4. If we are not able to obtain, renew or maintain the statutory and regulatory permits and approvals required to operate our business it may have a material adverse effect on our business.

We require certain statutory and regulatory approvals, licenses, registrations and permissions and applications need to be made at the appropriate stages for our business to operate. There can be no assurance that the relevant authorities will issue these approvals or licenses, or renewals thereof in a timely manner, or at all.

Further, some of these approvals are granted for fixed periods of time and need renewal from time to time. We are required to renew such permits, licenses and approvals. Further, certain licenses and registrations obtained by our Company contain certain terms and conditions, which are required to be complied with by us. Any default by our Company in complying with the same, may result in inter alia the cancellation of such licenses, consents, authorizations and/or registrations, which may adversely affect our operations. There can be no assurance that the relevant authorities will issue or renew any of such permits or approvals in time or at all. Failure to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations, or penal action be taken against our company and its officers in default and may have a material adverse effect on our business. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change, we may incur increased costs, be subject to penalties or suffer a disruption in our business activities, any of which could adversely affect our results of operations.

Further, the company has not yet taken registration for Professional Tax in the name of Diksha Green Limited. The registration is in the name of Diksha Timber Private Limited.

Moreover, the company has not yet received any approval, license to run the newly acquired cold storage. Any delay in getting approvals to run the cold storage may delay the operation and revenue generation from cold storage.

5. The Registered Office of Our Company is not owned by us.

We operate from our registered office situated at 11 Sambhu Chatterjee Street, Jorasanko Kolkata-700007, West Bengal, India. The registered office of our Company belongs to M/s. Murarka Properties Private Limited and we have taken the same on lease and license basis from him. The lease and license agreement is between the property owner and Mr. Rajesh Pirogiwal & Mrs. Sunita Pirogiwal (promoter director of DGL). Any discontinuance of such arrangement will lead us to locate to any other premises. Our inability to identify the new premises may adversely affect the operations, finances and profitability of our Company.

6. Our business could be adversely affected in case of technical failures of key utility infrastructure such as Power, Water, Machinery Failure etc.

Being a cold storage facility, we are required to create temperatures within in the storage facility in a particular range during the year by keeping the cooling systems on for 24 hours. Our operations are hence significantly dependent on adequate and timely delivery of electricity from the State Electricity Board of West Bengal. We cannot control the availability of power and shortages if any in power requirements would have to be met through the captive stand-by power arrangement in form of DG Sets installed at the unit. The usage of D.G. Sets would increase our power costs and hence affect our profitability. Sustained technical failure in the DG Sets system as well as Government Power at the same time and our inability to arrange for stand-by power from other sources could result in us not being able to maintain the requisite temperatures and hence could damage the produce.

Further, water is required was humidifiers and human living purpose. The water is currently sourced from ground through pump sets. Certain aspects which are beyond our control could lead to a technical failure of the pump sets and other water systems related infrastructure affecting our cooling systems would lead to us incurring additional repair and maintenance costs and sustained problem with respect to the same could lead to our inability to maintain the requisite humidity controls and hence could damage the produce.

Also, other installed machinery such as Compressors, Air Cooling Systems, Fans, valves etc. could also experience technical failure and hence affect our maintenance costs as well as lead to damage of produce.

7. Our business is seasonal in nature and hence our operating results for different periods may not be comparable.

Fruits and vegetables are harvested in different seasons and so our business is seasonal in nature. So our operating results for different periods may not be comparable and hence could adversely affect the valuation and prices of our equity shares in the future.

8. We rely on third party labour for a major portion of our unskilled labour activities

We require significant number of unskilled labour at our facility for the loading, unloading, weighing, sorting etc. of agricultural products. We do not employ any such labour on our fixed payroll. Our in-house labour is responsible to supervise their activities and ensure that no damage is done by them to our facility as well as goods. Since, we do not have these labours on our pay-roll and we cannot contractually control them, we are unable to assure continued availability of the same or we may experience to disputes or other problems with local work force. This may result in our operations and customer dissatisfaction thus adversely affecting our goodwill and future revenues.

21. **We require high working capital for our smooth day to day operations of business and any discontinuance or our inability to acquire adequate working capital timely and on favourable terms may have an adverse effect on our operations, profitability and growth prospects.**

Our business demands substantial funds towards working capital requirements. In case there are insufficient cash flows to meet our working capital requirement or we are unable to arrange the same from other sources or there are delays in disbursement of arranged funds, or we are unable to procure funds on favourable terms, it may result into our inability to finance our working capital needs on a timely basis which may have an adverse effect on our operations, profitability and growth prospects.

22. **We are dependent on our main Promoter, Mr. Rajesh Pirogiwal for their expertise and market goodwill. Our separation, if any, from our Promoters may adversely affect our business.**

Our main promoter Mr. Rajesh Pirogiwal has vast experience. We benefit from our relationship with our Promoters and our success depends upon the continuing services of our Promoters who have been responsible for the growth of our business and are closely involved in the overall strategy, direction and management of our business. Our Promoters have been actively involved in the day to day operations and management since the incorporation of the Company. Accordingly, our Group performance is heavily dependent upon the services of our Promoters. If our main Promoter is unable or unwilling to continue in their present position, we may not be able to replace him easily or at all. Hence, we have not appointed a monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds.

Further, our Company shall inform about material deviations in the utilization of Issue proceeds to BSE Limited and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

Further, we propose to utilize the Net Proceeds for purposes identified in the chapter titled —*Objects of the Issue* and the manner of deployment and allocation of such funds is entirely at the discretion of our management and our Board, subject to compliance with the necessary provisions of the Companies Act.

24. **Our Company had negative cash flow in recent fiscals, details of which are given below. Sustained negative cash flow could adversely impact our business, financial condition and results of operations. Further, we have incurred losses in the previous Financial Years and may continue to incur losses for upcoming financial years.**

The detailed break up of cash flows is summarized in below mentioned table and our Company has reported negative cash flow in certain financial years and which could affect our business and growth:

Particulars	30-09-2018	31-03-2018	31-03-2017	31-03-2016	31-03-2015	31-03-2014

25. **We have entered into certain related party transactions and may continue to do so.**

We have entered into related party transactions with our Promoters, its group members/ entities, Directors and other associates. While we believe that all such transactions have been conducted on arm length basis, however it is difficult to ascertain whether more favourable terms would have been achieved had such transactions been entered with unrelated parties. Furthermore, it is likely that we will continue to enter into related party transactions in the near future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation. For further details regarding the related party transactions, see the disclosure on related party transactions contained in the financial statements included in this Prospectus and, also see the section "*Related Party Transactions*" on page no. 158.

26. **Our success depends largely on our senior management and our ability to attract and retain our key personnel**

Our success depends on the continued services and performance of the members of our management team and other key employees. Competition for senior management in the industry is intense, and we may not be able to retain our existing senior management or attract and retain new senior management in the future. The loss of the services of our Promoter could seriously impair our ability to continue to manage and expand our business. Further, the loss of any other member of our senior management or other key personnel may adversely affect our business, results of operations and financial condition. We do not maintain keyman life insurance for our Promoter, senior members of our management team or other key personnel

27. **Any involvement in certain legal proceedings with our Directors and Promoters, which, if determined adversely, may adversely affect our business and financial condition.**

Our Company may in the future be, implicated in lawsuits in the ordinary course of our business, including lawsuits and arbitrations involving compensation for loss due to various reasons including tax matters, civil disputes, labour and service matters, statutory notices, regulatory petitions, consumer cases and other matters. Any Litigation or arbitration could result in substantial costs and a diversion of effort by us and/or subject us to significant liabilities to third parties. In addition, our Company is subject to risks of litigation including public interest litigation, contract, employment related, personal injury and property damage. Our Company cannot provide any assurance that these legal proceedings will be decided in our favour. Any adverse decision may have a significant effect on our business including the financial condition of our Company, delay in implementation of our current or future project and results of operations. There can be no assurance that the results of such legal proceedings will not materially harm our business, reputation or standing in the marketplace or that our Company will be able to recover any losses incurred from third parties, regardless of whether our Company is at fault or not. There can be no assurance that losses relating to litigation or arbitration will be covered by insurance, that any such losses would not have a material adverse effect on the results of our operations or financial condition, or that provisions made for litigation and arbitration related losses would be sufficient to cover our ultimate loss or expenditure. Details of outstanding proceedings that have been initiated against our Company, our Promoters, our Group Companies and our Directors are set forth in the chapter titled "*Outstanding Litigation and Material Developments*" starting from page no. 173 of this Prospectus.

28. **Delay in raising funds from the IPO could adversely impact the implementation schedule.**

The proposed expansion, as detailed in the chapter titled "*Objects of the Issue*" is to be largely funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute the expansion process within the given timeframe, or within the costs as originally estimated by us. Any time overrun or cost overrun may adversely affect our growth plans and profitability.

29. **Upon completion of the Issue, our Promoters / Promoter Group may continue to retain significant control, which will allow them to influence the outcome of matters submitted to the shareholders for approval.**

After completion of the Issue, our Promoters and Promoter Group will collectively own 55.00% of the total Equity Shares. As a result, our Promoters together with the members of the Promoter Group will be able to exercise a significant degree of influence over us and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

30. **Our actual results could differ from the estimates and projections used to prepare our financial statements.**

The estimates and projections are based on and reflect our current expectations, assumptions and/ or projections as well as our perception of historical trends and current conditions, as well as other factors that we believe are appropriate and reasonable under the circumstances. There can be no assurance that our expectations, estimates, assumptions and/or projections, including with respect to the future earnings and performance will prove to be correct or that any of our expectations, estimates or projections will be achieved.

31. **Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.**

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see the chapter titled "*Dividend Policy*" beginning on page no. 134 of this Prospectus.

32. **Any future issuance of Equity Shares may dilute your shareholdings, and sale of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.**

Any future equity issuances by our Company may lead to the dilution of investors' shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

33. **The Issue Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.**

The Issue price is based on numerous factors. For further information, see the chapter titled —*Basis for Issue Price* beginning on page no. 74 of this Prospectus and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price are:

- Quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

34. **Any future acquisitions, joint ventures, partnerships, strategic alliances, tie-ups or investments could fail to achieve expected synergies and may disrupt our business and harm our financial condition and operating results.**

Our success will depend, in part, on our ability to expand our business in response to changing technologies, customer demands and competitive pressures. We have, in the past, explored and continue to explore opportunities on our own, or through tie-ups, acquisitions, strategic alliances, partnerships or joint ventures across countries and regions of focus. In some circumstances, we may also decide to acquire, or invest in, complementary technologies instead of internal development. While we are currently evaluating opportunities and speaking to several potential partners, we have not entered into any definitive agreements in relation to this. Further, the identification of suitable acquisition can be difficult, time-consuming and costly, and we may not be able to successfully complete acquisitions that we target in the future. The risks we face in connection with acquisitions may include integration of product and service offerings, co-ordination of R&D and sales and marketing functions and the diversion of management time and focus from operating our business to addressing acquisition integration challenges. Our failure to address these risks or other problems encountered in connection with our acquisitions and investments could cause us to fail to realise the anticipated benefits of these acquisitions or investments, cause us to incur unanticipated liabilities, and harm our business generally.

35. **Managing employee benefit pressures in India may prevent us from sustaining our competitive advantage which could adversely affect our business prospects and future financial performance.**

Employee benefits represent a major expense for us and our ability to maintain or reduce such costs is critical for our business operations. We may be required to increase employee compensation levels to remain competitive and manage attrition, and consequently we may need to increase the prices of our products and services. An increase in wages/salaries paid to our employees may result in a material adverse effect on our profits in the event that we are unable to pass on such increased expenditure to our users or customers without losing their business to our competitors. Likewise, if we are unable to sustain or increase the number of employees as necessary to meet growing demand, our business, financial condition and results of operations could be adversely affected.

36. **We may become a target for public scrutiny, including complaints to regulatory agencies, negative media coverage, including social media and malicious reports, all of which could severely damage our reputation and materially and adversely affect our business and prospects.**

Post Listing we will be subjected to several regulatory filings and public scrutiny. Since we will be constantly under the public view, there is possibility of complaints to regulatory agencies, negative media coverage, including social media and malicious reports, all of which could severely damage our reputation and materially and adversely affect our business and prospects.

37. **We may not be able to secure sufficient financing on favourable terms, or at all, to meet our future capital needs.**

In the future, we may require additional capital to pursue business opportunities or acquisitions or respond to challenges, competition and unforeseen circumstances. We may also decide to engage in equity or debt financings or enter into credit facilities for other reasons. We may not be able to secure debt or equity financing in a timely manner, on favourable terms, or at all. Any debt financing obtained by us in the future could involve restrictive covenants relating to our capital raising activities and other financial and operational matters, which may make it more difficult for us to obtain additional capital and to pursue business opportunities, including potential acquisitions.

EXTERNAL RISK FACTORS:

1. Exchange Rate Fluctuations may have impact on the performance of the Company.

The Company is exposed to exchange rate fluctuations. Uncertainties in the global financial market may have an adverse impact on the exchange rate between Rupee vis-à-vis other currencies. The exchange rate between the Rupee and other currencies is variable and may continue to fluctuate in the future. Such fluctuations can have a serious impact on the cost structure of the Company.

2. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, change in regulatory framework, inflation, deflation, foreign exchange fluctuations, consumer credit availability, consumer debt levels, unemployment trends, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, and other matters that influence consumer confidence, spending and tourism.

3. The Government of India had recently implemented certain currency demonetization measures, which may affect the Indian economy and our business, results of operations, financial condition and prospects.

On November 8, 2016, the RBI and the Ministry of Finance of the GoI withdrew the legal tender status of ₹500 and ₹1,000 currency notes pursuant to notification dated November 8, 2016. The short-term impact of these developments has been, among other things, a decrease in liquidity of cash in India. There is uncertainty on the medium- and long-term impact of this action. The medium- and long-term effects of demonetization on the Indian economy and our business are uncertain and we cannot accurately predict its effect on our business, results of operations, financial condition and prospects.

4. Any changes in the regulatory framework could adversely affect our operations and growth prospects

Our Company is subject to various regulations and policies. For details see Section titled, **Key Industry Regulations and Policies**, beginning on page no. 105 of this Prospectus. Our business and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse effect on our business, financial condition and results of operations.

5. Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

6. The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.

Prior to this Issue, there has been no public market for our Equity Shares. The trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets and Finance industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnership, joint ventures, or capital commitments.

7. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price*

Our Issue price is based on Fixed Price. This price is based on numerous factors (For further information, please refer Section titled, **Basis for Issue Price**, beginning on page 74 of this Prospectus) and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts; Speculation in the press or investment community;

- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

8. *There are restrictions on daily/weekly/monthly movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time*

Once listed, we would be subject to circuit breakers imposed by all stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time, and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

9. *Civil unrest, acts of violence including terrorism or war involving India and other countries could materially and adversely affect the financial markets and our business.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Terrorist attacks and other acts of violence may adversely affect the Indian stock markets, where our Equity Shares will trade, and the global equity markets generally.

10. *The proposed adoption of IFRS could result in our financial condition and results of operations appearing materially different than under Indian GAAP.*

Public companies in India, including us, may be required to prepare annual and interim financial statements under IFRS in accordance with the roadmap for the adoption of, and convergence with, IFRS announced by the Ministry of Corporate Affairs, GoI(MCA), through a press note dated January 22, 2010. The MCA through a press release dated February 25, 2011, announced that it will implement the converged accounting standards in a phased manner after various issues including tax-related issues are resolved. The MCA is expected to announce the date of implementation of the converged accounting standards at a later date. Our financial condition, results of operations, cash flows or changes in shareholders' equity may appear materially different under IFRS than under Indian GAAP. This may have a material adverse effect on the amount of income recognized during that period and in the corresponding period in the comparative fiscal year/period. In addition, in our transition to IFRS reporting, we may encounter difficulties in the ongoing process of implementing and enhancing our management information systems. Moreover, our transition may be hampered by increasing competition and increased costs for the relatively small number of IFRS-experienced accounting personnel available as more Indian companies begin to prepare IFRS financial statements.

11. *Economic developments and volatility in securities markets in other countries may cause the price of the Equity Shares to decline.*

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investor's reactions to developments in one country may have adverse effects on the market price of securities of companies situated in other countries, including India. For instance, the recent financial crisis in the United States and European countries lead to a global financial and economic crisis that adversely affected the market prices in the securities markets around the world, including Indian securities markets. Negative economic developments, such as rising fiscal or trade deficits, or a default on national debt, in other emerging market countries may affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general. The Indian stock exchanges have experienced temporary exchange closures, broker defaults, settlement delays and strikes by brokerage firm employees. In addition, the governing bodies of the Indian stock exchanges have, from time to time, imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. Furthermore, from time to time, disputes have occurred between listed companies and stock exchanges and other regulatory bodies, which in some cases may have had a negative effect on market sentiment.

12. *The Companies Act, 2013, has effected significant changes to the existing Indian company law framework, which may subject us to higher compliance requirements and increase our compliance costs.*

A majority of the provisions and rules under the Companies Act, 2013, have recently been notified and have come into effect from the date of their respective notification, resulting in the corresponding provisions of the Companies Act, 1956, ceasing to have effect. The Companies Act, 2013, has brought into effect significant changes to the Indian company law framework, such as in the provisions related to issue of capital, disclosures in prospectus/ prospectus, corporate governance norms, audit matters, related party transactions, introduction of a provision allowing the initiation of class action suits in India against companies by shareholders or depositors, a restriction on investment by an Indian company through more than two layers of subsidiary investment companies (subject to certain permitted exceptions), prohibitions on loans to directors and insider trading and restrictions on directors and key managerial personnel from engaging in forward dealing. To ensure compliance with the requirements of the Companies Act, 2013, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention.

13. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

14. The nationalized goods and services tax (GST) regimes implemented by the Government of India have impact on our operations.

The Government of India has from July 01, 2017, has implemented the Goods and Service Tax a comprehensive national goods and service tax (GST) regime that combines taxes and levies by the Central and State Governments into a unified rate structure.

15. We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and trading industry contained in the Prospectus.

While facts and other statistics in the Prospectus relating to India, the Indian economy has been based on various government publications and reports from government agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the Section titled, **Industry Overview**, beginning on page no 79 of the Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

16. Conditions in the Indian securities market may affect the price or liquidity of our Equity Shares.

The Indian securities markets are smaller than securities markets in more developed economies and the regulation and monitoring of Indian securities markets and the activities of investors, brokers and other participants differ, in some cases significantly, from those in the more developed economies. Indian stock exchanges have in the past experienced substantial fluctuations in the prices of listed securities. Further, the Indian stock exchanges have experienced volatility in the recent times. The Indian stock exchanges have also experienced problems that have affected the market price and liquidity of the securities of Indian companies, such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading and limited price movements. A closure of, or trading stoppage on the SME Platform of BSE could adversely affect the trading price of the Equity Shares.

17. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic, social and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

18. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

19. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.*

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

20. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

21. *Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

OVERVIEW OF INDIAN ECONOMY

India, the world's third largest economy in terms of its PPP (purchasing power parity) and with a population of over 1.2 billion, has witnessed significant economic growth since the country was liberalized in early 1990s. Industrial deregulation, divestment of state-owned enterprises, and reduced Governmental controls on foreign trade and investment, served to accelerate the country's growth and India has posted an average of 7% GDP growth since the beginning of this millennium. According to IMF, India's GDP was estimated at 6.7% in 2017 and it is projected to jump to 7.4% in 2018 and 7.8% in 2019.

India Ratings (Ind-Ra) expects economic recovery to become more broad-based in FY19 with both consumption and investment providing support to economic growth. The four GDP growth drivers from the demand side are private final consumption expenditure (PFCE), government final consumption expenditure (GFCE), gross fixed capital formation (GFCF) and net exports (NE). In the last few years, only PFCE and GFCE have demonstrated sustained and robust growth. Although exports growth picked up in FY18 (till December, 2017), hardening of commodity prices, particularly crude, has led to imports growth outpacing exports growth in FY18.

Ind-Ra expects PFCE to grow at 6.8% in FY19. PFCE grew at an average rate of 6.9% during FY14-FY18, despite two consecutive years of monsoon failure in 2014 and 2015, due to favourable demographic and inflation factors. Given the demographic composition, a large number of people are entering the workforce every year. Assuming only a fraction of them get gainful employment (anecdotal evidence suggests that while about 10-12 million people are entering working-age population every year, only about 3.7 million jobs are created annually), the numbers are still staggering, resulting in a significant impact on consumption. Moreover, sustained expansion of the middle class in India is fuelling growth in

consumption. Also, consumer price index (CPI) based inflation, which averaged 9.8% during FY12-FY14, plunged to 5.9% in FY15, and since then has declined to 4.9% in FY16 and 4.5% in FY17; it is expected to decline further to 3.6% in FY18. Such a sharp decline in the CPI inflation is largely driven by collapse of global commodity prices, particularly crude.

Ind-Ra expects GFCE to grow at 8.1% in FY19. Given the size of the government machinery, a significant proportion of demand in the economy is created/generated on account of government expenditure. Also, governments across the globe have been found to step up their expenditure, if need arises, to boost the aggregate demand in the economy. As this was the case in the aftermath of 2008 global financial crisis, even in India, government consumption expenditure grew at an average 11.3% during FY08-FY10 vis-à-vis an average of 4.9% during FY04-FY07. With private investment faltering, the government has again stepped up its spending to support growth. As a result, GFCE grew at an average 10.6% during FY15-FY18 compared to 0.6% during FY14. However, capex spending by the government alone will not be sufficient to step-up investment/GDP ratio in the economy.

Ind-Ra expects investment as measured by GFCF to grow at 6.5% in FY19. This certainly is an improvement over GFCF growth of 2.4% in FY17 and 4.5% in FY18, but is nowhere close to GFCF growth of 16.2% witnessed during FY04-FY08. There is a strong correlation between the GDP growth and investment. With GFCF growth faltering and clocking an average growth of 3.7% during FY14-FY18, the GDP growth during the same period averaged 7.1%. In fact, due to the slowdown in GFCF growth, particularly private corporates and households, the GDP growth has failed to accelerate and sustain itself close to or in excess of 8.0%. Private corporate sector investment grew at an average 48.1% during FY05-FY08. Ind-Ra's study of top 200 listed and unlisted non-financial asset-heavy corporates suggests that private sector capex revival is likely to remain muted till FY20.

Although the Indian economy has largely been driven by domestic demand, external demand played a vital role in pushing the GDP growth during FY04-FY10. The share of exports (goods and services) in India's GDP increased to 25.4% in FY14 from 12.8% in FY01, but thereafter declined sharply to 19.2% in FY17. A reduction in exports contribution to GDP and a plunge in exports growth have been a cause of concern lately. Exports growth of goods and services plummeted to 6.7% in FY17 from average exports growth of 26.3% during FY05-FY09. With the popular sentiment in developed economies turning against globalization of which the Brexit vote and Donald Trump's surprise victory in the US presidential election are testimonies, India is likely to face continued headwinds on the exports front.

From the supply side, all major sectors namely agriculture, industry and services are expected to contribute to FY19 gross value-added (GVA) growth, but the most significant rebound will come from the industrial sector, which reeled under the twin impact of the demonetization and GST in FY18. Ind-Ra therefore sees industrial GVA growing at 6.2% in FY19 as against 4.4% in FY18. Even agriculture and services sectors are expected to grow 2.7% and 8.5% in FY19, a tad higher than 2.1% and 8.3% in FY18, respectively. This will translate into an overall GVA growth of 6.9% in FY19 (FY18: 6.1%).

India now stands at a critical juncture. It needs massive investments to create the jobs, housing, and infrastructure to meet its people’s aspirations. GoI has set development of infrastructure as one of the prime objective to accelerate the growth momentum and has initiated a host of bold new initiatives to address these and other challenges. For instance, the country’s flagship ‘Skill India’ initiative seeks to equip India’s growing young workforce with the skills needed to compete in today’s rapidly changing workplace. The skills program is complemented by the ‘Make in India’ initiative, as well as with efforts to ease the process of doing business. The ‘Smart Cities’ and ‘Atal Mission for Rejuvenation and Urban Transportation’ (AMRUT) programs focus on creating dynamic urban centres in towns and cities across the country. Thus, India's gross domestic product (GDP) is expected to reach USD 6 trillion by FY27 and achieve upper-middle income status on the back of digitisation, globalisation, favourable demographics, and reforms.

India: The Fastest Growing Major Economy Over the Next Decade

On the basis of the economic growth projection observed in 700 locations globally, a recent study estimated that the epicentre of global economy by FY25 will lie in India and China. This is also corroborated by the past decadal and last year’s growth rate in select regions.

Source: World Bank, IRR Advisory

Given the global scenario, independent third-party external forecasters such as IMF and OECD believe India will be the fastest growing major economy in the world over the next decade. The key factors supporting India’s growth include favourable age demographics, income dynamics and growing urbanization.

India benefits from a large and growing population in the working age group, as also a relatively young population. This is in sharp contrast to the developed countries – for example, the US, Japan, Germany, France, Italy, etc. – which has seen a sharp fall in working age population growth and which is expected to become lower over the next decades, which will significantly impact their growth prospects. 63.3% of India’s population is below 34 years of age (advanced economy: 41.9%) in 2015 and India is expected to ride this demographic advantage for the next three decades.

The other key factor is the income dynamics which saw a rapidly rising middle-class and increased growth in high-income categories. This is an outcome of liberalization post which the Indian economy grew at an annual growth rate exceeding 7% while population growth slowed down to a CAGR of 1.5%. This saw per capita GDP (GDP at market prices) rising strongly over the past decade

Meanwhile, urbanization is taking place at a fast pace in India. As the stride of migration from rural to urban areas continues, about 40% of India's population will be living in urban areas by 2030. By 2050, it is estimated that the number of people living in Indian cities will exceed 800 million – double the current population of the US -- and India will need about 500 new cities to accommodate the influx. India's continuing pattern of urbanization is expected to further increase the need for infrastructure development in the country.

Introduction

Agriculture is the primary source of livelihood for about 58 per cent of India’s population. Gross Value Added by agriculture, forestry and fishing is estimated at Rs 17.67 trillion (US\$ 274.23 billion) in FY18

The Indian food industry is poised for huge growth, increasing its contribution to world food trade every year due to its immense potential for value addition, particularly within the food processing industry. The Indian food and grocery market is the world’s sixth largest, with retail contributing 70 per cent of the sales. The Indian food processing industry accounts for 32 per cent of the country’s total food market, one of the largest industries in India and is ranked fifth in terms of production, consumption, export and expected growth. It contributes around 8.80 and 8.39 per cent of Gross Value Added (GVA) in Manufacturing and Agriculture respectively, 13 per cent of India’s exports and six per cent of total industrial investment.

Market Size

During 2017-18 crop year, food grain production is estimated at 279.51 million tonnes, as per third advance estimates while rice and wheat production in the country is estimated at 111.52 MT and 98.61 MT, respectively in the same period. Milk production was estimated at 165.4 million tonnes during FY17, while meat production was 7.4 million tonnes. Total area in India, sown with rabi crops reached 64.29 million hectares in February 2018.

India is the second largest fruit producer in the world. Production of horticulture crops is estimated at record 307.16 million tonnes (mt) in 2017-18 as per second advance estimates.

Total agricultural exports from India grew at a CAGR of 16.45 per cent over FY10-18 to reach US\$ 38.21 billion in FY18. In April-May 2018 agriculture exports were US\$ 6.43 billion. Tea exports from India reached a 36 year high of 240.68 million kgs in CY 2017 while coffee exports reached record 395,000 tonnes in 2017-18.

Food & Grocery retail market in India was worth US\$ 380 billion in 2017.

Investments

According to the Department of Industrial Policy and Promotion (DIPP), the Indian agricultural services and agricultural machinery sectors have cumulatively attracted Foreign Direct Investment (FDI) equity inflow of about US\$ 2.02 billion and US\$ 466.31 million, respectively, during April 2000 to December 2017. The food processing sector attracted FDI of US\$ 8.37 billion in the same period.

Some major investments and developments in agriculture are as follows:

- The first mega food park in Rajasthan was inaugurated in March 2018.
- Sugar production in India is expected to reach 27.2 million tonnes in 2017-18 season (October-September).
- In January 2018, India Agri Business Fund II (IABF-II), co-sponsored by Rabobank, the UK's CDC Group and Asian Development Bank (ADB), made an investment worth US\$ 10 million for a minority stake in Global Gourmet Pvt Ltd, a frozen food products exporting company.
- A loan agreement of US\$ 318 million was signed between the Government of India, Government of Tamil Nadu and the World Bank in December 2017 for the 'Tamil Nadu Irrigated Agriculture Modernization Project' through which is expected to benefit around 500,000 farmers in the state.
- Cotton output in India is expected to increase by 9 per cent in 2017-18* to 37.7 million bales.

Government Initiatives

Some of the recent major government initiatives in the sector are as follows:

- In March 2018, the Government of India extended the urea subsidy to the farmers till 2020 with the aim of ensuring supply of urea at statutory controlled prices. Urea subsidy for 2018-19 is estimated at Rs 45,000 crore (US\$ 6.95 billion).
- As of March 2018, the Government is working on a plan to provide air cargo support to promote agriculture exports from India.
- The implementation of Pradhan Mantri Fasal Bima Yojana (PMFBY) will be made faster and the government is aiming to increase the coverage under the scheme to 50 per cent of gross cropped area in 2018-19.
- The Government of India is going to provide Rs 2,000 crore (US\$ 306.29 million) for computerisation of Primary Agricultural Credit Society (PACS) to ensure cooperatives are benefitted through digital technology.
- Around 100 million Soil Health Cards (SHCs) have been distributed in the country during 2015-17 and a soil health mobile app has been launched to help Indian farmers.
- With an aim to boost innovation and entrepreneurship in agriculture, the Government of India is introducing a new AGRI-UDAAN programme to mentor start-ups and to enable them to connect with potential investors.

- The Government of India has launched the Pradhan Mantri Krishi Sinchai Yojana (PMKSY) with an investment of Rs 50,000 crore (US\$ 7.7 billion) aimed at development of irrigation sources for providing a permanent solution from drought.
- The Government of India plans to triple the capacity of food processing sector in India from the current 10 per cent of agriculture produce and has also committed Rs 6,000 crore (US\$ 936.38 billion) as investments for mega food parks in the country, as a part of the Scheme for Agro-Marine Processing and Development of Agro-Processing Clusters (SAMPADA).
- The Government of India has allowed 100 per cent FDI in marketing of food products and in food product e-commerce under the automatic route.
- A new platform for selling agricultural produce named e-RaKam has been launched by the Government of India and will operate as a joint initiative of Metal Scrap Trade Corporation Limited and Central Railside Warehouse Company Limited (CRWC).

Road Ahead

India is expected to achieve the ambitious goal of doubling farm income by 2022. The agriculture sector in India is expected to generate better momentum in the next few years due to increased investments in agricultural infrastructure such as irrigation facilities, warehousing and cold storage. Furthermore, the growing use of genetically modified crops will likely improve the yield for Indian farmers. India is expected to be self-sufficient in pulses in the coming few years due to concerted efforts of scientists to get early-maturing varieties of pulses and the increase in minimum support price.

The government of India targets to increase the average income of a farmer household at current prices to Rs 219,724 (US\$ 3,420.21) by 2022-23 from Rs 96,703 (US\$ 1,505.27) in 2015-16.

Going forward, the adoption of food safety and quality assurance mechanisms such as Total Quality Management (TQM) including ISO 9000, ISO 22000, Hazard Analysis and Critical Control Points (HACCP), Good Manufacturing Practices (GMP) and Good Hygienic Practices (GHP) by the food processing industry will offer several benefits.

WOOD AND WOOD PRODUCTS IN INDIA

Source: Euromonitor International March 2018

HEADLINES

- The turnover of India's quarrying industry grows by a mere 1.8% in 2016 as costs rise and oversupply remains strong
- Demonetisation and GST tax have a negative short-term effect on the industry; however, it should contribute to the growth of the organised business in the near future
- Wood and wood products industry projected to see 8% CAGR over 2016-2021, as demand grows due to residential housing programmes and changing consumption trends

PROSPECTS

Rising Costs To Eventually Be Passed on To Consumers As Demand Increases

The monthly Indian Wholesale Price Index (WPI) of wood and of products of wood and cork increased only marginally. Overall wood prices remained weak or falling as demonetisation swiped new orders from the plate of the construction and other sectors for a portion of 2016. Moreover, plywood manufacturers in Indian have faced rising production costs, yet opportunities to pass the increase on to consumers were limited due to slower demand from the construction sector over the year.

The imposition of service tax on the ocean freight component of all imports is expected to further pushed production costs and prices of imported raw materials, as 4.5% service tax over freight on cargoes imported on a delivered or CFR basis was extended in 2017. Nevertheless, as the construction industry in India is recovering from a temporary demonetisation effect, increasing consumption is expected to allow wood producers to start passing their rising costs on to consumers. Anticipated price recovery is expected to be an important driver of the industry's turnover value growth over the forecast period.

Residential Housing Programmes To Support Wood Products Industry

Demonetisation had a negative impact on a number of industries as shortage of cash cut into household spending in the second half of the year. The construction sector has also felt a shortage, and the situation continued into 2017 as housing starts in India's eight largest cities fell by over 40% during H1 2017 – the biggest drop of the last seven years. However, the industry has started to rebound, and it is expected that growth will accelerate over 2018, translating into growth opportunities for India's wood sector.

The PMAY (“Affordable Housing”) programme is at the centre of India's residential construction growth, and this is expected to remain a driving force of wood product demand over the forecast period. The 19 million units of housing shortage in India has been getting attention to fill the urban housing gap. Housing programmes are expected to bring a USD1.3 trillion investment to the construction sector over the coming seven years. The government's financial and political thrust, regulatory support, growing urbanisation, along with rising affordability are converting demand for affordable homes into a production opportunity for wood manufacturers. Moreover, other government programmes such as the Swachh Bharat Abhiyan and Smart Cities, will help accelerate demand for building materials over the forecast period.

Ready-made Furniture Growth Driving Wood Demand

Despite the recent economic slowdown related to demonetisation and hasty implementation of the Goods and Services Tax (GST), India remains among the fastest-growing economies in the world, with growth expected to swing back to positive trends after the effects of the GST introduction settle in. This, combined with changes in Indian society and consumption habits, will have a positive effect on consumption of wood products.

The most prominent changes important to the wood sector include the transition of the Indian wood furniture industry towards ready-made furniture, propelled by increasing urbanisation.

Demand for furniture made with MDF is growing rapidly as people find it increasingly inconvenient to get customised furniture made by carpenters. Also, furniture made with MDF is more suited to the requirements of an upward-moving middle-class, seeking trendy and high-quality interiors at reasonable prices.

Rising disposable incomes and the young population are expected to drive demand for wood products.

COMPETITIVE LANDSCAPE

Industry To Benefit From Formalisation of the Indian Economy

The attempt to combat the illegal market and formalise the economy is expected to lead to a reduction in the price difference between the players in the wood products market. It is anticipated that Goods and Services Tax (GST) would ensure legal companies have an advantage over unorganised manufacturers of ply and laminates. A large proportion of transactions for laminates and plywood took place via cash deals as buyers did not want to pay tax. The practice is believed to change under the new GST regime, promising a gradual reduction of the black market. With the change of GST from 28% to 18% on plywood, which came into effect from 15 November 2017, official players in this sector are expecting to further increase their market share.

A. Trading in wooden Logs and Timber:

In the year 2004, the company started with the object of carrying business in trading of timber and wooden logs. They started importing the wooden logs and timber from places like Malaysia, Vietnam, and Burma in Asia, Nigeria, Ghana and Ivory Coast in Africa, Ecuador, Salvador, and Costa Rica in America, Solomon Island, Papua and Guinea etc.

B. Operation of Saw Mill

The godown cum manufacturing facility is located at 174/G/N T Road, Baidyabati, Hooghly, Delhi Road, West Bengal on an area of around 37,000 Sqft. Once wooden logs are received in India port, they are transferred to the godown cum Factory, from where the logs are processed in saw mill machine and converted into the different shapes and sizes of timber as per the requirements of the customers.

The company has the below machineries for the processing of Timber for the Saw Mill:

Type of Machine	No. of Machines	Capacity for 1 working day
Horizontal & Vertical Cutting Machine	1	20 CBM
Puller Machine	1	20 CBM

C. Manufacturing of Veneer sheets

Veneer sheets are normally a thin decorative covering of fine wood applied to a coarser wood or other material. In woodworking, veneer refers to thin slices of wood, usually thinner than 3 mm (1/8 inch), that typically are glued onto core panels (typically, wood, particle board or medium-density fibre board) to produce flat panels such as doors, tops and panels for cabinets, parquet floors and parts of furniture. Plywood consists of three or more layers of veneer. Normally, each is glued with its grain at right angles to adjacent layers for strength.

The company has the below machineries for the manufacturing of veneer sheets:

Type of Machine	No. of Machines	Capacity for 1 working day
Peeling Machine	2	40CBM
Dryer	1	35000 Sqmt
Pneumatic Clipper	3	35000 Sqmt
Monorail	3	40 CBM
Hand Trolley	23	35000 Sqmt
Knife Grinding Machine	1	-

Manufacturing Process: Firstly the logs are sectioned between 2m to 2.60 m in length. Then they are lifted by hydraulic monorail and debarked in the peeling machine to make the surface smooth and easy. After that they are peeled into sheets of veneer measuring around 0.20 mm to 1.80 mm in thickness. Then they are cut into sizes of requirements as per the customers by using the pneumatic clipper. After that they are taken to the dryer for drying through the hand trolley. Then after, the finished product veneer is ready for sale.

SECTION V: ABOUT THE COMPANY AND THE INDUSTRY

OVERVIEW OF INDIAN ECONOMY

India, the world's third largest economy in terms of its PPP (purchasing power parity) and with a population of over 1.2 billion, has witnessed significant economic growth since the country was liberalized in early 1990s. Industrial deregulation, divestment of state-owned enterprises, and reduced Governmental controls on foreign trade and investment, served to accelerate the country's growth and India has posted an average of 7% GDP growth since the beginning of this millennium. According to IMF, India's GDP was estimated at 6.7% in 2017 and it is projected to jump to 7.4% in 2018 and 7.8% in 2019.

India Ratings (Ind-Ra) expects economic recovery to become more broad-based in FY19 with both consumption and investment providing support to economic growth. The four GDP growth drivers from the demand side are private final consumption expenditure (PFCE), government final consumption expenditure (GFCE), gross fixed capital formation (GFCF) and net exports (NE). In the last few years, only PFCE and GFCE have demonstrated sustained and robust growth. Although exports growth picked up in FY18 (till December, 2017), hardening of commodity prices, particularly crude, has led to imports growth outpacing exports growth in FY18.

Ind-Ra expects PFCE to grow at 6.8% in FY19. PFCE grew at an average rate of 6.9% during FY14-FY18, despite two consecutive years of monsoon failure in 2014 and 2015, due to favourable demographic and inflation factors. Given the demographic composition, a large number of people are entering the workforce every year. Assuming only a fraction of them get gainful employment (anecdotal evidence suggests that while about 10-12 million people are entering working-age population every year, only about 3.7 million jobs are created annually), the numbers are still staggering, resulting in a significant impact on consumption. Moreover, sustained expansion of the middle class in India is fuelling growth in consumption. Also, consumer price index (CPI) based inflation, which averaged 9.8% during FY12-FY14, plunged to 5.9% in FY15, and since then has declined to 4.9% in FY16 and 4.5% in FY17; it is expected to decline further to 3.6% in FY18. Such a sharp decline in the CPI inflation is largely driven by collapse of global commodity prices, particularly crude.

Ind-Ra expects GFCE to grow at 8.1% in FY19. Given the size of the government machinery, a significant proportion of demand in the economy is created/generated on account of government expenditure. Also, governments across the globe have been found to step up their expenditure, if need arises, to boost the aggregate demand in the economy. As this was the case in the aftermath of 2008 global financial crisis, even in India, government consumption expenditure grew at an average 11.3% during FY08-FY10 vis-à-vis an average of 4.9% during FY04-FY07. With private investment faltering, the government has again stepped up its spending to support growth. As a result, GFCE grew at an average 10.6% during FY15-FY18 compared to

0.6% during FY14. However, capex spending by the government alone will not be sufficient to step-up investment/GDP ratio in the economy.

Ind-Ra expects investment as measured by GFCF to grow at 6.5% in FY19. This certainly is an improvement over GFCF growth of 2.4% in FY17 and 4.5% in FY18, but is nowhere close to GFCF growth of 16.2% witnessed during FY04-FY08. There is a strong correlation between the GDP growth and investment. With GFCF growth faltering and clocking an average growth of 3.7% during FY14-FY18, the GDP growth during the same period averaged 7.1%. In fact, due to the slowdown in GFCF growth, particularly private corporates and households, the GDP growth has failed to accelerate and sustain itself close to or in excess of 8.0%. Private corporate sector investment grew at an average 48.1% during FY05-FY08. Ind-Ra's study of top 200 listed and unlisted non-financial asset-heavy corporates suggests that private sector capex revival is likely to remain muted till FY20.

Although the Indian economy has largely been driven by domestic demand, external demand played a vital role in pushing the GDP growth during FY04-FY10. The share of exports (goods and services) in India's GDP increased to 25.4% in FY14 from 12.8% in FY01, but thereafter declined sharply to 19.2% in FY17. A reduction in exports contribution to GDP and a plunge in exports growth have been a cause of concern lately. Exports growth of goods and services plummeted to 6.7% in FY17 from average exports growth of 26.3% during FY05-FY09. With the popular sentiment in developed economies turning against globalization of which the Brexit vote and Donald Trump's surprise victory in the US presidential election are testimonies, India is likely to face continued headwinds on the exports front.

From the supply side, all major sectors namely agriculture, industry and services are expected to contribute to FY19 gross value-added (GVA) growth, but the most significant rebound will come from the industrial sector, which reeled under the twin impact of the demonetization and GST in FY18. Ind-Ra therefore sees industrial GVA growing at 6.2% in FY19 as against 4.4% in FY18. Even agriculture and services sectors are expected to grow 2.7% and 8.5% in FY19, a tad higher than 2.1% and 8.3% in FY18, respectively. This will translate into an overall GVA growth of 6.9% in FY19 (FY18: 6.1%).

India now stands at a critical juncture. It needs massive investments to create the jobs, housing, and infrastructure to meet its people's aspirations. GoI has set development of infrastructure as one of the prime objective to accelerate the growth momentum and has initiated a host of bold new initiatives to address these and other challenges. For instance, the country's flagship 'Skill India' initiative seeks to equip India's growing young workforce with the skills needed to compete in today's rapidly changing workplace. The skills program is complemented by the 'Make in India' initiative, as well as with efforts to

ease the process of doing business. The ‘Smart Cities’ and ‘Atal Mission for Rejuvenation and Urban Transportation’ (AMRUT) programs focus on creating dynamic urban centres in towns and cities across the country. Thus, India's gross domestic product (GDP) is expected to reach USD 6 trillion by FY27 and achieve upper-middle income status on the back of digitisation, globalisation, favourable demographics, and reforms.

India: The Fastest Growing Major Economy Over the Next Decade

On the basis of the economic growth projection observed in 700 locations globally, a recent study estimated that the epicentre of global economy by FY25 will lie in India and China. This is also corroborated by the past decadal and last year’s growth rate in select regions.

Source: World Bank, IRR Advisory

Given the global scenario, independent third-party external forecasters such as IMF and OECD believe India will be the fastest growing major economy in the world over the next decade. The key factors supporting India’s growth include favourable age demographics, income dynamics and growing urbanization.

India benefits from a large and growing population in the working age group, as also a relatively young population. This is in sharp contrast to the developed countries – for example, the US, Japan, Germany, France, Italy, etc. – which has seen a sharp fall in working age population growth and which is expected to become lower over the next decades, which will significantly impact their growth prospects. 63.3% of India’s population is below 34 years of age (advanced economy: 41.9%) in 2015 and India is expected to ride this demographic advantage for the next three decades.

The other key factor is the income dynamics which saw a rapidly rising middle-class and increased growth in high-income categories. This is an outcome of liberalization post which the Indian economy grew at an annual growth rate exceeding 7% while population growth slowed down to a CAGR of 1.5%. This saw per capita GDP (GDP at market prices) rising strongly over the past decade

Meanwhile, urbanization is taking place at a fast pace in India. As the stride of migration from rural to urban areas continues, about 40% of India’s population will be living in urban areas by 2030. By 2050, it is estimated that the number of people living in Indian cities will exceed 800 million – double the current population of the US -- and India will need about 500 new cities to accommodate the influx. India’s continuing pattern of urbanization is expected to further increase the need for infrastructure development in the country.

India is expected to achieve the ambitious goal of doubling farm income by 2022. Furthermore, the growing use of genetically modified crops will likely improve the yield for Indian farmers. India is expected to be self-sufficient in pulses in the coming few years due to concerted efforts of scientists to get early-maturing varieties of pulses and the increase in minimum support price.

The government of India targets to increase the average income of a farmer household at current prices to Rs 219,724 (US\$ 3,420.21) by 2022-23 from Rs 96,703 (US\$ 1,505.27) in 2015-16.

Going forward, the adoption of food safety and quality assurance mechanisms such as Total Quality Management (TQM) including ISO 9000, ISO 22000, Hazard Analysis and Critical Control Points (HACCP), Good Manufacturing Practices (GMP) and Good Hygienic Practices (GHP) by the food processing industry will offer several benefits.

About West Bengal

West Bengal is situated in eastern India and shares its borders with Jharkhand, Bihar, Odisha, Sikkim and Assam. The state also shares international borders with Bangladesh, Bhutan and Nepal. The Bay of Bengal is in the south of the state.

West Bengal is India's sixth largest economy, and recorded a Gross State Domestic Product (GSDP) of US\$ 163.87 billion in 2017-18AE. The state's GSDP expanded at a compound annual growth rate (CAGR) of 12.47 per cent (in rupee terms) from 2011-12 to 2017-18. West Bengal is the largest producer of rice in India. Rice production for the state totalled 14.99 million tonnes in 2017-18*. West Bengal is also a major producer of fish. During Apr-Dec 2017, the state produced a total of 1.34 million tonnes of fish. As of May 2018, West Bengal had a total installed power generation capacity of 10,490.23 megawatt (MW).

West Bengal is the second largest tea-producing state in India and is home to the globally acclaimed Darjeeling tea variety. Its location advantage makes the state a traditional market for eastern India, the Northeast, Nepal and Bhutan. It is also a strategic entry point for markets in Southeast Asia. The cost of operating a business is lower in Kolkata than in other metropolitan cities. West Bengal has abundant natural resources of minerals and suitable agro-climatic conditions for agriculture, horticulture and fisheries. It is in vicinity to mineral rich states like Jharkhand, Bihar and Odisha. It offers excellent connectivity to the rest of India in terms of railways, roadways, ports and airports.

The state (including Sikkim and Andaman & Nicobar Islands) has attracted Foreign Direct Investment (FDI) equity inflows worth US\$ 4.19 billion during the period April 2000 to December 2017, according to data released by Department of Industrial Policy and Promotion (DIPP).

Cold chain industry in India – Present status and future prospects

Cold chain involves the transportation of temperature-sensitive products along a supply chain through thermal and refrigerated packaging methods to protect the integrity of these shipments. There are several means in which cold chain products can be transported: Refrigerated trucks and railcars; Refrigerated cargo ships; and Air cargo.

India's integrated cold chain industry

India's cold chain sector is a combination of surface storage and refrigerated transport. The industry has been growing at a CAGR of 20% for the last three years. The cold chain market in India is anticipated to reach Rs 624 billion (US\$13 billion) by 2017, according to 2014 estimates. Cold stores are the major revenue contributors of the Indian cold chain industry.

Currently, India has 6,300 cold storage facilities unevenly spread across the country, with an installed capacity of 30.11 million metric tonne. These are mostly used for storing potatoes. However, the market is gradually getting organised and focus towards multi-purpose cold storages is rising. More than 50% of the cold storage facilities in India are currently concentrated in Uttar Pradesh and West Bengal, while other states still face a challenge with investments from the government and private operators.

Facts

- Organised players contribute only ~8%–10% of the cold chain industry market
- 36% of these cold storages in India have capacity below 1,000 MT
- 65% of India's cold chain storage capacity is contributed by the states of Uttar Pradesh and West Bengal
- At the current capacity only less than 11% of what is produced can be stored

Government initiatives

India is one of the largest producers of agricultural products and one of the global leaders in the pharmaceutical sector. Yet, it is known to have a fledgling cold chain, which results in supply chain losses of food and other resources. These losses have been stated to be as high as US\$8 to 15 billion per annum from the agriculture sector alone. To address this concern, the government had earlier constituted a National Task Force on Cold Chain in 2008.

The agriculture and food processing sectors in India have been developing and today India is a net exporter of food grains. This is a dramatic transformation from the 70s and 80s when India used to import food grains to feed its population. This has largely been a result of the higher yields achieved as a result of the Green Revolution. Alongside this, there have been significant strides in the production of fruits and vegetables.

Segment-wise size & products in Food Processing Industry

Segment	Size (Million Tonne)	Key Products	Expected Growth (%)
Dairy Products	121	Value-added Milk, Butter, Cheese	8
Fruits & Vegetables	233	Raw Fruits & Vegetables, Pulp, Canned Food	7
Meat & Poultry	11	Poultry, Beef	18
Seafood	8.4	Seafood Products	7
Packaged Products	Rs 8,000 crore	Ready-to-eat & Ready-to-cook	8

However, lack of proper and adequate food storage, processing and cold chain logistics remains a serious challenge. The Government of India is one of the driving forces in developing the cold chain industry and supports private participation through various subsidy schemes and grants. Investment in cold chain in India was also opened under the automatic route for 100% FDI participation. The existing cold chain in India largely comprised comparatively small private companies with a regional or local footprint.

In the previous two decades, India has been developing at a quick pace and an increasing demand for high value foods with a shift towards horticultural crops has been documented. This, coupled with rapid urbanisation resulted in multi-fold changes to the spending and consumption pattern of India's population. The existing food supply chain systems were unable to cope with these fast changing demographic trends and the lack of efficient and effective supply chains is understood to lead to a variety of losses in the perishable food segment.

In 2012, Indian farmers produced 240 million metric tonne of horticultural produce, almost equal to its grain and cereals production. Various studies indicate that 18% to 40% of this produce was lost due to supply chain inefficiencies, concluding that a focussed effort was required to promote the development of the cold chain in the country. The Indian government and its Planning Commission spelt out clear intention, that cold chain has to be supported. Amongst the core identified development areas are the base infrastructure, environmentally-friendly technologies, standards and protocols, enabling policies and specialised skills.

The Indian government is taking steps to improve the cold chain infrastructure, by recognising the cold chain industry as a sub-sector of infrastructure in the previous Union Budget and creating an additional Budget to construct new cold storage facilities. In addition, the private sector is being encouraged to develop the cold chain industry further by implementing the latest and most effective refrigeration technology solutions available today.

For private players the high level of initial capital required to construct a cold chain unit continues to be the biggest challenge. But if the government pitches in with a clear plan and promotes more PPP initiatives in this field, we could see a momentum growth in the cold chain industry in India.

Initiatives to boost the cold chain infrastructure

- ✓ 100% FDI through government route
- ✓ Since 2011-12 cold chain has been given infrastructure status
- ✓ Viability gap funding up to 40% of the cost
- ✓ 5% concession on import duty, service tax exemption, excise duty exemption on several items. Subsidy of over 25% to 33.3% on the cold storage project cost
- ✓ Establishment of National Centre for Cold Chain Development
- ✓ Proposed financial outlay for cold chain infrastructure & food parks of US\$335 million and US\$650 million respectively. Over 50%-70% capital grant on projects.

Key challenges

Lack of quality cold warehousing infrastructure: There is a severe shortage of cold chain warehousing capacity as only 25% of the capacity is available for fruits, vegetables, processed foods and pharmaceuticals, whereas 75% of the capacity is dedicated to potatoes.

Lack of standards and protocols in construction and operation of facilities: Technical standards followed in India are mostly unsuitable for Indian conditions, which results in lower performance of standard refrigerated systems.

Low awareness of labour in handling temperature-sensitive products: In India, the supply chain of most products is long and fragmented. A product changes many hands from source to delivery point. Most workers involved in this are not properly trained in handling temperature-sensitive products resulting in deterioration of product quality before reaching the consumer.

High fuel cost and power cuts: Fuel costs in India constitute around 30% of operating expenses of cold storage in India as compared to 10% in the West. Further, cold storages are dependent on steady supply of power. Most Indian regions face power cuts. Hence, these companies have to invest in power back-ups, which push up the capital investment requirement.

Future prospects

With a large number of global food and retail chains targeting the India markets, FDI in retail is just around the corner and is likely to be implemented soon. Then government is also promoting the food safety and security bill which would further demand storage and cold chain facilities in order to reduce the amount of food wastage. With the expected future development in road and rail infrastructure, along with the changing lifestyle of the Indian consumer – Indian cold chain industry is expected to grow at a CAGR of 28 per cent over the next three years and reach a market size of \$13 billion in 2017, although it is largely unorganised in nature. Thereby, presenting a great opportunity for foreign players. But for this to happen, the government will have to play a very important catalyst role.

Globally cold chains have now become an integral part of supply chain management for the storage and transportation of temperature-sensitive goods. The focus has now shifted from increasing production to better cold storages and transportation of food produce. The utilisation of cold chain logistics includes both cold storages and refrigerated transportation and is used to increase the shelf life of food produce.

With 35-40% of agricultural produce in India being wasted due to lack of proper cold storage facilities, it is immensely important that a focussed effort is required on part of the government to encourage the use of cold chain among market participants.

Some of the likely steps that the government could take are mentioned below:

- ❖ Provide requisite support like lower cost of funding for setting up cold chain infrastructure facilities.
- ❖ Promote awareness campaign and educate market participant about the importance of cold chain facilities.
- ❖ State governments can encourage setting up of cold storage facilities by providing subsidised power tariff as power forms a significant proportion of the operating cost
- ❖ Encourage better and more efficient refrigeration technologies to improve the shelf life of perishable products.

WOOD AND WOOD PRODUCTS IN INDIA

Source: *Euromonitor International March 2018*

HEADLINES

- The turnover of India's quarrying industry grows by a mere 1.8% in 2016 as costs rise and oversupply remains strong
- Demonetisation and GST tax have a negative short-term effect on the industry; however, it should contribute to the growth of the organised business in the near future
- Wood and wood products industry projected to see 8% CAGR over 2016-2021, as demand grows due to residential housing programmes and changing consumption trends

PROSPECTS

Rising Costs To Eventually Be Passed on To Consumers As Demand Increases

The monthly Indian Wholesale Price Index (WPI) of wood and of products of wood and cork increased only marginally. Overall wood prices remained weak or falling as demonetisation swiped new orders from the plate of the construction and other sectors for a portion of 2016. Moreover, plywood manufacturers in India have faced rising production costs, yet opportunities to pass the increase on to consumers were limited due to slower demand from the construction sector over the year.

The imposition of service tax on the ocean freight component of all imports is expected to further push production costs and prices of imported raw materials, as 4.5% service tax over freight on cargoes imported on a delivered or CFR basis was extended in 2017. Nevertheless, as the construction industry in India is recovering from a temporary demonetisation effect, increasing consumption is expected to allow wood producers to start passing their rising costs on to consumers. Anticipated price recovery is expected to be an important driver of the industry's turnover value growth over the forecast period.

Residential Housing Programmes to Support Wood Products Industry

Demonetisation had a negative impact on a number of industries as shortage of cash cut into household spending in the second half of the year. The construction sector has also felt a shortage, and the situation continued into 2017 as housing starts in India's eight largest cities fell by over 40% during H1 2017 – the biggest drop of the last seven years. However, the industry has started to rebound, and it is expected that growth will accelerate over 2018, translating into growth opportunities for India's wood sector.

The PMAY ("Affordable Housing") programme is at the centre of India's residential construction growth, and this is expected to remain a driving force of wood product demand over the forecast period. The 19 million units of housing shortage in India has been getting attention to fill the urban housing gap. Housing programmes are expected to bring a USD1.3 trillion investment to the construction sector over the coming seven years. The government's financial and political thrust, regulatory support, growing urbanisation, along with rising affordability are converting demand for affordable homes into a production opportunity for wood manufacturers. Moreover, other government programmes such as the Swachh Bharat Abhiyan and Smart Cities, will help accelerate demand for building materials over the forecast period.

Ready-made Furniture Growth Driving Wood Demand

Despite the recent economic slowdown related to demonetisation and hasty implementation of the Goods and Services Tax (GST), India remains among the fastest-growing economies in the world, with growth expected to swing back to positive trends after the effects of the GST introduction settle in. This combined with changes in Indian society and consumption habits, will have a positive effect on consumption of wood products.

The most prominent changes important to the wood sector include the transition of the Indian wood furniture industry towards ready-made furniture, propelled by increasing urbanisation.

Demand for furniture made with MDF is growing rapidly as people find it increasingly inconvenient to get customised furniture made by carpenters. Also, furniture made with MDF is more suited to the requirements of an upward-moving middle-class, seeking trendy and high-quality interiors at reasonable prices. Rising disposable incomes and the young population are

expected to drive demand for wood products.

COMPETITIVE LANDSCAPE

Industry To Benefit From Formalisation of the Indian Economy

The attempt to combat the illegal market and formalise the economy is expected to lead to a reduction in the price difference between the players in the wood products market. It is anticipated that Goods and Services Tax (GST) would ensure legal companies have an advantage over unorganised manufacturers of ply and laminates. A large proportion of transactions for laminates and plywood took place via cash deals as buyers did not want to pay tax. The practice is believed to change under the new GST regime, promising a gradual reduction of the black market. With the change of GST from 28% to 18% on plywood, which came into effect from 15 November 2017, official players in this sector are expecting to further increase their market share.

OUR BUSINESS

Our Company M/s Diksha Greens Limited was originally incorporated on July 21, 2004 by the name of M/s Diksha Timber Private Limited as Private Limited Company under the provisions of the Companies Act, 1956, with the Registrar of Companies West Bengal, Kolkata. The company started with the object of carrying business in trading of timber, wooden logs, sawn timber as well as manufacturing of veneer sheets. The company is being promoted and managed by Mr. Rajesh Kumar Pirogiwal (Promoter Director) who has almost 3 (three) decades of experience to his credit in the timber and plywood industry. Mr. Rajesh Kumar Pirogiwal has got the enriching experience of this trade as a legacy from his father who started the trade way back in 1970 with a small retail shop of timber and was involved in trading of timber.

Later in the year 2006 the company obtained Importer-Exporter code (IEC) from Dy. Director General of Foreign Trade, Ministry of Commerce, Government of India and started importing the wooden logs and timber from countries such as Malaysia, Vietnam, and Burma in Asia, Nigeria, Ghana and Ivory Coast in Africa, Ecuador, Salvador, and Costa Rica in America, Solomon Island, Papua and Guinea etc.

Once wooden logs are received in India, they are transferred to the godown cum Factory located in Baidyabati, Hooghly, West Bengal from where the logs are sold in raw form as well as the sawn timber (the logs are converted into the different shapes and sizes of timber as per the requirements of the customers) and veneer sheets are produced to suit varied customer preferences.

In the year 2014, two group companies, Diksha Exim Private Limited and Wizard Vincom Private Limited have merged with Diksha Timber Private Limited for better economies of scale as well as better compliance and with the merger proposal got favourable from Kolkata High Court vide order no CP No. 237 of 2015 with CA No. 177 of 2015 dated May 14, 2015 for amalgamation.

Subsequently our Company changed its name from Diksha Timber Private Limited to Diksha Greens Private Limited vide Certificate of Incorporation pursuant to name change dated November 29, 2017 and again our Company was converted into a Public Limited Company and the name of the Company was changed to Diksha Greens Limited vide Certificate of Incorporation consequent upon Conversion from Private to Public Limited Company dated February 06, 2018.

After getting rich experience in timber business, in the year 2018, the promoters of the company decided to go for further expansion cum diversion of business activity. Having seen the potential of Agri market, the company acquired a state of art multi commodity cold storage located at Village& PO Dwarbasini, JL no: 89, PS Pandua, District Hooghly-712149, West Bengal, India having capacity of 5000 MT with two pre cooling chambers and reefer vans towards storage of seasonal produce from various parts of the country and abroad.

Brief about the activities of the company:

A. Trading in wooden Logs and Timber:

In the year 2004, the company started with the object of carrying business in trading of timber and wooden logs. They started importing the wooden logs and timber from places like Malaysia, Vietnam, and Burma in Asia, Nigeria, Ghana and Ivory Coast in Africa, Ecuador, Salvador, and Costa Rica in America, Solomon Island, Papua and Guinea etc.

Once wooden logs are received in India port, they are transferred to the godown cum Factory located in Baidyabati, Hooghly, West Bengal from where the logs are sold in raw form as well as the sawn timber and veneer sheets. Our Company in addition to Import also buys domestically.

B. Operation of Saw Mill

The godown cum manufacturing facility is located at 174/G/N T Road, Baidyabati, Hooghly, Delhi Road, West Bengal on an area of around 37000Sqft. Once wooden logs are received in India port, they are transferred to the godown cum Factory, from where the logs are processed in saw mill machine and converted into the different shapes and sizes of timber as per the requirements of the customers.

The company has the below machineries for the processing of sawn For the Saw Mill:

Type of Machine	No. of Machines	Capacity for 1 working day
Horizontal & Vertical Cutting Machine	1	20 CBM
Puller Machine	1	20 CBM

C. Manufacturing of Veneer sheets

Veneer sheets are normally a thin decorative covering of fine wood applied to a coarser wood or other material. In woodworking, veneer refers to thin slices of wood, usually thinner than 3 mm (1/8 inch), that typically are glued onto core panels (typically, wood, particle board or medium-density fibre board) to produce flat panels such as doors, tops and panels for cabinets, parquet floors and parts of furniture. Plywood consists of three or more layers of veneer. Normally, each is glued with its grain at right angles to adjacent layers for strength.

The company has the below machineries for the manufacturing of veneer sheets:

National Environmental Policy, 2006

This Policy seeks to extend the coverage, and fill in gaps that still exist, in light of present knowledge and accumulated experience. This policy was prepared through an intensive process of consultation within the Government and inputs from experts. It does not displace, but builds on the earlier policies. This is a response to our national commitment to a clean environment, mandated in the Constitution in Articles 48 A and 51 A (g), strengthened by judicial interpretation of Article 21. The dominant theme of this

policy is that while conservation of environmental resources is necessary to secure livelihoods and well-being of all, the most secure basis for conservation is to ensure that people dependent on particular resources obtain better livelihoods from the fact of conservation, than from degradation of the resource. Following are the objectives of the National Environmental Policy:

Business Overview

Our company M/s Diksha Greens Limited was originally incorporated on July 21, 2004 by the name of M/s Diksha Timber Private Limited as Private Limited Company under the provisions of the Companies Act, 1956, with the Registrar of Companies West Bengal, Kolkata. The company started with the object of carrying business in trading of timber, wooden logs, sawn timber as well as manufacturing of veneer sheets. The company is being promoted and managed by Mr. Rajesh Kumar Pirogiwal (Promoter Director) who has almost 3 (three) decades of experience to his credit in the timber and plywood industry. Mr. Rajesh Kumar Pirogiwal has got the enriching experience of this trade as a legacy from his father who started the trade way back in 1970 with a small retail shop of timber and was involved in trading of timber.

Later in the year 2006 the company obtained Importer-Exporter code (IEC) from Dy. Director General of Foreign Trade, Ministry of Commerce, Government of India and started importing the wooden logs and timber from countries such as Malaysia, Vietnam, and Burma in Asia, Nigeria, Ghana and Ivory Coast in Africa, Ecuador, Salvador, and Costa Rica in America, Solomon Island, Papua and Guinea etc.

Once wooden logs are received in India, they are transferred to the godown cum Factory located in Baidyabati, Hooghly, West Bengal from where the logs are sold in raw form as well as the sawn timber (the logs are converted into the different shapes and sizes of timber as per the requirements of the customers) and veneer sheets are produced to suit varied customer preferences.

After getting rich experience in timber business, in the year 2018, the promoters of the company decided to go for further expansion cum diversion of business activity. Having seen the potential of Agri market, the company acquired a multi commodity cold storage located at Village & PO Dwarbasini, JL no: 89, PS Pandua, District Hooghly-712149, West Bengal, India having capacity of 5000 MT with two pre cooling chambers and reefer vans towards storage of seasonal produce from various parts of the country and abroad.

The godown cum manufacturing facility is located at 174/G/N T Road, Baidyabati, Hooghly, Delhi Road, West Bengal on an area of around 37000 Sqft. Once wooden logs are received in India port, they are transferred to the godown cum Factory, from

where the logs are processed in saw mill machine and converted into the different shapes and sizes of timber as per the requirements of the customers.

Veneer sheets are normally a thin decorative covering of fine wood applied to a coarser wood or other material. In woodworking, veneer refers to thin slices of wood, usually thinner than 3 mm (1/8 inch), that typically are glued onto core panels (typically, wood, particle board or medium-density fibre board) to produce flat panels such as doors, tops and panels for cabinets, parquet floors and parts of furniture. Plywood consists of three or more layers of veneer. Normally, each is glued with its grain at right angles to adjacent layers for strength.

Recently in the month of April, 2018, the promoters of the company decided to go for further expansion cum diversion of business activity. Having seen the potential of Agri market in West Bengal, they acquired a ready to use Multi-Commodity Cold Storage at Village & PO Dwarbasini, JL no: 89, PS Pandua, District Hooghly-712149, West Bengal, India having capacity of 5000 MT for storage of Agriculture produce.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are FIPB and the RBI.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India ("DIPP"), issued the Consolidated FDI Policy, which with effect from May 12, 2015, consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on May 12, 2015. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidated FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/ RBI.

As per the existing policy of the GoI, OCBs cannot participate in the Issue.

The Equity Shares have not been and will not be registered under the Securities Act or any state securities laws in the United States, and, unless so registered, may not be Issued or sold within the United States except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act and applicable state securities laws.

Accordingly, the Equity Shares are being Issued and sold (a) in the United States only to persons reasonably believed to be "qualified institutional buyers" (as defined in Rule 144A under the Securities Act and referred to in this Prospectus as "U.S. QIBs" pursuant to the private placement exemption set out in Section 4(a)(2) of the Securities Act; for the avoidance of doubt, the term U.S. QIBs does not refer to a category of institutional investor defined under applicable Indian regulations and referred to in this Prospectus as "QIBs"), in transactions exempt from the registration requirements of the Securities Act and (b) outside the United States in offshore transactions in reliance on Regulation S under the Securities Act and the applicable laws of the jurisdiction where those Issues and sales occur.

The above information is given for the benefit of the Applicants. Our Company and the Lead Manager are not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of this Prospectus. Applicants are advised to make their independent investigations and ensure that the number of Equity Shares Applied for do not exceed the applicable limits under laws or regulations.

- Provided that no call shall exceed one-fourth of the nominal value of the share or be payable at less than one month from the date fixed for the payment of the last preceding call.

- (ii) The Board shall be at liberty to waive payment of any such interest wholly or in part.
17. (i) Any sum which by the terms of issue of a share becomes payable on allotment or at any fixed date, whether on account of the nominal value of the share or by way of premium, shall, for the purposes of these regulations, be deemed to be a call duly made and payable on the date on which by the terms of issue such sum becomes payable.
- (ii) In case of non-payment of such sum, all the relevant provisions of these regulations as to payment of interest and expenses, forfeiture or otherwise shall apply as if such sum had become payable by virtue of a call duly made and notified.

19. (i) The instrument of transfer of any share in the company shall be executed by or on behalf of both the transferor and transferee.
- (ii) The transferor shall be deemed to remain a holder of the share until the name of the transferee is entered in the register of members in respect thereof.
- (c) Provided however that the Company will not decline to register or acknowledge any transfer of shares on the ground of the transferor being either alone or jointly with any other person or persons indebted to the Company on any account whatsoever.
- (d) The common form of transfer shall be used by the Company.

24. (i) Any person becoming entitled to a share in consequence of the death or insolvency of a member may, upon such evidence being produced as may from time to time properly be required by the Board and subject as hereinafter provided, elect, either—
- (a) to be registered himself as holder of the share; or
- (b) to make such transfer of the share as the deceased or insolvent member could have made.
- (ii) The Board shall, in either case, have the same right to decline or suspend registration as it would have had, if the deceased or insolvent member had transferred the share before his death or insolvency.
25. (i) If the person so becoming entitled shall elect to be registered as holder of the share himself, he shall deliver or send to the company a notice in writing signed by him stating that he so elects.

(ii) If the person aforesaid shall elect to transfer the share, he shall testify his election by executing a transfer of the share.

(iii) All the limitations, restrictions and provisions of these regulations relating to the right to transfer and the registration of transfers of shares shall be applicable to any such notice or transfer as aforesaid as if the death or insolvency of the member had not occurred and the notice or transfer were a transfer signed by that member.

26. A person becoming entitled to a share by reason of the death or insolvency of the holder shall be entitled to the same dividends and other advantages to which he would be entitled if he were the registered holder of the share, except that he shall not, before being registered as a member in respect of the share, be entitled in respect of it to exercise any right conferred by membership in relation to meetings of the company:

Provided that the Board may, at any time, give notice requiring any such person to elect either to be registered himself or to transfer the share, and if the notice is not complied with within ninety days, the Board may thereafter withhold payment of all dividends, bonuses or other monies payable in respect of the share, until the requirements of the notice have been complied with.

Forfeiture of shares

28. If a member fails to pay any call, or installment of a call, on the day appointed for payment thereof, the Board may, at any time thereafter during such time as any part of the call or installment remains unpaid, serve a notice on him requiring payment of so much of the call or installment as is unpaid, together with any interest which may have accrued.

34. The provisions of these regulations as to forfeiture shall apply in the case of non payment of any sum which, by the terms of issue of a share, becomes payable at a fixed time, whether on account of the nominal value of the share or by way of premium, as if the same had been payable by virtue of a call duly made and notified.
