There are significant differences between the Indian GAAP, the International Financial Reporting Standards (the "IFRS") and the Generally Accepted Accounting Principles in the United States of America (the "U.S. GAAP"). Accordingly, the degree to which the financial statements included in this Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices, the Indian GAAP, the Companies Act and the SEBI (ICDR) Regulations on the financial disclosures presented in this Prospectus should accordingly be limited. We have not attempted to quantify the impact of the IFRS or the U.S. GAAP on the financial data included in this Prospectus, nor do we provide a reconciliation of our financial statements to those under the U.S. GAAP or the IFRS and we urge you to consult your own advisors regarding such differences and their impact on our financial data.

Certain figures contained in this Prospectus, including financial information, have been subject to rounding adjustments. All decimals have been rounded off to two decimal points, except for figures in percentage. In certain instances, (i) the sum or percentage change of such numbers may not conform exactly to the total figure given; and (ii) the sum of the numbers in a column or row in certain tables may not conform exactly to the total figure given for that column or row. However, where any figures that may have been sourced from third-party industry sources are rounded off to other than two decimal points in their respective sources, such figures appear in this Prospectus as rounded-off to such number of decimal points as provided in such respective sources.

3. We rely on third parties for substantially all of our sales and distribution operations, and if such third parties fail to assist us in a consistent, timely and efficient manner, our business, results of operations and financial condition may be adversely affected.

Our sales and distribution operations depend substantially upon distributor network/ our own sales point. The approximate % of our sales from our distributor network and our own sale office.

Sales Channel	March 31 st , 2018	March 31 st , 2017	March 31 st , 2016	March 31 st , 2015
Distributor Network	33.25%	31.75%	36.35%	12.46%
Own Sales Offices	66.75%	69.25%	63.65%	87.54%

We cannot assure you that such third parties will be able to establish or maintain adequate sales capabilities or will be successful in ensuring sale of our products. Further, although we enter into exclusive agreements with such third parties, we cannot assure you that such third parties will be able to fulfil their obligations under such agreements entirely, in a manner acceptable to us, or at all. Authorized distributors, as independent business operators, may, from time to time, disagree with us and our strategies regarding the business or our interpretation of our respective rights and obligations under applicable agreements. We cannot assure you that such third parties shall not breach certain terms of such agreements or shall not choose to terminate their agreements with our Company. We may have to initiate litigation in respect of any breach by such third parties, and such litigation could divert the attention of our management from our operations, which could harm our business, financial

condition and results of operation. Further, we cannot assure you that the outcome of any such litigation will be favourable to us.

4. Our business is heavily dependent on our suppliers.

We do not manufacture any of the products that we trade in. As a trader our business is heavily depended on the products manufactured by various manufacturers. We procure the products with customisation from various suppliers based on availability of desired quality, quantity and other financial terms. We are required to rely heavily on a few suppliers and the quality of products supplied by them. Though we do not manufacture any product ourselves, we have substantial marketing or branding requirements for business, and we are reliant on our suppliers for giving us timely delivery, products of agreed quality and products customised as per our need. Our sales and profitability would be adversely affected in case of any management inabilities or errors on part of our suppliers.

Following are some of the important factors about our business which we do not directly have control over and are dependent on our suppliers:

- Quality consistency of the products and its variants;
- Branding and other customisation of these products on a large scale;
- Errors or rollbacks in sold products creating negative goodwill and consumer litigations;
- Cost competitiveness of these products;
- Supplier side logistics which in turn affect our delivery levels to customers.

5. We have experienced negative cash flows in the past. Our inability to generate and sustain adequate cash flows in the future may adversely affect our business, results of operations and financial condition.

We have experienced negative cash flows in the recent periods, the details of which, as per our restated standalone financial statements, are as follows:

Particulars	(Rs. in lakhs)		
	For the financial year ended March 31		
	2018	2017	2016
Net Cash from Operating Activities	(56.08)	70.60	(138.02)
Net Cash from Investing Activities	(99.80)	(139.89)	1.66

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet its capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. Our inability to generate and sustain adequate cash flows in the future could adversely affect our results of operations and financial condition. For further details, refer "Financial Statements" and "Management's Discussion and Analysis of Financial Condition and Financial Information" on pages 145 and 185, respectively

6. Our major revenues are derived from sales made in the States of Uttar Pradesh (UP), Uttarakhand and Jharkhand in India. Our growth strategy to expand into new geographic areas possesses risks. We may not be able to successfully manage some or all of such risks, which may have a material adverse effect on our revenues, profits and financial condition.

Our operations have been geographically concentrated in the States of Uttar Pradesh (UP), Uttarakhand and Jharkhand. Our business is therefore significantly dependent on the general economic condition and activity in these States in which we operate along with the Central, State and Local Government policies relating to the industries in which we operate. Although, investment in the industries in which we operate has been encouraged, there can be no assurance that this will continue. We may expand geographically and may not gain acceptance or be able to take advantage of any expansion opportunities outside our current markets. This may place us at a competitive disadvantage and limit our growth opportunities.

7. We sell our products in highly competitive markets and our inability to compete effectively may lead to lower market share or reduced operating margins, and adversely affect our results of operations.

We compete directly against wholesalers and direct retailers of textile and textile products, spices and tea selling companies with substantial market share, established companies selling internationally renowned brands as well as domestic retailers and regional competitors. Many of our competitors are companies with strong brand recognition. However, the domestic segments are fragmented and continue to be dominated by unorganized and regional suppliers. We compete primarily on the basis of brand image, style, performance and quality. In order to compete effectively, we must continue to maintain and develop our brand image and reputation, be flexible and innovative in responding to rapidly changing market demands and customer preferences and offer customers a wide variety of good quality products at competitive prices.

Many of our competitors have significant competitive advantages, including longer operating histories, larger and broader customer base, more established relationships with a broader set of suppliers, greater brand recognition and greater financial, research and development, marketing, distribution budgets and other resources than we do. The number of our direct competitors and the intensity of competition may increase as we expand into other product lines or as other companies expand into other product lines. Our competitors may enter into business combinations or alliances. Our competitors may also be able to respond more quickly and effectively than we do to new or changing opportunities, standards or customer preferences, which could result in a decline in our revenues. There can be no assurance that we can effectively compete with our competitors in the future, and any such failure to compete effectively may have a material adverse effect on our business, financial condition and results of operations.

8. Our Registered office and our godowns premises are not owned by us.

Our Company has taken our registered office on lease from M/s. Dewan and Sons for a period of 60 (sixty) months commencing from February 1, 2015 until January 31, 2020. Further, our repackaging godowns facility for tea leaves business situated at Jalakash Compound, 10th KM, Rampur Road, Opposite AKC Hyundai Showroom, VPO Nondoshi, Bareilly - 243 052, Uttar Pradesh, is on leasehold basis for the period beginning March 5, 2016 up to March 4, 2019. There can be no assurance that our Company will be able to successfully renew the said lease deeds in a timely manner or at all. Further there can be no assurance that we will not face any disruption of our rights as a lessee and that such lease deed will not be terminated prematurely by the lessor. For further details on the properties of our Company, refer to the section titled "Immovable Properties" appearing under "Our Business" on page no 89.

9. In the past, our Company has been in non-compliance with respect to filings of E-form for Consolidation of financial Statements (AOC-4 CFS) as well as the Company is in default in filing of E-form 23AC, 23ACA & 20B

In the past, our Company has not made filing of relevant E-form for consolidation of financial statement with the registrar of Companies for the financial year ending on March 31, 2017 and March 31st, 2016.

Further the Company is in default for non-filing of E-form 23AC, 23ACA & 20B for financial year ended on 31st March 2013

We also cannot assure you that the Central Government or Registrar of Companies will not impose any penalty or the penalty imposed by the Central Government or Registrar of Companies will be reasonable and that such penalty will not have a material adverse effect on our financial results. We cannot assure you that we will be in a position to file the forms at all or any time in the future.

Further, our Company and every officer of our Company who were in default in this regard may also be subject to punishment as prescribed under the Companies Act.

10. There have been instances of incorrect / delayed filings in the past with the RoC. If the authorities impose monetary penalties on us or take certain punitive actions against our Company in relation to the same, our business, financial condition and results of operations could be adversely affected.

There are some of the instances of non compliances/delay in compliances of the provisions of the Companies Act due to some clerical mistakes in documents and forms filed with the Registrar of Companies

and on account of filing of some forms with requisite additional fees. We also cannot assure you that no legal action will be taken by the ROC further in this regard.

11. We have converted loan amounting to Rs 21,035,000 into 2103500 equity shares pursuant to the provision of Companies Act 2013.

On 10th Day of August 2017 Company has converted its loan into equity shares amounting to Rs. 21,035,000 into 2103500 equity shares, the said shares rank pari passu with existing equity shares of the Company. Further if it requires fit & proper to the management in future course of business, the company may convert its loan into equity shares in compliances with Companies Act & other law applicable to the Company.

12. The products marketed and sold by our Company in relation to the 'ICL' brand are vulnerable to counterfeiting or imitation by third parties that may affect the reputation of our Company.

The products marketed and sold by us under the 'ICL' brand are developed for the relevant season based on prevailing trends. Our Company ensures that these products are manufactured by contract manufacturers for our Company and they are not permitted to sell these products. We maintain a close check and control over each stage of the production process and conduct quality checks at every stage. However, our 'ICL' brand of products are vulnerable to counterfeiting and imitation by third party vendors who may manufacture and sell products in the mass market at relatively cheaper prices. While we make constant checks in mass markets in an effort to prevent the sale of any counterfeit products of our 'ICL' brand, there can be no assurance that we will be able to prevent sale of counterfeit products at all time. Any sale of counterfeit or imitation products which does not match the quality standards of our products will adversely impact our reputation. It will also materially affect our business, prospects, results of operations and financial conditions.

13. Our application for registration of our trademark and logo "ICL" along with other applications are still pending with the relevant trademark authorities. If our Company is unable to protect its intellectual property, or if our Company infringes on the intellectual property rights of others, our business may be adversely affected.

Our Company's success largely depends on our brand name and brand image and our trademarks are important for differentiating our Company's products from that of our competitors. Our Company has applied for registration of its trademark and logo 'ICL', being used by our Company, under the provisions of the Trademarks Act, 1999, along with registration of our other trademarks; however, as on the date of this Prospectus, the same have not been registered in the name of our Company. Hence, our Company does not enjoy the statutory protections accorded to a registered trademark. The registration of any trademark is a time-consuming process, and there can be no assurance that any such registration will be granted.

In the absence of such registration, competitors or other companies may challenge the validity or scope of our intellectual property. Unless our trademarks are registered, we may only get passing off relief for our marks, if used by others, which could materially and adversely affect our brand image, goodwill and business. These trademarks are integral to our business, and the loss of any of these intellectual property rights could have a material adverse effect on our business.

14. We are involved in high volume-low margin business. Any disruption in our turnover or failure to regularly grow the same may have a material adverse effect on our business, results of operations and financial condition.

Our inability to regularly grow our turnover and effectively execute our key business processes could lead to lower profitability and hence adversely affect our operating results, debt service capabilities and financial conditions. Due to the nature of the products we sell, we may not be able to charge higher margins on our products. Hence, our business model is heavily reliant on our ability to effectively grow our turnover and manage our key processes including but not limited to raw material procurement, timely sales / order execution and continuous cost control of non-core activities. The table below gives details of our operating margins and net profit margin based on restated standalone financial statements.

(Rs. in lakhs)

Particulars	For Financial Year		
	2018	2017	2016
Total Revenue from Operations	2747.37	2456.04	2293.71
PBT as a % of Total Income	11.21	6.11%	2.41%
PAT as a % of Total Income	8.13	4.07%	1.66%

Our growth strategy is subject to and involves risks and difficulties, many of which are beyond our control and, accordingly, there can be no assurance that we will be able to implement our strategy or growth plans or complete them within the timelines. Further, we operate in a dynamic industry, and on account of changes in market conditions, industry dynamics, technological improvements or changes and any other relevant factors, our growth strategy and plans may undergo changes or modifications, and such changes or modifications may be substantial, and may even include limiting or foregoing growth opportunities if the situation so demands. For further details regarding the discussions and explanations for our past results, please refer "Management's Discussions and Analysis of Financial Condition and Results of Operations" on page 185 of this Prospectus.

15. We are dependent on third party transportation providers for the delivery of raw materials and products. Accordingly, any increase in transportation costs or unavailability of transportation services for our products may have an adverse effect on our business, financial condition, results of operations and prospects.

We do not have an in-house transportation facility and we rely on third party transportation and other logistic facilities at every stage of our business activity including for procurement of products and raw material, as the case may be, from our vendors and suppliers and for transportation of our finished products. For this purpose, we hire services of transportation companies. Additionally, availability of transportation solutions in the markets we operate in is typically fragmented. We do not enter into written documentation in relation to the transportation services we hire. We could be faced with transportation risks due to any loss or pilferage, which we may not be able to recover from our insurance coverage. Further, the cost of our goods carried by such third-party transporters is typically much higher than the consideration paid for transportation, due to which it may be difficult for us to recover compensation for damaged, delayed or lost goods.

Our operations and profitability are dependent upon the availability of transportation and other logistic facilities in a timely and cost-efficient manner. Accordingly, our business is vulnerable to increased transportation costs, including, as a result of increase in fuel costs, transportation strikes, delays, damage or losses of goods in transit and disruption of transportation services because of weather related problems, strikes, lock-outs, accidents, inadequacies in road infrastructure or other similar events.

Although, we have experienced few disruptions in the past on account of state wide transportation strikes, any prolonged disruption or unavailability of such facilities in a timely manner could result in delays or non-supply or may require us to look for alternative sources which may be cost inefficient, thereby adversely affecting our operations, profitability, reputation and market position.

16. We may not be able to adapt to changing market trends and customer requirements in a timely manner, or at all.

The market for the products in which we deal is highly competitive with several players present in various segments in brick and mortar stores and through third party e-commerce platforms. If we are unable to anticipate consumer preferences or industry changes, or if we are unable to modify our products and their prices on a timely basis, we may lose customers to our competitors (located in physical stores and on e-commerce platforms) or may be forced to reduce our sales realization on products by having to offer them at a discount, thereby reducing our margins. For instance, manufacturing for a season begins well in advance of the season and we may not be able to incorporate the prevalent trends or accommodate any sudden emergence of a new trend that may be relevant to that season in the collection being released. If our competitors are able to cater to these markets, or if we are not able to anticipate the demand, or misjudge the quantity, inter alia, this could lead to lower sales, higher inventories and higher discounts, each of which could have a material adverse effect on our brand, reputation, results of operations and financial condition.

17. We have existing secured debt facilities and may incur further additional debt, which could adversely affect our financial health and our ability to obtain financing in the future and react to changes in our business and increases in interest rates of our borrowings may impact our results of operation. Further, our debt financing agreements contain restrictive covenants or lenders' options that may affect our interest.

As on 31st March 2018, the amount of our total outstanding secured borrowings was 113.28 lakhs. For further details, refer "Financial Indebtedness" on page no 189. We may incur additional indebtedness in the future. Our ability to meet our debt service obligations and our ability to repay our outstanding borrowings will depend primarily upon the cash flow produced by our business. We cannot assure you that we will generate sufficient revenue from our businesses to service existing or proposed borrowings.

Further, some debt financing agreements entered into by our Company contain restrictive covenants, and/or events of default that limit our ability to undertake certain types of transactions, which may adversely affect our business and financial condition. Many of our financing agreements also include various conditions and covenants that require us to obtain lender consents prior to carrying out certain activities or entering into certain transactions. Typically, restrictive covenants under our financing documents relate to obtaining prior consent of the lender for, among others: (a) effect any change or in our Company's major change in management involving transfer of ownership; (b) formulate any scheme of merger, amalgamation or re-construction; (c) implement any scheme of expansion/modernization/ diversification/ renovation or acquire any fixed assets during any accounting year; (d) declare dividend for any year except out of profits relating to that year after making all due and necessary provisions and provided further that no default had occurred in any repayment obligations; and (e) enter into borrowing arrangement whether secured or unsecured with any other bank/ financial institution/ company or person. For further details of the restrictive covenants under our financing documents, refer "Financial Indebtedness" on page no. 188. In addition, the lenders may, at their discretion, exercise their rights and powers pursuant to the guarantee against the guarantors jointly or severally.

We cannot assure you that we have complied with all such restrictive covenants in a timely manner or at all or that we will be able to comply with all such restrictive covenants in the future. A failure to observe the restrictive covenants under our financing agreements or to obtain necessary consents required thereunder may lead to the termination of our credit facilities, levy of penal interest, acceleration of all amounts due under such facilities and the enforcement of any security provided. Further, during any period in which we are in default, we may be unable to raise, or face difficulties raising, further financing. In addition, other third parties may have concerns over our financial position and it may be difficult to market our services. Any of these circumstances could adversely affect our business, credit rating, prospects, results of operations and financial condition. Moreover, any such action initiated by our lenders could result in the price of the Equity Shares being adversely affected.

18. Our Company has availed certain unsecured loans that are callable by the lenders at any time.

As on 31st March, 2018 our Company has availed certain unsecured loans that can be callable on demand by the lenders at any point of time. For further details, refer "Financial Indebtedness" on page no 189. In case of any demand from lenders for repayment of such unsecured loans, the resultant cash outgo, may adversely affect our business operations and financial position of our Company.

19. Failure to recover amounts from our Sundry Debtors/Trade Receivables on a timely manner might affect our financial conditions.

As per restated financial statement on 31st day of March 2018, we have trade receivables of Rs. 169.50 Lakhs on standalone basis and 579.73 Lakhs on consolidated basis.

We cannot assure you of the continued viability of our receivables. We also cannot assure you that we will be able to collect the whole or any part of any overdue payments. Any material nonpayment or non-performance by our clients or other counterparties could affect our financial condition, results of operations and cash flows.

20. We have working capital requirements. If we experience insufficient cash flows to enable us to make required payments on our debt or fund working capital requirements, there may be an adverse effect on our results of operations.

Our business requires a substantial amount of working capital for our business operations. We would require additional working capital facilities in the future to satisfy our working capital need which is proposed to be met through the IPO proceeds. In case of our inability to obtain the requisite additional working capital finance, our internal accruals/cash flows would be adversely affected to that extent, and consequently affect our operations revenue and profitability.

21. We have many group companies where our Promoters / Directors are actively involved as Promoter or director of that Company which may arise to conflict of interest of that Promoter or director.

Our Company is part of a business conglomerate and our Promoters and Directors are also actively involved in various other group companies. Our Promoters may devote substantial time and resources to develop and grow the business of other group companies, though Directors and Promoters are involved in other group companies which may arise conflict of interest however the maximum time of Promoter and Directors is devoted in this Company hence there is no probability for lack of leadership. Though some of our group companies are involved in business similar to us, we cannot guarantee that our promoters will divide their time and energy between our group companies and us. Though our key managerial personnel are well experienced to carry out the business activities, lack of involvement of our Promoters could have an adverse effect on our goodwill and financial performance.

22. Our Promoters and Directors, Roop Kishore Gola and Avadhesh Kumar Gola have provided personal guarantees for loan facilities obtained by our Company and any failure or default by our Company to repay such loans in accordance with the terms and conditions of the financing documents could trigger repayment obligations on them, which may impact their ability to effectively service their obligations as our Promoters and Directors and thereby, adversely impact our business and operations.

Our Promoters and Directors Roop Kishore Gola and Avadhesh Kumar Gola have personally guaranteed the repayment of certain loan facilities taken by our Company. Any default or failure by us to repay its loans in a timely manner, or at all could trigger repayment obligations on the part of our Promoter and Directors in respect of such loans, which in turn, could have an impact on their ability to effectively service their obligations as Promoters and Directors of our Company, thereby having an adverse effect on our business, results of operation and financial condition. Furthermore, in the event that these individuals withdraw or terminate their guarantees, our lenders for such facilities may ask for alternate guarantees, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows.

23. Our Company in the financial year 2016-17 during the period November 9, 2016 to December 31, 2016 deposited cash in old high denomination notes in its bank accounts.

The Reserve Bank of India and the Ministry of Finance of the GOI withdrew the legal tender status of Rs. 500 and Rs. 1,000 currency notes (old high denomination notes) pursuant to notification dated November 8, 2016. Our Company deposited an aggregate sum of 40.63 lakhs in the financial year 2016-17 during the period November 9, 2016 to December 31, 2016 in old high denomination notes in its bank accounts. We cannot assure that going forward any statutory or regulatory authority will not inquire / inspect into such deposits made by our Company. Any adverse findings / observations by such statutory or regulatory authority in relation to such deposits made by our Company may subject our Company and/or its Directors to liabilities under the relevant provisions of the Income Tax Act, 1961 and other applicable rules and regulations which may have a material adverse effect on our reputation and results of operations.

24. We have issued Equity Shares during the last one year from the date of filing of the Prospectus at a price that is below the Issue Price.

During the last one year from the date of filing of the Prospectus we have issued Equity Shares at a price that is lower than the Issue Price as detailed in the following table:

Date of allotment	Number of Equity Shares allotted	Face value	Issue Price	Nature of Consideration	Nature of allotment	% of Pre-Issue Equity Share Capital	% of Post-Issue Equity Share Capital
August 7, 2017	1,116,870	10.00	N. A.	Other than Cash	Bonus Allotment	22.96	16.04
August 10, 2017	2,103,500	10.00	10.00	Cash	Conversion of loan into Equity Shares	43.25	30.20
March 30, 2018	1,389,681	10.00	N.A.	Other than Cash	Bonus Allotment	28.57	19.95

For further details of the aforesaid allotment refer "Capital Structure" on page 58.

25. Our results of operations are likely to vary from year to year and be unpredictable, which could cause the market price of the Equity Shares to decline.

Our results of operations have historically varied from year to year due to various factors, and we expect that this trend will continue. You should not rely on our past financial results for any year as indicators of future performance. Our results of operations in any given year can be influenced by a number of factors, many of which are outside of our control and may be difficult to predict, including:

- our ability to acquire and retain clients for our products;
- maintaining high levels of customer satisfaction;
- capital expenditure and other costs relating to our operations;
- adhering to our high quality and process execution standards;
- products or pricing policies introduced by our competitors;
- the timing and nature of, and expenses incurred in, our marketing efforts;
- recruiting, training and retaining sufficient skilled technical and management personnel;
- developing and improving our internal administrative infrastructure, particularly our financial, operational, communications, and other internal systems;

Also, please refer "Management's Discussion and Analysis of Financial Condition and Results of Operations" on page 185 of this Prospectus for details on the factors affecting our financial results. All of these factors, in combination or alone could negatively impact our revenues and may cause significant fluctuations in our results of operations. This variability and unpredictability could materially and adversely affect our results of operations and financial condition.

26. If we are unable to attract new customers or retain our existing customers the growth of our business and cash flows will be adversely affected.

To increase our revenue and cash flows, we must regularly add new customers. If we are unable to generate sufficient leads through our marketing programs, or if our existing or new clients do not perceive our products to be of sufficiently high value and quality, we may not be able to increase sales and our operating results would be adversely affected. If we fail to sell our products to new customers or fail to retain our existing customers do not renew their contracts, our operating results will suffer, and our revenue growth, cash flows and profitability may be materially and adversely affected.

27. We may be unable to obtain, renew or maintain statutory and regulatory permits, licenses and approvals required to operate our business which could result in an adverse effect on our results of operations.

We require certain statutory and regulatory permits, licenses and approvals to operate our business. Our licenses, permits and approvals impose certain terms and conditions that require us to incur significant costs and inter alia, restrict certain activities. The approvals required by us are subject to

numerous conditions and we cannot assure you that these would not be suspended or revoked in the event of non-compliance or alleged non compliance with any terms or conditions thereof, or pursuant to any regulatory action. Also, the manufacturers of the healthcare products that we market and sell need to maintain various approvals and licenses in order to undertake and continue the manufacturing activities of such healthcare products. If there is any failure by us to comply with the applicable regulations or if the regulations governing our business are amended, we may incur increased costs, be subject to penalties, have our approvals and permits revoked or suffer a disruption in our operations, any of which could adversely affect our business.

We will endeavour to renew or obtain such approvals as required, there can be no assurance that the relevant authorities will issue any such approvals within our anticipated timeframe or at all. An inability to renew, maintain or obtain any required permits, licenses or approvals may result in the interruption of our operations and have a material adverse effect on our business, financial condition and results of operations. For further information regarding licenses and approvals, see the section titled "Government and Other Approvals" on page no 206.

28. Our success depends largely on our senior management and skilled professionals and our ability to attract and retain them.

Our success depends on the continued services and performance of the members of our senior management team and other key personnel. Our continued success also depends upon our ability to attract and retain a large group of skilled professionals and staff who have specialized technical know-how. The loss of the services of our senior management or our inability to recruit, train or retain a sufficient number of skilled professionals could have a material adverse effect on our operations and profitability. Competition for senior management in the industry in which we operate is intense, and we may not be able to retain our existing senior management or attract and retain new senior management in the future. Moreover, we do not maintain "key man" life insurance policies for senior members of our management team or other key personnel. We may lose skilled employees to competing employers who pay higher salaries or be forced to increase the salaries to be paid to our employees. If we cannot hire or retain enough skilled professionals, our ability to expand our business will be impaired and consequently, our revenues could decline. Any such loss of the services of our senior management personnel or skilled professionals could adversely affect our business, prospects, financial condition and results of operation.

29. We have significant employee benefit expenses, such as staff welfare expenses and other funds. An increase in employee costs may prevent us from maintaining our competitive advantage and may reduce our profitability.

Company is taking due consideration at the time of recruitment of staff and only experienced & expert of their field being employed at most competitive cost and Company had made necessary provisions to maintain cost. If the cost of employment increases in this industry segment only in such case the employee cost may be higher and may attract negligible effect on our profitability. We incur various employee benefit expenses, including staff welfare expenses and other funds. Our profit margins may get adversely impacted, if we are unable to pass on such costs and cost increases to our clients on a concurrent basis. Unless we are able to continue to increase the efficiency and productivity of our employees, increase in proportion of employees with lower experience, or source talent from other low-cost sources, employee costs increases in the long term may reduce our profit margins.

30. We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

31. Our business is heavily dependent on our distributor and the business or financial condition could be influenced by distributor's misconduct or error that is difficult to detect by Company.

Misconduct or error of distributor could expose us to business risk, losses including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct, error or fraud by our distributor which may harm financial condition, goodwill of the issuer Company.

32. Our results of operations would be materially and adversely affected.

We generally do not enter into agreements with our third-party manufacturers, and typically transact business on an order-by-order basis. Identifying a suitable third-party manufacturer is an involved process that requires us to become satisfied with their quality control, responsiveness and service, financial stability and labour and other ethical practices. We engage contract manufacturers located in Rajasthan, Assam, Haryana and Delhi and surrounding areas for manufacturing our products. Since such third-party manufacturers are not contractually bound to deal with us exclusively, we may face the risk of our competitors offering better terms to such third-party manufacturers, which may cause them to cater to our competitors alongside, or even instead of us. Our contract manufacturers' production facilities are susceptible to operating risks, such as damage or interruption from human error, fire, flood, power loss, work stoppages, terrorist attacks, acts of war, theft, earthquake and other force majeure events. Any interruption in our contract manufacturing operations for any significant period of time could adversely affect the timely delivery of our products and our business and results of operations.

Further, if we experience significant increased demand, or need to replace one or more of our existing manufacturers, there can be no assurance that additional manufacturing capacity will be available when required on terms that are acceptable to us, or at all, or that any manufacturer would allocate sufficient capacity to us in order to meet our requirements or fill our orders in a timely manner. Even if we are able to expand existing or find new manufacturing sources, we may encounter delays in production and added costs as a result of the time it takes to train our manufacturers in our methods, products and quality control standards. Any delays, interruption or increased costs in manufacture of our products could have an adverse effect on our ability to meet customer demand for our products and result in lower revenue from operations both in the short and long term.

33. Our funding requirements and deployment of the issue proceeds are based on management estimates and have not been independently appraised by any bank or financial institution.

Our funding requirements and the deployment of the proceeds of the Issue are based on management estimates and our current business plan. The fund requirements and intended use of proceeds have not been appraised by bank or financial institution and are based on our estimates. In view of the competitive and dynamic nature of our business, we may have to revise our expenditure and fund requirements as a result of variations including in the cost structure, changes in estimates and other external factors, which may not be within the control of our management. This may entail rescheduling, revising or cancelling the planned expenditure and fund requirement and increasing or decreasing the expenditure for a particular purpose from its planned expenditure at the discretion of our Board. In addition, schedule of implementation as described herein are based on management's current expectations and are subject to change due to various factors some of which may not be in our control.

34. Our Company's management will have flexibility in utilizing the Net Proceeds. There is no monitoring agency appointed by our Company and the deployment of funds is at the discretion of our Management and our Board of Directors, though it shall be monitored by our Audit Committee.

Our funding requirements and the deployment of the proceeds of the Issue are based on management estimates and our current business plan. The deployment of the funds towards the objects of the issue is entirely at the discretion of the Board of Directors and is not subject to monitoring by external independent agency. As per SEBI (ICDR) Regulations, 2009, as amended, appointment of monitoring agency is required only for Issue size above 10,000.00 lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Net Issue Proceeds to National Stock Exchange of India Limited and shall also

simultaneously make the material deviations / adverse comments of the audit committee public. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials

35. We have in the past entered into related party transactions and may continue to do so in the future, which may potentially involve conflicts of interest with the equity shareholders.

We have entered into related party transactions with our Promoters, Promoter Group, Group Entities and Directors. For details of these transactions, refer "Related Party Transactions" on page 143. We cannot assure you that we will be able to maintain the terms of such transactions or in the event that we enter future transactions with related parties, that the terms of the transactions will be favourable to us. Additionally, while it is our belief that all our related party transactions have been conducted on an arm's-length basis, we cannot provide assurance that we could have achieved more favourable terms had such transactions been entered with third parties. We may also enter related party transactions in the future, which could involve conflicts of interest, although going forward, all related party transactions that we may enter will be subject to audit committee or board or shareholder approval, as applicable, as under the Companies Act, 2013 and the SEBI (LODR) Regulations. As such, we can provide no assurance that these transactions will not adversely affect our business, results of operation, cash flows and financial condition.

36. We have not made firm arrangements with any financial institution for funding of our balance working capital requirements. The failure to obtain additional financing may adversely affect our ability to grow and our future profitability.

Currently company has made a working capital arrangement with the bank. Further requirement of working capital is a part of our Public offer; refer to "Financial Statements". Our additional working capital requirement has been estimated at 2541.96 lakhs, of which 1050.00 lakhs would be funded out of the Net Issue Proceeds, whereas the balance amount i.e. 1491.96 lakhs would be arranged by way of borrowings or internal accruals. However, as on date of this Prospectus our Company has not identified any alternate source of funding for our working capital requirement. Our Company cannot assure you that we will be able to raise such additional financing on acceptable terms in a timely manner or at all. Any failure or delay on our part to mobilize the required resources or any shortfall in the Issue Proceeds can adversely affect our growth plan and profitability. For further details of our working capital requirement, refer "Object of the Issue" on page 70.

37. We have not made any dividend payments in the past and our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements, capital expenditures and restrictive covenants in our financing arrangements.

In the past, we have not made dividend payments to the shareholders of our Company. The amount of our future dividend payments, if any, will depend upon various factors including our future earnings, financial condition, cash flows and requirement to fund operations and expansion of the business. There can be no assurance that we will be able to declare dividends. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors. For further details, refer "Dividend Policy" on page 144.

38. Our Promoters and Promoter Group will continue to exercise control post completion of the Issue and will have considerable influence over the outcome of matters.

Upon completion of this Issue, our Promoters and Promoter Group will continue to own a majority of our Equity Shares. As a result, our Promoters will have the ability to exercise significant influence over all matters requiring shareholders' approval. Our Promoters will also be in a position to influence any shareholder action or approval requiring a majority vote, except where they may be required by applicable law to abstain from voting. The interests of our Promoters could conflict with the interests of our other equity shareholders, and the Promoters could make decisions that materially and adversely affect your investment in the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoters, or the perception that such sales may occur may significantly affect the trading price of the

Equity Shares. Except as disclosed in “Capital Structure” on page no 58, we cannot assure you that our Promoters will not dispose of, pledge or encumber their Equity Shares in the future.

39. Our Promoters, Directors and Key Management Personnel of our Company may have interests in us other than reimbursement of expenses incurred or normal remuneration or benefits.

Our Promoters are interested in us to the extent of any transactions entered into or their shareholding and dividend entitlement in us. Our Directors (other than our nominee Directors) are also interested to the extent of remuneration paid to them for services rendered as our Directors and reimbursement of expenses payable to them. Our Directors may also be interested to the extent of any transaction entered into by us with any other company or firm in which they are directors or partners or in their individual capacity. For further details, refer “Our Promoters and Promoter Group”, “Our Management” and “Related Party Transactions” on pages no 128, 117 and 143, respectively.

40. Our insurance coverage may not be sufficient or may not adequately protect us against any or all hazards, which may adversely affect our business, results of operations and financial condition.

We have Insurance cover which may not be adequate to cover all our losses or liabilities that may arise from our operations. There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance has been availed. If we suffer a significant uninsured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected.

In addition, our insurance coverage expires from time to time. We apply for the renewal of our insurance coverage in the normal course of our business, but we cannot assure you that such renewals will be granted in a timely manner, at acceptable cost or at all. To the extent that we suffer loss or damage, or successful assertion of one or more large claims against us for events for which we are not insured, or for which we did not obtain or maintain insurance, or which is not covered by insurance, exceeds our insurance coverage or where our insurance claims are rejected, the loss would have to be borne by us and our results of operations, financial performance and cash flows could be adversely affected. For further details on our insurance arrangements, refer “Our Business – Insurance” on page 99.

41. We face foreign exchange risks that could adversely affect our results of operations.

Our Company have not made any foreign exchange currency transaction since beginning hence there is no currency fluctuation or profit or loss so far. And in future the company is planning to enter into export market with due consideration of currency fluctuations by way of using the hedge method.

EXTERNAL RISKS

42. Political, economic or other factors that are beyond our control may have an adverse effect on our business and results of operations.

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Although, economic conditions are different in each other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders’ equity and the price of our Equity Shares.

Our performance, growth and market price of our Equity Shares are and will be dependent on the health of the Indian economy. There have been periods of slowdown in the economic growth of India. Demand for our products may be adversely affected by an economic downturn in domestic, regional and global economies. India’s economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production. Consequently, any future slowdown in the Indian

economy could harm our business, results of operations, cash flows and financial condition. Also, a change in the Government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

43. Changes in latest technology based on business opportunity may adversely affect our Company's results of operations and its financial condition.

Modernisation and technology upgradation is essential to reduce costs and increase the output. Changes in technology may render our current technologies obsolete or require us to make capital investments. Further, the costs in upgrading our technology may be significant which could affect our finances and operations.

44. Changing laws, rules and regulations and legal uncertainties in India, including adverse application of corporate and tax laws, may adversely affect our business and financial results.

Our business and financial performance could be adversely affected by any change in laws or interpretations of existing laws, or the promulgation of new laws, rules and regulations applicable to us and our business including those relating to the industry in which we operate. There can be no assurance that the Government of India or state governments will not introduce new laws, regulations and policies which will require us to obtain additional approvals and licenses or impose onerous requirements on our business.

For example, the new Companies Act, 2013 contains significant changes to Indian company law, including in relation to the issue of capital by companies, disclosures in offer documents, related party transactions, corporate governance, audit matters, internal controls, shareholder class actions, restrictions on the number of layers of subsidiaries, prohibitions on loans to directors, insider trading and restrictions on directors and key management personnel from engaging in forward dealing. Moreover, effective April 1, 2014, companies exceeding certain net worth, revenue or profit thresholds are required to spend at least 2% of average net profits from the immediately preceding three financial years on corporate social responsibility projects, failing which an explanation is required to be provided in such companies' annual reports.

The Ministry of Finance has issued a notification dated March 31, 2015 notifying ICDS which creates a new framework for the computation of taxable income. Subsequently, the Ministry of Finance, through a press release dated July 6, 2016, deferred the applicability of ICDS from April 1, 2015 to April 1, 2016 and is applicable from FY 2017 onwards and will have impact on computation of taxable income for FY 2017 onwards. ICDS deviates in several respects from concepts that are followed under general accounting standards, including Indian GAAP and Ind AS. Such specific standards for computation of income taxes in India are relatively new, and the impact of the ICDS on our results of operations and financial condition is uncertain. There can be no assurance that the adoption of ICDS will not adversely affect our business, results of operations and financial condition going forward.

The Government of India has recently approved the adoption of a comprehensive national goods and services tax ("GST") regime that will combine taxes and levies by the Central and State Governments into a unified rate structure, with effect from July 1, 2017. Given the limited availability of information in the public domain concerning the GST, we cannot provide any assurance as to this or any other aspect of the tax regime following implementation of the GST. The implementation of this rationalized tax structure may be affected by any disagreement between certain state governments, which may create uncertainty. Any future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. If, as a result of a particular tax risk materializing, the tax costs associated with certain transactions are greater than anticipated, it could affect the profitability of such transactions.

We have not determined the effect of such legislations on our business. In addition, unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any

failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

45. Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares.

Under foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions), if they comply with the valuation and reporting requirements specified by the RBI. If a transfer of shares is not in compliance with such requirements and does not fall under any of the exceptions specified by the RBI, then the RBI's or central government's prior approval is required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no objection or a tax clearance certificate from the Indian income tax authorities. We cannot assure you that any required approval from the RBI or any other governmental agency can be obtained on any particular terms or at all.

46. Significant differences exist between Indian GAAP and other accounting principles, such as US GAAP and IFRS, which may be material to an investor's assessment of our Company's financial condition.

As stated in the reports of our Company's statutory auditors included in the Prospectus, our Restated Financial Information is prepared and presented in accordance with the Companies Act and restated in accordance with the SEBI (ICDR) Regulations, consistently applied during the periods stated, except as provided in such reports, and no attempt has been made to reconcile any of the information given in the Prospectus to any other principles or to base it on any other standards such as US GAAP or IFRS. Each of US GAAP and IFRS differs in significant respects from Indian GAAP. Accordingly, the degree to which the Restated Financial Information included in this Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Prospectus should accordingly be limited.

47. Investors may have difficulty enforcing foreign judgments against us or our management.

We are a limited liability company incorporated under the laws of India. All our directors and executive officers are residents of India and all of our assets and such persons are located in India. As a result, it may not be possible for investors to effect service of process upon us or such persons outside of India, or to enforce judgments obtained against such parties outside of India.

Recognition and enforcement of foreign judgments is provided for under Section 13 of the Code of Civil Procedure, 1908 ("CPC") on a statutory basis. Section 13 of the CPC provides that foreign judgments shall be conclusive regarding any matter directly adjudicated upon, except: (i) where the judgment has not been pronounced by a court of competent jurisdiction; (ii) where the judgment has not been given on the merits of the case; (iii) where it appears on the face of the proceedings that the judgment is founded on an incorrect view of international law or a refusal to recognise the law of India in cases to which such law is applicable; (iv) where the proceedings in which the judgment was obtained were opposed to natural justice; (v) where the judgment has been obtained by fraud; and (vi) where the judgment sustains a claim founded on a breach of any law then in force in India. Under the CPC, a court in India shall, upon the production of any document purporting to be a certified copy of a foreign judgment, presume that the judgment was pronounced by a court of competent jurisdiction, unless the contrary appears on record.

However, under the CPC, such presumption may be displaced by proving that the court did not have jurisdiction. India is not a party to any international treaty in relation to the recognition or enforcement of foreign judgments. Section 44A of the CPC provides that where a foreign judgment has been rendered by a superior court, within the meaning of that Section, in any country or territory outside of India which the Central Government has by notification declared to be in a reciprocating territory, it may be enforced in India by proceedings in execution as if the judgment had been

rendered by the relevant court in India. However, Section 44A of the CPC is applicable only to monetary decrees not being of the same nature as amounts payable in respect of taxes, other charges of a like nature or of a fine or other penalty.

The United States and India do not currently have a treaty providing for reciprocal recognition and enforcement of judgments, other than arbitration awards, in civil and commercial matters. Therefore, a final judgment for the payment of money rendered by any federal or state court in the United States on civil liability, whether or not predicated solely upon the federal securities laws of the United States, would not be enforceable in India. However, the party in whose favour such final judgment is rendered may bring a new suit in a competent court in India based on a final judgment that has been obtained in the United States. The suit must be brought in India within three years from the date of the judgment in the same manner as any other suit filed to enforce a civil liability in India.

It is unlikely that a court in India would award damages on the same basis as a foreign court if an action was brought in India. Furthermore, it is unlikely that an Indian court would enforce a foreign judgment if that court were of the view that the amount of damages awarded was excessive or inconsistent with public policy or Indian practice. It is uncertain as to whether an Indian court would enforce foreign judgments that would contravene or violate Indian law. However, a party seeking to enforce a foreign judgment in India is required to obtain approval from the RBI under the FEMA to execute such a judgment or to repatriate any amount recovered.

48. The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the EMERGE Platform of NSE may not develop or be sustained after the Issue. Our Company and the Lead Manager have appointed Share India Securities Limited as a Designated Market Maker for the Equity Shares of our Company. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in the EMERGE Platform of NSE, securities markets in other jurisdictions, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

49. Any future issuance of Equity Shares, or convertible securities or other equity linked securities by us and any sale of Equity Shares by our significant shareholders may dilute your shareholding and adversely affect the trading price of the Equity Shares.

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by us may dilute your shareholding in the Company, adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. No assurance may be given that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our significant shareholders, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that we will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

50. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under the Income Tax Act, capital gains arising from the sale of equity shares in an Indian company within 12 months of purchase are generally taxable in India. Any gain realized on the sale of shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if the STT has been paid on the sale transaction. The STT is collected by the Indian stock exchange on which equity shares are sold. Any gain realized on the sale of shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and as a result of which no STT has been paid, will be subject to long term capital gains tax in India. The recent Finance Act 2017

amendments provided that where the shares have been acquired on or after October 1, 2004 and on which STT has not been paid at the time of acquisition, then the exemption of long term capital gains under section 10(38) of the Income Tax Act would not be available. This amendment further provides that the Government will notify certain modes of acquisition to which the recent amendment made by Finance Act 2017 would not be applicable and the shares acquired by such modes of acquisition would continue to get the benefit of section 10(38) of the Income Tax Act. The Government has issued a notification dated June 5, 2017 listing out certain modes of acquisition where the benefit of section 10(38) will not be applicable, subject to certain exceptions. Capital gains arising from the sale of shares will be exempt from taxation in India in cases where an exemption is provided under a tax treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdictions on gains arising from a sale of the shares subject to relief that may be available under the applicable tax treaty or under the laws of their own jurisdiction.

51. Natural calamities could have a negative effect on the Indian economy and cause our business to suffer.

India has experienced natural calamities such as earthquakes, a tsunami, floods and drought in the past few years. The extent and severity of these natural disasters determines their effect on the Indian economy. Further prolonged spells of below normal rainfall or other natural calamities in the future could have a negative effect on the Indian economy, adversely affecting our business and the price of our Equity Shares.

TEXTILE INDUSTRY & MARKET GROWTH IN INDIA

Introduction

India's textiles sector is one of the oldest industries in Indian economy dating back several centuries. Even today, textiles sector is one of the largest contributors to India's exports with approximately 13 per cent of total exports. The textiles industry is also labour intensive and is one of the largest employers. The textile industry has two broad segments. First, the unorganised sector consists of handloom, handicrafts and sericulture, which are operated on a small scale and through traditional tools and methods. The second is the organised sector consisting of spinning, apparel and garments segment which apply modern machinery and techniques such as economies of scale.

The textile industry employs about 105 million people directly indirectly. India's overall textile exports during FY 2017-18 stood at US\$ 37.74 billion.

India's apparel exports increased at a CAGR (Compounded Annual Growth Rate) of 9.2%³ between 1990 and 2005 and at 8.1%⁴ from 2006 to 2014. Significant boost was provided by dereservation of Garment Industry from Small-scale Industries classification in 2000 (National Textile Policy, 2000). While, India has the complete value chain capability for cotton products and for certain synthetic products - India has traditionally been exporting low value textiles products (fiber, yarn, fabric) more than apparel. However, now India's focus is shifting towards value addition within the country and in exports of finished products rather than exporting raw material and intermediate products. India's competitiveness in the global apparel trade is challenged by lack of scale in garment manufacturing, seasonality (manufacture only certain product categories), inadequate capability in the synthetic value chain, limited number of preferential trade agreements, etc.

Market Size

The Indian textiles industry, currently estimated at around US\$ 150billion, is expected to reach US\$ 230 billion by 2020. The Indian Textile Industry contributes approximately 2 per cent to India's Gross Domestic Product (GDP), 10 per cent of manufacturing production and 14 per cent to overall Index of Industrial Production (IIP).

India's cotton exports are expected to jump 43 per cent to 10 million bales (of 170 kg each) in the 2018-19 marketing year on strong overseas demand, especially from China, according to industry body CIA. Overall cotton shipments are likely to cross 7 million bales in the ongoing 2017-18 marketing year (October-September). Already 6.2 million bales have been exported till May 2018, it said. Indian cotton is quoted at Rs 46,500 per bale in the spot market, much lower than Rs 54,000 per bale in the US and Rs 58,000 per bale in Australia.

Therefore, China - the world's second largest producer - has signed an advance contract for 5 lakh bales of new cotton crop from India for delivery in November-December of the 2018-19 marketing year.

Some of the major investments in the Indian textiles industry are as follows:

- The Cabinet Committee on Economic Affairs (CCEA), Government of India has approved a new skill development scheme named 'Scheme for Capacity Building in Textile Sector (SCBTS)' with an outlay of Rs 1,300 crore (US\$ 202.9 million) from 2017-18 to 2019-20.
- Future Group is planning to open 80 new stores under its affordable fashion format, Fashion at Big Bazaar (FBB), and is targeting sales of 230 million units of garments by March 2018, which is expected to grow to 800 million units by 2021.

INDIAN FOOD PROCESSING

Introduction

The Indian food industry is poised for huge growth, increasing its contribution to world food trade every year. In India, the food sector has emerged as a high-growth and high-profit sector due to its immense potential for value addition, particularly within the food processing industry.

Accounting for about 32 per cent of the country's total food market, The Government of India has been instrumental in the growth and development of the food processing industry. The government through the Ministry of Food Processing Industries (MoFPI) is making all efforts to encourage investments in the business. It has approved proposals for joint ventures (JV), foreign collaborations, industrial licenses, and 100 per cent export oriented units.

Road Ahead

Going forward, the adoption of food safety and quality assurance mechanisms such as Total Quality Management (TQM) including ISO 9000, ISO 22000, Hazard Analysis and Critical Control Points (HACCP), Good Manufacturing Practices (GMP) and Good Hygienic Practices (GHP) by the food processing industry offers several benefits. It would enable adherence to stringent quality and hygiene norms and thereby protect consumer health, prepare the industry to face global competition, enhance product acceptance by overseas buyers and keep the industry technologically abreast of international best practices.

SPICES INDUSTRY IN INDIA

Introduction

India, known as the home of spices, boasts a long history of trading with the ancient civilisations of Rome and China. Today, Indian spices are the most sought-after globally, given their exquisite aroma, texture, taste and medicinal value. India has the largest domestic market for spices in the world. Traditionally, spices in India have been grown in small land holdings, with organic farming gaining prominence in recent times. India is the world's largest producer, consumer and exporter of spices; the country produces about 75 of the 109 varieties listed by the International Organization for Standardization (ISO) and accounts for half of the global trading in spices.

TEXTILE INDUSTRY & MARKET GROWTH IN INDIA

Introduction

India's textiles sector is one of the oldest industries in Indian economy dating back several centuries. Even today, textiles sector is one of the largest contributors to India's exports with approximately 13 per cent of total exports. The textiles industry is also labour intensive and is one of the largest employers. The textile industry has two broad segments. First, the unorganised sector consists of handloom, handicrafts and sericulture, which are operated on a small scale and through traditional tools and methods. The second is the organised sector consisting of spinning, apparel and garments segment which apply modern machinery and techniques such as economies of scale.

The textile industry employs about 105 million people directly and indirectly. India's overall textile exports during FY 2017-18 stood at US\$ 37.74 billion.

The Indian textiles industry is extremely varied, with the hand-spun and hand-woven textiles sectors at one end of the spectrum, while the capital intensive sophisticated mills sector at the other end of the spectrum. The decentralised power looms/ hosiery and knitting sector form the largest component of the textiles sector. The close linkage of the textile industry to agriculture (for raw materials such as cotton) and the ancient culture and traditions of the country in terms of textiles make the Indian textiles sector unique in comparison to the industries of other countries. The Indian textile industry has the capacity to produce a wide variety of products suitable to different market segments, both within India and across the world.

NUTRACEUTICALS OVERVIEW

Introduction

Nutraceuticals refer to food or part of a food, including beverages and food products that provide incremental medical or health benefits, including prevention or treatment of a disease. It spans across Functional Foods, Functional Beverages and Dietary supplements. Some instances of Nutraceutical products are Probiotics, Fortified energy drinks, Vitamins and Minerals etc. The category is positioned in between Food & Beverages and Pharmaceuticals.

Indian consumers are getting more aware of their fundamental needs for nutrition and proactive steps they can take to prevent chronic ailments and attain higher well-being. India has a significantly younger population and the younger generation is vigorously pursuing more active lifestyle to enjoy fitness, to guard against obesity, diabetes, cardio-vascular problems etc. In this context, the role of opinion-shapers like General Practitioners, Fitness Instructors and Nutritionists cannot be ignored. For accelerated penetration and growth, companies must develop programs for more extensive consumer understanding, decide which segments they would like to enter and compete. It is also important to formulate an effective communication strategy for the target audience to educate them on the benefits of this category. Side-effects and spurious products are two key concerns and a potential barrier for growth from all stakeholders and needs to be quickly addressed. It is here that the Regulatory may want to play a more active role.

The retail industry is highly fragmented and is dominated by large number of traders, manufacturers and bigger brands. For details of the industry data please refer to section titles "Our Industry" beginning on page 80 of the Prospectus.

Competition

We face the competition in our business from other existing traders, manufacturers. In the markets where we operate, we face competition primarily from vendors selling unbranded products. Our sales are actually 'pull' sales where sales agents themselves place orders on a regular basis. This network of sales agents is big platform for us to launch new products. We have recently launched herbal products and we are using the same network to sell these herbal products to our customers.

For marketing, we organize events for our sales agents and distributor periodically to appraise them about our new launches, products etc. which act as a platform to create awareness about ICL Multitrading and its products.

We have a wide network of 7 warehouses and 17 stockiest as of June 30, 2018. Simultaneously plan to further strengthen our distribution network by setting up of 10 warehouses and distribution centres to be

managed on our own in and around Uttar Pradesh, Uttarakhand, Delhi NCR and Bihar. The expansion of our distribution network will increase the timely availability of the products in these areas and also ensure that the stockists operate effectively with reduced inventory levels, which would translate into better returns for them and us. We have also recently launched the herbal range of products which are being sold through online platform of www.adiherbal.com.

SALES NETWORK:

The Company built a network of its own 'sales agents' across all major towns of UP, Uttarakhand and Jharkhand. The Company operate different location across UP and also have its own godowns across all these locations to stock the products which we sell. The Sales Agents place the order for various products and collect the same from there. Sales agents then sell the products to local markets in around the small towns.

We also have our dealer distribution network through which we distribute our products. Summarily, we sell our products through our own sales agents across our offices and through the dealer distribution network in small towns of UP, Uttarakhand and Jharkhand where bulk of sales happen in UP and now we are in the process to scale up operations in Uttarakhand and Jharkhand.

National Environmental Policy, 2006

The Policy seeks to extend the coverage, and fill in gaps that still exist, in light of present knowledge and accumulated experience. This policy was prepared through an intensive process of consultation within the Government and inputs from experts. It does not displace, but builds on the earlier policies. It is a statement of India's commitment to making a positive contribution to international efforts. This is a response to our national commitment to a clean environment, mandated in the Constitution in Articles 48 A and 51 A (g), strengthened by judicial interpretation of Article 21. The dominant theme of this policy is that while conservation of environmental resources is necessary to secure livelihoods and well-being of all, the most secure basis for conservation is to ensure that people dependent on particular resources obtain better livelihoods from the fact of conservation, than from degradation of the resource. Following are the objectives of National Environmental Policy:

- Conservation of Critical Environmental Resources
- Intra-generational Equity: Livelihood Security for the Poor
