1. *Our Managing Director i.e. Jignesh Raval had been disqualified to act as “director” under Section 164(2) of the Companies Act, 2013 with effect from November 01, 2015 and his Director Identification Numbers (DIN) were deactivated pursuant to notification issued by Ministry of Corporate Affairs (MCA).*

The name of Unique Auto Sourcing Private Limited was struck off on July 22, 2017 by the Registrar of Companies, Pune on account of non-filing of financial statements and annual returns of Unique Auto Sourcing Private Limited for the financial years ended March 2014 to March 2016. Unique Auto Sourcing Private Limited filed an appeal before the Hon’ble National Company Law Tribunal (“NCLT”) for restoration of its name on the Registrar of Companies. By and under its Order dated December 11, 2017, the NCLT directed the Registrar of Companies to restore the name of Unique Auto Sourcing Private Limited subject to payment of certain specified costs and completion of filing of the pending financial statements and annual returns within a period of 30 (days) from the date of receipt of the said Order. However, Jignesh Raval resigned from his post as a Director of Unique Auto Sourcing Private Limited vide a letter dated April 4, 2015 given to the Board of Directors. He has also addressed a letter to the Registrar of Companies, Pune dated November 2, 2017 stating that he has resigned from Unique Auto Sourcing Private Limited as a Director with effect from April 4, 2015 and requested that the Registrar of Companies remove his name from the signatory details of Unique Auto Sourcing Private Limited as well as from the list of disqualified directors, which is also reflected on the MCA Portal. The Registrar of Companies is yet to take the necessary action to vacate such disqualification.

In terms of Condonation of Delay Scheme, 2018 (“Scheme”), the DIN of Jignesh Raval has been temporarily activated until the validity of the Scheme. Accordingly, in order to ensure compliance with the scheme Unique Auto Sourcing Private Limited has filed the requisite financial statements and annual returns along with Form DIR-12 for resignation of Jignesh Raval, with the Registrar of Companies and is yet to file e-Form CODS. The Registrar of Companies, has taken cognizance of the aforesaid Form DIR-12 and consequently, Jignesh Raval’s name does not feature as a Director of Unique Auto Sourcing Private Limited on the MCA portal.

Our business with OEMs is dependent on our continuing relationship with them, quality of our products and our ability to deliver their orders. We may be unable to maintain or renew relationships with our OEMs or we may not be able to obtain orders from our OEMs at the current levels. We may also be unsuccessful in competing for desired OEMs to promote and sell our products. If any of these relationships were to be so altered or terminated and we are unable to obtain sufficient orders on comparable terms, our business, financial condition, results of operations, cash flows and business prospects could be materially and adversely affected.

We have limited control over the timing and quality of services, equipment or other supplies from third party contractors and/or consultants appointed by us,

and we may be required to incur additional unanticipated costs to remedy any defect or default in their services or products to ensure that the planned timelines are adhered to. Further as and when we commission our planned manufacturing facilities, our raw material requirements and costs as well as our staffing requirements and employee expenses may increase and we may face other challenges in extending our financial and other controls to our new units as well as in realigning our management and other resources and managing our consequent growth.

In the event that the risks and uncertainties discussed above or any other unanticipated risks, uncertainties, contingencies or other events or circumstances limit or delay our efforts to use the Net Proceeds to achieve the planned growth in our business, the use of the Net Proceeds for purposes identified by our management may not result in actual growth of our business, increased profitability or an increase in the value of your investment in our Equity Shares.

Our inability to maintain sufficient cash flow, credit facility and other sources of fund, in a timely manner, or at all, to meet the requirement of working capital could adversely affect our financial condition and result of our operations. Our inability, if any to meet our working capital requirements or inability to renew our existing working capital requirements through banking arrangements can adversely impact our business operations and financial position. - 10. Our Company has not complied with certain statutory provisions under various legislations. There have been instances of incorrect / delayed filings in the past with the statutory authorities. If the authorities impose monetary penalties on us or take certain punitive actions against our Company in relation to the same, our business, financial condition and results of operations could be adversely affected.**

Non-filing of the return before due date will be treated as a violation of FEMA and penalty provision may be invoked for such violation.

On February 7, 2008, the paid-up capital of our Company was increased to Rs. 2,32,25,000/- from Rs. 1,00,000, and accordingly, in terms of Section 383A of Companies Act, 1956 read with Rule 2 of Companies (Appointment and Qualifications of Secretary) Rules, 1988, our Company was required to appoint a whole-time company secretary, within 1 year from date of such increase. Similarly, since the paid-up capital of our Company as on the date it got converted to public limited company, i.e, November 16, 2017 was Rs. 19,18,68,220/-, our Company was required to appoint chief financial officer (“CFO”), in terms of Section 203 of Companies Act, 2013 read with Rule 8 of Companies (Appointment and Remuneration of Managerial Personnel) Rules, 2014 which appointment was made on November 29, 2017 with a delay of 13 days. Consequently, our Company along with every Director and Key Managerial Personnel who is in default may be subject to fine for such delay in appointment of CS-1, CS-2 and CFO.

In terms of the erstwhile Articles of Association, our Company was *inter-alia* required to increase its authorised share capital through a special resolution and accordingly, the Company increased its authorised share capital through special resolution. However, the Company has inadvertently recorded in following Form- 5 that the increase in authorised share capital has been carried out vide ordinary resolution, and accordingly did not file the corresponding Form 23 for the same:

- i. Increase in authorized share capital from Rs. 10,00,000 divided into 1,00,000 Equity Shares of Rs. 10/- each to Rs.5,00,00,000 divided into 50,00,000 Equity Shares of Rs. 10/- each.
- ii. Increase in authorized share capital from Rs. 5,00,00,000 divided into 50,00,000 Equity Shares of Rs. 10/- each to Rs. 6,00,00,000 divided into 60,00,000 Equity Shares of Rs. 10/- each.
- iii. Increase in authorized share capital from Rs. 6,00,00,000 divided into 60,00,000 Equity Shares of Rs.10/- each to Rs. 10,00,00,000 divided into 1,00,00,000 Equity Shares of Rs. 10/- each.
- iv. Increase in authorized share capital from Rs. 10,00,00,000 divided into 1,00,00,000 Equity Shares of Rs. 10/- each to Rs.15,00,00,000 divided into 1,50,00,000 Equity Shares of Rs.10/- each; and
- v. Increase in authorized share capital from Rs. 20,00,00,000 divided into 2,00,00,000 Equity Shares of Rs.10/- each to Rs.25,00,00,000 divided into 2,50,00,000 Equity Shares of Rs. 10/- each.

Moreover, Form 2 for allotment of 3,52,941 Equity Shares on March 24, 2008 erroneously records that 1,80,000 Equity Shares have been allotted to BRN Industries Limited and 1,72,941 Equity Shares have been allotted to Maxtech Manufacturing Inc. However, 172,941 Equity Shares have been allotted to BRN Industries and 1,80,000 Equity Shares have been allotted to Maxtech Manufacturing Inc. which has been correctly recorded in Form FC-GPR filed with RBI and Minutes of the Company. Consequently, our Company along with every Director and Key Managerial Personnel who is in default may be subject to fine for such an error / non-filing of aforesaid Forms. However, presently no communication / notice has been received by the Company in this regard.

11. *One of our Body Corporate Promoter, BRN Industries Limited do not have the experience of operating in the automobile sector.*

One of our Body Corporate Promoter, BRN Industries Limited do not have prior experience in the sector in which our Company operates. BRN Industries Limited have not acquired any technical expertise which is required in our field. Our Company relies on the technical expertise of its Key Managerial Personnel and senior management with significant experience in automobile industry. There can be no assurance that we will be able to retain our Key Managerial Personnel and senior management to work for our Company and be successful in our business plans due the lack of such direct experience of our Corporate Promoter, BRN Industries Limited.

12. *If we fail to develop technologies, processes or products needed to support consumer demand, we may lose significant market share or be unable to recover associated costs.*

Our ability to sell products to OEMs and in Tier 1 Customers may be significantly impacted if we do not develop or make available technologies, processes, or products that competitors may be developing and consumers demanding. This includes but is not limited to changes in the design of and materials used to manufacture our products. Technologies may also be developed by competitors that better distribute products to consumers, which could affect our customers. Additionally, developing new products and technologies requires significant investment and capital expenditures, is technologically challenging and requires extensive testing and accurate anticipation of technological and market trends. If we fail to develop new products that are meeting the requirements of our customers, or fail to develop products on time and within budgeted amounts, we may be unable to recover our product development and testing

costs. If we cannot successfully use new production or equipment methodologies we invest in, we may also not be able to recover those costs and we may lose market share in the sintered market.

- 13. Our business requires extensive research and development initiatives in designing the products and delay in validations by customers thereby impacting the schedules for manufacturing and realisation of the profits out of the same. This affects the financial conditions and business operations of our company in long run.**

Our industry is characterized by the changing technology and user preferences, evolving industry standards and the frequent introduction of new products and enhancements. Development of new products has become increasingly complex in today's fast-moving business environments. Our business process involves extensive research and development initiatives in designing the products to be used in automotive industry. The actual manufacturing of the products designed starts almost after one or two years of extensive research and approval process. Further our products are extensively validated at our customers end. Owing to advancement in technology and/or changes in consumer preferences, we may be forced to reduce the price of our products which we sell to our customers and therefore may have to resort to discounts and price reductions to continue to sell these products. Our competitors may succeed in developing products that are more cost effective than any of our products that we may develop, which may render our products obsolete or uncompetitive and adversely affect our business and financial results. Because of the pace of technological advances, we may in addition to our existing products, also be required to introduce new products that offer our customers the latest competitive technologies while managing the production of our existing products on a timely basis. The success of any new product is dependent on factors including timely completion of new product design, acceptable production yields and market acceptance. If we cannot respond adequately to the increased competition we expect to face or delay in customer validations or delay in developing products, we will lose our market credibility and market share and our profits will decline, which will adversely affect our business, results of operations and financial condition.

- 14. Our Company had negative cash flows from our investing activities and financing activities in the previous year(s) as per the Restated Financial Statements and the same are summarized as under:**

Amount (Rs. In lakhs)

Particulars	For period ended September 30, 2017	For the year ended March 31,				
		2017	2016	2015	2014	2013
Cash Flow from / (used in) Operating Activities	775.00	1,174.44	1,452.31	1,165.05	1,000.76	1,200.62

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows in future, it may adversely affect our business and financial operations.

- 15. The shortage or non-availability of power facilities and Nitrogen and Hydrogen gases may adversely affect our manufacturing processes and have an adverse impact on our results of operations and financial condition.**

Our manufacturing processes require substantial amount of power and Nitrogen & Hydrogen Gas facilities. Currently, Company has been sanctioned 1000 KVA power from Maharashtra State Electricity District Co. Ltd. The quantum and nature of power requirements of our industry and Company is such that it cannot be supplemented/ augmented by alternative/ independent sources of power supply since it involve significant capital expenditure and per unit cost of electricity produced is very high in view of oil prices and other constraints. Our Company is mainly dependent on State Government for meeting its electricity requirements. However we have installed two DG sets of 500 KVA each as back up. Any disruption/non availability of power shall directly affect our production which in turn shall have an impact

on profitability and turnover of our Company. Further our manufacturing process also requires substantial amount of nitrogen and hydrogen for furnace. We currently source our gases requirement from local vendors. We have not made any alternate arrangements for supply of gases for our manufacturing facilities. Any disruption / non availability of power or gases or any failure on our part to arrange alternate sources of electricity and gas supply, in a timely manner and at an acceptable cost shall directly affect our production which in turn shall have an impact on operations and results of our Company.

16. One of our Group Companies, Unique Auto Sourcing Private Limited has negative net worth and has incurred losses in the previous financial years.

Sustained financial losses by one of our Group Companies may not be perceived positively by external parties such as customers, bankers, suppliers etc, which may affect our credibility and business operations. The following of our Group Company has incurred losses in previous years:

17. Our cost of production is exposed to volatile fluctuations in the prices of raw materials.

Our Company is dependent on third party suppliers for procuring raw materials. We are exposed to fluctuations in the prices of these raw materials as well as its unavailability, particularly as we typically do not enter into any long term supply agreements with our suppliers and our major requirement is met in the spot market. We may be unable to control the factors affecting the price at which we procure the materials. We also face the risks associated with compensating for or passing on such increase in our cost of production on account of such fluctuations in prices to our customers. Though we generally have quarterly price revisions with our customer, our inability to pass on any upward or volatile fluctuations in the prices of raw material may thereby affect our margins and profitability, resulting in a material adverse effect on our business, financial condition and results of operations. Though we enjoy favourable terms from the suppliers both in prices as well as in supplies, our inability to obtain high quality materials in a timely and cost effective manner would cause delays in our production and delivery schedules, which may result in the loss of our customers and revenues.

18. Any disruption in production at, or shutdown of, our sole manufacturing facility could adversely affect our business, results of operations and financial condition.

We own and operate only one manufacturing facility situated at Pune, Maharashtra. All of our products are manufactured at this facility only. Our manufacturing facility is susceptible to damage or interruption or operating risks, such as human error, power loss, breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, obsolescence, loss of services of our external contractors, terrorist attacks, acts of war, break-ins, and industrial accidents and similar events. Further, our manufacturing facility is also subject to operating risk arising from compliance with the directives of relevant government authorities. Operating risks may result in personal injury and property damage and in the imposition of civil and criminal penalties. If our Company experiences delays

in production or shutdowns due to any reason, including disruptions caused by disputes with its workforce or any external factors, our Company's operations will be significantly affected, which in turn would have a material adverse effect on its business, financial condition and results of operations.

19. *Any slowdown in the automobile Industry in India could significantly decrease the demand for our products.*

The demand for our products is dependent, among other things, on the conditions of the global and, in particular, the Indian economy. For instance, the demand for our products is significantly affected by the automobile Industry. A decline in economic activity in India or in international markets may have an adverse effect on consumer and industrial demand for new vehicles. The OEM channel accounted for 79.74% of our total revenue in FY 2016-17 and 80.78 % of our total revenue in the FY 2015-16. Sales of new vehicles in India are affected by the time of year, weather, interest rates, fuel prices and the overall economic environment. If industrial or consumer demand for new vehicles decreases, it would have a corresponding impact on the demand for our products and may materially and adversely affect our business, financial condition, results of operations, cash flows and business prospects.

20. *The industry segments in which we operate being fragmented, we face competition from other players, which may affect our business operations and financial conditions.*

Players in this industry generally compete with each other on key attributes such as technical competence, quality of products, distribution network, pricing and timely delivery. Some of our competitors may have longer industry experience and greater financial, technical and other resources, which may enable them to react faster in changing market scenario and remain competitive. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

21. *Our results of operations and cash flows could be impacted by changes in tariffs imposed by the GoI and/or foreign governments.*

Our ability to competitively source and sell sintered auto-components could be significantly impacted by changes in tariffs imposed by various governments, whether the GoI or any of the governments of the countries in which we sell our sintered auto-components. India may impose tariffs on sintered auto-components or the raw materials that we use to manufacture our sintered auto-components, which may increase our cost of supplying sintered auto-components to certain jurisdictions and the cost of our raw materials. In the event that we are unable to pass on any increased costs due to the imposition of tariffs on our products and/or raw materials by increasing the prices of our products, our profitability may be adversely affected and we could lose market share due to the opportunity for other competitors to establish or increase their presence in markets where we participate.

22. *Our Company has unsecured loans which are repayable on demand. Any demand loan from lenders for repayment of such unsecured loans, may adversely affect our cash flows.*

As on September 30, 2017, our Company had unsecured loans amounting to Rs. 683.94 lakhs from related parties and others and out of which Rs. 569.49 lakhs are repayable on demand to the relevant lender. Such loans are not repayable in accordance with any agreed repayment schedule and may be recalled by the relevant lender at any time. Our Company may not be able to generate sufficient funds at short notice to be able to repay such loans and may resort to refinancing such loans at a higher rate of interest and on terms not favourable to it. Any such unexpected demand or accelerated repayment may have a material adverse effect on the business, cash flows and financial condition of the borrower against which repayment is sought. Any demand from lenders for repayment of such unsecured loans, may adversely affect our cash flows. For further details of unsecured loans of our Company, please refer Annexure VIII - Details of Long Term Borrowings as Restated of chapter titled "Financial Statements" beginning on page 171 of the Red Herring Prospectus.

23. *Our top five customers contribute more than 93.39 % of our revenues for the year ended March 31, 2017. Any loss of business from one or more of them may adversely affect our revenues and profitability.*

Our top five customers contribute to a substantial portion of our revenues for the year ended March 31, 2017. However, the composition and revenue generated from these clients might change as we continue to

add new customers in normal course of business. Any decline in our quality standards, growing competition and any change in the demand for our products by these customers may adversely affect our ability to retain them. We believe we have maintained good and long term relationships with our customers. However, there can be no assurance that we will continue to have such long term relationship with them also any delay or default in payment by these customers may adversely affect our business, financial condition and results of operations. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our revenues and profitability.

24. *Conflicts of interest may arise out of common business objects shared by our Company, one of our Body Corporate Promoter, Miba Sinter Holding GmbH & Co. KG and various members of our Promoter Group and two of our Group Companies, Miba Sinter Austria GmbH and Miba Sinter Slovakia*

One of our Body Corporate Promoters, Miba Sinter Holding GmbH & Co. KG and various members of our Promoter Group and two of our Group Companies, Miba Sinter Austria GmbH and Miba Sinter Slovakia have interests in other companies and entities that may compete with us or is engaged in the same and/or similar line of business / industry in which our Company operates and could offer services that are related to the business of our Company. As a result, conflicts of interest may arise in allocating or addressing business opportunities and strategies among our Company and other members of our Promoter Group and Group Companies in circumstances where our interests differ from theirs. There can be no assurance that such members of our Promoter Group or Group Companies will not compete with our existing business or any future business that we may undertake, or that their interests will not conflict with ours. Further, there is no undertaking except for the Distribution Agreement dated January 19, 2011 (“**Distribution Agreement**”) between our Company and one of our Body Corporate Promoters, MIBA Sinter Holding GmbH & Co. KG by virtue of which each party shall exclusively distribute its products in certain parts of world. For details of Distribution Agreement please refer to chapter “History and Certain Corporate Matters” beginning on page 132 of RHP. Further, our Director is also on the Board of our Body Corporate Promoters, Miba Sinter Holding GmbH & Co, KG. As a result, conflicts of interests may arise in allocating business opportunities among our Company and our Group Entities in circumstances where our respective interests diverge. In cases of conflict, our Promoters may favour other companies in which our Promoters have interests. There can be no assurance that our Promoters or our Group Entities or members of the Promoter Group will not compete with our existing business or any future business that we may undertake or that their interest will not conflict with ours.

25. *Our inability to maintain an optimal level of inventory for our business may impact our operations adversely.*

Our daily operations largely depend on consistent inventory control which is generally dependent on our projected sales in different months of the year. An optimal level of inventory is important to our business as it allows us to respond to customer demand effectively and to maintain a range of products. If we over-stock inventory, our required working capital will increase and if we under-stock inventory, our ability to meet consumer demand and our operating results may be adversely affected. Any mismatch between our planning and the actual off take by customers can impact us adversely.

26. *We are exposed to product recalls and warranty claims of all our customers to whom we supply our products.*

Warranty claims reduce our profitability. Our products are subject to warranties against manufacturing defects. In the event of claimed defects or non-performance of our products, our practice is to accept such genuine claims and to replace such products on a proportionate basis. In the future, we might also experience recalls or a material number of warranty claims due to defects in our products. Defects, if any, in our products could adversely affect our reputation and demand for our products. In the event that defects, product recalls, or warranty claims become more frequent, there may be an adverse effect on our operating results and financial condition.

27. *We are subject to product liability claims, it could expose us to costs and liabilities and adversely affect our reputation, revenues and profitability.*

We are exposed to risks associated with product liability claims as a result of developing, producing, our products in relevant jurisdictions. Such claims may arise if any of our products are deemed or proven to be, ineffective or defective There can be no assurances that we will not become subject to product

liabilities claims or that we will be able to successfully defend ourselves against any such claims. If we are unable to defend ourselves against such claims, among other things, we may be subject to civil liability for physical injury, death or other losses caused by our products and to criminal liability and the revocation of our business licenses if our products are found to be defective. In addition, we may be required to recall the relevant products, suspend sales or cease sales. Other jurisdictions in which our products are, or may in the future be, sold, may have similar or more onerous product liability and regulatory regimes, as well as more litigious environments that may further expose us to the risk of product liability claims. Even if we are able to successfully defend ourselves against any such product liability claims, doing so may require significant financial resources and the time and attention of our management.

28. *Our industry is labour intensive and our business operations may be materially adversely affected by strikes, work stoppages or increased wage demands by our employees or those of our suppliers.*

We believe that the industry in which we operate faces competitive pressures in recruiting and retaining skilled and unskilled labour. Our industry being labour intensive is highly dependent on labour force for carrying out its business operations. Shortage of skilled/unskilled personnel or work stoppages caused by disagreements with employees could have an adverse effect on our business and results of operations. We have not experienced any major disruptions to our business operations due to disputes or other problems with our work force in the past; there can be no assurance that we will not experience such disruptions in the future. Such disruptions may adversely affect our business and results of operations and may also divert the management's attention and result in increased costs. India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. We are also subject to laws and regulations governing relationships with employees, in such areas as minimum wage and maximum working hours, overtime, working conditions, hiring and terminating of employees and work permits. Although our employees are not currently unionized, there can be no assurance that they will not unionize in the future. If our employees unionize, it may become difficult for us to maintain flexible labour policies, and we may face the threat of labour unrest, work stoppages and diversion of our management's attention due to union intervention, which may have a material adverse impact on our business, results of operations and financial condition.

29. *We have in the past entered into related party transactions and may continue to do so in the future.*

Our Company has entered into various transactions with our Promoters, Promoter Group, Directors and Group Company. While we believe that all such transactions are conducted on arms length basis, there can be no assurance that we could not have achieved more favourable terms had such transactions were not entered into with related parties. Furthermore, it is likely that we will enter into related party transactions in future. There can be no assurance that such transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operation. For details on the transactions entered by us, please refer to chapter "Related Party Transactions" beginning on page 169 of the Red Herring Prospectus.

30. *We require certain approvals and licenses in the ordinary course of business and are required to comply with certain rules and regulations to operate our business, and the failure to obtain, retain and renew such approvals and licences or comply with such rules and regulations, and the failure to obtain or retain them in a timely manner or at all may adversely affect our operations.*

We require several statutory and regulatory permits, licenses and approvals to operate our business. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Non-renewal of the said permits and licenses would adversely affect our Company's operations, thereby having a material adverse effect on our business, results of operations and financial condition. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Further, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. If we fail to comply with all applicable

regulations or if the regulations governing our business or their implementation change, we may incur increased costs, be subject to penalties or suffer a disruption in our business activities, any of which could adversely affect our results of operations. For further details, please see chapters titled “*Key Industry Regulations and Policies*” and “*Government and Other Statutory Approvals*” at pages 125 and 196 respectively of this Red Herring Prospectus.

31. *We are exposed to foreign currency exchange rate fluctuations, which may harm our results of operations, impact our cash flows and cause our financial results to fluctuate.*

Our financial statements are presented in Indian Rupees. However, our finance charges are influenced by the currencies of geographies in which the loan has been availed. The exchange rate between the Indian Rupee and these currencies, primarily the USD, has fluctuated in the past and our results of operations and cash flows have been impacted by such fluctuations in the past and may be impacted by such fluctuations in the future. Currently we have outstanding foreign currency borrowing consisting of suppliers credit of EUR 4.44 lakhs and USD 1.70 lakhs and unsecured loan of USD 6.75 lakhs.

32. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and automobile industry contained in this Red Herring Prospectus.*

While facts and other statistics in this Red Herring Prospectus relating to India, the Indian economy and the automobile industry has been based on various government publications and reports from government agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled ‘*Summary of Industry*’ beginning on page 38 of this Red Herring Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

33. *We have certain contingent liabilities that have not been provided for in our Company’s financials which if materialised, could adversely affect our financial condition.*

Our contingent liabilities as on September 30, 2017 is as under:

(Rs. in lakhs)

Sr. No.	Particulars	As at September 30, 2017
1.	Foreign Usance Bill Discounting	7.52
	Total	7.52

In the event any such contingencies mentioned above were to materialize or if our contingent liabilities were to increase in the future, our financial condition could be adversely affected. For further details, see the section entitled “*Financial Statements, as restated*” on page 171 of this Red Herring Prospectus.

34. *Underutilization of capacity of our expansion may adversely affect our business, results of operations and financial condition.*

We propose to expand our manufacturing facility with installed capacity of 3600 MTPA. We will incur significant capital expenditure on setting up the same from Offer proceeds. We cannot assure that we shall be able to utilize our proposed expansion to their full capacity or up to an optimum capacity, and non-utilisation of the same may lead to loss of profits or can result in losses, and may adversely affect our business, results of operations and financial condition. Even use of the proposed production capacity is subject to several variables like availability of raw material, power, water, proper working of machinery, orders on hand, supply/demand, manpower, etc.

While setting-up of our expansion we would take into consideration all the factors required for optimum utilization of installed capacity, there cannot be any assurance that the proposed capacity would be utilized to its full extent.

35. *Intellectual property rights are important to our business and we may be unable to protect them from being infringed by others which may adversely affect our business value, financial condition and results of operations.*

As on the date of this RHP, we have not yet obtained registration for our corporate logos “” and “**SINTERCOM**” under Classes 12 and 7 and hence we do not enjoy the statutory protection accorded to a registered trademark. However, there can be no assurance that our either of our applications will succeed. Grounds for refusal of registration may include the validity or scope of the application. If we are unable to obtain a registration, we may still continue to use the corporate logos but remain vulnerable to infringement and passing-off by third parties and will not be able to enforce any rights against them. We may also need to change our corporate logos which may adversely affect our reputation and business and could require us to incur additional costs. Although, we believe that that our present systems are adequate to protect our confidential information and intellectual property, there can be no assurance that our intellectual property data, trade secrets or proprietary technology will not be copied, infringed or obtained by third parties. Further, our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. This may lead to litigations and any such litigations could be time consuming and costly and their outcome cannot be guaranteed. Our Company may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property, which may adversely affect our business, financial condition and results of operations. For further details pertaining to our intellectual property, please refer to the chapter titled “Our Business” beginning on page 108 of this Prospectus.

36. *Our Individual Promoter, Jignesh Raval and erstwhile director Hardeep Banga have provided personal guarantees to certain loan facilities availed by us, which if revoked may require alternative guarantees, repayment of amounts due or termination of the facilities.*

Our Individual Promoter, Jignesh Raval and estwhile director Hardeep Banga have provided personal guarantees in relation to certain loan facilities availed of by us. However, we have written a letter dated November 06, 2017 for relieving Hardeep Banga from personal guarantee since he is no longer a director in our Company. In the event that any of these guarantees are revoked, the lenders for such facilities may require alternate guarantees, repayment of amounts outstanding under such facilities, or may even terminate such facilities. We may not be successful in procuring alternative guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional

sources of capital, which may not be available on acceptable terms or at all and any such failure to raise additional capital could affect our operations and our financial condition.

37. *Our Company has no formal supply agreement or contract with our vendors/suppliers for the uninterrupted supply of major raw materials. Our business may be adversely affected if there is any disruption in the raw material supply.*

We do not have any formal agreements with our vendors/suppliers as we operate on a purchase order system. Due to the absence of any formal contract with our vendors/suppliers, we are exposed to the risks of irregular supplies or no supplies at all and delayed supplies which would materially affect our results of operations. In the event of any disruption in the raw materials supply or the non availability of raw materials, the production and dispatch schedule may be adversely affected impacting the sales and profitability of the Company. In the event the prices of such raw materials were to rise substantially, we may find it difficult to make alternative arrangements for supplies of our raw materials, on the terms acceptable to us, which could materially affect our business, results of operations and financial condition. Our management believes that we maintain good relations with our suppliers and we shall also not face any challenge in finding new suppliers if required.

38. *Our Company is dependent on third party transportation providers for the delivery of our products and any disruption in their operations or a decrease in the quality of their services could affect our Company's reputation and results of operations.*

Our Company uses third party transportation providers for delivery of our raw materials and finished goods. Though, our business has not experienced any disruptions due to transportation strikes in the past, any future transportation strikes may have an adverse effect on our business. In addition, goods may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delay in delivery of products which may also affect our business and results of operation negatively. An increase in the freight costs or unavailability of freight for transportation of our raw materials or finished goods may have an adverse effect on our business and results of operations.

Further, disruptions of transportation services due to weather-related problems, strikes, lock-outs, inadequacies in the road infrastructure, or other events could impair ability to procure raw materials on time. Any such disruptions could materially and adversely affect our business, financial condition and results of operations.

39. *Our inability to maintain and/or procure adequate insurance coverage in connection with our business may adversely affect us.*

Our operations are subject to inherent risks and hazards which may adversely impact our profitability, such as breakdown, malfunctions, sub-standard performance or failures of manufacturing equipment, fire, third party liability claims, loss-in-transit for our products, accidents and natural disasters. Our Company has obtained insurance coverage in respect of certain risks. These policies generally insure our assets against standard fire and special perils. Also we have taken marine cargo and burglary insurance policies. While we believe that we maintain insurance coverage in adequate amounts consistent with size of our business, our insurance policies do not cover all risks, specifically risks like housebreaking, terrorism, etc. There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance has been availed. If we suffer a significant uninsured loss or if insurance claim in respect of the subject-matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected.

For further details, please refer chapter titled "Our Business" beginning on page 108 of this Red Herring Prospectus.

40. *Our lenders have charge over our movable and immovable properties in respect of finance availed by us.*

We have secured our lenders by creating a charge over our movable and immovable properties in respect of loans / facilities availed by us from banks and financial institutions. The total amounts outstanding and payable by us as secured loans were Rs.3110.07 Lakhs as on September 30, 2017. In the event we default in repayment of the loans / facilities availed by us and any interest thereof, our properties may be forfeited by lenders, which in turn could have significant adverse affect on business, financial condition or results

of operations. For further information on the *Financial Indebtedness* please refer to page 184 of this Red Herring Prospectus.

- 41. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Offer. Further we have not identified any alternate source of financing the ‘Objects of the Offer’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.***

As on date, we have not made any alternate arrangements for meeting our capital requirements for the objects of the issue. We meet our capital requirements through our bank finance, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details please refer to the chapter titled “Objects of the Offer” beginning on page 80 of this Red Herring Prospectus.

- 42. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.***

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Additionally, under some of our loan agreements, we may not be permitted to declare any dividends, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “Dividend Policy” on page 170 of this Red Herring Prospectus.

- 43. *Within the parameters as mentioned in the chapter titled ‘Objects of this Offer’ beginning on page 80 of this Red Herring Prospectus, our Company’s management will have flexibility in applying the proceeds of this Offer. The fund requirement and deployment mentioned in the Objects of this Offer have not been appraised by any bank or financial institution.***

We intend to use entire Net Proceeds towards purchase of machinery, meeting the working capital requirement, part repayment of secured and unsecured loans, general corporate purpose. We intend to deploy the Net Offer Proceeds in financial year 2017-18 and 2018-19 and such deployment is based on certain assumptions and strategy which our Company believes to implement in future. The funds raised from the Issue may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc., For further details on the use of the Issue Proceeds, please refer chapter titled “Objects of the Offer” beginning on page 80 of this Red Herring Prospectus.

The deployment of funds for the purposes described above is at the discretion of our Company’s Board of Directors. The fund requirement and deployment is based on internal management estimates and has not been appraised by any bank or financial institution. Accordingly, within the parameters as mentioned in the chapter titled ‘Objects of the Offer’ beginning on page 80 of this Red Herring Prospectus, the Management will have significant flexibility in applying the proceeds received by our Company from the Issue. Our Board of Directors will monitor the proceeds of this Issue.

- 44. *Our future funds requirements, in the form of issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.***

We may require additional capital from time to time depending on our business needs. Any issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may

be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

- 45. *Our success depends largely upon the services of our Directors, Promoters and other Key Managerial Personnel and our ability to attract and retain them. Demand for Key Managerial Personnel in the industry is intense and our inability to attract and retain Key Managerial Personnel may affect the operations of our Company.***

Our success is substantially dependent on the expertise and services of our Directors, Promoters and our Key Managerial Personnel. They provide expertise which enables us to make well informed decisions in relation to our business and our future prospects. Our future performance will depend upon the continued services of these persons. Demand for Key Managerial Personnel in the industry is intense. We cannot assure you that we will be able to retain any or all, or that our succession planning will help to replace, the key members of our management. The loss of the services of such key members of our management team and the failure of any succession plans to replace such key members could have an adverse effect on our business and the results of our operations.

- 46. *Our Promoters and members of the Promoter Group will continue jointly to retain majority control over our Company after the Offer, which will allow them to determine the outcome of matters submitted to shareholders for approval.***

After completion of the Offer, our Promoters and members of the Promoter Group will collectively own [●] % of our equity share capital. As a result, our Promoters, together with the members of the Promoter Group, will continue to exercise a significant degree of influence over us and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

- 47. *In addition to normal remuneration or benefits and reimbursement of expenses, some of our Directors and key managerial personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.***

Our Directors and Key Managerial Personnel are interested in our Company to the extent of remuneration paid to them for services rendered and reimbursement of expenses payable to them. In addition, some of our Directors and Key Managerial Personnel may also be interested to the extent of their shareholding and dividend entitlement in our Company. For further information, see “Capital Structure” and “Our Management” on pages 65 and 138, respectively, of this Red Herring Prospectus.

- 48. *If we are unable to manage our growth or execute our strategies effectively, our business and prospects may be materially and adversely affected.***

Our revenue and our business operations have grown in recent years. We may not be able to sustain these rates of growth in future periods due to a number of factors, including, among others, our execution capability, our ability to maintain customer satisfaction, macroeconomic factors out of our control, the greater difficulty of growing at sustained rates from a larger revenue base, our inability to control our expenses and the availability of resources for our growth. In addition, our anticipated expansion will place a significant strain on our management, systems and resources. Our development and expansion strategies will require substantial managerial efforts and skills and the incurrence of additional expenditures and may subject us to new or increased risks. Further, pursuing these strategies may require us to expand our operations through internal development efforts as well as partnerships, joint ventures, investments and acquisitions. We may not be able to efficiently or effectively implement our growth strategies or manage the growth of our operations, and any failure to do so may limit future growth and hamper our business strategies.

49. *We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.*

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and cause serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

50. *The average cost of acquisition of Equity Shares by our Promoters could be lower than the floor price.*

Our Promoters average cost of acquisition of Equity Shares in our Company may be lower than the Floor Price of the Price Band as may be decided by the Company and Selling Shareholders in consultation with the BRLM. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer chapter title “Capital Structure” beginning on page 65 of this Red Herring Prospectus.

51. *The deployment of funds raised through this Offer shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.*

Since the Offer size is less than Rs.10,000 lakhs, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Offer proceeds could adversely affect our financials.

Offer Specific Risks:

52. *The Offer price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Offer and the market price of our Equity Shares may decline below the Offer price and you may not be able to sell your Equity Shares at or above the Offer Price.*

The Offer Price of our Equity Shares will be determined by book built method. This price is based on numerous factors (For further information, please refer chapter titled “Basis for Offer Price” beginning on page 91 of this Red Herring Prospectus) and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Offer Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Offer Price. Among the factors that could affect our share price include without limitation. The following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

EXTERNAL RISK FACTORS

Industry Risks:

53. *Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.*

Our business and industry is regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our

business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

Other Risks:

54. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under the Income-tax Act, 1961, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India except any gain realised on the sale of shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if the STT has been paid on the transaction. The STT will be levied on and collected by an Indian stock exchange on which equity shares are sold. Any gain realised on the sale of shares held for more than 12 months to an Indian resident, which are sold other than on a recognised stock exchange and as a result of which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realised on the sale of shares on a stock exchange held for a period of 12 months or less will be subject to short term capital gains tax. Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less which are sold other than on a recognised stock exchange and on which no STT has been paid, will be subject to short term capital gains tax at a relatively higher rate as compared to the transaction where STT has been paid in India. By way of the Finance Bill, 2017, the Government of India has proposed to introduce certain anti-abuse measures, pursuant to which, the aforesaid exemption from payment of capital gains tax for income arising on transfer of equity shares shall only be available if STT was paid at the time of acquisition of the equity shares. While the said provision has not been notified as on date, it is expected to take effect from April 1, 2018 and will, accordingly, apply in relation to the assessment year 2018-19 and subsequent assessment years. Capital gains arising from the sale of shares will be exempt from taxation in India in cases where an exemption is provided under a tax treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdictions on gains arising from a sale of the shares subject to relief available under the applicable tax treaty or under the laws of their own jurisdiction.

56. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.*

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include:

- custom duties on imports of raw materials and components;
- Goods and Service Tax; and
- Other new or special taxes and surcharges introduced on a permanent or temporary basis from time to time.

These taxes and levies affect the cost and prices of our products and therefore demand for our product. An increase in any of these taxes or levies, or the imposition of new taxes or levies in the future, may have a material adverse effect on our business, profitability and financial condition.

57. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. 59. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

60. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

61. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.*

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any

other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

62. *Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. INTRODUCTION TO INDIAN AUTOMOBILE INDUSTRY

The Indian auto industry is one of the largest in the world. The industry accounts for 7.1 per cent of the country's Gross Domestic Product (GDP). The Two Wheelers segment with 80 per cent market share is the leader of the Indian Automobile market owing to a growing middle class and a young population. Moreover, the growing interest of the companies in exploring the rural markets further aided the growth of the sector. The overall Passenger Vehicle (PV) segment has 14 per cent market share.

India is also a prominent auto exporter and has strong export growth expectations for the near future. In April-March 2017 exports of PV and Commercial Vehicles (CV) registered a growth of 16.20 per cent and 4.99 per cent respectively, over April-March 2016. In addition, several initiatives by the Government of India and the major automobile players in the Indian market are expected to make India a leader in the 2W and Four Wheeler (4W) market in the world by 2020.

REVIEW OF MAJOR DEVELOPMENTS IN INDIAN ECONOMY

The Indian economy has continued to consolidate the gains achieved in restoring macroeconomic stability. Real GDP growth in the first half of the year was 7.2 percent, on the weaker side of the 7.0-7.75 per cent projection in the Economic Survey 2015-16 and somewhat lower than the 7.6 percent rate recorded in the second half of 2015-16 (Figure 1a). The main problem was fixed investment, which declined sharply as stressed balance sheets in the corporate sector continued to take a toll on firms’ spending plans. On the positive side, the economy was buoyed by government consumption, as the 7th Pay Commission salary recommendations were implemented, and by the long-awaited start of an export recovery as demand in advanced countries began to accelerate. Nominal GDP growth recovered to respectable levels, reversing the sharp and worrisome dip that had occurred in the first half of 2015-16 (Figure 1b).

The major highlights of the sectoral growth outcome of the first half of 2016-17 were: (i) moderation in industrial and nongovernment service sectors; (ii) the modest pick-up in agricultural growth on the back of improved monsoon; and (iii) strong growth in public administration and defence services— dampeners on and catalysts to growth almost balancing each other and producing a real Gross Value Addition (GVA) growth (7.2 percent), quite similar to the one (7.1 per cent) in H2 2015-16 (Figure 1b).

Inflation this year has been characterized by two distinctive features. The Consumer Price Index (CPI)-New Series inflation, which averaged 4.9 per cent during April-December 2016, has displayed a downward trend since July when it became apparent that kharif agricultural production in general, and pulses in particular would be bountiful. The decline in pulses prices has contributed substantially to the decline in CPI inflation which reached 3.4 percent at end-December. The second distinctive feature has been the reversal of WPI inflation, from a trough of (-) 5.1 percent in August 2015 to 3.4 percent at end-December 2016, on the back of rising international oil prices. The wedge between CPI and WPI inflation, which had serious implications for the measurement of GDP discussed in MYEA (Box 3, Chapter 1, MYEA 2015-16), has narrowed considerably. Core inflation has, however, been more stable, hovering around 4.5 percent to 5 percent for the year so far. The outlook for the year as a whole is for CPI inflation to be below the RBI's target of 5 percent, a trend likely to be assisted by demonetisation.

External Sector

Similarly, the external position appears robust having successfully weathered the sizeable redemption of Foreign Currency Non-Resident (FCNR) deposits in late 2016, and the volatility associated with the US election and demonetisation. The current account deficit has declined to reach about 0.3 percent of GDP in the first half of FY2017. Foreign exchange reserves are at comfortable levels, having risen from around US\$350 billion at end-January 2016 to US\$ 360 billion at end-December 2016 and are well above standard norms for reserve adequacy. In part, surging net FDI inflows, which grew from 1.7 percent of GDP in FY2016 to 3.2 percent of GDP in the second quarter of FY2017, helped the balance-of-payments

The trade deficit declined by 23.5 per cent in April-December 2016 over corresponding period of previous year. During the first half of the fiscal year, the main factor was the contraction in imports, which was far steeper than the fall in exports. But during October- December, both exports and imports started a long-awaited recovery, growing at an average rate of more than 5 per cent. The improvement in exports appears to be linked to improvements in the world economy, led by better growth in the US and Germany. On the import side, the advantage on account of benign international oil prices has receded and is likely to exercise upward pressure on the import bill in the short to medium term. Meanwhile, the net services surplus declined in the first half, as software service exports slowed and financial service exports declined. Net private remittances declined by \$4.5 bn in the first half of 2016-17 compared to the same period of 2015-16, weighed down by the lagged effects of the oil price decline, which affected inflows from the Gulf region.

Fiscal Position

Trends in the fiscal sector in the first half have been unexceptional and the central government is committed to achieving its fiscal deficit target of 3.5 percent of GDP this year. Excise duties and services taxes have benefitted from the additional revenue measures introduced last year. The most notable feature has been the over-performance (even relative to budget estimates) of excise duties in turn based on buoyant petroleum consumption: real consumption of petroleum products (petrol) increased by 11.2 percent during April-December 2016 compared to same period in the previous year. Indirect taxes, especially petroleum excises, have held up even after demonetisation in part due to the exemption of petroleum products from its scope. More broadly, tax collections have held up to a greater extent than expected possibly because of payment of dues in demonetised

notes was permitted. Non-tax revenues have been challenged owing to shortfall in spectrum and disinvestment receipts but also to forecast optimism; the stress in public sector enterprises has also reduced dividend payments.

State government finances are under stress. The consolidated deficit of the states has increased steadily in recent years, rising from 2.5 percent of GDP in 2014-15 to 3.6 percent of GDP in 2015-16, in part because of the UDAY scheme. The budgeted numbers suggest there will be an improvement this year. However, markets are anticipating some slippage, on account of the expected growth slowdown, reduced revenues from stamp duties, and implementation of their own Pay Commissions. For these reasons, the spread on state bonds over government securities jumped to 75 basis points in the January 2017 auction from 45 basis points in October 2016. For the general government as a whole, there is an improvement in the fiscal deficit with and without UDAY scheme.

OUR BUSINESS STRATEGY

1. Enhancing our customer base

With the mandate for compliance with BS VI norms by the year 2020 in India, we anticipate enhanced demand for BS VI compliant products. The transition to BS VI norms would require significant engine technology changes. In order to cater to this change, we would focus on the enhancing our customer base by developing components compliant with BS VI norms and market the same to Tier 1 customers. We will also continue to enhance our OEM network and work closely with our OEM customers to develop new products for their vehicles and for marketing and branding. We further intend to widen our sales network so as to access more customers through our in-house marketing team by way of inter-alia presenting to them the technologies we possess.

2. Forward Integration

With the increasing focus of Make in India in the fields of defence and aerospace, we intend to expand our manufacturing process from conventional sintering to the metal injection moulding (MIM). We intend to expand into defence and aerospace industry with MIM products.

3. Expanding our product base

Considering the substantial operational costs, we anticipate that the OEMs will look for outsourcing of component assemblies. Currently, our Company is only a components supplier to its customer. The Company however intends become an assembly supplier for the OEMs wherein the component assembly would be done in-house and capitalize on this opportunity considering the technology backup from the Miba Sinter Austria GmbH.

We aim to expand our product range by developing new variants as per our customers' requirements. We have procured technology from MIBA Sinter Austria GmbH (MIBA), Austria, vide Technology Transfer Agreement which will enable us to manufacture cost-efficient and desired quality products.

4. Improving functional efficiencies

We will continue to invest in increasing our functional efficiency throughout the organization. Our Company intends to improve efficiencies to achieve cost reductions and have a competitive edge over our peers. We believe that this can be achieved through continuous process improvement, customer service and technology development. We also strive to improve the quality of the products manufactured. We impart technical training at regular intervals to our employees to enhance their skills.

Illustration of Book Building and Price Discovery Process (Investors should note that this example is solely for illustrative purposes and is not specific to the Issue) Bidders can bid at any price within the price band. For instance, assume a price band of Rs. 20 to Rs. 24 per equity share, Offer size of 3,000 equity shares and receipt of five bids from bidders, details of which are shown in the table below. A graphical representation of the consolidated demand and price would be made available at the bidding centers during the bidding period. The

illustrative book below shows the demand for the equity shares of the issuer company at various prices and is collated from bids received from various investors.

Bid Quantity	Bid Price (Rs.)	Cumulative Bid Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the issuer is able to Offer the desired number of shares is the price at which the book cuts off, i.e., Rs. 22 in the above example. The issuer, in consultation with the Book Running Lead Manager will finalize the Offer price at or below such cut-off price, i.e., at or below Rs. 22/-. Justification for “Holding Period” levels

The justifications for the holding levels mentioned in the table above are provided below:

Assets- Current Assets	
Inventories	<p>Raw material consists mainly of powdered metal. Our Company intends to keep inventory of around 0.48 months as we expect increase in growth of our business operations during the year on account of expansion of our production capacity.</p> <p>With increase in number of products, Company intends to increase the safety stock to avoid any line stoppage at the customer’s end. And thus we have assumed Stock-in Process from 1.40 months and 1.48 months in 2016-17 and 2017-18 respectively.</p> <p>Other consumables consist of tools for the new project. Generally the development project time frame is of 1-2 years. With a proposed new development of critical components, Company projects to have new tooling for such new projects which would be eventually billed to customer. And thus we have assumed increase in holding level of consumable stock from 42 months and 38.88 months in 2016-17 and 2017-18 respectively.</p>
Trade receivables	Our Company shall give credit facility of around 4.00 months to our debtors as compared to 3.76 months for the financial year 2016-17. Going forward our Company intends to provide liberal credit facility to our debtors for expanding our sales.
Liabilities–Current Liabilities	
Trade Payables	Our creditors for goods based on restated financial statements were 2.39 months and 3.30 months for fiscal 2016 and fiscal 2017 respectively. Going forward we have estimated trade payable level of 2.52 months, as we expect to prune our creditors days by infusing funds towards working capital from the net Offer proceeds.

Our Company proposes to utilize Rs. 300.00 lakhs of the Net Proceeds in Fiscal 2017-18 towards our working capital requirements. The balance portion of our working capital requirement for the Fiscal 2017-18 will be arranged from existing Equity, Bank loans and internal accruals.

INTRODUCTION TO INDIAN AUTOMOBILE INDUSTRY

The Indian auto industry is one of the largest in the world. The industry accounts for 7.1 per cent of the country's Gross Domestic Product (GDP). The Two Wheelers segment with 80 per cent market share is the leader of the Indian Automobile market owing to a growing middle class and a young population. Moreover, the growing interest of the companies in exploring the rural markets further aided the growth of the sector. The overall Passenger Vehicle (PV) segment has 14 per cent market share.

India is also a prominent auto exporter and has strong export growth expectations for the near future. In April-March 2017 exports of PV and Commercial Vehicles (CV) registered a growth of 16.20 per cent and 4.99 per cent respectively, over April-March 2016. In addition, several initiatives by the Government of India and the major automobile players in the Indian market are expected to make India a leader in the 2W and Four Wheeler (4W) market in the world by 2020.

REVIEW OF MAJOR DEVELOPMENTS IN INDIAN ECONOMY

The Indian economy has continued to consolidate the gains achieved in restoring macroeconomic stability. Real GDP growth in the first half of the year was 7.2 percent, on the weaker side of the 7.0-7.75 per cent projection in the Economic Survey 2015-16 and somewhat lower than the 7.6 percent rate recorded in the second half of 2015-16 (Figure 1a). The main problem was fixed investment, which declined sharply as stressed balance sheets in the corporate sector continued to take a toll on firms’ spending plans. On the positive side, the economy was buoyed by government consumption, as the 7th Pay Commission salary recommendations were implemented, and by the long-awaited start of an export recovery as demand in advanced countries began to accelerate. Nominal GDP growth recovered to respectable levels, reversing the sharp and worrisome dip that had occurred in the first half of 2015-16 (Figure 1b).

The major highlights of the sectoral growth outcome of the first half of 2016-17 were: (i) moderation in industrial and nongovernment service sectors; (ii) the modest pick-up in agricultural growth on the back of improved monsoon; and (iii) strong growth in public administration and defence services— dampeners on and catalysts to growth almost balancing each other and producing a real Gross Value Addition (GVA) growth (7.2 percent), quite similar to the one (7.1 per cent) in H2 2015-16 (Figure 1b).

Inflation this year has been characterized by two distinctive features. The Consumer Price Index (CPI)-New Series inflation, which averaged 4.9 per cent during April-December 2016, has displayed a downward trend since July when it became apparent that kharif agricultural production in general, and pulses in particular would be bountiful. The decline in pulses prices has contributed substantially to the decline in CPI inflation which reached 3.4 percent at end-December. The second distinctive feature has been the reversal of WPI inflation, from a trough of (-) 5.1 percent in August 2015 to 3.4 percent at end-December 2016, on the back of rising international oil prices. The wedge between CPI and WPI inflation, which had serious implications for the measurement of GDP discussed in MYEA (Box 3, Chapter 1, MYEA 2015-16), has narrowed considerably. Core inflation has, however, been more stable, hovering around 4.5 percent to 5 percent for the year so far. The outlook for the year as a whole is for CPI inflation to be below the RBI's target of 5 percent, a trend likely to be assisted by demonetisation.

External Sector

Similarly, the external position appears robust having successfully weathered the sizeable redemption of Foreign Currency Non-Resident (FCNR) deposits in late 2016, and the volatility associated with the US election and demonetisation. The current account deficit has declined to reach about 0.3 percent of GDP in the first half of FY2017. Foreign exchange reserves are at comfortable levels, having risen from around US\$350 billion at end-January 2016 to US\$ 360 billion at end-December 2016 and are well above standard norms for reserve adequacy. In part, surging net FDI inflows, which grew from 1.7 percent of GDP in FY2016 to 3.2 percent of GDP in the second quarter of FY2017, helped the balance-of-payments

The trade deficit declined by 23.5 per cent in April-December 2016 over corresponding period of previous year. During the first half of the fiscal year, the main factor was the contraction in imports, which was far steeper than the fall in exports. But during October- December, both exports and imports started a long-awaited recovery, growing at an average rate of more than 5 per cent. The improvement in exports appears to be linked to improvements in the world economy, led by better growth in the US and Germany. On the import side, the advantage on account of benign international oil prices has receded and is likely to exercise upward pressure on the import bill in the short to medium term. Meanwhile, the net services surplus declined in the first half, as software service exports slowed and financial service exports declined. Net private remittances declined by \$4.5 bn in the first half of 2016-17 compared to the same period of 2015-16, weighed down by the lagged effects of the oil price decline, which affected inflows from the Gulf region.

Fiscal Position

Trends in the fiscal sector in the first half have been unexceptional and the central government is committed to achieving its fiscal deficit target of 3.5 percent of GDP this year. Excise duties and services taxes have benefitted from the additional revenue measures introduced last year. The most notable feature has been the over-performance (even relative to budget estimates) of excise duties in turn based on buoyant petroleum consumption: real consumption of petroleum products (petrol) increased by 11.2 percent during April-December 2016 compared to same period in the previous year. Indirect taxes, especially petroleum excises, have held up even after demonetisation in part due to the exemption of petroleum products from its scope. More broadly, tax collections have held up to a greater extent than expected possibly because of payment of dues in demonetised notes was permitted. Non-tax revenues have been challenged owing to shortfall in spectrum and disinvestment receipts but also to forecast optimism; the stress in public sector enterprises has also reduced dividend payments.

State government finances are under stress. The consolidated deficit of the states has increased steadily in recent years, rising from 2.5 percent of GDP in 2014-15 to 3.6 percent of GDP in 2015-16, in part because of the UDAY scheme. The budgeted numbers suggest there will be an improvement this year. However, markets are anticipating some slippage, on account of the expected growth slowdown, reduced revenues from stamp duties, and implementation of their own Pay Commissions. For these reasons, the spread on state bonds over government securities jumped to 75 basis points in the January 2017 auction from 45 basis points in October 2016. For the general government as a whole, there is an improvement in the fiscal deficit with and without UDAY scheme. (Source: Economic Survey 2016-17 www.indiabudget.nic.in)

OUTLOOK FOR 2016-17

This year's outlook must be evaluated in the wake of the November 8 action to demonetize the high denomination notes. But it is first important to understand the analytics of the demonetisation shock in the short run. Demonetisation affects the economy through three different channels. It is potentially: 1) an aggregate demand shock because it reduces the supply of money and affects private wealth, especially of those holding unaccounted money; 2) an aggregate supply shock to the extent that economic activity relies on cash as an input (for example, agricultural production might be affected since sowing requires the use of labour traditionally paid in cash); and 3) an uncertainty shock because economic agents face imponderables related to the magnitude and duration of the cash shortage and the policy responses (perhaps causing consumers to defer or reduce discretionary consumption and firms to scale back investments).

Demonetisation is also very unusual in its monetary consequences. It has reduced sharply, the supply of one type of money—cash—while increasing almost to the same extent another type of money—demand deposits. This is because the demonetized cash was required to be deposited in the banking system. In the third quarter of FY2017 (when demonetisation was introduced), cash declined by 9.4 percent, demand deposits increased by 43 percent, and growth in the sum of the two by 11.3 percent.

The price counterparts of this unusual aspect of demonetisation are the surge in the price of cash (inferred largely through queues and restrictions), on the one hand; and the decline in interest rates on the lending rate (based on the marginal cost of funds) by 90 basis points since November 9; on deposits (by about 25 basis points); and on g-secs on the other (by about 32 basis points).

There is yet another dimension of demonetisation that must be kept in mind. By definition, all these quantity and price impacts will self-correct by amounts that will depend on the pace at which the economy is remonetized and policy restrictions eased. As this occurs, consumers will run down their bank deposits and increase their cash holdings. Of course, it is possible, even likely that the self-correction will not be complete because in the new equilibrium, aggregate cash holdings (as a share of banking deposits and GDP) are likely to be lower than before.

Anecdotal and other survey data abound on the impact of demonetisation. But we are interested in a macro-assessment and hence focus on five broad indicators: Agricultural (Rabi) sowing; Indirect tax revenue, as a broad gauge of production and sales; Auto sales, as a measure of discretionary consumer spending and two-wheelers, as the best indicator of both rural and less affluent demand; Real credit growth; and Real estate prices. Contrary to early fears, as of January 15, 2017 aggregate sowing of the two major rabi crops—wheat and pulses (gram)—exceeded last year's planting by 7.1 percent and 10.7 percent, respectively. Favourable weather and moisture conditions presage an increase in production. To what extent these favourable factors will be attenuated will depend on whether farmers' access to inputs—fertilizer, credit, and labour—was affected by the cash shortage.

To estimate a demonetisation effect, one needs to start with the counterfactual. Our best estimate of growth in the absence of demonetisation is 11¼ percent in nominal terms (slightly higher than last year's Survey forecast because of the faster rebound in WPI inflation, but lower than the CSO's advance estimate of 11.9 percent) and 7 percent in real terms (in line with both projections).

Finally, demonetisation will afford an interesting natural experiment on the substitutability between cash and other forms of money. Demonetisation has driven a sharp and dramatic wedge in the supply of these two: if cash and other forms are substitutable, the impact will be relatively muted; if, on the other hand, cash is not substitutable the impact will be greater.

OUTLOOK FOR 2017-18

Turning to the outlook for 2017-18, we need to examine each of the components of aggregate demand: exports, consumption, private investment and government.

As discussed earlier, India's exports appear to be recovering, based on an uptick in global economic activity. This is expected to continue in the aftermath of the US elections and expectations of a fiscal stimulus. The IMF's January update of its World Economic Outlook forecast is projecting an increase in global growth from 3.1 percent in 2016 to 3.4 percent in 2017, with a corresponding increase in growth for advanced economies from 1.6 percent to 1.9 percent. Given the high elasticity of Indian real export growth to global GDP, exports could contribute to higher growth next year, by as much as 1 percentage point.

The outlook for private consumption is less clear. International oil prices are expected to be about 10-15 percent higher in 2017 compared to 2016, which would create a drag of about 0.5 percentage points. On the other hand, consumption is expected to receive a boost from two sources: catch-up after the demonetisation-induced reduction in the last two quarters of 2016-17; and cheaper borrowing costs, which are likely to be lower in 2017 than 2016 by as much as 75 to 100 basis points. As a result, spending on housing and consumer durables and semi-durables could rise smartly. It is too early to predict prospects for the monsoon in 2017 and hence agricultural production. But the higher is agricultural growth this year, the less likely that there would be an extra boost to GDP growth next year.

Since no clear progress is yet visible in tackling the twin balance sheet problem, private investment is unlikely to recover significantly from the levels of FY2017. Some of this weakness could be offset through higher public investment, but that would depend on the stance of fiscal policy next year, which has to balance the short-term requirements of an economy recovering from demonetisation against the medium-term necessity of adhering to fiscal discipline—and the need to be seen as doing so. Putting these factors together, we expect real GDP growth to be in the 6¾ to 7½ percent range in FY2018. Even under this forecast, India would remain the fastest growing major economy in the world.

There are three main downside risks to the forecast. First, the extent to which the effects of demonetisation could linger into next year, especially if uncertainty remains on the policy response. Currency shortages also affect supplies of certain agricultural products, especially milk (where procurement has been low), sugar (where cane availability and drought in the southern states will restrict production), and potatoes and onions (where sowings have been low). Vigilance is essential to prevent other agricultural products becoming in 2017-18 what pulses were in 2015-16.

Second, geopolitics could take oil prices up further than forecast. The ability of shale oil production to respond quickly should contain the risks of a sharp increase, but even if prices rose merely to \$60-65/barrel the Indian economy would nonetheless be affected by way of reduced consumption; less room for public investment; and lower corporate margins, further denting private investment. The scope for monetary easing might also narrow, if higher oil prices stoked inflationary pressure.

Third, there are risks from the possible eruption of trade tensions amongst the major countries, triggered by geopolitics or currency movements. This could reduce global growth and trigger capital flight from emerging markets. The one significant upside possibility is a strong rebound in global demand and hence in India's exports. There are some nascent signs of that in the last two quarters. A strong export recovery would have broader spill over effects to investment.

Fiscal outlook

The fiscal outlook for the central government for next year will be marked by three factors. First, the increase in the tax to GDP ratio of about 0.5 percentage points in each of the last two years, owing to the oil windfall will disappear. In fact, excise-related taxes will decline by about 0.1 percentage point of GDP, a swing of about 0.6 percentage points relative to FY2017.

Second, there will be a fiscal windfall both from the high denomination notes that are not returned to the RBI and from higher tax collections as a result of increased disclosure under the Pradhan Mantra Garib Kalyan Yojana (PMGKY). Both of these are likely to be one-off in nature, and in both cases the magnitudes are uncertain.

A third factor will be the implementation of the GST. It appears that the GST will probably be implemented later in the fiscal year. The transition to the GST is so complicated from an administrative and technology perspective that revenue collection will take some time to reach full potential. Combined with the government's commitment to compensating the states for any shortfall in their own GST collections (relative to a baseline of 14 percent increase), the outlook must be cautious with respect to revenue collections. The fiscal gains from implementing the GST and

demonetisation, while almost certain to occur, will probably take time to be fully realized. In addition, muted non-tax revenues and allowances granted under the 7th Pay Commission could add to pressures on the deficit.

The macroeconomic policy stance for 2017-18

An economy recovering from demonetisation will need policy support. On the assumption that the equilibrium cash-GDP ratio will be lower than before November 8, the banking system will benefit from a higher level of deposits. Thus, market interest rates—deposits, lending, and yields on g-secs—should be lower in 2017-18 than 2016-17. This will provide a boost to the economy (provided, of course, liquidity is no longer a binding constraint). A corollary is that policy rates can be lower not necessarily to lead and nudge market rates but to validate them. Of course, any sharp uptick in oil prices and those of agricultural products, would limit the scope for monetary easing.

Fiscal policy is another potential source of policy support. This year the arguments may be slightly different from those of last year in two respects. Unlike last year, there is more cyclical weakness on account of demonetisation. Moreover, the government has acquired more credibility because of posting steady and consistent improvements in the fiscal situation for three consecutive years, the central government fiscal deficit declining from 4.5 percent of GDP in 2013-14 to 4.1 percent, 3.9 percent, and 3.5 percent in the following three years. But fiscal policy needs to balance the cyclical imperatives with medium term issues relating to prudence and credibility.

One key question will be the use of the fiscal windfall (comprising the unreturned cash and additional receipts under the PMGKY) which is still uncertain. Since the windfall to the public sector is both one off and a wealth gain not an income gain, it should be deployed to strengthening the government's balance sheet rather than being used for government consumption, especially in the form of programs that create permanent entitlements. In this light, the best use of the windfall would be to create a public sector asset reconstruction company so that the twin balance sheet problem can be addressed, facilitating credit and investment revival; or toward the compensation fund for the GST that would allow the rates to be lowered and simplified; or toward debt reduction. The windfall should not influence decisions about the conduct of fiscal policy going forward.

Perhaps the most important reforms to boost growth will be structural. In addition to those spelt out in Section 1—strategic disinvestment, tax reform, subsidy rationalization—it is imperative to address directly the twin balance sheet problem. The problem is large, persistent and difficult, will not correct itself even if growth picks up and interest rates decline, and current attempts have proved grossly inadequate. It may be time to consider something like a public sector asset reconstruction company.

Another area of reform relates to labour. Given the difficulty of reforming labor laws per se, the thrust could be to move towards affording greater choice to workers which would foster competition amongst service providers. Choices would relate to: whether they want to make their own contribution to the Employees' Provident Fund Organisation (EPFO); whether the employers' contribution should go to the EPFO or the National Pension Scheme; and whether to contribute to the Employee State Insurance (ESI) or an alternative medical insurance program. At the same time, there could be a gradual move to ensure that at least compliance with the central labour laws is made paperless, presence less, and cashless. One radical idea to consider is the provision of a universal basic income. But another more modest proposal worth embracing is procedural: a standstill on new government programs, a commitment to assess every new program only if it can be shown to demonstrably address the limitations of an existing one that is similar to the proposed one; and a commitment to evaluate and phase down existing programs that are not serving their purpose.

MANUFACTURING SECTOR IN INDIA

Introduction

Manufacturing has emerged as one of the high growth sectors in India. Prime Minister of India, Mr Narendra Modi, had launched the 'Make in India' program to place India on the world map as a manufacturing hub and give global recognition to the Indian economy. India is expected to become the fifth largest manufacturing country in the world by the end of year 2020*. The Gross Value Added (GVA) at basic constant (2011-12) prices from the manufacturing sector in India grew 7.9 per cent year-on-year in 2016-17, as per the 2nd provisional estimate of annual national income published by the Government of India. Under the Make in India initiative, the Government of India aims to increase the share of the manufacturing sector to the gross domestic product (GDP) to 25 per cent by 2022, from 16 per cent, and to create 100 million new jobs by 2022. Business conditions in the Indian manufacturing sector continue to remain positive

Investments:

With the help of Make in India drive, India is on the path of becoming the hub for hi-tech manufacturing as global giants such as GE, Siemens, HTC, Toshiba, and Boeing have either set up or are in process of setting up manufacturing plants in India, attracted by India's market of more than a billion consumers and increasing purchasing power.

- Cumulative Foreign Direct Investment (FDI) in India's manufacturing sector reached US\$ 70.51 billion by June 2017.

Tata Advanced Systems is collaborating with the world's largest defence contractor Lockheed Martin to manufacture the F-16 fighter jets in India.

Government Initiatives

In a bid to push the 'Make in India' initiative to the global level, Mr Narendra Modi, Prime Minister of India, pitched India as a manufacturing destination at the World International Fair in Germany's Hannover in 2015. Mr Modi showcased India as a business friendly destination to attract foreign businesses to invest and manufacture in the country.

The Government of India has taken several initiatives to promote a healthy environment for the growth of manufacturing sector in the country. Some of the notable initiatives and developments are:

The Government of India has introduced several policy measures in the Union Budget 2017-18 to provide impetus to the manufacturing sector. Some of which include reduction of income tax rate to 25 per cent for MSME companies having turnover up to Rs 50 crore (US\$ 7.5 million), MAT credit carry forward extended to 15 years from 10 years and abolishment of Foreign Investment Promotion Board (FIPB) by 2017-18.

The Government of India has launched a phased manufacturing programme (PMP) aimed at adding more smartphone components under the Make in India initiative thereby giving a push to the domestic manufacturing of mobile handsets.

The Government of India is in talks with stakeholders to further ease foreign direct investment (FDI) in defence under the automatic route to 51 per cent from the current 49 per cent, in order to give a boost to the Make in India initiative and to generate employment.

The Ministry of Heavy Industries and Public Enterprises, Government of India, has approved the setting up of four Centres of Excellence (CoE) in areas of textile machinery, machine tools, welding technology and smart pumps, which will help raise the technology depth of the Indian Capital Goods Industry.

The Ministry of Defence, Government of India, approved the "Strategic Partnership" model which will enable private companies to tie up with foreign players for manufacturing submarines, fighter jets, helicopters and armoured vehicles.

The Union Cabinet has approved the Modified Special Incentive Package Scheme (M-SIPS) in which, proposals will be accepted till December 2018 or up to an incentive commitment limit of Rs 10,000 crore (US\$ 1.5 billion).

Road Ahead

India is an attractive hub for foreign investments in the manufacturing sector. Several mobile phone, luxury and automobile brands, among others, have set up or are looking to establish their manufacturing bases in the country.

The manufacturing sector of India has the potential to reach US\$ 1 trillion by 2025 and India is expected to rank amongst the top three growth economies and manufacturing destination of the world by the year 2020. The implementation of the Goods and Services Tax (GST) will make India a common market with a GDP of US\$ 2 trillion along with a population of 1.2 billion people, which will be a big draw for investors.

With impetus on developing industrial corridors and smart cities, the government aims to ensure holistic development of the nation. The corridors would further assist in integrating, monitoring and developing a conducive environment for the industrial development and will

promote advance practices in manufacturing.

OUR BUSINESS STRATEGY

1. Enhancing our customer base

With the mandate for compliance with BS VI norms by the year 2020 in India, we anticipate enhanced demand for BS VI compliant products. The transition to BS VI norms would require significant engine technology changes. In order to cater to this change, we would focus on the enhancing our customer base by developing components compliant with BS VI norms and market the same to Tier 1 customers. We will also continue to enhance our OEM network and work closely with our OEM customers to develop new products for their vehicles and for marketing and branding. We further intend to widen our sales network so as to access more customers through our in-house marketing team by way of inter-alia presenting to them the technologies we possess.

2. Forward Integration

With the increasing focus of Make in India in the fields of defence and aerospace, we intend to expand our manufacturing process from conventional sintering to the metal injection moulding (MIM). We intend to expand into defence and aerospace industry with MIM products.

3. Expanding our product base

Considering the substantial operational costs, we anticipate that the OEMs will look for outsourcing of component assemblies. Currently, our Company is only a components supplier to its customer. The Company however intends become an assembly supplier for the OEMs wherein the component assembly would be done in-house and capitalize on this opportunity considering the technology backup from the Miba Sinter Austria GmbH.

We aim to expand our product range by developing new variants as per our customers' requirements. We have procured technology from MIBA Sinter Austria GmbH (MIBA), Austria, vide Technology Transfer Agreement which will enable us to manufacture cost-efficient and desired quality products.

4. Improving functional efficiencies

We will continue to invest in increasing our functional efficiency throughout the organization. Our Company intends to improve efficiencies to achieve cost reductions and have a competitive edge over our peers. We believe that this can be achieved through continuous process improvement, customer service and technology development. We also strive to improve the quality of the products manufactured. We impart technical training at regular intervals to our employees to enhance their skills.

BACKGROUND & MANUFACTURING PROCESS

We are into manufacturing of sintered components through Conventional or press-and-sinter.

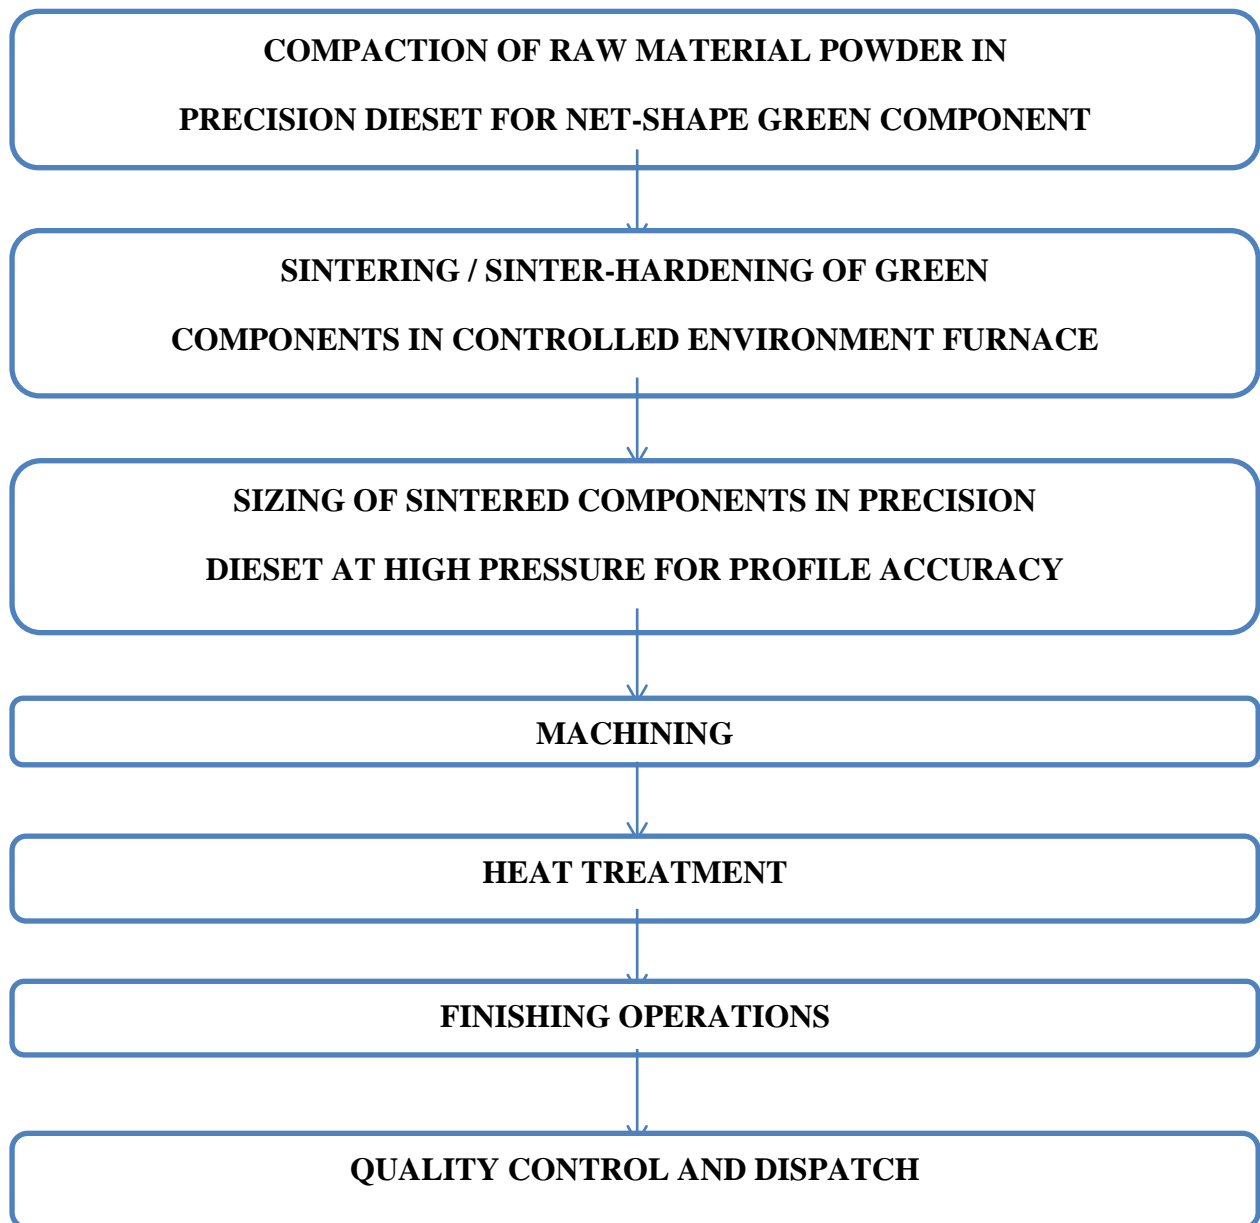

Sintering technology is a green manufacturing process as the raw material is produced out of recycled steel scrap and the end product is produced with minimal scrap generation. These attributes have enabled Powder Metallurgy (PM) to firmly establish itself in applications for the automotive, electrical, energy, aerospace, medical, defense, industrial, and consumer markets.

Conventional Powder Metallurgy (PM) Sintering Process is the metal forming process used for mass production of components wherein components are produced using compacting and forming a solid mass of powder formed raw material by heat or pressure without melting it to the point of liquefaction. It is different from the traditional metal forming processes wherein a solid mass of raw material is shaped into a final shape using chipping, pressing, heating and melting.

PM sintering manufacturing process has various stages, depending on the physical, metallurgical and precision requirements. Under this process Powder metal is compacted into net shape using die toolings. Such Compacted components are then sintered into furnaces at high temperatures below melting point in a phase wise manner. Broadly, the manufacturing process can be divided into 6 stages

- a) Compaction
- b) Sintering / Sinter-Hardening
- c) Sizing
- d) Soft Machining
- e) Heat Treatment
- f) Finishing
- g) Quality Control and Dispatch

MANUFACTURING PROCESS FLOW CHART

A. Compaction

Compaction process, as the name suggests, is the process of compacting powder form raw material into the component-shaped precision die. Raw material is filled in the cavity of precision die. Using multi-level controlled tool set and high compressive pressure of a specialized mechanical or hydraulic press, the raw material is uniformly pressed into the die set shape and desired density is achieved. At this stage, component is said to be at green stage. Green components are ejected from the die, and through guide chutes are sent towards inspection and storage area. Specialized storage racks are used for storing green components to prevent handling damage. The dies and tools are imported from China. The design and drawings for the tool manufacture are provided by us. Based on these drawings, the tooling supplier manufactures and supplies the tools and dies. The tools and dies form part of manufacturing process at the compaction stage. The net shapes to the parts are arrived based on these tools and dies. The parts can be produced as per the tools and dies.

We use various range on compaction presses starting from 70 MT upto 500 MT press.

B. Sintering / Sinter-Hardening

Sintering process is the process of fusing loose powder particles in the green components using controlled heating and cooling inside a furnace. Although first sintering dates from at least 25,000 years ago, in copper, bronze and ceramic pottery, only recently have we understood why particle bonding occurs. There are various steps involved in sintering of green components. First, the binding agents are burned off in the atmospheric chamber. This is required for metallic bond formation at later stages. Second, the components are heated to high temperatures in phase-wise manner, in an inert reducing environment chamber. At this stage, all metallic particles bond together in the process called sintering. In the last stage, components are slowly cooled to near room temperature and the component is said to be at brown stage.

Alternatively, rapid cooling stage is added at the end of heating stage. By faster cooling of components using liquid nitrogen jets, martensite or hardened structure is created. This process of rapid cooling after heating increases strength of components.

We use modern continuous belt furnaces with electric heating, in which all the chamber stages are lined up in series, and green components are fed on the mesh belt. Chambers are separated by gate system.

C. Sizing

Sizing process is the process of pressing brown stage components, which have metallic strength, in a profiled precision die at high pressure for correcting profile abnormalities and achieving higher profile accuracies. Sizing process is carried out for components with boundary profiles, outer or inner, like gear or splines, wherein high precision is required.

We have installed varying range of sizing presses with mechanical pressure systems, wherein we achieve DIN7 to DIN9 gear accuracies with mass production components.

D. Machining

Machining Operations are required to remove additional material available on part, to get the dimensions as per customer's requirement.

In Sintered Parts there are two types of Machining: (1) Soft machining & (2) Hard Machining

- (1) Soft Machining – Soft Machining is done before heat treatment in which Face Machining, Counter Machining, Machining on Outer Dia & Machining on Inner dia can be done.
- (2) Hard Machining:- Hard Machining is done after heat treatment mostly for internal diameter or for counter diameter.

For Synchroniser Hubs, Face Machining is required to control overall height & counter machining is required to maintain Internal diameter of External spline. We currently have 8 CNC Machines to carry certain machining operations and we generally outsource machining operations.

E. Heat Treatment

Metal components often require a heat treatment to obtain improved mechanical properties, such as increasing hardness or strength. The hardening process consists of heating the components above the critical or normalizing temperature in a controlled atmosphere, holding at this temperature for specific period, and cooling at a rate fast enough to allow the material to transform to a much harder, stronger structure. Process is finished with tempering of components to remove brittleness. Various range and type of heat treatment processes have been tailored for metal components to achieve wide range of physical properties as per requirements. All these processes can also be effectively used for sintered components also. Currently, we outsource this activity through a range of suppliers who specialize in heat treatment processes, in the vicinity of our plant. This enables us to cater to varying needs of our customers effectively.

F. Finishing

Sintered components may require finishing operations, like machining, grinding, deburring, burnishing etc., to achieve the precision requirements of customers. All finishing processes used for various metal components manufacturing can also be used for sintered components, as per requirements.

G. Quality Control and Dispatch

As per the requirements of ISO/TS 16909:2016 quality standards, we undertake quality control inspections at all stages of production process. We have

- A dedicated in-house plant laboratory to carryout various tests on raw materials e.g., essential for sustained production of quality product.
- A dedicated standards room for storage, calibration and maintenance of all the measurement tools and gauges.
- Measurement lab for precision tools and measurement gauges.
- A Tool maintenance shop.
- A designated area for pre-dispatch inspection of all components.

We carry out various quality control activities like

- Collection and preparation of samples
- Testing of incoming raw materials, consumables etc.
- Analysis of intermediate products and testing of finished products
- Feedback to the main production units to enable them to ensure corrective measures in a short time to eliminate process irregularities and rejection of costly intermediate/finished products
- Investigation of customer complaints for addressing them effectively

After final quality inspection, components are packed and dispatched to customer plants. We generally transport our products through four logistics agencies

Act."). The T.P. Act establishes the general principles relating to the transfer of property, including among other things, identifying the categories of property that are capable of being transferred, the persons competent to transfer property, the validity of restrictions and conditions imposed on the transfer and the creation of contingent and vested interest in the property. Transfer of property is subject to stamping and registration under the specific statutes enacted for the purposes which have been dealt with hereinafter.

- **Sale:** The transfer of ownership in property for a price, paid or promised to be paid.
- **Mortgage:** The transfer of an interest in property for the purpose of securing the payment of a loan, existing or future debt, or performance of an engagement which gives rise to a pecuniary liability. The T.P. Act recognizes several forms of mortgages over a property.

Stamp duty in relation to certain specified categories of instruments as specified under Entry 91 of the list, is governed by the provisions of the Indian Stamp Act, 1899 (“Stamp Act”) which is enacted by the Central Government. All other instruments are required to be stamped, as per the rates prescribed by the respective State Governments. Stamp duty is required to be paid on all the documents that are registered and as stated above the percentage of stamp duty payable varies from one state to another. Certain states in India have enacted their own legislation in relation to stamp duty while the other states have adopted and amended the Stamp Act, as per the rates applicable in the state. These differences are of temporary or permanent in nature. The tax effects of timing differences are shown as tax expense in the statement of profit and loss and corresponding effect are disclosed as deferred tax assets (subject to the consideration of prudence) or as deferred tax liabilities, in the balance sheet.

Revenue from operations: Our revenue from operations increased by 3.40% to Rs. 6533.93 lakhs for the financial year 2016-17 from Rs. 6318.82 lakhs for the financial year 2015-16. Our gross revenue from domestic markets increased to Rs. 6614.52 lakhs for the financial year 2016-17 as compared to Rs 6043.26 lakhs for the financial year 2015-16. However, this increase was partially offset by decrease in our gross export revenue. Changes in inventories of work-in-progress and finished goods: The amount of changes in inventories of work-in-progress was (Rs. 31.31) lakhs for the financial year 2016-17 as against Rs. 21.90 lakhs for the financial year 2015-16.

BASIS OF ALLOCATION

- a) The SEBI ICDR Regulations, 2009 specify the allocation or Allotment that may be made to various categories of Bidders in an Offer depending on compliance with the eligibility conditions. Certain details pertaining to the percentage of Offer size available for allocation to each category is disclosed overleaf of the Bid cum Application Form and in the RHP. For details in relation to allocation, the Bidder may refer to the RHP.
- b) Under-subscription in any category (except QIB Category) is allowed to be met with spill over from any other category or combination of categories at the discretion of the Issuer and in consultation with the BRLM and the Designated Stock Exchange and in accordance with the SEBI ICDR Regulations, 2009. Unsubscribed portion in QIB Category is not available for subscription to other categories.
- c) In case of under subscription in the offer, spill-over to the extent of such under-subscription may be permitted from the Reserved Portion to the offer. For allocation in the event of an under-subscription applicable to the Issuer, Bidders may refer to the RHP.
- d) Illustration of the Book Building and Price Discovery Process

Bidders should note that this example is solely for illustrative purposes and is not specific to the Offer; it also excludes Bidding by Anchor Investors.

Bidders can bid at any price within the Price Band. For instance, assume a Price Band of Rs.20 to Rs 24 per share, Offer size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (Rs.)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Offer the desired number of Equity Shares is the price at which the book cuts off, i.e., Rs. 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Offer Price at or below such Cut-Off Price, i.e., at or below Rs. 22.00. All Bids at or above this Offer Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

SECTION 6: OFFER PROCEDURE IN FIXED PRICE OFFER

This being Book Built Issue, this section is not applicable for this Issue.

SECTION 7: ALLOTMENT PROCEDURE AND BASIS OF ALLOTMENT

The Allotment of Equity Shares to Bidders other than Retail Individual Investors and Anchor Investors may be on proportionate basis. For Basis of Allotment to Anchor Investors, Bidders may refer to RHP. No Retail Individual Investor will be allotted less than the minimum Bid Lot subject to availability of shares in Retail Individual Investor Category and the remaining available shares, if any will be allotted on a proportionate basis. The Issuer is required to receive a minimum subscription of 90% of the Offer (excluding any Offer for Sale of specified securities). However, in case the Offer is in the nature of Offer for Sale only, then minimum subscription may not be applicable.

7.1 ALLOTMENT TO RIIs

Bids received from the RIIs at or above the Offer Price may be grouped together to determine the total demand under this category. If the aggregate demand in this category is less than or equal to the Retail Portion at or above the Offer Price, full Allotment may be made to the RIIs to the extent of the valid Bids. If the aggregate demand in this category is greater than the allocation in the Retail Portion at or above the Offer Price, then the maximum number of RIIs who can be allotted the minimum Bid Lot will be computed by dividing the total number of Equity Shares available for Allotment to RIIs by the minimum Bid Lot (“Maximum RII Allottees”). The Allotment to the RIIs will then be made in the following manner:

(a) In the event the number of RIIs who have submitted valid Bids in the Offer is equal to or less than Maximum RII Allottees, (i) all such RIIs shall be Allotted the minimum Bid Lot; and (ii) the balance available Equity Shares, if any, remaining in the Retail Portion shall be Allotted on a proportionate basis to the RIIs who have received Allotment as per (i) above for the balance demand of the Equity Shares Bid by them (i.e. who have Bid for more than the minimum Bid Lot).

(b) In the event the number of RIIs who have submitted valid Bids in the Offer is more than Maximum RII Allottees, the RIIs (in that category) who will then be allotted minimum Bid Lot shall be determined on the basis of draw of lots.

7.2 ALLOTMENT TO NIIs

Bids received from NIIs at or above the Offer Price may be grouped together to determine the total demand under this category. The allotment to all successful NIIs may be made at or above the Offer Price. If the aggregate demand in this category is less than or equal to the Non-Institutional Category at or above the Offer Price, full allotment may be made to NIIs to the extent of their demand. In case

the aggregate demand in this category is greater than the Non-Institutional Category at or above the Offer Price, allotment may be made on a proportionate basis upto a minimum of the Non-Institutional Category.

7.3 ALLOTMENT TO QIBs

For the Basis of Allotment to Anchor Investors, Bidders may refer to the SEBI ICDR Regulations, 2009 or Red Herring Prospectus / Prospectus. Bids received from QIBs bidding in the QIB Portion (net of Anchor Portion) at or above the Offer Price may be grouped together to determine the total demand under this category. The QIB Portion may be available for allotment to QIBs who have Bid at a price that is equal to or greater than the Offer Price. Allotment may be undertaken in the following manner:

- a. In the first instance allocation to Mutual Funds for upto 5% of the QIB Portion may be determined as follows: (i) In the event that Bids by Mutual Fund exceeds 5% of the QIB Portion, allocation to Mutual Funds may be done on a proportionate basis for upto 5% of the QIB Portion; (ii) In the event that the aggregate demand from Mutual Funds is less than 5% of the QIB Portion then all Mutual Funds may get full allotment to the extent of valid Bids received above the Offer Price; and (iii) Equity Shares remaining unsubscribed, if any and not allocated to Mutual Funds may be available for allotment to all QIBs.
- b. In the second instance, allotment to all QIBs may be determined as follows: (i) In the event of oversubscription in the QIB Portion, all QIBs who have submitted Bids above the Offer Price may be Allotted Equity Shares on a proportionate basis for upto 95% of the QIB Portion; (ii) Mutual Funds, who have received allocation as per (a) above, for less than the number of Equity Shares Bid for by them, are eligible to receive Equity Shares on a proportionate basis along with other QIBs; and (iii) Under subscription below 5% of the QIB Portion, if any, from Mutual Funds, may be included for allocation to the remaining QIBs on a proportionate basis.

7.4 ALLOTMENT TO ANCHOR INVESTOR

- a. Allocation of Equity Shares to Anchor Investors at the Anchor Investor Offer Price will be at the discretion of the company subject to compliance with the following requirements:
 - i) not more than 60% of the QIB Portion will be allocated to Anchor Investors;
 - ii) one-third of the Anchor Investor Portion shall be reserved for domestic Mutual Funds, subject to valid Bids being received from domestic Mutual Funds at or above the price at which allocation is being done to other Anchor Investors; and
 - iii) Allocation to the Anchor Investors shall be on a discretionary basis, and subject to:
 - where allocation in the Anchor Investor Portion is upto Rs. 1,000 Lakhs, maximum of 2 (two) Anchor Investors;
 - where the allocation under the Anchor Investor Portion is more than Rs. 1,000 Lakhs but upto Rs. 25,000 Lakhs, minimum of 2 (two) and maximum of 15 (fifteen) Anchor Investors, subject to a minimum Allotment of Rs. 500 Lakhs per Anchor Investor; and
 - where the allocation under the Anchor Investor portion is more than Rs. 25,000 Lakhs: (i) minimum of 5 (five) and maximum of 15 (fifteen) Anchor Investors for allocation upto Rs. 25,000 Lakhs; and (ii) an additional 10 Anchor Investors for every additional allocation of Rs. 25,000 Lakhs or part thereof in the Anchor Investor Portion; subject to a minimum Allotment of Rs. 500 Lakhs per Anchor Investor.
- b. An Anchor Investor shall make an application of a value of at least Rs. 1,000 Lakhs in the Offer.
- c. A physical book is prepared by the Registrar on the basis of the Bid cum Application Forms received from Anchor Investors. Based on the physical book and at the discretion of the

company in consultation with the BRLM, selected Anchor Investors will be sent a CAN and if required, a revised CAN.

- d. **In the event that the Offer Price is higher than the Anchor Investor Offer Price:** Anchor Investors will be sent a revised CAN within 1 (one) day of the Pricing Date indicating the number of Equity Shares allocated to such Anchor Investor and the pay-in date for payment of the balance amount. Anchor Investors are then required to pay any additional amounts, being the difference between the Offer Price and the Anchor Investor Offer Price, as indicated in the revised CAN within the pay-in date referred to in the revised CAN. Thereafter, the Allotment Advice will be issued to such Anchor Investors
- e. **In the event the Offer Price is lower than the Anchor Investor Offer Price:** Anchor Investors who have been Allotted Equity Shares will directly receive Allotment Advice.

7.5 BASIS OF ALLOTMENT

Allotment will be made in consultation with the EMERGE Platform of National Stock Exchange of India Limited (The Designated Stock Exchange). In the event of oversubscription, the allotment will be made on a proportionate basis in marketable lots as set forth hereunder:

- (a) The total number of Shares to be allocated to each category as a whole shall be arrived at on a proportionate basis i.e. the total number of Shares applied for in that category multiplied by the inverse of the oversubscription ratio (number of Bidders in the category x number of Shares applied for).
- (b) The number of Shares to be allocated to the successful Bidders will be arrived at on a proportionate basis in marketable lots (i.e. Total number of Shares applied for into the inverse of the over subscription ratio).
- (c) For Bids where the proportionate allotment works out to less than [●] equity shares the allotment will be made as follows:
- Each successful Bidder shall be allotted [●] equity shares; and
 - The successful Bidder out of the total bidders for that category shall be determined by the drawl of lots in such a manner that the total number of Shares allotted in that category is equal to the number of Shares worked out as per (b) above.
- (d) If the proportionate allotment to a Bidder works out to a number that is not a multiple of [●] equity shares, the Bidder would be allotted Shares by rounding off to the nearest multiple of [●] equity shares subject to a minimum allotment of [●] equity shares.
- (e) If the Shares allotted on a proportionate basis to any category is more than the Shares allotted to the Bidders in that category, the balance available Shares or allocation shall be first adjusted against any category, where the allotted Shares are not sufficient for proportionate allotment to the successful Bidder in that category, the balance Shares, if any, remaining after such adjustment will be added to the category comprising Bidder applying for the minimum number of Shares. If as a result of the process of rounding off to the nearest multiple of [●] Equity Shares, results in the actual allotment being higher than the shares offered, the final allotment may be higher at the sole discretion of the Board of Directors, up to 110% of the size of the offer specified under the Capital Structure mentioned in this RHP.

Retail Individual Investor' means an investor who applies for shares of value of not more than Rs. 2,00,000/- Investors may note that in case of over subscription allotment shall be on proportionate basis and will be finalized in consultation with National Stock Exchange of India Limited.
