All forward looking statements are subject to risks, uncertainties and assumptions about us that could cause actual results to differ materially from those contemplated by the relevant forward-looking statement. Forward-looking statements reflect our current views with respect to future events and are not a guarantee of future performance. These statements are based on our management’s beliefs and assumptions, which in turn are based on currently available information. Although we believe the assumptions upon which these forward-looking statements are based are reasonable, any of these assumptions could prove to be inaccurate, and the forward-looking statements based on these assumptions could be incorrect.

Important factors that could cause actual results to differ materially from our expectations include but are not limited to:

1. Derive major portion of our revenues from few customers, loss of any such customer will have a material adverse impact on our business and revenue
2. Not entered into any long term contracts with any of our customers and typically operate on the basis of short term contracts and work orders, which could adversely impact our revenue and profitability;
3. Agreements and work orders with customers expose us to certain risk, which may negatively impact our revenue and profitability;
4. Revenues and profits are dependent on several factors. Any adverse change in these factors or in combination of these factors may affect our business operations and the financial condition and consequently, our ability to pay dividends;
5. Experience delays and/or defaults in client payments, we may be unable to recover all expenditures;
6. Limited operating history which makes it difficult for investors to evaluate our historical performance or future prospects;
7. Our ability to successfully implement our growth strategy and expansion plans;
8. Failure to attract and retain trained employees as competition for skilled personnel is intense and we experience significant attrition rates;
9. Our business and profitability may be negatively affected if we are not able to anticipate rapid changes in technology, or innovate and diversify our service offerings in response to market challenges;
10. Changes in political and social conditions in India or in countries that we may enter, the monetary and interest rate policies of India and other countries, inflation, deflation, unanticipated turbulence in interest rates, equity prices or other rates or prices;

We cannot assure investors that the expectation reflected in these forward-looking statements will prove to be correct. Given these uncertainties, investors are cautioned not to place undue reliance on such forward-looking statements and not to regard such statements as a guarantee of future performance.

Any of the following risks, as well as the other risks and uncertainties discussed in this Prospectus, could have an adverse effect on our business, financial condition, results of operations and prospects and could cause the trading price of our Equity Shares to decline, which could result in the loss of all or a part of your investment. The risks and uncertainties described in this section are not the only risks that we may face. Additional risks and uncertainties not known to us or that we currently believe to be immaterial may also have an adverse effect on our business, results of operations, financial condition and prospects.

Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Prospectus.

The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are certain risk factors where the effect is not quantifiable and hence has not been disclosed in such risk factors. You should not invest in this offering unless you are prepared to accept the risk of losing all or part of your investment, and you should consult your tax, financial and legal advisors about the particular consequences to you of an investment in the Equity Shares.

The financial information in this section is, unless otherwise stated, derived from our Consolidated Restated Financial Statements prepared in accordance with Indian GAAP, as per the requirements of the Companies Act 2013 and SEBI (ICDR) Regulations. The risk factors have been determined on the basis of their materiality. Some events may not be material individually but may be found to be material collectively, some events may have a material impact qualitatively instead of quantitatively and some events may not be material at present but may have material impacts in the future.

The Risk Factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

1. *Some risks may not be material individually but may be material when considered collectively.*
2. *Some risks may have material impact qualitatively instead of quantitatively.*
3. *Some risks may not be material at present but may have a material impact in the future.*

- 1. We may not be able to qualify for, compete and win projects through competitive bid, which could adversely affect our business and results of operations and impact our financial conditions.***

We obtain a majority of our projects through a competitive bidding process and in selecting contractors for major projects, our clients generally limit the tender to contractors /sub-contractors they have pre-qualified based on several criteria including experience, technical and technological capacity, previous performance, reputation for quality, safety record, the financial strength of the bidder as well as its ability to provide performance guarantees. However, price competitiveness of the bid is typically one of the most important selection criterion. In some cases we may enter into consortium arrangements with other companies to bid for contracts where we may not qualify on our own. We are currently qualify to bid for projects up to a certain value and size and therefore may not be able to compete for middle and larger projects. Our ability to bid for and win major projects is also dependent on our ability to show experience of working on other similar sector and developing a track record of executing more technically complex projects. If we are unable to pre-qualify for projects that we intend to bid on, or successfully compete for and win such projects, our business, results of operations and financial conditions may be adversely affected resulting to hamper our Business.

- 2. The registered office and branch office of the Company are not owned by us.***

All the places from we are operating our business are on rent for a certain period that may be renewed with mutual consent. Any discontinuation of agreement to use the premises will lead us to locate any other premises. Our inability to identify the new premises may adversely affect the operations, finances and profitability of our Company.

For further details please refer to section titled Our Business on page no. 98 of this prospectus.

- 3. We have not entered into any long term contracts with any of our customers and typically operate on the basis of short term contracts and work orders, which could adversely impact our revenue and profitability.***

We do not have any long term contracts with our customers and we provide services on basis of regular work orders and short term contracts with our customers which could adversely affect the business of our Company. We have not entered into contracts with any customers. We cater our services on an order to order basis. Our customers can terminate their relationship with us by giving notice and as such terms and conditions as mutually agreed upon, which could materially and adversely impact our business. Although we believe that we have satisfactory business relations with our customers and have received business from them in the past and will regularly receive the business in future also but there is no certainty that we will receive business in future from them and may affect our profitability.

- 4. Our agreements and work orders with customers expose us to certain risk, which may negatively impact our revenue and profitability.***

In the agreements and work orders with our customers, we are required to deliver the services to the customer within the scheduled time lines. Further, each order is customized to the customer's requirement. Termination of an agreement and work orders, inadequate performance and/or failure on our part or any third party to meet quality and/or scheduled timelines set by our customers could result in a loss of our business or result in non-compliance with our contractual obligations and could materially or adversely affect our business, profit and results of operation. Besides, the agreements and work orders can be terminated with or without cause and at short notice usually after paying costs incurred by us. Additionally, most of our agreements with our customers are without any commitment to future work. Our business is dependent on the decisions and actions of our customers, and there are a number of factors relating to our customers that are outside our control that might result in the termination of a project or the loss of a customer. In addition, as our scope of services involves providing skilled and trained personnel to our customers for carrying out customer services, such as assisting in network failure and other related issues, failure on part of the personnel provided by us to successfully carry out such services may also result in the termination of a project or the loss of a customer. Any of these factors may adversely affect our revenues and profitability.

5. We face significant competition in the Indian market, which may reduce our market share and adversely affect our business, financial condition, results of operations and prospects.

Our industry is highly competitive and our results of operations and financial conditions are sensitive to, and may be materially and adversely affected by, competitive pricing and other factors. Competition may result in pricing pressures, reduced profit margins or lost market share or a failure to grow our market share, any of which could substantially harm our business and results of operations.

Competition in the industry is significant. We operate in highly competitive and fragmented markets, and competition in these markets is based primarily on market trends and customer preferences. The players in the Industry sector in India often offer their products at highly competitive prices and many of them are well established in their local markets.

Competition may result in pricing pressures, reduced profit margins or lost market share or a failure to grow our market share, any of which could substantially harm our business and results of operations. There can be no assurance that we can effectively compete with our competitors in the future, and any such failure to compete effectively may have a material adverse effect on our business, financial condition and results of operations.

Some of our competitors may be larger than us in terms of business volume. In addition, our competitors that are smaller specialized companies may compete effectively against us based on price and their concentrated size and focus. For details of our competitors, see the section “Our Business” on page 98.

6. Our business is dependent on certain principal customers and the loss of, or a significant reduction in purchases by, such customers could adversely affect our business, financial condition, results of operations and future prospects

A majority of our revenue is derived from our top 10 domestic customers. Sales to our top 10 customers contributed 63.93%, of our revenue from operations in Fiscal 2017. Since we are largely dependent on certain key customers for a significant portion of our sales, the loss of any one of our key customers or a significant reduction in demand from such customers could have a material adverse effect on our business, financial condition, results of operations and future prospects.

Further, since our business is presently concentrated among a few significant customers, we may also experience reduction in cash flows and liquidity if we lose one or more of our top customers.

Additionally, the loss of any key customer may significantly affect our revenues and we may have difficulty securing comparable levels of business from other customers or may not be able to secure new customers in a timely manner or at all to offset any loss of revenue from the loss of any of our key customers, including our largest customer or even our top five customers. We may also not be able to easily re-allocate our resources and assets in a timely or efficient manner. Additionally, in order to retain some of our significant customers we may also be required to offer terms to them which may place restraints on our resources and reduce our profitability.

The occurrence of any of the above may have a significant adverse impact on our business, financial condition, results of operations and future prospects.

7. We have experienced negative cash flows and any negative cash flows in the future could adversely affect our financial conditions and results of operations.

The detailed break up of cash flows as restated is summarized in below mentioned table and our Company have reported negative cash flow in certain financial years and which could affect our business and growth:

(Rs. In Lakhs)

Particulars	For the period ended 31 st December 2017	For the year ended				
		31 st March 2017	31 st March 2016	31 st March 2015	31 st March 2014	31 st March 2013
Net Cash flow from Operative activities	455.58	258.99	(289.94)	(116.85)	(109.89)	(121.11)
Net Cash flow from Investing activities	(67.07)	(218.87)	(14.68)	(5.70)	(81.58)	128.72

Net Cash flow from Financing activities	(479.36)	56.08	418.65	157.13	196.56	(37.46)
Net Cash Flow for the Year	(90.85)	96.21	114.03	34.58	5.09	(29.85)

8. *Our revenues and profits are dependent on several factors. Any adverse change in these factors or in combination of these factors may affect our business operations and the financial condition and consequently, our ability to pay dividends.*

Our revenues and profits are dependent on several factors such as developing new products, retaining key managerial personnel, complying with various regulatory requirements, repeat orders from our clients, managing costs and expenses, maintaining adequate inventory levels, general market conditions, etc. Any adverse change in these factors or a combination of these factors may adversely affect our business operations and financial condition. Further our ability to pay dividends will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditures, and various other factors and there can be no assurance that we shall have distributable funds or that we will declare dividends in the future as well.

9. *Our Company has several contingent liabilities which if materialises may adversely affect the financial position of the Company.*

As on December 31, 2017 our Company has contingent liabilities of Rs. 1738.69 lacs towards bank guarantees and other money for which our company is contingently liable. The said contingent liabilities if materialises may adversely affect the financial position / working capital requirement of the Company.

10. *Our Order Book does not represent our future revenues and our actual income may be significantly less than the estimates reflected in our Order Book, which could adversely affect our results of operations.*

We are mainly into sale of electrical items products and work contract services and labour services. Our Company has orders from which it expects future revenue and profit. Projects in the order book represent business that is considered firm. Our Order Book does not necessarily indicate future earnings related to the performance of that work, as cancellations or unanticipated variations or scope or schedule adjustments may occur. Due to changes in project scope and schedule, we cannot predict with certainty when or if contracts in our Order Book will be performed. In addition, even where a project proceeds as scheduled, it is possible that contracting parties may default and fail to make the payments due. We cannot guarantee that the income anticipated in our Order Book will be realized, or, if realized, will be realized on time or result in profits. Any project cancellations or scope adjustments, which may occur from time to time, could reduce the amount of our Order Book and the income and profits that we ultimately earn from the contracts. Any delay, cancellation or payment default could have a material adverse effect on our business. For some of the contracts in our Order Book, our clients are obliged to perform or take certain actions, such as acquiring land, securing the right of way, clearing forests, providing owner supplied material, securing required licenses, authorizations or permits, making advance payments or opening of letters of credit, approving designs, approving supply chain vendors and shifting existing utilities. If we do not perform such actions in a timely manner, and the possibility of such failure is not provided for in the contract, our projects could be delayed, modified or cancelled. Accordingly, the realization of our Order Book and the effect on our results of operations may vary significantly from reporting period to reporting period depending on the nature of such contracts, actual performance of such contracts, as well as the stage of completion of such contracts as of the relevant reporting date as it is impacted by applicable accounting principles affecting revenue and cost recognition.

11. *There are outstanding legal proceedings by and against our Company, Promoters and Directors which may adversely affect our business, financial condition and results of operations.*

There are outstanding legal proceedings filed by and against our Company, Promoters and Directors. These proceedings are pending at different levels of adjudication before various courts and appellate forums. Such proceedings could divert management time and attention, and consume financial resources. Further, an adverse judgment in some of these proceedings could have an adverse impact on

In the event of any cognizance being taken by the concerned authorities in respect of above, penal actions may be taken against the Company and its directors, in which event the financials of the Company and its directors may be affected.

13. We require certain approvals and licenses in the ordinary course of business and are required to comply with certain rules and regulations to operate our business, and the failure to obtain, retain and renew such approvals and licenses or comply with such rules and regulations, and the failure to obtain or retain them in a timely manner or at all may adversely affect our operations.

We require several statutory and regulatory permits, licenses and approvals to operate our business, some of which our Company has either received, applied for or is in the process of application. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Non-renewal of the said permits and licenses would adversely affect our Company's operations, thereby having a material adverse effect on our business, results of operations and financial condition. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all.

Our Company requires the following statutory and regulatory registration for our business; however, the same has not been obtained by us, as on date of this Prospectus:

Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change, we may incur increased costs, be subject to penalties or suffer a disruption in our business activities, any of which could adversely affect our results of operations. For further details, please see chapters titled “Key Regulations and Policies” and “Government and Other Statutory Approvals” at pages 114 and 187 respectively of this Prospectus.

14. Our business is subject to various operating risks at our project sites, the occurrence of which can affect our results of operations and consequently, financial condition of our Company.

Our business operations are subject to operating risks, such as breakdown or failure of equipments used at the project sites, weather conditions, shortage of consumables, performance below expected levels of output or efficiency, natural disasters, obsolescence, labour disputes and industrial accidents. The occurrence of these risks, if any, could significantly affect our operating results, and the slowdown / shutdown of business operations may have a material adverse effect on our business operations and financial conditions.

15. If we experience delays and/or defaults in client payments, we may be unable to recover all expenditures.

Because of the nature of our business, we sometimes commit resources to projects prior to receiving payments from the client in amounts sufficient to cover expenditures as they are incurred. In difficult economic times, some of our clients may find it increasingly difficult to pay invoices for our services timely, increasing the risk that our accounts receivables could become uncollectible and ultimately be written off. Delays in client payments may require us to make a working capital investment, which could impact our cash flows and liquidity. If a client fails to pay invoices on a timely basis or defaults in making its payments on a project in which we have devoted significant resources, there could be an adverse effect on our results of operations or liquidity.

16. Our growth will depend on our ability to develop our brand and failure to do so may have a negative impact on our ability to compete in the finance industry.

We believe that continuous brand building is necessary for achieving widespread recognition of our services. Promoting and positioning our brand will depend largely on the success of our marketing efforts and our ability to provide high quality services. Brand promotion activities may not yield increased revenues, and even if they do, any increased revenues may not offset the expenses we incur in building our brand. If we fail to promote and maintain our brand, our business, financial condition and results of operations could be adversely affected.

17. Our customer contracts/arrangements can typically be terminated without cause and with little or no notice or penalty, which could negatively impact our revenues and profitability.

Most of our customer arrangements/contracts with private parties can be terminated with or without cause, usually at short notice and without termination related penalties. Additionally, most of our agreements with customers are without any commitment to future work. Our business is dependent on the decisions and actions of our customers, and there are number of factors relating to our customers that are outside our control and which might result in the termination of a project or the loss of a customer. Any of these factors could adversely affect our revenues and profitability.

18. Our success largely depends upon the knowledge and experience of our Promoters and our Key Management Personnel as well as our ability to attract and retain skilled personnel. Any loss of our Key Management Personnel or our ability to attract and retain them and other skilled personnel could adversely affect our business, results of operations and financial condition.

We depend on the management skills and guidance of our Promoters for development of business strategies, monitoring their successful implementation and meeting future challenges. Further, we also

significantly depend on the expertise, experience and continued efforts of our Key Management Personnel. Our future performance will depend largely on our ability to retain the continued service of our management team. If one or more of our Key Management Personnel are unable or unwilling to continue in his or her present position, it could be difficult for us to find a suitable or timely replacement and our business could be adversely affected.

There is significant competition for management and other skilled personnel in the industry in which we operate, and it may be difficult to attract and retain the personnel we require in the future. There can be no assurance that our competitors will not offer better compensation packages, incentives and other perquisites to such skilled personnel. Further, in the event we are not able to attract and retain talented employees, as required for conducting our business, or if we experience high attrition levels which are largely out of our control, or if we are unable to motivate and retain existing employees, our business, financial condition and results of operations may be adversely affected. For further details, see “Our Management” on page 125.

19. *Failure to successfully procure raw materials or to identify new raw material suppliers could adversely affect us.*

Our business depends on our ability to attract and retain high quality and cost efficient raw material suppliers. In the event we are unable to continue to procure raw materials at competitive prices, at terms acceptable to us or at all, our business will be adversely affected.

Furthermore, the success of our supplier relationships depends significantly on satisfactory performance by our suppliers and their fulfillment of their obligations. There can be no assurance that there will not be a significant disruption in the supply of raw materials currently sourced by us or, in the event of a disruption, that we would be able to locate alternative suppliers of materials or third party manufacturers of comparable quality at an acceptable price, or at all.

20. *Certain qualifications have been noted by Peer Review Auditors in their report on the Restated Financial Statements for non provision for Gratuity Payment as required under the Payment of Gratuity Act 1972.*

Our Peer Review Auditors have provided certain qualifications in their report on the Restated Financial Statements relating to the financial statements for our Company that as per Accounting Standard- 15: Employee Benefits issued by the Institute of Chartered Accountants of India, Company is required to assess its gratuity liability each year on the basis of actuarial valuation and make provision for gratuity liability. We have not complied with the same in past. The effect of the non-compliance is not quantifiable. However, now our Company has made necessary compliance in accordance with the accounting standards in the restated financial statements of our Company.

21. *If we are unable to maintain and enhance our brand, the sales of our products may suffer which would have a material adverse effect on our financial condition and results of operations.*

We believe that the brand we have developed has significantly contributed to the success of our business. We also believe that maintaining and enhancing the brand, are critical to maintaining and expanding our customer base. Maintaining and enhancing our brand may require us to make substantial investments in areas such as research and development, marketing and brand building activities, and these investments may not be successful. There can be no assurance that consumers will continue to be receptive to our sub-brands.

In particular, as we expand into new geographic markets, there can be no assurance that consumers in these markets will accept our brand and sub-brands. We anticipate that, as our business expands into new markets and as the market becomes increasingly competitive, maintaining and enhancing our brand and sub-brands may become increasingly difficult and expensive. Our brand may also be adversely affected if our public image or reputation is tarnished by any negative publicity. Maintaining and enhancing our brand and sub-brands will depend largely on our ability to anticipate, gauge and respond in a timely manner to changing fashion trends and consumer demands and preferences, and to continue to provide high quality products, which we may not do successfully. If we are unable to maintain or enhance our brand image, our results of operations may suffer and our business may be harmed.

22. *We may incur significant advertising and marketing costs to promote our brand in the future.*

We believe that our future success will be partially influenced by further development of our brand our ability to communicate effectively about our products to various target consumers through consistent and focused marketing and advertising initiatives. Insufficient investments in marketing and brand building could also erode or impede the development of our brand. Accordingly, we may be required to invest significant resources towards marketing and brand building exercises, specifically with respect to new geographic markets where we intend to penetrate. Further, we cannot assure you that our marketing and advertising ventures will be successful and achieve their objectives or we may not be required to make further investments than anticipated. This could have an adverse affect on our prospects and growth.

23. *Our Promoters together with our promoter group will continue to retain majority shareholding in our company subsequent to the issue, which will allow them to exercise significant influence over our company. We cannot assure you that our promoters and /or our promoter group will always act in our company's or your best interest.*

The majority of our issued and outstanding Equity Shares are currently beneficially owned by our Promoters and our Promoter Group. Upon completion of the Issue, our Promoters and Promoter Group will own 49,01,500 Equity Shares, or 69.58% of our post-Issue Equity Share capital (assuming full subscription of the Issue). Accordingly, our Promoters and Promoter Group will continue to exercise significant influence over our business policies and affairs and all matters requiring shareholders' approval, including the composition of our Board, the adoption of amendments to our memorandum and articles of association, the approval of mergers, strategic acquisitions or joint ventures or the sales of substantially all of our assets, and the policies for dividends, lending, investments and capital expenditures. This concentration of ownership also may delay, defer or even prevent a change in control of our Company and may make some transactions more difficult or impossible without the support of these shareholders. The interests of the Promoters and Promoter Group as our Company's controlling shareholders could conflict with our Company's interests or the interests of its other shareholders. We cannot assure you that the Promoters and Promoter Group will act to resolve any conflicts of interest in our Company's or your favor.

24. *Our business is manpower intensive and a high proportion of our total staff comprises of employees on contract. Our business may be adversely affected if we are unable to obtain employees on contract or at commercially attractive costs.*

We operate in an industry which requires skilled technical resources and our success depends in large part upon our ability to attract, hire, train and retain qualified employees, including our ability to attract employees with needed skills in the geographic areas in which we operate. In the event we are not be able to attract a high degree of talented employees, or experience high attrition levels which are largely out of our control or are unable to motivate and retain our existing employees, the future of our business and operations may be affected. We cannot assure that we will be successful in reducing attrition rate or ensuring that the attrition rate does not rise further in the future. Given the present scenario, high attrition rate being an industry phenomenon, we have taken recourse by training the new recruits. This has helped us to have duly trained manpower to fill in the vacancy on an immediate basis.

25. *If we fail to manage growth effectively it could have an adverse effect on our results of operations*

We believe our expansion plans will place significant demands on our managerial, operational and financial resources. Growth in our business would require us to expand, train and manage our employee base. The expansion of our Company could also cause problems related to our operational and financial systems and controls and could cause us to encounter working capital issues, as we will need increased liquidity to finance the purchase of inventory, establishment of new showrooms and the hiring of additional employees. If we fail to manage our growth effectively it may lead to operational and financial inefficiencies that would have a negative effect on our results of operations

26. *The operations of our Company are subject to operating risk and may be disrupted by failure in the facilities.*

Our Company is subject to operating risks associated our industry. Our facilities are subject to operating risks, such as the breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, obsolescence, loss of services of our external contractors, earthquakes, other natural disasters and industrial accidents. Our facilities are also subject to operating risk arising from compliance with the directives of relevant government authorities. Operating risks may result in personal injury and property damage and in the imposition of civil and criminal penalties. The occurrence of any of these events could have a material adverse effect on our business, financial condition and results of operations.

27. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements and capital expenditures and the terms of our financial arrangements.*

Our Company has not paid any dividends in the last four Fiscal years. The declaration of dividends in the future will be recommended by our Board of Directors, at its sole discretion, and will depend upon our future earnings, financial condition, cash flows, working capital requirements and capital expenditures. There can be no assurance that we will pay dividends in the future. Additionally, we are restricted by the terms of our debt financing from making dividend payments in the event we default in any of the debt repayment installments.

28. *Insurance coverage not obtained by us against unforeseen losses.*

Our Company has not maintained adequate insurance coverage in accordance with industry standards. In case of any unforeseen damage or loss suffered by us will affect the business adversely and could adversely affect our financial condition, cash flows and results of operations.

29. *In the last 12 (twelve) months, we have issued and allotted certain equity shares at a price lower than the Issue Price which is as follows:*

As at January 31, 2018, we had 58 full-time employees on our rolls. Although we have not experienced any major disruptions to our business operations due to any labour disputes or other problems with our work force in the past, there can be no assurance that we will not experience such disruptions in the future. Such disruptions may adversely affect our business, reputation and results of operations and may also divert the management's attention and result in increased costs. India has stringent labour legislations that protect the interests of workers, including legislations that set forth detailed procedures for the establishment of trade unions, dispute resolution and employee removal and legislations that impose certain financial obligations on employers upon retrenchment. Although our employees are not currently unionized, there can be no assurance that they will not unionize in the future. We have not entered into any labour contract agreement which may impact the unavailability of labour at certain time resulting impact on our operations. If our employees unionize, it may become difficult for us to maintain flexible labour policies, and we may face the threat of labour unrest, demand for increase in wages, work stoppages, which may lead to diversion of our management's attention due to union intervention, which may have a material adverse impact on our business, results of operations and financial condition.

We are also subject to laws and regulations governing relationships with employees, in such areas as minimum wage and maximum working hours, overtime, working conditions, hiring and terminating of employees and work permits. Further, the minimum wage laws in India may be amended leading to upward revisions in the minimum wages payable in one or more states in which we currently operate or are planning to expand to. Shortage of skilled personnel or work stoppages caused by disagreements with employees could have an adverse effect on our business and results of operations.

31. *Insufficient cash flows to meet required working capital requirements could adversely affect our Company's operations and financial results*

The business of our Company requires a significant amount of working capital to finance the payments for Manpower and day to day expenses. The working capital requirements of our Company are also affected by the credit period that our Company extends to its customers, in line with industry practice. Moreover, our Company may need to raise term loans and working capital loans in the future to meet its capital expenditure and to satisfy its working capital requirements. There can be no assurance that our Company will continue to be successful in arranging adequate working capital and term loans for its existing or expanded operations on acceptable terms or at all, which could adversely affect our Company's operations and financial results.

On November 8, 2016, the RBI and the Ministry of Finance of the GoI withdrew the legal tender status of ₹500 and ₹ 1,000 currency notes pursuant to notification dated November 8, 2016. Terrorist attacks and other acts of violence may adversely affect the Indian stock markets, where our Equity Shares will trade, and the global equity markets generally.

50. The proposed adoption of IFRS could result in our financial condition and results of operations appearing materially different than under Indian GAAP.

Public companies in India, including us, may be required to prepare annual and interim financial statements under IFRS in accordance with the roadmap for the adoption of, and convergence with, IFRS announced by the Ministry of Corporate Affairs, GoI (MCA), through a press note dated January 22, 2010. The MCA through a press release dated February 25, 2011, announced that it will implement the converged accounting standards in a phased manner after various issues including tax-related issues are resolved. The MCA is expected to announce the date of implementation of the converged accounting standards at a later date. Our financial condition, results of operations, cash flows or changes in shareholders’ equity may appear materially different under IFRS than under Indian GAAP. This may have a material adverse effect on the amount of income recognized during that period and in the corresponding period in the comparative fiscal year/period. In addition, in our transition to IFRS reporting, we may encounter difficulties in the ongoing process of implementing and enhancing our management information systems. Moreover, our transition may be hampered by increasing competition and increased costs for the relatively small number of IFRS-experienced accounting personnel available as more Indian companies begin to prepare IFRS financial statements.

51. *Instability in financial markets could materially and adversely affect our results of operations and financial condition.*

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets.

The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in NIFTY, NSE's/ SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

52. *The Companies Act, 2013 has effected significant changes to the existing Indian company law framework, which may subject us to higher compliance requirements and increase our compliance costs*

A majority of the provisions and rules under the Companies Act, 2013 have recently been notified and have come into effect from the date of their respective notification, resulting in the corresponding provisions of the Companies Act, 1956 ceasing to have effect. The Companies Act, 2013 has brought into effect significant changes to the Indian company law framework, such as in the provisions related to issue of capital, disclosures in prospectus, corporate governance norms, audit matters, related party transactions, introduction of a provision allowing the initiation of class action suits in India against companies by shareholders or depositors, a restriction on investment by an Indian company through more than two layers of subsidiary investment companies (subject to certain permitted exceptions), prohibitions on loans to directors and insider trading and restrictions on directors and key managerial personnel from engaging in forward dealing. To ensure compliance with the requirements of the Companies Act, 2013, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention.

53. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular

54. *The nationalized goods and services tax (GST) regimes implemented by the Government of India have impact on our operations*

The Government of India has from July 01, 2017 has implemented the Goods and Service Tax a comprehensive national goods and service tax (GST) regime that combines taxes and levies by the Central and State Governments into a unified rate structure. The GST imposed on our Services has been increased to 18% from the earlier Service Tax rate of 15%. Any further increase in GST or any other tax rates as may be applicable to us in future may adversely affect our business operations and financial growth.

55. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and trading industry contained in the Prospectus*

While facts and other statistics in the Prospectus relating to India, the Indian economy and the transformers, cables and wire industry has been based on various government publications and reports from government agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled "Industry Overview" beginning on page 86 of the Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere

56. *Conditions in the Indian securities market may affect the price or liquidity of our Equity Shares*

The Indian securities markets are smaller than securities markets in more developed economies and the regulation and monitoring of Indian securities markets and the activities of investors, brokers and other participants differ, in some cases significantly, from those in the more developed economies. Indian stock exchanges have in the past experienced substantial fluctuations in the prices of listed securities. Further, the Indian stock exchanges have experienced volatility in the recent times. The Indian stock exchanges have also experienced problems that have affected the market price and liquidity of the securities of Indian companies, such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading and limited price movements. A closure of, or trading stoppage on the SME Platform of NSE could adversely affect the trading price of the Equity Shares

57. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic, social and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices

58. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition*

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition

59. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares

60. Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer

India has experienced natural calamities such as earthquakes, tsunami, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

SECTION III– INTRODUCTION

SUMMARY OF INDUSTRY

Global Economic Overview

The global economy remains sluggish heading into 2018, but the growth outlook is nevertheless somewhat stronger than in recent years. On the positive side, we anticipate a few bright spots in the global economy, such as the US and Indian economies, and the marginal recovery of the Brazilian and Russian economies in 2017. Much of this boost will only be short term, however, so the base case forecast is flat over the next five years, with average annual growth rate of 3% projected through 2021. This very modest recovery will be uneven. South Asia, Sub-Saharan Africa and East Asia will see the highest level of dynamism over the next five years. On the negative side, growth in the developed market regions will continue to be weak, and Latin America will underperform relative to other emerging market regions.

The pickup in growth projected in the April 2017 World Economic Outlook (WEO) is strengthening. The global growth forecast for 2017 and 2018—3.6 percent and 3.7 percent, respectively—is 0.1 percentage point higher in both years than in the April and July forecasts. Notable pickups in investment, trade, and industrial production, coupled with strengthening business and consumer confidence, are supporting the recovery. With growth outcomes in the first half of 2017 generally stronger than expected, upward revisions to growth are broad based, including for the euro area, Japan, China, emerging Europe, and Russia. These more than offset downward revisions for the United States, the United Kingdom, and India. Growth prospects for emerging and developing economies are marked up by 0.1 percentage point for both 2017 and 2018 relative to April, primarily owing to a stronger growth projection for China. The country’s 2017 forecast (6.8 percent, against 6.6 percent in April) reflects stronger growth outturns in the first half of 2017 as well as more buoyant external demand. For 2018, the revision mainly reflects an expectation that the authorities will maintain a sufficiently expansionary policy mix to meet their target of doubling real GDP between 2010 and 2020. Growth forecasts have also been marked up for emerging Europe for 2017, reflecting stronger growth in Turkey and other countries in the region, for Russia for 2017 and 2018, and Brazil in 2017. The US economy is projected to expand at 2.2 percent in 2017 and 2.3 percent in 2018. The projection of a continuation of near-term growth that is moderately above potential reflects very supportive financial conditions and strong business and consumer confidence. The downward revision relative to the April WEO forecasts (of 2.3 and 2.5 percent for 2017 and 2018, respectively) reflects a major correction in US fiscal policy assumptions. Given the significant policy uncertainty, IMF staff’s macroeconomic forecast now uses a baseline assumption of unchanged policies, whereas the April 2017 WEO built in a fiscal stimulus from anticipated tax cuts. Over a longer horizon, US growth is expected to moderate. Potential growth is estimated at 1.8 percent, reflecting the assumption of continued sluggish growth in total factor productivity and diminished growth of the workforce due to population aging.

For India, three external developments are of significant consequence. In the short run, the change in the outlook for global interest rates as a result of the US elections and the implied change in expectations of US fiscal and monetary policy will impact on India’s capital flows and exchange rates. Markets are factoring in a regime change in advanced countries, especially US macroeconomic policy, with high expectations of fiscal stimulus and unwavering exit from unconventional monetary policies. The end of the 20-year bond rally and end to the corset of deflation and deflationary expectations are within sight. Second, the medium-term political outlook for globalisation and in particular for the world’s —political carrying capacity for globalisation may have changed in the wake of recent developments. In the short run a strong dollar and declining competitiveness might exacerbate the lure of protectionist policies. These follow on on-going trends— documented widely— about stagnant or declining trade at the global level. This changed outlook will affect India’s export and growth prospects

Third, developments in the US, especially the rise of the dollar, will have implications for China’s currency and currency policy. If China is able to successfully re-balance its economy, the spill over effects on India and the rest of the world will be positive. On the other hand, further declines in the yuan, even if dollar-induced, could interact with underlying vulnerabilities to create disruptions in China that could have negative spill overs for India. For China, there are at least two difficult balancing acts with respect to the currency. Domestically, a declining currency (and credit expansion) props up the economy in the short run but delay rebalancing while also adding to the medium term challenges. Internationally, allowing the currency to weaken in response to capital flight risks creating trade frictions but imposing capital controls discourages FDI and undermines

Power & Instrumentation (Guj.) Ltd.

China's ambitions to establish the Yuan as a reserve currency. China with its underlying vulnerabilities remains the country to watch for its potential to unsettle the global economy.

Introduction

Global Economic Overview

The global economy remains sluggish heading into 2018, but the growth outlook is nevertheless somewhat stronger than in recent years. On the positive side, we anticipate a few bright spots in the global economy, such as the US and Indian economies, and the marginal recovery of the Brazilian and Russian economies in 2017. Much of this boost will only be short term, however, so the base case forecast is flat over the next five years, with average annual growth rate of 3% projected through 2021. This very modest recovery will be uneven. South Asia, Sub-Saharan Africa and East Asia will see the highest level of dynamism over the next five years. On the negative side, growth in the developed market regions will continue to be weak, and Latin America will underperform relative to other emerging market regions.

The pickup in growth projected in the April 2017 World Economic Outlook (WEO) is strengthening. The global growth forecast for 2017 and 2018—3.6 percent and 3.7 percent, respectively—is 0.1 percentage point higher in both years than in the April and July forecasts. Notable pickups in investment, trade, and industrial production, coupled with strengthening business and consumer confidence, are supporting the recovery. With growth outcomes in the first half of 2017 generally stronger than expected, upward revisions to growth are broad based, including for the euro area, Japan, China, emerging Europe, and Russia. These more than offset downward revisions for the United States, the United Kingdom, and India. Growth prospects for emerging and developing economies are marked up by 0.1 percentage point for both 2017 and 2018 relative to April, primarily owing to a stronger growth projection for China. The country's 2017 forecast (6.8 percent, against 6.6 percent in April) reflects stronger growth outturns in the first half of 2017 as well as more buoyant external demand. For 2018, the revision mainly reflects an expectation that the authorities will maintain a sufficiently expansionary policy mix to meet their target of doubling real GDP between 2010 and 2020. Growth forecasts have also been marked up for emerging Europe for 2017, reflecting stronger growth in Turkey and other countries in the region, for Russia for 2017 and 2018, and Brazil in 2017. The US economy is projected to expand at 2.2 percent in 2017 and 2.3 percent in 2018. The projection of a continuation of near-term growth that is moderately above potential reflects very supportive financial conditions and strong business and consumer confidence. The downward revision relative to the April WEO forecasts (of 2.3 and 2.5 percent for 2017 and 2018, respectively) reflects a major correction in US fiscal policy assumptions. Given the significant policy uncertainty, IMF staff's macroeconomic forecast now uses a baseline assumption of unchanged policies, whereas the April 2017 WEO built in a fiscal stimulus from anticipated tax cuts. Over a longer horizon, US growth is expected to moderate. Potential growth is estimated at 1.8 percent, reflecting the assumption of continued sluggish growth in total factor productivity and diminished growth of the workforce due to population aging.

For India, three external developments are of significant consequence. In the short run, the change in the outlook for global interest rates as a result of the US elections and the implied change in expectations of US fiscal and monetary policy will impact on India's capital flows and exchange rates. Markets are factoring in a regime change in advanced countries, especially US macroeconomic policy, with high expectations of fiscal stimulus and unwavering exit from unconventional monetary policies. The end of the 20-year bond rally and end to the corset of deflation and deflationary expectations are within sight. Second, the medium-term political outlook for globalisation and in particular for the world's —political carrying capacity for globalisation may have changed in the wake of recent developments. In the short run a strong dollar and declining competitiveness might exacerbate the lure of protectionist policies. These follow on on-going trends— documented widely— about

Power & Instrumentation (Guj.) Ltd.

stagnant or declining trade at the global level. This changed outlook will affect India's export and growth prospects

Third, developments in the US, especially the rise of the dollar, will have implications for China's currency and currency policy. If China is able to successfully re-balance its economy, the spillover effects on India and the rest of the world will be positive. On the other hand, further declines in the yuan, even if dollar-induced, could interact with underlying vulnerabilities to create disruptions in China that could have negative spill overs for India. For China, there are at least two difficult balancing acts with respect to the currency. Domestically, a declining currency (and credit expansion) props up the economy in the short run but delay rebalancing while also adding to the medium term challenges. Internationally, allowing the currency to weaken in response to capital flight risks creating trade frictions but imposing capital controls discourages FDI and undermines China's ambitions to establish the Yuan as a reserve currency. China with its underlying vulnerabilities remains the country to watch for its potential to unsettle the global economy.

About FDI in India

Introduction

Apart from being a critical driver of economic growth, foreign direct investment (FDI) is a major source of non-debt financial resource for the economic development of India. Foreign companies invest in India to take advantage of relatively lower wages, special investment privileges such as tax exemptions, etc. For a country where foreign investments are being made, it also means achieving technical know-how and generating employment.

Power & Instrumentation (Guj.) Ltd.

The Indian government's favourable policy regime and robust business environment have ensured that foreign capital keeps flowing into the country. The government has taken many initiatives in recent years such as relaxing FDI norms across sectors such as defense, PSU oil refineries, telecom, power exchanges, and stock exchanges, among others.

Market size

According to Department of Industrial Policy and Promotion (DIPP), the total FDI investments in India during April-September 2017 stood at US\$ 33.75 billion, indicating that government's effort to improve ease of doing business and relaxation in FDI norms is yielding results.

Data for April-September 2017 indicates that the telecommunications sector attracted the highest FDI equity inflow of US\$ 6.08 billion, followed by computer software and hardware – US\$ 3.05 billion and services – US\$ 2.92 billion. Most recently, the total FDI equity inflows for the month of September 2017 touched US\$ 2.12 billion.

During April-September 2017, India received the maximum FDI equity inflows from Mauritius (US\$ 11.47 billion), followed by Singapore (US\$ 5.29 billion), Netherlands (US\$ 1.95 billion), USA (US\$ 1.33 billion), and Germany (US\$ 934 million).

Indian impact investments may grow 25 per cent annually to US\$ 40 billion from US\$ 4 billion by 2025, as per Mr Anil Sinha, Global Impact Investing Network's (GIIN's) advisor for South Asia.

The Government of India plans to scrap the Foreign Investment Promotion Board (FIPB), which would enable the foreign investment proposals requiring government approval to be cleared by the ministries concerned, and thereby improve the ease of doing business in the country.

India's gross domestic product (GDP) grew by 6.3 per cent in July-September 2017 quarter as per the Central Statistics Organisation (CSO). Corporate earnings in India are expected to grow by over 20 per cent in FY 2017-18 supported by normalisation of profits, especially in sectors like automobiles and banks, according to Bloomberg consensus.

India's foreign exchange reserves were US\$ 404.92 billion in the week up to December 22, 2017, according to data from the RBI.

Since the Economic Survey and Budget were presented a year ago, the Indian economy has continued to consolidate the gains achieved in restoring macroeconomic stability. Inflation, the fiscal deficit, and the current account deficit have all declined, rendering India a relative haven of macro stability in these turbulent times. Economic growth appears to be recovering, albeit at varying speeds across sectors.

At the same time, the upcoming Budget and 2016-17 (FY2017) economic policy more broadly, will have to contend with an unusually challenging and weak external environment. Although the major international institutions are yet again predicting that global growth will increase from its current subdued level, they assess that risks remain tilted to the downside. This uncertain and fragile outlook will complicate the task of economic management for India.

The risks merit serious attention not least because major financial crises seem to be occurring more frequently. The Latin American debt crisis of 1982, the Asian Financial crisis of the late 1990s, and the Eastern European crisis of 2008 suggested that crises might be occurring once a decade. But then the rapid succession of crises, starting with Global Financial Crisis of 2008 and proceeding to the prolonged European crisis, the mini-crises of 2013, and the China provoked turbulence in 2015 all hinted that the intervals between events are becoming shorter.

This hypothesis could be validated in the immediate future, since identifiable vulnerabilities exist in at least three large emerging economies—China, Brazil, Saudi Arabia—at a time when underlying growth and productivity developments in the advanced economies are soft. More flexible exchange rates, however, could moderate full-blown eruptions into less disruptive but more prolonged volatility.

One tail risk scenario that India must plan for is a major currency re-adjustment in Asia in the wake of a similar adjustment in China; as such an event would spread deflation around the world. Another tail risk scenario could unfold as a consequence of policy actions—say, capital controls taken to respond to curb outflows from large emerging market countries, which would further moderate the growth impulses emanating from them.

In either case, foreign demand is likely to be weak, forcing India—in the short run—to find and activate domestic sources of demand to prevent the growth momentum from weakening. At the very least, a tail risk event would require Indian monetary and fiscal policy not to add to the deflationary impulses from abroad. The consolation would be that weaker oil and commodity prices would help keep inflation and the twin deficits in check. (Source: *Economic Survey 2015-16- Volume-I*; www.indianbudget.nic.in)

The Indian Economy

With 1.2 billion people and the world's fourth-largest economy, India's recent growth and development has been one of the most significant achievements of our times. Over the six and half decades since independence, the country has brought about a landmark agricultural revolution that has transformed the nation from chronic dependence on grain imports into a global agricultural powerhouse that is now a net exporter of food. Life expectancy has more than doubled, literacy rates have quadrupled, health conditions have improved, and a sizeable middle class has emerged. India is now home to globally recognized companies in pharmaceuticals and steel and information and space technologies, and a growing voice on the international stage that is more in keeping with its enormous size and potential.

Historic changes are unfolding, unleashing a host of new opportunities to forge a 21st-century nation. India will soon have the largest and youngest workforce the world has ever seen. At the same time, the country is in the midst of a massive wave of urbanization as some 10 million people move to towns and cities each year in search of jobs and opportunity. It is the largest rural-urban migration of this century.

Power & Instrumentation (Guj.) Ltd.

The historic changes unfolding have placed the country at a unique juncture. How India develops its significant human potential and lays down new models for the growth of its burgeoning towns and cities will largely determine the shape of the future for the country and its people in the years to come.

Massive investments will be needed to create the jobs, housing, and infrastructure to meet soaring aspirations and make towns and cities more livable and green. Generating growth that lifts all boats will be key, for more than 400 million of India's people—or one-third of the world's poor—still live in poverty. And, many of those who have recently escaped poverty (53 million people between 2005-10 alone) are still highly vulnerable to falling back into it. In fact, due to population growth, the absolute number of poor people in some of India's poorest states actually increased during the last decade.

Inequity in all dimensions, including region, caste and gender, will need to be addressed. Poverty rates in India's poorest states are three to four times higher than those in the more advanced states. While India's average annual per capita income was \$1,410 in 2011—placing it among the poorest of the world's middle-income countries—it was just \$436 in Uttar Pradesh (which has more people than Brazil) and only \$294 in Bihar, one of India's poorest states. Disadvantaged groups will need to be brought into the mainstream to reap the benefits of economic growth, and women—who “hold up half the sky”—empowered to take their rightful place in the socioeconomic fabric of the country.

Fostering greater levels of education and skills will be critical to promote prosperity in a rapidly globalizing world. However, while primary education has largely been universalized, learning outcomes remain low. Less than 10 percent of the working-age population has completed a secondary education, and too many secondary graduates do not have the knowledge and skills to compete in today's changing job market. Improving health care will be equally important. Although India's health indicators have improved, maternal and child mortality rates remain very low and, in some states, are comparable to those in the world's poorest countries. Of particular concern is the nutrition of India's children whose well-being will determine the extent of India's much-awaited demographic dividend; at present, an overwhelming 40 percent (217 million) of the world's malnourished children are in India.

The country's infrastructure needs are massive. One in three rural people lack access to an all-weather road, and only one in five national highways is four-lane. Ports and airports have inadequate capacity, and trains move very slowly. An estimated 300 million people are not connected to the national electrical grid, and those who are face frequent disruptions. And, the manufacturing sector—vital for job creation—remains small and underdeveloped.

Nonetheless, a number of India's states are pioneering bold new initiatives to tackle many of India's long-standing challenges and are making great strides towards inclusive growth. Their successes are leading the way forward for the rest of the country, indicating what can be achieved if the poorer states were to learn from their more prosperous counterparts.

India now has that rare window of opportunity to improve the quality of life for its 1.2 billion citizens and lay the foundations for a truly prosperous future—a future that will impact the country and its people for generations to come.

Review of Major Developments in Indian Economy

In the Advance Estimates of GDP that the Central Statistics Office (CSO) released recently, the growth rate of GDP at constant market prices is projected to increase to 7.6 per cent in 2015-16 from 7.2 per cent in 2014-15, mainly because private final consumption expenditure has accelerated. Similarly, the growth rate of GVA for 2015-16 is estimated at 7.3 per cent vis-à-vis 7.1 per cent in 2014-15. Although agriculture is likely to register low growth for the second year in a row on account of weak monsoons, it has performed better than last year. Industry has shown significant improvement primarily on account of the surprising acceleration in manufacturing (9.5 per cent vis-à-vis 5.5 per cent in 2014-15). Meanwhile, services continue to expand rapidly.

Even as real growth has been accelerating, nominal growth has been falling, to historically low levels, an unusual trend highlighted in the Mid-Year Economic Analysis (MYEA), 2015-16. According to the Advance Estimates, nominal GDP (GVA) is likely to increase by just 8.6 (6.8) percent in 2015-16. In nominal terms, construction is expected to stagnate, while even the dynamic sectors of trade and finance are projected to grow by only 7 to 73/4 percent.

Inflation remains under control. The CPI-New Series inflation has fluctuated around 51/2 percent, while measures of underlying trends core inflation, rural wage growth and minimum support price increases have similarly remained muted. Meanwhile, the WPI has been in negative territory since November 2014, the result of the large falls in international commodity prices, especially oil. As low inflation has taken hold and confidence in price stability has improved, gold imports have largely stabilized, notwithstanding the end of a period of import controls.

Similarly, the external position appears robust. The current account deficit has declined and is at comfortable levels foreign exchange reserves have risen to US\$351.5 billion in early February 2016, and are well above standard norms for reserve adequacy net FDI inflows have grown from US\$21.9 billion in April-December 2014-15 to US\$27.7 billion in the same period of 2015-16; and the nominal value of the rupee, measured against a basket of currencies, has been steady. India was consequently well-positioned to absorb the volatility from the U.S. Federal Reserve actions to normalize monetary policy that occurred in December 2015. Although the rupee has declined against the dollar, it has strengthened against the currencies of its other trading partners.

The fiscal sector registered three striking successes ongoing fiscal consolidation, improved indirect tax collection efficiency; and an improvement in the quality of spending at all levels of government. Despite the decline in nominal GDP growth relative to the Budget assumption (11.5 per cent in Budget 2015-16 vis-à-vis 8.6 per cent in the Advance Estimates), the central government will meet its fiscal deficit target of 3.9 per cent of GDP, continuing the commitment to fiscal consolidation. Even on the IMF's definition, the fiscal deficit is expected to decline from 4.2 per cent of GDP in 2014-15 to 4.0 per cent of GDP in 2015-16. Moreover, the consolidated revenue deficit has also declined in the first 8 months by about 0.8 percentage points of GDP.

Government tax revenues are expected to be higher than budgeted levels. Direct taxes grew by 10.7 per cent in the first 9 months (9M) of 2015-16. Indirect taxes were also buoyant. In part, this reflected excise taxes on diesel and petrol and an increase in the Swachh Bharat cess. The central excise duty collection from petroleum products during April to December 2015-16 recorded a growth of 90.5 per cent and stood at Rs. 1.3 lakh crore as against Rs. 0.7 lakh crore in the same period last year. Tax performance also reflected an improvement in tax administration because revenues increased even after stripping out the additional revenue measures (ARMs).

The main findings are that a welcome shift in the quality of spending has occurred from revenue to investment, and towards social sectors. Aggregate public investment has increased by about 0.6 per cent of GDP in the first 8 months of this fiscal year, with contributions from both the Centre (54 per cent) and states (46 per cent). Introduction to Engineering Industry

The Indian Engineering sector has witnessed a remarkable growth over the last few years driven by increased investments in infrastructure and industrial production. The engineering sector, being closely associated with the manufacturing and infrastructure sectors, is of strategic importance to India's economy. The Indian engineering sector is divided into two major segments – heavy engineering and light engineering. The capital goods and engineering turnover in India is expected to reach US\$ 125.4 billion by FY17. Likewise, Electrical equipment market size is forecast to reach US\$ 100 billion by FY22. Comparative advantage vis-à-vis peers in terms of manufacturing costs, market knowledge, technology and creativity has been a driving force for engineering exports from India. Engineering exports from India stood at US\$ 70.6 billion in FY15, registering a Compound Annual Growth Rate (CAGR) of 11.1 % over FY08-15. Companies engaged in the engineering sector are virtually on a roll. Capacity creation in sectors like infrastructure, power, mining, oil & gas, refinery, steel, automotives, and consumer durables has been driving demand in the engineering sector. Separately, the approval of significant number of special economic zones (SEZs) across the country and the development of the Delhi Mumbai Industrial Corridor (DMIC) across seven states is expected to further bolster the engineering sector.

Engineering is a diverse industry with various segments. A company from this sector can be a power equipment manufacturer (like transformers and boilers), execution specialist for Engineering, Procurement and Construction (EPC) projects or a niche player (e.g.: providing environment friendly solutions like waste water and air pollution treatment plants). The company can also be an electrical, non-electrical machinery or static equipment manufacturer too. Order book size is the biggest determinant of the company's performance in engineering sector. The same holds true for construction companies as well. It indicates companies' revenue visibility. In order to bag big contracts, companies need to have a strong balance sheet and proven execution

Power & Instrumentation (Guj.) Ltd.

capabilities. Companies in these sectors need huge working capital to execute bigger contracts. In most cases, they receive only part payment at initial stages and the remaining comes as projects get executed.

Power sector contributes almost 70-75% to the engineering companies' revenues. The government plans to add large-scale generation as well as transmission and distribution (T&D) capacities in view of the paucity of power in the country. Thus, there is enormous potential for the engineering majors in both generation and T&D space. Given the lack of quality infrastructure in India, the construction industry has been witness to a strong growth wave powered by large spends on housing, road, ports, water supply, rail transport and airport development over the long term. The sector's growth has however remained subdued over the past few years – especially when compared to the pre-2008 period. A big reason for this is the stalling of various big ticket projects in the recent past due to myriad reasons. Infrastructure is also a key area of operation for major Indian engineering companies.

Key Parameters in Engineering

Supply

Supply is abundant across most of the segments, except for technology intensive executions. However, supply of equipments face bottlenecks such as logistics and lack of manpower for timely assembly and erection of equipment's etc.

Demand

Demand growth in this sector is fuelled by expenditure in core sectors such as power, railways, infrastructure development, private sector investments and the speed at which the projects are implemented. The pace of project execution has been lumpy in the year gone by due to delays in execution and cash crunch on the part of clients.

Opportunity

Barriers to entry are high at upper end of the industry as skilled manpower and technologies as well as ability to execute large projects are a prerequisite in engineering sector. However, in few construction businesses like road business, which are not very technologically inclined, the company's expertise in execution is the key differentiator.

Bargaining power of supply

Bargaining power of suppliers is low because of intense competition amongst them. However, in technology driven high-end segments, suppliers have the upper hand

Bargaining power of Customers

Bargaining power for technology driven and highly skilled segments is low. However, fierce competition has increased bargaining power of customers in power generation and T&D equipments.

Competition

Majority of the companies compete in terms of pricing, experience in specific field, quality of equipment, capabilities with respect to size of projects that can be handled and timely execution. Nevertheless, competition is higher in the industry as companies of all sizes have been trying to move towards scaling up their technology and capacity.

Government Initiatives

'Make in India' campaign has received the attention of several infrastructure and engineering multi nationals including GE and ThyssenKrupp, which are considering investing in the country. The Government has also awarded a record 56 defence manufacturing permits to private sector entities like Mahindra, Tata and Pipavav, etc., in the past year to set up production units for major military equipment.

Power & Instrumentation (Guj.) Ltd.

The Indian engineering sector is of strategic importance to the economy owing to its intense integration with other industry segments. The sector has been de-licensed and enjoys 100% FDI. With the aim to boost the manufacturing sector, the government has relaxed the excise duties on factory gate tax, capital goods, consumer durables and vehicles. It has also reduced the basic customs duty from 10 % to 5 % on forged steel rings used in the manufacture of bearings of wind operated electricity generators. The Government of India in its Union Budget 2014-15, has provided investment allowance at the rate of 15 % to a manufacturing company that invests more than US\$ 4.17 million in any year in new plant and machinery. The government has also taken steps to improve the quality of technical education in the engineering sector by allocating a sum of Rs 500 crore (US\$ 75.33 million) for setting up five more IITs in the states of Jammu, Chhattisgarh, Goa, Andhra Pradesh and Kerala. Steps have also been taken to encourage companies to perform and grow better. For instance, EIL was recently conferred the Navaratna status after it fulfilled the criteria set by the Department of Public Enterprises, Ministry of Heavy Industries and Public Enterprises, Government of India. The conferred status would give the state-owned firm more financial and operational autonomy.

BUSINESS PROCESS FLOW:

We enter into contracts primarily through a competitive bidding process, which often requires a prequalification process especially in the public sector. Before a tender is submitted, we perform preliminary due diligence at the proposed project site. Once the tender is accepted by the client, it is converted into a letter of intent, and a project manager and the project team are identified. Detailed project planning occurs to estimate resources, cost of completion and profitability. Once all of these items are determined and after final negotiations, a contract is signed with the client. Resources are then mobilized at the project site and execution of work is started. Work begins when the client hands over the site, plans and drawings to our on-site team. The project execution work is carried out as per the plan and the on-going requirements of the client. The Bill is raised for the actual work completed and duly measured, and after certification by the client, the bill is paid by the client as per the contract term and conditions, after reaching the threshold limit of the agreed level of the preparatory work or the completion of Work. The actual cost of the work done and the revised estimates of the cost to complete the remaining work are carried out every quarter. The quality control and safety, health and environment efforts at the site offices are further supplemented by the efforts from the zonal or branch office and the head office by way of technical audits and quality audits as to cost and time parameters as well as client satisfaction. A process flow Chart showing description of our Business process is ascribed as under:

Based on the fuel it used, it is classify as Diesel or Gas generator set. The Diesel or Gas generator can be used as primary source of electric power when the grid connection is not available or it can be standby source of power to back up with grid.

PROCESS

On receipt of Purchase Order We carry out site visit and prepare the layout. Then we procure the Diesel generator from manufacturer and install at site along with necessary exhaust piping, control panels, fuel piping, Power and Control cabling, change over switch and testing and commissioning of it.

Employees State Insurance Act, 1948

The promulgation of Employees' State Insurance Act, 1948(ESI Act), by the Parliament was the first major legislation on social Security for workers in independent India. It was a time when the industry was still in a nascent stage and the country was heavily dependent on an assortment of imported goods from the developed or fast developing countries. The deployment of manpower in manufacturing processes was limited to a few select industries such as jute, textile, chemicals etc. The legislation on creation and development of a fool proof multidimensional Social Security system, when the country's economy was in a very fledgling state was obviously a remarkable gesture towards the socio economic amelioration of a workforce though limited in number and geographic distribution. India, notwithstanding, thus, took the lead in providing organized social protection to the working class through statutory provisions.

The ESI Act 1948, encompasses certain health related eventualities that the workers are generally exposed to; such as sickness, maternity, temporary or permanent disablement, Occupational disease or death due to employment injury, resulting in loss of wages or earning capacity-total or partial. It seeks to prevent the exploitation of workers and protect their interest in the 'sweated industries'. Wage fixing authorities have been guided by the norms prescribed by the Fair Wage Committee in the settlement of issues relating to wage fixation in organized industries. The Act contemplates the minimum wage rates must ensure not only the mere physical needs of a worker which keeps them just above starvation level, but must ensure for him and his family's subsistence, and also to preserve his efficiency as a worker.

The main object of the Act is to avoid unnecessary delay in the payment of wages and to prevent unauthorized deductions from the wages. Persons whose wages are Rs.6,500 or more per month are outside the ambit of the Act. Wages must be paid in current coin or currency notes or in both and not in kind. Under the PBA every employer is bound to pay to every employee, in respect of the accounting year, a minimum bonus which is 8.33% of the salary or wage earned by the employee during the accounting year or Rs.100, whichever is higher.

VAT is a consumption tax applicable to all commercial activities involving the production and distribution of goods and the provisions of services, and each State that has introduced VAT has its own VAT Act under which persons liable to pay VAT must register and obtain a registration number from the Sales Tax Officer of the respective State.

Goods and Services Tax (GST)

The Government of India proposed a comprehensive national goods and services tax (“GST”) regime that would combine taxes and levies by the Central and State Governments into a unified rate structure. In this regard, the Constitution (101 Amendment) Act 2016, which received Presidential assent on September 8, 2016, enabled the Government of India and state governments to introduce GST. Accordingly, Goods and Services tax (“GST”) was enacted to make a provision for levy and collection of tax on supply of goods or services or both and was made effective from July 1, 2017.

GST is a destination based tax levied on supply of goods and services. GST is levied on all transactions such as sale, transfer, purchase, barter, lease, or import of goods and/or services. India adopted a dual GST model, meaning that taxation is administered by both the Union and State Governments. Transactions made within a single state are levied with Central GST (CGST) by the Central Government and State GST (SGST) by the government of that state. For inter-state transactions and imported goods or services, an Integrated GST (IGST) is levied by the Central Government. GST will be levied on all stages of the supply chain till the final sale to consumers, providing ITC benefits on the basis of invoices issued at the previous stage of the supply chain
