Unless otherwise stated, we are not in a position to specify or quantify the financial or other risks mentioned herein. For capitalized terms used but not defined in this chapter, refer to the chapter titled “Definitions and Abbreviations” beginning on page 3 of this Prospectus. The numbering of the risk factors has been done to facilitate ease of reading and reference and does not in any manner indicate the importance of one risk factor over another.

The risk factors are classified as under for the sake of better clarity and increased understanding:

A. INTERNAL RISK FACTORS

I. Business Risks/ Company specific Risk

- 1. *Our Company had availed certain unsecured loans on long term basis which are being repaid out of IPO proceeds.***

Our Company had availed long term unsecured loans from lenders including our Promoters and Directors. The total amount of unsecured loans as on April 12, 2018 was Rs. 319.82 Lakhs. Our Company is repaying Rs. 319.82 Lakhs out of the IPO proceeds to these unsecured lenders. The IPO proceeds shall be utilized for retiring of debt and not for business operations.

- 2. *We sell our products under our brand name “5CORE” in India and globally. If we are unable to maintain quality, our brand building exercise may be adversely affected. Any deterioration in the reputation and market perception of our brand may have an adverse effect on our sales, profitability and the implementation of our growth strategy.***

We believe that the recognition and reputation of our brand “5CORE” among customers has contributed significantly to the growth and success of our business. The ability to differentiate our brand and our products from our competitors through our branding is an important factor in attracting customers. If we fail to maintain our reputation, enhance our brand recognition or increase positive awareness of our products, it may be difficult to maintain and grow our customer base, which could have a material adverse effect on our business and prospects. However, we have understood that our brand functions as a multiplier for us. It not only increases the voice and customer awareness, but it also gives an identity and worth to our Company. It generates desire and differentiation and motivates customers to pay more for our products than they might otherwise. So, we also protect our reputation in order to preserve our credibility and trust.

- 3. *Any change in the technology may render our current technologies obsolete or require us to make substantial capital investment to cope with the market.***

Technology upgradation is a regular process and it is also essential for providing the desired quality to the customers. We are taking all the possible steps to keep our manufacturing facilities in line with the latest technology. Any further upgradation in the technology may render our current technology obsolete and require us to upgrade the existing technology or implement new technology. Further implementing new technology may require us to incur huge capital expenditure which could affect our cash flows and result of operations. However, we have a full-fledged R&D Department which is responsible for innovations in design, products, and style. This department is responsible for creating innovative new products to keep us a step ahead of the competition.

- 4. *Our Group Companies/Entities are engaged in business activities similar to our own, which may cause a potential conflict of interest with us.***

All our Group Companies/Entities are engaged in business activities that are similar to those being undertaken by our Company. Though we do not have major transactions within group, but they sell related products under same brand name “5 CORE”. It is likely that we may continue similar arrangement with our related parties in the future. Such related party transactions may potentially involve conflicts of interest. There can be no assurance that these Group Companies/Entities will comply, in part or at all, with the terms as mutually agreed. In case any dispute arises in near future with the Group Companies, it may result in a conflict of interest with us, which may have an adverse impact on our business. For further information, please refer to “Our Promoters, Promoter Group and Group Companies – Common pursuits between the Company and its Group Companies” on page 196. Though the Companies Act, 2013 has brought into effect significant changes to the Indian company law framework including specific

compliance requirements such as obtaining prior approval from the audit committee, board of directors and shareholders for certain related party transactions, we cannot assure you that such transactions, individually or in the aggregate, will not have an adverse effect on business and financial results, including because of potential conflicts of interest or otherwise. However, our Company shall follow the provisions as laid down under Companies Act, 2013 and SEBI (LODR) Regulations, 2015.

5. *Our global sales expose us to numerous and sometimes conflicting legal and regulatory requirements, and violation of these regulations could harm our business.*

Since we sell our products in 56 countries, we are subject to numerous, and sometimes conflicting, legal requirements on matters as diverse as import/export controls, trade restrictions, the environment (including electronic waste), tariffs, taxation, sanctions, government affairs, anti-corruption etc. Non-compliance with these regulations in the conduct of our business could result in fines, penalties, criminal sanctions against us or our officers, disgorgement of profits, prohibitions on doing business and have an adverse impact on our reputation. However, we have been following laws of land and meet mandatory levels of product standards and safety.

6. *We have acquired our subsidiary, 5 Core Acoustics Private Limited in April 2017 at a price of Rs. 45 per share, whereas the book value of our subsidiary was Rs.26.37 for the financial year ended March 31, 2017.*

We have acquired our subsidiary, 5 Core Acoustics Private Limited in April 2017 at a price of Rs. 45 per share by swapping 20,21,693 equity shares of our Company at a price of Rs. 70 per share. However, the book value of our subsidiary was Rs. 26.37 for the financial year ended March 31, 2017. The prices have been decided based on the valuation of both the Companies as certified by M/s Praveen Aggarwal & Co., Chartered Accountants. For further details regarding our subsidiary, please refer to Chapter titled “Our Subsidiaries” and “Our Business” beginning on page 187 and 118 respectively of this Prospectus.

7. *Our operations are significantly dependent on our ability to successfully identify customer requirement and preferences and gain customer acceptance for our products. If we fail to do so, our business may suffer.*

Our future success depends on our ability to ensure continued demand for our products in existing and proposed markets, which requires us to continuously anticipate and respond in a timely manner to customer requirements and preferences. Further, our success is dependent on our ability to gain customer acceptance for our current and future products. If we are unable to successfully anticipate customer requirements or are unable to modify our current portfolio of products or develop new products, in a timely manner, we may lose customers or become subject to greater pricing pressures. However, with continuous market survey, marketing tools, updates from the industry in which we operate, we try to maintain and reach expectations of customers to meet market trends.

8. *The sale of counterfeit products may affect our reputation and profitability*

Our products are subject to counterfeiting. As our brand ‘5 CORE’ is gaining customer recognition, we encounter counterfeiting of our products, such as unauthorized imitation or replication of our designs, trademarks or labeling by third parties from time to time. Although we have been actively taking actions to combat against counterfeiting of our products, there can be no assurance that such actions will be successful in prevention of counterfeiting. A significant presence of counterfeit products in the market could have a negative impact on the value and image of our brand, result in a loss of consumer confidence in our brand, and as a consequence, adversely affect our business and results of operations.

9. *A shortage or non-availability of electricity may adversely affect our manufacturing operations and have an adverse effect on our business, results of operations and financial condition*

Our manufacturing operations require a sustained supply of electricity which is met by Jaipur Vidyut Vitran Nigam Limited. In the event there is any disruption of power supply for long from them, the same could result in disruption of our manufacturing process which may adversely affect our results of operations and financial condition of the company. However there have been no such instances of long outages in the past few years and as precautionary measures we have installed generators to support our manufacturing activities in case of shortage of power supply.

10. *Any failure of our information technology systems could adversely affect our business and our operations.*

We have information technology systems that support our business processes, including product manufacturing, product development, sales, order processing, procurement, inventory management, quality control, product costing, human resources, distribution, accounting and finance. These systems may be susceptible to outages due to fire, floods, power loss, telecommunications failures, natural disasters, breaking and similar events. Effective response to such disruptions will require effort and diligence on the part of our third-party vendors and employees to avoid any adverse effect to our information technology systems. In addition, our systems and proprietary data stored electronically may be vulnerable to computer viruses, cybercrime, computer hacking and similar disruptions from unauthorized tampering. The occurrence of any such events could adversely affect our business, interrupt our operations, subject us to increased operating costs and expose us to litigation.

11. *A significant disruption to our distribution network or any disruption of civil infrastructure, transport or logistic services, may create delays in deliveries of products distributed by us.*

We rely on various forms of transportation, such as waterways, roadways and railways to receive materials required for manufacturing our products and to deliver our finished products to our customers. Unexpected delays in those deliveries, including due to delays in obtaining customs clearance for materials imported by us or finished goods exported by us, increase in transportation costs, could significantly decrease our ability to make sales and earn profits. Manufacturing delays or unexpected demand for our products may also require us to use faster, but more expensive, transportation methods, which could adversely affect our gross margins. In addition, labour shortages or labour disagreements in the transportation infrastructure that lead to delays or interruptions of deliveries could materially adversely affect our business. Further, we cannot assure you that we will be able to secure sufficient transport capacity for these purposes. A significant disruption to our distribution network or any disruption of civil infrastructure could lead to a failure to provide products distributed by us in a timely manner, which would adversely affect our business and results of operations.

12. *Our industry is labour intensive and our business operations may be materially adversely affected by strikes, work stoppages or increased wage demands by our employees or those of our suppliers.*

Our industry being labour intensive is dependent on labour force for carrying out its manufacturing operations. Shortage of skilled/ unskilled personnel or work stoppages caused by disagreements with employees could have an adverse effect on our business and results of operations. We have not experienced any major disruptions in our business operations due to disputes or other problems with our work force in the past; however, there can be no assurance that we will not experience such disruptions in the future. Such disruptions may adversely affect our business and results of operations and may also divert the management's attention and result in increased costs.

India has stringent labour legislation that protects the interest of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. We are also subject to laws and regulations governing relationships with employers upon retrenchment. We are also subject to laws and regulations governing relationships with employees, in such areas as minimum wage and maximum working hours, overtime, working conditions, hiring and termination of employees and work permits. Although our employees do not unionize, it may become difficult for us to maintain flexible labour policies and we may face threat of labour unrest, work stoppages and diversion of our management's attention due to union intervention, which may have a material adverse impact on our business, results of operations and financial condition.

13. We face foreign exchange risks, primarily in export of our products that could adversely affect our results of operations.

We import materials and export our finished products in the overseas markets. Total imports constitute 9.60%, 7.00%, 6.03%, and 3.96% of our cost of material consumed for nine months ended December 31, 2017, year ending March 31, 2017, 2016 and 2015, respectively as per restated financial statements. Total exports constitute 67.05%, 81.81%, 79.66% and 87.54% of our total revenue from operations for nine months ended December 31, 2017, year ending March 31, 2017, 2016 and 2015, respectively as per restated financial statements. Accordingly, any decrease in the value of the Rupee against the foreign currency would increase the Rupee cost of materials. Any increase in Rupee against the foreign currency would reduce the realization of exports.

Fluctuations in the exchange rates may affect the Company to the extent of cost of material imported or exports made in foreign currency terms, the details of which are given hereunder: -

(Rs. In Lakhs)

Particulars	December 31, 2017	March 31.		
		2017	2016	2015
Value of Imports	889.31	950.23	532.11	366.18
Value of Exports	10,230.22	13,957.64	9,793.98	9,935.66

Although we closely follow our exposure to foreign currencies and selectively enter into hedging of foreign currency since we have natural hedge of imports with exports. Moreover, our Company has also availed forex hedge facility from Andhra Bank. However, a substantial appreciation in the value of rupee may lead to lower export realisation, which may adversely affect our results of operation.

14. Failure to offer customer support in a timely and effective manner may adversely affect our relationships with our customers.

From time to time, our customers require our customer support team to assist them in using our products, help them in resolving post-sales issues quickly and in providing ongoing support. If we do not devote sufficient resources or are otherwise unsuccessful in assisting our customers effectively, it could adversely affect our ability to retain existing customers and could prevent prospective customers from buying our products. We may be unable to respond quickly enough to accommodate short-term increases in demand for customer support. We also may be unable to modify the nature, scope and delivery of our customer support to compete with changes in the support services provided by our competitors. Increased demand for customer support, without corresponding revenue, could increase costs and adversely affect our business, results of operations and financial condition.

Our sales are highly dependent on our business reputation and on positive recommendations from our customers. Any failure to maintain high-quality customer support, or a market perception that we do not maintain high-quality customer support, could adversely affect our reputation, business, results of operations and financial condition. However, we have built a strong “after sales team” which understand that today’s successful businesses don’t just sell; they build relationships with customers.

15. We face competition in our business from domestic & international competitors. Such competition may have an adverse impact on our business and financial performance.

We face competition in our product categories and markets in which we operate. We compete with other international and national brands which own and operate well-known brands of good quality goods and may have greater financial resources and negotiation power with suppliers, vendors and other intermediaries than we do. Our Competitors may succeed in developing products that are more effective, more popular or cheaper than any we may develop, which may render our products obsolete or uncompetitive and adversely affect our business and financial results. Some of our competitors may have greater financial resources, better distribution network, technical and marketing resources and generate greater revenues, and therefore may be able to respond better to market changes than we can. Competition may result in pricing pressures, reduced profit margins or lost market share or a failure to grow our market share. There can be no assurance that we can effectively compete with our competitors in the future, and any such failure to compete effectively may have a material adverse effect on our business, financial condition and results of operations. However, we believe that we compete primarily on the basis of our brand image, price, innovative design, product assortment and reputation for quality.

16. Increase in the cost of, or a shortfall in the availability of materials and components could have an adverse effect on our business, results of operations and financial condition.

The principal materials and components used by us for manufacturing PA systems are numerous electronics items such as transistors, capacitors, diodes, resistors, wires, magnet, glue etc. Our Company buys in domestic market as well imports certain items used for manufacturing PA systems. The price of these materials and components has been fluctuating to some extent, which is evident from the cost of materials consumed & purchased to revenue from operations ratio of 84.98%, 87.78%, 87.71% and 88.36% for nine months ended December 31, 2017, financial years 2016-17, 2015-16 and 2014-15 respectively as per standalone restated financials. The price and availability of these materials depend on several factors beyond our control, including overall economic conditions, production levels, market demand and competition for such materials and components, production and transportation cost, duties and taxes and trade restrictions.

Any increase in material/component prices may affect our procurement of materials and components and will result in corresponding increases in our product costs, while the increase in the selling price of the finished products may not be proportionate to the increase in material/component price. Such change in pricing may adversely affect our sales, cash flow and our overall profitability. We usually do not enter into long term supply contracts with any of our material/component suppliers and typically place orders with them based on our assessment of demand for our products. The absence of long term contracts at fixed prices exposes us to volatility in the prices of materials that we require. If we are unable to compensate for or pass on our increased costs to end-customer, such price increases could have an adverse impact on our result of operations, financial condition and cash flows. We also face a risk that one or more of our existing suppliers may discontinue their supplies to us. Any inability on our part to procure materials/components from alternate suppliers in a timely fashion, or on terms acceptable us, may adversely affect our operations. However, in the past we have not faced any problem on non-supply of materials/components by our suppliers and have been able to pass on increased cost to end-customers.

17. We currently avail benefits under certain export promotion schemes. Any discontinuance of such schemes by the Government may adversely affect profitability.

We currently avail benefits under certain export promotion schemes like Duty Drawback, Merchandise Export from India Scheme etc. They contribute 1.94%, 2.45%, 3.03% & 7.64% of our revenue from operations on standalone basis for nine months ended December 31, 2017, financial years 2016-17, 2015-16 and 2014-15 respectively. There has been a decline in these benefits over a period of time. Any further reduction or withdrawal of benefits or our inability to meet any of the conditions prescribed under any of the schemes would adversely affect our business, results of operations and financial condition. However, the Government has been encouraging exports and we do not foresee any discontinuance of such export benefits.

18. In case of our inability to obtain, renew or maintain the statutory and regulatory licenses, permits and approvals required to operate our business it may have a material adverse effect on our business.

We require certain statutory and regulatory permits, licenses and approvals to operate our business. Though we believe that we have obtained those permits and licenses which are adequate to run our business except factory license for our manufacturing unit situated at F-24 to F-27, F-38 to F-41 and E-47(B) to E-50 RIICO Industrial Area, Sare Khurd, Bhiwadi, Alwar, Rajasthan- 301019. Moreover, our Subsidiary Company, 5 Core Acoustics Private Limited is yet to file application for factory license for its manufacturing unit located at C-828, RIICO Industrial Area, Phase-II, Bhiwadi, Alwar, Rajasthan-301019. However, there is no assurance that there are no other statutory/regulatory requirements which we are required to comply with. However, some of the approvals are granted for a fixed period of time and need renewal from time to time. We are required to renew such permits, licenses and approvals. Further, certain licenses and registrations obtained by our Company contain certain terms and conditions, which are required to be complied with. Any default by our Company in complying with the same, may result in inter alia the cancellation of such licenses, consents, authorizations and/or registrations, which may adversely affect our operations. There can be no assurance that the relevant authorities will issue or renew any of such permits or approvals in time or at all. Failure to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business.

For further details, please refer to section titled “Government and Other Statutory Approvals” beginning on page 322 of this Prospectus.

19. Breakdowns of our major plants or machineries or failures to repair or maintain the same may affect our business.

Breakdowns of our major plants or machineries may significantly increase our machineries purchase cost/repair and the depreciation of our plants and machineries, as well as change the way our management estimates the useful life of our plants and machineries. In such cases, we may not be able to acquire new plants or machineries or repair the damaged plants or machineries in time or at all, particularly where our plants or machineries are not readily available from the market or require services from original machinery manufacturers. Some of our major machineries or parts may be costly to replace or repair. We may experience significant price increases due to supply shortages, inflation, transportation difficulties or unavailability.

20. Our Company had negative cash flows from our operating, investing activities as well as financing activities in some of the previous year(s) as per the Restated Standalone Financial Statements.

Our Company had negative cash flows from our operating, investing activities as well as financing activities in some of the previous year(s) as per the Restated Standalone Financial Statements and the same are summarized as under:

(Rs. in Lakhs)

Particulars	As on December 30, 2017	As on March 31,				
		2017	2016	2015	2014	2013
Cash Flow from/ (used in) Operating Activities	1,237.44	(885.43)	(553.65)	464.05	(890.46)	489.42
Cash Flow from/ (used in) Investing Activities	(1,608.25)	(795.32)	(98.70)	(32.70)	(85.07)	(120.08)
Cash Flow from/ (used in) Financing Activities	419.61	2,297.98	1,071.30	(395.70)	1,066.18	(331.35)

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flow in future, it may adversely affect our business and financial operations.

21. Our manufacturing units and R&D unit are not owned by us.

The details of manufacturing units and R&D unit not owned by us are given below:-

S No	Location of the property	Ownership/Licensor / Lessor	Property Kind	Purpose
1.	F-622, Phase- I, Bhiwadi, Alwar, Rajasthan- 301019	Rajasthan Financial Corporation	Leasehold	Manufacturing Unit
2.	F-24 to F-27, F-38 to F-41 and E-47(B) to E-50 RIICO Industrial Area, Sare Khurd, Bhiwadi, Alwar, Rajasthan- 301019	Rajasthan State Industrial Development and Investment Corporation	Leasehold	Manufacturing Unit
3.	C-116, Basement, Fateh Nagar, Delhi- 110018	Mr. Amarjit Singh Kalra	Rented	R&D Unit
4.	C-116, Ground Floor, Fateh Nagar, Delhi- 110018	Ms. Surinder Kaur Kalra	Rented	R&D Unit

Our manufacturing units have been taken on long term lease of 99 years. Further, the R&D Unit is taken on lease from our promoters. There are certain conditions in the Lease deeds of the properties, any non-adherence to the said conditions, could render the lessor of the property to cancel the lease deed or not renew the lease deed. In case the lease is cancelled or renew the same on the term which are detrimental to the company, we may suffer a disruption in our business and operation which may adversely affect our revenues and profitability.

22. *Failure to manage our inventory could have an adverse effect on our sales, profitability, cash flow and liquidity.*

The results of operations of our business are dependent on our ability to effectively manage our inventories and stocks. For the period ended December 31, 2017 and Fiscal Years ended 2016-17 & 2015-16, our inventories were Rs. 4223.88 Lakhs and Rs. 3623.88 Lakhs, Rs. 2486.71 Lakhs & 1707.07 Lakhs respectively, which constituted 27.82%, 21.36%, 20.29% & 15.09% respectively of our total revenues on standalone basis for the same periods respectively. In case we have to effectively manage our inventory, we must be able to accurately estimate customer demand and our supply requirements and manufacture/import inventory accordingly. If we misjudge expected customer demand it could adversely impact the results by causing either a shortage of products or an accumulation of excess inventory. Further, if we fail to sell the inventory we manufacture, we may be required to write-down our inventory or create additional vendor financing, which could have an adverse impact on our income and cash flows. However, we closely monitor our inventories and any product which becomes slow moving, we try to sell at discounted prices so as to liquidate inventory.

23. *Any delays and/or defaults in payments from our customers could result in increase of working capital investment and/or reduction of our profits, thereby affecting our operation and financial condition. Further, our accounts receivable collection cycle exposes us to client credit risk.*

Our operations involve extending credit, ranging typically for 90 days, to our distributors/customers. We are exposed to payment delays and/or defaults in payments by our distributors/customers and our financial position and financial performance are dependent on the creditworthiness of our distributors/customers. Any delays in payments may require us to make a working capital investment. Further, we cannot assure that payments from all or any of our distributors/customers will be received in a timely manner or to that extent will be received at all. We get our foreign bills discounted from Banks. For the period ended December 31, 2017 and for Fiscals 2017, 2016 and 2015, our trade receivables including bills discounted were Rs. 5104.55 Lakhs, Rs. 5127.23 Lakhs, Rs. 3238.07 Lakhs and Rs. 2421.14 Lakhs respectively, which constituted 33.62%, 30.22%, 26.42% and 21.40% of our total revenues for the same periods, as per restated standalone financials.

If a customer defaults in making its payments of an order on which we have devoted significant resources, or if an order in which we have invested significant resources is delayed, cancelled or does not proceed to completion, it could have a material adverse effect on our Company's results of operations and financial condition. If any of our customers fail to make payments to us or become insolvent, we would suffer losses and our financial condition and results of operations could be adversely affected. Moreover, sales of our products are not supported by letters of credit or bank guarantee. In case of any disputes or differences or default with regard to our payments, we would have to initiate appropriate recovery proceedings and which may be costly and time consuming. There is no guarantee on the timelines of all or any part of our customers payments and whether they will be able to fulfil their obligations, which may arise from their financial difficulties, cash flow difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur, our financial performance and our operating cash flows may be adversely affected.

24. *We may be subject to risks associated with product warranty for our PA system products.*

We are subject to risks and costs associated with product warranties on account of supply of defective or inferior quality products within the warranty periods. Any defects in the finished products may result in invocation of such warranties and may require repair or replacement resulting in additional costs for our Company. The defects in our products or any product liability claim against us could generate adverse publicity, leading to a loss of reputation, customers and/or increase our costs, thereby adversely affecting our reputation, business, results of operations, financial condition and cash flows. However, we manage our risks by stringent QA check at the time of manufacture.

25. *We are subject to risks associated with expansion into new markets.*

Our Company intends to enter into new markets. Expansion into new markets, including in India and overseas, subjects us to various challenges, including those relating to our lack of familiarity with the culture, legal regulations and economic conditions of these new regions, language barriers, difficulties in appointment of distributors, staffing and managing such operations, and the lack of brand recognition and reputation in such regions. The risks involved in entering new geographic markets and expanding operations, may be higher than expected, and we may face significant competition in such markets. By expanding into new markets, we may be exposed to significant liability and could lose some or all of our investment in such regions, as a result of which our business, financial condition and results of operations could be adversely affected.

26. *Our inability to protect or use our intellectual property rights may adversely affect our business.*

We consider our brand and intellectual property to be one of our most valuable assets and we have registered several trademarks in India and other countries. For details, please see “Government and Other Approvals – Intellectual Property” on page 322. We also rely on unpatented proprietary knowhow, continuing technological innovation and other trade secrets to develop and maintain our competitive position. Further, we may not be able to prevent infringement of our trademarks. If our trademarks or other intellectual property are improperly used, the value and reputation of our brands could be harmed. While we take care to ensure that we comply with the intellectual property rights of others, we cannot determine with certainty whether we are infringing any existing third-party intellectual property rights, which may force us to alter our offerings. We may also be susceptible to claims from third parties asserting infringement and other related claims. If similar claims are raised in the future, these claims could result in costly litigation, divert management’s attention and resources. Any of the foregoing could have an adverse effect on our business, results of operations, cash flows and financial condition

27. *Our Trademark  registered in Bangladesh under Trade Marks Act, 2009 has expired.*

Our Trademark  registered in Bangladesh under the Trade Marks Act, 2009 had expired on March 30, 2015. We cannot assure you that we will be able to obtain such registration, in case we determine to apply in the later course of time. As a result, we may be unable to prevent use of these names or variations thereof by any other party or ensure that we will continue to have a right to use it. We further cannot assure you that any third party will not infringe upon our trademark, logo and/or trade name in a manner that may have a material adverse effect on our business prospects, reputation and goodwill. If we are unable to protect our trademarks and trade-names, others may be able to use our trademarks and trade names to compete more effectively.

28. *Our operations are subject to environmental, health and safety laws and regulations.*

Our operations are subject to various Central and State environmental laws and regulations relating to the control of pollution in the area where we operate. In particular, the discharge or emission of domestic sewage, dust or other pollutants into the air, soil or water that exceed permitted levels, electronic waste and cause damage to others may give rise to liability to the Government and third parties and may result in our incurring costs to remedy such discharge or emissions. There can be no assurance that compliance with such environmental laws and regulations will not result in a curtailment of operations, or a material increase in the costs of operations, or otherwise have a material adverse effect on the financial condition and results of our operations. While as on the date of this Prospectus, we are not subject to any environmental legal proceedings, we may be impleaded in such legal proceedings in the course of our business. No assurance can be given that we will be successful in all, or any, of such proceedings.

- 29. *Within the parameters as mentioned in the chapter titled ‘Objects of this Issue’ beginning on page 97 of this Prospectus, our Company’s management will have flexibility in applying the proceeds of this Issue. The fund requirement and deployment mentioned in the Objects of this Issue have not been appraised by any bank or financial institution.***

The fund requirement and deployment, as mentioned in the “Objects of the Issue” on page 97 of the Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan and order position. We cannot assure that the current business plan will be implemented or strategy shall be executed in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter “Objects of the Issue” is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency.

- 30. *Any variation in the utilization of the Net Proceeds or in the terms of any contract as disclosed in the Prospectus would be subject to certain compliance requirements, including prior shareholders’ approval.***

We propose to utilise the Net Proceeds as stated under section titled "Objects of the Issue". For further details of the proposed objects of the Issue, please refer to section titled "Objects of the Issue" beginning on page 97 of the Prospectus. At this stage, we cannot determine with any certainty if we would require the Net Proceeds to meet any other expenditure or fund any exigencies arising out of competitive environment, business conditions, economic conditions or other factors beyond our control. In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilisation of the Net Proceeds or in the terms of any contract as disclosed in this Prospectus without obtaining the shareholders’ approval through a special resolution. In the event of any such circumstances that require us to undertake variation in the disclosed utilisation of the Net Proceeds, we may not be able to obtain the shareholders’ approval in a timely manner, or at all. Any delay or inability in obtaining such shareholders’ approval may adversely affect our business or operations.

Further, our Promoters or controlling shareholders would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to change the objects of the Issue or vary the terms of such contracts, at a price and manner as prescribed by SEBI. Additionally, the requirement on Promoters or controlling shareholders to provide an exit opportunity to such dissenting shareholders may deter the Promoters or controlling shareholders from agreeing to the variation of the proposed utilisation of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoters or the controlling shareholders of our Company will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price prescribed by SEBI.

In light of these factors, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Fresh Issue, if any, or vary the terms of any contract referred to in this Prospectus, even if such variation is in the interest of our Company. This may restrict our Company’s ability to respond to any change in our business or financial condition by re-deploying the unutilised portion of Net Proceeds, if any, or varying the terms of contract, which may adversely affect our business and results of operations.

31. *Our inability to meet our obligations, including financial and other covenants under our debt financing arrangements could adversely affect our business and results of operations.*

As of December 31, 2017, we had a total outstanding long term borrowing (including current maturities), short-term borrowings and bills discounted, secured and unsecured of Rs. 7589.04 Lakhs. Our ability to meet our debt service obligations and repay our outstanding borrowings will depend primarily on the cash generated by our business. Our financing agreements contain certain restrictive covenants that limit our ability to undertake certain types of transactions, including any change in line of business or change in ownership, which could adversely affect our business and financial condition.

In addition, certain of our borrowings require us to maintain certain financial ratios and certain other informative covenants, which are tested at times on a quarterly or annual basis.

We may also be forced to sell some or all of our assets if we do not have sufficient cash or credit facilities to make repayments. Further, certain of our financing arrangements are due for renewal and we cannot guarantee that the facilities availed under such arrangements will be renewed on the previously agreed terms and conditions, or conditions which are not more onerous on us. Our failure to meet our obligations under the debt financing agreements could have an adverse effect on our business, results of operations and financial condition.

32. *Our Subsidiaries may not pay cash dividends on shares that we hold in them. Consequently, our Company may not receive any return on investments in our Subsidiaries.*

Our Subsidiaries are separate and distinct legal entities, having no obligation to pay dividends and may be restricted from doing so by law or contract, including applicable laws, foreign exchange regulations, charter provisions and the terms of their financing arrangements. Further, dividends received from our foreign Subsidiaries and Subsidiaries is liable to tax in India.

33. *We have not made any alternate arrangements for meeting our working capital requirements and that of our Subsidiary, 5 Core Acoustics Private Limited for the Objects of the Issue. Further we have not identified any alternate source of financing the ‘Objects of the Issue’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

As on date, we have not made any alternate arrangements for meeting our working capital requirements and that of our Subsidiary, 5 Core Acoustics Private Limited for the Objects of the Issue. Further, we have not identified any alternate source of working capital funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds could adversely affect our growth plans. We meet our working capital requirements through our owned funds, internal accruals and debt. Any shortfall in our net owned funds, internal accruals and our inability to raise debt would result in us being unable to meet our working capital requirements, which in turn will negatively affect our financial condition and results of operations. For further details please refer to the chapter titled “Objects of the Issue” beginning on page 97 of this Prospectus.

34. If we are unable to raise additional capital, our business prospects could be adversely affected.

We intend to fund our future expansion plans through our internal accruals, borrowings and capital. We will continue to incur significant expenditure in maintaining and growing our existing manufacturing infrastructure. We cannot assure you that we will have sufficient capital resources for our current operations or any future expansion plans that we may have. While we expect our internal accruals and cash flow from operations to be adequate to fund our existing commitments, our ability to incur any future borrowings is dependent upon the success of our operations. Additionally, the inability to obtain sufficient financing could adversely affect our ability to complete expansion plans. Our ability to arrange financing and the costs of capital of such financing are dependent on numerous factors, including general economic and capital market conditions, credit availability from banks, investor confidence, the continued success of our operations and other laws that are conducive to our raising capital in this manner. If we decide to meet our capital requirements through debt financing, we may be subject to certain restrictive covenants. If we are unable to raise adequate capital in a timely manner and on favourable terms, or at all, our business, results of operations, cash flows and financial condition could be adversely affected.

B. EXTERNAL RISK FACTORS

52. *A slowdown in economic growth in India could adversely affect our business, results of operations, financial condition and cash flows.*

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our products may be adversely affected by an economic downturn in domestic, regional and global economies. Economic growth in the countries in which we operate is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports of materials, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production. Consequently, any future slowdown in the Indian economy could harm our business, results of operations, financial condition and cash flows. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

53. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.*

Our business and financial performance could be adversely affected by unfavorable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations applicable to us and our business. Please refer to “Key Industry Regulations and Policies” on page 156 for details of the laws currently applicable to us.

There can be no assurance that the Government of India may not implement new regulations and policies which will require us to obtain approvals and licenses from the Government of India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment to, or change to governing laws, regulation or policy in the jurisdictions in which we operate may have a material adverse effect on our business, financial condition and results of operations. In addition, we may have to incur expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. Any unfavorable changes to the laws and regulations applicable to us could also subject us to additional liabilities.

GST has been implemented with effect from July 1, 2017 and has replaced the indirect taxes on goods and services such as central excise duty, service tax, central sales tax, state VAT and surcharge currently being collected by the central and state governments. The GST is expected to increase tax incidence and administrative compliance. Given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to the tax regime following implementation of the GST. The implementation of this new structure may be affected by any disagreement between certain state Governments, which could create uncertainty. Any future amendments may affect our overall tax efficiency, and may result in significant additional taxes becoming payable.

Further, the general anti avoidance rules (“GAAR”) provisions have been made effective from assessment year 2018-19 onwards, i.e.; financial Year 2017-18 onwards and the same may get triggered once transactions are undertaken to avoid tax. The consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain.

The application of various Indian tax laws, rules and regulations to our business, currently or in the future, is subject to interpretation by the applicable taxation authorities. If such tax laws, rules and regulations are amended, new adverse laws, rules or regulations are adopted or current laws are interpreted adversely to our interests, the results could increase our tax payments (prospectively or retrospectively) and/or subject us to penalties. Further, changes in capital gains tax or tax on capital market transactions or sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance.

54. *Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.*

Inflation is typically impacted by factors such as governmental policies, regulations, commodity prices, liquidity and global economic environment. Any change in the government or a change in the economic and deregulation policies could adversely affect the inflation rates. Continued high rates of inflation may increase our costs such as salaries, travel costs and related allowances, which are typically linked to general price levels. There can be no assurance that we will be able to pass on any additional costs to our clients or that our revenue will increase proportionately corresponding to such inflation. Accordingly, high rates of inflation in India could have an adverse effect on our profitability and, if significant, on our financial condition.

55. *You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.*

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short term capital gains and generally taxable. Any gain realised on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long term capital gains and currently, such gains are not be subject to capital gains tax in India if Securities Transaction tax (STT) has been paid on the transaction. STT is levied on and collected by a domestic stock exchange on which equity shares are sold. The Finance Bill, 2018, tabled before the Parliament, proposes to withdraw the exemption on long-term capital gains tax from April 01, 2018 and to impose 10% tax on such long-term capital gains in excess of Rs. 1,00,000. This proposal is subject to parliamentary process. Any longterm gain realised on the sale of equity shares, which are sold other than on a recognised stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

56. *The Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Issue.*

The Issue Price of the Equity Shares will be determined by our Company in consultation with the LMs and will be based on numerous factors. For further information, see the section titled "Basis for Issue Price" on page 105 of this Prospectus. The Issue Price may not be indicative of the market price for the Equity Shares after the Issue. The market price of the Equity Shares could be subject to significant fluctuations after the Issue and may decline below the Issue Price. There can be no assurances that applicants who are allotted Equity Shares through the Issue will be able to resell their Equity Shares at or above the Issue Price.

57. Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our ability to raise additional financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our capital expenditure plans, business and financial performance and the price of our Equity Shares.

58. We have not prepared, and currently do not intend to prepare, our financial statements in accordance with the International Financial Reporting Standards ("IFRS"). Our transition to IFRS reporting could have a material adverse effect on our reported results of operations or financial condition.

Public companies in India, including us, may be required to prepare annual and interim financial statements under IFRS in accordance with the roadmap for convergence with IFRS announced by the Ministry of Corporate Affairs, Government of India through a press note dated January 22, 2010 (the "IFRS Convergence Note"). The Ministry of Corporate Affairs by a press release dated February 25, 2011 has notified that 35 Indian Accounting Standards are to be converged with IFRS. The date of implementation of such converged Indian accounting standards has not yet been determined. Our financial condition, results of operations, cash flows or changes in shareholders' equity may appear materially different under IFRS than under Indian GAAP or our adoption of converged Indian Accounting Standards may adversely affect our reported results of operations or financial condition. This may have a material adverse effect on the amount of income recognized during that period and in the corresponding (restated) period in the comparative Fiscal/period.

59. Financial difficulty and other problems in certain long-term lending institutions and investment institutions in India could have a negative impact on our business.

We are exposed to the risks of the Indian financial system which may be affected by the financial difficulties faced by certain Indian financial institutions because the commercial soundness of many financial institutions may be closely related as a result of credit, trading, clearing or other relationships. This risk, which is referred to as "systemic risk," may adversely affect financial intermediaries, such as clearing agencies, banks, securities firms and exchanges with whom we interact on a daily basis. Our transactions with these financial institutions expose us to credit risk in the event of default by the counter party, which can be exacerbated during periods of market illiquidity. As the Indian financial system operates within an emerging market, we face risks of a nature and extent not typically faced in more developed economies, including the risk of deposit runs notwithstanding the existence of a national deposit insurance scheme. The problems faced by individual Indian financial institutions and any instability in or difficulties faced by the Indian financial system generally could create adverse market perception about Indian financial institutions and banks. This in turn could adversely affect our business, financial condition, results of operations and cash flows.

60. Political instability or changes in the Government could adversely affect economic conditions in India generally and our business in particular.

Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Elimination or substantial change of policies or the introduction of policies that negatively affect the Company's business could cause its results of operations to suffer. Any significant change in India's economic policies could disrupt business and economic conditions in India generally and the Company's business in particular.

- 61. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.***

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

- 62. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.***

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the Mumbai terrorist attacks and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

SECTION III – INTRODUCTION

SUMMARY OF OUR INDUSTRY

OVERVIEW OF INDIAN ECONOMY

India's diverse economy encompasses traditional village farming, modern agriculture, handicrafts, a wide range of modern industries, and a multitude of services. Slightly less than half of the work force is in agriculture, but services are the major source of economic growth, accounting for nearly two-thirds of India's output but employing less than one-third of its labor force. India has capitalized on its large educated English-speaking population to become a major exporter of information technology services, business outsourcing services, and software workers.

Thus, the country is attracting many global majors for strategic investments owing to the presence of vast range of industries, investment avenues and a supportive government. Huge population, mostly comprising the youth, is a strong driver for demand and an ample source of manpower.

With more than 1.33 billion people and the world's fourth-largest economy, India's recent growth and development has been one of the most significant achievements of our times. Over the six and half decades since independence, the country has brought about a landmark agricultural revolution that has transformed the nation from chronic dependence on grain imports into a global agricultural powerhouse that is now a net exporter of food. Life expectancy has more than doubled, literacy rates have quadrupled, health conditions have improved, and a sizeable middle class has emerged. India is now home to globally recognized companies in pharmaceuticals and steel and information and space technologies, and a growing voice on the international stage that is more in keeping with its enormous size and potential.

GDP and Other Indicators

According to the data released by the Central Statistics Office (CSO), the Gross Value Added (GVA) slipped sharply to 6.6% in 2017 ended March 31, from 7.9% growth in 2015-16. The demonetisation seems to have impacted the GVA in the third as well as fourth quarter of 2016-17 which slipped to 6.7% and 5.6% respectively, from 7.3% and 8.7% in the same quarter of 2015-16.

Almost all sectors, with the exception of agriculture, showed deceleration in the aftermath of demonetisation. While the manufacturing sector output in the fourth quarter slowed to 5.3% versus 12.7% in the same period of last year, the construction sector slipped into the negative territory.

India's GDP (Gross Domestic Product) growth has recovered to 6.3% in the second quarter from a three-year low of 5.7% in first quarter, said the Ministry of Statistics and Programme Implementation (MOSPI).

The Indian economy grew at five-quarter high of 7.2% in the Q3FY18 reflecting overall recovery due to good show by agriculture, manufacturing, construction and certain services. The economy is expected to grow at 6.6% in the current fiscal ending March 31, as per the second advanced estimates of the Central Statistics Office (CSO), compared to 7.1% in 2016-17. The earlier estimate was 6.5%. The growth for the second quarter (July-September) has been revised upwards to 6.5%, from 6.3% estimated earlier by the CSO.

The previous high was recorded at 7.5% in the July-September quarter of 2016-17.

OBJECTS OF THE ISSUE

Our Company proposes to utilize the funds which are being raised towards funding the following objects and achieve the benefits of listing on the NSE Emerge Platform.

The objects of the Issue are: -

1. To meet the working capital requirements of our Company
2. To meet the working capital requirements of our Subsidiary, 5 Core Acoustics Private Limited
3. General Corporate Purpose
4. Repayment of Unsecured Loan of Promoters/Directors
5. Issue Expenses

Our Company believes that listing will enhance our Company's corporate image, brand name and create a public market for its Equity Shares in India. We may have access to a large pool of capital for growth with exposure to a broad network of investors in India and across the world. Listing also facilitates acquisitions by providing 'currency' in the form of a more diversified and liquid share capital base. Our shares can be used as a means of payment in the takeover of other businesses instead of, or combined with, a cash component. The requirement for more rigorous disclosure can improve our systems, controls and management information, leading to greater operating efficiency of our business. Listing attracts Institutional investors who can bring increased business credibility, stability and wider business networks.

The main objects clause of our Memorandum enables our Company to undertake the activities for which funds are being raised in the Issue. The existing activities of our Company are within the objects clause of our Memorandum. The fund requirement and deployment is based on internal management estimates and has not been appraised by any bank or financial institution.

FUND REQUIREMENTS

Our funding requirements are dependent on a number of factors which may not be in the control of our management, changes in our financial condition and current commercial conditions. Such factors may entail rescheduling and / or revising the planned expenditure and funding requirement and increasing or decreasing the expenditure/repayment for a particular purpose from the planned expenditure/repayment.

We intend to utilize the proceeds of the Fresh Issue, in the manner set forth below:

(Rs. in Lakhs)

Sr. No.	Particulars	Amount
1.	To meet the working capital requirements of our Company	2319.38
2.	To meet the working capital requirements of our Subsidiary, 5 Core Acoustics Private Limited	1000.00
3.	General Corporate Purpose	560.00
4.	Repayment of Unsecured Loan of Promoters/Directors	319.82
5.	*Issue Expenses	467.00

Accordingly, we confirm that there is no requirement for us to make firm arrangements of finance through verifiable means towards at least 75% of the stated means of finance, excluding the amount to be raised from the proposed Issue.

The fund requirement and deployment are based on internal management estimates and have not been appraised by any bank or financial institution. These are based on current conditions and are subject to change in light of changes in external circumstances or costs, other financial conditions, business or strategy, as discussed further below.

In case of variations in the actual utilization of funds allocated for the purposes set forth above, increased fund requirements for a particular purpose may be financed by surplus funds, if any, available in respect of the other purposes for which funds are being raised in this Issue. If surplus funds are unavailable, the required financing will be through our internal accruals and/or debt.

We may have to revise our fund requirements and deployment as a result of changes in commercial and other external factors, which may not be within the control of our management. This may entail rescheduling, revising or cancelling the fund requirements and increasing or decreasing the fund requirements for a particular purpose from its fund requirements mentioned below, at the discretion of our management. In case of any shortfall or cost overruns, we intend to meet our estimated expenditure from internal accruals and/or debt. SECTION IV – ABOUT THE COMPANY

OUR INDUSTRY

OVERVIEW OF INDIAN ECONOMY

India's diverse economy encompasses traditional village farming, modern agriculture, handicrafts, a wide range of modern industries, and a multitude of services. Slightly less than half of the work force is in agriculture, but services are the major source of economic growth, accounting for nearly two-thirds of India's output but employing less than one-third of its labor force. India has capitalized on its large educated English-speaking population to become a major exporter of information technology services, business outsourcing services, and software workers.

Thus, the country is attracting many global majors for strategic investments owing to the presence of vast range of industries, investment avenues and a supportive government. Huge population, mostly comprising the youth, is a strong driver for demand and an ample source of manpower.

With more than 1.33 billion people and the world's fourth-largest economy, India's recent growth and development has been one of the most significant achievements of our times. Over the six and half decades since independence, the country has brought about a landmark agricultural revolution that has transformed the nation from chronic dependence on grain imports into a global agricultural powerhouse that is now a net exporter of food. Life expectancy has more than doubled, literacy rates have quadrupled, health conditions have improved, and a sizeable middle class has emerged. India is now home to globally recognized companies in pharmaceuticals and steel and information and space technologies, and a growing voice on the international stage that is more in keeping with its enormous size and potential.

GDP and Other Indicators

According to the data released by the Central Statistics Office (CSO), the Gross Value Added (GVA) slipped sharply to 6.6% in 2017 ended March 31, from 7.9% growth in 2015-16. The demonetisation seems to have impacted the GVA in the third as well as fourth quarter of 2016-17 which slipped to 6.7% and 5.6% respectively, from 7.3% and 8.7% in the same quarter of 2015-16.

Almost all sectors, with the exception of agriculture, showed deceleration in the aftermath of demonetisation. While the manufacturing sector output in the fourth quarter slowed to 5.3% versus 12.7% in the same period of last year, the construction sector slipped into the negative territory.

India's GDP (Gross Domestic Product) growth has recovered to 6.3% in the second quarter from a three-year low of 5.7% in first quarter, said the Ministry of Statistics and Programme Implementation (MOSPI).

The Indian economy grew at five-quarter high of 7.2% in the Q3FY18 reflecting overall recovery due to good show by agriculture, manufacturing, construction and certain services. The economy is expected to grow at 6.6% in the current fiscal ending March 31, as per the second advanced estimates of the Central Statistics Office (CSO), compared to 7.1% in 2016-17. The earlier estimate was 6.5%. The growth for the second quarter (July-September) has been revised upwards to 6.5%, from 6.3% estimated earlier by the CSO.

The previous high was recorded at 7.5% in the July-September quarter of 2016-17.

Global Economy

The global upswing in economic activity is strengthening.

Global growth, which in 2016 was the weakest since the global financial crisis at 3.2%, is projected to rise to 3.6% in 2017 and to 3.7% in 2018. The growth forecasts for both 2017 and 2018 are 0.1 percentage point stronger compared with the April 2017 World Economic Outlook (WEO) forecast. Broad-based upward revisions in the euro area, Japan, emerging Asia, emerging Europe, and Russia—where growth outcomes in the first half of 2017 were better than expected—more than offset downward revisions for the United States and the United Kingdom.

Among emerging market and developing economies, higher domestic demand in China and continued recovery in key emerging market economies supported growth in the first half of 2017. In India, growth momentum slowed, reflecting the lingering impact of the authorities' currency exchange initiative as well as uncertainty related to the midyear introduction of the country-wide Goods and Services Tax. Higher external demand boosted growth in other emerging market economies in East Asia. In Brazil, strong export performance and a diminished pace of contraction in domestic demand allowed the economy to return to positive growth in the first quarter of 2017, after eight quarters of decline.

OUR PRODUCTS

A public address system (PA system) is an electronic system comprising microphones, amplifiers, loudspeakers, and related equipment. It increases the apparent volume (loudness) of a human voice, musical instrument, or other acoustic sound source or recorded sound or music. PA systems are used in any public venue that requires an announcer, performer, etc. be sufficiently audible at a distance or over a large area. Typical applications include sports stadiums, public transportation vehicles and facilities, and live or recorded music venues and events. A PA system may include multiple microphones or other sound sources, a mixing console to combine and modify multiple sources, and multiple amplifiers and loudspeakers for louder volume or wider distribution

Our Company manufactures the following products: -

1. MICROPHONES

A microphone, colloquially nicknamed mic or mike, is a transducer that converts sound into an electrical signal. This signal can be amplified as an analog signal or may be converted to a digital signal, which can be processed by a computer or other digital audio device. Microphones are used in many applications such as telephones, hearing aids, public address systems for concert halls and public events, motion picture production, live and recorded audio engineering, sound recording, two-way radios, megaphones, radio and television broadcasting, and in computers for recording voice, speech recognition, VoIP, and for non-acoustic purposes such as ultrasonic sensors or knock sensors.

2. AMPLIFIERS

An amplifier is used to increase the amplitude of a signal waveform, without changing other parameters of the waveform such as frequency or wave shape. They are one of the most commonly used circuits in electronics and perform a variety of functions in many electronic systems. Our Company manufactures amplifiers in compact shape for small to large communal purposes and gathering, making it easy to port from one place to another. It is compressed efficiently with heavy duty material and are designed to meet the user's requirements. Various types of amplifiers manufactured by our Company are: -

- Amplifiers with USB (DLX Series)
- Amplifiers with USB & Echo (E Series)
- Plain Amplifiers
- Booster Amplifiers

- Two Zone Amplifiers
- Power Amplifiers
- Guitar Amplifiers
- Bass Amplifiers (BA Series)
- Portable Wireless Amplifiers
- Home Amplifiers
- Paging Amplifiers

3. COLUMNS

Column speakers consist of numerous speaker units of the same type arranged vertically in a column-like enclosure. With the speaker units arranged in this way vertical sound spread toward the floor and ceiling is reduced, and that can help suppress unwanted reflections. This arrangement also results in less diffusion of the sound energy, and therefore less loss of output level. Column speakers are often used in churches, gymnasiums, and other facilities where excessive reverberation might be a problem, as well as in conference rooms and lecture halls where maximum speech intelligibility is the main goal.

Various types of columns manufactured by our Company are: -

- Wooden Columns
- Plastic Columns
- Steel Columns

4. WALL & CEILING SPEAKERS

Wall & Ceiling speakers are built into the wall or ceiling so that they are flush with the wall/ceiling surface. This type of installation is ideal in situations where the speakers are to be hidden so that they won't disrupt the interior décor, and is a common choice for distributing BGM throughout a facility. The broad coverage and relative lack of directionality of wall/ceiling speakers is an advantage for the latter application. Wall and Ceiling speakers are sometimes used in a supplemental support role in larger installations, in the same way that surface mount speakers are.

Various types of wall and ceiling speakers manufactured by our Company are: -

- Active Line Array System
- Audio Presentation System
- Wall Speakers (Wooden & Plastic Series)
- Full Range Speakers (Aluminum Frame & Chrome Coating)
- Woofers
- Compression Drivers
- Cross Over Network
- Piezo Tweeters
- HiSe Tweeters
- Voice Controls

5. STANDS

A stand is a free-standing mount for a microphone/column. It allows the device to be positioned in the studio, on stage or on location without requiring a person to hold it. The most basic stand is a straight stand. It uses a dome-shaped round metal base, or a tripod base, into which is threaded a post for mounting the microphone or column. This post may be made up of two or more telescoping tubes that fit inside each other, allowing for quick height adjustment. The mechanism for adjusting the height is called the clutch

Various types of stands manufactured by our Company are: -

- Microphone Stands
- Podium Microphone Stand
- Column Stands
- Tabla Microphone Stands

6. MIXERS

In sound recording and reproduction, and sound reinforcement systems, a mixing console is an electronic device for combining sounds of many different audio signals. Inputs to the console include microphones being used by singers and for picking up acoustic instruments, signals from electric or electronic instruments, or recorded music. Depending on the type, a mixer is able to control analog or digital signals. The modified signals are summed to produce the combined output signals, which can then be broadcast, amplified through a sound reinforcement system or recorded.

In practice, mixers do more than simply mix signals. They can provide phantom power for condenser which changes a sound's apparent position in the stereo soundfield; filtering and equalization, which enables sound engineers to boost or cut selected frequencies to improve the sound; dynamic range compression, which allows engineers to increase the overall gain of the system or channel without exceeding the dynamic limits of the system; routing facilities, to send the signal from the mixer to another device, such as a sound recording system or a control room; and monitoring facilities, whereby one of a number of sources can be routed to loudspeakers or headphones for listening, often without affecting the mixer's main output.

Various types of mixers manufactured by our Company are: -

- Power Mixers
- Slim Mixers
- Console Mixers
- DJ Mixers
- Intelligent Mixers
- Feedback Suppression Unit
- Digital Signal Processor
- Equalizers

7. MEGAPHONES

A megaphone, speaking-trumpet, bullhorn, blowhorn, or loudhailer is usually a portable or hand-held, cone-shaped acoustic horn used to amplify a person's voice or other sounds and direct it in a given direction. The sound is introduced into the narrow end of the megaphone, by holding it up to the face and speaking into it, and the sound waves radiate out the wide end. A megaphone increases the volume of sound by increasing the acoustic impedance seen by the vocal cords, matching the impedance of the vocal cords to the air, so that more sound power is radiated. It also serves to direct the sound waves in the direction the horn is pointing.

8. HORNS

A horn is a musical instrument made of a tube, usually made of metal and often curved in various ways, with one narrow end into which the musician blows, and a wide end from which sound emerges. In horns, unlike some other brass instruments such as the trumpet, the bore gradually increases in width through most of its length i.e. it is conical rather than cylindrical. Various types of mixers manufactured by our Company are: -

- Circular Gypsy Horns
- Square Gypsy Horns
- Reflex Horns
- Trumpet Horns
- Diaphragms

9. LOUDSPEAKERS

A loudspeaker (or loud-speaker or speaker) is an electroacoustic transducer which converts an electrical audio signal into a corresponding sound. Speakers are typically housed in a speaker enclosure or speaker cabinet which is often a rectangular or square box made of wood or sometimes plastic. The enclosure's materials and design play an important role in the quality of the sound. Where high fidelity reproduction of sound is required, multiple loudspeaker transducers are often mounted in the same enclosure, each reproducing a part of the audible frequency range (picture at right). In this case the individual speakers are referred to as "drivers" and the entire unit is called a loudspeaker. Drivers made for reproducing high audio frequencies are called tweeters, those for middle frequencies are called mid-range drivers, and those for low frequencies are called woofers. Smaller loudspeakers are found in devices such as radios, televisions, portable audio players, computers, and electronic musical instruments. Larger loudspeaker systems are used for music, sound reinforcement in theatres and concerts, and in public address systems.

10. COMPUTER SPEAKERS, PERSONAL SPEAKERS & HEADPHONES

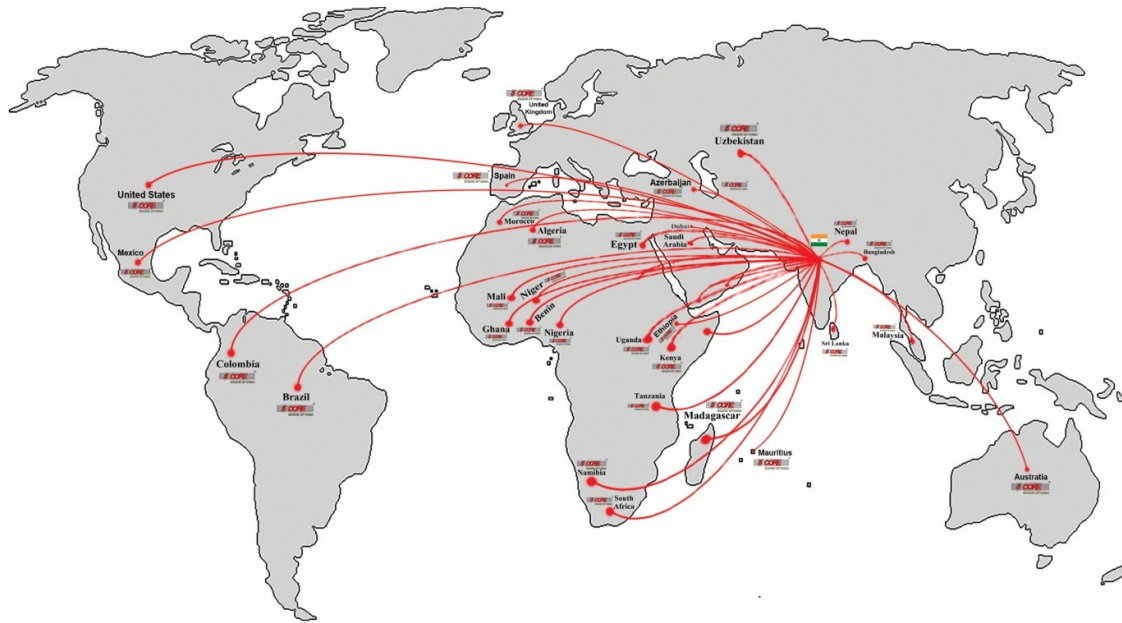

Speakers are one of the most common output devices used with computer systems. Some speakers are designed to work specifically with computers, while others can be hooked up to any type of sound system. Regardless of their design, the purpose of speakers is to produce audio output that can be heard by the listener.

Speakers are transducers that convert electromagnetic waves into sound waves. The speakers receive audio input from a device such as a computer or an audio receiver. This input may be either in analog or digital form. Analog speakers simply amplify the analog electromagnetic waves into sound waves. Since sound waves are produced in analog form, digital speakers must first convert the digital input to an analog signal, then generate the sound waves.

Speakers typically come in pairs, which allows them to produce stereo sound. This means the left and right speakers transmit audio on two completely separate channels. By using two speakers, music sounds much more natural since our ears are used to hearing sounds from the left and right at the same time. Surround systems may include four to seven speakers (plus a subwoofer), which creates an even more realistic experience.

The recoverable amount is the greater of the net selling price and their value in use. Value in use is arrived at by discounting the future cash flows to their present value based on an appropriate discount factor. When there is indication that an impairment loss recognised for an asset in earlier accounting periods no longer exists or may have decreased, such reversal of impairment loss is recognised in the Statement of Profit and Loss.

an asset in the Balance Sheet when it is probable that future economic benefit associated with it will flow to the Company.

b) Deferred Tax

Deferred tax assets in respect of unabsorbed depreciation and carry forward of losses are recognised only if there is virtual certainty that there will be sufficient future taxable income available to realize such assets. Deferred tax assets are recognised for timing differences of other items only to the extent that reasonable certainty exists that sufficient future taxable income will be available against which these can be realized. Deferred tax assets and liabilities are offset if such items relate to taxes on income levied by the same governing tax laws and the Company has a legally enforceable right for such set off. Deferred tax assets are reviewed at each Balance Sheet date for their reliability.

13) Provisions, Contingent Liabilities and Contingent Assets

A provision is recognised when the Company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reliable estimate can be made. Provisions (excluding retirement benefits) are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the Balance Sheet date. These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimates. Contingent liabilities are disclosed in the Notes.

14) Earnings Per Share

Basic earnings per share is computed by dividing the profit / (loss) after tax by the weighted average number of equity shares outstanding during the year. Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease the net profit per share from continuing ordinary operations.
