BUSINESS SPECIFIC RISKS

1. ***Our Registered Office is not owned by us. The same is occupied by us on lease/leave and license basis. Disruption of our rights as licensee/ lessee or termination of the agreements with our licensors/ lessors would adversely impact our operations and, consequently, our business.***

One of the object of the issue is to incur expenditure for renovation of the offices which are situated at Hyderabad. For details, please refer to the chapter titled “Objects of the Issue” beginning on page 81 of Red Herring Prospectus. Our Registered Office from where we operate is not owned by our Company. Our Company has been occupying the Registered Office on leasehold basis through a deed of lease entered into by our Company with our Promoter Satyanarayana Sundara for a period of 8 years commencing from January 01, 2018 and ending on ending on December 31, 2025 at a monthly advance rent of Rs. 10,000/- and the rent shall enhance at 10% every three years on the prevailing rent for the period of the lease. If we are required to relocate any of our offices to such other place as a result of any termination or non-renewal of our leases, we may incur additional cost as a result of such relocation. We believe that such transaction has been conducted on an arms-length basis, and there can be no assurance that our Company could not have achieved more favourable terms if had such transactions not been entered into with related parties.

We cannot assure that our Company will be able to successfully renew the said lease agreement on expiry of the lease period. Further, we cannot assure that we will not face any disruption in respect of our rights as a lessee and that such lease agreement will not be terminated prematurely by the lessee. Any such non-renewal or early termination or any disruption of our rights as lessee may require us to vacate the premises and relocate to a new premises on terms that may not be favourable to us thereby adversely affecting our business, financial conditions and results of operations.

2. ***Our Promoter and Directors are currently involved in certain litigation which is currently pending at various stages; any adverse decision in such proceedings may render us liable to liabilities and penalties and may adversely affect our business and results of operations.***

A classification of legal proceedings is mentioned below:

Also, there is no assurance that in future, we, our promoters, our directors or group companies may not face legal proceedings; any adverse decision in such legal proceedings may impact our business. For further details in relation to legal proceedings involving our Company, Promoters, Directors, Group Company and Subsidiaries see the chapter titled “Outstanding Litigation and Material Developments” on page 173 of this Red HerringProspectus.

3. *Our attempts to secure government and PSU projects may not always be successful. Our financial condition would be materially and adversely affected if we fail to obtain new contracts.*

As a part of our business, we bid for projects on an ongoing basis. Projects are awarded following competitive bidding processes and satisfaction of prescribed pre-qualification criteria. While service quality, technological capacity and performance, health and safety records, personnel, reputation and

experience as well as sufficiency of financial resources are important considerations in client decisions, there can be no assurance that we will be able to meet such qualification criteria, particularly for large development projects, whether independently managed or managed together with our partners. Furthermore, once the prospective bidders satisfy the pre-qualification requirements of the project, the project is usually awarded on the basis of the lowest quote by the prospective bidder. We cannot assure you that we would bid even if we have met the pre-qualification criteria to submit a bid or that our bids, when submitted or if already submitted, would be accepted. If we are not able to pre-qualify in our own right to bid for large projects, we may be required to partner and collaborate with other companies in bids for such projects. If we are unable to partner with other companies or lack the credentials to be the partner-of-choice for other companies, we may lose the opportunity to bid for large projects, which could affect our growth plans. Additionally, the government and PSU conducted tender processes may be subject to change in qualification criteria, unexpected delays and uncertainties. There can be no assurance that the projects for which we bid will be tendered within a reasonable timeframe, or at all. The growth of our business mainly depends on our ability to obtain new contracts in the sectors we operate. Generally, it is very difficult to predict whether and when we will be awarded a new contract. Our future results of operations and cash flows can fluctuate materially from period to period depending on the timing of a contract being awarded.

4. *Our clients operate in a highly regulated environment, and existing and new laws, regulations and government policies affecting the sector in which they operate could adversely affect our business, financial condition and results of operations. Any failure to obtain licenses and approvals by our clients, could adversely affect our business, financial condition and results of operations.*

The infrastructure industry in India is heavily regulated by the central, state and local governmental authorities. We must comply with extensive and complex regulations affecting the processes of construction. These regulations impose on us additional compliance requirements and costs, which may adversely affect our business, financial condition and results of operations.

Changes in the regulatory framework with regard to the infrastructure industry, including future government policies and changes in laws and regulations in India may adversely affect the business of our clients and may impact our ability to do business in our existing and target markets. The timing and content of any new law or regulation is not in our control and such new law or regulation could have an adverse effect on our business, financial condition and results of operations.

5. *We may be seriously affected by delays in the collection of receivables from our clients and may not be able to recover adequately on our claims.*

There may be delays in the collection of receivables from our customers or entities owned, controlled or funded by our customers or their related parties. From time to time it may be difficult for us to collect payments owed to us by these clients. Additionally, we may claim for more payments from our clients for additional work and costs incurred in excess of the contract price or amounts not included in the contract price.

Changes in the business environment and external economic factors can affect the creditworthiness of our clients. Unfavourable changes may lead to weakening of their creditworthiness which has a negative impact on their paying capacities. This can result in delayed payments made to us. Delays in our payments can adversely affect the cash flow position as well as the revenues or profits of our Company, consequently affecting its business and operations.

6. *We are subject to strict quality requirements and any failure on our part to comply with quality standards may lead to cancellation of orders, loss of pre-qualification status for bidding for future projects or warranty claims.*

We may not be able to meet strict quality standards imposed on us, applicable to the construction processes, for a variety of reasons which could have an adverse effect on our business, financial condition, and results of operations. We cannot assure you that we comply or can continue to comply with all the quality requirement standards of our clients. Our failure to achieve or maintain compliance with these requirements or quality standards may subject us to loss of business, warning letters, fines or penalties, which could harm

our business. Further, failure to comply with quality requirements or standards may lead to loss of pre-qualification status for bidding for future projects or could lead to cancellation of contracts which may have a material adverse effect on our business and revenue.

7. *We rely on our information technology systems, in particular, our ERP system, for our operations and its reliability and functionality is critical to our business success.*

We are dependent on our information technology systems for our operations and its reliability and functionality is essential to our business success. Our growing dependence on the information technology infrastructure, applications, and data has caused us to have immense dependency and need for such technology which can be affected by a number of factors, including, the increasing complexity of the IT systems, frequent change and short life span due to technological advancements, data security, limited funding and qualified IT staff.

The ERP system enable us to monitor the daily operation of our business, compile, store and transmit data on supply and production within our Company and for our clients, and maintain up-to-date operating and financial data for the compilation of management accounts. Any damage or system failure that causes interruptions or delays in the input, retrieval or transmission of data could disrupt our normal operations and possibly interfere with our ability to undertake projects pursuant to the requirements or our contracts. Should such an interruption or delay occur, we cannot assure you that it will not result in the loss of data or information that is important to our business or that we will be able to restore our operational capacity within a sufficiently adequate time frame to avoid disruptions to our business. In addition, we may not be able to upgrade our ERP system in a timely manner that is sufficient to meet the needs of our evolving business and operations or at all. The occurrence of any of these events could interfere with the operation of our business and adversely affect our business, financial condition and results of operations.

8. *If the Indian real estate market weakens leading to a slowdown in construction activities, our business, financial condition and results of operations may be adversely affected.*

Our business is primarily focussed on providing engineering consultancy and integrated infrastructure development solutions. Our business is therefore heavily dependent on the performance of the real estate market in India, particularly in the regions in which we operate or intend to operate in and could be adversely affected if real estate market conditions deteriorate. We could see a slump in our financial performance if there is a slowdown in construction activities in the Indian market.

9. *Our promoter and member of our promoter group, have pledge their shares in our Company with Jain Sons Finlease Limited, Hyderabad for securing performance of the Company against its obligation. The said lender may exercise rights in the event of failure to repay the amount due to them.*

The promoter of our Company and member of promoter group, viz. Mr. Satyanarayana Sundara have pledged his shares with Jain Sons Finlease Limited, Hyderabad for securing performance of the Company against its obligation. As on date, 1,341 equity shares of Mr. Satyanarayana Sundara is pledge with the said lender as collateral security. In the event of non-payment of installments on time or delay of payment beyond the period granted to us may allow the lender may to exercise the right to forfeit our pledged shares.

10. *We generate major portion of our revenue from our operations in certain geographical regions especially in Telangana and Delhi and any adverse developments affecting our operations in these regions could have an adverse impact on our revenue and results of operations.*

A major portion of our total revenue is from contracts executed from clients in the State of Telangana and Delhi. Such geographical concentration of our business in these regions heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in these regions which may adversely affect our business prospects, financial conditions and results of operations.

Factors such as competition, regulatory regimes, business practices and customs, in other markets where we may expand our operations may differ from those in which we are currently offering. In addition, as we enter new markets and geographical areas, we are likely to compete not only with national players, but also local players who might have an established local presence, are more familiar with local regulations,

business practices and industry needs, have stronger relationships with local and relevant government authorities, and are in a stronger financial position than us, all of which may give them a competitive advantage over us. Our inability to expand into areas outside Telangana and Delhi market may adversely affect our business prospects, financial conditions and results of operations.

11. We maintain a workforce based upon current and anticipated workloads. If we do not receive future contract awards or if these awards are delayed, significant cost may be incurred.

Our estimates of future performance depends on, among other matters, whether and when we will receive certain new contract awards, including the extent to which we utilize our workforce. The rate at which we utilize our workforce is impacted by a variety of factors including our ability to manage attrition, our ability to forecast our need for services which allows us to maintain an appropriately sized workforce, our ability to transition employees from completed projects to new projects or between internal business groups, and our need to devote resources to non-chargeable activities such as training or business development. While our estimates are based upon our good faith judgment, these estimates can be unreliable and may frequently change based on newly available information. Failure on our part to efficiently use our resources could have adverse effects on our cash flows, business & results of operations.

12. In case we are responsible for timely completion or performance standards of a project, we could incur additional cost or loss in revenue in connection with such obligations.

Under certain contracts, we may be responsible for completing a project by the scheduled completion date as agreed in the relevant contract. If we fail to complete the project as scheduled, we may be held responsible for cost impacts to the client resulting from any delay or the cost to cause the project to achieve the performance standards, generally in the form of contractually agreed-upon liquidated damages. To the extent that these events occur, we may be required to forego part of our contract revenue or provide a discount to the client which would have a material effect on our business, financial condition and results of operations.

13. Certain agreements may be inadequately stamped or may not have been registered as a result of which our operations may be adversely affected.

Few of our agreements may not be stamped adequately or registered. The effect of inadequate stamping is that the document is not admissible as evidence in legal proceedings and parties to that agreement may not be able to legally enforce the same, except after paying a penalty for inadequate stamping. The effect of non-registration, in certain cases, is to make the document inadmissible in legal proceedings. Any potential dispute due to non-compliance of local laws relating to stamp duty and registration may adversely impact the operations of our Company.

14. Our Company requires significant amounts of working capital for a continued growth. Our inability to meet our working capital requirements may have an adverse effect on our results of operations.

Our business is working capital intensive. We meet our requirement for working capital majorly through banking facilities, unsecured loans or internal accruals. A significant portion of our working capital is utilized towards inventories for tooling and spares and trade receivables. Summary of our working capital position is given below:

We intend to continue growing by expanding our business operations. This may result in increase in the quantum of current assets particularly trade receivables and inventories. Our inability to maintain sufficient cash flow, credit facility and other sources of fund, in a timely manner, or at all, to meet the requirement of working capital could adversely affect our financial condition and result of our operations. Our inability, if any to meet our working capital requirements or inability to renew our existing working capital requirements through banking arrangements can adversely impact our business operations and financial position. For further details regarding working capital requirement, please refer to the chapter titled “Objects of the Issue” beginning on page 81 of this Red Herring Prospectus.

15. Our continued success is dependent upon our ability to hire, retain, and utilize qualified personnel.

The success of our business is dependent upon our ability to hire, retain, and utilize qualified personnel, including engineers, designers, and corporate management professionals who have the required experience and expertise. From time to time, it may be difficult to attract and retain qualified individuals with the expertise and in the timeframe demanded by our clients, and we may not be able to satisfy the demand for our services because of our inability to successfully hire and retain qualified personnel.

If we cannot attract and retain qualified personnel or effectively implement appropriate succession plans, it could have a material adverse impact on our business, financial condition, and results of operations. Moreover, we may be unable to manage knowledge developed internally, which may be lost in the event of our inability to retain employees.

The cost of providing our services, including the extent to which we utilize our workforce, affects our profitability. If an expected contract award is delayed or not received, we could incur cost resulting from excess staff, reductions in staff, or redundancy of facilities that could have a material adverse impact on our business, financial conditions, and results of operations.

The cost of providing our services, including the extent to which we utilize our workforce, affects our profitability. If an expected contract award is delayed or not received, we could incur cost resulting from excess staff, reductions in staff, or redundancy of facilities that could have a material adverse impact on our business, financial conditions, and results of operations.

16. Misconduct by employees, agents or partners or our failure to comply with laws or regulations could weaken our ability to win contracts, which could result in reduced revenues and profits.

Any misconduct, fraud, non-compliance with applicable laws and regulations, or other improper activities by our employees, agents or partners could have a significant negative impact on our business and reputation. Such misconduct could include the failure to comply with government procurement regulations, regulations regarding the protection of classified information, regulations prohibiting bribery and other corrupt practices, regulations regarding the pricing of labour and other costs in government contracts, regulations on lobbying or similar activities and any other applicable laws or regulations. Our failure to comply with applicable laws or regulations or acts of misconduct could subject us to fines and penalties, and suspension or debarment from contracting, which could weaken our ability to win contracts and result in reduced revenues and profits and could have a material adverse impact on our business, financial condition, and results of operations.

17. Our financial results may fluctuate significantly, which could have a material negative effect on the price of the Equity Shares

Our financial operating results may fluctuate significantly because of a number of factors, including:

- Fluctuations in the spending patterns of our government and commercial clients;
- The number and significance of projects executed during a quarter;
- Unanticipated changes in contract performance, particularly with contracts that have funding limits;
- The timing of resolving change orders, requests for equitable adjustments and other contract adjustments;
- Delays incurred in connection with a project;
- Weather conditions that delay work at project sites;
- The timing of expenses incurred in connection with acquisitions or other corporate initiatives;
- Natural disasters or other crises;
- Staff levels and utilization rates;
- Changes in price of services offered by our competitors; and
- General economic and political conditions.

These fluctuations could have a material negative effect on the price of our Equity Shares.

18. The contracts in our order book may be adjusted, cancelled or suspended by our clients and, therefore, our order book is not necessarily indicative of our future revenues or earnings.

As on March 31, 2017, our order book for our services contracts was approximately more than Rs 155.59 lakhs out of which unbilled amount is 110.61. There can be no assurance that our order book will actually be realized as revenues or, if realized, will result in profits. Further the revenue of these contracts are spread over years. In accordance with industry practice, most of our contracts are subject to cancellation, termination or suspension at the discretion of the client at any stage of the contract. In addition, the contracts in our order book are subject to changes in the scope of services to be provided as well as adjustments to the costs relating to the contracts. Our order book includes expected revenues for contracts that are based on estimates. Projects can remain in order book for extended periods of time because of the nature of the project and the timing of the particular services required by the project. The risk of contracts in order book being cancelled or suspended generally increases during periods of wide-spread economic slowdowns. In addition, even where a project proceeds as scheduled, it is possible that contracting parties may default and fail to pay amounts owed. Any delay, cancellation or payment default could adversely affect our cash flow position, revenues and/or profitability.

19. We may experience reduced profits or losses under or, in some cases, cancellations or deferrals of, contracts if costs increase above estimates.

We conduct our business under various types of contractual arrangements where costs are estimated in advance. A significant proportion of our engineering consultancy contracts are fixed-price or lump sum contracts, where we bear a significant portion of the risk for cost overruns. Under these types of contracts,

contract prices are established in part on cost and scheduling estimates which are based on a number of assumptions. For these contracts, the assumptions include assumptions relating to future economic conditions, prices and availability of labour, equipment and materials. If these estimates prove inaccurate, or circumstances change such as unanticipated technical problems, difficulties in obtaining permits or approvals, changes in local laws, weather delays or our third party associates' inability to perform, cost overruns may occur and we could experience reduced profits or in some cases, a loss for such projects. These risks tend to be exacerbated for longer-term contracts since there is increased risk that the circumstances under which we based our original bid could change with a resulting increase in costs. In many of these contracts, we may not be able to obtain compensation for additional work performed or expenses incurred and if a project is delayed, we may be required to pay penalties for such delays. Even under our cost-reimbursable contracts, where we do not bear the risk of cost-overruns, costs can exceed client expectations, resulting in deferrals or even cancellations of the contract. Unanticipated costs or delays in performing part of a fixed price contract could have compounding effects by increasing costs of performing other parts of the contract. These variations and the risks generally inherent to the industry we operate in may result in our profits being different from those originally estimated and may result in our experiencing reduced profitability or losses on projects. Depending on the size of a project, these variations from estimated contract performance could have a significant effect on our results of operations. In addition, most contracts that we enter into are subject to certain completion schedule requirements with penalty or invocation of performance guarantees provided by our Company in the event schedules are not met as a result of circumstances within our control. Required payment of penalty and invocation of performance guarantees could have an effect on our results of operations.

20. Our business could be adversely affected if we fail to keep pace with technological developments in the engineering industry.

Our recent experience indicates that our clients are increasingly developing larger, more technically complex projects using more advanced technologies. Our future success will depend, in part, on our ability to respond to technological advances and emerging technology standards and practices on a cost-effective and timely basis. To meet our clients' needs, we must continuously update our existing systems and develop new technologies for our projects. If we fail to anticipate or respond adequately to our clients' changing requirements or keep pace with the latest technological developments, our business, prospects, financial condition and results of operations may be materially and adversely affected.

21. If we are unable to pursue our growth strategy and expand our operations, our business prospects, financial condition and results of operations may be materially and adversely affected.

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees and to implement systems capable of effectively accommodating our growth. However, we cannot assure that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It also is possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

22. Any significant future indebtedness and any conditions and restrictions imposed by such financing agreements could restrict our ability to conduct our business and operations in the manner we desire

As on date of this Red Herring Prospectus, we have sanctioned limit of Rs. 200.00 Lakhs and we may incur further debt in the future. Any significant indebtedness in the future could have important consequences on our cash flows to fund working capital, capital expenditures, acquisitions and other general corporate requirements. In addition, fluctuations in market interest rates may affect the cost of our borrowings. Any

conditions and restrictions imposed by such financing agreements could restrict our ability to conduct our business and operations in the manner we desire. In addition, failure to meet any conditions or obtain consents required under such financing arrangements could have adverse consequences on our business and operations.

23. *Our revenues largely depend on acceptance of the bids submitted to the Government and Government Departments. Our performance could be affected in case majority of the bids are not accepted / awarded to us or we negotiate a lower bid value*

Our business is substantially dependent on infrastructure projects undertaken by Government Authorities / Government departments and other entities funded by the Government. The contracts awarded by state and local Government authorities are tender based. We compete with various consulting engineering companies while submitting the tender to Government and other agencies. In case, we are not qualified or are not amongst the lowest bidders, we stand to lose the business. We cannot assure that any of the bids we submit would be accepted / awarded to us; therefore our ability to procure the contracts by bidding at the lowest rates is crucial for our revenues. Further our business and operations may be impacted as a result of change in the state governments, changes in policies impacting the public at large, scaling back of Government Policies or initiatives, changes in Government or external budgetary allocation, or insufficiency of funds, which can adversely affect our business, financial condition and results of operations.

24. *Our revenue and earnings are largely dependent on the award of new contracts which we do not directly control.*

A substantial portion of our revenue is generated from government contracts, generally obtained through a bidding process. The timing of when project awards will be made is unpredictable and outside of our control. We operate in highly competitive markets where it is difficult to predict whether and when we will receive awards since these awards and projects often involve complex and lengthy negotiations and bidding processes. These processes can be impacted by a wide variety of factors including governmental approvals, financing contingencies, environmental conditions and overall market and economic conditions. In addition, during an economic downturn, many of our competitors may be more inclined to take greater or unusual risks or accept unfavourable terms and conditions in a contract that we might not deem fit or acceptable. Because a significant portion of our revenue is generated from such contracts, our results of operations can fluctuate from quarter to quarter and year to year depending on whether and when contract awards occur and the commencement and progress of work under such awarded contracts. As a result, we are subject to the risk of losing new awards

No show cause notice in respect of the above has been received by the Company till date, any penalty imposed for such non-compliance in future by any regulatory authority could affect our financial conditions to that extent. Such delay/non-compliance may in the future render us liable to statutory penalties, which may have consequence of violation of statutory provisions concerned.

25. *Our business requires extensive research and development initiatives in designing the structure and delay in validations by customers thereby impacting the schedules for designing and realisation of the profits out of the same. This affects the financial conditions and business operations of our company in long run.*

Our industry is characterized by the changing technology and user preferences, evolving industry standards and the frequent introduction of new designs and enhancements. Development of new designs has become increasingly complex in today's fast-moving business environments. Our business process involves extensive research and development initiatives in designing the projects to be used in service industry. Our competitors may succeed in developing designs that are more cost effective than any of our designs that we may develop, which may render our design uncompetitive and adversely affect our business and financial results. Because of the pace of technological advances, we may in addition to our existing designs, also be required to introduce new designs that offer our customers the latest competitive technologies while

managing the production of our existing designs on a timely basis. The success of any new design is dependent on factors including timely completion of new product design, acceptable production yields and market acceptance. If we cannot respond adequately to the increased competition we expect to face or delay in customer validations or delay in developing design, we will lose our market credibility and market share and our profits will decline, which will adversely affect our business, results of operations and financial condition.

26. Our Company had negative cash flows from our investing activities and financing activities in the previous year(s) as per the Restated Financial Statements and the same are summarized as under:

Amount (Rs. In lakhs)

Particulars	For period ended September 30, 2017	For the year ended March 31,				
		2017	2016	2015	2014	2013
Cash Flow from / (used in) Operating Activities	71.00	34.55	565.65	(116.60)	85.13	105.71
Cash Flow from / (used in) Investing Activities	(105.28)	(60.18)	6.22	(71.39)	(8.49)	(59.90)
Cash Flow from / (used in) Financing Activities	170.55	(254.99)	(313.40)	209.39	(108.59)	84.17

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows in future, it may adversely affect our business and financial operations.

27. The Company has not yet placed any orders for softwares and hardwares for its proposed object, as specified in the Objects of the Issue. Any delay in placing orders, procurement of softwares and hardwares may delay our implementation schedule and may also lead to increase in price of these softwares, further affecting our revenue and profitability.

As on date of this Red Herring Prospectus, we not have placed any orders for softwares and hardwares and have not made any advance payment. Further, we have identified the type of softwares and hardwares required to be bought for our proposed engineering projects, and for which orders are yet to be placed which are amounting to Rs. 55.81 lakhs as detailed in the “Objects of the Issue” beginning on page 81 of this Red Herring Prospectus. These are based on our estimates and on third-party quotations, which are subject to a number of variables, including possible cost overruns, changes in management’s views of the desirability of current plans, change in supplier of softwares, among others, which may have an adverse effect on our business and results of operations. Further, we cannot assure that we would be able to procure these softwares, or procure the same within budgeted costs and timelines. Delays in acquisition of the same could result in the cost and time overrun in the implementation of the Project, which would have a material adverse effect on our business, results of operations and financial condition. For further details, please refer to the chapter titled “Objects of the Issue” beginning on page 81 of this Red Herring Prospectus.

28. We require a number of approvals, NOCs, licences, registrations and permits in the ordinary course of our business. Some of the approvals are required to be transferred in the name of ‘S.S. Infrastructure Development Consultants Limited’ from ‘S.S. Infrastructure Development Consultants Private Limited’ pursuant to name change of our company and any failure or delay in obtaining the same in a timely manner may adversely affect our operations.

We need to apply for renewal of approvals which expire, from time to time, as and when required in the ordinary course of our business. Pursuant to our conversion from a private limited company to a public limited company in the year 2017, we need to take necessary steps for transferring the approvals of our company in the new name.

Our Company is yet to apply for Registration of the registered office and all the branch offices under the Shops and Establishments Act. In case of delay or failure to obtain the same, it could affect our business operations. Any failure to renew the approvals that have expired, or to apply for and obtain the required approvals, licences, registrations or permits, or any suspension or revocation of any of the approvals, licences, registrations and permits that have been or may be issued to us, could result in delaying the operations of our business, which may adversely affect our business, financial condition, results of operations and prospects. We cannot assure you that the approvals, licences, registrations and permits issued to us would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Additionally, our company has not applied for change of name of the approval/s as mentioned in material licenses/ approvals for which the Company is yet to apply section of Government and Other Statutory Approvals Chapter. For more information, see chapter “Government and Other Statutory Approvals” on page 179 of this Red Herring Prospectus.

29. We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and service industry contained in this Red Herring Prospectus.

While facts and other statistics in this Red Herring Prospectus relating to India, the Indian economy and the service industry has been based on various government publications and reports from government agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled ‘Our Industry’ beginning on page 97 of this Red Herring Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

30. We have certain contingent liabilities that have not been provided for in our Company’s financials which if materialised, could adversely affect our financial condition.

Our contingent liabilities as on September 30, 2017 is as under:

Amount (Rs. in lakhs)

Sr. No.	Particulars	As at September 30, 2017
1.	Bank Guarantee	561.73
	Total	561.73

In the event any such contingencies mentioned above were to materialize or if our contingent liabilities were to increase in the future, our financial condition could be adversely affected. For further details, see the section entitled “Financial Statements, as restated” on page 157 of this Red Herring Prospectus.

31. Our inability to maintain and/or procure adequate insurance coverage in connection with our business may adversely affect us.

Our operations are subject to inherent risks and hazards which may adversely impact our profitability, such as breakdown, malfunctions, sub-standard performance or failures of software, fire, third party liability claims, loss-in-transit for our designs, accidents and natural disasters. Our Company has obtained insurance coverage in respect of certain risks. These policies generally insure our assets against standard fire and special perils. Also we have taken marine cargo and burglary insurance policies. While we believe that we maintain insurance coverage in adequate amounts consistent with size of our business, our insurance policies do not cover all risks, specifically risks like housebreaking, terrorism, etc. There can be no

assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance has been availed. If we suffer a significant uninsured loss or if insurance claim in respect of the subject-matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected.

For further details, please refer chapter titled “Our Business” beginning on page 117 of this Red Herring Prospectus.

32. *We depend on certain brand names and our corporate name and logo that we may not be able to protect and/or maintain.*

We have applied for registration of our logo and wordmark namely ‘SS INFRASTRUCTURE’ and the same is currently pending. There is no guarantee that the application for registration of our logo and wordmark given above will be accepted in favour of the Company. This may affect our ability to protect our trademark in the event of any infringement of our intellectual property. In the absence of such registrations, competitors and other companies may challenge the validity or scope of our intellectual property right over these brands or our corporate name or logo. As a result, we may be required to invest significant resources in developing new brands or names, which could materially and adversely affect our business, financial condition, results of operations and prospects. In case of failure to renew our intellectual property on time, it may adversely affect our business operations.

Our failure to comply with the existing or increased regulations, or the introduction of changes to existing regulations, could adversely affect our business, financial condition, results of operations and prospects.

The material approvals, licences or permits required for our business include tax laws, shops and establishment licences, among others. See “Government and other Statutory Approvals” on page 179 of this Red Herring Prospectus for further details on the required material approvals for the operation of our business.

33. *Our lenders have charge over our movable and immovable properties in respect of finance availed by us.*

We have secured our lenders by creating a charge over our movable and immovable properties in respect of loans / facilities availed by us from banks and financial institutions. The total amounts outstanding and payable by us as secured loans were Rs.164.06 Lakhs as on September 30, 2017 of which Company has created charge over its movable and immovable properties of Rs. 63.21 Lakhs . In the event we default in repayment of the loans / facilities availed by us and any interest thereof, our properties may be forfeited by lenders, which in turn could have significant adverse affect on business, financial condition or results of operations. For further information on the *Financial Indebtedness* please refer to page 170 of this Red Herring Prospectus.

34. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Further we have not identified any alternate source of financing the ‘Objects of the Issue. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

As on date, we have not made any alternate arrangements for meeting our capital requirements for the objects of the issue. We meet our capital requirements through our bank finance, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details please refer to the chapter titled “Objects of the Issue” beginning on page 81 of this Red Herring Prospectus.

35. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Additionally, under some of our loan agreements, we may not be permitted to declare any dividends, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “Dividend Policy” on page 156 of this Red Herring Prospectus.

36. *Within the parameters as mentioned in the chapter titled ‘Objects of this Issue’ beginning on page 81 of this Red Herring Prospectus, our Company’s management will have flexibility in applying the proceeds of this Issue. The fund requirement and deployment mentioned in the Objects of this Issue have not been appraised by any bank or financial institution.*

We intend to use entire Issue Proceeds towards purchase of software’s, meeting the working capital requirement, part repayment of secured and unsecured loans, general corporate purpose. We intend to deploy the Net Issue Proceeds in financial year 2017-18 and 2018-19 and such deployment is based on certain assumptions and strategy which our Company believes to implement in future. The funds raised from the Issue may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc., For further details on the use of the Issue Proceeds, please refer chapter titled “Objects of the Issue” beginning on page 81 of this Red Herring Prospectus.

The deployment of funds for the purposes described above is at the discretion of our Company’s Board of Directors. The fund requirement and deployment is based on internal management estimates and has not been appraised by any bank or financial institution. Accordingly, within the parameters as mentioned in the chapter titled ‘Objects of the Issue’ beginning on page 81 of this Red Herring Prospectus, the Management will have significant flexibility in applying the proceeds received by our Company from the Issue. Our Board of Directors will monitor the proceeds of this Issue.

37. *Our future funds requirements, in the form of issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

38. *Our success depends largely upon the services of our Directors, Promoters and other Key Managerial Personnel and our ability to attract and retain them. Demand for Key Managerial Personnel in the industry is intense and our inability to attract and retain Key Managerial Personnel may affect the operations of our Company.*

Our success is substantially dependent on the expertise and services of our Directors, Promoters and our Key Managerial Personnel. They provide expertise which enables us to make well informed decisions in relation to our business and our future prospects. Our future performance will depend upon the continued services of these persons. Demand for Key Managerial Personnel in the industry is intense. We cannot assure you that we will be able to retain any or all, or that our succession planning will help to replace, the

key members of our management. The loss of the services of such key members of our management team and the failure of any succession plans to replace such key members could have an adverse effect on our business and the results of our operations.

39. *Our Promoters and members of the Promoter Group will continue jointly to retain majority control over our Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.*

After completion of the Issue, our Promoters and members of the Promoter Group will collectively own [●] % of our equity share capital. As a result, our Promoters, together with the members of the Promoter Group, will continue to exercise a significant degree of influence over us and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

40. *In addition to normal remuneration or benefits and reimbursement of expenses, some of our Directors and key managerial personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.*

Our Directors and Key Managerial Personnel are interested in our Company to the extent of remuneration paid to them for services rendered and reimbursement of expenses payable to them. In addition, some of our Directors and Key Managerial Personnel may also be interested to the extent of their shareholding and dividend entitlement in our Company. For further information, see “Capital Structure” and “Our Management” on pages 66 and 132, respectively, of this Red Herring Prospectus.

41. *If we are unable to manage our growth or execute our strategies effectively, our business and prospects may be materially and adversely affected.*

Our revenue and our business operations have grown in recent years. We may not be able to sustain these rates of growth in future periods due to a number of factors, including, among others, our execution capability, our ability to maintain customer satisfaction, macroeconomic factors out of our control, the greater difficulty of growing at sustained rates from a larger revenue base, our inability to control our expenses and the availability of resources for our growth. In addition, our anticipated expansion will place a significant strain on our management, systems and resources. Our development and expansion strategies will require substantial managerial efforts and skills and the incurrence of additional expenditures and may subject us to new or increased risks. Further, pursuing these strategies may require us to expand our operations through internal development efforts as well as partnerships, joint ventures, investments and acquisitions. We may not be able to efficiently or effectively implement our growth strategies or manage the growth of our operations, and any failure to do so may limit future growth and hamper our business strategies.

42. *The average cost of acquisition of Equity Shares by our Promoters could be lower than the floor price.*

Our Promoters average cost of acquisition of Equity Shares in our Company may be lower than the Floor Price of the Price Band as may be decided by the Company in consultation with the BRLM. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer chapter title “Capital Structure” beginning on page 66 of this Red Herring Prospectus.

43. *The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.*

Since the Issue size is less than Rs.10,000 lakhs, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this

Issue. The deployment of these funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

- **Issue Specific Risks**

44. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.

The Issue Price of our Equity Shares will be determined by book built method. This price is based on numerous factors (For further information, please refer chapter titled “Basis for Issue Price” beginning on page 92 of this Red Herring Prospectus) and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

EXTERNAL RISK FACTORS

Industry Risks:

45. Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.

Our business and industry is regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

Other Risks

46. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under the Income-tax Act, 1961, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India except any gain realised on the sale of shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if the STT has been paid on the transaction. The STT will be levied on and collected by an Indian stock exchange on which equity shares are sold. Any gain realised on the sale of shares held for more than 12 months to an Indian resident, which are sold other than on a recognised stock exchange and as a result of which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realised on the sale of shares on a stock exchange held for a period of 12 months or less will be subject to short term capital gains tax. Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less which are sold other than on a recognised stock exchange and on which no STT has been paid, will be subject to short term capital gains tax at a relatively higher rate as compared to the transaction where STT has been paid in India. By way of the Finance Bill, 2017, the Government of India has proposed to introduce certain anti-abuse measures, pursuant to which, the aforesaid exemption from payment of capital gains tax for income arising on transfer of equity shares shall only be available if STT was paid at the time of acquisition of the equity shares. While the said provision has not been notified as on date, it is expected to take effect from April 1,

2018 and will, accordingly, apply in relation to the assessment year 2018-19 and subsequent assessment years. Capital gains arising from the sale of shares will be exempt from taxation in India in cases where an exemption is provided under a tax treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdictions on gains arising from a sale of the shares subject to relief available under the applicable tax treaty or under the laws of their own jurisdiction.

47. *Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements prepared and presented in accordance with SEBI ICDR Regulations contained in this Red Herring Prospectus.*

As stated in the reports of the Auditor included in this Red Herring Prospectus under chapter "Financial Statements as restated" beginning on page 157, the financial statements included in this Red Herring Prospectus are based on financial information that is based on the audited financial statements that are prepared and presented in conformity with Indian GAAP and restated in accordance with the SEBI ICDR Regulations, and no attempt has been made to reconcile any of the information given in this Red Herring Prospectus to any other principles or to base it on any other standards. Indian GAAP differs from accounting principles and auditing standards with which prospective investors may be familiar in other countries, such as U.S. GAAP and IFRS. Significant differences exist between Indian GAAP and U.S. GAAP and IFRS, which may be material to the financial information prepared and presented in accordance with Indian GAAP contained in this Red Herring Prospectus. Accordingly, the degree to which the financial information included in this Red Herring Prospectus will provide meaningful information is dependent on familiarity with Indian GAAP, the Companies Act and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian GAAP on the financial disclosures presented in this Red Herring Prospectus should accordingly be limited.

48. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.*

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include:

- custom duties on imports of raw materials and components;
- Goods and Service Tax; and
- Other new or special taxes and surcharges introduced on a permanent or temporary basis from time to time.

These taxes and levies affect the cost and prices of our designs and therefore demand for our design. An increase in any of these taxes or levies, or the imposition of new taxes or levies in the future, may have a material adverse effect on our business, profitability and financial condition.

49. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

50. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and Service Industry contained in the Red Herring Prospectus.*

While facts and other statistics in the Red Herring Prospectus relating to India, the Indian economy and the Service industry has been based on various government publications and reports from government agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled 'Our Industry' beginning on page 97 of this Red Herring Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

51. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

52. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

53. The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

54. Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunamis, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

55. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

OVERVIEW: SERVICE SECTOR

Till the global financial crisis of 2008, India’s services exports was registering a good growth for almost a decade. Services export growth reduced to 11.9 per cent CAGR during 2005-06 to 2014-15 from 21.6 per cent CAGR during 1994-95 to 2004-05. As a result of pick up in some sectors such as transportation and business services, services exports grew by 5.7 per cent in 2016-17. In 2016-17, software services exports, which account for 45.2 per cent of total services, declined by 0.7 per cent due to a challenging global business environment and pricing pressure on traditional services

The services sector is not only the dominant sector in India’s GDP, but has also attracted significant foreign investment flows, contributed significantly to exports as well as provided large-scale employment. India’s services sector covers a wide variety of activities such as trade, hotel and restaurants, transport, storage and communication, financing, insurance, real estate, business services, community, social and personal services, and services associated with construction.

GLOBAL ECONOMIC OVERVIEW

For India, three external developments are of significant consequence. In the short run, the change in the outlook for global interest rates as a result of the US elections and the implied change in expectations of US fiscal and monetary policy will impact on India’s capital flows and exchange rates. Markets are factoring in a regime change in advanced countries, especially US macroeconomic policy, with high expectations of fiscal stimulus and unwavering exit from unconventional monetary policies. The end of the 20-year bond rally and end to the corset of deflation and deflationary expectations are within sight. Second, the medium-term political outlook for globalisation and in particular for the world’s “political carrying capacity for globalisation” may have changed in the wake of recent developments. In the short run a strong dollar and declining competitiveness might exacerbate the lure of protectionist policies. These follow on on-going trends—documented widely—about stagnant or declining trade at the global level. This changed outlook will affect India’s export and growth prospects

Third, developments in the US, especially the rise of the dollar, will have implications for China’s currency and currency policy. If China is able to successfully re-balance its economy, the spill over effects on India and the rest of the world will be positive. On, the other hand, further declines in the yuan, even if dollar-induced, could interact with underlying vulnerabilities to create disruptions in China that could have negative spill overs for India. For China, there are at least two difficult balancing acts with respect to the currency. Domestically, a declining currency (and credit expansion) props up the economy in the short run but delay rebalancing while also adding to the medium term challenges. Internationally, allowing the currency to weaken in response to capital flight risks creating trade frictions but imposing capital controls discourages FDI and undermines China’s ambitions to establish the Yuan as a reserve currency. China with its underlying vulnerabilities remains the country to watch for its potential to unsettle the global economy.

REVIEW OF MAJOR DEVELOPMENTS IN INDIAN ECONOMY

The Indian economy has continued to consolidate the gains achieved in restoring macroeconomic stability. Real GDP growth in the first half of the year was 7.2 percent, on the weaker side of the 7.0-7.75 per cent projection in the Economic Survey 2015-16 and somewhat lower than the 7.6 percent rate recorded in the second half of 2015-16 (Figure 1a). The main problem was fixed investment, which declined sharply as stressed balance sheets in the corporate sector continued to take a toll on firms' spending plans. On the positive side, the economy was buoyed by government consumption, as the 7th Pay Commission salary recommendations were implemented, and by the long-awaited start of an export recovery as demand in advanced countries began to accelerate. Nominal GDP growth recovered to respectable levels, reversing the sharp and worrisome dip that had occurred in the first half of 2015-16 (Figure 1b).

The major highlights of the sectoral growth outcome of the first half of 2016-17 were: (i) moderation in industrial and nongovernment service sectors; (ii) the modest pick-up in agricultural growth on the back of improved monsoon; and (iii) strong growth in public administration and defence services— dampeners on and catalysts to growth almost balancing each other and producing a real Gross Value Addition (GVA) growth (7.2 percent), quite similar to the one (7.1 per cent) in H2 2015-16 (Figure 1b).

Inflation this year has been characterized by two distinctive features. The Consumer Price Index (CPI)-New Series inflation, which averaged 4.9 per cent during April-December 2016, has displayed a downward trend since July when it became apparent that kharif agricultural production in general, and pulses in particular would be bountiful. The decline in pulses prices has contributed substantially to the decline in CPI inflation which reached 3.4 percent at end-December. The second distinctive feature has been the reversal of WPI inflation, from a trough of (-)5.1 percent in August 2015 to 3.4 percent at end-December 2016, on the back of rising international oil prices. The wedge between CPI and WPI inflation, which had serious implications for the measurement of GDP discussed in MYEA (Box 3, Chapter 1, MYEA 2015-16), has narrowed considerably. Core inflation has, however, been more stable, hovering around 4.5 percent to 5 percent for the year so far. The outlook for the year as a whole is for CPI inflation to be below the RBI's target of 5 percent, a trend likely to be assisted by demonetisation.

External Sector

Similarly, the external position appears robust having successfully weathered the sizeable redemption of Foreign Currency Non-Resident (FCNR) deposits in late 2016, and the volatility associated with the US election and demonetisation. The current account deficit has declined to reach about 0.3 percent of GDP in the first half of FY2017. Foreign exchange reserves are at comfortable levels, having risen from around US\$350 billion at end-January 2016 to US\$ 360 billion at end-December 2016 and are well above standard norms for reserve adequacy. In part, surging net FDI inflows, which grew from 1.7 percent of GDP in FY2016 to 3.2 percent of GDP in the second quarter of FY2017, helped the balance-of-payments

The trade deficit declined by 23.5 per cent in April-December 2016 over corresponding period of previous year. During the first half of the fiscal year, the main factor was the contraction in imports, which was far steeper than the fall in exports. But during October- December, both exports and imports started a long-

awaited recovery, growing at an average rate of more than 5 per cent. The improvement in exports appears to be linked to improvements in the world economy, led by better growth in the US and Germany. On the import side, the advantage on account of benign international oil prices has receded and is likely to exercise upward pressure on the import bill in the short to medium term. Meanwhile, the net services surplus declined in the first half, as software service exports slowed and financial service exports declined. Net private remittances declined by \$4.5 bn in the first half of 2016-17 compared to the same period of 2015-16, weighed down by the lagged effects of the oil price decline, which affected inflows from the Gulf region.

Fiscal Position

Trends in the fiscal sector in the first half have been unexceptional and the central government is committed to achieving its fiscal deficit target of 3.5 percent of GDP this year. Excise duties and services taxes have benefitted from the additional revenue measures introduced last year. The most notable feature has been the over-performance (even relative to budget estimates) of excise duties in turn based on buoyant petroleum consumption: real consumption of petroleum products (petrol) increased by 11.2 percent during April-December 2016 compared to same period in the previous year. Indirect taxes, especially petroleum excises, have held up even after demonetisation in part due to the exemption of petroleum products from its scope. More broadly, tax collections have held up to a greater extent than expected possibly because of payment of dues in demonetised notes was permitted. Non-tax revenues have been challenged owing to shortfall in spectrum and disinvestment receipts but also to forecast optimism; the stress in public sector enterprises has also reduced dividend payments.

State government finances are under stress. The consolidated deficit of the states has increased steadily in recent years, rising from 2.5 percent of GDP in 2014-15 to 3.6 percent of GDP in 2015-16, in part because of the UDAY scheme. The budgeted numbers suggest there will be an improvement this year. However, markets are anticipating some slippage, on account of the expected growth slowdown, reduced revenues from stamp duties, and implementation of their own Pay Commissions. For these reasons, the spread on state bonds over government securities jumped to 75 basis points in the January 2017 auction from 45 basis points in October 2016. For the general government as a whole, there is an improvement in the fiscal deficit with and without UDAY scheme.

OUR BUSINESS STRATEGY

1. Focus on Consultancy service

We intend to continuously strengthen the services to enhance our position as an Integrated Infrastructure Development Solutions service provider with a focus on our core consultancy business, which we believe provides further growth opportunities by retaining existing clients and acquisition of new clients. We shall make efforts to further strengthen our core consultancy business by deploying additional resources such as hiring sector specific experts, setting up of data centre and expanding our office network.

2. Increase our basket of service

On technological front, our company shall continue to focus implementation of ERP in order to upgrade and integrate the growing operations which will also enhance the overall productivity.

We shall migrate to REVIT environment in designing and drafting sections to work on Building Information Modelling (BIM), which shall result in increased efficiency and higher accuracy of our deliverables.

Being in the industry for a long period now, we understand the importance of diversification and hence, we are looking to enter into new segments as under:-

- We are looking to augment and strengthen the Building Information Modelling (BIM) division as this is a booming sector which shall have a strong demand in near future in the industry.
- Rehabilitation and Restoration Schemes for old industrial buildings and other structures.
- Pyrotechnical Designs for Potential Overseas Customers by establishing offices overseas.
- Project Management Consultancy services for execution of works.
- Potential Upcoming Projects in the developing new state of Telangana.

• BUSINESS INFORMATION MODELLING (BIM) : AT A GLANCE

“With *BIM* (Building Information Modeling) technology, one or more accurate virtual models of a building are constructed digitally. They support design through its phases, allowing better analysis and control than manual processes.

Traditional building design was largely reliant upon two-dimensional technical drawings (plans, elevations, sections, etc.). Building information modeling extends this beyond 3D, augmenting the three primary spatial dimensions (width, height and depth). BIM therefore covers more than just geometry. It also covers spatial relationships, light analysis, geographic information, and quantities and properties of building components (for example, manufacturers' details).

BIM design tools allow extraction of different views from a building model for drawing production and other uses. These different views are automatically consistent, being based on a single definition of each object instance.

• REVIT

Autodesk Revit is a BIM software for architects, landscape architects, structural engineers, MEP (Mechanical, Electrical and Plumbing) engineers, designers and contractors developed by Autodesk.

It allows users to design a building and structure and its components in 3D, annotate the model with 2D drafting elements, and access building information from the building model's database.

Revit is 4D BIM capable with tools to plan and track various stages in the building's lifecycle, from concept to construction and later maintenance and/or demolition.

3. Geographical expansion of our services

Our experience, knowledge and expertise in the domestic business will help us to grow in international business. Striving on this, we aim to expand our geographical reach of services internationally and intend to start our business operation in United Arab Emirates (UAE) to start with. Once we catch a hold in UAE, we would be looking for further expansion making ourselves a global company. For details relating to Objects, please refer to chapter titled “Objects of the Issue” beginning on page 81 of Red Herring Prospectus.

4. Increase the use of technology to improve operational efficiency

The volume of our business has increased over the last few years as we grow our service portfolio and have expanded the scope of services and the sectors we cater to. This has driven the need for operational efficiency. Increasing our operational efficiency would entail increase in use of technology. We propose to have an information interface, which would help to improve productivity by documenting and continuously updating our knowledge base. Accessibility of updated information to our consultants through our information interface would help us increase our productivity and also help in faster execution of assignments.

Illustration of Book Building and Price Discovery Process (Investors should note that this example is solely for illustrative purposes and is not specific to the Issue);

Bidders can bid at any price within the price band. For instance, assume a price band of Rs. 20 to Rs. 24 per equity share, Issue size of 3,000 equity shares and receipt of five bids from bidders, details of which are shown in the table below. A graphical representation of the consolidated demand and price would be made available at the bidding centers during the bidding period. The illustrative book below shows the demand for the equity shares of the issuer company at various prices and is collated from bids received from various investors.

Bid Quantity	Bid Price (Rs.)	Cumulative Bid Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the issuer is able to Issue the desired number of shares is the price at which the book cuts off, i.e., Rs. 22/- in the above example. The issuer, in consultation with the Book Running Lead Manager will finalize the Issue price at or below such cut-off price, i.e., at or below Rs. 22/-. All bids at or above this Issue price and cut-off bids are valid bids and are considered for allocation in the respective categories.

OVERVIEW: SERVICE SECTOR

Till the global financial crisis of 2008, India’s services exports was registering a good growth for almost a decade. Services export growth reduced to 11.9 per cent CAGR during 2005-06 to 2014-15 from 21.6 per cent CAGR during 1994-95 to 2004-05. As a result of pick up in some sectors such as transportation and business services, services exports grew by 5.7 per cent in 2016-17. In 2016-17, software services exports, which account for 45.2 per cent of total services, declined by 0.7 per cent due to a challenging global business environment and pricing pressure on traditional services

The services sector is not only the dominant sector in India’s GDP, but has also attracted significant foreign investment flows, contributed significantly to exports as well as provided large-scale employment. India’s services sector covers a wide variety of activities such as trade, hotel and restaurants, transport, storage and communication, financing, insurance, real estate, business services, community, social and personal services, and services associated with construction.

GLOBAL ECONOMIC OVERVIEW

For India, three external developments are of significant consequence. In the short run, the change in the outlook for global interest rates as a result of the US elections and the implied change in expectations of US fiscal and monetary policy will impact on India’s capital flows and exchange rates. Markets are factoring in a regime change in advanced countries, especially US macroeconomic policy, with high expectations of fiscal stimulus and unwavering exit from unconventional monetary policies. The end of the 20-year bond rally and end to the corset of deflation and deflationary expectations are within sight. Second, the medium-term political outlook for globalisation and in particular for the world’s “political carrying capacity for globalisation” may have changed in the wake of recent developments. In the short run a strong dollar and declining competitiveness might exacerbate the lure of protectionist policies. These follow on on-going trends—documented widely—about stagnant or declining trade at the global level. This changed outlook will affect India’s export and growth prospects

Third, developments in the US, especially the rise of the dollar, will have implications for China’s currency and currency policy. If China is able to successfully re-balance its economy, the spill over effects on India and the rest of the world will be positive. On, the other hand, further declines in the yuan, even if dollar-induced, could interact with underlying vulnerabilities to create disruptions in China that could have negative spill overs for India. For China, there are at least two difficult balancing acts with respect to the currency. Domestically, a declining currency (and credit expansion) props up the economy in the short run but delay rebalancing while also adding to the medium term challenges. Internationally, allowing the currency to weaken in response to capital flight risks creating trade frictions but imposing capital controls discourages FDI and undermines China’s ambitions to establish the Yuan as a reserve currency. China with its underlying vulnerabilities remains the country to watch for its potential to unsettle the global economy.

REVIEW OF MAJOR DEVELOPMENTS IN INDIAN ECONOMY

The Indian economy has continued to consolidate the gains achieved in restoring macroeconomic stability. Real GDP growth in the first half of the year was 7.2 percent, on the weaker side of the 7.0-

7.75 per cent projection in the Economic Survey 2015-16 and somewhat lower than the 7.6 percent rate recorded in the second half of 2015-16 (Figure 1a). The main problem was fixed investment, which declined sharply as stressed balance sheets in the corporate sector continued to take a toll on firms' spending plans. On the positive side, the economy was buoyed by government consumption, as the 7th Pay Commission salary recommendations were implemented, and by the long-awaited start of an export recovery as demand in advanced countries began to accelerate. Nominal GDP growth recovered to respectable levels, reversing the sharp and worrisome dip that had occurred in the first half of 2015-16 (Figure 1b).

The major highlights of the sectoral growth outcome of the first half of 2016-17 were: (i) moderation in industrial and nongovernment service sectors; (ii) the modest pick-up in agricultural growth on the back of improved monsoon; and (iii) strong growth in public administration and defence services— dampeners on and catalysts to growth almost balancing each other and producing a real Gross Value Addition (GVA) growth (7.2 percent), quite similar to the one (7.1 per cent) in H2 2015-16 (Figure 1b).

Inflation this year has been characterized by two distinctive features. The Consumer Price Index (CPI)-New Series inflation, which averaged 4.9 per cent during April-December 2016, has displayed a downward trend since July when it became apparent that kharif agricultural production in general, and pulses in particular would be bountiful. The decline in pulses prices has contributed substantially to the decline in CPI inflation which reached 3.4 percent at end-December. The second distinctive feature has been the reversal of WPI inflation, from a trough of (-)5.1 percent in August 2015 to 3.4 percent at end-December 2016, on the back of rising international oil prices. The wedge between CPI and WPI inflation, which had serious implications for the measurement of GDP discussed in MYEA (Box 3, Chapter 1, MYEA 2015-16), has narrowed considerably. Core inflation has, however, been more stable, hovering around 4.5 percent to 5 percent for the year so far. The outlook for the year as a whole is for CPI inflation to be below the RBI's target of 5 percent, a trend likely to be assisted by demonetisation.

External Sector

Similarly, the external position appears robust having successfully weathered the sizeable redemption of Foreign Currency Non-Resident (FCNR) deposits in late 2016, and the volatility associated with the US election and demonetisation. The current account deficit has declined to reach about 0.3 percent of GDP in the first half of FY2017. Foreign exchange reserves are at comfortable levels, having risen from around US\$350 billion at end-January 2016 to US\$ 360 billion at end-December 2016 and are well above standard norms for reserve adequacy. In part, surging net FDI inflows, which grew from 1.7 percent of GDP in FY2016 to 3.2 percent of GDP in the second quarter of FY2017, helped the balance-of-payments

The trade deficit declined by 23.5 per cent in April-December 2016 over corresponding period of previous year. During the first half of the fiscal year, the main factor was the contraction in imports, which was far steeper than the fall in exports. But during October- December, both exports and imports started a long-awaited recovery, growing at an average rate of more than 5 per cent. The improvement in exports appears to be linked to improvements in the world economy, led by better growth in the US

and Germany. On the import side, the advantage on account of benign international oil prices has receded and is likely to exercise upward pressure on the import bill in the short to medium term. Meanwhile, the net services surplus declined in the first half, as software service exports slowed and financial service exports declined. Net private remittances declined by \$4.5 bn in the first half of 2016-17 compared to the same period of 2015-16, weighed down by the lagged effects of the oil price decline, which affected inflows from the Gulf region.

Fiscal Position

Trends in the fiscal sector in the first half have been unexceptional and the central government is committed to achieving its fiscal deficit target of 3.5 percent of GDP this year. Excise duties and services taxes have benefitted from the additional revenue measures introduced last year. The most notable feature has been the over-performance (even relative to budget estimates) of excise duties in turn based on buoyant petroleum consumption: real consumption of petroleum products (petrol) increased by 11.2 percent during April-December 2016 compared to same period in the previous year. Indirect taxes, especially petroleum excises, have held up even after demonetisation in part due to the exemption of petroleum products from its scope. More broadly, tax collections have held up to a greater extent than expected possibly because of payment of dues in demonetised notes was permitted. Non-tax revenues have been challenged owing to shortfall in spectrum and disinvestment receipts but also to forecast optimism; the stress in public sector enterprises has also reduced dividend payments.

State government finances are under stress. The consolidated deficit of the states has increased steadily in recent years, rising from 2.5 percent of GDP in 2014-15 to 3.6 percent of GDP in 2015-16, in part because of the UDAY scheme. The budgeted numbers suggest there will be an improvement this year. However, markets are anticipating some slippage, on account of the expected growth slowdown, reduced revenues from stamp duties, and implementation of their own Pay Commissions. For these reasons, the spread on state bonds over government securities jumped to 75 basis points in the January 2017 auction from 45 basis points in October 2016. For the general government as a whole, there is an improvement in the fiscal deficit with and without UDAY scheme.

OUTLOOK FOR 2016-17

This year's outlook must be evaluated in the wake of the November 8 action to demonetize the high denomination notes. But it is first important to understand the analytics of the demonetisation shock in the short run. Demonetisation affects the economy through three different channels. It is potentially: 1) an aggregate demand shock because it reduces the supply of money and affects private wealth, especially of those holding unaccounted money; 2) an aggregate supply shock to the extent that economic activity relies on cash as an input (for example, agricultural production might be affected since sowing requires the use of labour traditionally paid in cash); and 3) an uncertainty shock because economic agents face imponderables related to the magnitude and duration of the cash shortage and the policy responses (perhaps causing consumers to defer or reduce discretionary consumption and firms to scale back investments).

Demonetisation is also very unusual in its monetary consequences. It has reduced sharply, the supply of one type of money—cash—while increasing almost to the same extent another type of money—demand deposits. This is because the demonetized cash was required to be deposited in the banking system. In the third quarter of FY2017 (when demonetisation was introduced), cash declined by 9.4 percent, demand deposits increased by 43 percent, and growth in the sum of the two by 11.3 percent.

The price counterparts of this unusual aspect of demonetisation are the surge in the price of cash (inferred largely through queues and restrictions), on the one hand; and the decline in interest rates on the lending rate (based on the marginal cost of funds) by 90 basis points since November 9; on deposits (by about 25 basis points); and on g-secs on the other (by about 32 basis points).

There is yet another dimension of demonetisation that must be kept in mind. By definition, all these quantity and price impacts will self-correct by amounts that will depend on the pace at which the economy is remonetized and policy restrictions eased. As this occurs, consumers will run down their

bank deposits and increase their cash holdings. Of course, it is possible, even likely that the self-correction will not be complete because in the new equilibrium, aggregate cash holdings (as a share of banking deposits and GDP) are likely to be lower than before.

Anecdotal and other survey data abound on the impact of demonetisation. But we are interested in a macro-assessment and hence focus on five broad indicators: Agricultural (Rabi) sowing; Indirect tax revenue, as a broad gauge of production and sales; Auto sales, as a measure of discretionary consumer spending and two-wheelers, as the best indicator of both rural and less affluent demand; Real credit growth; and Real estate prices. Contrary to early fears, as of January 15, 2017 aggregate sowing of the two major rabi crops—wheat and pulses (gram)—exceeded last year’s planting by 7.1 percent and 10.7 percent, respectively. Favourable weather and moisture conditions presage an increase in production. To what extent these favourable factors will be attenuated will depend on whether farmers’ access to inputs—fertilizer, credit, and labour—was affected by the cash shortage.

To estimate a demonetisation effect, one needs to start with the counterfactual. Our best estimate of growth in the absence of demonetisation is 11¼ percent in nominal terms (slightly higher than last year’s Survey forecast because of the faster rebound in WPI inflation, but lower than the CSO’s advance estimate of 11.9 percent) and 7 percent in real terms (in line with both projections).

Finally, demonetisation will afford an interesting natural experiment on the substitutability between cash and other forms of money. Demonetisation has driven a sharp and dramatic wedge in the supply of these two: if cash and other forms are substitutable, the impact will be relatively muted; if, on the other hand, cash is not substitutable the impact will be greater.

OUTLOOK FOR 2017-18

Turning to the outlook for 2017-18, we need to examine each of the components of aggregate demand: exports, consumption, private investment and government.

As discussed earlier, India’s exports appear to be recovering, based on an uptick in global economic activity. This is expected to continue in the aftermath of the US elections and expectations of a fiscal stimulus. The IMF’s January update of its World Economic Outlook forecast is projecting an increase in global growth from 3.1 percent in 2016 to 3.4 percent in 2017, with a corresponding increase in growth for advanced economies from 1.6 percent to 1.9 percent. Given the high elasticity of Indian real export growth to global GDP, exports could contribute to higher growth next year, by as much as 1 percentage point.

The outlook for private consumption is less clear. International oil prices are expected to be about 10-15 percent higher in 2017 compared to 2016, which would create a drag of about 0.5 percentage points. On the other hand, consumption is expected to receive a boost from two sources: catch-up after the demonetisation-induced reduction in the last two quarters of 2016-17; and cheaper borrowing costs, which are likely to be lower in 2017 than 2016 by as much as 75 to 100 basis points. As a result, spending on housing and consumer durables and semi-durables could rise smartly. It is too early to predict prospects for the monsoon in 2017 and hence agricultural production. But the higher is agricultural growth this year, the less likely that there would be an extra boost to GDP growth next year.

Since no clear progress is yet visible in tackling the twin balance sheet problem, private investment is unlikely to recover significantly from the levels of FY2017. Some of this weakness could be offset through higher public investment, but that would depend on the stance of fiscal policy next year, which has to balance the short-term requirements of an economy recovering from demonetisation against the medium-term necessity of adhering to fiscal discipline—and the need to be seen as doing so. Putting these factors together, we expect real GDP growth to be in the 6¾ to 7½ percent range in FY2018. Even under this forecast, India would remain the fastest growing major economy in the world.

There are three main downside risks to the forecast. First, the extent to which the effects of demonetisation could linger into next year, especially if uncertainty remains on the policy response. Currency shortages also affect supplies of certain agricultural products, especially milk (where procurement has been low), sugar (where cane availability and drought in the southern states will restrict

production), and potatoes and onions (where sowings have been low). Vigilance is essential to prevent other agricultural products becoming in 2017-18 what pulses were in 2015-16.

Second, geopolitics could take oil prices up further than forecast. The ability of shale oil production to respond quickly should contain the risks of a sharp increase, but even if prices rose merely to \$60-65/barrel the Indian economy would nonetheless be affected by way of reduced consumption; less room for public investment; and lower corporate margins, further denting private investment. The scope for monetary easing might also narrow, if higher oil prices stoked inflationary pressure.

Third, there are risks from the possible eruption of trade tensions amongst the major countries, triggered by geo-politics or currency movements. This could reduce global growth and trigger capital flight from emerging markets. The one significant upside possibility is a strong rebound in global demand and hence in India's exports. There are some nascent signs of that in the last two quarters. A strong export recovery would have broader spill over effects to investment.

Fiscal outlook

The fiscal outlook for the central government for next year will be marked by three factors. First, the increase in the tax to GDP ratio of about 0.5 percentage points in each of the last two years, owing to the oil windfall will disappear. In fact, excise-related taxes will decline by about 0.1 percentage point of GDP, a swing of about 0.6 percentage points relative to FY2017.

Second, there will be a fiscal windfall both from the high denomination notes that are not returned to the RBI and from higher tax collections as a result of increased disclosure under the Pradhan Mantra Garib Kalyan Yojana (PMGKY). Both of these are likely to be one-off in nature, and in both cases the magnitudes are uncertain.

A third factor will be the implementation of the GST. It appears that the GST will probably be implemented later in the fiscal year. The transition to the GST is so complicated from an administrative and technology perspective that revenue collection will take some time to reach full potential. Combined with the government's commitment to compensating the states for any shortfall in their own GST collections (relative to a baseline of 14 percent increase), the outlook must be cautious with respect to revenue collections. The fiscal gains from implementing the GST and demonetisation, while almost certain to occur, will probably take time to be fully realized. In addition, muted non-tax revenues and allowances granted under the 7th Pay Commission could add to pressures on the deficit.

The macroeconomic policy stance for 2017-18

An economy recovering from demonetisation will need policy support. On the assumption that the equilibrium cash-GDP ratio will be lower than before November 8, the banking system will benefit from a higher level of deposits. Thus, market interest rates—deposits, lending, and yields on g-secs—should be lower in 2017-18 than 2016-17. This will provide a boost to the economy (provided, of course, liquidity is no longer a binding constraint). A corollary is that policy rates can be lower not necessarily to lead and nudge market rates but to validate them. Of course, any sharp uptick in oil prices and those of agricultural products, would limit the scope for monetary easing.

Fiscal policy is another potential source of policy support. This year the arguments may be slightly different from those of last year in two respects. Unlike last year, there is more cyclical weakness on account of demonetisation. Moreover, the government has acquired more credibility because of posting steady and consistent improvements in the fiscal situation for three consecutive years, the central government fiscal deficit declining from 4.5 percent of GDP in 2013-14 to 4.1 percent, 3.9 percent, and 3.5 percent in the following three years. But fiscal policy needs to balance the cyclical imperatives with medium term issues relating to prudence and credibility.

One key question will be the use of the fiscal windfall (comprising the unreturned cash and additional receipts under the PMGKY) which is still uncertain. Since the windfall to the public sector is both one off and a wealth gain not an income gain, it should be deployed to strengthening the government's balance sheet rather than being used for government consumption, especially in the form of programs that create permanent entitlements. In this light, the best use of the windfall would be to create a public sector asset reconstruction company so that the twin balance sheet problem can be addressed, facilitating

credit and investment revival; or toward the compensation fund for the GST that would allow the rates to be lowered and simplified; or toward debt reduction. The windfall should not influence decisions about the conduct of fiscal policy going forward.

Perhaps the most important reforms to boost growth will be structural. In addition to those spelt out in Section 1—strategic disinvestment, tax reform, subsidy rationalization—it is imperative to address directly the twin balance sheet problem. The problem is large, persistent and difficult, will not correct itself even if growth picks up and interest rates decline, and current attempts have proved grossly inadequate. It may be time to consider something like a public sector asset reconstruction company.

Another area of reform relates to labour. Given the difficulty of reforming labor laws per se, the thrust could be to move towards affording greater choice to workers which would foster competition amongst service providers. Choices would relate to: whether they want to make their own contribution to the Employees' Provident Fund Organisation (EPFO); whether the employers' contribution should go to the EPFO or the National Pension Scheme; and whether to contribute to the Employee State Insurance (ESI) or an alternative medical insurance program. At the same time, there could be a gradual move to ensure that at least compliance with the central labour laws is made paperless, presence less, and cashless. One radical idea to consider is the provision of a universal basic income. But another more modest proposal worth embracing is procedural: a standstill on new government programs, a commitment to assess every new program only if it can be shown to demonstrably address the limitations of an existing one that is similar to the proposed one; and a commitment to evaluate and phase down existing programs that are not serving their purpose.

SERVICE INDUSTRY: INDIAN OVERVIEW

Introduction

The services sector is not only the dominant sector in India's GDP, but has also attracted significant foreign investment flows, contributed significantly to exports as well as provided large-scale employment. India's services sector covers a wide variety of activities such as trade, hotel and restaurants, transport, storage and communication, financing, insurance, real estate, business services, community, social and personal services, and services associated with construction.

Market Size

The services sector is the key driver of India's economic growth. The sector contributed around 53.8 per cent of its Gross Value Added in 2016-17 and employed 28.6 per cent of the total population. Net services exports from India reached US\$ 67.5 billion in 2016-17 while the sector attracted 60.7 per cent of India's total FDI inflows.

India's score in the Nikkei/IHS Market Services Purchasing Managers Index reached an eight month high of 53.1 in June, 2017, supported by the rise in new business orders, and heavy growth in the private sector output.

The Central Statistics Office's (CSO) provisional estimates of Gross Value Added (GVA) in FY 2016-17 (PE) indicate that the service sector grew 7.74 per cent year-on-year to Rs 21.43 trillion (US\$ 332.74 billion)

According to a report called 'The India Opportunity' by leading research firm Market Research Store, the Indian mobile services market is expected to reach \$37 billion in 2017 and grow by 10.3 per cent year-on-year to reach US\$ 103.9 billion by 2020.

Out of overall services sector, the sub-sector comprising financial services, real estate and professional services contributed US\$ 305.8 billion or 20.5 per cent to the GDP. The sub-sector of community, social and personal services contributed US\$ 188.2 billion or 12.6 per cent to the GDP.

Investments

The Indian services sector which includes financial, banking, insurance, non-financial/business, outsourcing, research and development, courier and technical test analysis, has attracted FDI equity inflows in the period April 2000-September 2017, amounting to about US\$ 62.39 billion which is about

17.46 per cent of the total foreign inflows, according to the Department of Industrial Policy and Promotion (DIPP).

Some of the developments and major investments by companies in the services sector in the recent past are as follows:

- Private Equity (PE) investments in the hospitality industry rose nearly three-fold to US\$ 119 million in 2017 from US\$ 43.58 million in 2016. Hotel deals, including mergers and acquisitions, are expected to pick up further in 2018 as many premium hotel properties are up for sale.
- American fast food chain McDonalds is reopening 84 of its closed restaurants, increasing the total number of operational restaurants across north and east India to 169.
- National Skill Development Corporation has signed a tripartite Memorandum of Understanding (MoU) with Tourism and Hospitality Sector Skill Council (THSC) and Airbnb to impart hospitality skills training to hospitality micro-entrepreneurs in India.
- The domestic and foreign logistic companies are optimistic about prospects in the logistics sector in India, and are actively making investments plans to improve earnings and streamline operations.

Government Initiatives

The Government of India recognises the importance of promoting growth in services sectors and provides several incentives in wide variety of sectors such as health care, tourism, education, engineering, communications, transportation, information technology, banking, finance, management, among others.

Prime Minister Narendra Modi has stated that India's priority will be to work towards trade facilitation agreement (TFA) for services, which is expected to help in the smooth movement of professionals.

The Government of India has adopted a few initiatives in the recent past. Some of these are as follows:

- Under the Mid-Term Review of Foreign Trade Policy (2015-20), the Central Government increased incentives provided under Services Exports from India Scheme (SEIS) by two per cent.
- Ministry of Communications, Government of India, has launched DARPAN - "Digital Advancement of Rural Post Office for A New India" which is aimed at improving the quality of services, adding value to services and achieving "financial inclusion" of un-banked rural population.
- Software services exports from India grew 10.3 per cent year-on-year to US\$ 97.1 billion in 2016-17. The USA and Canada remained the top destinations of India's export of software services and were followed by Europe.
- Ministry of Civil Aviation, Government of India, launched 'DigiYatra', a digital platform for air travellers that aims to develop a digital ecosystem providing consistent service and a delightful experience at every touch point of the journey.
- The Ministry of Electronics and Information Technology has launched a services portal, which aims to provide seamless access to government services related to education, health, electricity, water and local services, justice and law, pensions and benefits, through a single window.

Road Ahead

Services sector growth is governed by both domestic and global factors. The Indian facilities management market is expected to grow at 17 per cent CAGR between 2015 and 2020 and surpass the US\$19 billion mark supported by booming real estate, retail, and hospitality sectors. The performance of trade, hotels and restaurants, and transport, storage and communication sectors are expected to improve in FY17. The financing, insurance, real estate, and business services sectors are also expected to continue their good run in FY17.

The implementation of the Goods and Services Tax (GST) has created a common national market and reduced the overall tax burden on goods. It is expected to reduce costs in the long run on account of availability of GST input credit, which will result in the reduction in prices of services.

ENGINEERING INDUSTRY: INDIAN OVERVIEW

Introduction

The Indian Engineering sector has witnessed a remarkable growth over the last few years driven by increased investments in infrastructure and industrial production. The engineering sector, being closely associated with the manufacturing and infrastructure sectors, is of strategic importance to India's economy.

India on its quest to become a global superpower has made significant strides towards the development of its engineering sector. The Government of India has appointed the Engineering Export Promotion Council (EEPC) as the apex body in charge of promotion of engineering goods, products and services from India. India exports transport equipment, capital goods, other machinery/equipment and light engineering products such as castings, forgings and fasteners to various countries of the world. The Indian semiconductor industry offers high growth potential areas as the industries which source semiconductors as inputs are themselves witnessing high demand.

India became a permanent member of the Washington Accord (WA) in June 2014. The country is now a part of an exclusive group of 17 countries who are permanent signatories of the WA, an elite international agreement on engineering studies and mobility of engineers.

Market size

The capital goods and engineering turnover in India is expected to reach US\$ 125.4 billion by FY17.

India exports its engineering goods mostly to the US and Europe, which accounts for over 60 per cent of the total exports. Recently, India's engineering exports to Japan and South Korea have also increased with shipments to these two countries rising by 16 and 60 per cent respectively. Sri Lanka, Nepal and Bangladesh have also emerged as the major destinations for India's engineering exports.

According to the India Electronics & Semiconductor Association, the Indian Electronic System Design and Manufacturing (ESDM) market is expected to grow at a CAGR of 16-23 per cent to reach US\$ 228 billion by 2020 from \$100 billion in 2016-17. According to a study by The Associated Chambers of Commerce of India (ASSOCHAM) and NEC Technologies, the demand for electronic products in India is expected to grow at a Compound Annual Growth Rate (CAGR) of 41 per cent during 2017-20 to US\$ 400 billion by 2020.

According to data from the Engineering Export Promotion Council of India, engineering exports from India grew 11.33 per cent year-on-year to reach US\$ 65.23 billion in FY 2016-17. Exports of electrical machinery rose to US\$ 4.6 billion in FY 2016-17 from US\$ 3.7 billion in FY 2015-16.

Investments

The engineering sector in India attracts immense interest from foreign players as it enjoys a comparative advantage in terms of manufacturing costs, technology and innovation. The above, coupled with

favourable regulatory policies and growth in the manufacturing sector has enabled several foreign players to invest in India.

The foreign direct investment (FDI) inflows into India's miscellaneous mechanical and engineering industries during April 2000 to June 2017 stood at around US\$ 3.34 billion, as per data released by the Department of Industries Policy and Promotion (DIPP).

In the recent past there have been many major investments and developments in the Indian engineering and design sector:

- With an aim to increase its presence in India, Denmark-based heating ventilation and air-conditioning (HVAC) giant, Danfoss, is planning to take its manufacturing localisation to 50 per cent as well as double its supplier base in India by 2020.
- Larsen and Toubro Ltd (L&T) has been awarded with projects worth Rs 2,170 crore (US\$ 336.93 million), which includes an order worth Rs 1,169 crore (US\$ 181.51 million) from Oman Electricity Transmission Company SAOC.
- South Korean electronics major, LG, is planning to make India as its export hub, on the back of improved ties between South Korea and India, as per Mr Ki Wan Kim, Managing Director, LG Electronics India (LGEI).
- Warburg Pincus is in advance talks with Tata Technologies to acquire up to 40 per cent minority stake for about Rs 2,300 crore (US\$ 357.11 million).
- Hexagon Capability Centre India (HCCI) in collaboration with National Institute of Technology Karnataka (NITK), Surathkal, launched first-of-its-kind NextGen 3D Lab costing Rs 7.7 crore (US\$ 1.15 million) at NITK Campus. The lab aims at making budding engineers industry-ready by the time they graduate.
- Engineering and construction major L&T entered into a joint venture with European defence major Matra BAE Dynamics Alenia (MBDA) Missile Systems for development of missiles in India. L&T will own 51 per cent stake in the JV named L&T MBDA Missile Systems and the rest 49 with the European partner.
- American plane maker Boeing Corporation has launched the Boeing India Engineering & Technology Center in Bengaluru. The centre will employ hundreds of locals who will work to support Boeing, including its information technology & data analytics, engineering, research and technology, and tests.
- Reliance Defence and Engineering Ltd said it has signed an agreement with the US Navy for undertaking service, maintenance and repair of Seventh Fleet of US Navy at the Reliance Shipyard at Pipavav in Gujarat.

Government Initiatives

The Indian engineering sector is of strategic importance to the economy owing to its intense integration with other industry segments. The sector has been de-licensed and enjoys 100 per cent FDI. With the aim to boost the manufacturing sector, the government has relaxed the excise duties on factory gate tax, capital goods, consumer durables and vehicles.

- In the Union Budget 2017-18, the Government of India increased the allocation for incentive schemes like the Modified Special Incentive Package Scheme (M-SIPS) and the Electronic Development Fund (EDF) to Rs 745 crore (US\$ 111 million) for providing a boost to the semiconductor as well as the electronics manufacturing industry.
- The Union Cabinet has approved incentives up to Rs 10,000 crore (US\$ 1.47 billion) for investors by amending the M-SIPS scheme, in order to further incentivise investments in electronics sector, create employment opportunities and reduce dependence on imports by 2020.
- The Ministry of Electronics and Information Technology plans to revise its policy framework, which would involve the government taking a more active role in developing the sector by providing initial capital, with the aim to attract more private players and make India a global semiconductor hub.

- The Government of India is planning to merge 6 engineering consulting Public Sector Units (PSUs) to create a mega consultancy firm that can take up projects across sectors and compete with the likes of Bechtel of the US and domestic majors like Larsen & Toubro (L&T)

a. Road Ahead

The engineering sector is a growing market. Spending on engineering services is projected to increase to US\$ 1.1 trillion by 2020. The government, in consultation with semiconductor industry, has increased focus on the ESDM sector in last few years. Some of the initiatives outlined in the National Electronics policy and the National Telecom policy are already in the process of implementation, such as Preferential Market Access (PMS), Electronics Manufacturing Clusters (EMC) and Modified Special Incentive Package Scheme (M-SIPS).

India's capital good sector is expected to triple in size to Rs 7.5 trillion (US\$ 116 billion) and add 21 million jobs by 2025.

National Environmental Policy, 2006

This Policy seeks to extend the coverage, and fill in gaps that still exist, in light of present knowledge and accumulated experience. This policy was prepared through an intensive process of consultation within the Government and inputs from experts. It does not displace, but builds on the earlier policies. It is a statement of India's commitment to making a positive contribution to international efforts. This is a response to our national commitment to a clean environment, mandated in the Constitution in Articles 48 A and 51 A (g), strengthened by judicial interpretation of Article 21. The dominant theme of this policy is that while conservation of environmental resources is necessary to secure livelihoods and well-being of all, the most secure basis for conservation is to ensure that people dependent on particular resources obtain better livelihoods from the fact of conservation, than from degradation of the resource. Following are the objectives of the National Environmental Policy:

- Conservation of Critical Environmental Resources
- Intra-generational Equity: Livelihood Security for the Poor
- Inter-generational Equity
- Integration of Environmental Concerns in Economic and Social Development
- Efficiency in Environmental Resource Use
- Environmental Governance

OUR BUSINESS STRATEGY

1. Focus on Consultancy service

We intend to continuously strengthen the services to enhance our position as an Integrated Infrastructure Development Solutions service provider with a focus on our core consultancy business, which we believe provides further growth opportunities by retaining existing clients and acquisition of new clients. We shall make efforts to further strengthen our core consultancy business by deploying additional resources such as hiring sector specific experts, setting up of data centre and expanding our office network.

2. Increase our basket of service

On technological front, our company shall continue to focus implementation of ERP in order to upgrade and integrate the growing operations which will also enhance the overall productivity.

We shall migrate to REVIT environment in designing and drafting sections to work on Building Information Modelling (BIM), which shall result in increased efficiency and higher accuracy of our deliverables.

Being in the industry for a long period now, we understand the importance of diversification and hence, we are looking to enter into new segments as under:-

- We are looking to augment and strengthen the Building Information Modelling (BIM) division as this is a booming sector which shall have a strong demand in near future in the industry.
- Rehabilitation and Restoration Schemes for old industrial buildings and other structures.
- Pyrotechnical Designs for Potential Overseas Customers by establishing offices overseas.
- Project Management Consultancy services for execution of works.

- Potential Upcoming Projects in the developing new state of Telangana.

- **BUSINESS INFORMATION MODELLING (BIM) : AT A GLANCE**

“With *BIM* (Building Information Modeling) technology, one or more accurate virtual models of a building are constructed digitally. They support design through its phases, allowing better analysis and control than manual processes.

Traditional building design was largely reliant upon two-dimensional technical drawings (plans, elevations, sections, etc.). Building information modeling extends this beyond 3D, augmenting the three primary spatial dimensions (width, height and depth). BIM therefore covers more than just geometry. It also covers spatial relationships, light analysis, geographic information, and quantities and properties of building components (for example, manufacturers' details).

BIM design tools allow extraction of different views from a building model for drawing production and other uses. These different views are automatically consistent, being based on a single definition of each object instance.

- **REVIT**

Autodesk Revit is a BIM software for architects, landscape architects, structural engineers, MEP (Mechanical, Electrical and Plumbing) engineers, designers and contractors developed by Autodesk.

It allows users to design a building and structure and its components in 3D, annotate the model with 2D drafting elements, and access building information from the building model's database.

Revit is 4D BIM capable with tools to plan and track various stages in the building's lifecycle, from concept to construction and later maintenance and/or demolition.

3. **Geographical expansion of our services**

Our experience, knowledge and expertise in the domestic business will help us to grow in international business. Striving on this, we aim to expand our geographical reach of services internationally and intend to start our business operation in United Arab Emirates (UAE) to start with. Once we catch a hold in UAE, we would be looking for further expansion making ourselves a global company. For details relating to Objects, please refer to chapter titled “Objects of the Issue” beginning on page 81 of Red Herring Prospectus.

4. **Increase the use of technology to improve operational efficiency**

The volume of our business has increased over the last few years as we grow our service portfolio and have expanded the scope of services and the sectors we cater to. This has driven the need for operational efficiency. Increasing our operational efficiency would entail increase in use of technology. We propose to have an information interface, which would help to improve productivity by documenting and continuously updating our knowledge base. Accessibility of updated information to our consultants through our information interface would help us increase our productivity and also help in faster execution of assignments.

5. BUILDING SERVICES:-

- **Electrical** – This includes designs and drawings of electrical fittings, wirings, fire-fighting equipment, lighting arrangements and other electrical work related work which is an integral part of every building/structure.
- **HVAC** - Heating, ventilation, and air conditioning (HVAC) is the technology of indoor and vehicular environmental comfort. Its objective is to provide thermal comfort and acceptable indoor air quality. HVAC system design is a sub-discipline of mechanical engineering, based on the principles of thermodynamics, fluid mechanics, and heat transfer.
- **Interior Design** – Interior design is the art and science of enhancing the interiors of a space or building to achieve a healthier and more aesthetically pleasing environment for the end user. An interior designer is someone who plans, researches, coordinates, and manages such projects. Interior design is a multifaceted profession that includes conceptual development, space

planning, site inspections, programming, research, communicating with the stakeholders of a project, construction management, and execution of the design.

- **Acoustics** - Architectural acoustics (also known as room acoustics and building acoustics) is the science and engineering of achieving a good sound within a building and is a branch of acoustical engineering. As the number of automobiles increases exponentially around the world, the need to house them in close proximity to destinations creates a challenging design problem. The parking facility or lot must foremost deal with the Functional/Operational—as in providing for safe and efficient passage of the automobile and driver. This is a very complex challenge as automotive, engineering and traffic issues relative to site locations must be integrated to create the appropriate solution. - d) **Illustration of the Book Building and Price Discovery Process**

Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors.

Bidders can bid at any price within the Price Band. For instance, assume a Price Band of Rs.20 to Rs 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (Rs.)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Offer the desired number of Equity Shares is the price at which the book cuts off, i.e., Rs. 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below Rs. 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 (“**FEMA**”). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“**RBI**”) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“**DIPP**”).

The Government of India, from time to time, has made policy pronouncements on Foreign Direct Investment (“**FDI**”) through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“**DIPP**”), has issued consolidated FDI Policy Circular of 2017 (“**FDI Policy 2017**”), which with effect from August 28, 2017, consolidates and supersedes all previous press notes, press releases and clarifications on FDI Policy issued by the DIPP that were in force. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Policy 2017 will be valid until the DIPP issues an updated circular.

The Reserve Bank of India (“**RBI**”) also issues Master Circular on Foreign Investment in India every year. Presently, FDI in India is being governed by Master Circular on Foreign Investment dated July 01, 2015 as updated from time to time by RBI. In terms of the Master Circular, an Indian company may issue fresh shares to people resident outside India (who is eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh issue of shares shall be subject to inter-alia, the pricing guidelines prescribed under the Master Circular. The Indian company making such fresh issue of shares would be subject to the reporting requirements, inter-alia with respect to consideration for issue of shares and also subject to making certain filings including filing of Form FC-GPR.

Under the current FDI Policy of 2017, foreign direct investment in micro and small enterprises is subject to sectoral caps, entry routes and other sectoral regulations. At present 100 % foreign direct investment through automatic route is permitted in the sector in which our Company operates. Therefore applicable foreign investment up to 100% is permitted in our company under automatic route.

In case of investment in sectors through Government Route approval from competent authority as mentioned in Chapter 4 of the FDI Policy 2017 has to be obtained by the Company.

The transfer of shares between an Indian resident to a non-resident does not require the prior approval of the RBI, subject to fulfilment of certain conditions as specified by DIPP/RBI, from time to time. Such conditions include: (i) where the transfer of shares requires the prior approval of the Government as per the extant FDI policy provided that: a) the requisite approval of the Government has been obtained; and b) the transfer of shares adheres with the pricing guidelines and documentation requirements as specified by the Reserve Bank of India from time to time.; (ii) where the transfer of shares attract SEBI (SAST) Regulations subject to the adherence with the pricing guidelines and documentation requirements as specified by Reserve Bank of India from time to time.; (iii) where the transfer of shares does not meet the pricing guidelines under the FEMA, 1999 provided that: a) The resultant FDI is in compliance with the extant FDI policy and FEMA regulations in terms of sectoral caps, conditionalities (such as minimum capitalization, etc.), reporting requirements, documentation etc.; b) The pricing for the transaction is compliant with the specific/explicit, extant and relevant SEBI regulations/guidelines (such as IPO, Book building, block deals, delisting, exit, open offer/substantial acquisition/SEBI SAST); and Chartered Accountants Certificate to the effect that compliance with the relevant SEBI regulations/guidelines as indicated above is attached to the form FC-TRS to be filed with the AD bank and iv) where the investee company is in the financial sector provided that: a) Any ‘fit and proper/due diligence’ requirements as

regards the non-resident investor as stipulated by the respective financial sector regulator, from time to time, have been complied with; and b) The FDI policy and FEMA regulations in terms of sectoral caps, conditionalities (such as minimum capitalization, pricing, etc.), reporting requirements, documentation etc., are complied with. As per the existing policy of the Government of India, OCBs cannot participate in this Issue and in accordance with the extant FDI guidelines on sectoral caps, pricing guidelines etc. as amended by Reserve bank of India, from time to time.
