Our failure to compete effectively, including any delay in responding to changes in the industry and market, together with increased spending on advertising, may affect the competitiveness of our services, which may result in a decline in our revenues and profitability.

26. Insurance coverage obtained by us may not adequately protect us against unforeseen losses.

We have maintained insurance coverage of our assets and accident policies as specified in section titled Insurance Policies on page 126 of the Prospectus. We believe that the insurance coverage maintained, would reasonably cover all normal risks associated with the operation of our business, however, there can be no assurance that any claim under the insurance policies maintained by us will be met fully, in part or on time. In the event we suffer loss or damage that is not covered by insurance or exceeds our insurance coverage, our results of operations and cash flow may be adversely affected.

27. Our promoter and promoter group will continue to retain significant control over our Company after the IPO.

After completion of the Issue, our Promoters and Promoter Group will collectively 60.78 % of the Equity Shares. As a result, our Promoters together with the members of the Promoter Group will be able to exercise a significant degree of influence over us and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

28. There is no monitoring agency appointed by our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by the Audit Committee.

As per SEBI (ICDR) Regulations, 2009 appointment of monitoring agency is required only for Issue size above Rs. 10,000 Lacs. Hence, we have not appointed a monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the BSE and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

29. We may not be successful in implementing our business and growth strategies.

The success of our business depends substantially on our ability to implement our business and growth strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted customers. Changes in

regulations applicable to us may also make it difficult to implement our business strategies. Further, our growth strategies could place significant demand on our management team and other resources and would require us to continuously develop and improve our operational, financial and other controls, none of which can be assured. Failure to implement our business and growth strategies would have a material adverse effect on our business and results of operations.

30. Delay in raising funds from the IPO could adversely impact the implementation schedule.

The proposed expansion, as detailed in the section titled “*Objects of the Issue*” is to be entirely funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute the expansion process within the given time frame, or within the costs as originally estimated by us. Any time overrun or cost overrun may adversely affect our growth plans and profitability.

31. The Objects of the Issue for which funds are being raised, are based on our management estimates and any bank or financial institution or any independent agency has not appraised the same. The deployment of funds in the project is entirely at our discretion, based on the parameters as mentioned in the chapter titles “Objects of the Issue”.

The fund requirement and deployment, as mentioned in the “Objects of the Issue” on page 81 of this Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter “Objects of the Issue” is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter “Objects of the Issue” will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

32. We have not independently verified certain data in this Prospectus.

We have not independently verified data from industry publications contained herein and although we believe these sources to be reliable, we cannot assure you that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Our Company is dividend-paying company in the past years. For further details please refer to chapter titled “Dividend Policy” on page 160 of the Prospectus. However, the amount of our future dividend payments, if any, will depend upon our future earnings, financial conditions, cash flows, working capital requirements, capital expenditures and other factors. There can be no assurance that we shall have distributable funds or that we will declare dividends. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all.

- 34. Any future issue of Equity Shares may dilute your shareholding and sales of our Equity Shares by our Promoter or other major shareholders may adversely affect the trading price of the Equity Shares.**

Any future equity issues by us, including in a primary offering, may lead to the dilution of investors' shareholdings in us. Any future equity issuances by us or sales of its Equity Shares by the Promoter may adversely affect the trading price of the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares.

- 35. There is no guarantee that the Equity Shares offered pursuant to this Issue will be listed on the BSE SME in a timely manner.**

In terms of Chapter XB of the SEBI (ICDR) Regulations, 2009, as amended from time to time, we are not required to obtain any in-principle approval for listing of shares issued. We have only applied to BSE-SME to use its name as the Stock Exchange in this offer document for listing our shares on the BSE-SME. In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. There could be a delay in listing the Equity Shares on the BSE-SME. Any delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

- 36. There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.**

Following the listing, we will be subject to a daily "circuit breaker" imposed by BSE, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based, market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on our circuit breakers will be set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity.

EXTERNAL RISK FACTORS

- 37. Natural calamities and force majeure events may have an adverse impact on our business.**

Natural disasters may cause significant interruption to our operations, and damage to the environment that could have a material adverse impact on us. The extent and severity of these natural disasters determines their impact on the Indian economy. Prolonged spells of deficient or abnormal rainfall and other natural calamities could have an adverse impact on the Indian economy, which could adversely affect our business and results of operations.

- 38. We have not prepared, and currently do not intend to prepare, our financial statements in accordance with the International Financial Reporting Standards ("IFRS"). Our transition to IFRS reporting could have a material adverse effect on our reported results of operations or financial condition.**

Public companies in India, including us, may be required to prepare annual and interim financial statements under IFRS in accordance with the roadmap for convergence with IFRS announced by the Ministry of Corporate Affairs, Government of India through a press note dated January 22, 2010 (the "IFRS Convergence Note"). The Ministry of Corporate Affairs by a press release dated February 25, 2011 has notified that 35 Indian Accounting Standards are to be converged with IFRS. The date of implementation of such converged Indian accounting standards has not yet been determined. Our financial condition, results of operations, cash flows or changes in shareholders' equity may appear materially different under IFRS than under Indian GAAP or our adoption of converged Indian Accounting Standards may adversely affect our reported results of operations or financial condition. This may have a

material adverse effect on the amount of income recognized during that period and in the corresponding (restated) period in the comparative Fiscal/period.

39. Political instability or changes in the Government could adversely affect economic conditions in India generally and our business in particular.

Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Elimination or substantial change of policies or the introduction of policies that negatively affect the Company's business could cause its results of operations to suffer. Any significant change in India's economic policies could disrupt business and economic conditions in India generally and the Company's business in particular.

40. Financial instability in Indian financial markets could adversely affect our company's results of operations and financial condition.

In this globalized world, the Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, say in the United States of America, Europe, China or other emerging economies, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil. Any prolonged financial crisis may have an adverse impact on the Indian economy, thereby resulting in a material and adverse effect on our Company's business, operations, financial condition, profitability and price of its Shares. Stock exchanges in India have in the past experienced substantial fluctuations in the prices of listed securities.

41. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between nonresidents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

42. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

- 43. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.**

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the Mumbai terrorist attacks and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

- 44. Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.**

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. Imposition of any other taxes by the Central and the State Governments may adversely affect our results of operations.

- 45. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.**

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

- 46. Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.**

India has experienced natural calamities such as earthquakes, tsunami, and floods in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operation as well as the price of the Equity Shares.

- 47. You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.**

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months is not subject to capital gains tax in India if securities transaction tax ("STT") is paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Any gain realized on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax. Any change in tax provisions may significantly impact your return on investments.

INDUSTRY OVERVIEW

Global Economic Overview

The pickup in global growth anticipated in the April World Economic Outlook remains on track, with global output projected to grow by 3.5 percent in 2017 and 3.6 percent in 2018. The unchanged global growth projections mask somewhat different contributions at the country level. U.S. growth projections are lower than in April, primarily reflecting the assumption that fiscal policy will be less expansionary going forward than previously anticipated. Growth has been revised up for Japan and especially the euro area, where positive surprises to activity in late 2016 and early 2017 point to solid momentum. China’s growth projections have also been revised up, reflecting a strong first quarter of 2017 and expectations of continued fiscal support. Inflation in advanced economies remains subdued and generally below targets; it has also been declining in several emerging economies, such as Brazil, India, and Russia.

While risks around the global growth forecast appear broadly balanced in the near term, they remain skewed to the downside over the medium term. On the upside, the cyclical rebound could be stronger and more sustained in Europe, where political risk has diminished. On the downside, rich market valuations and very low volatility in an environment of high policy uncertainty raise the likelihood of a market correction, which could dampen growth and confidence. The more supportive policy tilt in China, especially strong credit growth, comes with rising downside risks to medium-term growth. Monetary policy normalization in some advanced economies, notably the United States, could trigger a faster-than-anticipated tightening in global financial conditions. And other risks discussed in the April 2017 WEO, including a turn toward inward-looking policies and geopolitical risks, remain salient.

Projected global growth rates for 2017-18, though higher than the 3.2 percent estimated for 2016, are below pre-crisis averages, especially for most advanced economies and for commodity-exporting emerging and developing economies. Among the former, many face excess capacity as well as headwinds to potential growth from aging populations, weak investment, and slowly advancing productivity. In view of weak core inflation and muted wage pressures, policy settings should remain consistent with lifting inflation expectations in line with targets, closing output gaps, and—where appropriate—external rebalancing. Reforms to boost potential output are of the essence, and slow aggregate output growth makes it even more important that gains are shared widely across the income distribution. Financial stability risks need close monitoring in many emerging economies. Commodity exporters should continue adjusting to lower revenues, while diversifying their sources of growth over time.

The Global Economy Maintains Momentum

The cyclical recovery continues. Growth outturns in the first quarter of 2017 were higher than the April WEO forecasts in large emerging and developing economies such as Brazil, China, and Mexico, and in several advanced economies including Canada, France, Germany, Italy, and Spain. High-frequency indicators for the second quarter provide signs of continued strengthening of global activity. Specifically, growth in global trade and industrial production remained well above 2015-16 rates despite retreating from the very strong pace registered in late 2016 and early 2017. Purchasing managers’ indices (PMIs) signal sustained strength ahead in manufacturing and services.

Commodities and inflation. Oil prices have receded, reflecting strong inventory levels in the United States and a pickup in supply. Headline inflation also generally softened as the impact of the commodity price rebound of the second half of 2016 faded, and remains at levels well below central bank targets in most advanced economies.

Core inflation has remained broadly stable. It has largely been stable in emerging economies as well, with a few, such as Brazil and Russia, witnessing strong declines.

Bond and equity markets. Long-term bond yields in advanced economies, which had declined since March, rebounded in late June and early July. The U.S. Federal Reserve raised short-term interest rates in June, but markets still expect a very gradual path of U.S. monetary policy normalization. Bond spreads over Germany have compressed sharply in France, Italy, and Spain on reduced electoral uncertainty and firming signs of recovery. Equity prices in advanced economies remain strong, signaling continued market optimism regarding corporate earnings. Markets are also optimistic about emerging market prospects as reflected in strengthening equity markets and some further compression of interest rate spreads. Oil exporters provide an exception to this pattern, in light of the marked weakening of oil prices since March.

Exchange rates and capital flows. As of end-June, the U.S. dollar has depreciated by around 3½ percent in real effective terms since March, while the euro has strengthened by a similar amount on increased confidence in the euro area recovery and a decline in political risk. Over the same period, exchange rate changes across emerging market currencies have been relatively modest, with some strengthening of the Mexican peso on tighter monetary policy and reduced concerns about U.S. trade frictions, and a depreciation of the Brazilian real on renewed political uncertainty. Capital flows to emerging economies have been resilient in the first few months of 2017, with a notable pickup in non-resident portfolio inflows.

Global Growth Forecast to Pick up in 2017 and 2018

Global growth for 2016 is now estimated at 3.2 percent, slightly stronger than the April 2017 forecast, primarily reflecting much higher growth in Iran and stronger activity in India following national accounts revisions. Economic activity in both advanced economies and emerging and developing economies is forecast to accelerate in 2017, to 2 percent and 4.6 percent respectively, with global growth projected to be 3.5 percent, unchanged from the April forecast. The growth forecast for 2018 is 1.9 percent for advanced economies, 0.1 percentage point below the April 2017 WEO, and 4.8 percent for emerging and developing economies, the same as in the spring. The 2018 global growth forecast is unchanged at 3.6 percent. The revisions reflect primarily the macroeconomic implications of changes in policy assumptions for the world's two largest economies, the United States and China, as discussed below.

Advanced economies

- The growth forecast in the United States has been revised down from 2.3 percent to 2.1 percent in 2017 and from 2.5 percent to 2.1 percent in 2018. While the markdown in the 2017 forecast reflects in part the weak growth outturn in the first quarter of the year, the major factor behind the growth revision, especially for 2018, is the assumption that fiscal policy will be less expansionary than previously assumed, given the uncertainty about the timing and nature of U.S. fiscal policy changes. Market expectations of fiscal stimulus have also receded.
- The growth forecast has also been revised down for the United Kingdom for 2017 on weaker-than-expected activity in the first quarter.
- By contrast, growth projections for 2017 have been revised up for many euro area countries, including France, Germany, Italy, and Spain, where growth for the first quarter of 2017 was generally above expectations. This, together with positive growth revisions for the last quarter of 2016 and high-frequency indicators for the second quarter of 2017, indicate stronger momentum in domestic demand than previously anticipated.
- The growth forecast for 2017 was also revised up for Canada, where buoyant domestic demand boosted first-quarter growth to 3.7 percent and indicators suggest resilient second-quarter activity, and marginally for Japan, where private consumption, investment, and exports supported first-quarter growth.

Emerging and developing economies

Emerging and developing economies are projected to see a sustained pickup in activity, with growth rising from 4.3 percent in 2016 to 4.6 percent in 2017 and 4.8 percent in 2018. These forecasts reflect upward revisions, relative to April, of 0.2 percentage point for 2016, and 0.1 percentage point for 2017. As in the most recent WEO forecast vintages, growth is primarily driven by commodity importers, but its pickup reflects to an important extent gradually improving conditions in large commodity exporters that experienced recessions in 2015-16, in many cases caused or exacerbated by declining commodity prices.

- **China's** growth is expected to remain at 6.7 percent in 2017, the same level as in 2016, and to decline only modestly in 2018 to 6.4 percent. The forecast for 2017 was revised up by 0.1 percentage point, reflecting the stronger than expected outturn in the first quarter of the year underpinned by previous policy easing and supply-side reforms (including efforts to reduce excess capacity in the industrial sector). For 2018, the upward revision of 0.2 percentage point mainly reflects an expectation that the authorities will delay the needed fiscal adjustment (especially by maintaining high public investment) to meet their target of doubling 2010 real GDP by 2020. Delay comes at the cost of further large increases in debt, however, so downside risks around this baseline have also increased.
- **Growth in India** is forecast to pick up further in 2017 and 2018, in line with the April 2017 forecast. While activity slowed following the currency exchange initiative, growth for 2016--at 7.1 percent--was higher than anticipated due to strong government spending and data revisions that show stronger momentum in the first part of the year. With a pickup in global trade and strengthening domestic demand, growth in the ASEAN-5 economies is projected to remain robust at around 5 percent, with generally strong first quarter outturns leading to a slight upward revision for 2017 relative to the April WEO.
- **In Emerging and Developing Europe**, growth is projected to pick up in 2017, primarily driven by a higher growth forecast for Turkey, where exports recovered strongly in the last quarter of 2016 and the first quarter of 2017 following four quarters of moderate contraction, and external demand is projected to be stronger with improved prospects for euro area trading partners. The Russian economy is projected to recover gradually in 2017 and 2018, in line with the April forecast.
- After contracting in 2016, economic activity in **Latin America** is projected to recover gradually in 2017-18 as a few countries--including Argentina and Brazil--exit their recessions. In comparison to the April 2017 WEO, Brazil's growth forecast for 2017 is now higher in light of the strong first quarter, but ongoing weakness in domestic demand and an increase in political and policy uncertainty will be reflected in a more subdued pace of recovery, and hence in lower projected growth in 2018. Mexico's growth forecast for 2017 is revised up from 1.7 to 1.9 percent on the back of strong activity in the first quarter of the year, with an unchanged forecast for 2018. Revisions for the rest of the region are mostly to the downside, including a further deterioration of conditions in Venezuela.
- Growth in the **Middle East, North Africa, Afghanistan, and Pakistan** region is projected to slow considerably in 2017, reflecting primarily a slowdown in activity in oil exporters, before recovering in 2018. The 2017-18 forecast is broadly unchanged relative to the April 2017 WEO, but the growth outcome in 2016 is estimated to have been considerably stronger in light of higher growth in Iran. The recent decline in oil prices, if sustained, could weigh further on the outlook for the region's oil exporters.
- In **Sub-Saharan Africa**, the outlook remains challenging. Growth is projected to rise in 2017 and 2018, but will barely return to positive territory in per capita terms this year for the region as a whole--and would remain negative for about a third of the countries in the region. The slight upward revision to 2017 growth relative to the April 2017 WEO forecast reflects a modest upgrading of growth prospects for South Africa, which is experiencing a bumper crop due to better rainfall and an increase in mining output prompted by a moderate rebound in commodity prices. However, the outlook for South Africa

remains difficult, with elevated political uncertainty and weak consumer and business confidence, and the country's growth forecast was consequently marked down for 2018.

Growth in FY2017 (ending 31 March 2018) is expected to be lower than forecast in the Asian Development Outlook 2017 as a new tax regime poses transitory challenges to firms and as investment by state governments and private investors remain muted. A pickup is envisaged in FY2018, aided by restructured bank balance sheets

and efficiency gains from the new tax regime, but growth will again fall short of the April forecast. Stronger agriculture will ease inflation by more than expected in FY2017 and FY2108. Current account projections are unchanged.

HEALTHCARE INDUSTRY IN INDIA

Introduction

Healthcare has become one of India's largest sectors - both in terms of revenue and employment. Healthcare comprises hospitals, medical devices, clinical trials, outsourcing, telemedicine, medical tourism, health insurance and medical equipment. The Indian healthcare sector is growing at a brisk pace due to its strengthening coverage, services and increasing expenditure by public as well private players.

Indian healthcare delivery system is categorised into two major components - public and private. The Government, i.e. public healthcare system comprises limited secondary and tertiary care institutions in key cities and focuses on providing basic healthcare facilities in the form of primary healthcare centres (PHCs) in rural areas. The private sector provides majority of secondary, tertiary and quaternary care institutions with a major concentration in metros, tier I and tier II cities.

India's competitive advantage lies in its large pool of well-trained medical professionals. India is also cost competitive compared to its peers in Asia and Western countries. The cost of surgery in India is about one-tenth of that in the US or Western Europe.

Market Size

Deloitte Touche Tohmatsu India has predicted that with increased digital adoption, the Indian healthcare market, which is worth around US\$ 100 billion, will likely grow at a CAGR of 23 per cent to US\$ 280 billion by 2020.

The revenue of India's corporate healthcare sector is estimated to grow at 15 per cent in FY 2017-18.*

India is experiencing 22-25 per cent growth in medical tourism and the industry is expected to double its size from present (April 2017) US\$ 3 billion to US\$ 6 billion by 2018. Medical tourist arrivals in India increased more than 50 per cent to 200,000 in 2016 from 130,000 in 2015.

The Healthcare Information Technology (IT) market is valued at US\$ 1 billion currently (April 2016) and is expected to grow 1.5 times by 2020. #

Over 80 per cent of the antiretroviral drugs used globally to combat AIDS (Acquired Immuno Deficiency Syndrome) are supplied by Indian pharmaceutical firms^.

There is a significant scope for enhancing healthcare services considering that healthcare spending as a percentage of Gross Domestic Product (GDP) is rising. Rural India, which accounts for over 70 per cent of the population, is set to emerge as a potential demand source.

A total of 3,598 hospitals and 25,723 dispensaries across the country offer AYUSH (Ayurveda, Yoga & Naturopathy, Unani, Siddha and Homoeopathy) treatment, thus ensuring availability of alternative medicine and treatment to the people.

Road Ahead

India is a land full of opportunities for players in the medical devices industry. India's healthcare industry is one of the fastest growing sectors and in the coming 10 years it is expected to reach \$275 billion. The country has also become one of the leading destinations for high-end diagnostic services with tremendous capital investment for advanced diagnostic facilities, thus catering to a greater proportion of population. Besides, Indian medical service consumers have become more conscious towards their healthcare upkeep.

Indian healthcare sector is much diversified and is full of opportunities in every segment which includes providers, payers and medical technology. With the increase in the competition, businesses are looking to explore for the latest dynamics and trends which will have positive impact on their business.

India's competitive advantage also lies in the increased success rate of Indian companies in getting Abbreviated New Drug Application (ANDA) approvals. India also offers vast opportunities in R&D as well as medical tourism. To sum up, there are vast opportunities for investment in healthcare infrastructure in both urban and rural India.

- ***Hospital and Clinical Laboratory Management***

Hospitals which lack the resources, licenses or scale to operate onsite clinical laboratories efficiently often seek to enter into laboratory management agreements with larger laboratory networks, like ours. Under these arrangements, we establish and manage “in-hospital” clinical laboratories to conduct onsite routine testing and provide offsite support for more complex testing needs through our laboratory network on a revenue-sharing basis. Pursuant to the terms of our contractual agreements, the hospital typically provides rent-free space and access to its utilities and other infrastructure, and we provide the diagnostic equipment and are responsible for all costs relating to personnel, consumables, transportation of samples and maintenance of the laboratory.

Similarly, we have entered into clinical laboratory management arrangements with independent laboratories, whereby we operate, but do not own, their laboratories (and certain patient service centers) in accordance with our quality standards. While some of our clinical laboratory arrangements are on a fixed management-fee basis, a majority are operated on a revenue-sharing basis. Under our contractual agreements, we typically lease the physical space from the laboratory, which also provides us their existing diagnostic equipment, while we are responsible for the maintenance and update of the equipment. We also typically are responsible for costs relating to the day-to-day operation of the laboratory, such as utilities, staff costs and marketing costs. These laboratories are generally operated on an exclusive, co-branded basis, and testing reports are issued under joint letterhead.

- ***Home Collection Service***

Our home collection service allows specimens to be collected from our patients’ locations, such as their homes or offices. This is a key part of our customer-centric approach, as we strive to provide convenient, quality services to our patients. We believe our home collection service also helps to alleviate potential “high traffic” periods in our clinical laboratories and patient service centers.

- ***Routine Testing***

- Routine testing generally is performed on whole blood, serum, plasma and other body fluids and specimens such as microbiology samples. These tests measure various important bodily health parameters such as the functions of the kidney, heart, liver, thyroid gland and other organs. We perform and report most routine testing procedures utilizing a variety of sophisticated and computerized testing

instruments. Commonly ordered tests include blood chemistries, including hormone analysis, hematology and coagulation testing and clinical pathology testing, such as urinalysis.

QUALITY CERTIFICATE

We have **The NABL Certification** for our Laboratory which is the highest quality certification in India for testing and calibrating Laboratories.

- Bar Coded Samples to reduce Manual Errors.
- On-board Quality manager Pearly Sen holds 11 years of experience of ensuring quality of NABL standards.

Maintaining NABL standards

- Perform daily controls on all machines.
- Adherence to waste disposal management
- Robust documentations
 - Past records of all daily Quality Control logs
 - Temperature recording of rooms and kits
 - Regular machine calibration log sheets.
 - Complaints and feedback records
 - Critical value instant communication to patient.

Centralized information technology platform that fully integrates our network and is scalable.

Our centralized information technology platform fully integrates our large network through a common logistics and payments system, thereby allowing us to collect more efficiently samples and payments from patients and healthcare service providers. In addition, our technology platform tracks our operations and internal performance metrics, thereby enabling us to improve the operating efficiency of our business. We plan to increase the breadth of our diagnostic healthcare testing and services platform through, among other things, the adoption of new, cutting-edge diagnostic healthcare testing technology, as we believe this will expand our sources of revenue and further enhance the reputation of our brand. For example, we intend to offer more preventive healthcare screening and chronic and lifestyle disease management services, given the increasing health awareness of, and concomitant increase in, chronic and lifestyle diseases. This would include additional development in the areas of genetics, molecular and oncology testing, as well as an expansion of our current chronic disease management and wellness programs. We also intend to further grow our corporate customer base by continuing to market our healthcare proposition to human resource departments and other corporate decision makers.

Continue our focus on providing our customers quality diagnostic and related healthcare tests and services.

The quality and reliability of our diagnostic and related healthcare tests and services are essential to our success, as we believe these are primary concerns to patients, hospitals and other healthcare providers and corporate customers. Accordingly, our commitment to the quality and reliability of our diagnostic healthcare services is fundamental to our corporate brand and strategy. For example, we will continue to respond to the needs of individual customers and the healthcare industry by maintaining the quality of our diagnostic healthcare services and improving our turnaround times for testing results. In addition, we will continue to upgrade our diagnostic equipment and technology in order to increase the efficiency of our processing capacity, and we also will continue to increase the geographic reach of our radiology services. We believe we gain access from our suppliers to advanced diagnostic technologies and equipment, which further enhance the quality and reliability of our diagnostic healthcare services. We will also continue to enhance the customer experience by further developing our online initiatives and leveraging our potential data analytics capabilities.

INDUSTRY OVERVIEW

Global Economic Overview

The pickup in global growth anticipated in the April World Economic Outlook remains on track, with global output projected to grow by 3.5 percent in 2017 and 3.6 percent in 2018. The unchanged global growth projections mask somewhat different contributions at the country level. U.S. growth projections are lower than in April, primarily reflecting the assumption that fiscal policy will be less expansionary going forward than previously anticipated. Growth has been revised up for Japan and especially the euro area, where positive surprises to activity in late 2016 and early 2017 point to solid momentum. China’s growth projections have also been revised up, reflecting a strong first quarter of 2017 and expectations of continued fiscal support. Inflation in advanced economies remains subdued and generally below targets; it has also been declining in several emerging economies, such as Brazil, India, and Russia.

While risks around the global growth forecast appear broadly balanced in the near term, they remain skewed to the downside over the medium term. On the upside, the cyclical rebound could be stronger and more sustained in Europe, where political risk has diminished. On the downside, rich market valuations and very low volatility in an environment of high policy uncertainty raise the likelihood of a market correction, which could dampen growth and confidence. The more supportive policy tilt in China, especially strong credit growth, comes with rising downside risks to medium-term growth. Monetary policy normalization in some advanced economies, notably the United States, could trigger a faster-than-anticipated tightening in global financial conditions. And other risks discussed in the April 2017 WEO, including a turn toward inward-looking policies and geopolitical risks, remain salient.

Projected global growth rates for 2017-18, though higher than the 3.2 percent estimated for 2016, are below pre-crisis averages, especially for most advanced economies and for commodity-exporting emerging and developing economies. Among the former, many face excess capacity as well as headwinds to potential growth from aging populations, weak investment, and slowly advancing productivity. In view of weak core inflation and muted wage pressures, policy settings should remain consistent with lifting inflation expectations in line with targets, closing output gaps, and—where appropriate—external rebalancing. Reforms to boost potential output are of the essence, and slow aggregate output growth makes it even more important that gains are shared widely across the income distribution. Financial stability risks need close monitoring in many emerging economies. Commodity exporters should continue adjusting to lower revenues, while diversifying their sources of growth over time.

The Global Economy Maintains Momentum

The cyclical recovery continues. Growth outturns in the first quarter of 2017 were higher than the April WEO forecasts in large emerging and developing economies such as Brazil, China, and Mexico, and in several advanced economies including Canada, France, Germany, Italy, and Spain. High-frequency indicators for the second quarter provide signs of continued strengthening of global activity. Specifically, growth in global trade and

industrial production remained well above 2015-16 rates despite retreating from the very strong pace registered in late 2016 and early 2017. Purchasing managers' indices (PMIs) signal sustained strength ahead in manufacturing and services.

Commodities and inflation. Oil prices have receded, reflecting strong inventory levels in the United States and a pickup in supply. Headline inflation also generally softened as the impact of the commodity price rebound of the second half of 2016 faded, and remains at levels well below central bank targets in most advanced economies. Core inflation has remained broadly stable. It has largely been stable in emerging economies as well, with a few, such as Brazil and Russia, witnessing strong declines.

Bond and equity markets. Long-term bond yields in advanced economies, which had declined since March, rebounded in late June and early July. The U.S. Federal Reserve raised short-term interest rates in June, but markets still expect a very gradual path of U.S. monetary policy normalization. Bond spreads over Germany have compressed sharply in France, Italy, and Spain on reduced electoral uncertainty and firming signs of recovery. Equity prices in advanced economies remain strong, signaling continued market optimism regarding corporate earnings. Markets are also optimistic about emerging market prospects as reflected in strengthening equity markets and some further compression of interest rate spreads. Oil exporters provide an exception to this pattern, in light of the marked weakening of oil prices since March.

Exchange rates and capital flows. As of end-June, the U.S. dollar has depreciated by around 3½ percent in real effective terms since March, while the euro has strengthened by a similar amount on increased confidence in the euro area recovery and a decline in political risk. Over the same period, exchange rate changes across emerging market currencies have been relatively modest, with some strengthening of the Mexican peso on tighter monetary policy and reduced concerns about U.S. trade frictions, and a depreciation of the Brazilian real on renewed political uncertainty. Capital flows to emerging economies have been resilient in the first few months of 2017, with a notable pickup in non-resident portfolio inflows.

Global Growth Forecast to Pick up in 2017 and 2018

Global growth for 2016 is now estimated at 3.2 percent, slightly stronger than the April 2017 forecast, primarily reflecting much higher growth in Iran and stronger activity in India following national accounts revisions. Economic activity in both advanced economies and emerging and developing economies is forecast to accelerate in 2017, to 2 percent and 4.6 percent respectively, with global growth projected to be 3.5 percent, unchanged from the April forecast. The growth forecast for 2018 is 1.9 percent for advanced economies, 0.1 percentage point below the April 2017 WEO, and 4.8 percent for emerging and developing economies, the same as in the spring. The 2018 global growth forecast is unchanged at 3.6 percent. The revisions reflect primarily the macroeconomic implications of changes in policy assumptions for the world's two largest economies, the United States and China, as discussed below.

Advanced economies

- The growth forecast in the United States has been revised down from 2.3 percent to 2.1 percent in 2017 and from 2.5 percent to 2.1 percent in 2018. While the markdown in the 2017 forecast reflects in part the weak growth outturn in the first quarter of the year, the major factor behind the growth revision, especially for 2018, is the assumption that fiscal policy will be less expansionary than previously assumed, given the uncertainty about the timing and nature of U.S. fiscal policy changes. Market expectations of fiscal stimulus have also receded.
- The growth forecast has also been revised down for the United Kingdom for 2017 on weaker-than-expected activity in the first quarter.
- By contrast, growth projections for 2017 have been revised up for many euro area countries, including France, Germany, Italy, and Spain, where growth for the first quarter of 2017 was generally above expectations. This, together with positive growth revisions for the last quarter of 2016 and high-

frequency indicators for the second quarter of 2017, indicate stronger momentum in domestic demand than previously anticipated.

- The growth forecast for 2017 was also revised up for Canada, where buoyant domestic demand boosted first-quarter growth to 3.7 percent and indicators suggest resilient second-quarter activity, and marginally for Japan, where private consumption, investment, and exports supported first-quarter growth.

Emerging and developing economies

Emerging and developing economies are projected to see a sustained pickup in activity, with growth rising from 4.3 percent in 2016 to 4.6 percent in 2017 and 4.8 percent in 2018. These forecasts reflect upward revisions, relative to April, of 0.2 percentage point for 2016, and 0.1 percentage point for 2017. As in the most recent WEO forecast vintages, growth is primarily driven by commodity importers, but its pickup reflects to an important extent gradually improving conditions in large commodity exporters that experienced recessions in 2015-16, in many cases caused or exacerbated by declining commodity prices.

- **China's** growth is expected to remain at 6.7 percent in 2017, the same level as in 2016, and to decline only modestly in 2018 to 6.4 percent. The forecast for 2017 was revised up by 0.1 percentage point, reflecting the stronger than expected outturn in the first quarter of the year underpinned by previous policy easing and supply-side reforms (including efforts to reduce excess capacity in the industrial sector). For 2018, the upward revision of 0.2 percentage point mainly reflects an expectation that the authorities will delay the needed fiscal adjustment (especially by maintaining high public investment) to meet their target of doubling 2010 real GDP by 2020. Delay comes at the cost of further large increases in debt, however, so downside risks around this baseline have also increased.
- **Growth in India** is forecast to pick up further in 2017 and 2018, in line with the April 2017 forecast. While activity slowed following the currency exchange initiative, growth for 2016--at 7.1 percent--was higher than anticipated due to strong government spending and data revisions that show stronger momentum in the first part of the year. With a pickup in global trade and strengthening domestic demand, growth in the ASEAN-5 economies is projected to remain robust at around 5 percent, with generally strong first quarter outturns leading to a slight upward revision for 2017 relative to the April WEO.
- **In Emerging and Developing Europe**, growth is projected to pick up in 2017, primarily driven by a higher growth forecast for Turkey, where exports recovered strongly in the last quarter of 2016 and the first quarter of 2017 following four quarters of moderate contraction, and external demand is projected to be stronger with improved prospects for euro area trading partners. The Russian economy is projected to recover gradually in 2017 and 2018, in line with the April forecast.
- After contracting in 2016, economic activity in **Latin America** is projected to recover gradually in 2017-18 as a few countries--including Argentina and Brazil--exit their recessions. In comparison to the April 2017 WEO, Brazil's growth forecast for 2017 is now higher in light of the strong first quarter, but ongoing weakness in domestic demand and an increase in political and policy uncertainty will be reflected in a more subdued pace of recovery, and hence in lower projected growth in 2018. Mexico's growth forecast for 2017 is revised up from 1.7 to 1.9 percent on the back of strong activity in the first quarter of the year, with an unchanged forecast for 2018. Revisions for the rest of the region are mostly to the downside, including a further deterioration of conditions in Venezuela.
- Growth in the **Middle East, North Africa, Afghanistan, and Pakistan** region is projected to slow considerably in 2017, reflecting primarily a slowdown in activity in oil exporters, before recovering in 2018. The 2017-18 forecast is broadly unchanged relative to the April 2017 WEO, but the growth outcome in 2016 is estimated to have been considerably stronger in light of higher growth in Iran. The

recent decline in oil prices, if sustained, could weigh further on the outlook for the region's oil exporters.

- In **Sub-Saharan Africa**, the outlook remains challenging. Growth is projected to rise in 2017 and 2018, but will barely return to positive territory in per capita terms this year for the region as a whole—and would remain negative for about a third of the countries in the region. The slight upward revision to 2017 growth relative to the April 2017 WEO forecast reflects a modest upgrading of growth prospects for South Africa, which is experiencing a bumper crop due to better rainfall and an increase in mining output prompted by a moderate rebound in commodity prices. However, the outlook for South Africa remains difficult, with elevated political uncertainty and weak consumer and business confidence, and the country's growth forecast was consequently marked down for 2018.

Growth in FY2017 (ending 31 March 2018) is expected to be lower than forecast in the Asian Development Outlook 2017 as a new tax regime poses transitory challenges to firms and as investment by state governments and private investors remain muted. A pickup is envisaged in FY2018, aided by restructured bank balance sheets and efficiency gains from the new tax regime, but growth will again fall short of the April forecast. Stronger agriculture will ease inflation by more than expected in FY2017 and FY2108. Current account projections are unchanged.

HEALTHCARE INDUSTRY IN INDIA

Introduction

Healthcare has become one of India's largest sectors - both in terms of revenue and employment. Healthcare comprises hospitals, medical devices, clinical trials, outsourcing, telemedicine, medical tourism, health insurance and medical equipment. The Indian healthcare sector is growing at a brisk pace due to its strengthening coverage, services and increasing expenditure by public as well private players.

Indian healthcare delivery system is categorised into two major components - public and private. The Government, i.e. public healthcare system comprises limited secondary and tertiary care institutions in key cities and focuses on providing basic healthcare facilities in the form of primary healthcare centres (PHCs) in rural areas. The private sector provides majority of secondary, tertiary and quaternary care institutions with a major concentration in metros, tier I and tier II cities.

India's competitive advantage lies in its large pool of well-trained medical professionals. India is also cost competitive compared to its peers in Asia and Western countries. The cost of surgery in India is about one-tenth of that in the US or Western Europe.

Market Size

Deloitte Touche Tohmatsu India has predicted that with increased digital adoption, the Indian healthcare market, which is worth around US\$ 100 billion, will likely grow at a CAGR of 23 per cent to US\$ 280 billion by 2020.

The revenue of India's corporate healthcare sector is estimated to grow at 15 per cent in FY 2017-18.* India is experiencing 22-25 per cent growth in medical tourism and the industry is expected to double its size from present (April 2017) US\$ 3 billion to US\$ 6 billion by 2018. Medical tourist arrivals in India increased more than 50 per cent to 200,000 in 2016 from 130,000 in 2015.

The Healthcare Information Technology (IT) market is valued at US\$ 1 billion currently (April 2016) and is expected to grow 1.5 times by 2020. #

Over 80 per cent of the antiretroviral drugs used globally to combat AIDS (Acquired Immuno Deficiency Syndrome) are supplied by Indian pharmaceutical firms^.

There is a significant scope for enhancing healthcare services considering that healthcare spending as a percentage of Gross Domestic Product (GDP) is rising. Rural India, which accounts for over 70 per cent of the population, is set to emerge as a potential demand source.

A total of 3,598 hospitals and 25,723 dispensaries across the country offer AYUSH (Ayurveda, Yoga & Naturopathy, Unani, Siddha and Homoeopathy) treatment, thus ensuring availability of alternative medicine and treatment to the people.

Road Ahead

India is a land full of opportunities for players in the medical devices industry. India's healthcare industry is one of the fastest growing sectors and in the coming 10 years it is expected to reach \$275 billion. The country has also become one of the leading destinations for high-end diagnostic services with tremendous capital investment for advanced diagnostic facilities, thus catering to a greater proportion of population. Besides, Indian medical service consumers have become more conscious towards their healthcare upkeep.

Indian healthcare sector is much diversified and is full of opportunities in every segment which includes providers, payers and medical technology. With the increase in the competition, businesses are looking to explore for the latest dynamics and trends which will have positive impact on their business.

India's competitive advantage also lies in the increased success rate of Indian companies in getting Abbreviated New Drug Application (ANDA) approvals. India also offers vast opportunities in R&D as well as medical tourism. To sum up, there are vast opportunities for investment in healthcare infrastructure in both urban and rural India.

Hospital and Clinical Laboratory Management

Hospitals which lack the resources, licenses or scale to operate onsite clinical laboratories efficiently often seek to enter into laboratory management agreements with larger laboratory networks, like ours. Under these arrangements, we establish and manage “in-hospital” clinical laboratories to conduct onsite routine testing and provide offsite support for more complex testing needs through our laboratory network on a revenue-sharing basis. Pursuant to the terms of our contractual agreements, the hospital typically provides rent-free space and access to its utilities and other infrastructure, and we provide the diagnostic equipment and are responsible for all costs relating to personnel, consumables, transportation of samples and maintenance of the laboratory.

Similarly, we have entered into clinical laboratory management arrangements with independent laboratories, whereby we operate, but do not own, their laboratories (and certain patient service centers) in accordance with our quality standards. While some of our clinical laboratory arrangements are on a fixed management-fee basis, a majority are operated on a revenue-sharing basis. Under our contractual agreements, we typically lease the physical space from the laboratory, which also provides us their existing diagnostic equipment, while we are responsible for the maintenance and update of the equipment. We also typically are responsible for costs relating to the day-to-day operation of the laboratory, such as utilities, staff costs and marketing costs. These laboratories are generally operated on an exclusive, co-branded basis, and testing reports are issued under joint letterhead.

Home Collection Service

Our home collection service allows specimens to be collected from our patients’ locations, such as their homes or offices. This is a key part of our customer-centric approach, as we strive to provide convenient, quality services to our patients. We believe our home collection service also helps to alleviate potential “high traffic” periods in our clinical laboratories and patient service centers.

Routine Testing

Routine testing generally is performed on whole blood, serum, plasma and other body fluids and specimens such as microbiology samples. These tests measure various important bodily health parameters such as the functions

of the kidney, heart, liver, thyroid gland and other organs. We perform and report most routine testing procedures utilizing a variety of sophisticated and computerized testing instruments. Commonly ordered tests include blood chemistries, including hormone analysis, hematology and coagulation testing and clinical pathology testing, such as urinalysis.

OUR CUSTOMERS

The primary customer groups we service include individual patients, healthcare providers, diagnostic service providers that do not have the breadth of our testing capabilities and corporate customers.

Individual Patients

Individual patients collectively are our largest customer group. We bill patients on a fee-for-service basis and in accordance with our customer fee schedule.

Healthcare Providers

We provide diagnostics healthcare services to healthcare providers, including private laboratories, hospital laboratories, clinics, nursing homes, physicians and polyclinics. These healthcare providers have their own testing needs, and while some have onsite testing facilities to serve their patients, they often lack the resources, expertise or scale to conduct certain tests, and must consequently refer the testing to external diagnostic laboratories like ours.

We bill healthcare service providers based on a fee schedule contractually agreed with each of them or at the otherwise standard rates applicable to the client. Healthcare providers are also a valuable source of indirect revenues generated through patient referrals, as we believe that they recognize our services to be reliable, cost-effective and efficient.

Hospital and Clinical Laboratory Management

We also generate revenue from the hospital and clinical laboratory management services we provide. Fees charged to hospitals and clinics for our laboratory management services are in accordance with individual management contracts entered into with each hospital we serve.

Corporates and Institutions

We serve other institutions, including corporate employers, insurance companies and government agencies. Corporate customers and other institutions typically pay on a negotiated fee-for-service basis. Our institutional contracts allow the employees of our corporate customers to access our diagnostic and preventive healthcare services as part of their compensation packages.

SALES AND MARKETING

We seek to utilize cost-efficient marketing to enhance our brand awareness and increase our patient base. Our main marketing activities are in the areas of medico marketing and retail marketing.

Our medico marketing focuses on the promotion of our services in the medical and health services communities, primarily through the organization of healthcheck programme and continuing medical education initiatives.

Our retail marketing aims to increase our walk-in and home collection patients mainly through creating awareness of our health check-ups and wellness initiatives and the convenience of our home collection services. We also continue to target corporate and institutional customers and continue to develop our business through social media and our online initiative.

INDUSTRY OVERVIEW

HEALTHCARE INDUSTRY IN INDIA

Introduction

Healthcare has become one of India's largest sectors - both in terms of revenue and employment. Healthcare comprises hospitals, medical devices, clinical trials, outsourcing, telemedicine, medical tourism, health insurance and medical equipment. The Indian healthcare sector is growing at a brisk pace due to its strengthening coverage, services and increasing expenditure by public as well private players.

Indian healthcare delivery system is categorised into two major components - public and private. The Government, i.e. public healthcare system comprises limited secondary and tertiary care institutions in key cities and focuses on providing basic healthcare facilities in the form of primary healthcare centres (PHCs) in rural areas. The private sector provides majority of secondary, tertiary and quaternary care institutions with a major concentration in metros, tier I and tier II cities.

India's competitive advantage lies in its large pool of well-trained medical professionals. India is also cost competitive compared to its peers in Asia and Western countries. The cost of surgery in India is about one-tenth of that in the US or Western Europe.

Road Ahead

India is a land full of opportunities for players in the medical devices industry. India's healthcare industry is one of the fastest growing sectors and in the coming 10 years it is expected to reach \$275 billion. The country has also become one of the leading destinations for high-end diagnostic services with tremendous capital investment for advanced diagnostic facilities, thus catering to a greater proportion of population. Besides, Indian medical service consumers have become more conscious towards their healthcare upkeep.

Indian healthcare sector is much diversified and is full of opportunities in every segment which includes providers, payers and medical technology. With the increase in the competition, businesses are looking to explore for the latest dynamics and trends which will have positive impact on their business.

India's competitive advantage also lies in the increased success rate of Indian companies in getting Abbreviated New Drug Application (ANDA) approvals. India also offers vast opportunities in R&D as well as medical tourism.

To sum up, there are vast opportunities for investment in healthcare infrastructure in both urban and rural India.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. However, press note 4 of (2015 Series), dated April 24, 2015, regarding policy on foreign investment in pension sector, will remain effective. The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the FDI Policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/ RBI. As per the existing policy of the Government of India, OCBs cannot participate in this Issue and in accordance with the extant FDI guidelines on sectoral caps, pricing guidelines etc. as amended by Reserve bank of India, from time to time.

2. (i) Every person whose name is entered as a member in the register of members shall be entitled to receive within two months after incorporation, in case of subscribers to the memorandum or after allotment or within one month after the application for the registration of transfer or transmission or within such other period as the conditions of issue shall be

3. (i) If any share certificate be worn out, defaced, mutilated or torn or if there be no further space on the back for endorsement of transfer, then upon production and surrender thereof to the company, a new certificate may be issued in lieu thereof, and if any certificate is lost or destroyed then upon proof thereof to the satisfaction of the company and on execution of such indemnity as the company deem adequate, a new certificate in lieu thereof shall be given. (ii) In case of non-payment of such sum, all the relevant provisions of these regulations as to payment of interest and expenses, forfeiture or otherwise shall apply as if such sum had become payable by virtue of a call duly made and notified.

(a) to be registered himself as holder of the share; or

(b) to make such transfer of the share as the deceased or insolvent member could have made.

(ii) The Board shall, in either case, have the same right to decline or suspend registration as it would have had, if the deceased or insolvent member had transferred the share before his death or insolvency.

(ii) If the person aforesaid shall elect to transfer the share, he shall testify his election by executing a transfer of the share.

(iii) All the limitations, restrictions and provisions of these regulations relating to the right to transfer and the registration of transfers of shares shall be applicable to any such notice or transfer as aforesaid as if the death or insolvency of the member had not occurred and the notice or transfer were a transfer signed by that member.

26. A person becoming entitled to a share by reason of the death or insolvency of the holder shall be entitled to the same dividends and other advantages to which he would be entitled if he were the registered holder of the share, except that he shall not, before being registered as a member in respect of the share, be entitled in respect of it to exercise any right conferred by membership in relation to meetings of the company:

Provided that the Board may, at any time, give notice requiring any such person to elect either to be registered himself or to transfer the share, and if the notice is not complied with within ninety days, the Board may thereafter withhold payment of all dividends, bonuses or other monies payable in respect of the share, until the requirements of the notice have complied with.
