Internal Risk Factors

1. ***There are outstanding legal proceedings involving our Company. Any adverse decision in such proceedings may have a material adverse effect on our business, results of operations and financial condition.***

Our Company is a party to certain legal proceedings. These legal proceedings are pending at different levels of adjudication before various courts, tribunals and forums.

Mentioned below are the details of the proceedings pending against our Company as on the date of this Prospectus along with the amount involved, to the extent ascertainable/quantifiable, based on the materiality policy for litigations, as approved by the Company in its Board meeting held on September 25, 2017:

a. Litigations / Proceedings filed by our Company:

Sr. No.	Nature of Matter	No. of Matters	Amount (to the extent quantifiable) (₹ in lakhs)
1.	Litigation involving Income Tax Liability (AY 2010-2011)	1	20.83

Any developments in the proceedings, such as a change in Indian law or rulings against our Company by appellate courts or tribunals may constrain us to make provisions in our financial statements that could increase our expenses and current liabilities and the same may result in an adverse material impact on our business, goodwill, results of operations and financial condition. For further details, please refer to the chapter titled “*Outstanding Litigations and Material Developments*” beginning on page 183 of this Prospectus.

2. ***We require certain approvals and licenses in the ordinary course of business and are required to comply with certain rules and regulations to operate our business and the failure to obtain, retain and renew such approvals and licences or comply with such rules and regulations and the failure to obtain or retain them in a timely manner or at all may adversely affect our operations.***

We require several statutory and regulatory permits, licenses and approvals to operate our business, some of which our Company has either received, applied for or is in the process of application. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Non-renewal of the said permits and licenses would adversely affect our Company's operations, thereby having a material adverse effect on our business, results of operations and financial condition. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Our Company requires the following statutory and regulatory registrations, licenses, permits and approvals for our business but the same have not been obtained by us, as on date of this Prospectus: (i) License under Food Safety Standards Act, 2006 for manufacture of vitamins, nutraceuticals and similar types of products. We may be penalized for non-compliance with the aforementioned law for which we have not obtained the requisite License. Further, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of the relevant permits, licenses or approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change, we may incur increased costs, be subject to penalties or suffer a disruption in our business activities, any of which could adversely affect our results of operations. For further details, please see chapters titled "*Key Regulations and Policies*" and "*Government and Other Statutory Approvals*" at pages 99 and 189 respectively of this Prospectus.

3. ***Our Company has availed ₹822.48 lakhs as unsecured loan which are repayable on demand out of these loans, ₹771.66 lakhs is proposed to be repaid through the issue proceeds. Any demand from the lenders for repayment of such unsecured loan may affect our cash flow and financial condition.***

Our Company as per the restated audited financial statement as on September 30, 2017 has availed total sum of ₹ 822.48 lakhs as unsecured loan which may be recalled at any time. Unsecured loans of ₹ 771.66 lakhs are proposed to be repaid through issue proceeds.

However, sudden recall of such unsecured loans may disrupt our operations and also may force us to opt for funding at higher interest rates, resulting in higher financial burden. Further, we will not be able to raise funds at short notice and thus result in shortage of working capital fund. For further details, please refer to the heading titled "*Unsecured Loans*" in the Chapter "*Financial Statements*" beginning on page no. 143 of this Prospectus. Any demand for the repayment of such unsecured loan, may adversely affect our cash flow and financial condition.

4. ***Our Company has recently made a voluntary income declaration under section 199C of the Finance Act, 2016 aggregating to ₹ 60.00 Lacs***

Our Company has recently made a voluntary income declaration under section 199C of the Finance Act, 2016 aggregating to ₹ 60.00 Lacs. Based on the same an amount of ₹ 29.94 lacs is the total tax (including penalty and surcharge) which becomes payable.

The same has been paid vide challan dated March 23, 2017. Further, as per the requirements of the scheme we have invested an amount of ₹ 15.00 lacs in Bonds under PMGKDS. Our inability to redeem or monetise such bonds in the future or any other material adverse development due to such disclosure could affect our financial condition.

5. ***Trade receivables form a substantial part of our current assets and net worth. Failure to manage our trade receivables could have an adverse effect on our net sales, profitability, cash flow and liquidity.***

We are in the business of pharmaceutical formulation manufacturing with focus on anti-infective, Beta-Lactams, cephalosporins, antimalarial, antiretroviral, anti-ulcer drugs and antacids, vitamins, haematinics and other supplements. Further in addition to the above, our Company also has manufacturing and marketing capabilities in other drugs such as NSAIDS, antihistaminic, anti-diabetics, cardio vascular drugs, diuretics, anti-epileptics, combination drug kits, syrups and cream & gel for various therapeutic segments. Our Company's business is working capital intensive and hence trade receivables would form a major part of our current assets and net worth.

The results of operations of our business are and will be dependent on our ability to effectively manage our trade receivables.

To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and dealers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. However, if our management fails to accurately evaluate the credit worthiness of our customers, it may lead to bad debts, delays in recoveries and / or write-offs which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. A liquidity crunch may also result in increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability.

6. *We operate in the pharmaceutical industry which is a highly regulated sector and if we fail to comply with the regulations prescribed by the authorities of the jurisdictions in which we operate, our business, results of operations, cash flows and financial condition could be adversely affected.*

Our operations of FDF manufacturing are operated in a highly regulated sector and are subject to extensive regulations and stringent quality standards. We are required to obtain specific registration from the Food and Drug Administration, Maharashtra (FDA) for the sale and manufacture of the Finished Dosage Formulations (FDFs). The registration requires our Company to comply with all provisions of the various acts enforceable by the FDA Maharashtra, most of which are stringent and they may continue to be stricter in the future. The penalties for non-compliance with these regulations can vary from revocation or suspension of the registration to imposition of fines or confiscation of the products manufactured, stored or sold.

Further, we have manufacturing facility in Palghar, Mumbai, where a wide range of formulations are manufactured including tablets, capsules and dry syrups. This facility is well equipped to manufacture variety of products and any new variety of Tablets / Capsule may require additional approvals from the relevant authority. We cannot guarantee that we will obtain such approvals. Also, we may not be able to renew our existing FDA Maharashtra approval upon expiry of the same. Any delay or inability to obtain, renew the FDA Maharashtra approval may render our ability to carry on with our business activities.

Further, we are subject to additional risks in relation to complying with a wide variety of local laws, including restrictions on the import and export of certain chemicals and ingredients. Additionally, regulatory and procedural requirements are subject to change and as a result, may, at times, be unclear or inconsistent. Consequently, there is an increased risk that we may inadvertently fail to comply with such regulations or procedures, which could lead to a variety of sanctions being imposed by the relevant authorities, as well as withholding or delay in receipt of regulatory approvals for the existing as well as proposed FDFs. Further, any adverse change in the regulatory environment in the future may subject us to increased obligations and may adversely affect our business, cash flows and results of operations.

7. *We have incurred substantial indebtedness which exposes us to various risks which may have an adverse effect on our business and results of operations*

As of September 30, 2017, we have outstanding debt of ₹ 1,904.90 lakhs (excluding non-fund based borrowing). Such substantial level of indebtedness has important consequences to us, such as:

- Increasing our vulnerability to general adverse economic, industry and competitive conditions;
- Limiting our flexibility in planning for, or reacting to, changes in our business and the industry;
- Affecting our credit rating;
- Limiting our ability to borrow more money both now and in the future; and
- Increasing our interest expenditure and adversely affecting our profitability, since almost all of our debt bears interest at floating rates.

If any of these risks were to materialise, our business and results of operations may be adversely affected.

8. *The capacity of the manufacturing section of our facility is not fully utilized, consecutively, if there is also any under-utilization of our proposed capacities, this in turn could affect our ability to fully absorb fixed costs and thus may adversely impact our financial performance.*

Being a Pharmaceutical Company which concentrates on value added products, it has been our strategy to develop sales of higher margin items as against bulk low margin business and hence the capacities at our various manufacturing facility have not been fully utilized, the details of which are as follows:

(in million)

Product	Particulars	for the Financial Year		
		2014-15	2015-16	2016-17
Tablets	Installed Capacity (units / month)	100.00	110.00	120.00
	Utilised Capacity (units / month)	80.00	90.00	100.00
	Utilised Capacity (%)	80.00%	81.82%	83.33%
Capsules	Installed Capacity (unit / month)	32.00	36.00	40.00
	Utilised Capacity (units / month)	20.00	23.00	25.00
	Utilised Capacity (%)	62.50%	62.50%	62.50%
Dry Syrup	Installed Capacity (MT / month)	0.65	0.72	0.80
	Utilised Capacity (MT / month)	0.40	0.45	0.50
	Utilised Capacity (%)	61.73%	62.50%	62.50%

Further, we may decide to increase our product portfolio and to enter more geographical areas based on our estimates of market demand and profitability. In the event of non-materialization of our estimates and expected order flow for our existing and / or future products and/or failure of optimum utilization of our capacities, due to factors including adverse economic scenario, change in demand or for any other reason, our capacities may not be fully utilized thereby impairing our ability to fully absorb our fixed cost and may adversely impact our consolidated financial performance.

9. ***Our operations are subject to high working capital requirements. Our inability to maintain sufficient cash flow, credit facilities and other sources of funding, in a timely manner, or at all, to meet requirement of working capital or pay out debts, could adversely affect our operations.***

Our business requires significant amount of working capital. Major Portion of our working capital is utilized towards debtors and inventory. We have been sanctioned working capital limits of ₹ 850.00 lakhs from the existing bankers. Our growing scale and expansion, if any, may result in increase in the quantum of current assets. Our inability to maintain sufficient cash flow, credit facility and other sourcing of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. Further, we have high debtors which may result in a high risk in case of non-payment by these debtors. In the event we are not able to recover our dues from our debtors, we may not be able to maintain our sales level and thus adversely affecting our financial health. If this situation persists, we may not be able to pay our lenders / creditors and we may be forced to go for Corporate Debt Restructuring (CDR) which may result in adversely affecting our operations and future prospects.

10. ***We are subject to risks arising from exchange and/or interest rate fluctuations, which could adversely affect our business, prospects, results of operations and financial condition.***

Our exchange rate risk primarily arises from our foreign currency revenues, costs and foreign currency imports of raw materials. Although our functional currency is, and our accounts are prepared in, Indian Rupees, we transact a significant portion of our business in several other currencies. Approximately 82.30 % of our revenue from operations in fiscal 2017 were derived from exports. Substantially all of our non-Indian sales income is denominated in foreign currencies. Simultaneously, 16.32% of our raw material purchases in fiscal 2017 were procured from imports. The foreign exchange fluctuation, thus, affects both our revenues and expenditures. To this extent, the revenues and expenditures will be higher or lower depending on the depreciation or appreciation of Indian Rupee in foreign currency terms. Foreign Exchange gain / (loss), credited / (debited) to profit and loss Account for the Fiscal 2017 was a net loss of ₹ 15.64 lakhs.

Since we do not engage in any kind of hedge for our foreign currency exposure, we may be affected by fluctuations in the exchange rates between the Indian rupee and other currencies. In the recent past, the Rupee has depreciated significantly when compared to the U.S. dollar and since we transact a significant portion of our business in U.S. dollars, the reported sales in Rupee terms exhibits a growth partly influenced by the depreciating Rupee and there can be no assurance that the growth of our international operations in the future will also benefit from a similar trend. Further, if such depreciation continues in the future it will increase our Rupee cost of imports and costs. We cannot predict the effects of exchange rate fluctuations upon our future operating results because of the variability of currency exposure and the potential volatility of currency exchange rates. Therefore, changes in the exchange rate between the Rupee and the U.S. dollar and other non-Rupee currencies may have an adverse effect on our income which in turn may adversely affect our business, results of operations and financial condition.

11. Our Company has reported certain negative cash flows from its operating activity and investing activity, details of which are given below. Sustained negative cash flow could impact our growth and business.

Our Company had reported certain negative cash flows from our operating activities, investing activities and financing activities in the previous years as per the restated financial statements and the same are summarised as under:

(₹In lakhs)

Particulars	For the year ended March 31,				
	2017	2016	2015	2014	2013
Cash flow from Operating Activities	(305.25)	(372.89)	(31.86)	272.74	205.65
Cash flow from Investing Activities	(314.97)	31.72	(215.20)	(387.50)	(163.24)
Cash flow from Financing Activities	639.07	224.52	295.23	229.03	(45.65)

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If our Company is not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

12. Our pharmaceutical FDFs business could be adversely affected by introduction of alternative pharmaceutical remedies and increase in alternative therapies such as herbal, ayurvedic and homeopathic treatments.

We manufacture and sell pharmaceutical FDFs where we face the risk of any new research and development activity which may affect the popularity and use of the products manufactured by us. The adoption of the products derived through new R&D could have a negative impact on traditional formulations currently in use. For example, through medical R&D, another form of Vitamin may be developed, thus rendering our product range of Vitamin and its derivatives, out-dated or redundant. While the launch and wide commercial use of such an ingredient may take some time, the new ingredient may be more cost – effective and provide better results than existing products and therefore, we cannot be sure how much time we may have to adapt to the new development. The growth and acceptance of such alternative ingredients by formulators, traders and consumers may have an adverse effect on our manufacturing operations which thereby may affect our revenues and financial condition.

Further, with the growing popularity of alternative therapies like herbal, ayurvedic and homeopathic treatments, the use of, our products may have an adverse impact, which are majorly used in allopathic medications. India has witnessed the ayurvedic and homeopathic benefits in many illness, deficiencies, and diseases and has been used since a long time in history. At a point where we intend to increase our focus on manufacturing of existing and new formulations, an inclination towards these alternative therapies may reduce the dependence of the end users at large on formulations and other allopathic medications, which in turn will affect our business and results of operations adversely.

13. Our Promoters plays key role in our functioning and we heavily rely on their knowledge and experience in operating our business and therefore, it is critical for our business that our Promoters remains associated with us. Our success also depends upon the services of our key managerial personnel and our ability to attract and retain key managerial personnel and our inability to attract them may affect our operations.

We benefit from our relationship with our Promoters and our success depends upon the continuing services of our Promoters who has been responsible for the growth of our business and is closely involved in the overall strategy, direction and management of our business. Our Promoters have been actively involved in the day to day operations and management since the incorporation of the Company. Accordingly, our performance is heavily dependent upon the services of our Promoters. If our Promoters are unable or unwilling to continue in their present position, we may not be able to replace them easily or at all. Further, we rely on the continued services and performance of our key executives and senior management for the continued success and smooth functioning of the operations of the Company. If we lose the services of any of our key managerial personnel, we may be unable to locate suitable or qualified replacements, and may incur additional expenses to recruit and train new personnel, which could adversely affect our business operations and affect our ability to continue to manage and expand our business.

Our Promoters, along with the key managerial personnel, have over the years built relations with manufacturers, formulators, customers and other persons who are connected with us. The loss of their services could impair our ability to implement our strategy, and our business, financial condition, results of operations and prospects may be materially and adversely affected.

14. We are dependent on third party service providers for certain portion of our manufacturing process.

Since we do not own in-house syrup bottling machine, we currently get the same done through item rate contract / job work from external parties. Any delay or ad-hoc cancellation in the delivery of ordered products from such service provide could materially affect our business operation and strain relationship with our client to that extent.

15. Our Promoters are interested in other entity which could be a potential conflict of interest in the future.

Our Promoters are partners in Synmed Healthcare which has similar business activities as per its charter and past history. Further, our Company does not have any non-compete or such other agreement / arrangement with our Group Entity. Given the current scenario, there is no material conflict of interest; interest of our Promoters in such entity could be potential conflict of interest for us in the future.

16. Non-availability of certain records which were disposed of in accordance with the provision of Disposal of Records (in the Offices of the Registrars of Companies) Rules, 2003 may have impact on the decision of the external agencies for future fund raising.

The company has disposed of certain records in accordance with the provision of Disposal of Records (in the Offices of the Registrars of Companies) Rules, 2003 including:

- a. Return of allotment (Form 2) prior to April 18, 2007;
- b. Increase in authorized share capital (Form 5) prior to December 02, 2006;
- c. Annual Returns and Balance Sheet prior to 2003-04;
- d. Change in registered office (Form 18) prior to 2007 and
- e. Appointment or cessation of directors (Form 32) prior to 2007

While we believe that these forms and records were duly filed on a timely basis, we may not be able to obtain copies of this document and hence we have placed reliance on other documents, including board and shareholders resolutions for disclosure in this Prospectus.

We cannot assure you that lack of secretarial records would not affect us in the future fund raising or due diligence of external agencies of if any.

17. We have not entered into any long-term agreements with our suppliers for raw materials and accordingly may face disruptions in supply from our current suppliers.

We procure the various raw materials required for the manufacturing of our FDFs from various companies in the domestic and international market. Though we prefer to deal with a fixed set of suppliers with whom we have cordial relationships, there are no fixed suppliers for our raw material purchases and we have not entered into any fixed supply agreement or MOU or any other arrangement with any of our suppliers. We typically transact on an invoice basis for each order. These suppliers have accorded their trust and service based on our long operating history in the industry, our credit worthiness and our goodwill. However, in the absence of written agreements, our suppliers are not bound to supply goods to us and can withdraw their commitments from us at any time. There can be no assurance that there will not be a significant disruption in the supply of raw materials from current sources or in the event of a disruption, that we would be able to locate alternative suppliers of the raw materials of comparable quality on terms acceptable to us, or at all. Identifying a suitable supplier involves a process that requires us to become satisfied with their quality control, consistency, responsiveness and service, financial stability and other ethical practices.

Further, our units are situated in varied locations at Palghar in Maharashtra and many of our suppliers are able to provide us raw materials at competitive rates due to our unit's proximity and savings of freight. In case any of these suppliers discontinue their relationship with us, we may have to procure the raw materials from other locations leading to additional costs on transportation. Also, we cannot assure that our raw material supply will not face disruption due to increased lead time for supply of raw materials leading to either disruption in our manufacturing activity or a complete stopping of the same. Certain raw materials may be of a sensitive nature and their supply may be regulated by various government / regulatory authority. If we are unable to maintain our relationship with our current raw material suppliers it may prove difficult to obtain the same from other regulated players.

Any delay, interruption or increased cost in the supply of raw materials thereof pertaining to our products arising from a lack of long-term contracts could have an adverse effect on our ability to meet customer demand for our products and result in lower revenue from operations both in the short and long term.

18. *Our Company will not receive any proceeds from the Offer for Sale portion.*

This Issue comprises of an offer for sale of 1,50,000 Equity Shares by our Promoter / Promoter Group – Mr. Haresh Mehta, Ms. Rita Mehta, Mr. Harshit Mehta and M/s. Haresh K Mehta HUF. The proceeds from the Offer pertaining to the above sale shares will be paid to the aforesaid persons in proportion of the Equity Shares offered by them in the Offer and we will not receive any proceeds from the Offer. For further details, please refer the chapter titled “*Objects of the Issue*” on page no. 60 of the Prospectus.

19. *We do not own the registered office from which we operate and we do not have any formal agreement with our Promoter for the use of this premise. Any dispute in relation to use of the premises would have a material adverse effect on our business and results of operations.*

The registered office of our company is located at 50 Juhu Supreme Shopping Center, Gulmohar Cross Road No. 9, Juhu Mumbai-400049 Maharashtra which is owned and provided by the Promoter. We have not entered into any formal agreement with our promoter for this premise. However, we do have an oral understanding and we have been using this premise for over a decade. We believe that our relation with our Promoter is cordial as of now, but in absence of the formal agreement, we may be asked to vacate the premises with a shorter notice, which will adversely affect our operations and financial condition. Further, our Company on March 31, 2016 has purchased a corporate premises situated at Hubtown Solaries, N.S. Phadkhe Marg, Opp. Telli Gully, Saiwadi, Andheri East, Mumbai – 400 069, on its own name. For more information, please refer chapter titled “*Business Overview*” on page no. 83 of this Prospectus.

20. *Our Company has not entered into any long-term contracts with any of its customers and we typically operate on the basis of orders. Inability to maintain regular order flow would adversely impact our revenues and profitability.*

Our Company has had long standing business relationships with various customers and has been selling our products to such customers, including overseas customers, for several years. However, we have not entered into any specific contracts with these customers and we cater to them on an order-by-order basis. As a result, our customers can terminate their relationships with us without any notice and, without consequence, which could materially and adversely impact our business. Consequently, our revenue may be subject to variability because of fluctuations in demand for our products. Our Company's customers have no obligation to place order with us and may either cancel, reduce or delay orders. The orders placed by our Company's customers are dependent on factors such as the customer satisfaction with the level of consistency of the products that our Company supplies, fluctuation in demand for FDFs manufactured by our Company and customer's inventory management.

Although we place a strong emphasis on quality, timely delivery of our products and prompt availability of a variety range of FDFs, in the absence of long term contracts, any sudden change in the buying pattern of buyers could adversely affect the business and the profitability of our Company.

21. *Our revenue from sales in the domestic market is limited to few regions. Our growth strategy to expand into new geographic areas in India poses risks. We may not be able to successfully manage some or all of such risks, which may have a material adverse effect on our revenues, profits and financial condition.*

Our manufacturing operation is been geographically concentrated in the State of Maharashtra. Though we have customer relations in various parts outside India, our domestic market is limited to a few regions in India such as Maharashtra, Rajasthan, Jharkhand and Chhattisgarh. Our total domestic and export sales for the financial year 2016-17 amounted to 17.70% and 82.30% of the total sales respectively. Our business is therefore significantly dependent on the general economic condition and activity in the domestic and international market in which we operate along with the Government policies relating to pharmaceutical industry in all these regions, including central, state and local government policies in India. Although investment in the pharmaceutical industry in the areas in which we operate has been encouraged, there can be no assurance that this will continue.

We may expand geographically in the domestic and international market, and may not gain acceptance or be able to take advantage of any expansion opportunities outside our current markets. This may place us at a competitive disadvantage and limit our growth opportunities. We may face additional risks if we undertake operations in other geographic areas in which we do not possess the same level of familiarity as competitors. For example, expanding

our scope by marketing our products in the regulated markets may prove difficult due to the stringent norms and we may have to discontinue our activities in such areas. If we undertake operations in different geographical locations than those currently is; we may be affected by various factors, including but not limited to:

- Adjusting our products to the new geographic area;
- Ascertaining the creditworthiness of the buyer and maintain credit terms with the same;
- Obtaining necessary Government and other approvals in time or at all;
- Failure to realize expected synergies and cost savings;
- Attracting potential customers in a market in which we do not have significant experience; and
- Cost of hiring new employees and absorbing increased costs.

22. *We sell our products in highly competitive markets and our inability to compete effectively may lead to lower market share or reduced operating margins, and adversely affect our results of operations.*

Our Company being engaged in the manufacturing and marketing of pharmaceutical formulation, faces competition from local, domestic as well as international manufacturers and suppliers of FDFs. The products that we sell are of a commodity nature, i.e. there are a large number of players manufacturing same or similar products. Thus, competition in these markets is based primarily on demand and price. As a result, to remain competitive in our market, we must continuously strive to reduce our procurement, transportation and distribution costs, improve our operating efficiencies and secure our materials requirements. If we fail to do so, other manufacturers and suppliers or wholesalers of similar products may be able to sell their products at prices lower than our prices, which would have an adverse effect on our market share and results of operations. Increased consolidation in the pharmaceutical industry means that many of our competitors may benefit from greater economies of scale, including the ability to negotiate preferential prices for products or receive discounted prices for bulk purchases of goods that may not be available to us.

Further, we cannot assure you that our current or potential competitors will not offer products comparable or superior to our products at rates attractive than ours. Failure to match our product quality, consistency and price accordingly might have an adverse effect on our operations and financial results.

23. *Our Company has 10 registered trademarks for our products and labels. Failure or delay in renewing the same in the future may impact the Company's rights to use them.*

The Company has 10 trademarks registered with Registrar of Trademarks under class 5. Any failure to renew registration of the aforesaid trademarks, may impact the Company's right to use them in future. Further, there can be no assurance that third parties may not infringe or copy our trademarks. Our Company may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our trademarks, which may adversely affect our business, financial condition and results of operations. For further details, please refer to the chapter titled 'Government and Other Approvals' on page no. 189 on this Prospectus.

24. *We constantly face a credit risk which may in turn affect our complete buying cycle adversely.*

As a pharmaceutical manufacturing company, our primary competence is the ability to manufacture and market a variety of formulations and also a wide range of FDFs, and hence exploit the benefits of variety, economies of scale and credit shortage in the pharmaceutical trade. Our requirement of working capital is high mainly due to our ability to procure and store sufficient amounts of raw materials, thus relieving our units with disruptions and work stoppages. Once the production process is complete, we are required to give sufficient credit period to our customers in order to maintain our customer relations and competitiveness. Our Debtors turnover period is an average approximately 120 days while our Creditors turnover period ranges in approximately 100 days leading to a considerable working capital gap.

Our aforementioned buying cycle is heavily dependent on timely payments being received from our customers. If there is a default in payment from any of our customers or there is any unforeseeable delay in payment, our working capital cycle will be adversely affected. This may lead to our inability to maintain our inventories and thus lack the competitive advantage against various other manufacturers leading to an adverse effect on our business operations and profitability.

25. *Our cost of production is exposed to fluctuations in the prices of raw materials required for the manufacture FDFs as well as its availability.*

Our company is exposed to fluctuations in the prices of various raw materials like, acetone BP/IP, Fluoxetine hydrochloride USP, Folic acid, gelatine IP/BP, calcium carbonate IP/BP, etc. as well as its availability, particularly as we typically do not enter into any supply agreements with our suppliers and all the above mentioned raw materials are bought by our Company from various suppliers on an order to order basis. The prices of the various raw materials used in our manufacturing process are subject to fluctuations in the prices due to various reasons like increased manufacturing costs of these materials, increase in transportation costs, changes in core prices of minerals as a natural resource, etc. Further, some of the raw materials required in our processes, are manufactured from materials procured from international markets, the price of these goods is also subject to fluctuations in foreign exchange rates. Also, we procure some of the raw materials from international markets and the prices of these raw materials may fluctuate based on exchange rate, customs & duties levied on imports or changes in government policies with respect to these materials or the countries supplying the same. We may be unable to make adequate provisions for the price fluctuations and, consequently, any adverse fluctuations that we have not factored in or provided for may adversely affect the consolidated results of our operations and our consolidated financial conditions.

We also face the risks associated with compensating for or passing on such increase in our cost of production on account of such fluctuations in prices to our customers. Particularly, we face the risk of our competitors being able to sell the products at lower rates than ours due to their economies of scales, if we pass on the increase in the cost of production to our customers through a corresponding increase in the price of our products in order to maintain our historical margins. Upward fluctuations in the prices of the various raw materials may thereby affect our margins and profitability, resulting in a material adverse effect on our overall business, consolidated financial condition and results of operations. For further details of various raw materials required, see “*Our Business*” on page no. 83 of this Prospectus.

26. *There are various negative covenants in the sanction letters issued to us by our lenders, which could put us at a competitive disadvantage and could have an adverse effect on our business, results of operations and financial condition.*

Our sanction letters contain provisions that restrict our ability to do, among other things, any of the following:

- Change or alter capital structure, unless stipulated by the Bank
- Affect any scheme of amalgamation or reconstitution.
- Implement a new scheme of expansion or take up an allied line of business / manufacture.
- Divert the funds raised to Inter Corporate Deposits, Debentures, Stocks & Shares, Real Estate, etc.
- Declare dividends without paying the due instalments, interests etc. to the Bank and without regularizing the Bank Accounts.
- Enlarge the scope of other manufacturing / trading activities.
- Withdraw moneys brought in by promoter / directors / friends and relatives.
- Invest any fund by way of deposits or loans or in share capital.
- Borrow or obtain credit facilities from any other Bank / Institution.

In addition to the restrictions listed above, we are required to maintain certain financial ratios as per our sanction letters. These financial ratios and the restrictive provisions could limit our flexibility to engage in certain business transactions or activities.

Additionally, our loans are secured by our movable, immovable or intangible assets (whether existing or future), goods and work-in-progress (whether existing or future) and by a personal guarantee of our Promoter. Such terms enable the lenders to cancel any outstanding commitments, accelerate the repayment, exercise cross default provisions and enforce their security interests on the occurrence of events of default such as a breach of financial covenants, failure to obtain the proper consents, failure to perfect security as specified and such other covenants that are not cured. It is possible that we may not have sufficient funds upon such an acceleration of our financial obligations to pay the principal amount and interest in full. Further, if we are forced to issue additional equity to the lenders, your ownership interest in our Company will be diluted. It is also possible that future financing agreements may contain similar or more onerous covenants and may also result in higher interest cost.

If any of these events were to occur, our business, results of operations and financial condition may be adversely affected.

- 27. *We may be subject to inspections under the Maharashtra Pollution Control Board, Drugs and Cosmetic Act, 1940 by the Food & Drug Administration Drug Licence at local levels which may result in imposition of penalty on us.***

Inspection proceedings are undertaken at local levels, by the Maharashtra Pollution Control Board (MPCB), for our company's manufacturing facility and by the Food & Drugs Administration under the Drugs and Cosmetic Act, 1940, at regular intervals of pharmaceutical samples that are manufactured and sold by us. We may not receive timely communication regarding the pharmaceutical or chemical sample inspections etc., collected by the inspectors from the various storage and distribution centres like client manufacturing plants, depots, our manufacturing facility and/or storage facilities of our Company. Consequently, we may fail to adhere to the directions of the authorities in a timely manner which may attract penal sanctions affecting our operations and financial condition.

- 28. *We have not made any provisions for decline in value of our Investments***

As on March 31, 2017, we have made investments in Unquoted Equity Instruments aggregating to ₹ 0.17 lakhs, as per Restated Financial Statements. We have not made any provision for the decline in value of these investments and hence as and when these investments are liquidated, we may book losses based on the actual value we can recover for these investments and the same could adversely affect our results of operations.

- 29. *Orders placed by customers may be delayed, modified, cancelled or not fully paid for by our customers, which may have an adverse effect on our business, financial condition and results of operations.***

We may encounter problems in executing the orders in relation to our manufactured products, or executing it on a timely basis. Moreover, factors beyond our control or the control of our customers, including delays or failure to obtain necessary permits, authorizations, permissions and other types of difficulties or obstructions, may result in the postponement in the production process and thus in the delivery of products or cause its cancellation. Further, since we do not execute contracts with our customers, the order could be cancelled or there could be changes in scope and / or scheduled delivery of the products. Accordingly, it is difficult to predict with certainty if, when, and to what extent we may be able to deliver the orders placed. Failure to deliver products on time could lead to customers delaying or refusing to pay the amount, in part or full, which may adversely affect our business.

In addition, even where a delivery proceeds as scheduled, it is possible that the contracting parties may default or otherwise fail to pay amounts owed. While we have not yet experienced any material delay, reduction in scope, cancellation, execution difficulty, delay or default in payment with regard to the orders placed with us, or any material disputes with customers in respect of any of the foregoing, any such adverse event in the future could materially harm our cash flow position and income. Any delay, modification, cancellation of order by our large customers may have material adverse effect on our financial condition and results of operations.

- 30. *We are susceptible to product liability claims that may not be covered by insurance and may subject us to substantial expenditure thereby adversely affecting our reputation and if the claim is successful, could require us to pay substantial amounts.***

We face the risk of loss resulting from, and the adverse publicity associated with, product liability lawsuits, whether or not such claims are valid. We may be subject to claims resulting from our manufacturing defects or negligence in storage, packaging or handling which may lead to the deterioration of the FDFs. Even unsuccessful product liability claims would likely require us to incur substantial expenses on litigation, divert management's time, adversely affect our goodwill and impair the marketability of our FDFs.

We are liable for the quality of the products we manufacture, for the duration of their shelf life. Disputes over non-conformity of the products with prescribed quality standards or specifications including storage specifications are generally referred to independent testing laboratories. If any independent laboratory confirms that the products do not conform to the prescribed or agreed standards and specifications, we may be required to bear the expenses of replacing and testing such products, which could adversely affect our business, results of operations, cash flows and financial condition. Any proved defect in our products could also result in withdrawal of our license for manufacturing, storing and selling the products. Further, our business is dependent on the trust of our customers have in the quality of our products. Any negative publicity regarding our Company, brand, or products or mishaps resulting from the use of our products, or any other unforeseen events could affect our reputation and our results from operations.

Further, we do not have any insurance coverage for product liability and if we are to take the same, it may result in additional expense. From time to time, the pharmaceutical industry has experienced difficulty in obtaining desired product liability insurance coverage.

The risk of product liability suits is also likely to increase as we venture into manufacture of other FDFs at our existing units. If any product liability claim not covered by insurance were sustained against us, it could adversely affect our business, financial condition, results of operations and cash flows.

31. *Our Company has manufacturing facility located in Maharashtra. Any delay in production at, or shutdown of, these facilities may in turn adversely affect our business, financial condition and results of operations.*

Our Company has manufacturing facility in Palghar, Maharashtra. The facility may be subject to operating risks, such as the breakdown or failure of equipment, power supply or processes, performance below expected levels of output, raw material shortage or unsuitability, obsolescence, labour disputes, strikes, lock-outs, non-availability of services of our external contractors, our ability to respond to technological advances and emerging industry and safety standards and practices in the industries we operate and propose to operate on a cost-effective and timely basis, earthquakes and other natural disasters, social unrests, industrial accidents and the need to comply with the directives of relevant government authorities, and any other factors which may or may not be within our control. The occurrence of any of these risks could significantly affect our operating results. Although we take precautions to minimize the risk of any significant operational problems at our facilities, our business, consolidated financial condition, results of operations and the trading price of our Equity Shares may be adversely affected by any disruption of operations at our facilities, including due to any of the factors mentioned above.

32. *Our success largely depends on our ability to attract and retain our Key Managerial Personnel. Any loss of our Key Managerial Personnel could adversely affect our business, operations and financial condition*

Our Company is depending significantly on the expertise, experience and continued efforts of our key managerial personnel. If one or more members of our Key Managerial Personnel are unable or unwilling to continue in his/her present position, it may be difficult to find a replacement, and business might thereby be adversely affected. Our industry requires personnel with specific technical knowledge and experience for our manufacturing facilities.

Competition for Key Managerial Personnel in our industry is intense and it is possible that our Company may not be able to retain existing Key Managerial Personnel or may fail to attract/ retain new employees at equivalent positions in the future. As such, loss of Key Managerial Personnel could adversely affect our business, results of operations and financial condition. For further details on the key managerial personnel of our Company, please refer to the chapter titled "Our Management" beginning on page no. 117 of this Prospectus.

33. *Increased competition may result in decreased demand or lower prices for our range of products FDFs manufactured under our own brands, which could reduce our profitability.*

We face substantial competition from existing and potential competitors who may seek to manufacture the same or similar products as us in the particular area or competitors who are already manufacturing, distributing and selling products which we deal in. None of our registrations are granted exclusively to us and our competitors are free to seek registration for the products for which we hold registrations. In the event that other players obtain registration for the FDFs that we have registered for, it may adversely affect our sales and margin in relation to such products.

Additionally, we compete with existing pharmaceutical manufacturing companies on the basis of portfolio of FDFs products offerings, product traits, including quality consistency, as well as based on price, reputation, and customer service and customer convenience. Some of our competitors may be large multi-national companies that have significantly greater resources and access than those available to us. If we are unable to compete effectively, including in terms of pricing or providing quality products, our market share may decline, which could have a material adverse effect on our results of operations and cash flows.

34. *Our failure to accurately forecast demand or in case of order based procurements, any cancellation of orders or delays in supply of raw materials by suppliers to meet such orders, could result in an unexpected shortfall or surplus in the supply of our products resulting into higher inventory, which could adversely affect our operations and profitability.*

We maintain inventory of raw materials at our units based on existing demand trends to meet a certain unexpected demand and also our production batches are set accordingly. We monitor the inventory levels based on our own projections of future demand. In the past, we have experienced high levels of inventory of ₹ 1,168.50 lakhs as per

the restated financials as at September 30, 2017 to meet the demand. If we are unable to appropriately estimate the demand for our products for any reason, the same could result in surplus of inventory levels or unavailability of the same in high demand situations resulting in below potential sales. Additionally, in case of order based procurements, any cancellation of orders or delay in supply of raw materials by our suppliers to meet such orders, could also result in surplus or shortfall of our products, which could adversely affect our operations. Further, excess stock of raw materials and finished products, subjects us to additional risks related to storage of the same, such as health and safety hazard and environmental damage and theft, which could adversely affect our operations and profitability.

35. *In addition to normal remuneration, other benefits and reimbursement of expenses some of our Directors (including our Promoter) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company*

Some of our Directors (including our Promoter) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company, in addition to normal remuneration or benefits and reimbursement of expenses. We cannot assure you that our Directors or our Key Management Personnel would always exercise their rights as Shareholders to the benefit and best interest of our Company. As a result, our Directors will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. Our Directors may take or block actions with respect to our business, which may conflict with our best interests or the interests of other minority Shareholders, such as actions with respect to future capital raising or acquisitions. We cannot assure you that our Directors will always act to resolve any conflicts of interest in our favour, thereby adversely affecting our business and results of operations and prospects.

36. *Our funding requirements and deployment of the issue proceeds are based on management estimates and have not been independently appraised by any bank or financial institution and actual cost may vary compared with the estimated amount.*

Our funding requirement and deployment of the proceeds of the issue are based on management estimates and our current business plan. The fund requirements and intended use of proceeds have not been appraised by bank or financial institution and are based on our estimates. In view of the highly competitive nature of the industry in which we operate, we may have to revise our management estimates from time to time and, consequently, our funding requirements may also change as a result of various factors which may not be within the control of our management. This may entail rescheduling, revising or cancelling the planned expenditure and fund requirement and increasing or decreasing the working capital limits maintained from time to time at the discretion of our board. In addition, schedule of implementation as described herein are based on management's current expectations and our subject to change due to various factors some of which may not be in our control. The deployment of the funds towards the objects of the issue is entirely at the discretion of the Board of Directors and is not subject to monitoring by external independent agency. However, the deployment of funds is subject to monitoring by our Audit Committee.

37. *We are dependent on third party transportation providers for the delivery of our raw materials to our manufacturing facilities and also for our finished products to various customers. Accordingly, continuing increases in transportation costs or unavailability of transportation services for our products, as well the extent and reliability of Indian infrastructure may have an adverse effect on our business, financial condition, results of operations and prospects.*

We are engaged in the manufacture of various FDFs and have manufacturing facility in the State of Maharashtra. We procure raw materials from our vendors from different states of the country and also import certain raw materials from China. Also, our finished products are sold and delivered to different location within the country and also exported to various countries like various Asian countries, East Africa, South Africa, etc. Most of these raw material and finished products are transported to and from our manufacturing facility by third party transportation providers. Transportation strikes could have an adverse effect on our receipt of goods, raw materials and our ability to deliver our products to our customers. Non-availability of ships, barges, trucks and railway cars could also adversely affect our receipt of goods, raw materials and the delivery of our products.

In addition, transportation costs in India have been steadily increasing over the past several years. While usually the end consumer bears the freight cost, we may not always be able to pass on these costs to our customers. Continuing increases in transportation costs or unavailability of transportation services for our products may have an adverse effect on our business, financial condition, results of operations and prospects.

Further, India's physical infrastructure is less developed than that of many developed nations, and problems with its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our normal business activity, including our supply of goods, raw materials and the delivery of our products to customers by third-party transportation providers. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our business operations, which could have a material adverse effect on our results of operations and financial condition.

38. *Our operations may be adversely affected by work stoppages or increased wage demands by our workforce or any other industrial unrest or dispute*

While we have not experienced any industrial unrest or dispute in any of our manufacturing facility in the past, we cannot be certain that we will not suffer any disruption to our operations due to strikes, work stoppages or increased wage demands in the future. Further, if our work force in any of our units, unionizes in the future, collective bargaining efforts by labour unions may divert our management's attention and result in increased costs. Any shortage of skilled and experienced workers caused by industrial unrest or disputes may adversely affect our business, results of operations and financial condition.

39. *Our inability to manage growth could disrupt our business and reduce profitability*

A principal component of our strategy is to continuously grow by expanding the capacity, size and geographical scope of our businesses. This growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial and internal controls. Continuous expansion increases the challenges involved in financial management, recruitment, training and retaining high quality human resources, preserving our culture, values and entrepreneurial environment, and developing and improving our internal administrative infrastructure. Any inability on our part to manage such growth could disrupt our business prospects, impact our financial condition and adversely affect our results of operations.

40. *If we suffer a large uninsured loss or if we suffer an insured loss that significantly exceeds our insurance coverage, our financial condition and results of operations may be adversely affected.*

Our business, assets and stocks could suffer damage from fire, natural calamities, misappropriation or other causes, resulting in losses, which may not be fully compensated by insurance. While we believe that we maintain insurance coverage in amounts consistent with industry norms, our insurance policies do not cover all risks and are subject to exclusions and deductibles. There can be no assurance that the terms of our insurance policies will be adequate to cover any damage or loss suffered by us or that such coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim.

Further, we are required to renew these insurance policies from time to time and in the event, we fail to renew the insurance policies within the time period prescribed in the respective insurance policies or not obtain at all, we may face significant uninsured losses. If we suffer a large uninsured loss or if any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be adversely affected. For further details of the insurance policies taken by us, please refer the chapter Our Business – Insurances on page no. 83 of this Prospectus.

41. *Changes in technology may render our current technologies obsolete or require us to make substantial capital investments.*

Our industry is continually changing due to technological advances and scientific discoveries characterised by high expenses incurred on R&D. These changes result in the frequent introduction of new products and significant price competition. To meet our customers' needs as well as keep pace with our competitors, we regularly update existing technology and acquire or develop new technology for our pharmaceutical manufacturing activities. If our pharmaceutical technologies, such as our branded generics, formulations and drug delivery systems become obsolete, and we are unable to effectively introduce new products, our business and results of operations could be adversely affected.

Although we strive to keep our technology, facilities and machinery current with the latest international standards, the technologies, facilities and machinery we currently employ may become obsolete and we may not have the

resources to adequately invest in R&D. The cost of implementing new technologies and upgrading our manufacturing facilities as well as R&D would require substantial new capital expenditures and/or write-downs of assets and could adversely affect our business, prospects, results of operations and financial condition.

42. *Our Company's manufacturing activities are labour intensive and depend on availability of skilled and unskilled labourers in large numbers. In case of unavailability of such labourers and / or inability to retain such personnel, our business operations could be affected.*

Our Company has employed 129 employees, which include permanent employees, casual labours, contract labours, trainees / interns and security personnel. Out of the above 113 employees are part of our Palghar Unit, and 16 employees are part of our Registered Office in Mumbai.

Our operations and performance are labour intensive and depends on our ability to identify, attract and retain both skilled and unskilled labour. In case such labour is unavailable or we are unable to identify and retain such labourers our business could be adversely affected. Further, there are instances where we need to hire additional contract labour, either for specialised jobs or during periods of high customer orders. Though we have entered into various agreements for hiring labourers on a contractual basis, we cannot guaranty that we may be able to renew these contracts timely or on favourable terms or at all. Any failure to hire the appropriate labour may impact the operations and impair our client relations.

43. *We are dependent on the success of our research and development and the failure to develop improved products/new drug delivery systems/process improvements could adversely affect our business.*

Our success depends on our ability to improve our existing products, develop new drug delivery systems, process improvements to give time, quality and cost efficiency. Our units have in house Quality Control (QC) and Quality Analysis (QA) laboratories where the raw materials dispensed and the finished products manufactured are tested for various quality parameters laid down by FDA Maharashtra, GMP, WHO and various other governing bodies. We have employed well qualified technicians in our labs and also provide them with regular technology upgrades to keep them abreast with the latest technological change in products, drug delivery systems and process improvements.

We cannot assure you that the investments made by us in QC / QA and R&D will yield satisfactory results in terms of improved products, or will yield any results at all. The development process for improving our existing products and developing new drug delivery systems is lengthy and costly. Despite investments in this area, our research and development efforts may not result in the discovery or successful development of the products. There can be no assurance that the improved product/new drug delivery system will be commercially successful. Further, if our competitors develop processes that may give them first mover advantage we may be unable to retain our customers, which shall adversely affect our revenues and profitability.

44. *Our operations are subject to various employees, health and safety laws and regulations. Our failure to comply with environmental laws and similar regulations in India, including improper handling of raw materials, may result in significant damages and may have an adverse effect our business, financial condition and results of operations.*

Our operations are subject to laws and regulations governing relationships with employees in such areas a minimum wage and maximum working hours, overtime, working conditions, hiring and terminating of employees, contract labour and work permits. Further, our business and prospects are contingent upon, among other things, receipt of all required health and safety permits, and our ability to comply with any conditions specified in such permits and registrations, on a continuous basis. Changes or concessions required by regulatory authorities may involve significant compliance costs and also result in delays, prevent completion of construction or opening of a plant or result in the loss of an existing license, which may adversely affect our business and results of operations.

Further, we are subject to various environmental laws and regulations relating to environmental protection in various locations in India. For example, the discharge or emission of chemicals, dust or other pollutants into the air, soil or water that exceed permitted levels and cause damage may give rise to liabilities towards the government, especially the state pollution control boards and third parties, and may result in expenses to remedy any such discharge or emissions.

Stricter laws and regulations, or stricter interpretation of existing laws and regulations may impose new liabilities or require additional investment in environmental protection equipment, either of which could adversely affect our business, financial condition or results of operation. Our failure to obtain required licenses or renew expired

licenses or to otherwise comply with various regulatory requirements may have a material adverse effect on our financial conditions and results of operations.

RISK FACTORS RELATED TO EQUITY SHARES

45. *Any further issuance of Equity Shares by our Company or sales of Equity Shares by any significant shareholders may adversely affect the trading price of the Equity Shares.*

Any future issuance of Equity Shares by our Company could dilute the investors' shareholding. Any such future issuance of Equity Shares or sales of Equity Shares by any of our significant shareholders may also adversely affect the trading price of the Equity Shares, and could impact our ability to raise capital through an offering of securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares.

46. *There is no existing market for our Equity Shares, and we do not know if one will develop. Our stock price may be highly volatile after the Issue and, as a result, you could lose a significant portion or all of your investment*

There is no guarantee that our Equity Shares will be listed on the Stock Exchanges in a timely manner or at all and any trading closures at the Stock Exchanges may adversely affect the trading price of our Equity Shares. Prior to the Issue, there has not been a public market for the Equity Shares. Further, we cannot predict the extent to which investor interest will lead to the development of an active trading market on the Stock Exchanges or how liquid that market will become. If an active market does not develop, you may experience difficulty selling the Equity Shares that you purchased. The Issue Price is not indicative of prices that will prevail in the open market following the Issue. Consequently, you may not be able to sell your Equity Shares at prices equal to or greater than the Issue Price. The market price of the Equity Shares on the Stock Exchanges may fluctuate after listing as a result of several factors, including the following:

- Volatility in the Indian and other Global Securities Markets;
- The performance of the Indian and Global Economy;
- Risks relating to our business and industry, including those discussed in this Prospectus;
- Strategic actions by us or our competitors;
- Investor perception of the investment opportunity associated with the Equity Shares and our future performance;
- Adverse media reports about us, our shareholders or Group Companies;
- Future sales of the Equity Shares;
- Variations in our quarterly results of operations;
- Differences between our actual financial and operating results and those expected by investors and analysts;
- Our future expansion plans;
- Perceptions about our future performance or the performance of Indian Pharmaceutical companies generally;
- Performance of our competitors in the Indian Pharmaceutical industry and the perception in the market about investments in the Pharmaceutical sector;
- Significant developments in the regulation of the Pharmaceutical industry in our key locations;
- Changes in the estimates of our performance or recommendations by financial analysts;
- Significant developments in India's economic liberalisation and deregulation policies; and
- Significant developments in India's fiscal and environmental regulations. There has been significant volatility in the Indian stock markets in the recent past, and our Equity Share

Price could fluctuate significantly as a result of market volatility. A decrease in the market price of the Equity Shares could cause you to lose some or all of your investment.

47. *There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, the Equity Shares at a particular point in time*

The price of the Equity Shares will be subject to a daily circuit breaker imposed by all stock exchanges in India which does not allow transactions beyond a certain level of volatility in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by the SEBI on Indian stock exchanges. The percentage limit on our circuit breaker is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker from time to time, and may change it without our knowledge. This circuit breaker effectively limits upward and downward movements in the price of the Equity Shares. As a result,

shareholders' ability to sell the Equity Shares, or the price at which they can sell the Equity Shares, may be adversely affected at a particular point in time.

48. *Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows*

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. Our business is working capital as well as capital intensive. We are a fast growing pharmaceutical company with a long term strategy to increase our Formulations exposure which would require us to incur capital expenditure and additional working capital requirement. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations.

EXTERNAL RISK FACTORS

49. *Any change in the government policies vis-à-vis expenditure, subsidies and incentives etc. in pharmaceutical sector could affect their ability to spend on agrochemical products, thereby affecting our business and profitability.*

Any changes in government policies relating to the pharmaceutical sector such as reduction of government expenditure, withdrawal or changes in incentives and subsidy systems, pricing restriction on formulations, or adverse changes in chemical prices and/or minimum support prices could have an adverse effect on the ability of consumers to spend on pharmacy products.

Our ability to freely set prices for APIs and FDFs may be restricted by the government and our profits may reduce. End users of our products may seek to find ways to reduce or contain related costs. We currently sell our products across various states in India and also in the export market. We cannot predict the nature of the measures that may be adopted by local, state and central governments or governments of our export countries or private organisations or their impact on our revenues. In the event such measures result in increased costs for manufacturers to undertake API or FDF production, their demand for our products may reduce, which could reduce our cash flows. Also, if pharmaceutical related legislation or third party payer influence results in lower prices for our products, our overall revenues may decrease and our cash flows and profits could be adversely affected even in cases where the demand for formulations and generic active ingredients increases.

50. *The Companies Act, 2013 has effected significant changes to the existing Indian company law framework, which may subject us to higher compliance requirements and increase our compliance costs*

A majority of the provisions and rules under the Companies Act, 2013 have recently been notified and have come into effect from the date of their respective notification, resulting in the corresponding provisions of the Companies Act, 1956 ceasing to have effect. The Companies Act, 2013 has brought into effect significant changes to the Indian company law framework, such as in the provisions related to issue of capital, disclosures in prospectus, corporate governance norms, audit matters, related party transactions, introduction of a provision allowing the initiation of class action suits in India against companies by shareholders or depositors, a restriction on investment by an Indian company through more than two layers of subsidiary investment companies (subject to certain permitted exceptions), prohibitions on loans to directors and insider trading and restrictions on directors and key managerial personnel from engaging in forward dealing. Further, companies meeting certain financial thresholds are also required to constitute a committee of the board of directors for corporate social responsibility activities and ensure that at least 2% of the average net profits of the company during three immediately preceding financial years are utilized for corporate social responsibility activities. Penalties for instances of non-compliance have been prescribed under the Companies Act, 2013, which may result in inter alia, our Company, Directors and key managerial employees being subject to such penalties and formal actions as prescribed under the Companies Act, 2013, should we not be able to comply with the provisions of the New Companies Act within the prescribed timelines, and this could also affect our reputation.

To ensure compliance with the requirements of the Companies Act, 2013 within the prescribed timelines, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention. While we shall endeavour to comply with the prescribed framework and procedures, we may not be in a position to do so in a timely manner.

The Companies Act, 2013 introduced certain additional requirements which do not have corresponding equivalents under the Companies Act, 1956. Accordingly, we may face challenges in interpreting and complying with such

provisions due to limited jurisprudence on them. In the event, our interpretation of such provisions of the Companies Act, 2013 differs from, or contradicts with, any judicial pronouncements or clarifications issued by the Government in the future, we may face regulatory actions or we may be required to undertake remedial steps. Additionally, some of the provisions of the Companies Act, 2013 overlap with other existing laws and regulations (such as the corporate governance norms and insider trading regulations). We may face difficulties in complying with any such overlapping requirements. Further, we cannot currently determine the impact of provisions of the Companies Act, 2013, which are yet to come in force. Any increase in our compliance requirements or in our compliance costs may have an adverse effect on our business and results of operations.

51. *Any changes in the regulatory framework could adversely affect our operations and growth prospects*

Our Company is subject to various regulations and policies. For details see section titled “*Key Industry Regulations and Policies*” beginning on page no. 99 of this Prospectus. Our business and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse effect on our business, financial condition and results of operations.

52. *Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance*

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

53. *Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect the financial markets and our business.*

Terrorist attacks and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, impede travel and other services and ultimately adversely affect our business. In addition, any deterioration in relations between India and Pakistan might result in investor concern about stability in the region, which could adversely affect the price of our Equity Shares.

India has also witnessed civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic and political events in India could have a negative impact on the value of share prices generally as well as the price of our Equity Shares. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the price of our Equity Shares.

54. *Instability in financial markets could materially and adversely affect our results of operations and financial condition.*

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors’ reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets.

The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE’s benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

55. Any downgrading of India's debt rating by a domestic or international rating agency could adversely affect our Company's business

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our Company's ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could harm our Company's business and financial performance and ability to obtain financing for capital expenditures.

56. Conditions in the Indian securities market and stock exchanges may affect the price and liquidity of our Equity Shares.

Indian stock exchanges, which are smaller and more volatile than stock markets in developed economies, have in the past, experienced problems which have affected the prices and liquidity of listed securities of Indian companies. These problems include temporary exchange closures to manage extreme market volatility, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading, limited price movements and restricted margin requirements. Further, disputes have occurred on occasion between listed companies and the Indian stock exchanges and other regulatory bodies that, in some cases, have had a negative effect on market sentiment. If similar problems occur in the future, the market price and liquidity of the Equity Shares could be adversely affected. Further, a closure of, or trading stoppage on, either of the Stock Exchanges could adversely affect the trading price of our Equity Shares.

57. Significant differences exist between Indian GAAP and other accounting principles, such as US GAAP and IFRS, which may be material to investors' assessments of our Company's financial condition. Our failure to successfully adopt IFRS may have an adverse effect on the price of our Equity Shares. The proposed adoption of IFRS could result in our financial condition and results of operations appearing materially different than under Indian GAAP.

Our financial statements, including the financial statements provided in this Prospectus, are prepared in accordance with Indian GAAP. We have not attempted to quantify the impact of IFRS or U.S. GAAP on the financial data included in this Prospectus, nor do we provide a reconciliation of our financial statements to those of U.S. GAAP or IFRS. U.S. GAAP and IFRS differ in significant respects from Indian GAAP. For details, see "*Presentation of Financial, Industry and Market Data*" on page no. 7 of this Prospectus. Accordingly, the degree to which the Indian GAAP financial statements included in this Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Prospectus should accordingly be limited.

India has decided to adopt the "Convergence of its existing standards with IFRS" and not the "International Financial Reporting Standards" ("IFRS"), which was announced by the MCA, through the press note dated January 22, 2010. These "IFRS based / synchronized Accounting Standards" are referred to in India as IND (AS). Public companies in India, including our Company, may be required to prepare annual and interim financial statements under IND (AS). The MCA, through a press release dated February 25, 2011, announced that it will implement the converged accounting standards in a phased manner after various issues, including tax related issues, are resolved. Further, the Finance Minister, during the Budget speech, 2014, proposed the adoption of IND (AS) by Indian companies from fiscal 2016 on a voluntary basis, and from fiscal 2017 on a mandatory basis. Accordingly, it is not possible to quantify whether our financial results will vary significantly due to the convergence to IND (AS), given that the accounting principles laid down in the IND (AS) are to be applied to transactions and balances carried in books of accounts as on the date of the applicability of the converged standards (i.e., IND (AS)) and for future periods.

Further, we have made no attempt to quantify or identify the impact of the differences between Indian GAAP and IFRS or to quantify the impact of the difference between Indian GAAP and IFRS as applied to its financial statements. There can be no assurance that the adoption of IND-AS will not affect our reported results of operations or financial condition. Any failure to successfully adopt IND-AS may have an adverse effect on the trading price of our Equity Shares.

Moreover, our transition to IFRS reporting may be hampered by increasing competition and increased costs for the relatively small number of IFRS-experienced accounting personnel available as more Indian companies begin to prepare IFRS financial statements. Any of these factors relating to the use of IFRS-converged Indian Accounting Standards may adversely affect our financial condition.

SECTION III: INTRODUCTION

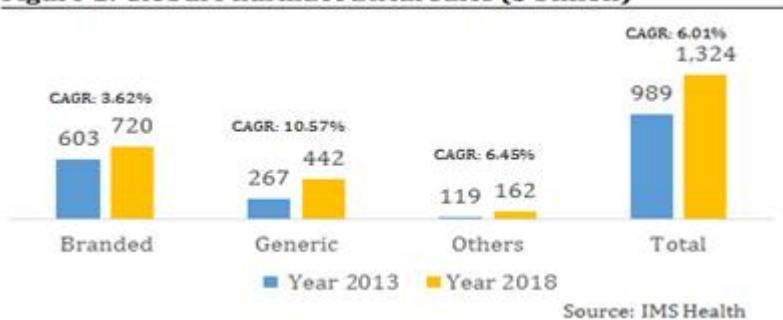

SUMMARY OF INDUSTRY

PHARMACEUTICAL INDUSTRY

GLOBAL SCENARIO

The life sciences sector's growth correlates highly with countries' general economic strength and health care spending levels, and both of these vary widely around the globe. The Economist Intelligence Unit (EIU) reports that health care spending in the 60 countries that it covers rose by 2.6 percent in nominal U.S. dollar terms in 2014 but that spending is forecasted to dip in 2015, reflecting the current weakness of the euro and other currencies against the U.S. dollar and while spending growth is expected to pick up beginning in 2016, the pressure to reduce costs, increase efficiency, and prove value remains intense. Because of these contradictory trends, global health care spending is expected to increase by only an average of 4.3 percent in 2015-2019, more slowly than it did before the 2009 recession. Spending as a percentage of GDP is also expected to decline, from around 10.3 percent in 2014 to 10.1 percent in 2019. Per head health spending is projected to increase from \$1,145 in 2014 to \$1,412 in 2019. However, spending levels will vary greatly among developed and developing countries, ranging from \$11,038 in the United States to just \$58 in Pakistan.

GLOBAL SPENDING ON MEDICINES

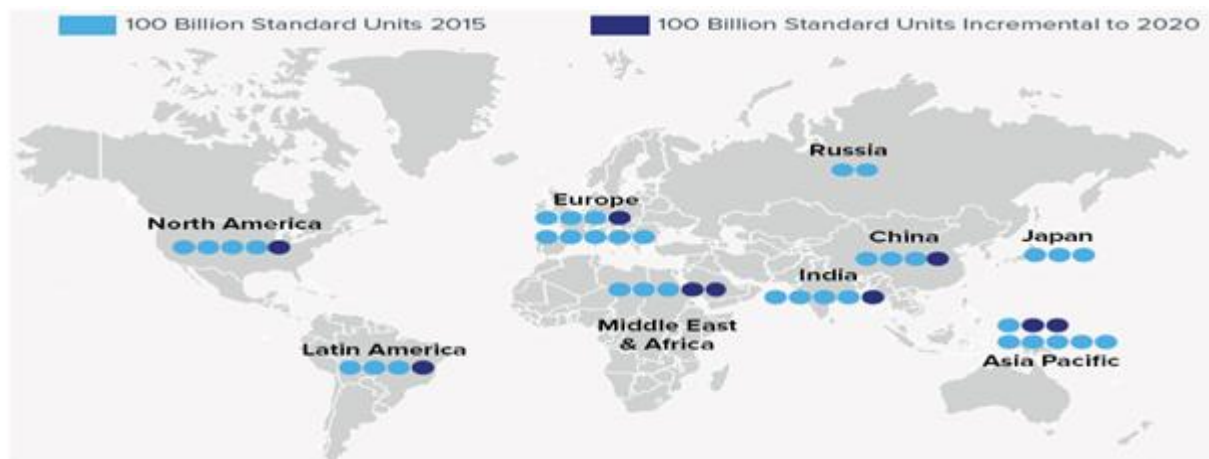

Global spending on medicines will reach \$1.4 trillion by 2020, an increase of 29-32% from 2015 compared to an increase of 35% in the prior 5 years. Spending will be concentrated in developed markets, with more than half for original brands and focused on non-communicable diseases. Specialty therapies will continue to be more significant in developed markets than in pharmling markets and different traditional medicines will be used in developed markets compared to pharmling markets. Spending growth will be driven by brands in developed markets and increased usage in pharmling markets, while being offset by patent expires. Using actual and forecast exchange rates, the absolute global spend for pharmaceuticals will change by \$349 billion in the 2016-2020 time period compared to \$182 billion in the 2010- 2015 period. The last five years had a \$100 billion reduction of growth due to currency effects, while the next five years will be lifted by \$26 billion by the weakening of the dollar against global currencies.

(Source: Global Medicines Use in 2020- Outlook and Implications)

Total use of medicines in 2020 will reach 4.5 trillion doses, up 24% from 2015 levels. Over half of the world's population will consume more than 1 dose per person per day of medicines, up from one third in 2005 and driven by India, China, Brazil and Indonesia. Success in closing the gap in per capita use of medicines differs by country; increased usage is primarily in emerging markets, while developed markets' volumes remain more stable.

INDIAN SCENARIO

The Indian pharmaceutical market is highly competitive and remains dominated by low priced, domestically-produced generics. In value terms, India accounts for less than 2% of the world market and per capita expenditure on pharmaceuticals is relatively low. India has an established domestic pharmaceutical industry, responsible for around 8% of world pharmaceutical production. The industry is export-oriented and the larger domestic companies are competing in the global market for both generics and original products. The highly skilled domestic workforce offers good opportunities for outsourcing both research and production. However, on the basis of organizational perspective the most prominent performance related issues are:

1. Increased competition and unethical practices adopted by some of the propaganda base companies.
2. Low level of customer knowledge (Doctors, Retailers, Wholesalers).
3. Poor customer (both external & internal) acquisition, development and retention strategies
4. Varying customer perception.
5. The number and the quality of medical representatives.
6. Very high territory development costs.
7. High training and re-training costs of sales personnel.
8. Very high attrition rate of the sales personnel.
9. Busy doctors giving less time for sales calls.
10. Poor territory knowledge in terms of business value at medical representative level .
11. Unclear value of prescription from each doctor in the list of each sales person.
12. Unknown value of revenue from each retailer in the territory.
13. Absence of ideal mechanism of sales forecasting from field sales level, leading to huge deviations.
14. Absence of analysis on the amount of time invested on profitable and not-so profitable customers and lack of time-share planning towards developing.
15. Customer base for future and un-tapped markets.

THE INDIAN PHARMACEUTICAL INDUSTRY

Indian pharmaceutical sector accounts for about 2.4 per cent of the global pharmaceutical industry in value terms and 10 per cent in volume terms and is expected to expand at a Compound Annual Growth Rate (CAGR) of 15.92 per cent to US\$ 55 billion by 2020 from US\$ 20 billion in 2015.

With 71 per cent market share, generic drugs form the largest segment of the Indian pharmaceutical sector. By 2016, India is expected to be the third-largest global generic Active Pharmaceutical Ingredient (API) merchant market. The country accounts for the second largest number of Abbreviated New Drug Applications (ANDAs) and is the world's leader in Drug Master Files (DMFs) applications with the US.

Indian drugs are exported to more than 200 countries in the world, with the US as the key market. Generic drugs account for 20 per cent of global exports in terms of volume, making the country the largest provider of generic medicines globally and expected to expand even further in coming years. Pharmaceuticals Exports Promotion Council (Pharmexcil) expects pharmaceutical exports to reach US\$ 25 billion in 2015.

The Government of India plans to set up a US\$ 640 million venture capital fund to boost drug discovery and strengthen pharmaceutical infrastructure. The 'Pharma Vision 2020' by the government's Department of Pharmaceuticals aims to make India a major hub for end-to-end drug discovery.

MARKET SIZE

The Indian pharma industry, which is expected to grow over 15 per cent per annum between 2015 and 2020, will outperform the global pharma industry, which is set to grow at an annual rate of 5 per cent between the same period. The market is expected to grow to US\$ 55 billion by 2020, thereby emerging as the sixth largest pharmaceutical market globally by absolute size, as stated by Mr. Arun Singh, Indian Ambassador to the US. Branded generics dominate the pharmaceuticals market, constituting nearly 80 per cent of the market share (in terms of revenues).

India has also maintained its lead over China in pharmaceutical exports with a year-on-year growth of 11.44 per cent to US\$ 12.91 billion in FY 2015-16, according to data from the Ministry of Commerce and Industry. Imports of pharmaceutical products rose marginally by 0.80 per cent year-on-year to US\$ 1,641.15 million. Overall drug approvals given by the US Food and Drug Administration (USFDA) to Indian companies have nearly doubled to 201 in FY 2015-16 from 109 in FY 2014-15. The country accounts for around 30 per cent (by volume) and about 10 per cent (value) in the US\$ 70-80 billion US generics market.

India's biotechnology industry comprising bio-pharmaceuticals, bio-services, bio-agriculture, bio-industry and bioinformatics is expected to grow at an average growth rate of around 30 per cent a year and reach US\$ 100 billion by 2025. Bio-pharma, comprising vaccines, therapeutics and diagnostics, is the largest sub-sector contributing nearly 62 per cent of the total revenues at Rs 12,600 crore (US\$ 1.88 billion).

Our increased R&D effort will be aimed at pre formulation studies, prototype development, scale-up and process optimization.

OVERVIEW OF THE GLOBAL AND INDIAN ECONOMY

Global Scenario

The US economy bounced back strongly in Q3:2016, underpinned by robust consumer spending and continuing improvement in the labour market. GDP growth decelerated sharply in Q4:2016 due to a large slippage in net exports, even though retail sales, consumer confidence and the purchasing manufacturers' index (PMI) suggested sustained momentum. Domestic demand grew (q-o-q) at the fastest pace in almost two years. Consumer confidence reached a 16-year high in March, though retail sales had slowed down in February. The Institute for Supply Management's (ISM) index suggested manufacturing expanded at its fastest pace in three years in February.

In the Euro area, GDP growth accelerated in H2:2016. Relatively low oil prices and sustained employment gains have provided support to household incomes. Improving consumer confidence and the PMI, which rose to a six-year high in March, indicate that activity continued to expand in Q1:2017. Nonetheless, the region remains vulnerable to a number of headwinds such as the formal beginning of the Brexit process, upcoming elections in several constituent countries and tightening of financial conditions.

The Japanese economy continued to recover at a modest pace even as the momentum weakened in H2:2016. Increases in private consumption and fixed investment were moderate, although there was some uptick in exports and industrial production towards end-2016. The manufacturing PMI improved during January and February but moderated again in March 2017. In the UK, economic growth gained momentum in H2: 2016, notwithstanding the uncertainties surrounding the negotiations relating to Brexit, as exports rose substantially following the weakening of the pound. However, manufacturing growth weakened for two consecutive months in February, indicating the possibility of a slowdown in 2017. (Source: Monetary Policy Report, issued by RBI in April, 2017)

Indian Scenario

India has emerged as the fastest growing major economy in the world as per the Central Statistics Organisation (CSO) and International Monetary Fund (IMF). As per the Economic Survey 2016-17, the Indian economy should grow between 6.75 and 7.5 per cent in FY 2017-18. The improvement in India's economic fundamentals has accelerated in the year 2015 with the combined impact of strong government reforms, Reserve Bank of India's (RBI) inflation focus supported by benign global commodity prices.

India's consumer confidence index stood at 136 in the fourth quarter of 2016, topping the global list of countries on the same parameter, as a result of strong consumer sentiment, according to market research agency, Nielsen. Moody's has affirmed the Government of India's BAA3 rating with a positive outlook stating that the reforms by the government will enable the country perform better compared to its peers over the medium term.

The tax collection figures between April 2016 and January 2017 show an increase in Net Indirect taxes by 16.9 per cent and an increase in Net Direct Taxes by 10.79 per cent year-on-year, indicating a steady trend of healthy growth. The total number of e-filed Income Tax Returns rose 21 per cent year-on-year to 42.1 million in 2016-17 (till 28.02.17), whereas the number of e-returns processed during the same period stood at 43 million. Corporate earnings in India are expected to grow by over 20 per cent in FY 2017-18 supported by normalisation of profits, especially in sectors like automobiles and banks, while GDP is expected to grow by 7.5 per cent during the same period, according to Bloomberg consensus.

India has retained its position as the third largest start-up base in the world with over 4,750 technology start-ups, with about 1,400 new start-ups being founded in 2016, according to a report by NASSCOM. India's labour force is expected to touch 160-170 million by 2020, based on rate of population growth, increased labour force participation, and higher education enrolment, among other factors, according to a study by ASSOCHAM and Thought Arbitrage Research Institute (TARI). India's foreign exchange reserves stood at US\$ 366.781 billion as on March 17, 2017 as compared to US\$ 360 billion by end of March 2016, according to data from the RBI.

With the improvement in the economic scenario, there have been various investments leading to increased M&A activity. M&A activity in India more than doubled year-on-year to reach US\$ 61.26 billion in 2016-17. Early-stage start-ups in India are expected to raise US\$ 800 million in 2017, due to greater focus on profitability and sustainable growth, as per a report by InnoVen Capital.

India is expected to be the third largest consumer economy as its consumption may triple to US\$ 4 trillion by 2025, owing to shift in consumer behaviour and expenditure pattern, according to a Boston Consulting Group (BCG) report; and is estimated to surpass USA to become the second largest economy in terms of purchasing power parity (PPP) by the year 2040, according to a report by PricewaterhouseCoopers. Also, the Prime Minister, Mr Narendra Modi has stated that India has become the world's fastest growing large economy, and is expected to grow five-fold by 2040, owing to a series of policy measures.

PHARMACEUTICAL INDUSTRY

GLOBALSCENARIO

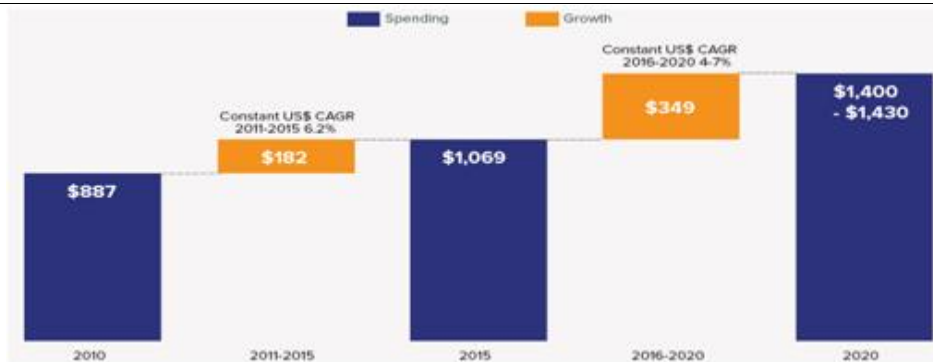

The life sciences sector's growth correlates highly with countries' general economic strength and health care spending levels, and both of these vary widely around the globe. The Economist Intelligence Unit (EIU) reports that health care spending in the 60 countries that it covers rose by 2.6 percent in nominal U.S. dollar terms in 2014 but that spending is forecasted to dip in 2015, reflecting the current weakness of the euro and other currencies against the U.S. dollar and while spending growth is expected to pick up beginning in 2016, the pressure to reduce costs, increase efficiency, and prove value remains intense. Because of these contradictory trends, global health care spending is expected to increase by only an average of 4.3 percent in 2015-2019, more slowly than it did before the 2009 recession. Spending as a percentage of GDP is also expected to decline, from around 10.3 percent in 2014 to 10.1 percent in 2019. Per head health spending is projected to increase from \$1,145 in 2014 to \$1,412 in 2019. However, spending levels will vary greatly among developed and developing countries, ranging from \$11,038 in the United States to just \$58 in Pakistan.

GLOBAL SPENDING ON MEDICINES

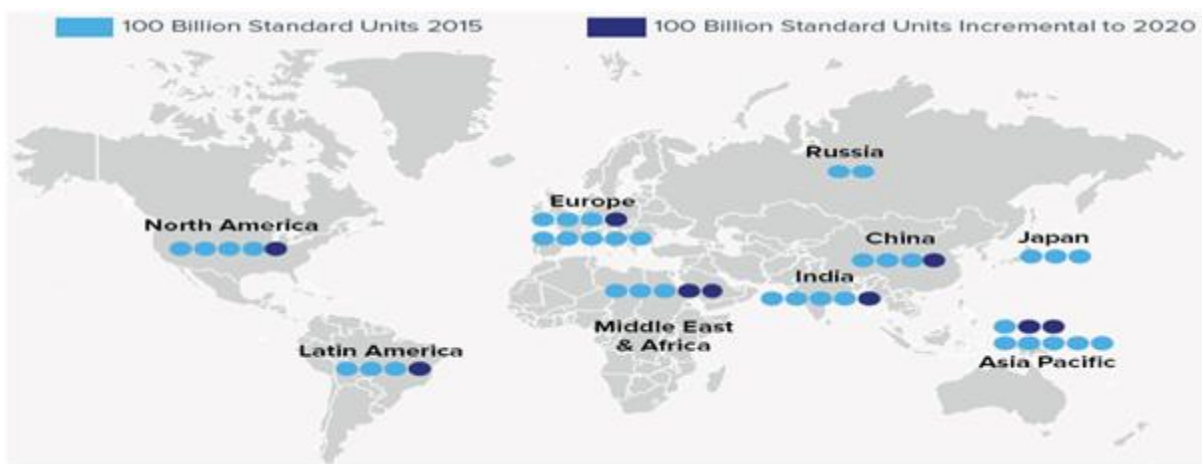

Global spending on medicines will reach \$1.4 trillion by 2020, an increase of 29-32% from 2015 compared to an increase of 35% in the prior 5 years. Spending will be concentrated in developed markets, with more than half for original brands and focused on non-communicable diseases. Specialty therapies will continue to be more significant in developed markets than in pharmrging markets and different traditional medicines will be used in developed markets compared to pharmrging markets. Spending growth will be driven by brands in developed markets and increased usage in pharmrging markets, while being offset by patent expires. Using actual and forecast exchange rates, the absolute global spend for pharmaceuticals will change by \$349 billion in the 2016-2020 time period compared to \$182 billion in the 2010- 2015 period. The last five years had a \$100 billion reduction of growth due to currency effects, while the next five years will be lifted by \$26 billion by the weakening of the dollar against global currencies.

(Source: Global Medicines Use in 2020- Outlook and Implications)

Total use of medicines in 2020 will reach 4.5 trillion doses, up 24% from 2015 levels. Over half of the world’s population will consume more than 1 dose per person per day of medicines, up from one third in 2005 and driven by India, China, Brazil and Indonesia. Success in closing the gap in per capita use of medicines differs by country; increased usage is primarily in emerging markets, while developed markets’ volumes remain more stable.

INDIAN SCENARIO

The Indian pharmaceutical market is highly competitive and remains dominated by low priced, domestically-produced generics. In value terms, India accounts for less than 2% of the world market and per capita expenditure on pharmaceuticals is relatively low. India has an established domestic pharmaceutical industry, responsible for around 8% of world pharmaceutical production. The industry is export-oriented and the larger domestic companies are competing in the global market for both generics and original products. The highly skilled domestic workforce offers good opportunities for outsourcing both research and production. However, on the basis of organizational perspective the most prominent performance related issues are:

1. Increased competition and unethical practices adopted by some of the propaganda base companies.
2. Low level of customer knowledge (Doctors, Retailers, Wholesalers).
3. Poor customer (both external & internal) acquisition, development and retention strategies
4. Varying customer perception.
5. The number and the quality of medical representatives.
6. Very high territory development costs.
7. High training and re-training costs of sales personnel.
8. Very high attrition rate of the sales personnel.
9. Busy doctors giving less time for sales calls.
10. Poor territory knowledge in terms of business value at medical representative level .
11. Unclear value of prescription from each doctor in the list of each sales person.
12. Unknown value of revenue from each retailer in the territory.
13. Absence of ideal mechanism of sales forecasting from field sales level, leading to huge deviations.
14. Absence of analysis on the amount of time invested on profitable and not-so profitable customers and lack of time-share planning towards developing.
15. Customer base for future and un-tapped markets.

THE INDIAN PHARMACEUTICAL INDUSTRY

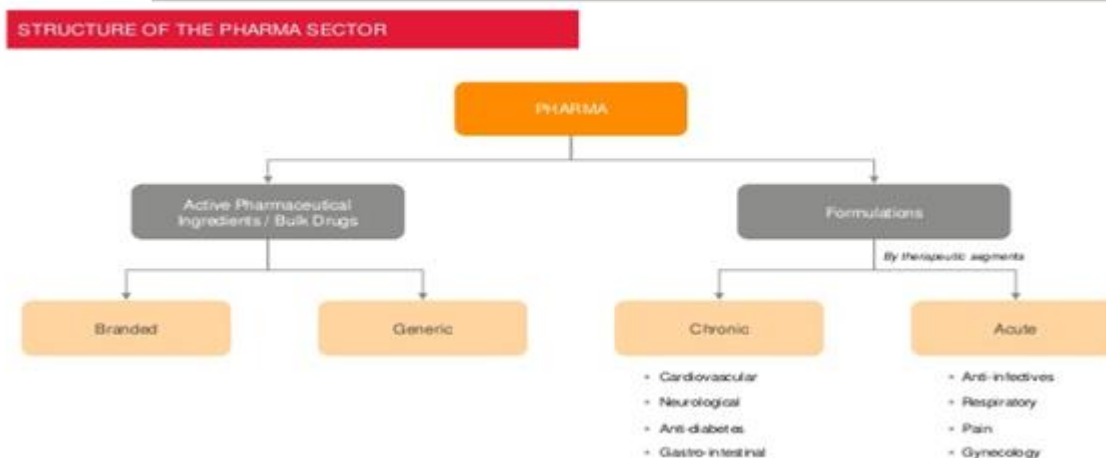

Indian pharmaceutical sector accounts for about 2.4 per cent of the global pharmaceutical industry in value terms and 10 per cent in volume terms and is expected to expand at a Compound Annual Growth Rate (CAGR) of 15.92 per cent to US\$ 55 billion by 2020 from US\$ 20 billion in 2015.

With 71 per cent market share, generic drugs form the largest segment of the Indian pharmaceutical sector. RESEARCH AND DEVELOPMENT

Research and development is key to the future of pharmaceutical industry, which advances for considerable improvement in life expectancy and health all over the world are resultant impact of steady investment in research. There is considerable scope for collaborative research and development in India, which offers several strengths to international research and development community. These strengths relate to availability of excellent scientific talents, who are capable to develop combinatorial chemistry, new synthetic molecules and plant derived candidate drugs.

Research and development expenditure by pharmaceutical industry of India is around 1.9 percent of total annual turnover, which is little low as compared to foreign research based pharmaceutical companies. India is entering into patent protection area, which is helpful in high investment in research activities. India is providing strong base for clinical evaluation at the time of multi-center trials, considering real availability of clinical materials in diverse therapeutic areas. According to Pharmaceutical Outsourcing Management Association and Biopharmaceutical Outsourcing Report, pharmaceutical companies are utilizing substantially the services of Contract Research Organization.

CHANGING PRESCRIPTION

As per World Trade Organization conditions from the year 2005, India granted product patent recognition to all new chemical entities in the form of bulk drug development. This introduction of product patent regime from January 2005, is leading into long-term growth for the future, which mandated patent protection on product and processes for a period of 20 years. Under new law, India is forced to recognize not only new patents, but also patents filed after first January 1995. Under the changed environment, the pharmaceutical industry is forced to adapt its business model to recent changes in the operating environment.

IMPORTS

India's pharmaceutical imports (including bulk drugs, formulations, intermediates, chemicals, solvents etc) are to the tune of Rs 31.3 bn. Imports have registered a CAGR of nearly 23 per cent in the past 5 year. Imports of formulations have increased significantly in the past 5 year registering CAGR of 32.9 per cent in the past 5 y. In FY99 import of formulations

grew by 25.5 per cent year over year. Import of bulk drugs have slowed down in the past 2-3 years mainly due to two reasons - firstly there is over capacity in the domestic market and secondly the quality of bulk drugs manufactured by the local manufacturers have improved significantly and they act as import substitute for MNC's requirements.

ROAD AHEAD

The Indian pharmaceutical market size is expected to grow to US\$ 100 billion by 2025, driven by increasing consumer spending, rapid urbanization, and raising healthcare insurance among others. Going forward, better growth in domestic sales would also depend on the ability of companies to align their product portfolio towards chronic therapies for diseases such as such as cardiovascular, anti-diabetes, anti-depressants and anti-cancers that are on the rise. The Indian government has taken many steps to reduce costs and bring down healthcare expenses. Speedy introduction of generic drugs into the market has remained in focus and is expected to benefit the Indian pharmaceutical companies. In addition, the thrust on rural health programmers, lifesaving drugs and preventive vaccines also augurs well for the pharmaceutical companies.

MANUFACTURING PROCESS

Formulation

A formulation is the composition of a drug product that contains the active pharmaceutical ingredient (API) and other inactive ingredients. The manufacturing process differs from product to product i.e. between Tablets, Capsules and dry syrup. However it typically involves a fix series of steps under controlled conditions of temperature, Humidity, Hygiene, and specific classified conditions to manufacture the finished product.

For each product we identify several alternative specifications of manufacturing process and choose the most appropriate for the situation viz. stability during shelf life, economic, patent non-infringing, achieving a desired quality standard, environment impact, etc. It is then suitably packed in different packing material like strip packing, bottle packing or sachets depending on the requirements of customers.

The basic series of process manufacturing FDFs is explained below:

Note: Since we do not have in-house liquid syrup bottling machine, we currently get the same done through item rate contract / job work from external parties.

OUR MAJOR CUSTOMERS

Our Company is primarily engaged in the business of manufacturing and marketing of Pharmaceutical formulation. The percentage of income derived from our top customers in the last financial year is given below:

KEY REGULATIONS AND POLICIES

The following description is a summary of certain sector specific laws and regulations in India, which are applicable to the Company. The information detailed in this chapter has been obtained from publications available in the public domain. The regulations set out below may not be exhaustive, and are only intended to provide general information to the investors and are neither designed nor intended to substitute for professional legal advice.

Our Company is engaged in the manufacture and marketing of pharmaceutical formulations in the form of solid dosages (tablets/capsules) and dry syrups. Our Company is governed by a number of central and state legislations that regulate its business.

The following discussion summarizes certain significant Indian laws and regulations that govern our Company's business.

INDUSTRY-SPECIFIC REGULATIONS

The Drugs and Cosmetics Act, 1940 (“D. C. Act”)

The D. C. Act regulates the import, manufacture, distribution and sale of drugs and cosmetics in India as well as aspects relating to labeling, packing and testing. The D. C. Act also provides the procedure for testing and licensing of new drugs. The D. C. Act also prohibits the import of certain categories of drugs and cosmetics. It further mandates that every person holding a license must keep and maintain such records, registers and other documents as may be prescribed which may be subject to inspection by the relevant authorities. Under the D. C. Act, the Government may, by notification in the official gazette, regulate or prohibit the manufacture, sale or distribution of a drug, if it is satisfied that in the public interest, it is necessary or expedient to do so or that the use of such drug is likely to involve any risk to human beings or animals or that it does not have the therapeutic value claimed or purported to be claimed for it or contains ingredients and in such quantity for which there is no therapeutic justification. Penalties in terms of fine and imprisonment are prescribed under the D. C. Act for contravention of its provisions.

The D. C. Act prohibits *inter-alia* the manufacture and sale of (i) drugs and cosmetics which are not of standard quality or are misbranded, adulterated or spurious (ii) any patent or proprietary medicine, unless the true formula or list of active ingredients is displayed in the prescribed manner on the label, together with the quantities thereof (iii) any drug which by means of any statement, design or device accompanying it or by any other means, purports or claims to prevent, cure or mitigate any such disease or ailment, or to have any such other effect as may be prescribed (iv) any cosmetic containing any ingredient which may render it unsafe or harmful for use under the directions indicated or recommended. It further prohibits *inter-alia* the exhibition, offer for sale, distribution or sale of any drug or cosmetic which has been imported or manufactured in contravention of any of the provisions of D. C. Act or any rule made there under.

The Drugs and Cosmetics Rules, 1945

The Drugs and Cosmetics Rules, 1945 (the “**DCA Rules**”) have been enacted to give effect to the provisions of the DCA Act to regulate the, manufacture, distribution and sale of drugs and cosmetics in India. The DCA Rules prescribe the procedure for submission of report to the Central Drugs Laboratory, of samples of drugs for analysis or test, the forms of Central Drugs Laboratory's reports thereon and the fees payable in respect of such reports. The DCA Rules also prescribe the drugs or classes of drugs or cosmetics or classes of cosmetics for the import of which a licence is required, and prescribe the form and conditions of such licence. Further, the DCA Rules provide for the cancellation or suspension of such licence in any case where any provisions or rule applicable to the import of drugs and cosmetic is contravened or any of the conditions subject to which the licence is issued is not complied with. The DCA Rules further prescribe the manner of labeling and packaging of drugs.

DCA Rules provide for grant of a certificate of Good Manufacturing Practices (“**GMP**”). The GMP provides for general requirements for, including but not limited to, location and surroundings of the factory building, maintenance of water systems, waste disposal mechanisms, warehousing, sanitation in manufacturing premises, health, clothing and sanitation of workers etc.

National Pharmaceutical Pricing Policy 2012

In December 2012, the Government issued the National Pharmaceutical Pricing Policy, 2012 (“**NPPP 2012**”) has replaced the Drug Policy of 1994. The objective of the NPPP 2012 is to put in place a regulatory framework for pricing of drugs so as to ensure availability of essential medicines at reasonable prices while providing sufficient opportunity for innovation and competition to support the growth of industry. The regulation of prices of drugs under the NPPP 2012 is on the basis of regulating the prices of formulations and is different from the earlier principle of regulating the prices of specified bulk drugs and their formulations under the Drug Policy 1994. The National Pharmaceuticals Pricing Authority (“**NPPA**”) will be the implementation authority for the NPPP 2012. The NPPP 2012 provides for certain principles for drug price control and determination, which, *inter-alia*, include the following:

- a) Price regulation is on the basis of ‘essentiality’ of the drug as laid down in the National List of Essential Medicines – 2015 (“**NLEM 2015**”), declared by the Ministry of Health and Family Welfare, in public interest;
- b) Price regulation is applied only to formulations;
- c) The Span of Price Control is as per the dosages and strengths as listed in NLEM 2015;
- d) The methodology of fixing a ceiling price of essential medicines, is done by adopting the simple average price of all the brands having market share (on the basis of moving annual turnover) more than and equal to one percent of the total market turnover of that medicine.
- e) The formulations are to be priced only by fixing a ceiling price. Manufacturers would be free to fix any price for their products equal to or below the ceiling price. The ceiling price would be fixed on the dosage basis, such as per tablet, capsule, standard injection volume, as listed in NLEM 2015;
- f) The ceiling price will be fixed on the basis of readily monitorable market based data which would be available with IMS Health (IMS). Since the IMS data gives price figures for stockist level prices, in order to arrive at ceiling price (being the maximum retail price), the price derived from IMS data would be further increased by 16% as margin to the retailer so as to arrive at a reasonable ceiling price chargeable from the consumers. For drugs not in the IMS data, NPPA would collect data by commissioning the same.
- g) The prices of such essential medicines will be allowed an annual increase as per the ‘Wholesale Price Index’ as notified by the Department of Industrial Policy & Promotion;

- **Sale:** The transfer of ownership in property for a price, paid or promised to be paid.
- **Mortgage:** The transfer of an interest in property for the purpose of securing the payment of a loan, existing or future debt, or performance of an engagement which gives rise to a pecuniary liability. The T.P. Act recognises several forms of mortgages over a property.

Section 18 of the Trademarks Act requires that any person claiming to be the proprietor of a trade mark used or proposed to be used by him, must apply for registration in writing to the registrar of trademarks. The trademark, once applied for and which is accepted by the Registrar of Trademarks ("**the Registrar**"), is to be advertised in the trademarks journal by the Registrar. Oppositions, if any, are invited and, after satisfactory adjudications of the same, a certificate of registration is issued by the Registrar. The right to use the mark can be exercised either by the registered proprietor or a registered user. The present term of registration of a trademark is 10 (ten) years, which may be renewed for similar periods on payment of a prescribed renewal fee.

Patents Act, 1970

The Patents Act, 1970 ("**Patents Act**") governs the patent regime in India and recognises process patents as well as product patents. The form and manner of application for patents is set out under Chapter III and Chapter VIII deals with the grant of patents. Patents obtained in India are valid for a period of 20 (twenty) years from the date of filing the application. The Patents Act also provides for grant of compulsory license on patents after expiry of three years of its grant in certain circumstances such as reasonable requirements of the public, non-availability of patented invention to public at affordable price or failure to work the patented invention.

An application for an Importer-Exporter Code number has to be made to the office of the Joint Director General of Foreign Trade, Ministry of Commerce.

REGULATIONS REGARDING FOREIGN INVESTMENT

Foreign Exchange Management Act, 1999

Foreign investment in companies in the pharmaceutical sector is governed by the provisions of the Foreign Exchange Management Act, 1999 ("**FEMA**") read with the applicable regulations. The Department of Industrial Policy and Promotion ("**DIPP**"), Ministry of Commerce and Industry has issued the Consolidated FDI Policy which consolidates the policy framework on Foreign Direct Investment ("**FDI Policy**"), with effect from August 28, 2017. The FDI Policy consolidates and subsumes all the press notes, press releases, and clarifications on FDI issued by DIPP till August 27, 2017. All the press notes, press releases, clarifications on FDI issued by DIPP till August 27, 2017 stand rescinded as on August 28, 2017.

In terms of the FDI Policy, Foreign investment is permitted (except in the prohibited sectors) in Indian companies either through the automatic route or the Government route, depending upon the sector in which foreign investment is sought to be made. In terms of the FDI Policy, the work of granting government approval for foreign investment under the FDI Policy and FEMA Regulations has now been entrusted to the concerned Administrative Ministries/Departments.

FDI for the items or activities that cannot be brought in under the automatic route may be brought in through the approval route. Where FDI is allowed on an automatic basis without the approval of the Government, the RBI would continue to be the primary agency for the purposes of monitoring and regulating foreign investment. In cases where Government approval is obtained, no approval of the RBI is required except with respect to fixing the issuance price, although a declaration in the prescribed form, detailing the foreign investment, must be filed with the RBI once the foreign investment is made in the Indian company. The RBI, in exercise of its power under the FEMA, has also notified the Foreign Exchange Management (Transfer or Issue of Security by a Person Resident outside India) Regulations, 2000 to prohibit, restrict or regulate, transfer by or issue of security to a person resident outside India.

In terms of the FDI Policy, foreign investments in the sector in which the Company operates is permitted upto 100% under the automatic route for greenfield investments and upto 74% under the automatic route for brownfield investments (investments in existing companies). Brownfield investments beyond 74% would require government approval from the Department of Pharmaceuticals. Further, the Government of India may incorporate appropriate conditions for FDI in brownfield cases at the time of granting approval.

RBI has also issued Master Circular on Foreign Investment in India dated July 01, 2015. In terms of the Master Circular, an Indian company may issue fresh shares to persons resident outside India (who are eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh issue of shares shall be subject to inter-alia, the pricing guidelines prescribed under the Master Circular. As mentioned above, the Indian company making such fresh issue of shares would be subject to the reporting requirements, inter-alia with respect to consideration for issue of shares and also subject to making certain filings including filing of Form FC-GPR.

SIGNIFICANT ACCOUNTING POLICIES

- 1. Basis of Presentation of Financial Statements:** The Financial Statements are prepared in accordance with the Indian Generally Accepted Accounting Principles (GAAP) under the historical cost convention (except in case of assets for which provision for impairment is made), on the accrual basis of accounting and complying with the provisions of the Companies Act, 2013. Accounting policies not specifically referred to otherwise, are in consonance with accounting principles generally accepted in India and Accounting Standards issued by The Institute of Chartered Accountants of India (ICAI) to the extent applicable. The accounting policies adopted in preparation of financial statements are consistent with those of previous year.
- 2. Use of Estimates:** The preparation of financial statements in conformity with Indian GAAP requires estimates and assumptions to be made that affect the reported amount of assets and liabilities on the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Although, these estimates are based upon management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amount of assets & liabilities in future period.
- 3. Inventories (AS-2):** Inventories are valued at cost or net realizable value, whichever is lower. The cost is determined on First In First Out basis, and includes all costs incurred in bringing the inventories to their present location and condition. In the case of work-in-progress and finished goods, cost also include costs of conversion. Net realizable value is the estimated selling price in ordinary course of business, less estimated costs of completion and estimated costs necessary to make the sale.
- 4. Cash Flow Statement (AS-3):** The company reports cash flow from operating activities using Indirect Method, where by net profit or loss is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments, and items of income or expense associated with investing or financing cash flows. Cash & cash equivalents for the purpose of cash flow statement comprise cash at bank and in hand and short-term investments with an original maturity of 3 months or less.
- 5. Depreciation (AS-6):** Depreciation has been charged on Fixed Assets as per Written Down Value Method, based on useful life of the assets and in the manner as prescribed in Schedule II of the Companies Act, 2013. In respect of additions or extensions forming an integral part of existing assets, depreciation is provided as aforesaid over the residual life of the respective assets.
- 6. Revenue Recognition (AS-9):** Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured. Revenue is measured at the fair value of the consideration received net of discounts, rebates, and sales taxes or duty. Export Sales are booked at the rate on the date of transaction and the resultant gain or loss on realization or on translation is accounted as "Foreign Exchange Fluctuation" and is dealt with in the statement of Profit and Loss Account. Other Income is accounted on accrual basis except where receipt of income is uncertain.
- 7. Fixed Assets (AS-10):** Fixed Assets are stated at cost, net of CENVAT, less accumulated depreciation. Cost comprises the purchase price and directly attributable cost of bringing the asset to its working condition for its intended use. All costs, including financial costs till commencement of commercial production or use are capitalized to the cost of qualifying assets. CENVAT credits on capital goods are accounted for by reducing the cost of capital goods. Gains & losses arising from derecognition of fixed assets are measured as the difference between the net disposal proceeds and the carrying amount of the assets and are recognised in the Statement of Profit & Loss when the asset is derecognized.
- 8. Foreign Exchange Fluctuation (AS-11):** Transactions denominated in foreign currencies are recorded at the exchange rate prevailing on the date of the transaction or that approximates the actual rate at the date of the transaction. Monetary items denominated in foreign currencies at the year-end are restated at year end rates. Any income or expense on account of exchange difference either on settlement or on translation is recognised in the Profit and Loss account except in case of long term liabilities, where they relate to acquisition of fixed assets, in which case they are adjusted to the carrying cost of such assets.

- 9. Investment Accounting (AS-13):** Investments are classified as Non-Current and Current Investments. Non-Current Investments are stated at its cost. Investments, which are readily realizable and intended to be held for not more than 1 year from the date on which investments are made, are classified as Current Investments. All other investments are classified as Non-current investments. Non-current investments are carried at cost. However, provision is made for any diminution in the value of the Non-Current Investments, if such decline is other than temporary. Current investments are carried at lower of cost and quoted/fair value, computed category wise.
- 10. Employee Benefits (AS-15):** Defined Contribution plans and short term employee benefits such as salary, bonus, provident fund, etc. are charged to Profit & Loss account as incurred. The present value of the obligations under defined benefit plans is determined based on an actuarial valuation using the Projected Unit Credit Method. Actuarial gains and losses arising on such valuation are recognised immediately in the Profit & Loss Account. In case of funded defined benefit plans, the fair value of the plan assets is reduced from gross obligation under the defined benefit plan to recognise the obligation on a net basis.
- 11. Borrowing Cost (AS-16):** Borrowing costs include interests; amortization of ancillary costs incurred and exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost. Borrowing costs that are attributable to the acquisition or construction of qualifying assets are capitalised as part of the cost of such assets. A qualifying asset is one that necessarily takes substantial period of time to get ready for its intended use. All other borrowing costs are charged to Profit and Loss account. Capitalization of borrowing cost is suspended when active development is interrupted.
- 12. Segment Reporting (AS-17):** Segment accounting policies are the accounting policies adopted for preparing and presenting the financial statements of the enterprise as well as those accounting policies that relate specifically to segment reporting. It may be based on Business segments or Geographical segments. A geographical segment is a distinguishable component of an enterprise that is engaged in providing products or services within a particular economic environment and that is subject to risks and returns that are different from those of components operating in other economic environment based on the specific factors.
- 13. Earnings per Share (AS-20):** Basic earnings per share is computed by dividing the profit/ (loss) after tax (including the post-tax effect of extra ordinary items, if any) by the weighted average number of equity shares outstanding during the year.
- 14. Accounting for Taxes (AS-22):** Provision for current tax is made and retained in the accounts on the basis of estimated tax liability as per the applicable provisions of the Income Tax Act, 1961. As required by “Accounting Standard 22 - Accounting for Taxes on Income”, the company has provided for Deferred Taxes. The tax effect of timing differences originating and reversing during the year has been reflected in the current year’s Profit & Loss Ac.
- 15. Provisions, Contingent Liabilities & Contingent Assets (AS-29):** A provision is recognised when the company has a present obligation as a result of past event, it is probable that an outflow of resources embodying benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Provisions involving substantial degree of estimation in measurement are recognized when there is a present obligation as a result of past events and it is probable that there will be an outflow of resources. Where no reliable estimate can be made, a disclosure is made as Contingent Liability. A disclosure for contingent liability is also made when there is a possible obligation or a present obligation that may, but probably will not; require an out flow of resources. Contingent Assets are neither recognized nor disclosed in the financial statements. When there is a possible or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

5.6 BASIS OF ALLOCATION

- a) The SEBI ICDR Regulations, 2009 specify the allocation or Allotment that may be made to various categories of Bidders/Applicants in an Issue depending on compliance with the eligibility conditions. Certain details pertaining to the percentage of Issue size available for allocation to each category is disclosed overleaf of the Bid cum Application Form and in the RHP/Prospectus. For details in relation to allocation, the Bidder/Applicant may refer to the RHP/Prospectus.
- b) Under-subscription in any category (except QIB Category) is allowed to be met with spillover from any other category or combination of categories at the discretion of the Issuer and in consultation with the BRLMs and the Designated Stock Exchange and in accordance with the SEBI ICDR Regulations, 2009. Unsubscribed portion in QIB Category is not available for subscription to other categories.
- c) In case of under subscription in the Issue, spill-over to the extent of such under-subscription may be permitted from the Reserved Portion to the Issue. For allocation in the event of an under-subscription applicable to the Issuer, Bidders/Applicants may refer to the RHP/ Prospectus.
- d) Illustration of the Book Building and Price Discovery Process Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors.

Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹ 20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer and the Selling Shareholders, in consultation with the BRLMs, may finalise the Issue Price

at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

e) **Alternate Method of Book Building**

In case of FPOs, Issuers may opt for an alternate method of Book Building in which only the Floor Price is specified for the purposes of Bidding (“**Alternate Book Building Process**”).

The Issuer may specify the Floor Price in the RHP/ Prospectus or advertise the Floor Price at least one Working Day prior to the Bid/Issue Opening Date. QIBs may Bid at a price higher than the Floor Price and the Allotment to the QIBs is made on a price priority basis. The Bidder with the highest Bid Amount is allotted the number of Equity Shares Bid for and then the second highest Bidder is Allotted Equity Shares and this process continues until all the Equity Shares have been allotted. RIIs, NIIs and Employees are Allotted Equity Shares at the Floor Price and Allotment to these categories of Bidders is made proportionately. If the number of Equity Shares Bid for at a price is more than available quantity then the Allotment may be done on a proportionate basis. Further, the Issuer may place a cap either in terms of number of specified securities or percentage of issued capital of the Issuer that may be Allotted to a single Bidder, decide whether a Bidder be allowed to revise the bid upwards or downwards in terms of price and/or quantity and also decide whether a Bidder be allowed single or multiple bids.

SECTION 6: ISSUE PROCEDURE IN FIXED PRICE ISSUE

Applicants may note that there is no Bid cum Application Form in a Fixed Price Issue. As the Issue Price is mentioned in the Fixed Price Offer therefore on filing of the Prospectus with the RoC, the Application so submitted is considered as the Application Form.

Applicants may only use the specified Application Form for the purpose of making an Application in terms of the Prospectus which may be submitted through the Designated Intermediary.

Applicants may submit an Application Form either in physical form to the any of the Designated Intermediaries or in the electronic form to the SCSB or the Designated Branches of the SCSBs authorising blocking of funds that are available in the bank account specified in the Application Form only (“ASBA Account”). The Application Form is also made available on the websites of the Stock Exchanges at least one day prior to the Bid/Issue Opening Date.

In a fixed price Issue, allocation in the net Issue to the public category is made as follows: minimum fifty per cent to Retail Individual Investors; and remaining to (i) individual investors other than Retail Individual Investors; and (ii) other Applicants including corporate bodies or institutions, irrespective of the number of specified securities applied for. The unsubscribed portion in either of the categories specified above may be allocated to the Applicants in the other category.

For details of instructions in relation to the Application Form, Bidders/Applicants may refer to the relevant section of the GID.

SECTION 7: ALLOTMENT PROCEDURE AND BASIS OF ALLOTMENT

The Allotment of Equity Shares to Bidders/Applicants other than Retail Individual Investors and Anchor Investors may be on proportionate basis. For Basis of Allotment to Anchor Investors, Bidders/Applicants may refer to RHP/Prospectus. No Retail Individual Investor will be Allotted less than the minimum Bid Lot subject to availability of shares in Retail Individual Investor Category and the remaining available shares, if any will be Allotted on a proportionate basis. The Issuer is required to receive a minimum subscription of 90% of the Issue (excluding any Issue for Sale of specified securities). However, in case the Issue is in the nature of Offer for Sale only, then minimum subscription may not be applicable.

7.1 ALLOTMENT TO RIIs

Bids received from the RIIs at or above the Issue Price may be grouped together to determine the total demand under this category. If the aggregate demand in this category is less than or equal to the Retail Category at or above

the Issue Price, full Allotment may be made to the RIIs to the extent of the valid Bids. If the aggregate demand in this category is greater than the allocation to in the Retail Category at or above the Issue Price, then the maximum number of RIIs who can be Allotted the minimum Bid Lot will be computed by dividing the total number of Equity Shares available for Allotment to RIIs by the minimum Bid Lot (“**Maximum RII Allottees**”). The Allotment to the RIIs will then be made in the following manner:

- a) In the event the number of RIIs who have submitted valid Bids in the Issue is equal to or less than Maximum RII Allottees, (i) all such RIIs shall be Allotted the minimum Bid Lot; and (ii) the balance available Equity Shares, if any, remaining in the Retail Category shall be Allotted on a proportionate basis to the RIIs who have received Allotment as per (i) above for the balance demand of the Equity Shares Bid by them (i.e. who have Bid for more than the minimum Bid Lot).
- b) In the event the number of RIIs who have submitted valid Bids in the Issue is more than Maximum RII Allottees, the RIIs (in that category) who will then be Allotted minimum Bid Lot shall be determined on the basis of draw of lots.

7.2 ALLOTMENT TO NIIs

Bids received from NIIs at or above the Issue Price may be grouped together to determine the total demand under this category. The Allotment to all successful NIIs may be made at or above the Issue Price. If the aggregate demand in this category is less than or equal to the Non-Institutional Category at or above the Issue Price, full Allotment may be made to NIIs to the extent of their demand. In case the aggregate demand in this category is greater than the Non-Institutional Category at or above the Issue Price, Allotment may be made on a proportionate basis up to a minimum of the Non-Institutional Category.

7.3 ALLOTMENT TO QIBs

For the Basis of Allotment to Anchor Investors, Bidders/Applicants may refer to the SEBI ICDR Regulations, 2009 or RHP/Prospectus. Bids received from QIBs Bidding in the QIB Category (net of Anchor Portion) at or above the Issue Price may be grouped together to determine the total demand under this category. The QIB Category may be available for Allotment to QIBs who have Bid at a price that is equal to or greater than the Issue Price. Allotment may be undertaken in the following manner:

- a) In the first instance allocation to Mutual Funds for up to 5% of the QIB Category may be determined as follows: (i) In the event that Bids by Mutual Fund exceeds 5% of the QIB Category, allocation to Mutual Funds may be done on a proportionate basis for up to 5% of the QIB Category; (ii) In the event that the aggregate demand from Mutual Funds is less than 5% of the QIB Category then all Mutual Funds may get full Allotment to the extent of valid Bids received above the Issue Price; and (iii) Equity Shares remaining unsubscribed, if any and not allocated to Mutual Funds may be available for Allotment to all QIBs as set out at paragraph 7.4(b) below;
- b) In the second instance, Allotment to all QIBs may be determined as follows: (i) In the event of oversubscription in the QIB Category, all QIBs who have submitted Bids above the Issue Price may be Allotted Equity Shares on a proportionate basis for up to 95% of the QIB Category; (ii) Mutual Funds, who have received allocation as per (a) above, for less than the number of Equity Shares Bid for by them, are eligible to receive Equity Shares on a proportionate basis along with other QIBs; and (iii) Under-subscription below 5% of the QIB Category, if any, from Mutual Funds, may be included for allocation to the remaining QIBs on a proportionate basis.

7.4 ALLOTMENT TO ANCHOR INVESTOR (IF APPLICABLE)

- a) Allocation of Equity Shares to Anchor Investors at the Anchor Investor Issue Price will be at the discretion of the issuer in consultation with the Investor Selling Shareholder and the BRLMs, subject to compliance with the following requirements:
 - 1) not more than 60% of the QIB Category will be allocated to Anchor Investors;

- 2) one-third of the Anchor Investor Portion shall be reserved for domestic Mutual Funds, subject to valid Bids being received from domestic Mutual Funds at or above the price at which allocation is being done to other Anchor Investors; and

Based on the physical book and at the discretion of the issuer in consultation with the BRLMs, selected Anchor Investors will be sent a CAN and if required, a revised CAN.
- c) **In the event that the Issue Price is higher than the Anchor Investor Issue Price:** Anchor Investors will be sent a revised CAN within one day of the Pricing Date indicating the number of Equity Shares allocated to such Anchor Investor and the pay-in date for payment of the balance amount. Anchor Investors are then required to pay any additional amounts, being the difference between the Issue Price and the Anchor Investor Issue Price, as indicated in the revised CAN within the pay-in date referred to in the revised CAN. Thereafter, the Allotment Advice will be issued to such Anchor Investors.
- d) **In the event the Issue Price is lower than the Anchor Investor Issue Price:** Anchor Investors who have been Allotted Equity Shares will directly receive Allotment Advice.

7.5 BASIS OF ALLOTMENT FOR QIBs (OTHER THAN ANCHOR INVESTORS), NIIs AND RESERVED CATEGORY IN CASE OF OVER-SUBSCRIBED ISSUE

In the event of the Issue being over-subscribed, the Issuer may finalise the Basis of Allotment in consultation with the Designated Stock Exchange in accordance with the SEBI ICDR Regulations, 2009.

The allocation may be made in marketable lots, on a proportionate basis as explained below:

- a) Bidders may be categorized according to the number of Equity Shares applied for;
- b) The total number of Equity Shares to be Allotted to each category as a whole may be arrived at on a proportionate basis, which is the total number of Equity Shares applied for in that category (number of Bidders in the category multiplied by the number of Equity Shares applied for) multiplied by the inverse of the over-subscription ratio;
- c) The number of Equity Shares to be Allotted to the successful Bidders may be arrived at on a proportionate basis, which is total number of Equity Shares applied for by each Bidder in that category multiplied by the inverse of the over-subscription ratio;
- d) In all Bids where the proportionate Allotment is less than the minimum Bid Lot decided per Bidder, the Allotment may be made as follows: the successful Bidders out of the total Bidders for a category may be determined by a draw of lots in a manner such that the total number of Equity Shares Allotted in that category is equal to the number of Equity Shares calculated in accordance with (b) above; and each successful Bidder may be Allotted a minimum of such Equity Shares equal to the minimum Bid Lot finalised by the Issuer;

- e) If the proportionate Allotment to a Bidder is a number that is more than the minimum Bid lot but is not a multiple of one (which is the marketable lot), the decimal may be rounded off to the higher whole number if that decimal is 0.5 or higher. If that number is lower than 0.5 it may be rounded off to the lower whole number. Allotment to all Bidders in such categories may be arrived at after such rounding off; and
- f) If the Equity Shares allocated on a proportionate basis to any category are more than the Equity Shares Allotted to the Bidders in that category, the remaining Equity Shares available for Allotment may be first adjusted against any other category, where the Allotted Equity Shares are not sufficient for proportionate Allotment to the successful Bidders in that category. RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are FIPB and the RBI.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”), issued consolidated FDI Policy, which with effect from August 28, 2017 consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on August 27, 2017. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidation FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares by an Indian resident to a Non-Resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011; (ii) the non-resident shareholding is within the sectorial limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI/RBI.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.

The Equity Shares offered in the Issue have not been and will not be registered under the Securities Act, and may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act and applicable U.S. state securities laws. Accordingly, the Equity Shares are being offered and sold (i) within the United States to persons reasonably believed to be “qualified institutional investors” (as defined in Rule 144A under the Securities Act) pursuant to Rule 144A under the Securities Act or other applicable exemption under the Securities Act and (ii) outside the United States in offshore transactions in reliance on Regulation S under the Securities Act and the applicable laws of the jurisdictions where such offers and sales occur.

The above information is given for the benefit of the Applicants. Our Company, the Selling Shareholders and the LM are not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of the Prospectus. Applicants are advised to make their independent investigations and ensure that the Applications are not in violation of laws or regulations applicable to them.
