SECTION II- RISK FACTORS

An investment in the Equity Shares involves a high degree of risk. You should carefully consider all of the information in this Draft Prospectus, including the risks and uncertainties described below and the restated Financial Statements incorporated in this Draft Prospectus, before making an investment in the Equity Shares. Applicants should pay particular attention to the fact that we are governed in India by a legal and regulatory environment which in some material respects may be different from that which prevails in other countries. In making an investment decision, Applicants must rely on their own examination of our Company and the terms of the Issue, including the risks involved. If any or some combination of the following risks occur or if any of the risks that are currently not known or deemed to be not relevant or material now, actually occur, our business, prospects, financial condition and results of operations could suffer, the trading price of the Equity Shares could decline, and you may lose all or part of your investment. For further details, please refer to chapters titled “Our Business” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on pages 96 and 164, respectively of this Draft Prospectus, as well as the other financial and statistical information contained in this Draft Prospectus. If our business, results of operations or financial condition suffers, the price of the Equity Shares and the value of your investments therein could decline.

We have described the risks and uncertainties that our management believes are material, but these risks and uncertainties may not be the only ones we face. Additional risks and uncertainties, including those we are not aware of, or deem immaterial or irrelevant, may also result in decreased revenues, increased expenses or other events that could result in a decline in the value of the Equity Shares. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial or other implication of any of the risks described in this section. You should not invest in this Issue unless you are prepared to accept the risk of losing all or part of your investment, and you should consult your tax, financial and legal advisors about the particular consequences to you of an investment in the Equity Shares.

This Draft Prospectus also contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Draft Prospectus. For further details, please refer to chapter titled “Forward-Looking Statements” beginning on page 13 of this Draft Prospectus.

INTERNAL RISK FACTORS

- 1. If we are unable to maintain and enhance the  brand, the sales of our products may suffer which would have a material adverse effect on our financial condition and results of operations**

We believe that the brand we have developed has significantly contributed to the success of our

business. We also believe that maintaining and enhancing the  brand is critical to maintaining and expanding our customer base. Our brand and reputation are among our most important assets and we believe that our brand serve in attracting consumers to our products in preference over those of our competitors. Maintaining and enhancing our brand may require us to make substantial investments in areas such as research and development, marketing and brand building activities, and these investments may not be successful.

There can be no assurance that consumers will continue to be receptive to our brand. We anticipate that, as our business expands into new markets and as the market becomes increasingly competitive, maintaining and enhancing our brand may become increasingly difficult and expensive. Additionally, in the event that our future advertising campaigns are unsuccessful, we may only incur expenses without the benefit of higher revenues or our competitors may increase their advertising spend, launch promotional activities, concepts, branding and advertising activities which we may not be able to match.

Our brand may also be adversely affected if our public image or reputation is tarnished by any negative publicity. Any adverse publicity involving us or any of our products may impair our reputation, dilute the impact of our branding and marketing initiatives and adversely affect our business and our prospects. Our brand could be damaged by negative publicity on various media platforms or by claims or perceptions about the quality of our products, regardless of whether such claims or perceptions are true. Any untoward incidents such as litigation or negative publicity, whether isolated or recurring and whether originating from us or otherwise, affecting our business, distributors, dealers and suppliers may adversely impact our brand image and consumer trust. If we are unable to maintain or enhance our brand image, our results of operations may suffer and our business may be harmed.

2. We rely on third parties for substantially all of our sales and distribution operations, and if such third parties fail to assist us in a consistent, timely and efficient manner, our business, results of operations and financial condition may be adversely affected

Our sales and distribution operations depend substantially upon our sales team, the distributors and the C&F (Collection & Forwarding Agents) network. Currently, we are having CNF tie-ups in the state of Maharashtra, Karnataka and Telangana. Our C&F Network is critical for sale and distribution of our product. We cannot assure you that such third parties will be able to establish or maintain adequate sales capabilities or will be successful in ensuring sale of our products. Further, although we enter into exclusive agreements with such third parties, we cannot assure you that such third parties will be able to fulfil their obligations under such agreements entirely, in a manner acceptable to us, or at all. Authorized distributors, as independent business operators, may, from time to time, disagree with us and our strategies regarding the business or our interpretation of our respective rights and obligations under applicable agreements. We cannot assure you that such third parties shall not breach certain terms of such agreements or shall not choose to terminate their agreements with our Company. We may have to initiate litigation in respect of any breach by such third parties, and such litigation could divert the attention of our management from our operations, which could harm our business, financial condition and results of operation. Further, we cannot assure you that the outcome of any such litigation will be favorable to us.

Any adverse experience of customers of such commissioned agents / authorized distributors, or negative publicity attracted by such commissioned agents / authorized distributors could adversely affect our reputation and brand and business prospects. If we are unable to establish or maintain our relationship with such third parties, our business, results of operations and financial condition may be materially and adversely affected.

3. Our business is heavily dependent on our suppliers.

We do not manufacture any of the products that we trade in. Our business is heavily depended on the products manufactured by various manufacturers. We procure the products with customization from various suppliers based on availability of desired quality, quantity and other financial terms. We are required to rely heavily on few suppliers and the quality of products supplied by them. Though we do not manufacture any product ourselves, we have substantial marketing or branding requirements for business, and we are reliant on our suppliers for giving us timely delivery,

products of agreed quality and products customized as per our need. Our sales and profitability would be adversely affected in case of any management inabilities or errors on part of our suppliers.

Following are some of the important factors about our business which we do not directly have control over and are dependent on our suppliers:

- Quality consistency of the products and its variants;
- Branding and other customization of these products on a large scale;
- Errors or rollbacks in sold products creating negative goodwill and consumer litigations;
- Cost competitiveness of these products;
- Supplier side logistics which in turn affect our delivery levels to customers.

Further, we face the risk of our suppliers' reducing their focus in our products and the states they operate due to competitive pressures and other internal management decisions and hence we may not receive the necessary support from our suppliers. Also, we face the risk of the management of our suppliers collaborating with others and thus reducing our share of supply, which we cannot ensure would be as per our required terms. Any negative development involving our suppliers and their products, could adversely affect our business growth, profitability, results of operations and goodwill and we may not be in a position to alter or avoid such developments.

4. Substantial portion of our revenues has been dependent upon a few clients. The loss of any one or more of our major clients would have a material adverse effect on our business operations and profitability

For the three months period ended June 30, 2018 financial year ended March 31, 2018, and March 31, 2017 our top five largest clients accounted for approximately 88.45%, 73.63%, and 46.99%, respectively of our revenues from operations. The loss of a significant client or clients would have a material adverse effect on our financial results. We cannot assure you that we can maintain the historical levels of business from these clients or that we will be able to replace these clients in case we lose any of them.

Furthermore, major events affecting our clients, such as bankruptcy, change of management, mergers and acquisitions could adversely impact our business. If any of our major clients becomes bankrupt or insolvent, we may lose some or all of our business from that client and our receivable from that client would increase and may have to be written off, adversely impacting our income and financial condition.

5. Our growth strategy to expand into new geographic areas possess risks. We may not be able to successfully manage some or all of such risks, which may have a material adverse effect on our revenues, profits and financial condition.

While our operations are pan India, our major sales are derived from select states. Our business is therefore significantly dependent on the general economic condition and activity in these States in which we operate along with the Central, State and Local Government policies relating to the industries in which we operate. Although, investment in the industry in which we operate has been encouraged, there can be no assurance that this will continue. We may expand geographically and may not gain acceptance or be able to take advantage of any expansion opportunities outside our current markets. This may place us at a competitive disadvantage and limit our growth opportunities. We may face additional risks if we undertake operations in other geographic areas in which we do not possess the same level of familiarity as competitors. If we undertake operations in different geographical locations than those currently is; we may be affected by various factors, including but not limited to:

- Adjusting our products to the new geographic area;
- Ascertaining the creditworthiness of the buyer and maintain credit terms with the same;
- Obtaining necessary Government and other approvals in time or at all;
- Failure to realize expected synergies and cost savings;
- Attracting potential customers in a market in which we do not have significant experience; and
- Cost of hiring new employees and absorbing increased costs.

6. We sell our products in highly competitive markets and our inability to compete effectively may lead to lower market share or reduced operating margins, and adversely affect our results of operations

The sector in which we operate are highly and increasingly competitive and our results of operations are sensitive to, and may be materially and adversely affected by, competitive pricing and other factors. Competition may result in pricing pressure, reduced profit margin or a failure to increase our market share, any of which could substantially harm our business and results of our operations.

We compete directly against wholesalers and direct retailers of having substantial market share, established companies selling internationally renowned brands as well as domestic retailers and regional competitors. Many of our competitors are companies with strong brand recognition. However, the domestic segments are fragmented and continue to be dominated by unorganized and regional suppliers. We compete primarily on the basis of brand image and quality. In order to compete effectively, we must continue to maintain and develop our brand image and reputation, be flexible and innovative in responding to rapidly changing market demands and customer preferences and offer customers a wide variety of good quality products at competitive prices.

Many of our competitors have significant competitive advantages, including longer operating histories, larger and broader customer base, more established relationships with a broader set of suppliers, greater brand recognition and greater financial, research and development, marketing, distribution budgets and other resources than we do. The number of our direct competitors and the intensity of competition may increase as we expand into other product lines or as other companies expand into other product lines. Our competitors may enter into business combinations or alliances. Our competitors may also be able to respond more quickly and effectively than we do to new or changing opportunities, standards or customer preferences, which could result in a decline in our revenues. There can be no assurance that we can effectively compete with our competitors in the future, and any such failure to compete effectively may have a material adverse effect on our business, financial condition and results of operations.

7. The products marketed and sold by our Company in relation to the ‘Add Shop’ brand and are vulnerable to counterfeiting or imitation by third parties that may affect the reputation of our Company

Our Company ensures that our products are manufactured by contract manufacturers for our Company and they are not permitted to sell these products. We maintain a close check and control over each stage of the production process and conduct quality checks at every stage. However, our ‘Add Shop’ brand of products are vulnerable to counterfeiting and imitation by third party vendors who may manufacture and sell products in the mass market at relatively cheaper prices. While we make constant checks in mass markets in an effort to prevent the sale of any counterfeit products of our ‘Add Shop’ brand, there can be no assurance that we will be able to prevent sale of counterfeit products at all time. Any sale of counterfeit or imitation products which does not match the quality

standards of our products will adversely impact our reputation. It will also materially affect our business, prospects, results of operations and financial conditions.

8. We are involved in high volume-low margin business. Any disruption in our turnover or failure to regularly grow the same may have a material adverse effect on our business, results of operations and financial condition

Our inability to regularly grow our turnover and effectively execute our key business processes could lead to lower profitability and hence adversely affect our operating results, debt service capabilities and financial conditions. Due to the nature of the products we sell, we may not be able to charge higher margins on our products. Hence, our business model is heavily reliant on our ability to effectively grow our turnover and manage our key processes including but not limited to raw material procurement, timely sales / order execution and continuous cost control of non-core activities. The table below gives details of our operating margins and net profit margin based on restated standalone financial statements.

(Rs. In lakhs)

Particulars	As at June 30, 2018	FY 2018	FY 2017	FY 2016
Total revenue from operations	381.41	1,254.89	455.41	192.67
Profit before Tax as a % of Total Income	5.51	2.56	4.75	0.36
Profit after Tax as a % of Total Income	4.26	1.83	3.23	-0.20

Our growth strategy is subject to and involves risks and difficulties, many of which are beyond our control and, accordingly, there can be no assurance that we will be able to implement our strategy or growth plans or complete them within the specified timelines. Further, we operate in a dynamic industry, and on account of changes in market conditions, industry dynamics, technological improvements or changes and any other relevant factors, our growth strategy and plans may undergo changes or modifications, and such changes or modifications may be substantial, and may even include limiting or foregoing growth opportunities if the situation so demands. For further details regarding the discussions and explanations for our past results, please refer “Management’s Discussions and Analysis of Financial Condition and Results of Operations” on page 164 of this Draft Prospectus

9. We are dependent on third party transportation providers for the delivery of our products. Accordingly, any increase in transportation costs or unavailability of transportation services for our products may have an adverse effect on our business, financial condition, results of operations and prospects.

We do not have an in-house transportation facility and we rely on third party transportation and other logistic facilities at every stage of our business activity including for procurement of products and raw material, as the case may be, from our vendors and suppliers and for transportation of our finished products. For this purpose, we hire services of transportation companies. Additionally, availability of transportation is typically fragmented. We do not enter into written documentation in relation to the transportation services we hire. We could be faced with transportation risks due to any loss or pilferage, which we may not be able to recover from our insurance coverage. Further, the cost of our goods carried by such third-party transporters is typically much higher than the consideration paid for transportation, due to which it may be difficult for us to recover compensation for damaged, delayed or lost goods.

Our operations and profitability are dependent upon the availability of transportation and other logistic facilities in a timely and cost-efficient manner. Accordingly, our business is vulnerable to increased transportation costs, including, as a result of increase in fuel costs, transportation strikes, delays, damage or losses of goods in transit and disruption of transportation services because of weather related problems, strikes, lock-outs, accidents, inadequacies in road infrastructure or other similar events.

Although, we have experienced few disruptions in the past on account of state wide transportation strikes, any prolonged disruption or unavailability of such facilities in a timely manner could result in delays or non-supply or may require us to look for alternative sources which may be cost inefficient, thereby adversely affecting our operations, profitability, reputation and market position.

10. Inventories and trade receivables form a substantial part of our current assets and net worth. If we are unable to accurately forecast customer demand for our products, we may not be able to maintain optimum inventory levels resulting in additional strain on our resources. Failure to manage our trade receivables could have an adverse effect on our net sales, profitability, cash flow and liquidity

We determine the quantities of our products manufactured for sales and distribution pursuant to management estimates based on historic trends and demand data and our internal forecasts, which is used to extrapolate expected future sales pattern. However, our future earnings through the sale and distribution of our products may not be realized as forecasted, on account of cancellations or modifications of firm orders or our failure to accurately prepare demand forecasts. If we are unable to appropriately estimate the demand for our products for any reason, it could result in excess inventory levels or unavailability of our products during increased demand, resulting in below potential sales. For three months period ended June 30, 2018 and Financial Year ended March 31, 2018, and March 31, 2017, we maintained an inventory of finished goods of 27.39%, 15.13% and 6.20% of our gross revenue from operations, respectively.

Our ability to accurately forecast customer demand for our products is affected by various factors, including:

- a substantial increase or decrease in the demand for our products or for similar offerings of our competitors;
- aggressive pricing strategies employed by our competitors;
- failure to accurately forecast or changes in customer acceptance of our products;
- limited historical demand and sales data for our products in newer markets; and
- weakening of general economic conditions or customer confidence that could reduce the sale of our products.

Inventory levels in excess of customer demand may result in inventory write-downs or write-offs or we may be required to sell our excess inventory at discounted prices, which will adversely affect our gross margins and negatively impact our reputation and brand exclusivity. On the other hand, if we face demand in excess of our production, we may not be able to adequately respond to the demand for our products. This could result in delays in delivery of our products to our customers and we may suffer damage to our reputation and customer relationships. Additionally, our customers may be driven to purchase products offered by our competitors. There can be no assurance that we will be able to manage our inventories at optimum levels to successfully respond to customer demand.

To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and distributors and ensure that suitable terms and conditions are given

to them in order to ensure our continued relationship with them. However, if our management fails to accurately evaluate the credit worthiness of our customers, it may lead to bad debts, delays in recoveries and / or write-offs which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. A liquidity crunch may also result in increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability.

11. We may not be able to adapt to changing market trends and customer requirements in a timely manner, or at all.

The market for the products in which we deal is highly competitive with several players present in various segments in brick and mortar stores and through third party e-commerce platforms. If we are unable to anticipate consumer preferences or industry changes, or if we are unable to modify our products and their prices on a timely basis, we may lose customers to our competitors (located in physical stores and on e-commerce platforms) or may be forced to reduce our sales realization on products by having to offer them at a discount, thereby reducing our margins. If our competitors are able to cater to these markets, or if we are not able to anticipate the demand, or misjudge the quantity, inter alia, this could lead to lower sales, higher inventories and higher discounts, each of which could have a material adverse effect on our brand, reputation, results of operations and financial condition.

12. We have existing secured debt facilities and may incur further additional debt, which could adversely affect our financial health and our ability to obtain financing in the future and react to changes in our business and increases in interest rates of our borrowings may impact our results of operation. Further, our debt financing agreements contain restrictive covenants or lenders' options that may affect our interest.

As on June 30, 2018, the amount of our total outstanding secured borrowings was 48.00 lakhs. For further details, refer "Financial Indebtedness" on page 173. We may incur additional indebtedness in the future. Our ability to meet our debt service obligations and our ability to repay our outstanding borrowings will depend primarily upon the cash flow produced by our business. We cannot assure you that we will generate sufficient revenue from our businesses to service existing or proposed borrowings. In addition: (a) our ability to obtain additional financing for working capital, capital expenditures, acquisitions or general corporate purposes may be impaired in the future; (b) a substantial portion of our cash flow from operations may be dedicated to the payment of principal and interest on our indebtedness, thereby reducing the funds available to us for other purposes; (c) we will be exposed to the risk of increased interest rates; and (d) our flexibility to adjust to changing market conditions and ability to withstand competitive pressures could be limited, and we may be more vulnerable to a downturn in general economic conditions in our business or be unable to carry out capital spending that is necessary or important to our growth strategy. In the future, our cash flow and capital resources may not be sufficient for interest or principal payments on our indebtedness, and any remedial measures may not be successful and therefore may not permit us to meet our scheduled debt service obligations.

13. Our Company has availed certain unsecured loans that are callable by the lenders at any time

As on June 30, 2018 our Company has availed certain unsecured loans that are callable on demand by the lenders. For further details, refer "Financial Indebtedness" on page 173. In case of any demand from lenders for repayment of such unsecured loans, the resultant cash outgo, may adversely affect our business operations and financial position of our Company.

14. Our Promoters and Directors, Dineshbhai Pandya, Jayshree Pandya, Devang Pandya and others i.e. Kanubhai Kheni have provided personal guarantees for loan facilities obtained by

our Company and any failure or default by our Company to repay such loans in accordance with the terms and conditions of the financing documents could trigger repayment obligations on them, which may impact their ability to effectively service their obligations as our Promoters and Directors and thereby, adversely impact our business and operations.

Our Promoters and Directors Dineshbhai Pandya, Jayshree Pandya, Devang Pandya and others i.e. Kanubhai Kheni have personally guaranteed the repayment of certain loan facilities taken by our Company. Any default or failure by us to repay its loans in a timely manner, or at all could trigger repayment obligations on the part of our Promoter and Directors in respect of such loans, which in turn, could have an impact on their ability to effectively service their obligations as Promoters and Directors of our Company, thereby having an adverse effect on our business, results of operation and financial condition. Furthermore, in the event that these individuals withdraw or terminate their guarantees, our lenders for such facilities may ask for alternate guarantees, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows.

15. We have issued Equity Shares during the last one year from the date of filing of the Draft Prospectus at a price that is below the Issue Price

Date of Allotment	No. of Equity Shares	Face Value (Rs.)	Issue Price (Rs.)	Consideration (In Rs.)	Nature of Allotment
March 30, 2018	1,30,000	10.00	NA	NA	Bonus Issue

May 05, 2018	8,00,000	10.00	25.00	20,000,000	Further issuance of equity shares
June 02, 2018	22,65,625	10.00	NA	NA	Further issuance of bonus equity shares

For further details of the aforesaid allotment refer “Capital Structure” on page 56.

16. Our results of operations are likely to vary from year to year and be unpredictable, which could cause the market price of the Equity Shares to decline

Our results of operations have historically varied from year to year due to various factors, and we expect that this trend will continue. You should not rely on our past financial results for any year as indicators of future performance. Our results of operations in any given year can be influenced by a number of factors, many of which are outside of our control and may be difficult to predict, including:

- our ability to acquire and retain clients for our products;
- maintaining high levels of customer satisfaction;
- capital expenditure and other costs relating to our operations;

- adhering to our high quality and process execution standards;
- products or pricing policies introduced by our competitors;
- the timing and nature of, and expenses incurred in, our marketing efforts;
- recruiting, training and retaining sufficient skilled technical and management personnel;
- developing and improving our internal administrative infrastructure, particularly our financial, operational, communications, and other internal systems;

Also, please refer “Management's Discussion and Analysis of Financial Condition and Results of Operations” on page 164 of this Draft Prospectus for details on the factors affecting our financial results. All of these factors, in combination or alone could negatively impact our revenues and may cause significant fluctuations in our results of operations. This variability and unpredictability could materially and adversely affect our results of operations and financial condition.

17. If we are unable to attract new customers or retain our existing customers the growth of our business and cash flows will be adversely affected

To increase our revenue and cash flows, we must regularly add new customers. If our existing or new clients do not perceive our products to be of sufficiently high value and quality, we may not be able to increase sales and our operating results would be adversely affected. If we fail to sell our products to new customers or fail to retain our existing customers do not renew their contracts, our operating results will suffer, and our revenue growth, cash flows and profitability may be materially and adversely affected.

18. We rely on our information technology systems for our operations and its reliability and functionality is critical to our business success. Any interruption or abnormality in the same may have an adverse impact on our business operations and profitability.

We rely on our information technology systems for our operations and its reliability and functionality is critical to our business success. Our growing dependence on the IT infrastructure, applications, and data has caused us to have a vested interest in its reliability and functionality, which can be affected by a number of factors, including: (A) Increasing Complexity of the IT systems: The overall complexity of our IT systems will grow as technology continues to advance, IT system capabilities expand, user expectations increase and business practices change; (B) Frequent Change and Short Life Span: A high rate of change may cause our IT systems to have a short life span, given that users may demand new IT features and capabilities on a frequent basis; (C) Data Security: The need to protect our IT systems has thus greatly increased. Unfortunately, increased security requirements can increase costs and hamper user access to needed information; (D) Funding: Our IT systems now require a larger share of capital and operational funds. However, the systems may become effectively obsolete in a few years despite our substantial investment. If our IT systems malfunction or experience extended periods of down time, we will not be able to run our operations safely or efficiently. We may suffer losses in revenue, reputation and volume of business and our financial condition and results of operation may be materially and adversely affected. Any damage or system failure that causes interruptions or delays in the input, retrieval or transmission of data could disrupt our normal operations. Should such an interruption or delay occur, we cannot assure you that it will not result in the loss of data or information that is important to our business or that we will be able to restore our operational capacity within a sufficiently adequate time frame to avoid disruptions to our business. The occurrence of any of these events could interfere with the operation of our business and adversely affect our business, financial condition and results of operations.

19. We may be unable to obtain, renew or maintain statutory and regulatory permits, licenses and approvals required to operate our business which could result in an adverse effect on our results of operations

We require certain statutory and regulatory permits, licenses and approvals to operate our business. Our licenses, permits and approvals impose certain terms and conditions that require us to incur significant costs and inter alia, restrict certain activities. The approvals required by us are subject to numerous conditions and we cannot assure you that these would not be suspended or revoked in the event of non-compliance or alleged noncompliance with any terms or conditions thereof, or pursuant to any regulatory action. If there is any failure by us to comply with the applicable regulations or if the regulations governing our business are amended, we may incur increased costs, be subject to penalties, have our approvals and permits revoked or suffer a disruption in our operations, any of which could adversely affect our business.

While we will endeavor to renew or obtain such approvals as required, there can be no assurance that the relevant authorities will issue any such approvals within our anticipated timeframe or at all. An inability to renew, maintain or obtain any required permits, licenses or approvals may result in the interruption of our operations and have a material adverse effect on our business, financial condition and results of operations. For further information regarding licenses and approvals, see the section titled "Government and Other Statutory Approvals" on page 178.

20. Our success depends largely on our senior management and skilled professionals and our ability to attract and retain them

Our success depends on the continued services and performance of the members of our senior management team and other key managerial personnel. Our continued success also depends upon our ability to attract and retain a large group of skilled professionals and staff who have specialized knowledge. The loss of the services of our senior management or our inability to recruit, train or retain a sufficient number of skilled professionals could have a material adverse effect on our operations and profitability. Competition for senior management in the industry in which we operate is intense, and we may not be able to retain our existing senior management or attract and retain new senior management in the future. We may lose skilled employees to competing employers who pay higher salaries or be forced to increase the salaries to be paid to our employees. If we cannot hire or retain enough skilled professionals, our ability to expand our business will be impaired and consequently, our revenues could decline. Any such loss of the services of our senior management personnel or skilled professionals could adversely affect our business, prospects, financial condition and results of operation.

21. We have group companies and entities where our Promoters / Directors are actively involved

Our Promoters and Directors are also actively involved in other group companies / entities. Our Promoters may devote substantial time and resources to develop and grow the business of other group companies / entities, though Directors and Promoters are involved in other group companies / entities but the maximum time of Promoter and Directors is devoted in this Company hence there is no probability for lack of leadership. Though we cannot guarantee that our promoters will divide their time and energy between our group companies / entities and us. Though our key managerial personnel are well experienced to carry out the business activities, lack of involvement of our Promoters could have an adverse effect on our goodwill and financial performance.

22. Our funding requirements and deployment of the issue proceeds are based on management estimates and have not been independently appraised by any bank or financial institution.

Our funding requirements and the deployment of the proceeds of the issue are based on management estimates and our current business plan. The fund requirements and intended use of proceeds have not been appraised by bank or financial institution and are based on our estimates.

In view of the competitive and dynamic nature of our business, we may have to revise our expenditure and fund requirements as a result of variations including in the cost structure, changes in estimates and other external factors, which may not be within the control of our management. This may entail rescheduling, revising or cancelling the planned expenditure and fund requirement and increasing or decreasing the expenditure for a particular purpose from its planned expenditure at the discretion of our Board. In addition, schedule of implementation as described herein are based on management's current expectations and are subject to change due to various factors some of which may not be in our control.

23. Our Company's management will have flexibility in utilizing the Net Proceeds. There is no monitoring agency appointed by our Company and the deployment of funds is at the discretion of our Management and our Board of Directors, though it shall be monitored by our Audit Committee.

Our funding requirements and the deployment of the proceeds of the Issue are based on management estimates and our current business plan. The deployment of the funds towards the objects of the issue is entirely at the discretion of the Board of Directors and is not subject to monitoring by external independent agency. As per SEBI (ICDR) Regulations, 2009, as amended, appointment of monitoring agency is required only for Issue size above 10,000.00 lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Net Issue Proceeds to BSE Limited and shall also simultaneously make the material deviations / adverse comments of the audit committee public. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

24. Any variation in the utilization of the Net Proceeds as disclosed in this Draft Prospectus shall be subject to certain compliance requirements, including prior Shareholders' approval.

In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Draft Prospectus without obtaining the shareholders' approval through a special resolution. In the event of any such circumstances that requires us to undertake variation in the disclosed utilization of the Net Proceeds, we may not be able to obtain the Shareholders' approval in a timely manner, or at all. Any delay or inability in obtaining such Shareholders' approval may adversely affect our business or operations. Further, our Promoters or controlling shareholders would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to modify the objects of the Issue as prescribed in the SEBI (ICDR) Regulations. If our shareholders exercise such exit option, our business and financial condition could be adversely affected. Therefore, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company, which may restrict our ability to respond to any change in our business or financial condition and may adversely affect our business and results of operations. For further details of the proposed objects of the Issue, refer "Objects of the Issue" on page 67.

25. We have in the past entered into related party transactions and may continue to do so in the future, which may potentially involve conflicts of interest with the equity shareholders

We have entered into related party transactions with our Promoters, Promoter Group, Group Entities and Directors. For details of these transactions, refer "Related Party Transactions" on page 133. We cannot assure you that we will be able to maintain the terms of such transactions or in the event that we enter future transactions with related parties, that the terms of the transactions will be favorable to us. Additionally, while it is our belief that all our related party transactions have been

conducted on an arm's length basis, we cannot provide assurance that we could have achieved more favorable terms had such transactions been entered with third parties. We may also enter related party transactions in the future, which could involve conflicts of interest, although going forward, all related party transactions that we may enter will be subject to audit committee or board or shareholder approval, as applicable, as under the Companies Act, 2013 and the SEBI (LODR) Regulations. As such, we can provide no assurance that these transactions will not adversely affect our business, results of operation, cash flows and financial condition.

26. Our registered office and our branch office is not registered in our name.

Our Company has taken our registered office on with consent with any rent from Our Promoter Dineshbhai Pandya. There can be no assurance that our Company will be able to successfully get extension or consent to use the property Any such non-extension may require us to vacate the premises and relocate to new premises on terms that may not be favorable to us thereby adversely affecting our business, financial conditions and results of operations. For further details on the properties of our Company, refer to the section titled "Immovable Properties" appearing under "Our Business" on page 96.

27. Our Company does not have any similar and comparable listed peer which is involved in the same line of business for a direct comparison of performance and therefore, investors must rely on their own examination of accounting ratios of our Company for the purposes of investment in the Issue

As on the date of this Draft Prospectus, we believe that none of the listed companies in India have a business profile and revenue streams alongwith their size, directly comparable to our Company. However, there are listed companies in India with one or more business segments that maybe common to our business. Since the listed companies may not be directly comparable to our Company, the accounting ratios of the same may not be a representative yardstick for our Company. Therefore, investors must rely on their own examination of our Company for subscribing to the Issue.

28. We have experienced negative cash flows in the past. Our inability to generate and sustain adequate cash flows in the future may adversely affect our business, results of operations and financial condition

We have experienced negative cash flows in the recent periods, the details of which, as per our restated standalone financial statements, are as follows:

Particulars	As at June 30, 2018	FY 2018	FY 2017	FY 2016
Net cash flow from Operating activities	-471.90	-17.74	30.21	-16.74
Net cash flow from Investing activities	-4.83	-1.29	-19.79	-8.52
Net cash flow from financing activities	580.32	51.52	0.09	26.75
Net increase / decrease in cash and cash equivalents	149.08	45.48	13.00	2.49

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet its capital expenditure, pay dividends, repay loans and make new investments without raising

finance from external resources. Our inability to generate and sustain adequate cash flows in the future could adversely affect our results of operations and financial condition. For further details, refer “Financial Statements” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” on pages 135 and 164, respectively.

29. We have not made any dividend payments in the past and our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditures and restrictive covenants in our financing arrangements

In the past, we have not made dividend payments to the shareholders of our Company. The amount of our future dividend payments, if any, will depend upon various factors including our future earnings, financial condition, cash flows and requirement to fund operations and expansion of the business. There can be no assurance that we will be able to declare dividends. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors. For further details, refer “Dividend Policy” on page 134.

30. Our Promoters and Promoter Group will continue to exercise control post completion of the Issue and will have considerable influence over the outcome of matters.

Upon completion of this Issue, our Promoters and Promoter Group will continue to own a majority of our Equity Shares. As a result, our Promoters will have the ability to exercise significant influence over all matters requiring shareholders’ approval. Our Promoters will also be in a position to influence any shareholder action or approval requiring a majority vote, except where they may be required by applicable law to abstain from voting. This control could also delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from obtaining control of our Company even if it is in the best interests of our Company. The interests of our Promoters could conflict with the interests of our other equity shareholders, and the Promoters could make decisions that materially and adversely affect your investment in the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoters, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. Except as disclosed in “Capital Structure” on page 56, we cannot assure you that our Promoters will not dispose of, pledge or encumber their Equity Shares in the future.

31. Our Promoters, Directors and Key Management Personnel of our Company may have interests in our Company other than reimbursement of expenses incurred or normal remuneration or benefits

Our Promoters are interested in our Company to the extent of any transactions entered into or their shareholding and dividend entitlement in us. Our Directors (other than our nominee Directors) are also interested to the extent of remuneration paid to them for services rendered as our Directors and reimbursement of expenses payable to them. Our Directors may also be interested to the extent of any transaction entered into by us with any other company or firm in which they are directors or partners or in their individual capacity. For further details, refer “Our Promoters and Promoter Group”, “Our Management” and “Related Party Transactions” on pages 126, 113 and 133, respectively.

32. Certain sections of this Draft Prospectus disclose information from an industry report and any reliance on such information for making an investment decision in the Issue is subject to inherent risks.

Certain sections of this Draft Prospectus disclose information from an industry report published by International Monetary Fund, The Associated Chambers of Commerce and Industry of India and

Indian Brand Equity Foundation. While we have taken reasonable care in the reproduction of relevant information, industry facts and other statistics have not been prepared or independently verified by us, LM or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness.

33. Our insurance coverage may not adequately protect us from all material risks and liabilities

We maintain insurance which we believe is typical in our industry in India and for amounts which we believe to be commercially appropriate for risks. However, such insurance may not be adequate to cover all our losses or liabilities that may arise from our business. Our insurance policies contain exclusions and or all limitations on coverage, as a result of which, we may not be able to successfully assert our claims for any liability or loss under the said insurance policies. Additionally, there may be various other risks and losses, specially arising out of our business agreements, for which we are not insured because such risks are either uninsurable or not insurable on commercially acceptable terms. Furthermore, there can be no assurance that in the future we will be able to maintain insurance of the types or at levels which we deem necessary or adequate or at premiums which we deem to be commercially acceptable.

The occurrence of an event for which we are not insured, where the loss is in excess of insured limits or where we are unable to successfully assert insurance claims for losses, could result in unforeseen liabilities and losses. Further, despite such unforeseen losses we may remain obligated for any future financial indebtedness or other obligations related to our business. Any such unforeseen losses or liabilities could result in an adverse effect on our business operations, financial conditions and results of operations.

34. Certain agreements may not be adequately stamped or may not have been registered as a result of which our operations may be impaired

Few of our agreements may not be adequately stamped or registered. The effect of inadequate stamping is that the document may not be admissible as evidence in legal proceedings and parties to that agreement may not be able to legally enforce the same, except after paying a penalty for inadequate stamping. The effect of non-registration, in certain cases, may make the document inadmissible in legal proceedings. Any potential dispute vis-à-vis non-compliance of local laws relating to stamp duty and registration may adversely impact the continuity of our business activity.

EXTERNAL RISK FACTORS

35. Significant differences exist between Indian GAAP and Ind AS and other accounting principles, such as IFRS and U.S. GAAP, which may be material to investors' assessments of our financial condition, result of operations and cash flows.

Our Financial Statements are for the period ended June 30, 2018 included in this Draft Prospectus are prepared and presented in conformity with Indian GAAP, and in each case, restated in accordance with the requirements of section 26 of the Companies Act read with rule 4 of Companies (Prospectus and Allotment of Securities) Rules 2014, as amended, the SEBI ICDR Regulations and the Guidance Note on "Reports in Company Prospectus (Revised 2016)" issued by the ICAI. Indian GAAP differs from Ind AS and other accounting principles with which prospective investors may be familiar in other countries, such as IFRS and U.S. GAAP. Accordingly, the degree to which the Financial Statements included in this Draft Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian GAAP.

36. The Companies Act has effected significant changes to the existing Indian company law framework, which may subject us to higher compliance requirements and increase our compliance costs.

A majority of the provisions and rules under the Companies Act have recently been notified and have come into effect from the date of their respective notification, resulting in the corresponding provisions of the Companies Act, 1956 ceasing to have effect. The Companies Act has brought into effect significant changes to the Indian company law framework, such as in the provisions related to issue of capital, disclosures in prospectus, corporate governance norms, audit matters, related party transactions, introduction of a provision allowing the initiation of class action suits in India against companies by shareholders or depositors, a restriction on investment by an Indian company through more than two layers of subsidiary investment companies (subject to certain permitted exceptions), prohibitions on loans to directors and insider trading and restrictions on directors and key managerial personnel from engaging in forward dealing. Further, companies meeting certain financial thresholds are also required to constitute a committee of the board of directors for corporate social responsibility activities and ensure that at least 2% of the average net profits of the company during three immediately preceding financial years are utilized for corporate social responsibility activities. Penalties for instances of non-compliance have been prescribed under the Companies Act, which may result in inter alia, our Company, Directors and key managerial employees being subject to such penalties and formal actions as prescribed under the Companies Act, should we not be able to comply with the provisions of the Companies Act within the prescribed timelines, and this could also affect our reputation.

To ensure compliance with the requirements of the Companies Act within the prescribed timelines, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention. While we shall endeavor to comply with the prescribed framework and procedures, we may not be in a position to do so in a timely manner.

37. General economic conditions and other factors that are beyond the control of our Company in India and globally could adversely affect the business and results of operations of our Company.

Our results of operations and financial condition depend significantly on worldwide economic conditions and the health of the Indian economy. Various factors may lead to a slowdown in the Indian or world economy which in turn may adversely impact our business, financial performance and operations.

We mainly derive revenue from our operations in India and the performance and growth of our business is significantly dependent on the performance of the Indian economy. In the past, the Indian economy has been affected by global economic uncertainties, liquidity crisis, domestic policies, global political environment, volatility in interest rates, currency exchange rates, commodity and electricity prices, volatility in inflation rates and various other regulatory factors. Accordingly, high rates of inflation in India could increase our employee costs and decrease our operating margins, which could have an adverse effect on our results of operations. Accordingly, high rates of inflation in India could increase our employee costs and decrease our operating margins, which could have an adverse effect on our results of operations.

Further the Indian economy is undergoing many changes and it is difficult to predict the impact of certain fundamental economic changes on our business. Conditions outside India, such as a slowdown or recession in the economic growth of other major countries, especially the United States, also have an impact on the growth of the Indian economy. Additionally, an increase in trade deficit, a downgrading in India's sovereign debt rating or a decline in India's foreign exchange reserves could negatively affect interest rates and liquidity, which could adversely affect the Indian economy and our business. A slowdown in the Indian economy could adversely affect the policy of the GoI towards our industry, which may in turn adversely affect our financial performance and our ability to implement our business strategy. A loss of investor confidence in other emerging market economies or any worldwide financial instability may adversely affect the Indian economy.

Any changes in the regulations including environmental laws in India and/or globally could materially and adversely affect our business and results of operations and the market price of the Equity Shares.

38. Companies operating in India are subject to a variety of taxes and surcharges

Tax and other levies imposed by the central and state governments in India that affect our tax liability include central and state taxes and other levies, income tax, goods and services tax, turnover tax, stamp duty, tax on dividends and other special taxes and surcharges which are introduced on a temporary or permanent basis from time to time. Moreover, the central and state tax scheme in India is extensive and subject to change from time to time. The central or state government may in the future increase the corporate income tax. Any such future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. Additional tax exposure could adversely affect our business, cash flows and results of operations.

39. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under the current Indian Income Tax provisions, all transactions of purchase and sales of securities on Indian stock exchanges are subject to levy of securities transaction tax (STT) which will be collected by respective stock exchange on which the securities are transacted. Accordingly, the Indian Income Tax Act has special capital gains tax provisions for all transactions of purchase and sale of equity shares carried out on the Indian Stock Exchanges as enumerated below.

Under the current Indian Income Tax provisions, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Currently, any gain realized on the sale of listed equity shares on a stock exchange held for more than twelve (12) months will not be subject to capital gains tax in India if STT has been paid on the sales transaction. The recent Finance Act amendments provided that where the equity shares have been acquired on or after October 1, 2004 on which STT has not been paid at the time of acquisition, then the exemption of long-term capital gains under Section 10(38) of the Income Tax Act would not be available. This amendment further provides that the GoI will notify certain modes of acquisition to which the recent amendment made by the Finance Act would not be applicable and the shares acquired by such modes of acquisition would continue to get the benefit under Section 10(38) of the Income Tax Act. Such modes of acquisitions, which would continue to get the benefit under Section 10(38) of the Income Tax Act have been notified by the GoI under notification no. 43/2017/F. No. 370142/09/2017-TPL on June 5, 2017.

Any gain realized on the sale of shares on a stock exchange held for a period of twelve (12) months or less will be subject to short term capital gains tax. Further, any gain realized on the sale of listed equity shares held for a period of twelve (12) months or less which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to short term capital gains tax at a relatively higher rate as compared to the transaction where STT has been paid in India.

The Ministry of Finance has in the union budget for 2018-19 proposed that any gain in excess of Rs. one (1) Lakh realized on the sale of listed equity shares on a stock exchange held for more than twelve (12) months will be subject to long term capital gains tax of 10% without allowing any benefit of indexation. However, all gains up to January 31, 2018 will be grandfathered. Capital gains arising from the sale of equity shares will be exempt from taxation in India in cases where an exemption is provided under a treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result,

residents of other countries may be liable for tax in India as well as in their own jurisdictions on gains arising from a sale of equity shares.”

40. Political instability or significant changes in the economic liberalization and deregulation policies of the Government or in the government of the states where the Company operates could disrupt its business.

The Government has traditionally exercised and continues to exercise a significant influence over many aspects of the Indian economy. The Company’s businesses, and the market price and liquidity of its securities may be affected by changes in exchange rates and controls, interest rates, government policies, taxation, social and ethnic instability and other political and economic developments in or affecting India. In recent years, India has been following a course of economic liberalization and the Company’s business could be significantly influenced by socio-economic policies followed by the Government.

However, there can be no assurance that such policies will continue in the future. The rate of economic liberalization could change, and specific laws and policies affecting foreign investment, currency exchange rates and other matters affecting investment in India could change as well.

41. Natural disasters could have a negative impact on the Indian economy and damage the Company’s facilities.

The Company’s distribution business is dependent on theatres and hence is vulnerable to natural disasters. In addition, natural disasters such as floods, earthquakes, epidemics or famines have in the past had a negative impact on the Indian economy. If any such event were to occur, the Company’s business could be affected due to the event itself or due to its inability to effectively manage the effects of the particular event. Potential effects include the damage to infrastructure and the loss of business continuity or business information. Thus, any disruption in operations of theatres could have a material adverse effect on the Company’s ability to provide films to theatres, and thus materially and adversely affect the Company. The recent currency demonetization measures imposed by the Government of India may adversely affect our business and the Indian economy.

Any anticipated measures undertaken by the GoI or any regulatory authority such as the recent demonetization measures may adversely affect our business, financial condition and results of operations.

On November 8, 2016, the GoI announced phasing out of large-denomination currency notes (Rs. 500 and Rs. 1,000, representing 86% of the total currency in circulation) as legal tender. They were immediately replaced with new Rs. 500 and Rs. 2,000 currency notes. This measure was undertaken to curb corruption, tax evasion, and counterfeiting. The withdrawal from circulation started immediately and ended on December 30, 2016. Unexpected demonetization weighed on growth in the third quarter of financial year 2016 - 17. Any such anticipated measures undertaken by the GoI or any regulatory authority may adversely affect our business, financial condition and results of operations.

42. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI or in the alternate, the pricing is in compliance with the extant provisions of the SEBI ICDR Regulations. If the transfer of shares is not in compliance with such pricing guidelines or reporting requirements or falls under any of

the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. We cannot assure investors that any required approval from the RBI or any other Government agency can be obtained on any particular terms or at all.

43. Instability in Indian and / or global financial markets could adversely affect our results of operations and financial condition.

The financial markets and the economy in India is influenced by economic and market conditions in other countries, particularly in United States of America, Asian emerging markets like Japan, Hong Kong and Singapore. Financial turmoil in global economy in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one (1) country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other markets, including United States, United Kingdom, Japan, Hong Kong and Singapore may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

44. Rights of shareholders under Indian law may differ or may be more limited than under the laws of other jurisdictions.

Shareholders' rights under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as a shareholder in India than as a shareholder of a corporation in another jurisdiction.

45. The price of the Equity Shares may be highly volatile after the Issue.

The price of the Equity Shares on the Indian stock exchanges may fluctuate after this Issue as a result of several factors, including volatility in the Indian and global securities market; our operations and performance; performance of our competitors and the perception in the market about investments in the film distribution industry; adverse media reports on us or the film distribution industry; changes in the estimates of our performance or recommendations by financial analysts; significant developments in India's economic liberalization and deregulation policies; and significant developments in India's fiscal and environmental regulations. There can be no assurance that the prices at which the Equity Shares are initially traded will correspond to the prices at which the Equity Shares will trade in the market subsequently.

46. QIBs and Non-Institutional Investors are not permitted to withdraw their Applications at any stage after submitting an Application.

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are not permitted to withdraw their Applications at any stage after submitting an Applications and are required to pay the Application Amount upon submission of the Application. Events affecting the Applicants' decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business and results of operations or financial condition may arise between the date of submission of the Application and Allotment. However, our Company may complete the Allotment of the Equity Shares even if such

events occur, and QIBs and Non-Institutional Investors would not be able to withdraw their Applications at any stage after submitting an Application.

47. There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of BSE in a timely manner or at all.

In accordance with Indian law and practice, permission for listing of the Equity Shares issued pursuant to the Issue will not be granted until after such Equity Shares have been issued and Allotted. Such approval will require all other relevant documents authorizing the issue of Equity Shares to be submitted. There could be a failure or delay in listing these Equity Shares on the SME Platform of BSE. Any failure or delay in obtaining the approval would restrict your ability to sell the Equity Shares.

48. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. WORLD BANK ON INDIAN ECONOMY

Recent Economic Developments

Poverty has declined since 2004/5 although temporary disruptions from demonetization and depressed food prices may have moderated the pace in the short term. Real GDP growth slowed to 7.1 % in FY16/17 from 8 % in FY15/16, and to 5.7 % in Q1 FY17/18. Despite the increase in public and private consumption due to the revival of rural demand after a normal monsoon and the implementation of the 7th central pay commission recommendations, overall demand slowed as investments remained weak. Excluding agriculture, output growth experienced a slowdown compared to the previous year. Construction, real estate, and manufacturing were particularly affected.

Public finances remain stable, although contingent liabilities are rising. The central government stuck to its fiscal targets in FY16/17, reaffirming fiscal credibility. The quality of expenditures at the general government level has shifted towards productive infrastructure spending in recent years, providing an additional stimulus to growth.

However, fiscal deficits at the sub-national level have risen from an aggregate of 2.6% in FY12-15 to 3.7% in FY16-17 largely because of a transfer of some public sector enterprise liabilities to direct debt of states.

Economic Outlook

Economic activity is expected to stabilize, maintaining annual GDP growth at 7.0% in FY18. Growth is projected to increase to 7.4% by FY20, underpinned by a recovery in private investments prompted by a recent increase in public capex and an improvement in the investment climate (partly due to passage of the GST and the Bankruptcy Code, and measures to attract FDI).

The biggest medium-term risks are associated with the recovery in private investments which continues to face several domestic impediments including the corporate debt overhang and regulatory and policy challenges, along with the risk of an imminent increase in US interest rates.

If there is a delay beyond eight days after we become liable to pay the amount, we shall pay interest prescribed under section 40 of the Companies Act.

Compensation to Retail Individual Investor

In terms of SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2018/22 dated February 15, 2018, any ASBA Applicant/Bidder who is a Retail Individual Investor, whose Application Form/ Bid cum Application Form has not been considered for Allotment due to the following factors:

- a) Failure on part of the SCSBs to make bids in the concerned Exchange system even after the amount has been blocked in the investors' bank account with such SCSB.
- b) Failure on part of the SCSB to process the ASBA applications even when they have been submitted within time.
- c) Any other failures on part of an SCSB which has resulted in the rejection of the application form.

shall be entitled to compensation by the SCSBs. Also, the said Applicants/Applicants have the option to seek redressal of the same within three (3) months of the date of listing of the Equity Shares of the Issuer, with the concerned SCSB. On receipt of such applications, the SCSB would be required to resolve the same within fifteen (15) days, failing which it would have to pay interest at the rate of 15 percent per annum for any delay beyond the said period of fifteen (15) days.

In the cases of the issues which are subscribed between 90-100%, i.e. non oversubscribed issues, the applicants would be compensated for all the shares which they would have been allotted.

Note: No compensation would be payable to the Applicants/Applicants who are Retail Individual Investors in case the listing price is below the issue price.

The formula for calculation of minimum fair compensation is as follows:

$$\text{Compensation} = \frac{(\text{Listing price}^* - \text{Issue Price}) \times \text{No. of shares that would have been allotted if bid was successful}}{\text{Probability of allotment of shares determined on the basis of allotment successful}}$$

**Listing price shall be taken as the highest of the opening prices on the day of listing across the recognized stock Exchanges*

A reference chart for calculation of minimum compensation in case of non-allotment of specified securities to Retail Individual Investors in an IPO is as under:

Example - Security A

Issue Price : 300

Listing Price: 325

Minimum Bid lot: 20 shares

Total No. of Applications received from RII	No. of Equity Shares applied in all valid applications	No. of Shares Reserved for RIIs	No. of times Subscribed
(A)	(B)	(C)	(D) = B/C
2,00,000	3,28,00,000	35,00,000	9.37

In this case maximum possible allottees is $35,00,000 / 20 = 1,75,000$

The basis of allotment is determined by Lead Managers in consultation with the Stock Exchanges as under:

No. of Lots	No. of Shares at each lot	No. of retail Investors applying at each lot	Total No. of Shares applied for at each lot	No. of investors who shall receive minimum bid-lot (to be selected on lottery)	Allotment Ratio Determined	No. of shares allotted per allottee (minimum lot size)
A	B	C	D = (B*C)	E	F=E:C	G
1.	20	10,000	2,00,000	8,750 = (175000/200000)*10000	7:8	20
2.	40	10,000	4,00,000	8,750	7:8	20
3.	60	10,000	6,00,000	8,750	7:8	20
4.	80	10,000	8,00,000	8,750	7:8	20
5.	100	20,000	20,00,000	17,500	7:8	20
6.	120	20,000	24,00,000	17,500	7:8	20
7.	140	15,000	21,00,000	13,125	7:8	20
8.	160	20,000	32,00,000	17,500	7:8	20
9.	180	10,000	18,00,000	8,750	7:8	20
10.	200	15,000	30,00,000	13,125	7:8	20
11.	220	10,000	22,00,000	8,750	7:8	20
12.	240	10,000	24,00,000	8,750	7:8	20
13.	260	10,000	26,00,000	8,750	7:8	20
14.	280	5,000	14,00,000	4,375	7:8	20
15.	300	15,000	45,00,000	13,125	7:8	20
16.	320	10,000	32,00,000	8,750	7:8	20
	Total	2,00,000	3,28,00,000	1,75,000		

In this case if the number of shares applied by an applicant whose bid was unsuccessful due to failure/error on part of SCSB is 20 shares or multiples thereof, then the minimum compensation is calculated as under:

$$\text{Compensation} = (\text{Rs.}325 - \text{Rs.}300) * 20 * (7/8) = \text{Rs.}437.50$$

INDUSTRY OVERVIEW

WORLD ECONOMY OVERVIEW

World growth strengthened in 2017 to 3.8 percent, with a notable rebound in global trade. It was driven by an investment recovery in advanced economies, continued strong growth in emerging Asia, a notable upswing in emerging Europe, and signs of recovery in several commodity exporters. Global growth is expected to tick up to 3.9 percent this year and next, supported by strong momentum, favorable market sentiment, accommodative financial conditions, and the domestic and international repercussions of expansionary fiscal policy in the United States.

In emerging market and developing economies, in contrast, growth will remain close to its 2018–19 level as the gradual recovery in commodity exporters and a projected increase in India’s growth provide some offset to China’s gradual slowdown and emerging Europe’s return to its lower-trend growth rate. Nevertheless, 40 emerging market and developing economies are projected to grow more slowly in per capita terms than advanced economies, failing to narrow income gaps vis-à-vis the group of more prosperous countries.

At 3.8 percent, global growth last year was 1/2 percentage point faster than in 2016 and the strongest since 2011. Two-thirds of countries accounting for about three-fourths of global output experienced faster growth

in 2017 than in the previous year (the highest share of countries experiencing a year-over-year growth pickup since 2010). The preliminary outcome for global growth in 2017 was 0.2 percentage point stronger than forecast in the October 2017 World Economic Outlook (WEO), with upside surprises in the second half of 2017 in advanced as well as emerging market and developing economies.

Resurgent investment spending in advanced economies and an end to the investment decline in some commodity-exporting emerging market and developing economies were important drivers of the uptick in global GDP growth and manufacturing activity (Figure 1.1)

Figure 1.2. Contributions to the Change in Real GDP Growth, 2016–17

growth pickup in 2017. Higher fixed investment growth (2.3 percentage points above its 2016 level) also supported the growth performance of other emerging market and developing economies, alongside stronger private consumption.

Indian Economy Overview

Introduction

India has emerged as the fastest growing major economy in the world as per the Central Statistics Organisation (CSO) and International Monetary Fund (IMF) and it is expected to be one of the top three economic powers of the world over the next 10-15 years, backed by its strong democracy and partnerships. India's GDP is estimated to have increased 6.6 per cent in 2017-18 and is expected to grow 7.3 per cent in 2018-19.

Market size

India's gross domestic product (GDP) at constant prices grew by 7.2 per cent in September-December 2017 quarter as per the Central Statistics Organisation (CSO). Corporate earnings in India are expected to grow by 15-20 per cent in FY 2018-19 supported by recovery in capital expenditure, according to JM Financial.

The tax collection figures between April 2017- February 2018 show an increase in net direct taxes by 19.5 per cent year-on-year and an increase in net direct taxes by 22.2 per cent year-on-year.

India has retained its position as the third largest startup base in the world with over 4,750 technology startups, with about 1,400 new start-ups being founded in 2016, according to a report by NASSCOM.

- Across advanced economies, the 0.6 percentage point pickup in 2017 growth relative to 2016 is explained almost entirely by investment spending, which remained weak since the 2008–09 global financial crisis and was particularly subdued in 2016 (Figure 1.2, left column). Both stronger gross fixed capital formation and an acceleration in stock building contributed to the pickup in investment, with accommodative monetary policy, stronger balance sheets, and an improved outlook helping release pent-up demand for capital goods.

- Across emerging market and developing economies, the 0.4 percentage point pickup in 2017 growth came primarily from an acceleration in private consumption (Figure 1.2, right column). But the picture is mixed within the group. Growth in China and India last year was supported by resurgent net exports and strong private consumption, respectively, while investment growth slowed. An end to fixed investment contractions in commodity-exporting countries that were severely affected by the commodity price downturn during 2015–16 (notably Brazil and Russia, but also Angola, Ecuador, and Nigeria) instead played an important role in their

India's labour force is expected to touch 160-170 million by 2020, based on rate of population growth, increased labour force participation, and higher education enrolment, among other factors, according to a study by ASSOCHAM and Thought Arbitrage Research Institute.

WORLD BANK ON INDIAN ECONOMY

Real GDP slowed growth this past quarter but overall annual growth for fiscal year 2017/18 is expected to rebound to an annual rate of 7.0 %. Public finances remain stable, though there has been an increase in sub-national debt levels. The key medium-term risk is the need for recovery in private investment.

Recent Economic Developments

Poverty has declined since 2004/5 although temporary disruptions from demonetization and depressed food prices may have moderated the pace in the short term. Real GDP growth slowed to 7.1 % in FY16/17 from 8 % in FY15/16, and to 5.7 % in Q1 FY17/18. Despite the increase in public and private consumption due to the revival of rural demand after a normal monsoon and the implementation of the 7th central pay commission recommendations, overall demand slowed as investments remained weak. Excluding agriculture, output growth experienced a slowdown compared to the previous year. Construction, real estate, and manufacturing were particularly affected.

Poverty has declined since 2004/05 although short-term disruptions from demonetization and depressed food prices may have moderated the pace. Evidence suggests that demand for social insurance (MGNREGS) increased during demonetization.

External accounts remain robust. Export growth turned positive in FY16/17, supported largely by a reversal in commodity prices and improvements in global trade. Imports have begun a gradual recovery; the merchandise trade deficit is rising. Overall capital flows gained momentum, due to ease in FDI policies and continued global liquidity. Foreign reserves rose to \$386bn or 8.6 months of imports. The currency appreciated in 2017, in sync with many other emerging economies, partly due to US dollar weakening.

Public finances remain stable, although contingent liabilities are rising. The central government stuck to its fiscal targets in FY16/17, reaffirming fiscal credibility. The quality of expenditures at the general government level has shifted towards productive infrastructure spending in recent years, providing an additional stimulus to growth. However, fiscal deficits at the sub-national level have risen from an aggregate of 2.6% in FY12-15 to 3.7% in FY16-17 largely because of a transfer of some public sector enterprise liabilities to direct debt of states.

Economic Outlook

Economic activity is expected to stabilize, maintaining annual GDP growth at 7.0% in FY18. Growth is projected to increase to 7.4% by FY20, underpinned by a recovery in private investments prompted by a recent increase in public capex and an improvement in the investment climate (partly due to passage of the GST and the Bankruptcy Code, and measures to attract FDI).

Inflation and external conditions are expected to remain stable. Supported by RBI's inflation targeting policy, two consecutive years of normal monsoons will further stabilize prices and offset any increase in global oil prices. The dollar-rupee exchange rate has appreciated, further adding to a low inflation scenario.

The biggest medium-term risks are associated with the recovery in private investments which continues to face several domestic impediments including the corporate debt overhang and regulatory and policy challenges, along with the risk of an imminent increase in US interest rates.

HEALTH CARE INDUSTRY IN INDIA

It has been predicted that India with increased digital adoption, the Indian healthcare market, which is worth around US\$ 100 billion, will likely grow at a CAGR of 23 per cent to US\$ 280 billion by 2020.

GLOBAL DIETARY SUPPLEMENTS AND NUTRACEUTICAL INDUSTRY

Nutraceuticals refer to food or part of a food, including beverages and food products that provide incremental medical or health benefits, including prevention or treatment of a disease. It spans across

The global nutraceutical industry, valued at US\$ 182.6 bn in 2015, is one of the fastest growing industries today and expected to expand at a CAGR of 7.3% from 2015 to 2021.

Currently, the United States, Europe and Japan account for most (93%) of the total global nutraceutical market. The market, however, seems to have attained maturity in all the three regions. Therefore, the nutraceutical industries across the world are now turning their attention to emerging markets like India and China.

Globally, Nutraceuticals market is expected to witness huge growth. At the turn of the millennium, between 1999 and 2002, the industry grew at a CAGR of 7%. Subsequently till 2010, it doubled to 14%. Currently every year \$12-15 Bn is being added to the global revenue. The US and Japan have been pioneers in embracing Nutraceuticals. Western Europe also represents a large market, with strong footprints in Germany, Italy and France. Developing markets like India, Brazil and China are relatively smaller, yet have a huge growth opportunity. Indian market currently has a 2-3% share of the global market.

INDIAN NUTRACEUTICAL MARKET

The Indian Nutraceuticals market is expected to grow from \$ 4 Bn in 2015 to \$ 10 Bn in 2022. This represents a huge growth of 21% growth annually.

Consumer Segments

India represents a huge and vast market for Nutraceuticals as almost every segment has a need for some form of Nutraceuticals. Some segments have a more pronounced need for Nutraceuticals among others

1. Growing children needs Functional food and beverage supplement to be able to perform well in academics and extra-curricular well

3. Pregnant and lactating mothers need to supplement their nutrition need
4. Ages 60+ group are specifically vulnerable to Diabetes, Bone related diseases and other ailments and needs special preventive protection through Nutraceuticals.

Dietary supplements – Overview

Trends

Changing trends dosage forms

Nutraceutical ingredients have typically been positioned as natural and healthy alternatives to allopathic medicines. However, one of the primary challenges being faced by these products is the difficulty in formulating these products using the right dosage form. Besides, flavor and fragrance masking, the dosage forms also need to increase the stability of ingredients in the final product. But lately consumers are seeking more variety and benefits from delivery methods beyond those possible through traditional (tablet and capsule) technologies. As a result, the formulator needs to work far harder to cater to increasing consumer demands. As the nutraceutical industries look to carve a niche of their own and create a differentiated product, an important trend is the growth and diversity of new dosage formulations. As a result, traditional tablets and chewables are slowly being replaced by capsules, particularly liquid-filled capsules.

Capsules: A suitable choice for consumers and manufacturers

The shift toward capsule formulation is consumer driven. Consumers prefer dosage forms like capsules as they are easier to swallow. Capsules, especially liquid-filled capsules, are also considered to work faster and better. For nutraceutical companies, capsules make for an ideal formulation as it requires fewer excipients and manufacturing steps, enables faster development, and offers more formulation flexibility. In addition, capsule formulations offer brand recognition in a crowded nutraceutical products market.

The Indian Registration Act, 1908 (“Registration Act”)

The Indian Registration Act, 1908 “Registration Act” details the formalities for registering an instrument. Section 17 of the Registration Act identifies documents for which registration is compulsory and includes, inter alia, any non- testamentary instrument which purports or operates to create, declare, assign, limit or extinguish, whether in the present or in future, any right, title or interest, whether vested or contingent, in immovable property of the value of Rs. 100 or more, and a lease of immovable property for any term exceeding one year or reserving a yearly rent. The Registration Act also stipulates the time for registration, the place for registration and the persons who may present documents for registration.

Any document which is required to be compulsorily registered but is not registered will not affect the subject property, nor be received as evidence of any transaction affecting such property (except as evidence of a contract in a suit for specific performance or as evidence of part performance of a contract under the TP Act or as evidence of any collateral transaction not required to be effected by registered instrument), unless it has been registered.

The Competition Act, 2002

The Competition Act, 2002 prohibits anti- competitive agreements, abuse of dominant positions by enterprises and regulates “combinations” in India. The Competition Act also established the Competition Commission of India (the “CCI”) as the authority mandated to implement the Competition Act. The provisions of the Competition Act relating to combinations were notified recently on March 4, 2011 and came into effect on June 1, 2011. Indian Contract Act 1872

The Indian Contract Act, 1872 (“Contract Act”) codifies the way in which a contract may be entered into, executed, implementation of the provisions of a contract and effects of breach of a contract. A person is

free to contract on any terms he chooses. The Contract Act consists of limiting factors subject to which contract may be entered into, executed and the breach enforced. It provides a framework of rules and regulations that govern formation and performance of contract. The contracting parties themselves decide the rights and duties of parties and terms of agreement. The Act determines the circumstances in which promise made by the parties to a contract shall be legally binding on them. Each contract creates some right and duties upon the contracting parties. Indian contract deals with the enforcement of these rights and duties upon the parties. As per the provisions of the Indian Contract Act all agreements are contracts if they are made by the free consent of the parties competent to contract, for a lawful consideration and with a lawful object and are not expressly declared to be void. The parties to a contract must either perform or offer to perform their respective promises unless such performance is dispensed with or excused under the provisions of the Act or of any other law. When a contract has been broken the party who suffers by such breach is entitled to receive from the party who has broken the contract, compensation for any loss or damage caused to him thereby, which naturally arose in the usual course of things from such breach or which the parties knew, when they made the contract, to be likely to result from the breach of it. The Indian Contract Act also lays down provisions of indemnity, guarantee, bailment and agency. Provisions relating to sale of goods and partnership which were originally in the act are now subject matter of separate enactments viz., the Sale of Goods Act and the Indian Partnership Act.

Foreign Trade (Development and Regulation) Act, 1992 (“FTA”)
