to comply with certain rules and regulations to operate our business, and the failure to obtain, retain and renew such approvals and licences or comply with such rules and regulations, and the failure to obtain or retain them in a timely manner or at all may adversely affect our business operations.*

Our Company and our Subsidiary require certain statutory and regulatory permits, licenses and approvals to operate our business, some of which our Company has either received, applied for or is in the process of application. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Non-renewal of the said permits and licenses would adversely affect our Company’s and our Subsidiary’s operations, thereby having a material adverse effect on our business, results of operations and financial condition.

Further, there can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Our Company and our Subsidiary requires the following statutory and regulatory registrations, licenses, permits and approvals for our business but the same have not been obtained/not renewed by us, as on date of this Prospectus such as Shops and Establishment Registration Certificate for our Registered Office and factory license and Shops and Establishment Registration Certificate with respect to our Wholly Owned Subsidiary.

Further, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of the relevant permits, licenses or approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on our business. If we fail to comply with all the regulations applicable to us or if the regulations governing our business or their manner of implementation change, we may incur increased costs, or be subject to penalties or may suffer a disruption in our business activities, any of which, could adversely affect our business or results of operations. For further details, please see “*Key Industry Regulations and Policies*” and “*Government and Other Statutory Approvals*” beginning on page nos. 94 and 201 respectively of this Prospectus.

3. *Trading of Shares in some of our Group Companies was suspended for a brief period of time due to procedural/penal reasons.*

Following table summarizes the past instances of suspension in trading of shares of our group companies:

Name of the Company	Listed on	Reason for suspension	Suspended from	Date of revocation	Commencement of trading
Lesha Industries Limited	BSE Limited	Procedural reasons pertaining to the on-going scheme of arrangement.	August 16, 2017	December 12, 2017	December 14, 2017
Gujarat Natural Resources Limited	BSE Limited	Penal reason for Non compliances with certain clauses of the Listing Agreement and non-payment of Listing fees.	September 10, 2001	February 13, 2007	February 13, 2007

Though the suspension of equity shares of the above mentioned Group Companies has been revoked by the Stock Exchange as on the date of this Prospectus, there is no assurance that the instances like this would not happen again in future with our other listed Group Companies and that if the same happens it could affect our brand value. For further details please see “*Our Group Companies*” beginning on page 120 of this Prospectus.

4. *There has recently been a change in main objects of our Company and we have lack of material business track record.*

Our Company was incorporated as “*Tanya Estates Pvt. Ltd.*” on July 29, 2009 under the Companies Act, 1956 with the Registrar of Companies, Gujarat at Dadra and Nagar Haveli. Our Company had in its earlier years began to develop real estate and land plotting vertical; however; due to unforeseen circumstances and changes in market dynamics the real estate business division faced delays in execution of its plans and eventually could not complete the proposed acquisitions and related plans. Hence, our Company was thereafter non-operative (from an operating income point of view) since incorporation and has been over time looking to re-align its business model and financial allocations. Vide resolution dated July 20, 2017, our Company has changed its main objects and subsequently the name of our Company was changed to “*Ashoka Metcast Pvt. Ltd.*” vide resolution dated September 02, 2017 and our Company received its fresh certificate of incorporation from ROC, Gujarat dated September 13, 2017. Thereafter our Company vide resolution dated October 23, 2017 converted from a private limited company to a public limited company and we received our fresh certificate of incorporation dated November 09, 2017 from RoC, Gujarat at Ahmedabad.

Our Company is currently engaged in trading and manufacturing of structural steel products. The trading activities have been commenced in September, 2017 itself and the manufacturing activities are not operative currently. We propose to infuse funds raised through the issue in our Wholly Owned Subsidiary (wherein we own a steel manufacturing plant). Hence, our business activities for which we are raising funds do not have any material track record. Our inability to identify key opportunities or risks in the business or be able to execute our plans will materially adversely affect our results of operations and financial conditions.

5. *Our manufacturing unit (owned through our wholly owned Subsidiary) which is proposed to be revamped and made operational from the net proceeds of the issue may face various other challenges apart from financing and hence the process of making it fully operational may get delayed or run into cost overrun issues.*

We have recently acquired 100% stake in Shree Ghantakarna Rolling Mills Pvt. Ltd. (making it our wholly owned Subsidiary). Our Subsidiary owns a rolling mill having aggregate installed capacity of 12,000 tons; however the same has been non-operational for the past 16 years due to internal financial constraints as well as market conditions. Post acquisition we have begun the process of revamping as well as expanding its production facilities and we intend to begin production in April, 2018 with an aggregate installed capacity of 18,000 tons per annum.

The amount of funds required to make this unit operational has been estimated by our management based on quotations and internal estimates and part of these funds are expected to be raised from this IPO. For details of the fund requirements for this particular initiative please see “*Objects of the Issue*” beginning on page 59 of this Prospectus. However, apart from fund requirements the process of making this unit fully operational may be affected by various external factors including but not limited to:

- Our inability to acquire and install relevant machinery and equipments
- Our inability to pay the necessary dues to key infrastructure providers such as power, water etc. on time in order and complete the necessary formalities or requirements to ensure that these facilities are set up for use. (For details please see “*Our Business*” on page 85 of this Prospectus).
- Our inability to re-ignite the local labour or develop new labour relations or hiring.
- Our inability to obtain key government approvals on time or at all.
- Our inability to procure raw materials for manufacturing of our key business products.

Our inability to execute the revamp / modernisation project and complete the process of making this plant operational on time could materially adversely affect our results of operations and financial conditions.

6. Our historical financial statements would not be able to reflect our current and future business prospects and the same could affect our ability to raise funds in form of equity or debt.

Our Company was incorporated as “Tanya Estates Pvt. Ltd.” on July 29, 2009 under the Companies Act, 1956 with the Registrar of Companies, Gujarat at Dadra and Nagar Haveli. Our Company had in its earlier years began to develop real estate and land plotting vertical; however; due to unforeseen circumstances and changes in market dynamics the real estate business division faced delays in execution of its plans and eventually could not complete the proposed acquisitions and related plans. Hence, our Company has recently begun its steel trading activities in September, 2017. Hence, our past financial statements do not reflect our current or proposed business and prospects. Further the Company has over the last few years tried to scale back the real estate related outstanding transactions in its books and hence some of our earlier year figures may not be comparable with our future balance sheet situation. This we believe could hinder our fund raising plans for both equity as well as debt and hence the same could materially adversely affect our results of operations and financial conditions.

7. Our Promoters/ Promoter Group have in the past faced action from SEBI. This track record could materially adversely affect our future business and goodwill.

Following table summarises the past actions taken or violations of securities laws by our Promoters/Promoters Group:

Sr. No.	Date of Action / Event	Particulars of the action / event	Current Status
1	SEBI Order dated October 10, 2003	GNRL and its directors Mr. Shalin A. Shah, Ms. Shivani A. Shah, Mr. Ashok C. Shah, Mr. Jaswant Ray Shah, Mr. Ramesh K. Gupta, Mr. J. S. Varshnay and Mr. Mahesh Parikh were directed to dissociate from the securities market for a period of 5 years for pending Investor grievances.	The SEBI has dropped the instant proceedings against Mr. Mahesh Parikh, Mr. Shalin A. Shah, Ms. Shivani A. Shah, Mr. Ashok C. Shah vide its order dated May 15, 2007.

We believe that the group has taken adequate measures to ensure such events or actions do not occur again however if in the future such actions are taken or even the historical track record of such actions could materially adversely affect our future business and goodwill.

8. The interests of our Promoter or certain directors may conflict with our interests or with the best interests of our other shareholders. Any inappropriate resolution of such conflicts may adversely affect our business, results of operations and/ or the interests of our other shareholders.

We are heavily dependent on our Promoter and Executive Director for his expertise for our strategic as well as day to day operations. The Managing Director of our Company, Mr. Shalin Shah is involved in the management of our Group Companies and he is also a common director between our Company and our Group companies viz: Ashnisha Industries Limited, Gujarat Natural Resources Limited, Lesha Agro Foods Private Limited and Lesha Industries Limited. Further one of our Group Company – Lesha Industries Limited is involved in a similar line of business. The Promoter has explained to us that over time they propose to ensure there are no conflicts of interest within these companies however there is no legal “non-compete” agreement or such methodology executed as on date and hence we may face these conflict of interest.

In case of a conflict between us and or any other entity in which our Directors or our Promoter Group members are interested, our Promoter/Directors may favor such other companies over us. Further, there may be situations in which they are unable to allocate sufficient time to our Company or effectively participate in the management of our Company, which could have a material adverse effect on our business. If any such actual or perceived conflicts of interests are not resolved suitably, our business, results of operations and/or the interest of our other shareholders may be adversely affected. For further details, please see “Our Management” and “Our Promoters and Promoter Group” and “Annexure XXII-Related Party Transactions” under the chapter titled “Financial Statements” beginning on page nos. 105 116 and 139, respectively of this Prospectus.

9. *Our wholly owned Subsidiary (which has been recently acquired by us) has in the past defaulted on financial liabilities and electricity related dues to UGVCL. This track record could materially adversely affect the Subsidiary and its business operations in the future.*

Our Subsidiary which has been recently acquired by us, has in the past defaulted on payment of electricity dues incurred by it at its factory premises. Our Subsidiary Company was under dispute with Uttar Gujrat Vij Company Ltd with regard to the same. The details of which is mentioned below:-

Sr. No.	Date of Action / Event	Particulars of the action / event	Current Status
1.	1992	Uttar Gujrat Vij Company Limited filed special civil suit No. 49 of 1992 for recovery of electricity charges incurred at the factory site.	As on the date of this Prospectus SGRMPL has availed low-tension (LT) load of 13.33 KVA for carrying out modernization and overhauling of existing Plant and Machinery and for installation of new machinery at the factory site. Further, our Company made the stipulated payment as required under the Scheme and eventually electricity connection shall be granted with a High tension (HT) load at the factory premises.
2.	2002	Electricity connection was discontinued at the factory site.	
3.	2012	State of Gujarat <i>vide</i> notification dated March 29, 2012 had declared Amnesty Scheme for settlement of outstanding claims of consumers. At that time SGRMPL had applied for the Amnesty Scheme which was rejected by the UGVCL/Industries' Commissioner stating that the SGRMPL does not come under the said Scheme.	
4.	2017	SGRMPL again applied to the UGVCL/ Industries' Commissioner to re-consider it for eligibility under the Scheme.	

Our Subsidiary has in the past defaulted on financial liabilities. The details of which is mentioned below:-

Sr. No.	Date of Action / Event	Particulars of the action / event	Current Status
1	1998-2001	SGRMPL had availed loan in different tranches from Charotar Nagrik Sahakari Bank Limited against rolling mill factory situated at Kadi.	As on date of this Prospectus the outstanding loan availed from Charotar Nagrik Sahakari Bank Limited stands repaid in full along with interest.
2	2001	Charotar Nagrik Sahakari Bank Limited went into liquidation in the year 2001. The operations of the subsidiary were shut down due to market conditions and also due internal financial constraints and could not repay the loan of Charotar Sahakari Bank Limited at the time of liquidation of the Bank.	
3	2012	As per the Government's one time settlement (OTS) scheme, the outstanding loan of Charotar Nagrik Sahakari Bank Limited was repaid along with interest. No dues certificate of the bank was obtained in this reference.	

There is no assurance that this track record would materially adversely affect its business operations in the future. For details, please see "Outstanding Litigations and Material Developments" beginning on page 187 of this Prospectus.

10. *Our Company is yet to place orders for plant & machinery which is proposed to be acquired from the net proceeds of the issue through our wholly owned subsidiary. Any delay in placing orders, procurement of plant & machinery may delay our implementation schedule and may also lead to increase in price of these plant & machinery, further affecting in revenue of our WOS and our consolidated profitability.*

Although we have identified the type of plant and machinery required to be bought for revamping and modernization of our production facility in the wholly owned subsidiary company, we are yet to place the orders for the plant & machinery worth ₹ 450 lakhs as detailed in the “*Objects of the Issue*” beginning on page 59 of this Prospectus. These are based on our estimates and on third-party quotations, which are subject to a number of variables, including possible cost overruns, changes in management’s view of desirability of current plans, change in supplier of equipments, among others, which may have an adverse effect on business and operations of our WOS. Further, we cannot assure that we would be able to procure these plant & machinery, or procure the same within budgeted costs and timelines. Delays in acquisition of the same could result in cost and time overrun in the implementation of the project, which would have a material adverse effect on business of our WOS and our consolidated financial condition. For further details please refer to the chapter titled the “*Objects of the Issue*” beginning on page 59 of this Prospectus.

11. *Certain Portion of IPO Proceeds will be used to repay a loan from one of our Promoter Mr. Shalin Shah.*

We intend to use certain portion of the proceeds from the Issue to repay a loan from one of our Promoters, Mr. Shalin Shah our Promoter. As of November 15, 2017, we have availed Rs. 504.60 of unsecured loans from Mr. Shalin Shah. The purposes of the loan were to fund working capital expenditures and for general business purpose. For details, see - Objects of the Issue on page 59 of this Prospectus

12. *Trade receivables form a substantial part of our current assets and net worth. Failure to manage our trade receivables could have an adverse effect on our net sales, profitability, cash flow and liquidity.*

We are in the business of trading of structural steel products and also proposed manufacturing of structural steel products (through our Subsidiary). Our Company’s business is working capital intensive and hence trade receivables would form a major part of our current assets and net worth. The results of operations of our business are and will be dependent on our ability to effectively manage our trade receivables.

To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and dealers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. However, if our management fails to accurately evaluate the credit worthiness of our customers, it may lead to bad debts, delays in recoveries and / or write-offs which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. A liquidity crunch may also result in increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability.

13. *We depend on a limited number of customers for a significant portion of our revenues. The loss of a major customer or significant reduction in production and sales of, or demand for our products from, our major customers may adversely affect our business, financial condition, results of operations and prospects.*

We have begun our trading vertical in September, 2017 itself and hence we have not yet developed a strong client base. In fact so far we have basically dealt with low liquidity players who are dealing with us due to availability of liquidity and credit. Hence, our top five customers form 100% of our sale for the period ended November 15, 2017, as restated. We will look to overtime develop our product portfolio and supply capabilities to attract better customers and suppliers as well as diversify our customer base.

Demand for our traded products is related to various factors such as easy availability of finance, demand of specific structural steel products and the quality of same supplied by us. Further, with the increase in the size of the construction industry, various new manufacturers and traders are providing other variants of steel products and we always run the risk of trading steel products that are no longer required in common steel industry. This may result in our customers opting for other steel suppliers. Any loss of client base, out of our existing clients, will impact our overall sales, resulting in a sharp decline in our revenues. Further, we face immense competition from other structural steel products suppliers and manufacturers, organised as well as unorganised, which may result in some of our customers reducing their orders to us. Any reduction in orders from our existing clients may result in a decline in our revenues.

While we are constantly striving to increase our customer base and reduce dependence on any particular customer, there is no assurance that we will be able to broaden our customer base in any future periods or that our business or

results of operations will not be adversely affected by a reduction in demand or cessation of our relationship with any of our major customers.

- 14. *We operate B2B model trading business verticals which is dependent on third party transportation providers for the delivery of our traded good and also for raw materials and other products at our subsidiary's proposed manufacturing plant. Accordingly, continuing increases in transportation costs or unavailability of transportation services for our products, as well the extent and reliability of Indian infrastructure might have an adverse effect on our business, financial condition, results of operations and prospects.***

We trade in structural steel products like TMT Bars, Round Bars, Flat bars manufactured by various companies and most of the goods are delivered to our customers by third party transportation providers. The trading business vertical of the company is a B2B model and operates primarily on an agency basis wherein the goods are procured from suppliers and supplied to customers. The procurement of goods is carried out on an "order" basis so that there is not much gap between procurement and sales delivery thereby reducing our inventory holding times. Hence, the supply chain of goods in most cases is directly routed to our customer from the suppliers' locations as per our instructions. Also, most of our raw material and our finished products are transported to and from our subsidiary's proposed manufacturing unit in Kadi by third party transportation providers. Transportation strikes would have an adverse effect on our receipt of goods, raw materials and our ability to deliver our products to our customers. Non-availability of trucks could also adversely affect our receipt of goods, raw materials and the delivery of our products.

In addition, transportation costs in India have been steadily increasing over the past several years. While usually our supplier arranges direct transportation of the goods to our customer's facility / godown, any increase in transportation costs may affect our future orders, our pricing model and the ability of our suppliers to offer the transportation at affordable rate or at all. Also, we might not always be able to pass on these costs to our customers. Continuing increases in transportation costs or unavailability of transportation services for our products might have an adverse effect on our business, financial condition, results of operations and prospects.

Further, India's physical infrastructure is less developed than that of many developed nations, and problems with its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our normal business activity, including our supply of goods, raw materials and the delivery of our products to customers by third-party transportation providers. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our business operations, which could have a material adverse effect on our results of operations and financial condition.

- 15. *The old plant and machinery of our recently acquired subsidiary company – SGRMPL may have to be impaired in the future and the same could affect our consolidated results of operations.***

Our recently acquired subsidiary company – SGRMPL owns a existing manufacturing unit with land, shed, factory building and machineries. However this plant has not been operational for over 16 years. After being acquired by our company we have begun the process of revamping this plant wherein we plan to use the old machinery and modernise the same along with augmenting additional new machines thereby having an estimated annual installed capacity of 18,000 tons p.a. The management of the company has done the necessary technical checks and believe that the old machinery is usable and hence would be able to put to use post the modernisation and revamp process. The plant and machinery being non-operational, the statutory auditors of SGRMPL have opined in their audit reports of previous years that no depreciation is needed to be charged to such machinery until it is put to use.

We believe that these old machineries would be able to put to productive use after the revamp and modernisation process is complete however if in the future we face operational issues which such machineries there is a possibility that SGRMPL management may decide to scrap certain portion of this and hence there may be a large impairment on its books which in turn would affect the consolidated results of our company as well.

- 16. *Our Company has in the past experienced negative cash flows.***

Our Company has in the past experienced negative cash flows as summarised below:

Particulars	As at November 15, 2017	For the year ended March 31,	
		2017	2016
Cash flow from Operating Activities	(1617.29)	(769.22)	1817.56
Cash flow from Investing Activities	(400.00)	(96.34)	(250.00)
Cash flow from Financing Activities	2,022.19	865.63	(1567.87)

Our inability to ensure that we generate adequate cash flows for our business operations could materially adversely affect our results of operations and financial conditions.

17. Our funding requirements and deployment of the issue proceeds are based on management estimates and have not been independently appraised by any bank or financial institution.

The fund requirements, the deployment of funds and the intended use of the Net Proceeds as described herein are based on our current business plan, management estimates and have not been appraised by any bank, financial institution or any other external agency. Given the dynamic nature of our business, we may have to revise our business plan from time to time and consequently our funding requirements and deployment on account of variety of factors such as our financial condition, business and strategy, including external factors such as market conditions, competitive environment, costs of commodities and interest/ exchange rate fluctuations which may not be within the control of our management. The deployment of the funds towards the objects of the Issue is entirely at the discretion of the Board and our Board will monitor the utilisation of Net Proceeds through its Audit Committee. Our Company will disclose the utilisation of the Net Proceeds under a separate head along with details in its balance sheet until the Net Proceeds remain unutilised, clearly specifying the purpose for which the Net Proceeds have been utilised. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our operational and financial performance.

18. Our Company has not made any provision for the decline in value of its investments.

Our Company has made investment in equity shares of quoted and unquoted securities aggregating to ₹ 461.00 Lakhs and ₹ 400 Lakhs respectively as on November 15, 2017 standalone restated financial statements. Further, we have investment in equity shares of quoted securities aggregating to ₹ 557.45 Lakhs as on November 15, 2017 consolidated restated financial statements. The market value of our quoted investments on a standalone and consolidated basis are ₹ 1066.93 lakhs and ₹ 1256.87 lakhs respectively as compared to its book value of ₹ 557.45 lakhs and ₹ 461 lakhs respectively as on November 15, 2017.

Further, we are not able to correctly access the value of our unquoted investments as there is no traded market for such shares.

We have not made any provision for the decline in value of our investments as we intend to hold such investments for long tenure and we believe we would be able to monetise such investments at above our book values in the future.

Any reduction in value or our inability to monetise such investments on the future could materially adversely affect our results of operations and financial conditions.

19. We are involved in high volume-low margin business. Any disruption in our turnover or failure to regularly grow the same may have a material adverse effect on our business, results of operations and financial condition.

Our inability to regularly grow our turnover and effectively execute our key business processes could lead to lower profitability and hence adversely affect our operating results, debt service capabilities and financial conditions. Due to the nature of the products we sell, we may not be able to charge higher margins on our products. Hence, our business model would be heavily reliant on our ability to effectively grow our turnover and manage our key processes including but not limited to raw material procurement, timely sales / order execution and continuous cost control of non-core activities.

Our growth strategy would be subject to and involves risks and difficulties, many of which are beyond our control and, accordingly, there can be no assurance that we will be able to implement our strategy or growth plans, or complete them within the timelines. Further, we operate in a dynamic industry, and on account of changes in market conditions,

industry dynamics, technological improvements or changes and any other relevant factors, our growth strategy and plans may undergo changes or modifications, and such changes or modifications may be substantial, and may even include limiting or foregoing growth opportunities if the situation so demands. For further details regarding the discussions and explanations for our past results, please see “*Management’s Discussions and Analysis of Financial Condition and Results of Operations*” beginning on page no. 178 of this Prospectus.

- 20. Our Company is substantially reliant on our Promoter and Promoter Group for funding needs and mentoring. Our inability to continue to receive such support from our Promoter Group could materially affect our company’s operations.**

Our Company is substantially reliant on our Promoter and Promoter Group for funding needs and mentoring. Mr. Shalin Shah, our Promoter Director is involved in the day to day operations of our Company. His vision and guidance including funding and networking capabilities are relied on by our Company. Our inability to continue to receive such support from our Promoter Group would materially affect our Company’s operations.

- 21. Our Company has availed unsecured loan from our Promoter which is repayable on demand. Any demand from the lender for repayment of such unsecured loan may affect our cash flow and financial condition.**

Our Company, as per the restated audited financial statement as on November 15, 2017 has availed total sum of 504.6 lakhs as unsecured loan which may be recalled at any time. Sudden recall may disrupt our operations and also may force us to opt for funding at higher interest rates, resulting in higher financial burden. Further, we will not be able to raise funds at short notice and thus result in shortage of working capital fund. For further details, please refer to the section “*Unsecured Loans*” under “*Financial Statements*” beginning on page no. 139 of this Prospectus. Any demand for the repayment of such unsecured loan, may adversely affect our cash flow and financial condition.

- 22. We have not operated the manufacturing plant (owned through our WOS) and hence under-utilization of our capacities could affect our ability to fully absorb fixed costs and thus may adversely impact our financial performance.**

We have recently acquired 100% stake in Shree Ghantakarna Rolling Mills Private Limited (making it our wholly owned Subsidiary). Our Subsidiary owns a rolling mill having aggregate installed capacity of 12,000 tons; however the same has been non-operational for the past 16 years due to internal financial constraints as well as market conditions. Post acquisition we have begun the process of revamping as well as expanding its production facilities and we intend to begin its production in April, 2018 with an aggregate installed capacity of 18,000 tons per annum.

The proposed capacity utilisation of this plant is as explained below:

For The Financial Year	Particulars	Re-Rolled Products
2017-18	Installed Capacity	12000
	Utilized Capacity	N.A. ⁽¹⁾
	Utilized Capacity (%)	N.A.
2018-19	Installed Capacity	18000
	Utilized Capacity	14400
	Utilized Capacity (%)	80%
2019-20	Installed Capacity	18000
	Utilized Capacity	16200
	Utilized Capacity (%)	90%

⁽¹⁾ Since the plant has not been operational since few years and the process of getting it fully operationalised is scheduled to complete in April, 2018 the proposed capacity utilisation for FY 2017-18 is NIL.

Further, while the process of modernisation and revamping of this facility is being undertaken; we also propose to expand these production capacities based on our estimates of market demand and profitability. In the event of non-materialization of our estimates and expected order flow for our products and/or failure of optimum utilization of our capacities, due to factors including adverse economic scenario, change in demand or for any other reason, our

capacities may not be fully utilized thereby impairing our ability to fully absorb our fixed cost and may adversely impact our consolidated financial performance.

23. *We do not own our Registered Office which is being used by us currently.*

Our Registered Office premise which is situated at 7th Floor, Ashoka Chambers, Opp. HCG Hospital, Mithakhali Six Roads, Mithakhali, Ahmedabad, Gujarat - 380006, is taken on leasehold basis from one of our Group Company, Lesha Industries Limited. Upon the termination of the lease agreement, we are required to return the said premise to the lessor.

Further, the term of the lease agreement may or may not be renewed. In the event the lessor terminate or does not renew the lease on commercially acceptable terms, or at all, we shall be required to vacate the premises. We may be required to identify alternate premises and enter into fresh lease agreement. Such a situation could result in loss of business and may adversely affect our operations and profitability. For further details, please see paragraph titled “*Properties*” under the chapter titled “*Our Business*” beginning on page no. 85 of this Prospectus

24. *We share our registered office with other Group Companies.*

We operate from our Registered Office situated at 7th Floor, Ashoka Chambers, Opp. HCG Hospital, Mithakhali Six Roads, Mithakhali, Ahmedabad, Gujarat - 380006 which is owned by our Group Company Lesha Industries Limited. However, this office premise is also being shared by our other Group Companies viz: Lesha Industries Limited, Lesha Agro Foods Private Limited and Ashnisha Industries Limited and our Subsidiary. Any dispute with our Group Companies with regard to the Registered Office would materially affect our business operations.

25. *We do not have any long-term agreement or contract for the supply of our traded goods and raw materials and we are exposed to price and supply fluctuations.*

We would be having well established relations with our suppliers for procuring the traded goods from various companies for different types of steel products. However, these relationships are on an oral basis and no specific agreement / MoU have been entered into between our Company and our suppliers and we typically transact on an invoice basis for each order. These suppliers have accord us with ready supplies based on trust, service and the ready finance provided by us. In the absence of written agreements, our suppliers can withdraw their oral commitments from us at any time. There can be no assurance that there will not be a significant disruption in the supply of these traded goods from current sources, including our agencies, or, in the event of a disruption, that we would be able to locate alternative suppliers of the goods of comparable quality on terms acceptable to us, or at all. Identifying a suitable supplier involves a process that requires us to become satisfied with their quality control, consistency, responsiveness and service, financial stability and other ethical practices.

Further, our Subsidiary also does not have any long term contracts for the raw materials required for manufacture of structural steel products like TMT bars, angles, channels, MS Bars etc. etc. and thus cannot assure that our raw material supply will not face disruption leading to either disruption in our Subsidiary’s proposed manufacturing activity or a complete stopping of the same. If we are unable to maintain our relationship with our current raw material suppliers it may prove difficult to obtain the same from other players.

Any delay, interruption or increased cost in the supply of our traded goods or raw materials pertaining to our products arising from a lack of long-term contracts could have an adverse effect on our ability to meet customer demand for our products and result in lower revenue from operations both in the short and long term.

26. *Our Company has not entered into any long-term contracts with any of its customers and we typically operate on the basis of orders. Inability to maintain regular order flow would adversely impact our revenues and profitability.*

Our Promoter has had long standing business relationships with certain customers and has been supplying products to such customers, for several years. However, we have not entered into any specific contracts with these customers and we cater to them on an order-by-order basis. As a result, our customers might terminate their relationships with us without any notice and, without consequence, which would materially and adversely impact our business.

Consequently, our revenue might be subject to variability because of fluctuations in demand for our products. Our Company's customers have no obligation to place order with us and may either cancel, reduce or delay orders.

27. *Our inability to manage growth could disrupt our business and reduce profitability.*

A principal component of our strategy is to continuously grow by expanding the size and geographical scope of our businesses. This growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial and internal controls. Continuous expansion increases the challenges involved in financial management, recruitment, training and retaining high quality human resources, preserving our culture, values and entrepreneurial environment, and developing and improving our internal administrative infrastructure. Any inability on our part to manage such growth could disrupt our business prospects, impact our financial condition and adversely affect our results of operations.

28. *Our Company has not taken any insurance coverage to adequately protect us against certain operating risks and this may have an adverse effect on the results of our business.*

We do not have any insurance policies. Once our manufacturing plant modernization and revamping process is complete we shall be obtaining adequate insurance at that stage. Our insurance policies, however, may not provide adequate coverage in certain circumstances. There can however be no assurance that the terms of our insurance policies will be adequate to cover any damage or loss suffered by us or that such coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. A successful assertion of one or more large claims against us that exceeds our available insurance coverage or changes in our insurance policies, including premium increases or the imposition of a larger deductible or co-insurance requirement, could adversely affect our business, prospects, financial condition and results of operations

29. *Our current revenues are derived from sales made only in the State of Gujarat in India. Our growth strategy to expand into new geographic areas poses risks. We may not be able to successfully manage some or all of such risks, which may have a material adverse effect on our revenues, profits and financial condition.*

Our operations have been geographically concentrated only in the State of Gujarat. Our business is therefore significantly dependent on the general economic condition and activity in the State of Gujarat in which we operate along with the Central, State and Local Government policies relating to steel industry. Although investment in the steel industry in the areas in which we operate has been encouraged, there can be no assurance that this will continue. We might expand geographically, and might not gain acceptance or be able to take advantage of any expansion opportunities outside our current markets. This might place us at a competitive disadvantage and limit our growth opportunities. We might face additional risks if we undertake operations in other geographic areas in which we do not possess the same level of familiarity as competitors. If we undertake operations in different geographical locations than those currently is; we might be affected by various factors, including but not limited to:

- Adjusting our products to the new geographic area;
- Ascertaining the creditworthiness of the buyer and maintain credit terms with the same;
- Obtaining necessary Government and other approvals in time or at all;
- Failure to realize expected synergies and cost savings;
- Attracting potential customers in a market in which we do not have significant experience; and
- Cost of hiring new employees and absorbing increased costs.

30. *We might not be successful in implementing our business strategies.*

The success of our business depends substantially on our ability to implement our business strategies effectively or at all. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted customers. Changes in regulations applicable to us might also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

31. *We sell our products in highly competitive markets and our inability to compete effectively might lead to lower market share or reduced operating margins, and adversely affect our results of operations.*

Gujarat is our primary market and we face competition in our business from local as well as nationwide suppliers and wholesalers of structural steel products like Round Bars, Flat Bars, TMT bars, angles, channels, MS Bars etc. The market for structural steel products is highly competitive with few organized players and localised smaller unorganised players. The competition in these markets is based primarily on demand and price. As a result, to remain competitive in our market, we must continuously strive to reduce our procurement, transportation and distribution costs, improve our operating efficiencies and secure our materials requirements. If we fail to do so, other suppliers and wholesalers or manufacturers of similar products might be able to sell their products at prices lower than our prices, which would have an adverse effect on our market share and results of operations

Further, we cannot assure you that our current or potential competitors will not offer products comparable or superior to our products. Failure to match our product quality and consistency accordingly might have an adverse effect on our operations and financial results.

32. *Our business is heavily dependent on our relations with both suppliers and customers.*

As a small size trader or manufacturer of steel products like structural steel products like TMT bars, Round Bars, Flat Bar etc. We would unlike our larger competitors not be in a position to take adequate LCs or guarantees from counter party within the dealing cycle. We would hence rely substantially on our relations with such players within the sector. Further, our main business strategy is to buy goods in lesser or NIL credit terms and sell on credit for earning good margins and hence this strategy would involve high amount of risks on our sell side recoveries and the same would further heavily rely on a our relationship management with such players. Our sales and profitability would be adversely affected in case of any management inabilities or errors on part of our suppliers as well as our customers.

Any negative development involving our suppliers and their products or our ability to retain and add customer could adversely affect our business growth, profitability, results of operations and goodwill and we may not be in a position to alter or avoid such developments.

33. *Orders placed by customers may be delayed, modified, cancelled or not fully paid for by our customers, which may have an adverse effect on our business, financial condition and results of operations.*

We may encounter problems in executing the orders in relation to our traded products, or executing it on a timely basis. Moreover, factors beyond our control or the control of our customers, including delays or failure to obtain necessary permits, authorizations, permissions and other types of difficulties or obstructions, may result in the postponement of the delivery of products or cause its cancellation. Further, since we do not execute long term contracts with our customers, the order could be cancelled or there could be changes in scope and / or scheduled delivery of the products. Accordingly, it is difficult to predict with certainty if, when, and to what extent we may be able to deliver the orders placed. Failure to deliver products on time could lead to customers delaying or refusing to pay the amount, in part or full, which may adversely affect our business.

In addition, even where a delivery proceeds as scheduled, it is possible that the contracting parties may default or otherwise fail to pay amounts owed. While we have not yet experienced any material delay, reduction in scope, cancellation, execution difficulty, delay or default in payment with regard to the orders placed with us, or any material disputes with customers in respect of any of the foregoing, any such adverse event in the future could materially harm our cash flow position and income. Any delay, modification, cancellation of order by our large customers may have material adverse effect on our financial condition and results of operations.

34. *Our Subsidiary's cost of production of TMT Bars, MS Bars, Angles, channels etc. is exposed to fluctuations in the prices of raw materials like Iron, M.S. Billets/ingots etc. as well as its availability.*

Our Subsidiary, Shree Ghantakarna Rolling Mills Pvt. Ltd. would be exposed to fluctuations in the prices of various raw materials like, M.S. Billets / ingots, as well as its availability, particularly as we typically do not enter into any long term supply agreements with our suppliers and all the above mentioned raw materials are bought by our Company

from various suppliers. We may be unable to make adequate provisions for the price fluctuations and, consequently, any adverse fluctuations that we have not factored in or provided for may adversely affect the consolidated results of our operations and our consolidated financial conditions.

We also face the risks associated with compensating for or passing on such increase in our cost of production on account of such fluctuations in prices to our customers. Particularly, we face the risk of our competitors being able to sell the products at lower rates than ours due to their economies of scales, if we pass on the increase in the cost of production to our customers through a corresponding increase in the price of our products in order to maintain our historical margins.

35. Trademark of our logo is not registered. Failure to register our logo in future may adversely affect our reputation, goodwill and business operations.

Our Corporate logo “” is not registered and we do not enjoy the statutory protections accorded to a registered trademark and are subject to the various risks arising out of the same, including but not limited to infringement or passing off our name and logo by a third party. In the event our logo is not registered in future also, we would not enjoy the statutory protections accorded to a registered trademark and our ability to use our logo may be impaired.

36. We are dependent on our Key Management team for success. Any loss of the said Key Management Personnel would seriously impair our ability to continue to manage and expand our business efficiently.

Our Company is depending significantly on the expertise, experience and continued efforts of our key managerial personnel. If one or more members of our Key Managerial Personnel are unable or unwilling to continue in his/her present position, it would be difficult to find a replacement, and our business might thereby be adversely affected. Our industry requires personnel with specific technical knowledge and experience for our trading and our Subsidiary’s proposed manufacturing business. For e.g. our Promoter and MD, Mr. Shalin Shah has more than a decade of experience in the trading business of Steel Products. If he is unwilling to continue, or decides to work independently, we may not be able to implement our future strategies and growth plans.

Competition for Key Managerial Personnel in our industry is intense and it is possible that our Company might not be able to retain existing Key Managerial Personnel or might fail to attract/ retain new employees at equivalent positions in the future. As such, loss of Key Managerial Personnel would adversely affect our business, results of operations and financial condition. For further details on the key managerial personnel of our Company, please refer to the chapter titled “Our Management” beginning on page no. 105 of this Prospectus.

* Audited figured pertains to Standalone Financials of GNRL. For details please see “Our Group Companies” beginning on page no 120 of this Prospectus.

38. Our Subsidiary has negative networth and incurred losses in the past and may incur losses in the future.

Our Subsidiary has negative networth and incurred losses in the past, details of which are as under:

(₹ in lakhs)

Particulars	November 15, 2017	March 31, 2017	March 31, 2016	March 31, 2015
Profit / (Loss) after tax	(0.59)	(29.43)	(14.81)	(0.04)

These losses were on account of payables to various authorities and lack of operational activities in the past 16 years. If our Subsidiary is unable to turnaround its proposed manufacturing activities in the future and subsequently making profits, it might adversely affect our business, results of operations and financial condition.

39. In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects of this Issue which would in turn affect our revenues and results of operations.

The funds that we receive would be utilized for the objects of the Issue as has been stated in the chapter “*Objects of the Issue*” on page no. 59 of this Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management’s estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue this may affect operations of our WOS and our consolidated financials.

We have not identified any alternate source of raising the funds required for our ‘*Objects of the Issue*’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance. Our Company has not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds can adversely affect our growth plan and profitability. The delay/shortfall in receiving these proceeds may require us to borrow the funds on unfavourable terms, both of which scenarios may affect return on our investment and consolidated profitability will have negative impact.

40. Our operations might be adversely affected by strikes, work stoppages or increased wage demands by our or our contractors’ workforce or any other industrial unrest or dispute.

While we have not experienced any industrial unrest or dispute at our Subsidiary’s unit in the past, we cannot be certain that we will not suffer any disruption to our operations due to strikes, work stoppages or increased wage demands in the future. Further, if our work unionizes in the future, collective bargaining efforts by labour unions might divert our management’s attention and result in increased costs. We might be unable to negotiate acceptable collective wage settlement agreements with those workers who have chosen to be represented by unions, which might lead to union-initiated strikes or work stoppages. Any shortage of skilled and experienced workers caused by such industrial unrest or disputes might adversely affect our business, results of operations and financial condition.

Further, under Indian law, we might be held liable for wage payments or benefits and amenities made available to “daily wage” workers. Any requirement to discharge such payment obligations, benefits or amenities or to absorb a significant portion of the “daily wage” workers on our own rolls might adversely affect our business, results of operations and financial condition.

41. In addition to normal remuneration, other benefits and reimbursement of expenses some of our Directors (including our Promoters) are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.

Some of our Directors (including our Promoters) are interested in our Company to the extent of their shareholding and dividend entitlement in our Company, in addition to normal remuneration or benefits and reimbursement of expenses. We cannot assure you that our Directors would always exercise their rights as Shareholders to the benefit and best interest of our Company. As a result, our Directors will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. Our Directors may take or block actions with respect to our business, which may conflict with our best interests or the interests of other minority Shareholders, such as actions with respect to future capital raising or acquisitions. We cannot assure you that our Directors will always act to resolve any conflicts of interest in our favour, thereby adversely affecting our

business and results of operations and prospects. For further details please see “*Risk Factors*”, “*Business Overview*” and “*Our Management*”, “*Our Promoters and Promoter Group*”.

42. *Non-compliance with and changes in, safety, health and environmental laws and other applicable regulations, might adversely affect our Company’s results of operations and its financial condition.*

We are subject to Indian laws and government regulations, including laws in relation to safety, health and environmental protection. These safety, health and environmental protection laws and regulations *inter alia* impose controls on air and water discharge, noise levels, storage handling, employee exposure to hazardous substances and other aspects of our Company’s operations and products. In addition, our products, including the process of manufacture, storage and distribution of such products, are subject to numerous laws and regulations in relation to quality, safety and health. For further details, please see “*Key Industry Regulation and Policies*” on page no. 94 of this Prospectus. Failure to comply with any existing or future regulations applicable to us might result in levy of fines, commencement of judicial proceedings and/or third party claims, and might adversely affect our results of operations and financial condition.

Further, there can be no assurance that our Company will not be involved in future litigation or other proceedings or be held responsible in any litigation or proceedings including in relation to safety, health and environmental matters, the costs of which would be material. Any accidents involving hazardous substances might cause personal injury and loss of life, substantial damage to or destruction of property and equipment and would result in a suspension of operations. The loss or shutdown of operations over an extended period at any of our Company’s facilities would have a material adverse effect on our Company’s business and operations.

RISK FACTORS RELATED TO EQUITY SHARES

43. *Any further issuance of Equity Shares by Our Company or sales of Equity Shares by any significant shareholders may adversely affect the trading price of the Equity Shares.*

Any future issuance of Equity Shares by our Company could dilute the investors’ shareholding. Any such future issuance of Equity Shares or sales of Equity Shares by any of our significant shareholders may also adversely affect the trading price of the Equity Shares, and could impact our ability to raise capital through an offering of securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares.

44. *There is no existing market for our Equity Shares, and we do not know if one will develop. Our stock price may be highly volatile after the Issue and, as a result, you could lose a significant portion or all of your investment.*

There is no guarantee that our Equity Shares will be listed on the Stock Exchange in a timely manner or at all and any trading closures at the Stock Exchange may adversely affect the trading price of our Equity Shares. Prior to the Issue, there has not been a public market for the Equity Shares. Further, we cannot predict the extent to which investor interest will lead to the development of an active trading market on the Stock Exchanges or how liquid that market will become. If an active market does not develop, you may experience difficulty selling the Equity Shares that you purchased. The Issue Price is not indicative of prices that will prevail in the open market following the Issue. Consequently, you may not be able to sell your Equity Shares at prices equal to or greater than the Issue Price. The market price of the Equity Shares on the Stock Exchange may fluctuate after listing as a result of several factors, including the following:

- Volatility in the Indian and other Global Securities Markets;
- The performance of the Indian and Global Economy;
- Risks relating to our business and industry, including those discussed in this Prospectus;
- Strategic actions by us or our competitors;
- Investor perception of the investment opportunity associated with the Equity Shares and our future performance;
- Adverse media reports about us, or our shareholders;
- Future sales of the Equity Shares;
- Variations in our quarterly results of operations;

- Differences between our actual financial and operating results and those expected by investors and analysts;
- Our future expansion plans;
- Perceptions about our future performance or the performance of Indian galvanized steel wire manufacturing companies generally;
- Performance of our competitors in the Indian galvanized steel wire manufacturing industry and the perception in the market about investments in the Steel sector;
- Significant developments in the regulation of the galvanized steel wire manufacturing industry in our key locations;
- Changes in the estimates of our performance or recommendations by financial analysts;
- Significant developments in India's economic liberalisation and deregulation policies; and
- Significant developments in India's fiscal and environmental regulations. There has been significant volatility in the Indian stock markets in the recent past, and our Equity Share

Price could fluctuate significantly as a result of market volatility. A decrease in the market price of the Equity Shares could cause you to lose some or all of your investment.

45. *Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.*

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. Our business is working capital intensive. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations.

EXTERNAL RISK FACTORS

46. *The GoI has implemented a new national tax regime by imposing GST.*

The GoI has implemented a comprehensive national GST regime from July 01, 2017 that will combine taxes and levies by the Central and State Governments into a unified rate structure. GST is a dual levy with state GST and central GST. Central GST will replace the current central taxes and duties such as excise duty, service tax, counter vailing duty, special additional duty of customs, central charges and cesses. The state GST will replace local state taxes like VAT, CST, octroi and others including state cesses and charges.

Any future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable.

Our business being construction centric, most of the current central taxes and duties and local state taxes and duties are applicable to our business. We are in the process to understand the quantification of the impact of this development at this stage due to limited information available in the public domain. If we are taxed at a higher rate than the current tax rates, our financial condition and results of operations may be adversely affected.

Further, we may also be required to make changes in our internal process to adapt to the requirements of GST. We cannot assure you if we will be able to effectively carry out such changes. To ensure compliance with the requirements of the GST laws, we may also need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention. Any increase in our compliance requirements or in our compliance costs may have an adverse effect on our business and results of operations.

47. *The Companies Act, 2013 has effected significant changes to the existing Indian company law framework, which may subject us to higher compliance requirements and increase our compliance costs.*

A majority of the provisions and rules under the Companies Act, 2013 have recently been notified and have come into effect from the date of their respective notification, resulting in the corresponding provisions of the Companies Act, 1956 ceasing to have effect. The Companies Act, 2013 has brought into effect significant changes to the Indian company law framework, such as in the provisions related to issue of capital, disclosures in prospectus, corporate

governance norms, audit matters, related party transactions, introduction of a provision allowing the initiation of class action suits in India against companies by shareholders or depositors, a restriction on investment by an Indian company through more than two layers of subsidiary investment companies (subject to certain permitted exceptions), prohibitions on loans to directors and insider trading and restrictions on directors and key managerial personnel from engaging in forward dealing. Further, companies meeting certain financial thresholds are also required to constitute a committee of the board of directors for corporate social responsibility activities and ensure that at least 2% of the average net profits of the company during three immediately preceding financial years are utilized for corporate social responsibility activities. Penalties for instances of non-compliance have been prescribed under the Companies Act, 2013, which may result in inter alia, our Company, Directors and key managerial employees being subject to such penalties and formal actions as prescribed under the Companies Act, 2013, should we not be able to comply with the provisions of the New Companies Act within the prescribed timelines, and this could also affect our reputation.

To ensure compliance with the requirements of the Companies Act, 2013 within the prescribed timelines, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention. While we shall endeavour to comply with the prescribed framework and procedures, we may not be in a position to do so in a timely manner.

The Companies Act, 2013 introduced certain additional requirements which do not have corresponding equivalents under the Companies Act, 1956. Accordingly, we may face challenges in interpreting and complying with such provisions due to limited jurisprudence on them. In the event, our interpretation of such provisions of the Companies Act, 2013 differs from, or contradicts with, any judicial pronouncements or clarifications issued by the Government in the future, we may face regulatory actions or we may be required to undertake remedial steps. Additionally, some of the provisions of the Companies Act, 2013 overlap with other existing laws and regulations (such as the corporate governance norms and insider trading regulations). We may face difficulties in complying with any such overlapping requirements. Further, we cannot currently determine the impact of provisions of the Companies Act, 2013, which are yet to come in force. Any increase in our compliance requirements or in our compliance costs may have an adverse effect on our business and results of operations.

48. Any changes in the regulatory framework could adversely affect our operations and growth prospects.

Our Company is subject to various regulations and policies. For details see section titled “*Key Industry Regulations and Policies*” beginning on page no. 94 of this Prospectus. Our business and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse affect on our business, financial condition and results of operations.

49. Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, results of operations, financial condition and prospects.

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations, financial condition and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

50. Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse affects on our operations and financial performance.

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

51. *Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect the financial markets and our business.*

Terrorist attacks and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, impede travel and other services and ultimately adversely affect our business. In addition, any deterioration in relations between India and Pakistan might result in investor concern about stability in the region, which could adversely affect the price of our Equity Shares.

India has also witnessed civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic and political events in India could have a negative impact on the value of share prices generally as well as the price of our Equity Shares. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the price of our Equity Shares.

52. *Instability in financial markets could materially and adversely affect our results of operations and financial condition.*

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets.

The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in NIFTY, NSE's/SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares

53. *Conditions in the Indian securities market and stock exchanges may affect the price and liquidity of our Equity Shares.*

Indian stock exchanges, which are smaller and more volatile than stock markets in developed economies, have in the past, experienced problems which have affected the prices and liquidity of listed securities of Indian companies. These problems include temporary exchange closures to manage extreme market volatility, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading, limited price movements and restricted margin requirements. Further, disputes have occurred on occasion between listed companies and the Indian stock exchanges and other regulatory bodies that, in some cases, have had a negative effect on market sentiment. If similar problems occur in the future, the market price and liquidity of the Equity Shares could be adversely affected. Further, a closure of, or trading stoppage on, either of the Stock Exchanges could adversely affect the trading price of our Equity Shares.

54. *We will prepare our financial statements from April 1, 2018 onwards under the Indian Accounting Standards ("Ind AS"). As Ind AS is different in many respects from Indian GAAP, our financial statements from April 1, 2018 may not be comparable to our historical financial statements and our financial statements for the year ending March 31, 2017 prepared under Indian GAAP may not be comparable to our financial statements for the year ending March 31, 2017 prepared under Ind AS for comparison purposes. In addition, our transition to Ind AS reporting could have an adverse effect on our business and results of operations.*

We currently prepare our financial statements under Indian GAAP. The Companies (Indian Accounting Standards) Rules, 2015 ("IAS Rules"), as amended by the Companies (Indian Accounting Standards) (Amendment) Rules, 2016, enacted changes to Indian GAAP that are intended to align Indian GAAP further with IFRS. The IAS Rules provide that the financial statements of the companies to which they apply shall be prepared and audited in accordance with Ind

AS. Ind AS is different in many respects from Indian GAAP. All NBFCs and HFCs having a net worth of more than ₹ 5,000.00 million are required to mandatorily adopt Ind AS for the accounting period beginning from April 1, 2018, with comparatives for the period ending on March 31, 2017. Although any company may voluntarily implement Ind AS for the accounting period beginning from April 1, 2015, we intend to implement Ind AS for the accounting period beginning from April 1, 2018. As there is not yet a significant body of established practice, such as interpretations of Ind AS, on which to draw in forming judgments regarding the Ind AS implementation and application, we have not determined with any degree of certainty the impact the adoption of Ind AS will have on our financial statements. However, we know that the Ind AS will change our methodology for estimating allowances for doubtful debt losses. Ind AS will require us to value our NPAs by reference to their market value (if a ready market for such loans exists) or to calculate the present value of the expected future cash flows realisable from our loans, including the possible liquidation of collateral (discounted at the loan's effective interest rate) in estimating allowances for doubtful debt losses. This may result in us recognising higher allowances for doubtful debt losses in the future, which will adversely affect our results of our operations. Accordingly, our financial statements for the period commencing from April 1, 2018 may not be comparable to our historical financial statements and our financial statements for the year ending March 31, 2017 prepared under Indian GAAP may not be comparable to our financial statements for the year ending March 31, 2017 prepared under Ind AS for comparison purposes.

In our transition to Ind AS reporting, we may encounter difficulties in the on-going process of implementing and enhancing our management information systems. Our management may also have to divert significant time and additional resources in order to implement Ind AS on a timely and successful basis. Moreover, there is increasing competition for the small number of Ind AS experienced accounting personnel available as more Indian companies begin to prepare Ind AS financial statements. Therefore, our transition to Ind AS reporting could have an adverse effect on our business and results of operations.

55. *Our business and activities may be further regulated by the Competition Act, 2002 and any adverse application or interpretation of the Competition Act could materially and adversely affect our business, financial condition and results of operations.*

The Competition Act, 2002 was enacted for the purpose of preventing practices having an adverse effect on competition in India and has mandated the CCI to regulate such practices. Under the Competition Act, 2002, any arrangement, understanding or action, whether formal or informal, which causes or is likely to cause an appreciable adverse effect on competition in India are void and may result in substantial penalties. Any agreement among competitors which directly or indirectly determines purchase or sale prices, directly or indirectly results in bid rigging or collusive bidding, limits or controls production, supply, markets, technical development, investment or the provision of services, or shares the market or source of production or provision of services in any manner, including by way of allocation of geographical area or types of goods or services or number of customers in the relevant market or any other similar way, is presumed to have an appreciable adverse effect on competition in the relevant market in India and shall be void. Further, the Competition Act, 2002 prohibits the abuse of dominant position by any enterprise. If it is proved that the contravention committed by a company took place with the consent or connivance or is attributable to any neglect on the part of, any director, manager, secretary or other officer of such company, that person shall be guilty of the contravention and may be punished. The manner in which the Competition Act, 2002 and the CCI affect the business environment in India may also adversely affect our business, financial condition and results of operations.

REBAR MARKET:

Market Size

The rebar with major diameters between 8mm and 25mm finds application in buildings, bridges, highways etc. With an estimated demand of around 35 million tonnes for 2015-16, the market is currently dominated by secondary producers with an estimated share of 70 percent. The overall annual demand of steel rebar in India has jumped significantly from 22.04 million tonnes reported in 2012-13. While the secondary producers manufacture rebars through processing of imported steel scrap, the primary producers manufacture it by using iron ore as the raw material.

Thus, along with demand of secondary producers, primary producers also gain momentum in rebar consumption across all consumer sectors. India had produced over 30.2 MT of bars and rods in FY14. Out of which, around 8.5 million tonnes was contributed from primary manufacturers and about 21.5 million tonnes by secondary manufacturers. Indian re-bar industry production had increased by 2.3% in FY14 against FY13. As per an estimate, about 10 MT of additional capacity was planned by Re-bar industry across various regions of India. In this year, some of the secondary manufacturers brands have raised its totaled capacity by 0.64 million tonnes per annum. Chhattisgarh & Maharashtra are the two states that have been eyed as a centre for TMT production.

In these states, many additional capacities have been added at present. However, Kalika TMT and a secondary manufacturer Raipur Alloys & Steels are going to expand its capacities by 0.19 million tonnes per annum and 0.83 million tonnes per annum respectively in near future.

Historical Background

The dominance of cold twisted deformed steel bars (CTD bars) in India since the early 70's of the last century was mainly due to the fact that most civil engineers at that time did not bother to check the vital parameters like yield strength, Ultimate Tensile Strength (UTS), elongation etc. while using CTD bars in reinforced cement concrete (RCC). The industrially developed countries had stopped the use of such CTD Bars by the start of 1970's. Then came the era of Thermo Mechanically Tested (TMT) Bars, which are even now being used by some civil engineers as they believe that these bars are of the specified grade Fe-415 as per 1786/1985 and are superior to the CTD bars which were being used earlier.

However, these so-called TMT Bars available in the market were being used earlier. However, these so-called TMT Bars available in the market were often found on testing to have yield strength of 350-390 N/mm² only. The usage of Reinforced Cement Concrete (RCC) has become the default standards for construction of residential and commercial structures, flyovers, bridges, water retaining structures, industrial and power plants, etc. Rebar constitute about 15-25 percent of the total materials cost for civil construction.

The Rebar industry has been a main steel product among the Finished Steel product categories. In 2009, the rebar accounted for about 35 percent of the total steel production in the country. The construction and infrastructure boom in the country in the past decade contributed to the rapid growth in the industry. The rebar industry is characterized by both primary and secondary players operating in the market. Integrated Steel Producers (ISPs) like SAIL, Tata Steel, JSW, that produce from the pure iron ore account for about 30 percent of the total rebar market.

The remaining 70 percent is catered by about 300-400 producers. Some of the leading secondary producers include Tulsyan, SRMB, Sujana etc. Medium and small players have regional presence catering to the demand in a particular region.

Commoditizing Rebar Markets

Increased competition in the Rebar industry has resulted in the market becoming commoditized. Industry players in the last five years have focused more on marketing and branding of the product. Tata Steel is the pioneer in this aspect as the company has successfully branded its products, thereby, sustaining its leadership. In 2009-10, Tata Steel was also accorded the first Super Brand for this segment. Tata steel achieved a production of 1.56 million tons of TMT rebar becoming the largest TMT rebar manufacturer.

Stiff competition and better market penetration led to the development of value added steel rebars in India. Increased awareness on corrosion-protected and earthquake-resistant rebars and the benefits they offer in terms of longer structural life and lower life cycle cost has prompted developers to include them in their projects. Increased competition in the rebar market has compelled leading producers of rebars to look for branding and product differentiation. The value-added products have been actively promoted by these producers to sustain their leadership in the rebar market.

In recent years, the numbers of coastal projects have increased considerably. Projects such as ports, coastal thermal power stations, coastal buildings for commercial use, desalination plants, etc. are being implemented along the vast coastline of the country (both eastern and western coasts in the country). All these have increased the demand of corrosion-protected rebars

Hence, Corrosion Resistant Steel (CRS) rebars have the lowest life cycle cost among the existing rebar products available in the market over a structural lifespan of 50 years. For stainless steel, the life span is claimed to be 120 years. The distinct advantages of CRS rebars include corrosion resistance and is improved while retaining the strength, toughness, ductility, and formability, thus increasing the structure lifespan, higher strength means lower tonnage requirement, thus reducing construction costs, CRS is not a coated material so it is unaffected by transport, handling or concrete pouring, so does not require any touch-up work. No extra precaution in handling and storage is required, better performance in the case of natural calamities like earthquake and fire and due to lower carbon equivalent, weldability is far superior compared to conventional rebars.

Fragmented Markets

The Indian steel rebars market is highly fragmented and unorganized – more than 1,800 re-rollers (representing unorganized sector) are reported to be operating in India. Being volume driven business, rebar market is dominated by regional players due to high logistic expenses.

Eastern and western regions have the largest concentration of small re-rolling mills for steel rebars. The branded TMT bars have been introduced by most of the leading players (representing organized sector). The use of rebar grades and products has undergone remarkable changes in recent years. Though the IS: 1786 building codes specify only Fe-415 for reinforced concrete, its usage is declining as the market is shifting to higher grades. The construction industry has started adopting newer grades like Fe-500, Fe-550, and Fe-500D. Similarly, on the application side, too, rebar use has been moving toward higher value added products like corrosion resistant steel rebar, epoxy coated rebar, earthquake resistant rebar, galvanized rebar, etc.

Indian rebar markets is scattered into many large regional players serving local customers at either at par or a discount to the national level players. But, their acceptance among consumers is smooth resulting into their high business volumes. Many large and small players have strengthened their presence in regional markets making thereby entry of national level players difficult.

Branding in the Rebar Industry

Increased competition in the Rebar industry has resulted in the market becoming commoditized. Industry players in the last five years have focused more on marketing and branding of the product. Tata Steel is the pioneer in this aspect as the company has successfully branded its products, thereby sustaining its leadership. In 2009-10, Tata Steel was also accorded

the first superBrand for this segment. Tata steel achieved a production of 1.56 million tons of TMT rebar becoming the largest TMT rebar manufacturer. Other organized sector players including Jindals and Balmukund have claimed strong presence in rural markets.

Outlook

With increased focus on urbanization, the rebar market is likely to witness a strong growth in coming years. Slow growth was recorded albeit temporarily after a slowdown in India economic growth in the past few years. Demonetization of high value currency notes in November 2016 worsened the entire construction activity including demand of rebars in India. But, its impact has started subsiding with forecast of strong growth momentum to begin in near future. Global consultancy Frost & Sullivan forecast India's demand of rebars to hit 41.82 million tonnes by 2020-21 as shown below:

DEMAND FORECAST OF STEEL REBARS

SUMMARY OF OUR BUSINESS

In addition to the information contained in this chapter, please also read the section titled “Risk Factors” in order to better understand the risks relevant in our business.

OUR OVERVIEW

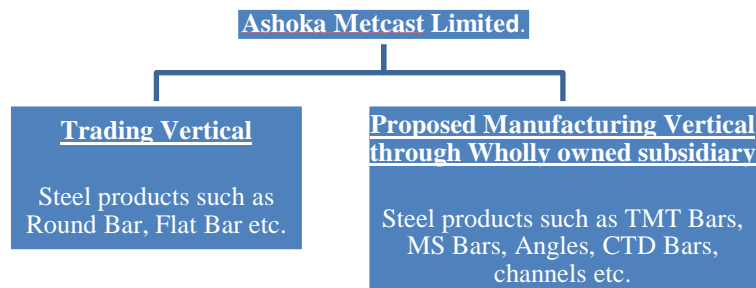

About our Group

Our Company is part of Gujarat based diversified business group currently promoted by Mr. Shalin Ashok Shah and Family. Our group has business interests in various sectors including Oil and Gas, Steel, Infrastructure, Electronic Equipments and Real Estate. Our flagship Group Company – Gujarat Natural Resources Limited. is engaged in the business of Oil & Gas exploration and production and currently has participating interests in 6 producing blocks in Cambay basin and is operator in four of these blocks. The company is listed on BSE and has a market capitalisation of around 125 crores. For further details of our Promoter Group and Group Companies please see “*Our Promoter and Promoter Group*” and “*Our Group Companies*” beginning on page nos. 116 and 120 respectively of this Prospectus.

About our Company

Our Company was incorporated as “*Tanya Estates Private Limited*” on July 29, 2009 with RoC, Gujarat at Dadra & Nagar Haveli. For details of our change in name as well as past business activities please refer “*History and Certain Corporate Matters*” beginning on page no. 98 of this Prospectus.

Our Company is currently engaged in trading of structural steel products such as Round Bars, Flat Bars etc. and through our wholly owned Subsidiary, SGRM we are proposing to manufacture structural steel products like TMT bars, angles, channels, MS Bars etc. The business model of the company is as explained below:

Our Company plans to leverage its group and promoter networks in the real estate and infrastructure space as well as strong balance sheet situation to increase its presence in the structural steel market of Gujarat and Western India. Our Company has commenced its trading operations in September, 2017. Our Company is in the process of building a structural steel focussed trading vertical as well as developing a strong team to cater to its proposed increased operational needs.

Further, our Company has recently acquired 100% stake in Shree Ghantakarna Rolling Mills Pvt. Ltd. (making it its wholly owned Subsidiary Company). Our Subsidiary Company owns a rolling mill having aggregate installed capacity of 12,000 tons; however the same has been non-operational for past 16 years due to internal financial constraints as well as market conditions. Post acquisition we have begun the process of revamping as well as expanding the production facilities and we intend to begin the production in April, 2018 with an aggregate installed capacity of 18,000 tons per annum.

As on November 30, 2017 our Company employs 8 people on its payroll.

Our Strengths

Well educated and experienced management

Our senior management team is well educated and experienced in the trading and manufacturing industry of steel product. Our Promoter Director – Mr. Shalin Shah has completed his civil engineering in the year of 1994 and he has over two decades of experience in multiple industries.. We believe that our management team's experience and their understanding of the relevant business cycles will enable us take advantage of both current and future market opportunities. It is also expected to help us on addressing and mitigating various risks inherent in our business, including significant competition, reliance on independent agents, and fluctuations in prices.

Group Synergies

Our Company is part of Gujarat based diversified business group currently promoted by Mr. Shalin Ashok Shah and Family. Our group has business interests in various sectors including Oil and Gas, Steel, Infrastructure, Electronic Equipments and Real Estate. We believe that our interests and networks amongst the real estate and infrastructure space would help us identify sustainable business opportunities in our structural steel business.

Strong Balance Sheet and Financial Condition

We currently possess a unique balance sheet situation with low debt and high equity. Hence, we can procure the goods by making upfront payments and take benefit of cash discount which will improve our profitability. We believe that we have the ability to leverage our balance sheet to take advantage of a favourable business cycle or market opportunity.

Locational advantage of our proposed manufacturing unit

Our proposed manufacturing unit (proposed to be made operational through our Wholly Owned Subsidiary) is located at around 40 kms from Ahmedabad at Industrial area of Kadi near Ahmedabad-Mehsana highway. Both Ahmedabad and Mehana are big steel markets and thus the location is strategically advantageous. There are many steel industries nearby from where raw materials are easily made available. The location of the project is surrounded by states like Maharashtra, Rajasthan and Madhya Pradesh, which are producing sample quantity of iron and steel raw material. So, the basic raw materials for present as well as proposed products are all indigenously available at short notice and in required quantity and quality. The location of our plant is important for the smooth and economical operation of the industrial unit.

Our Strategies

Improve our fund based capabilities to better exploit market conditions

We have over the last few years begun the process of realigning our asset and liabilities and have recently changed our name and main objects. Our new business venture requires liquidity of funds to monetize the market opportunities in trading of structural steel products. We hence intend to raise funds from the IPO and ensure we have available liquidity and resources. Further, we have recently begun the process of revamping as well as expanding its production facilities and we intend to begin its production in April, 2018 with an aggregate installed capacity of 18,000 tons per annum. This plant revamp and expansion is also being part funded from the IPO Proceeds. For details of our fund requirements and proposed utilisations please see “*Objects of the Issue*” beginning on page 59 of this Prospectus.

Develop relations with a larger pool of market participants

We have begun our trading vertical in September, 2017 itself and hence we have not yet developed a strong client base. Our strategy is to develop long-term relationships with existing and prospective clients by providing quality products in timely manner. We believe in developing relationships that go beyond one-time interaction. We are striving to focus our resources to develop and maintain new clientele as well as sustainable supplier chain.

Invest in technology and make the proposed manufacturing unit strong supply partner for the trading vertical.

Our Subsidiary Company has a rolling mill which has been non-operational for past 16 years. We have recently begun the process of revamping as well as expanding its production facilities and we intend to begin its production in April, 2018 with an aggregate installed capacity of 18,000 tons per annum. This plant revamp and expansion is also being part funded from the IPO Proceeds. For further details of the modernization and investments being made by the company please see

“Objects of the Issue” beginning on page 59 of this Prospectus. Once operational our manufacturing unit will be a strong supply partner to the trading vertical.

Focus on Structural Steel segment

Our group companies are involved in the trading of various steel of products. However we intend to focus on “structural steel” product market. The global structural steel market size was valued at USD 84.6 billion in 2015 and is projected to grow at a CAGR of 5.5% from 2016 to 2025. Strong recovery of construction industry in developed markets of the U.S., Germany and UK is a key factor driving market growth. India’s finished steel exports rose 102.1 and 2016-17. Total consumption of finished steel grew by 3.4 per cent year-on-year at 6.015 MT during April, 2017. Huge scope for growth is offered by India’s comparatively low per capita steel consumption and the expected rise in consumption due to increased infrastructure construction and the thriving automobile and railways sectors.

We believe that having a focus on this growing segment would provide us a competitive edge compared to other trading companies which deal in all steel products.

Explore possibilities of geographical expansion of operations

We intend to over time expand our business beyond the Gujarat market to the neighboring states of Maharashtra, Rajasthan and Madhya Pradesh. On infusion of additional funds, we intend to capitalize on our industry relations and further expand the reach of our product portfolio in these markets. We expect that systematic geographical expansion, matched with a continued focus on our competitive strengths, would help us in significantly improving our market share and drive growth.

OVERVIEW OF THE GLOBAL AND INDIAN ECONOMY

Global Scenario

The global economy remains sluggish heading into 2018, but the growth outlook is nevertheless somewhat stronger than in recent years. On the positive side, we anticipate a few bright spots in the global economy, such as the US and Indian economies, and the marginal recovery of the Brazilian and Russian economies in 2017. Much of this boost will only be short term, however, so the base case forecast is flat over the next five years, with average annual growth rate of 3% projected through 2021. This very modest recovery will be uneven. South Asia, Sub-Saharan Africa and East Asia will see the highest level of dynamism over the next five years. On the negative side, growth in the developed market regions will continue to be weak, and Latin America will underperform relative to other emerging market regions.

Figure 1
Global economic growth will strengthen marginally this year

Notes: GDP is measured at market exchange rates. Developed markets are those that the IMF characterizes as "advanced economies" and emerging markets are those that the IMF characterizes as "emerging market and developing economies."
Sources: International Monetary Fund, Oxford Economics, Economist Intelligence Unit; A.T. Kearney analysis

Four economic elements in particular help explain why projected growth is flat: the growing strength of the US Dollar, continuation of the global resource slump cycle, the ongoing hiatus in globalisation and sustained weak productivity gains. As important as these and other economic fundamentals are political, policy, regulatory, and geopolitical risks will largely determine economic outcomes. This creates an even more uncertain global operating environment for businesses, as national politics is becoming even more unpredictable in key markets around the world. Five of these political risks in particular represent a substantial drag on the global economic outlook- monetary policy, fiscal policy, regulation of new economy, protectionism, and geopolitical and domestic political shocks.

INDIAN ECONOMY OVERVIEW

Economic growth is projected to remain strong and India will remain the fastest growing G20 economy. The increase in public wages and pensions will support consumption. Private investment will recover gradually as excess capacity diminishes, and the landmark Goods and Services Tax and other measures to improve the ease of doing business are being implemented. However, large non-performing loans and high leverage of some companies are holding back investment. Monetary policy is projected to remain tight as inflation expectations have still not fully adjusted down. The need to reduce the relatively high public-debt-to-GDP ratio leaves little room for fiscal stimulus.

However, investing more in physical and social infrastructure is critical to raising living standards for all. This should be financed by a comprehensive reform of income and property taxes. Restoring credit discipline and cleaning up bank's balance sheets will be instrumental to support the credit growth needed to finance more business investment. Trade openness has increased, partly driven by a competitive service sector. Manufacturing has lagged behind, with limited contribution to exports and job creation, leaving many workers in low-paid jobs. Promoting quality job creation in manufacturing would require reducing further restrictions on FDI and trade, modernizing labor regulations and providing better education and skills. Better infrastructure, transport and logistics services would facilitate manufacturing firms' access to global markets, particularly from remote and poorer regions.

Exports have picked up, driven by strong demand from Asia and the Euro zone. Higher oil prices and gold imports, coupled with a decline in remittances inflows, are reflected in some deterioration in the current account deficit. However, the deficit remains well below its longer-term average. FDI net inflows have been rising steadily since 2014 and are fully financing the current account deficit. Growth is projected to increase further. Private consumption will remain steady as increases in wages and pensions for central government employees are followed by similar adjustments in the states. The recent increase in capacity utilization, coupled with the rebound in industrial production for capital goods and manufacturing indices, bodes well for a gradual revival of private investment. The implementation of the GST, by lowering the price of capital goods, and the cut in the corporate income tax rate should also support investment.

Infrastructure segment is projected to be the largest and fastest-growing segment of the steel rebars market by 2021

The infrastructure segment is estimated to have accounted for a major share of the steel rebar market in 2016, followed by the housing, and industrial segments. The use of steel rebar increases the tensile strength of surrounding concrete structures in highways, bridges, and pillar structures. Increasing project counts of highway, bridges, and structural engineering are fueling the growth of the steel rebar market in the infrastructure segment.

Modernization and maintenance of infrastructure projects has led to the increasing demand for steel rebar. Increasing infrastructure projects across the globe, especially in the Asia-Pacific is another major factor, driving the growth of the steel rebar market during the forecast period.

Deformed steel segment is projected to be the largest and fastest growing segment in the steel rebar market by 2021

The deformed steel bar segment is the largest and fastest-growing segment by type in the steel rebar market. Deformed bar, formed from carbon steel and provided with ridges for better mechanical anchoring in reinforced concrete, is used in applications such as reinforced concrete slabs, cages, columns, prefabricated beams, and precast products. This deformation of the bar helps in increasing the bond between materials and minimizes slippage in concrete, which is fueling the rapid growth of the deformed bar segment.

The steel rebar market in the Asia-Pacific region is projected to grow at the highest CAGR during the forecast period

The Asia-Pacific steel rebar market is projected to grow at the highest CAGR between 2016 and 2021. Growth in this market is mainly attributed to the increasing steel rebar consumption in the construction industry. China and India are the key markets for steel rebar. China plans to invest around USD 720 billion in its infrastructural projects by the end of 2019. Similarly, there are a large number of infrastructural projects in the pipeline in India. In addition, strong policy initiatives such as the mandatory use of domestic steel in government infrastructural projects and 'Make in India' are expected to support the growth of the domestic steel rebar market.

Major market players covered in the report are ArcelorMittal (Luxembourg), Gerdau S.A (Brazil), Nippon Steel & Sumitomo Metal Corporation (Japan), Posco SS Vina, Co. Ltd (Vietnam), Steel Authority of India Limited (India), Tata Steel Ltd. OVERVIEW OF INDIAN STEEL INDUSTRY

Understanding the importance of steel

Steel is vital for any economy. In a lot of ways, steel consumption in an economy is a reflection of its health. It should not be a surprise that steel consumption fell by as much as 50% in some countries during the recession of 2008. We use steel in our daily lives. Its importance can be described in the following simple quote from the World Steel Association: “Steel everywhere in our lives.”

Steel producers. The steel industry can be accessed through steel producers such as ArcelorMittal (MT), U.S. Steel Corporation (X), AK Steel (AKS), Steel Dynamics (STLD), and Nucor (NUE).

Metal service centers. Metal service centers act as distributors for steel companies. These companies don’t produce steel but procure it from steel producers. They then supply steel to end consumers. Service centers can provide custom shapes and sizes in smaller lot sizes, which steel producers cannot. ETFs. Retail investors can also get a diversified exposure to the metals industry through exchange-traded funds (or ETFs). Standard & Poors depository receipt (or SPDR) S&P Metals and Mining ETF (XME) can give you a diversified exposure to the metals and mining industry.

Structure of Steel Sector

Different Types of Structural Steel And Their Distinct End Use

Steel shapes are based on demand

Steel producers manufacture steel in several shapes according to demand from end consumers. Based on shape, steel products are widely grouped into two categories:

- I) Long Products and

II) Flat Products.

I) LONG PRODUCTS:

Steel products known as “longs” include bars, tubes, structural sections, and wire products. The above chart shows the various types of long steel products. Each of these products has a distinct end use.

- Bars are generally divided into merchant bars and reinforcing bars (or rebars). Merchant bars are commonly used to manufacture fabricated products such as furniture. Rebars, on the other hand, are used to strengthen concrete in bridges, highways, and buildings. Rebars are used in the nonresidential construction industry. Please be aware that Nucor (NUE) is the largest supplier of steel products to the U.S. nonresidential construction industry. Currently, Nucor is a top holding of the Standard & Poors depository receipt (or SPDR) S&P Metals and Mining exchange-traded fund (or ETF) (XME).
- Tubular products are generally used for transportation of fluids. Another subcategory of tubular products is oil country tubular goods (or OCTG). The energy industry uses these products. The demand for OCTG in U.S. markets has been strong, backed by a booming oil and gas industry. U.S. Steel Corporation (X) is the largest supplier of OCTG in North American markets. This segment was reeling under the impact of imports. In August this year, the International Trade Commission (or ITC) ratified an antidumping duty on imports of OCTG products from nine countries.
(Source: <http://marketrealist.com/2014/12/different-steel-types-distinct-end-use>)
- Structural products are mainly used in the construction industry. Beams, channels, and angles are common structural products. Structural steel describes a category of steel used as a construction material to make structural shapes. What are some of these uses, and what are some of the most common structures for which structural steel is used during construction.

COMMON USES OF STRUCTURAL STEEL IN CONSTRUCTION INDUSTRY:

1) *Large, Industrial Buildings:*

Most high-rise buildings you see are designed using some kind of steel due to its low weight and great strength. For buildings under 500 feet, reinforced steel and concrete will generally be used. For skyscrapers over 500 feet, a steel frame is almost always part of the construction. Not only does steel act as one of the strongest possible foundations for these buildings, it’s perfect for construction due to its ease of use. Steel can be fabricated quickly, which allows for much quicker production. Combine that with its durability and relatively low cost compared to similar products, and you have the perfect product for larger projects.

2) Residential Buildings:

For residential buildings constructed using steel, a process called light gauge steel is used to maximize strength. Wooden 2x4s are replaced with steel, turning the building into a stronger and more dependable version of a traditional wooden-framed structure. Virtually any residence can be enhanced using this process.

3) Parking Garages:

For some of the same reasons it's perfect for large buildings, steel is also perfect for parking structures. Low cost, shortened construction time and long-term durability are all attractive factors for a parking garage, as is the light weight and ease of construction steel provides.

4) Bridges

Steel's great strength-to-weight ratio makes it perfect for bridges, and its durability ensures that it can withstand the pressure a bridge undertakes. The Brooklyn Bridge is the oldest suspension bridge in the US at 127 years old, and unsurprisingly it uses mostly steel-wire suspensions.

II) FLAT STEEL PRODUCTS:

Flat steel products consist of sheets and plates. They are rolled from slabs, which are a semifinished steel product. These products are used in a wide range of industries such as automobile, domestic appliances, shipbuilding, and construction.

Different Flat Steel Products

(Source: Industry Journals)

1) **Hot rolled steel:**

Hot rolled (or HR) steel is produced at temperatures in excess of 1,000 degrees Fahrenheit. In this process, the metal is rolled in a hot strip mill. Due to the high temperature used in this process, recrystallization of steel takes place. This means that grains inside the metal deform during the process. Hot rolled steel has lesser strength compared to cold rolled steel. Hot rolled steel is more malleable, which means it can be cast into various shapes. The steel produced through this process generally has a width of 2 to 7 millimeters (or mm).

2) **Cold rolled steel:**

Cold rolled (or CR) steel is produced generally at room temperature. Because the metal is not heated in the process, more pressure is applied through the rolls to give shape to the metal. Cold rolled steel has generally more precise dimensions compared to hot rolled steel because cold rolled steel doesn't melt during the process. Cold rolled steel is priced higher than hot rolled steel. Both these types have distinct uses. Since hot rolled steel sheets have larger dimensions than cold rolled sheets, they are used to form large-sized structures. Because of the steel's malleability and lower cost, hot rolled steel is more widely used in mass applications. These include construction, heavy equipment, and railroads. Cold rolled steel, on the other hand, is a finished version of steel. It is used when a better surface finish is required. Typical applications include automotive bodies.

3) **Coated sheets:**

Coated sheets are a subcategory of cold rolled steel. Coated sheets are coated with aluminum and zinc. This enhances the anticorrosion properties of steel. As discussed previously, since steel is highly corrosive, it is mixed with other elements to enhance its quality.

(Source: <http://marketrealist.com/2014/12/different-steel-types-distinct-end-use>)

4) **Plates:**

Plates are generally made to specific customer specifications. They are used in construction, shipbuilding, and industrial machinery. Plates are available in a wide range of grades and sizes. For use in building construction plate will normally be welded into fabricated sections. Normal plate sizes range from 5mm to 200mm thick, with widths up to 3.5m and lengths up to 18.0m. Plates with a nominal yield strength 275MPa or 355MPa can be supplied in either the as rolled, normalised or normalised rolled condition, and are rolled from continuously-cast slab. Close control of chemical composition is maintained to produce clean steels with consistent strength and toughness properties that meet all relevant national standards and state-of-the-art levellers produce flat plates with controlled residual stress.

Steel plate is commonly used in many different and demanding applications including:

- Construction
- Earthmoving equipment
- Engineering and machinery
- Mining and quarrying
- Offshore oil, gas and pipelines
- Pressure vessels
- Renewable energy
- Ship building.

Total consumption of finished steel grew by 3.4 per cent year-on-year at 6.015 MT during April 2017.

Investments in Steel Industry

Steel industry and its associated mining and metallurgy sectors have seen a number of major investments and developments in the recent past. According to the data released by Department of Industrial Policy and Promotion (DIPP), the Indian metallurgical industries attracted Foreign Direct Investments (FDI) to the tune of US\$ 10.33 billion in the period April 2000–March 2017.

Some of the major investments in the Indian steel industry are as follows:

- Jindal Stainless (Hisar) Limited, India's largest stainless steel producer, has entered into the defence sector by signing an agreement with Defence Research & Development Organisation (DRDO) to manufacture high nitrogen steel (HNS) for armour applications.
- JSW Steel Ltd plans to set up two plants of 10 million metric tonnes each in Odisha and Jharkhand, which would require an estimated investment of Rs 40,000 crore (US\$ 6.21 billion) per plant. The planned investments will double the company's production capacity to 40 million metric tonnes by 2030.
- Tata Steel has signed an agreement to purchase a majority 51 per cent stake in Creative Port Development (CPDPL), which has a concession agreement with the Odisha government to develop a 10 million-tonnes-per-annum (MTPA) Subarnarekha port at Chamukh village in Balasore district of Odisha.
- Arcelor Mittal SA is looking to set up a joint venture (JV) factory in India with state-owned Steel Authority of India Ltd (SAIL), to manufacture high-end steel products which could be used in defence and satellite industries.

Government Initiatives

Some of the other recent government initiatives in this sector are as follows:

- Steel demand is set to rise in the coming period owing to increased public sector spending by the Government of India.
- The Union Cabinet, Government of India has approved the National Steel Policy (NSP) 2017, as it seeks to create a globally competitive steel industry in India. NSP 2017 targets 300 million tonnes (MT) steel-making capacity and 160 kgs per capita steel consumption by 2030.
- Metal Scrap Trade Corporation (MSTC) Limited and the Ministry of Steel have jointly launched an e-platform called 'MSTC Metal Mandi' under the 'Digital India' initiative, which will facilitate sale of finished and semi-finished steel products.
- The Ministry of Steel is facilitating setting up of an industry driven Steel Research and Technology Mission of India (SRTMI) in association with the public and private sector steel companies to spearhead research and development activities in the iron and steel industry at an initial corpus of Rs 200 crore (US\$ 30 million).

Road Ahead

India is expected to overtake Japan to become the world's second largest steel producer soon, and aims to achieve 300 million tones of annual steel production by 2025-30.

India is expected to become the second largest steel producer in the world by 2018, based on increased capacity addition in anticipation of upcoming demand, and the new steel policy that has been approved by the Union Cabinet in May 2017 is expected to boost India's steel production.

Huge scope for growth is offered by India's comparatively low per capita steel consumption and the expected rise in consumption due to increased infrastructure construction and the thriving automobile and railways sectors.

REBAR MARKET:

Market Size

The rebar with major diameters between 8mm and 25mm finds application in buildings, bridges, highways etc. With an estimated demand of around 35 million tonnes for 2015-16, the market is currently dominated by secondary producers with an estimated share of 70 percent. The overall annual demand of steel rebar in India has jumped significantly from 22.04 million tonnes reported in 2012-13. While the secondary producers manufacture rebars through processing of imported steel scrap, the primary producers manufacture it by using iron ore as the raw material.

Thus, along with demand of secondary producers, primary producers also gain momentum in rebar consumption across all consumer sectors. India had produced over 30.2 MT of bars and rods in FY14. Out of which, around 8.5 million tonnes was contributed from primary manufacturers and about 21.5 million tonnes by secondary manufacturers. Indian re-bar industry production had increased by 2.3% in FY14 against FY13. As per an estimate, about 10 MT of additional capacity was planned by Re-bar industry across various regions of India. In this year, some of the secondary manufacturers brands have raised its totaled capacity by 0.64 million tonnes per annum. Chhattisgarh & Maharashtra are the two states that have been eyed as a centre for TMT production.

In these states, many additional capacities have been added at present. However, Kalika TMT and a secondary manufacturer Raipur Alloys & Steels are going to expand its capacities by 0.19 million tonnes per annum and 0.83 million tonnes per annum respectively in near future.

Historical Background

The dominance of cold twisted deformed steel bars (CTD bars) in India since the early 70's of the last century was mainly due to the fact that most civil engineers at that time did not bother to check the vital parameters like yield strength, Ultimate Tensile Strength (UTS), elongation etc. while using CTD bars in reinforced cement concrete (RCC). The industrially developed countries had stopped the use of such CTD Bars by the start of 1970's. Then came the era of Thermo Mechanically Tested (TMT) Bars, which are even now being used by some civil engineers as they believe that these bars are of the specified grade Fe-415 as per 1786/1985 and are superior to the CTD bars which were being used earlier.

However, these so-called TMT Bars available in the market were being used earlier. However, these so-called TMT Bars available in the market were often found on testing to have yield strength of 350-390 N/mm² only. The usage of Reinforced Cement Concrete (RCC) has become the default standards for construction of residential and commercial structures, flyovers, bridges, water retaining structures, industrial and power plants, etc. Rebar constitute about 15-25 percent of the total materials cost for civil construction.

The Rebar industry has been a main steel product among the Finished Steel product categories. In 2009, the rebar accounted for about 35 percent of the total steel production in the country. The construction and infrastructure boom in the country in the past decade contributed to the rapid growth in the industry. The rebar industry is characterized by both primary and secondary players operating in the market. Integrated Steel Producers (ISPs) like SAIL, Tata Steel, JSW, that produce from the pure iron ore account for about 30 percent of the total rebar market.

The remaining 70 percent is catered by about 300-400 producers. Some of the leading secondary producers include Tulsyan, SRMB, Sujana etc. Medium and small players have regional presence catering to the demand in a particular region.

Commoditizing Rebar Markets

Increased competition in the Rebar industry has resulted in the market becoming commoditized. Industry players in the last five years have focused more on marketing and branding of the product. Tata Steel is the pioneer in this aspect as the company has successfully branded its products, thereby, sustaining its leadership. In 2009-10, Tata Steel was also accorded the first Super Brand for this segment. Tata steel achieved a production of 1.56 million tons of TMT rebar becoming the largest TMT rebar manufacturer.

Stiff competition and better market penetration led to the development of value added steel rebars in India. Increased awareness on corrosion-protected and earthquake-resistant rebars and the benefits they offer in terms of longer structural life and lower life cycle cost has prompted developers to include them in their projects. Increased competition in the rebar market has compelled leading producers of rebars to look for branding and product differentiation. The value-added products have been actively promoted by these producers to sustain their leadership in the rebar market.

In recent years, the numbers of coastal projects have increased considerably. Projects such as ports, coastal thermal power stations, coastal buildings for commercial use, desalination plants, etc. are being implemented along the vast coastline of the country (both eastern and western coasts in the country). All these have increased the demand of corrosion-protected rebars.

Hence, Corrosion Resistant Steel (CRS) rebars have the lowest life cycle cost among the existing rebar products available in the market over a structural lifespan of 50 years. For stainless steel, the life span is claimed to be 120 years. The distinct advantages of CRS rebars include corrosion resistance and is improved while retaining the strength, toughness, ductility, and formability, thus increasing the structure lifespan, higher strength means lower tonnage requirement, thus reducing construction costs, CRS is not a coated material so it is unaffected by transport, handling or concrete pouring, so does not require any touch-up work. No extra precaution in handling and storage is required, better performance in the case of natural calamities like earthquake and fire and due to lower carbon equivalent, weldability is far superior compared to conventional rebars.

Fragmented Markets

The Indian steel rebars market is highly fragmented and unorganized – more than 1,800 re-rollers (representing unorganized sector) are reported to be operating in India. Being volume driven business, rebar market is dominated by regional players due to high logistic expenses.

Eastern and western regions have the largest concentration of small re-rolling mills for steel rebars. The branded TMT bars have been introduced by most of the leading players (representing organized sector). The use of rebar grades and products has undergone remarkable changes in recent years. Though the IS: 1786 building codes specify only Fe-415 for reinforced cement concrete, its usage is declining as the market is shifting to higher grades. The construction industry has started adopting newer grades like Fe-500, Fe-550, and Fe-500D. Similarly, on the application side, too, rebar use has been moving toward higher value added products like corrosion resistant steel rebar, epoxy coated rebar, earthquake resistant rebar, galvanized rebar, etc.

Indian rebar markets is scattered into many large regional players serving local customers at either at par or a discount to the national level players. But, their acceptance among consumers is smooth resulting into their high business volumes. Many large and small players have strengthened their presence in regional markets making thereby entry of national level players difficult.

Branding in the Rebar Industry

Increased competition in the Rebar industry has resulted in the market becoming commoditized. Industry players in the last five years have focused more on marketing and branding of the product. Tata Steel is the pioneer in this aspect as the company has successfully branded its products, thereby sustaining its leadership. In 2009-10, Tata Steel was also accorded the first superBrand for this segment. Tata steel achieved a production of 1.56 million tons of TMT rebar becoming the largest TMT rebar manufacturer. Other organized sector players including Jindals and Balmukund have claimed strong presence in rural markets.

Outlook

With increased focus on urbanization, the rebar market is likely to witness a strong growth in coming years. Slow growth was recorded albeit temporarily after a slowdown in India economic growth in the past few years. Demonetisation of high value currency notes in November 2016 worsened the entire construction activity including demand of rebars in India. But, its impact has started subsiding with forecast of strong growth momentum to begin in near future. Global consultancy Frost & Sullivan forecast India’s demand of rebars to hit 41.82 million tonnes by 2020-21 as shown below:

DEMAND FORECAST OF STEEL REBARS	
FINANCIAL YEAR	QUANTITY (MT)
2011-12	21.77
2012-13	22.04
2013-14	23.91
2014-15	25.90
2015-16	28.05
2016-17	30.39
2017-18	32.91
2018-19	35.65
2019-20	38.61

For further details of our Promoters Group and Group Companies, please see “Our Promoter and Promoter Group” and “Group Companies” beginning on page nos. 116 and 120 respectively of this Prospectus.

About our Company

Our Company was incorporated as “Tanya Estates Private Limited” on July 29, 2009 with RoC, Gujarat at Dadra & Nagar Haveli. For details of our change in name as well as past business activities refer “History and Certain Corporate Matters” beginning on page no. 98 respectively of this Prospectus.

Our Company is currently engaged in trading of structural steel products such as Round Bars, Flat Bars etc. and through our wholly owned Subsidiary, SGRM we are proposing to manufacture structural steel products like TMT bars, angles, channels, MS Bars etc. The business model of the company is as explained below:

Our Company plans to leverage its group and promoter networks in the real estate and infrastructure space as well as strong balance sheet situation to increase its presence in the structural steel market of Gujarat and Western India. Our Company has commenced its trading operations in September, 2017. Our Company is in the process of building a structural steel focused trading vertical as well as developing a strong team to cater to its proposed increased operational needs.

Further, our Company has recently acquired 100% stake in Shree Ghantakarna Rolling Mills Pvt. Ltd. (making it its wholly owned Subsidiary Company). Our Subsidiary Company owns a rolling mill having aggregate installed capacity of 12,000 tons; however the same has been non-operational for past 16 years due to internal financial constraints as well as market conditions. Post acquisition we have begun the process of revamping as well as expanding its production facilities and we intend to begin the production in April, 2018 with an aggregate installed capacity of 18,000 tons per annum.

As on November 30, 2017 our Company employs 8 people on its payroll.

Our Strengths

Well educated and experienced management

Our senior management team is well educated and experienced in the trading and manufacturing industry of steel products. Our Promoter Director – Mr. Shalin Shah has completed his Civil Engineering from L.D. Engineering College, Ahmedabad and he has over two decades of experience in multiple industry. We believe that our management team's experience and their understanding of the relevant business cycles will enable us take advantage of both current and future market opportunities. It is also expected to help us on addressing and mitigating various risks inherent in our business, including significant competition, reliance on independent agents, and fluctuations in prices.

Group Synergies

Our Company is part of Gujarat based diversified business group currently promoted by Mr. Shalin Ashok Shah and Family. Our group has business interests in various sectors including Oil and Gas, Steel, Infrastructure, Electronic Equipments and Real Estate. We believe that our interests and networks amongst the real estate and infrastructure space would help us identify sustainable business opportunities in our structural steel business.

Strong Balance Sheet and Financial Condition

We currently possess a unique balance sheet situation with low debt and high equity. Hence, we can procure the goods by making upfront payments and take benefit of cash discount which will improve our profitability. We believe that we have the ability to leverage our balance sheet to take advantage of a favorable business cycle or market opportunity.

Locational advantage of proposed manufacturing unit

Our manufacturing unit (proposed to be made operational through our wholly owned Subsidiary) is located at around 40 kms from Ahmedabad at Industrial area of Kadi near Ahmedabad-Mehsana highway. Both Ahmedabad and Mehsana are big steel markets and thus the location is strategically advantageous. There are many steel industries nearby from where raw materials are easily made available. The location of the project is surrounded by states like Maharashtra, Rajasthan and Madhya Pradesh, which are producing sample quantity of iron and steel raw material. So, the basic raw materials for present as well as proposed products are all indigenously available at short notice and in required quantity and quality. The location of our plant is important for the smooth and economical operation of the industrial unit.

Our Strategies

Improve our fund based capabilities to better exploit market conditions

We have over the last few years begun the process of realigning our asset and liabilities and have recently changed our name and main objects. Our new business venture requires liquidity of funds to monetise the market opportunities in trading of structural steel products. We hence intend to raise funds from the IPO and ensure we have available liquidity and resources. Further we have recently begun the process of revamping as well as expanding its production facilities and we intend to begin its production in April, 2018 with an aggregate installed capacity of 18,000 tons per annum. This plant revamp and expansion is also being part funded from the IPO Proceeds. For details of our fund requirements and proposed utilizations, please see “*Objects of the Issue*” beginning on page 59 of this Prospectus.

Develop relations with a larger pool of market participants

We have begun our trading vertical in September, 2017 itself and hence we have not yet developed a strong client base. Our strategy is to develop long-term relationships with existing and prospective clients by providing quality products in timely manner. We believe in developing relationships that go beyond one-time interaction. We are striving to focus our resources to develop and maintain new clientele as well as sustainable supplier chain.

Invest in technology and make the proposed manufacturing unit strong supply partner for the trading vertical.

Our Subsidiary Company has a rolling mill which has been non-operational for past 16 years. We have recently begun the process of revamping as well as expanding its production facilities and we intend to begin its production in April, 2018 with an aggregate installed capacity of 18,000 tons per annum. This plant revamping and expansion is also being part funded from the IPO Proceeds. For further details of the modernization and investments being made by our Company, please see

“Objects of the Issue” beginning on page 59 of this Prospectus. Once operational our manufacturing unit will be a strong supply partner to the trading vertical.

Focus on Structural Steel segment

Our Group Companies are involved in the trading of various steel products. However, we intend to focus on “structural steel” product market. The global structural steel market size was valued at USD 84.6 billion in 2015 and is projected to grow at a CAGR of 5.5% from 2016 to 2025. Strong recovery of construction industry in developed markets of the U.S., Germany and UK is a key factor driving market growth. India’s finished steel exports rose 102.1 and 2016-17. Total consumption of finished steel grew by 3.4 per cent year-on-year at 6.015 MT during April, 2017. Huge scope for growth is offered by India’s comparatively low per capita steel consumption and the expected rise in consumption due to increased infrastructure construction and the thriving automobile and railways sectors.

We believe that having a focus on this growing segment would provide us a competitive edge compared to other trading companies which deal in all steel products.

Explore possibilities of geographical expansion of operations

We intend to over time expand our business beyond the Gujarat market to the neighboring states of Maharashtra, Rajasthan and Madhya Pradesh. On infusion of additional funds, we intend to capitalize on our industry relations and further expand the reach of our product portfolio in these markets. We expect that systematic geographical expansion, matched with a continued focus on our competitive strengths, would help us in significantly improving our market share and drive growth.

Products and Services

We as well as wholly owned Subsidiary Company primarily deals in a wide array of steel products which are explained below-

Sr. No.	Name of the product	Description
1.	<p>TMT Bars</p> 	<p>TMT bars or Thermo-Mechanically Treated bars are high-strength reinforcement bars having a tough outer core and a soft inner core. TMT bars are one of them most important construction materials that are widely used for building homes, multi-storeyed high rise, bridges, flyovers and other civil engineering structures. This is because TMT bars ensures high strength to the structures and improve their longevity. The properties of TMT bars include super ductility, superior strength, and weld ability. Moreover, TMT bars are earthquake</p>

		resistant. This makes them ideal for use in construction industry.
2.	<p>Angles</p> 	<p>Angle bars are steel bars that are used as support for corners and outer rims that are used for various walls and surfaces. Angle bars are applied to surfaces using drilled fastening methods or through welding. Angle bars are usually L shaped, and when fitted together, can create inside angles and outside angles. These bars are used in order to offer a strengthened cross section or horizontal support to the structures being built. Without steel angle bars and steel reinforcement, a building's foundation will collapse due to the pressure that concrete alone creates. Angle bars are especially useful in protecting edges and corners in order for them to hold their shape.</p>
3.	<p>MS Bars</p> 	<p>Mild steel bars or MS Bars are used for tensile stress of RCC (Reinforced cement concrete) slab beams etc. in reinforced cement concrete work. These steel bars are plain in surface and are round sections of diameter from 6 to 50 mm. These rods are manufactured in long lengths and can be cut quickly and be bent easily without damage. Mild steel is used for remelting, alloying and manufacturing of fabrication of various structures. The Steel generally made of low Carbon and Silicon. The yield strength values are very low for Mild Steel; Therefore it is not used for special purpose of reinforcing and heavy structure manufacturing.</p>
4.	<p>Channels</p> 	<p>Steel channels are used ideally as supports and guide rails. These are roll-formed products. There are certain variations that are available in the channels category, the categorization is mainly on the shape of the channel, the varieties are- J Channels, Hat channels, U channels, Hemmed channels etc. The steel angles are used in construction, appliances, transportation, making signposts, used in wood flooring for athletic purposes, installing and making windows and doors.</p>

Key Processes

Trading vertical business process

The trading business vertical of the company is a B2B model and operates primarily on an agency basis wherein the goods are procured from suppliers on cash or least credit basis and supplied to customers on credit basis. The procurement of goods is carried out on an “order” basis so that there is not much gap between procurement and sales delivery thereby reducing our inventory holding times. Hence, the supply chain of goods in most cases is directly routed to our customer from the suppliers’ locations as per our instructions in order to avoid duplication of logistic costs and overall improvement of margins in the trading cycle.

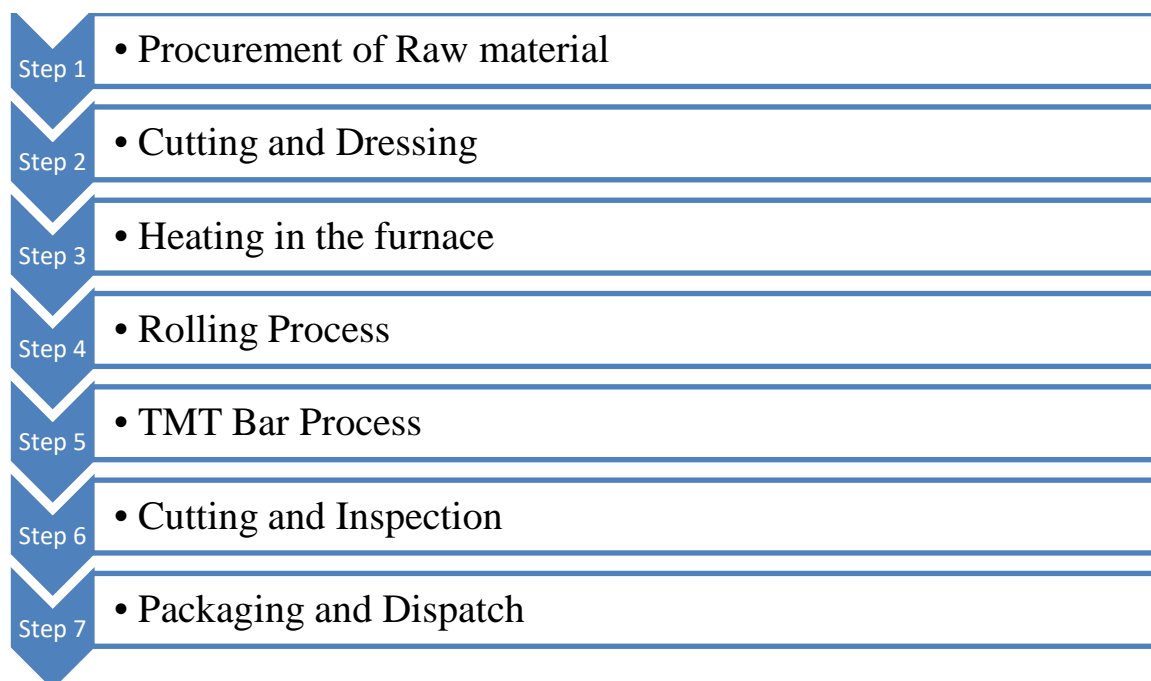

Manufacturing process (wholly owned subsidiary)

We have recently acquired 100% stake in Shree Ghantakarna Rolling Mills Private Limited (making it our wholly owned Subsidiary Company). Our Subsidiary Company owns a rolling mill having aggregate installed capacity of 12000 tons and has been non-operational for past 16 years due to internal financial constraints as well as market conditions. Post acquisition we have begun the process of revamping as well as expanding its production facilities and we intend to begin its production in April, 2018 with aggregate capacity of 18,000 tons per annum.

The Company would manufacture Hot rolled steel long products such as angles, flats, rounds, channels as well as TMT bars/ etc of various sizes.

The proposed manufacturing process of the Company's various products can be divided into following stages: procurement of raw material, cutting of plates, heating of billets, rolling of billets, quality testing, marking and packing and finally dispatching.

The process flow chart for proposed manufacturing of TMT and other long product like angles, channels, rounds, flats, etc is as under:

- ✓ Raw Material Processing: The basic requirement is purchasing of raw materials such as Iron, M.S. Billets / ingots, M.S. Bars, etc for manufacturing of various products. If the raw materials meet the desired specifications then they are safely stored in the Raw Material Yard.
- ✓ Cutting of Plates: Purchased raw materials such as Billets and ingots are cut into plates of required size and weight. Cutting process begins after initial inspection of the raw materials. If it is not cut into fixed size then the output bars do not match with the desired size and therefore they have no value. Hence, market accuracy of the size of the bar is a must. A crane is used to transfer the raw materials after cutting to the furnace.
- ✓ Heating & Rolling Process: Cut plates are then heated till the required temperature in chamber running by lignite coal. The heated furnace warms the temperature of billets and converts them into red hot billets. The billets/blooms are placed on a conveyor belt which leads the billets to the furnace. Hot billets is converted into thick rolls as it is passed through a sequence of rolling machines which uses the tensile strength of steel to convert billets into hot long value added steel products. The rollers are adjusted accordingly for manufacturing of various dimensions of angles, flats, channels, rounds, etc.
- ✓ Cutting, Bending and Dispatching: Once the products are cooled, they are straightened and cut into desired lengths by means of cold shear. Final shape is given to the product by us as per the demand of particular segment. The post production process involves quality testing, tagging and marking. The final product is then packaged and dispatched for selling to the retailer.

9. Income Tax Expense:

a. **Current Tax**

The current charge for income taxes is calculated in accordance with the relevant tax regulations applicable to the Company.

b. Deferred Tax

Deferred Tax or credit reflects the tax effects of timing differences between accounting income & taxable income for the period. The deferred tax charge or credit and the corresponding deferred tax liabilities or assets are recognized using the tax rates that have been enacted or substantially enacted by the balance sheet date. Deferred tax assets are recognized only to the extent there is reasonable certainty that the assets can be realized in future. However, where there is unabsorbed Depreciation or carry forward of losses, deferred tax assets are recognized only if there is a virtual certainty of realization of such assets. Deferred tax assets are revised at each Balance Sheet date & written down or written up to reflect the amount that is reasonably / virtually certain (as case may be) to be realized.

c. Minimum Alternate Tax

Minimum Alternate Tax (MAT) paid in a year is charged to the Statement of Profit and Loss as current tax. The company recognizes MAT credit available as an asset only to the extent there is convincing evidence that the company will pay normal income tax during the specified period, i.e., the period for which MAT Credit is allowed to be carried forward. In the year in which the Company recognizes MAT Credit as an asset in accordance with the Guidance Note on Accounting for Credit Available in respect of Minimum Alternate Tax under the Income Tax Act, 1961, the said asset is created by way of credit to the statement of Profit and Loss and shown as “MAT Credit Entitlement.” The Company reviews the “MAT Credit Entitlement” asset at each reporting date and writes down the asset to the extent the company does not have convincing evidence that it will pay normal tax during the sufficient period.

10. Earnings per share

Basic earnings per share are calculated by dividing the net profit or loss for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year.

For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

11. Provisions, Contingent Liability and Contingent Assets:

A provision is recognized when the Company has a present obligation as a result of past event; it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. Provisions are not discounted to its present value and are determined based on the best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates.

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company. A present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or reliable estimate of the amount cannot be made, is also termed as contingent liability. A contingent asset is neither recognized nor disclosed in the financial statements.

For instance, assume a Price Band of ₹ 20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e. ₹ 22.00 in the above example. The Issuer in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

e) **Alternate Method of Book Building**

In case of FPOs, Issuers may opt for an alternate method of Book Building in which only the Floor Price is specified for the purposes of bidding (“**Alternate Book Building Process**”).

The Issuer may specify the Floor Price in the Prospectus or advertise the Floor Price at least one Working Day prior to the Issue Opening Date. QIBs may Bid at a price higher than the Floor Price and the Allotment to the QIBs is made on a price priority basis. The Bidder with the highest Bid Amount is allotted the number of Equity Shares Bid for and then the second highest Bidder is Allotted Equity Shares and this process continues until all the Equity Shares have been allotted. RIIs, NIIs and Employees are Allotted Equity Shares at the Floor Price and Allotment to these categories of Bidders is made proportionately. If the number of Equity Shares Bid for at a price is more than available quantity then the Allotment may be done on a proportionate basis. Further, the Issuer may place a cap either in terms of number of specified securities or percentage of issued capital of the Issuer that may be Allotted to a single Bidder, decide whether a Bidder be allowed to revise the bid upwards or downwards in terms of price and/or quantity and also decide whether a Bidder be allowed single or multiple bids.

SECTION 6: ISSUE PROCEDURE IN FIXED PRICE ISSUE

Applicants may note that there is no Bid cum Application Form in a Fixed Price Issue. As the Issue Price is mentioned in the Fixed Price Issue therefore on filing of the Prospectus with the RoC, the Application so submitted is considered as the Application Form.

Applicants may only use the specified Application Form for the purpose of making an Application in terms of the Prospectus which may be submitted through the Designated Intermediary.

Applicants may submit an Application Form either in physical form to the any of the Designated Intermediaries or in the electronic form to the SCSB or the Designated Branches of the SCSBs authorising blocking of funds that are available in the bank account specified in the Application Form only (“ASBA Account”). The Application Form is also made available on the websites of the Stock Exchanges at least one day prior to the Bid/Issue Opening Date.

In a fixed price Issue, allocation in the net issue to the public category is made as follows: minimum fifty per cent to Retail Individual Investors; and remaining to (i) individual investors other than Retail Individual Investors; and (ii) other Applicants including corporate bodies or institutions, irrespective of the number of specified securities applied for. The unsubscribed portion in either of the categories specified above may be allocated to the Applicants in the other category.

For details of instructions in relation to the Application Form, Applicants may refer to the relevant section of the GID.

SECTION 7: ALLOTMENT PROCEDURE AND BASIS OF ALLOTMENT

The Allotment of Equity Shares to Applicants other than Retail Individual Investors and Anchor Investors may be on proportionate basis. For Basis of Allotment to Anchor Investors, Applicants may refer to Prospectus. No Retail Individual Investor will be Allotted less than the minimum Bid Lot subject to availability of shares in Retail Individual Investor Category and the remaining available shares, if any will be Allotted on a proportionate basis. The Issuer is required to receive a minimum subscription of 90% of the Issue (excluding any Offer for Sale of specified securities). However, in case the Issue is in the nature of Offer for Sale only, then minimum subscription may not be applicable.

7.1 ALLOTMENT TO RIIs

Bids received from the RIIs at or above the Issue Price may be grouped together to determine the total demand under this category. If the aggregate demand in this category is less than or equal to the Retail Category at or above the Issue Price, full Allotment may be made to the RIIs to the extent of the valid Bids. If the aggregate demand in this category is greater than the allocation to in the Retail Category at or above the Issue Price, then the maximum number of RIIs who can be Allotted the minimum Bid Lot will be computed by dividing the total number of Equity Shares available for Allotment to RIIs by the minimum Bid Lot (“**Maximum RII Allottees**”). The Allotment to the RIIs will then be made in the following manner:

- a) In the event the number of RIIs who have submitted valid Bids in the Issue is equal to or less than Maximum RII Allottees, (i) all such RIIs shall be Allotted the minimum Bid Lot; and (ii) the balance available Equity Shares, if any, remaining in the Retail Category shall be Allotted on a proportionate basis to the RIIs who have received Allotment as per (i) above for the balance demand of the Equity Shares Bid by them (i.e. who have Bid for more than the minimum Bid Lot).
- b) In the event the number of RIIs who have submitted valid Bids in the Issue is more than Maximum RII Allottees, the RIIs (in that category) who will then be Allotted minimum Bid Lot shall be determined on the basis of draw of lots.

7.2 ALLOTMENT TO NIIs

Bids received from NIIs at or above the Issue Price may be grouped together to determine the total demand under this category. The Allotment to all successful NIIs may be made at or above the Issue Price. If the aggregate demand in this category is less than or equal to the Non-Institutional Category at or above the Issue Price, full Allotment may be made to NIIs to the extent of their demand. In case the aggregate demand in this category is greater than the Non-Institutional

Category at or above the Issue Price, Allotment may be made on a proportionate basis up to a minimum of the Non-Institutional Category.

7.3 ALLOTMENT TO QIBs

For the Basis of Allotment to Anchor Investors, Applicants may refer to the SEBI ICDR Regulations, 2009 or Prospectus. Bids received from QIBs Bidding in the QIB Category (net of Anchor Portion) at or above the Issue Price may be grouped together to determine the total demand under this category. The QIB Category may be available for Allotment to QIBs who have Bid at a price that is equal to or greater than the Issue Price. Allotment may be undertaken in the following manner:

- a) In the first instance allocation to Mutual Funds for up to 5% of the QIB Category may be determined as follows: (i) In the event that Bids by Mutual Fund exceeds 5% of the QIB Category, allocation to Mutual Funds may be done on a proportionate basis for up to 5% of the QIB Category; (ii) In the event that the aggregate demand from Mutual Funds is less than 5% of the QIB Category then all Mutual Funds may get full Allotment to the extent of valid Bids received above the Issue Price; and (iii) Equity Shares remaining unsubscribed, if any and not allocated to Mutual Funds may be available for Allotment to all QIBs as set out at paragraph 7.4(b) below;
- b) In the second instance, Allotment to all QIBs may be determined as follows: (i) In the event of oversubscription in the QIB Category, all QIBs who have submitted Bids above the Issue Price may be Allotted Equity Shares on a proportionate basis for up to 95% of the QIB Category; (ii) Mutual Funds, who have received allocation as per (a) above, for less than the number of Equity Shares Bid for by them, are eligible to receive Equity Shares on a proportionate basis along with other QIBs; and (iii) Under-subscription below 5% of the QIB Category, if any, from Mutual Funds, may be included for allocation to the remaining QIBs on a proportionate basis.

7.4 ALLOTMENT TO ANCHOR INVESTOR (IF APPLICABLE)

- a) Allocation of Equity Shares to Anchor Investors at the Anchor Investor Issue Price will be at the discretion of the issuer in consultation with the BRLMs, subject to compliance with the following requirements:
 - 1) not more than 60% of the QIB Category will be allocated to Anchor Investors;
 - 2) one-third of the Anchor Investor Portion shall be reserved for domestic Mutual Funds, subject to valid Bids being received from domestic Mutual Funds at or above the price at which allocation is being done to other Anchor Investors; and

- c) **In the event that the Issue Price is higher than the Anchor Investor Issue Price:** Anchor Investors will be sent a revised CAN within one day of the Pricing Date indicating the number of Equity Shares allocated to such Anchor Investor and the pay-in date for payment of the balance amount. Anchor Investors are then required to pay any additional amounts, being the difference between the Issue Price and the Anchor Investor Issue Price, as indicated in

the revised CAN within the pay-in date referred to in the revised CAN. Thereafter, the Allotment Advice will be issued to such Anchor Investors.

- d) **In the event the Issue Price is lower than the Anchor Investor Issue Price:** Anchor Investors who have been Allotted Equity Shares will directly receive Allotment Advice.

7.5 BASIS OF ALLOTMENT FOR QIBs (OTHER THAN ANCHOR INVESTORS), NIIs AND RESERVED CATEGORY IN CASE OF OVER-SUBSCRIBED ISSUE

In the event of the Issue being over-subscribed, the Issuer may finalise the Basis of Allotment in consultation with the Designated Stock Exchange in accordance with the SEBI ICDR Regulations, 2009.

The allocation may be made in marketable lots, on a proportionate basis as explained below:

- a) Bidders may be categorized according to the number of Equity Shares applied for;
- b) The total number of Equity Shares to be Allotted to each category as a whole may be arrived at on a proportionate basis, which is the total number of Equity Shares applied for in that category (number of Bidders in the category multiplied by the number of Equity Shares applied for) multiplied by the inverse of the over-subscription ratio;
- c) The number of Equity Shares to be Allotted to the successful Bidders may be arrived at on a proportionate basis, which is total number of Equity Shares applied for by each Bidder in that category multiplied by the inverse of the over-subscription ratio;
- d) In all Bids where the proportionate Allotment is less than the minimum Bid Lot decided per Bidder, the Allotment may be made as follows: the successful Bidders out of the total Bidders for a category may be determined by a draw of lots in a manner such that the total number of Equity Shares Allotted in that category is equal to the number of Equity Shares calculated in accordance with (b) above; and each successful Bidder may be Allotted a minimum of such Equity Shares equal to the minimum Bid Lot finalised by the Issuer;
- e) If the proportionate Allotment to a Bidder is a number that is more than the minimum Bid lot but is not a multiple of one (which is the marketable lot), the decimal may be rounded off to the higher whole number if that decimal is 0.5 or higher. If that number is lower than 0.5 it may be rounded off to the lower whole number. Allotment to all Bidders in such categories may be arrived at after such rounding off; and
- f) If the Equity Shares allocated on a proportionate basis to any category are more than the Equity Shares Allotted to the Bidders in that category, the remaining Equity Shares available for Allotment may be first adjusted against any other category, where the Allotted Equity Shares are not sufficient for proportionate Allotment to the successful Bidders in that category. RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are FIPB and the RBI.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”), issued consolidated FDI Policy, which with effect from August 28, 2017 consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on August 27, 2017. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidation FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares by an Indian resident to a Non-Resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011; (ii) the non-resident shareholding is within the sectorial limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI/RBI.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue. The Equity Shares offered in the Issue have not been and will not be registered under the Securities Act, and may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the

Securities Act and applicable U.S. state securities laws. Accordingly, the Equity Shares are being offered and sold (i) within the United States to persons reasonably believed to be “qualified institutional investors” (as defined in Rule 144A under the Securities Act) pursuant to Rule 144A under the Securities Act or other applicable exemption under the Securities Act and (ii) outside the United States in offshore transactions in reliance on Regulation S under the Securities Act and the applicable laws of the jurisdictions where such offers and sales occur.

The above information is given for the benefit of the Applicants. Our Company and the LM are not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of the Prospectus. Applicants are advised to make their independent investigations and ensure that the Applications are not in violation of laws or regulations applicable to them.
