The factory/registered office of our Company is located at Survey No. 230, Opp. Mariya Park, B/H. Ranipur Village, Saijpur Gopal, Narol, Ahmedabad, Gujarat-382405. The said property is not owned by us and has been taken on short term rent. For further details regarding the terms and conditions of these properties refer "Property" on section titled "***Our Business***" on page 99 of this Prospectus. Any failure to renew the said agreement could force us to relocate to new premises. It may involve substantial time and cost for relocation of the plant. In addition, we may not be able to identify satisfactory new premises or may have to incur substantial additional costs towards those premises. Any of the aforesaid could have a material adverse effect on our business, results of operation and financial condition.

Further, we are paying only rent ₹ 2,58,000/- p.m, including pollution permission charges and ETP. Any increase of rent would have a material adverse effect on our business and results of operations.

11. *Any penalty or action taken by any regulatory authorities in future for non-compliance with provisions of corporate and other law could impact the financial position of our Company to that extent.*

Our Company may have not complied with certain accounting standards and Section 4A of The Payment of Gratuity Act, 1972, in the past. Although no show cause notice in respect of the same has been received by our Company till date. Any penalty imposed for such non-compliance could affect our financial conditions to that extent. In relation to gratuity we have not received any notice/communication from the relevant authority, for the previous defaults till date. However, now our Company is complying with all the accounting standards and has given effects in the Restated Financial Statements for such non compliances.

12. Substantial portion of our revenues has been dependent upon our few clients. The loss of any one or more of our major clients would have a material effect on our business operations and profitability.

Our customers include various distributors that market our products, direct sellers, wholesalers, fabric traders and also large corporate houses. For the Eleven month period ended June 30, 2019, our top ten clients accounted for approximately 55.33% of our gross revenue from operations. The loss of any significant client would have a material effect on our financial results. We cannot assure you that we can maintain the historical levels of business from these clients/distributors or that we will be able to replace these clients/distributors in case we lose any of them. Furthermore, major events affecting our clients, such as bankruptcy, change of management, mergers and acquisitions could impact our business. If any of our major clients becomes bankrupt or insolvent, we may lose some or all of our business from that client and our receivable from that client would increase and may have to be written off, impacting our income and financial condition.

13. Our top suppliers contributes major portion of our total raw material purchases. Any disruption in supplies from them may adversely affect our production process.

Our top 10 suppliers contributes around 76% of our total Raw material purchases for period ended June 30, 2019. We do not have any formal agreement with our raw material suppliers. Though we maintain good relations with them, there can be no assurance that we shall be able to continue such relations with any or all of them. Any disruption in supplies from these parties may require us to find additional suppliers. There can be no assurance that we shall be able to find additional suppliers in time or transact business with them on favourable terms and conditions or the quality of products supplied by these suppliers will be at par with those of our existing suppliers. Since such suppliers are not contractually bound to deal with us exclusively, we may face the risk of losing their services to our competitors. Any disruption in supplies from our suppliers due to inexistence of contracts may adversely affect our production process, trading activity and consequently our results of operations.

14. Raw materials constitute a significant percentage of the Company's total expenses. Particularly, any increase in Grey Fabric prices and any decrease in the supply of Grey Fabric would materially adversely affect the Company's business.

Raw materials constitute a significant percentage of the total expenses of the Company. Raw materials costs accounted for 87.26% and 62.50 % of total expenses for period ended June 30, 2019 and 31st March, 2019 respectively. The primary raw material used by the Company is Grey Fabric. Though the grey fabric is basic raw material we require other dyes and chemicals for manufacturing finished fabrics. We are therefore, entirely dependent on external suppliers for the raw materials which constitutes a majority of the total cost of raw materials for our processing operations. The prices of Grey Fabric depend largely on the market prices of the various yarns and cotton, which are the raw material for manufacture of grey fabric. However, any adverse fluctuations in the price which we may not be able to pass on to our customers could have a material adverse effect on our total cost of production. Further, any material shortage or interruption in the supply or decrease in quality of these raw materials could also adversely impact our business operations.

15. For the 11 months period ended February 28, 2019' the net profit of our company was Rs 82.23 Lacs, but for the year ended March 31,2019 it was to Rs 60.20 Lacs.

Net profit of our company has reduced substantially in FY 2018-19, as compared to the net profit during 11 months ended February 2019, due to loss in the month of March 2019. The net profit of our company was Rs 82.23 Lacs for the 11 months period ended February 28, 2019; which was reduced to Rs 60.20 Lacs for the FY ended March 31,2019. There was heavy loss in the month of March 2019 due to the clearance of old stock at cost price or less than the cost price. Accordingly, the value of the inventory was also reduced as on March 31, 2019. Some of the goods were returned by the buyers due to defect in the goods/fabric. We had also sold

excess chemical and other material, however, the same was returned back and we had to discard the same. Similar events can happen in any part of the year and it may adversely affect our business and financial operations.

16. *Substantial Non-Operational Loans & Advances have been provided to the parties by our company.*

We have provided substantial Loans & Advances, which are not directly related to the core business operations of the company. We will not have recourse to any security to recover the same. We may not be able to recover the outstanding amounts under the loans and advances. Further, we may also provide similar loans and advances in future as well. There is no assurance that we would be able to recover them fully and it may adversely affect our financial condition.

17. *The capacity of our manufacturing facility is not fully utilized and could impair our ability to fully absorb fixed costs.*

The capacity of our manufacturing at factory has not been fully utilized over the previous years, and there is no assurance that there will be an increase in the capacity utilization in the future. If we are unable to fully utilize our capacity in the future this could affect our cost and profitability and thereby adversely affect the financial condition of our Company.

18. *We generate our entire sales from our operations in certain geographical regions especially Gujarat and any adverse developments affecting our operations in these regions could have an adverse impact on our revenue and results of operations.*

As on date of the Prospectus, our Company is executing orders majorly in Gujarat. Such geographical concentration of our business in this region heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in this region which may adversely affect our business prospects, financial conditions and results of operations. We may not be able to leverage our experience in this region to expand our operations in other parts of India and overseas markets, should we decide to further expand our operations.

Factors such as competition, culture, regulatory regimes, business practices and customs, industry needs, transportation, in other markets where we may expand our operations may differ from those in this region, and our experience in such region may not be applicable to other markets. In addition, as we enter new markets and geographical areas, we are likely to compete not only with national players, but also local players who might have an established local presence, are more familiar with local regulations, business practices and industry needs, have stronger relationships with local contractors, farmers, relevant government authorities, and who have access to existing waste sources or are in a stronger financial position than us, all of which may give them a competitive advantage over us. Our inability to expand at other locations may adversely affect our business prospects, financial conditions and results of operations. While our management believes that the Company has requisite expertise and vision to grow and mark its presence in other markets going forward, investors should consider our business and prospects in light of the risks, losses and challenges that we face as an early-stage company and should not rely on our results of operations for any prior periods as an indication of our future performance.

19. *We do not have any long-term agreement or contract for supply of Grey Fabric and Dyes, Chemicals, coal, or any other raw material used in our manufacturing unit or other service providers due to which we may face disruptions in supply from our current suppliers or service providers and are also exposed to price and supply fluctuations for our raw materials.*

We are, to a major extent, dependent on external suppliers for our raw materials requirements and we do not have any long-term supply agreements or commitments in relation to the same or for any other raw materials used in our manufacturing process and typically transact on an invoice basis for each order. There can be no assurance that there will not be a significant disruption in the supply of raw materials or finished products from current sources or, in the event of a disruption, that we would be able to locate alternative suppliers of materials or third party manufacturers of comparable quality on terms acceptable to us, or at all. Identifying a suitable supplier involves a process that requires us to become satisfied with their quality control, responsiveness and service, financial stability and labour and other ethical practices. Consequently, we are also exposed to price fluctuations in dyes, chemicals, coal or other raw materials, and these fluctuations may adversely affect our

ability to obtain orders and/or to execute them in a timely manner, which would have a material adverse effect on our business, results of operations and financial condition.

In case of non-availability of raw materials on favourable terms, we may have to procure the same at the terms and conditions prevalent at that point. This will result in reducing our revenues by a considerable amount due to shortage of raw material or due to inability to procure the same. Further, unfavourable terms of raw materials may also force us to reduce the scale of our operations resulting in a down-sizing of our overall business. We may have to put on hold any expansion plans and our future growth will be severely stunted. Any delay, interruption or increased cost in the supply of dyes, chemicals, coal or other raw material arising from a lack of long-term contracts could have an adverse effect on our ability to meet customer demand for our products and result in lower revenue from operations both in the short and long term.

20. *Our Company has not entered into any long-term contracts with most of its customers and we typically operate on the basis of orders. Inability to maintain regular order flow would adversely impact our revenues and profitability*

Our Company has had long standing business relationships with certain customers and has been supplying our products to such customers for several years. However, we have not entered into any contracts with these customers and we cater to them on an order-by-order basis. As a result, our customers can terminate their relationships with us without any notice and, without consequence, which could materially and adversely impact our business. Consequently, our revenue may be subject to variability because of fluctuations in demand for our products. Our Company's customers have no obligation to place order with us and may either cancel, reduce or delay orders. The orders placed by our Company's customers are dependent on factors such as the customer satisfaction with the level of service that our Company provides, fluctuation in demand for our Company's products and customer's inventory management.

Although we place a strong emphasis on quality, timely delivery of our products and after sales service such as feedback on the trends in their market, personal interaction by the top management with the customers, etc., in the absence of contracts, any sudden change in the buying pattern of buyers could adversely affect the business and the profitability of our Company.

21. *Inventories and trade receivables form a major part of our current assets and net worth. Failure to manage our inventory and trade receivables could have an adverse effect on our net sales, profitability, cash flow and liquidity.*

Our Company's business is working capital intensive and hence, inventories and trade receivables form a major part of our current assets and net worth. The results of operations of our business are dependent on our ability to effectively manage our inventory (raw material and finished goods) and trade receivables.

To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and purchase new inventory accordingly. However, if our management misjudges expected customer demand, it could cause either a shortage of products or an accumulation of excess inventory. Further, if we fail to sell the inventory we manufacture or purchase, we may be required to write-down our inventory or pay our suppliers without new purchases, or create additional vendor financing, all of which could have an adverse impact on our income and cash flows.

To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and dealers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. However, if our management fails to accurately evaluate the credit worthiness of our customers, it may lead to bad debts, delays in recoveries and / or write-offs which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. A liquidity crunch may also result in increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability.

22. *Our operations are subject to high working capital requirements. Our inability to maintain sufficient cash flow, credit facilities and other sources of funding, in a timely manner, or at all, to meet requirement of working capital or pay out debts, could adversely affect our operations.*

Our business requires significant amount of working capital. Major Portion of our working capital is utilized towards debtors and inventory. We have been sanctioned working capital of Rs 250.00 lakhs from the bankers.

Our growing scale and expansion, if any, may result in increase in the quantum of current assets. Our inability to maintain sufficient cash flow, credit facility and other sourcing of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations.

Further, we have high Debtors which may result in a high risk in case of non-payment by these Debtors. In the event we are not able to recover our dues from our Debtors, we may not be able to maintain our Sales level and thus adversely affecting our financial health. If this situation persists, we may not be able to pay our lenders / creditors and we may be forced to go for Corporate Debt Restructuring (CDR) which may result in adversely affecting our operations and future prospects.

23. *Our Company does not enter into any binding agreement with its Contract Labourers.*

As on current date, in addition to our full-time employees, we engage contract labour for our manufacturing process. Our operations and performance are labour intensive and depends on our ability to identify, attract and retain both skilled and unskilled labour. In case such labour is unavailable or we are unable to identify and retain such labourers our business could be adversely affected. We have not entered into any agreement for hiring contract labourers and thus availability of appropriately skilled labour cannot be guaranteed. Any failure to hire the appropriate labour may impact the operations and impair our client relations.

24. *We have significant power requirements for continuous running of our factories and as the connection is attached to the property, certain things are beyond the control of our promoters and directors. Any disruption to our operations on account of interruption in power supply or any irregular or significant hike in power tariffs may have an effect on our business, results of operations and financial condition.*

Our factories, godown and offices have significant electricity requirements and any interruption in power supply to our factories, godown and offices may disrupt our operations. Our business and financial results may be affected by any disruption of operations. We depend on third parties for all of our power requirements and currently source the same from Torrent Power. Since we have significant power consumption, any unexpected or significant increase in its tariff can increase the operating cost of factories, godown and offices and production cost which we may not be able to pass on to our customers. There are limited number of electricity providers in area from where we operate due to which in case of a price hike we may not be able to find a cost-effective substitute, which may negatively affect our business, financial condition and results of operations.

25. *We rely significantly on our Dealers or Distributors and Agents network in open market for sale of our products.*

We sell our products in open market through our network of Commission Agents/Distributors. Furthermore, our business growth depends on our ability to attract additional dealerships/distributorships to our network. While, we believe that we have good relations with our agents / distributors but there is no assurance that our current agents / distributors will continue to do business with us or that we can continue to attract additional dealers / distributors to our network. If we do not succeed in maintaining the stability of our dealership / distributorship network, our market share may decline materially affecting our results of operations and financial condition.

26. *We are dependent on third party transportation providers for the delivery of raw materials and products. Accordingly, continuing increases in transportation costs or unavailability of transportation services for our products, as well the extent and reliability of Indian infrastructure may have an adverse effect on our business, financial condition, results of operations and prospects*

We use third party transportation providers for the supply of most of our raw materials and for delivery of our products to our customers. Transportation strikes could have an adverse effect on our receipt of raw materials and our ability to deliver our products to our customers. Non-availability of ships, barges, trucks and railway cars could also adversely affect our receipt of raw materials and the delivery of our products.

In addition, transportation costs in India have been steadily increasing over the past several years. While usually the end consumer bears the freight cost, we may not always be able to pass on these costs to our customers. Continuing increases in transportation costs or unavailability of transportation services for our products may have an adverse effect on our business, financial condition, results of operations and prospects.

In addition, India's physical infrastructure is less developed than that of many developed nations, and problems with its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our normal business activity, including our supply of raw materials and the delivery of our products to customers by third-party transportation providers. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our business operations, which could have a material adverse effect on our results of operations and financial condition.

27. *Changes in technology may render our current technologies obsolete or require us to make substantial capital investments.*

Modernization and technology up-gradation is essential to provide better quality product. Although we strive to keep our technology in line with the latest standards, we may be required to implement new technology or upgrade the existing employed by us. Further, the costs in upgrading our technology could be significant which could substantially affect our finances and operations. Our failure or inability to incorporate any change in technology might place our competitors at an advantage in terms of costs, efficiency and timely delivery of the final products.

28. *Our Promoters, Directors have provided personal guarantees for a significant portion of our borrowings and collaterals to secure certain of our loans.*

All our Promoters and Directors have extended personal guarantees in favour of Abhyudaya Co-Operative Bank Ltd in relation to the borrowing facilities availed by our Company. In the event any such guarantees are revoked, our lenders may require us to furnish alternate guarantees, demand repayment of the amounts outstanding under the respective facilities or even terminate such facilities. There can be no assurance that our Company will be able to arrange any alternative guarantees in a timely manner or at all. If our lenders exercise their rights under the relevant debt financing agreements for want of such additional guarantees, our operations and use of assets may be significantly hampered, and our ability to avail further borrowings may be curtailed. Further, if we are required to repay the amounts outstanding under the aforesaid borrowing facilities, our business, results of operations and profitability may be adversely impacted. For further details, see "**Financial Indebtedness**" on pages 198 of this Prospectus.'

29. *Our lenders have charge over our movable in respect of finance availed by us.*

We have secured our lenders by creating a charge over our movable in respect of facilities availed by us from banks and financial institutions. The total amounts outstanding and payable by us as secured loans were Rs. 750.00 Lakhs as on the date of Prospectus. In the event we default in repayment of the facilities availed by us and any interest thereof, our properties may be forfeited by lenders, which in turn could have significant adverse effect on business, financial condition or results of operations. For further information on the Financial Indebtedness please refer to page 198 of this Prospectus.

30. *Conflicts of interest may arise out of common business undertaken by our Directors, our Promoters and Group Entities.*

Our Group Entity, Stitched Textiles (OPC) Private Limited is carrying out business similar to that of our Company. Our Chief Executive Officer (CEO) is also Promoter and Director of this Company. As a result, conflicts of interests may arise in allocating business opportunities in our Company. In case of conflict, our CEO may favour this Company in which our CEO has interests. There can be no assurance that our CEO, our Group Entities will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition.

Mr Khushant Gupta currently serves as our Managing Director and plays a key role in obtaining our current market position. Mr Mithlesh Agrawal also plays a pivotal role in the production and marketing areas, respectively. Our Sales & Marketing team is headed by our CEO Mr. Jaimin Gupta. Our reputation of timely delivery and quality of products has helped us retain our clients. Our CEO Mr. Jaimin gupta is actively involved in maintaining our existing customers

We believe that our relation with our Promoters, Directors and CEO, who have rich experience in business, developing markets, managing customers and handling overall businesses, has enabled us to experience growth and profitability. We receive benefit from our relationship with our Promoters, Directors and our success depends upon the continuing services of our Promoters and Directors who have been responsible for the growth of our business and are closely involved in the overall strategy, direction and management of our business.

Further, we also depend significantly on our Key Managerial Persons for executing their day to day activities. If our Promoters / Directors or any member of the senior management team is unable or unwilling to continue in his present position, our business, financial condition, results of operations and prospects may be materially and adversely affected.

36. *Our Company if not able to manage our growth or to successfully implement our business plan could have an effect on our business, results of operations and financial condition.*

The success of our business will depend greatly on our ability to effectively implement our business and growth strategy. Our growth strategy involves focusing on Optimal Utilization of Resources and to develop relationships with customer and suppliers and we may not be able to execute our strategies in the future. For further details, see the section titled “*Our Business – Our Strategies*” on page no. 99 of this Prospectus. Our success in implementing our growth strategies may be affected by:

- i. Our ability to identify new markets to expand;
- ii. Our ability to maintain the quality of our products;
- iii. Changes in the Indian regulatory environment in field of Textiles

Any of these factors could impact our results of operations. If our Company is not able to execute our strategy on time and within our estimated budget, or that our expansion and development plans fail to generate the required results, it may adversely impact our profitability. Further, our growth strategies could place significant demand on our management team and other resources and would require us to continuously develop and improve our operational, financial and other controls, none of which can be assured. Any failure on our part to scale up our infrastructure and management could cause disruptions to our business and could be detrimental to our long term business outlook. Further, we operate in a highly dynamic industry, and on account of changes in market conditions, industry dynamics, technological improvements or changes in trends and fashions and any other relevant factors, our growth strategy and plans may undergo changes or modifications, and such changes or modifications may be substantial, and may even include limiting or foregoing growth opportunities if the situation so demands. Our inability to implement our business strategies and sustain our growth may impair our financial growth and thus result in an adverse impact on our Company’s share price.

37. *The operations of our Company are subject to manufacturing risk and may be disrupted by failure in the facilities. These liabilities and costs could have a material adverse effect on our business, results of operations and financial condition.*

Due to the nature of the business we are required to be compliant with requisite safety requirements and standards. Our manufacturing facilities are subject to operating risk arising from compliance with the directives of relevant government authorities. The operations of our Company are also subject to operating risks, such as breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, earthquakes and other natural disasters and industrial accidents, fire or explosion, including hazards that may cause injury and loss of life, severe damage to and destruction of property and equipment and environmental damage. Such operating risks may result in non-compliance with government regulations,

property damage and personal injury which may result in the imposition of civil and criminal penalties, which may adversely affect public perception about our operations and the perception of our suppliers, clients and employees.

38. *Orders placed by customers may be delayed, modified, cancelled or not fully paid for by our customers, which may have an adverse effect on our business, financial condition and results of operations*

We may encounter problems in executing the orders in relation to our products, or executing it on a timely basis. Moreover, factors beyond our control or the control of our customers, including delays or failure to obtain necessary permits, authorizations, permissions and other types of difficulties or obstructions, may result in the postponement of the delivery of products or cause its cancellation. Further, the order could be rejected or sometime we need to do some modification as per requirement of the customers. Accordingly, it is difficult to predict with certainty if, when, and to what extent we may be able to deliver the orders placed. Failure to deliver products on time could lead to customers delaying or refusing to pay the amount, in part or full, which may adversely affect our business. In addition, even where a delivery proceeds as scheduled, it is possible that the contracting parties may default or otherwise fail to pay amounts owed. While we have not yet experienced any material delay, reduction in scope, cancellation, execution difficulty, delay or default in payment with regard to the orders placed with us, or any material disputes with customers in respect of any of the foregoing, any such adverse event in the future could materially harm our cash flow position and income. Many of our orders involve providing services that are critical to the operations of our customers business. Any failure or defect in services could result in a claim against us for substantial damages, regardless of our responsibility for such a failure or defect. Although our Company is attempting to limit its contractual liability for all the damages, including consequential damages, while rendering the services, our Company cannot be assured that the limitations on liability it provides for, in the service contracts will be enforceable in all cases. Any delay, modification, cancellation of order by our large customers may have material adverse effect on our financial condition and results of operations.

39. *Any changes in regulations or applicable government incentives would adversely affect the Company's operations and growth prospects.*

The GoI has provided several incentives to the textile sector, from which our Company may benefit, including the TUFs interest and capital subsidies. These incentives could be modified or removed at any time, or new regulations could be introduced applicable to our Company's business, which could adversely affect our Company's operations and financial results. Our Company is also subject to various regulations and textile policies, primarily in India. Our Company's business and prospects could be adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for its operations or that compliance issues will not be raised in respect of its operations, either of which would have a material adverse effect on the Company's operations and financial results.

40. *We do not have own trademark.*

Our Company does not have own trademark. Thus, we do not enjoy the statutory protections accorded to a registered logo/trademark as on date. There can be no assurance that we will be able to register the logo in future or that, third parties will not infringe our intellectual property, causing damage to our business prospects, reputation and goodwill. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property. For further details, please see the chapter titled "Government and Other Statutory Approvals" beginning on page 207 of this Prospectus.

41. *We do not hold any intellectual property protection in relation to our manufacturing processes*

The composition of cotton, yarn and fabric and the general manner in which they are produced are well-known and well-established. As a result, our research and development efforts are primarily directed towards developing new and more efficient production processes that are typically applicable to the current range of products we manufacture. Like many of our competitors, we possess extensive technical knowledge about our products. Our know-how is a significant independent asset, which may not be adequately protected by intellectual property

rights such as patent registration. We employ a high level of automation in our production processes, which result in high productivity and quality.

We also rely in part on mutual trust for protection of our trade secrets and confidential information relating to our manufacturing processes. It is our policy to take precautions to protect our trade secrets and confidential information against breach of trust by our employees, consultants, customers and suppliers and we have written confidentiality agreements with our employees. However, it is possible that unauthorized disclosure of our trade secrets or confidential information may occur. We cannot assure you that we will be successful in the protection of our trade secrets and confidential information.

Our manufacturing processes may not be eligible for intellectual property protection and others may be able to use the same or similar automation in production processes, thereby undermining any competitive advantage we may have derived from such processes and adversely affecting our financial condition and results of operations.

42. Compliance with, and changes in, safety, health and environmental laws and related laws and regulations impose additional costs and may adversely affect our results of operations and our financial condition

We are subject to a broad range of safety, health and environmental laws and related laws and regulations in the jurisdictions in which we operate, and may also be required by our clients to meet certain additional criteria with respect to safety, environment, health and labour. Such safety, health and environmental laws and regulations impose controls *inter alia* on the disposal and storage of raw materials, noise emissions, air and water discharges, on the storage, handling, discharge and disposal of chemicals, employee exposure to hazardous substances and other aspects of our operations and products. While we believe we are currently in compliance in all material respects with all applicable safety, health and environmental laws and regulations, the discharge of our or such third parties' raw materials that are chemical in nature or of other hazardous substances or other pollutants into the air, soil or water may nevertheless cause us to be liable to the Government of India or other governments where we operate or to third parties. The scope and extent of any new environmental, health and safety regulations, including their effect on our operations and cash flows, cannot be predicted with certainty. The cost and management time required to comply with these requirements could be significant. The measures we implement in order to comply with these new laws and regulations may not be deemed sufficient by Government authorities and our compliance cost may significantly exceed our estimates. Penalties imposed by regulatory authorities on us or on third parties upon whom we depend on may also disrupt our business and operations. In addition, we may be required to incur costs to remedy the damage caused by such discharges, pay fines or other penalties or close down the production facilities for non-compliance. We cannot assure you that we will not become involved in future litigation or other proceedings or be held responsible in any such future litigation or proceedings relating to safety, health and environmental matters in the future.

Further, we are subject to various regulations and textile policies, primarily in India. Our business, operations and growth prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that we will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which would have a material adverse effect on our business, financial condition and results of operations.

43. Our employee and labour expense is a significant component of our operating costs. An increase in employee expense could reduce our profitability.

Our operations are highly dependent on skilled and semi-skilled labour. Over the years, our employee and labour expense has been a significant component of our operating costs. In Fiscals 2019, 2018, 2017 and for stub period June 30 2019, our employee and labour expense was ₹ 190.03 lakhs, ₹ 132.21Lakhs, ₹12.06 Lakhs and ₹ 45.87 Lakhs respectively, constituting 7.16%,2.91% ,7.67 % and 9.01%, respectively, of our revenue from operations for such periods. Due to economic growth in the past and the increase in competition for skilled and semi-skilled employees in India, wages in India, in recent years, have been increasing. Further, our plans to expand in order to increase growth will also result in expansion of our work force and may therefore necessitate increased levels

of employee compensation. In addition, we may also need to increase our compensation levels to remain competitive in attracting and retaining the quality and number of skilled and semi-skilled employees that our business requires. Finally, our employees' salaries are linked to minimum wage laws in India, and any increase in the minimum wage in any state in which we operate could increase our operating costs. In addition, a shortage in the labour pool or general inflationary pressures will also increase our labour costs. A significant long-term increase in our employee benefit expense could reduce our profitability, which could, among other things, affect our growth, business and financial results.

45. Our Company has availed unsecured loan which are repayable on demand. Any demand from the lenders for repayment of such unsecured loan may affect our cash flow and financial condition.

Our Company, as per the restated financial statement, has availed total sum of ₹96.43 lakhs and ₹ 40.70 lakhs as unsecured loan as on June 30, 2019 and March 31, 2019, which may be recalled at any time. Sudden recall may disrupt our operations and also may force us to opt for funding at higher interest rates, resulting in higher financial burden. Further, we will not be able to raise funds at short notice and thus result in shortage of working capital fund. For further details, please refer the chapter "Financial Information" on page no. 155 of this Prospectus. Any demand for the repayment of such unsecured loan, may adversely affect our cash flow and financial condition.

46. We constantly face a credit risk which may in turn affect our complete buying cycle adversely.

As a textile manufacturing and trading Company, our primary competence is the ability to manufacture, finish and market our textile products for various consumer segments, and hence exploit the benefits of variety, economies of scale and credit shortage in the textile trade. Our requirement of working capital is high mainly due to our ability to procure and store sufficient amounts of raw materials and finished goods, thus relieving our units with disruptions and work stoppages. Once the production process is complete, we are required to give sufficient credit period to our customers in order to maintain our customer relations and competitiveness. Our Debtors turnover period is an average approximately 80 days while our Creditors turnover period ranges in approximately 55 days leading to a considerable working capital gap.

Our aforementioned buying cycle is heavily dependent on timely payments being received from our customers. If there is a default in payment from any of our customers or there is any unforeseeable delay in payment, our

working capital cycle will be adversely affected. This may lead to our inability to maintain our inventories and thus lack the competitive advantage against various other manufacturers leading to an adverse effect on our business operations and profitability.

47. *Our Company's manufacturing activities are labour intensive and depend on availability of skilled and unskilled labourers in large numbers. In case of unavailability of such labourers and / or inability to retain such personnel, our business operations could be affected.*

Our Company has employed 38 employees all of whom are on our payrolls. The above includes employees in the Top and middle management (including Executive Directors), and also employees who are part of manufacturing unit and office staff. Our operations and performance are labour intensive and depends on our ability to identify, attract and retain both skilled and unskilled labour. In case such labour is unavailable or we are unable to identify and retain such labourers, our business could be adversely affected.

Further, there are instances where we need to hire additional contract labour, either for specialized jobs or during periods of high customer orders. We have not entered into any agreement for hiring additional labourers and thus availability of appropriately skilled labour cannot be guaranteed. Any failure to hire the appropriate labour may impact the operations and impair our client relations.

48. *We have high financial indebtedness which could adversely affect our financial condition and results of operations and further we may not be able to meet our obligations under the debt financing agreements.*

In the event that we fail to meet our debt servicing obligations under our financing documents, the relevant lenders could declare us to be in default, accelerate the maturity of our obligations or takeover our project or even sell our Company's movable and immovable assets. We cannot assure investors that in the event of any such acceleration we will have sufficient resources to repay these borrowings. Failure to meet obligations under debt financing agreements may have an adverse effect on our cash flows, business and results of operations. Our ability to meet our debt service obligations and to repay our outstanding borrowings will depend primarily upon the cash flows generated by our business. We cannot assure you that we will generate sufficient cash to enable us to service existing or proposed borrowings. Incurring significant indebtedness may limit our flexibility in planning for or reacting to changes in our business & industry and limit our ability to borrow additional funds. Further, our level of indebtedness has important consequences to us, such as:

- increasing our vulnerability to general adverse economic, industry and competitive conditions;
- limiting our flexibility in planning for, or reacting to, changes in our business and the industry;
- affecting our credit rating;
- limiting our ability to borrow more money both now and in the future; and
- increasing our interest expenditure and adversely affecting our profitability

For further details please refer the chapter "*Financial Indebtedness*" on page no. 198 of this Prospectus.

49. *Our Company depends on timely identification of evolving fashion trends and creating new designs. Any lag on the part of our Company in this regard may adversely affect our business operations.*

The key success factor in the textiles business is in creating appealing designs and colour combinations to create buyer appeal. In order to be in line with this success factor, we maintain a team of in house designers who design and develop the products as per customer's needs. This team works on the development of designs by analysing the needs of clients by parameters like latest dyeing combinations, new printing techniques & patterns and most importantly the feedback gained from the sales of the similar products that were designed earlier. Our inability to tap the changing fashion can lead to rejection and obsolescence of our textiles thus damaging goodwill, business operations and financial conditions. It is very important for the designing team and also the Company's management to have a good understanding of the trends prevailing in that particular country.

50. *Our funding requirements and deployment of the issue proceeds are based on management estimates and actual cost may vary compared with the estimated amount.*

Our funding requirement and deployment of the proceeds of the issue are based on management estimates and our current business plan. The fund requirements and intended use of proceeds have not been appraised by banks or financial institutions and are based on our estimates. In view of the highly competitive nature of the industry in which we operate, we may have to revise our management estimates from time to time and, consequently, our

funding requirements may also change as a result of various factors which may not be within the control of our management. This may entail rescheduling, revising or cancelling the planned expenditure and fund requirement and increasing or decreasing the working capital limits maintained from time to time at the discretion of our board. In addition, schedule of implementation as described herein are based on management's current expectations and our subject to change due to various factors some of which may not be in our control. The deployment of the funds towards the objects of the issue is entirely at the discretion of the Board of Directors and is not subject to monitoring by external independent agency. However, the deployment of funds is subject to monitoring by our Audit Committee.

51. *One of the Key Management Personnel is associated with the Company for less than one year.*

One of the Key Management Personnel i.e. Company Secretary & Compliance Officer is associated with the Company for a period of less than one year. For details of Key Management Personnel and their appointment, please refer to chapter "Our Management" beginning on page 134 of this Prospectus.

52. *Reliance has been placed on declarations and affidavits furnished by certain of our Directors/ Promoters and KMPs for details of their profiles included in this Prospectus.*

Mr. Mithilesh Agarwal, our Director/ Promoter and our KMP Mr. Pratapsingh B. Zala have been unable to trace copies of certain documents pertaining to their educational qualifications. Our Company has obtained confirmations from the relevant Directors and Promoters, that they have made their best efforts to procure the relevant supporting documents for these disclosures being made in this Prospectus and in spite of such efforts, certain documents were not traceable. Accordingly, reliance has been placed on declarations, undertakings and affidavits furnished by these Directors and Promoters to disclose details of their educational qualifications in this Prospectus and we have not been able to independently verify these details. Therefore, we cannot assure you that all information relating to the educational qualifications of certain of our Directors and Promoters included in "Management" and "Promoter and Promoter Group" beginning on pages 134 and 146, respectively, are complete, true and accurate.

53. *Our business is dependent on our operating facilities. The loss or shutdown of our facilities could have a material adverse effect on our business, financial condition and results of operations*

Our facilities at Ahmedabad are subject to operating risks, such as shutdowns due to the breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, adequate utilisation rates, obsolescence of equipment, labour disputes, strikes, lockouts, industrial accidents, disruption by extremist groups, or any other reason, and the need to comply with the directives and regulations of the Government of India ("GoI") and relevant state government authorities. We are heavily reliant on workers at our unit, including those workers who are hired on a contract basis and are not on a fixed payroll. Our inability to continue to procure such services or any disputes with this group of labour would severely affect our operations and may cause a under-utilisation of our capacities or a total shut down.

Our operations involve a significant degree of integration, and our results of operations are dependent on the successful operation of each facility. Although we take precautions to minimize the risk of any significant operational problems at our facilities, our business, financial condition, results of operations and prospects may be adversely affected by any disruption of operations at our facilities.

54. *Our insurance coverage may not adequately protect us against all material hazards, which may adversely affect our business, results of operations and financial condition.*

Our business, assets and vehicles could suffer damage from fire, natural calamities, misappropriation or other causes, resulting in losses, which may not be fully compensated by insurance. There can be no assurance that the terms of our insurance policies will be adequate to cover any damage or loss suffered by our Company or that such coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim.

Further, our Company is required to renew these insurance policies from time to time and in the event, we fail to renew the insurance policies within the time period prescribed in the respective insurance policies or not obtain at all, our Company may face significant uninsured losses. If our Company suffers a large uninsured loss or if an

insured loss suffered, significantly exceeds our insurance coverage, our business, financial condition and results of operations may be adversely affected.

55. *We face competition in our business from organized and unorganized players, which may adversely affect our business operation and financial condition.*

The State of Gujarat and especially Ahmedabad is one of the main place for the Textile Industry and this has resulted in huge competitive pressures. We may have to confront pressures in respect of pricing; product quality etc. from the clients and such pressures may put strain on our profit margins which may consequently affect the financial position of our Company. Competition emerges not only from the organized sector but also from the unorganized sector and from both small and big players. We are also in direct competition with the leading textile manufacturing units in India as well as the local units. Our Competitiveness is also measured by the technology we adopt as the textile industry is rapidly growing in India and in International Markets. Some of our clients might export their final products which in turn compel us to meet international standards also. Our inability to compete with this intense competition; local, national and international will have material adverse impact on our Company's financial position.

56. *Our Company has entered into certain related party transactions in the past and may continue to do so in the future, which may potentially involve conflicts of interest with the equity shareholders.*

Our Company has entered into certain transactions with our related parties including our Promoters, Promoters Group, Directors and their relatives. While we believe that all such transactions have been conducted on the arm's length basis, we cannot assure you that we might have obtained more favourable terms had such transactions been entered into with unrelated parties.

Furthermore, it is likely that we may enter into related party transactions in the future. We cannot assure you that such transactions, individually or in the aggregate, will always be in the best interests of our minority shareholders and will not have an adverse effect on our business, results of operations, cash flows and financial condition. For details, please refer "*Financial Statements – Related Party Transactions*" on page no. 186 of this Prospectus.

57. *Our lenders have imposed certain restrictive conditions on us under our financing arrangements. Under our financing arrangements, we are required to obtain the prior, written lender consent for, among other matters, changes in our capital structure, formulate a scheme of amalgamation or reconstruction and entering into any other borrowing arrangement. Further, we are required to maintain certain financial ratios.*

There can be no assurance that we will be able to comply with these financial or other covenants or that we will be able to obtain the consents necessary to take the actions we believe are necessary to operate and grow our business. Our level of existing debt and any new debt that we incur in the future has important consequences. Any failure to comply with these requirements or other conditions or covenants under our financing agreements that is not waived by our lenders or is not otherwise cured by us, may require us to repay the borrowing in whole or part and may include other related costs. Our Company may be forced to sell some or all of its assets or limit our operations. This may adversely affect our ability to conduct our business and impair our future growth plans. For further information, see the chapter titled '*Financial Indebtedness*' on page 198 of the Prospectus.

58. *Our business operations may be materially adversely affected by strikes, work stoppages or increased wage demands by our employees or those of our suppliers.*

We have not experienced any major disruptions to our business operations due to disputes or other problems with our work force in the past; there can be no assurance that we will not experience such disruptions in the future. Such disruptions may adversely affect our business and results of operations and may also divert the management's attention and result in increased costs. India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Although our employees are not currently unionized, there can be no assurance that they will not unionize in the future. If our employees unionize, it may become difficult for us to maintain flexible labour policies, and we may face the threat of labour unrest, work stoppages and diversion of our management's attention due to union intervention, which may have a material adverse impact on our business, results of operations and financial condition. We are also subject to laws and regulations governing relationships with

employees, in such areas as minimum wage and maximum working hours, overtime, working conditions, hiring and terminating of employees and work permits. Shortage of skilled personnel or work stoppages caused by disagreements with employees could have an adverse effect on our business and results of operations.

59. *There are certain delays relating to forms filed with the Registrar of Companies in terms of Companies Act, 1956/2013. Any penalty or action taken by any regulatory authorities in future for such delays could impact the financial position of our Company to that extent.*

Name of the Form	Financial Year	Additional Fees paid (₹)
AOC-4	2015-2016	Rs. 6000
AOC-4	2016-2017	Rs. 5000
MGT-7	2015-2016	Rs. 6000
MGT-7	2016-2017	Rs. 5000

Any penalty or action taken by regulatory authority in future for delay could impact the financial position of our Company to that extent.

60. *Some of our corporate records are not traceable.*

Certain corporate records and regulatory filings made by us, including those in relation to: (i) certain share transfer forms, in relation transactions entered by our Promoters in the financial year 2009-2010; and (ii) certain ROC Forms. Some of filed ROC forms, such as incorporation forms, Annual Return, copy of resolution are also not traceable. Accordingly, have relied on other documents, including our statutory registers of members and share transfer, annual reports and audited financial statements for such matters. However, we have not been able to retrieve the aforementioned documents, and we cannot assure you that the abovementioned form filings and resolutions will be available in the future. Such non-compliance may in future render us liable to statutory penalties which may have adverse effect on the reputation and result of operations of our Company.

61. *Contingent liabilities could adversely affect our financial condition. Crystallization of any of these contingent liabilities may adversely affect our financial condition.*

Our contingent liabilities as indicated in our Restated Financial Statements and also certified by our statutory auditors were as follows:

Particulars	For the period 30th June,	As at March 31		
	2019	2019	2018	2017
Contingent Liabilities				
Income Tax Litigation	127.67	127.67	127.67	127.67
TOTAL	127.67	127.67	127.67	127.67

We believe these claims will be dismissed, But in the event that any of our contingent liabilities materialize, our business, financial condition and results of operations may be adversely affected. Furthermore, there can be no assurance that we will not incur similar or increased levels of contingent liabilities in the current fiscal year or in the future. For further information, please refer “Annexure XXIV - Contingent Liability” on page no. 185 of this Prospectus.

62. *Changes in latest technology machinery/ requirement of machinery based on business opportunity may adversely affect our Company’s results of operations and its financial condition.*

Modernisation and technology up gradation is essential to reduce costs and increase the output. Changes in technology may render our current technologies obsolete or require us to make substantial capital investments. However, our existing manufacturing units have machineries with latest technology and we strive to keep our

technology, equipment's and machinery in line with the latest technological standards. But in future we may be required to implement new technology or upgrade the machineries and other equipment's employed by us. Further, the costs in upgrading our technology and modernizing the plant and machineries may be significant which could substantially affect our finances and operations.

Further in case of machinery requirement based on business opportunity/ latest technology machinery, we will have to incur huge expenditure which may adversely affect our Company's results of operations and its financial condition. Also inability to up-grade our technology and key infrastructure on timely basis may hamper our operations and financial conditions.

63. In addition to remuneration, other benefits and reimbursement of expenses our Directors (including our Promoters) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.

Some of our Directors (including our Promoters) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company, in addition to normal remuneration, incentives or benefits and reimbursement of expenses. We cannot assure you that our Directors or our Key Management Personnel would always exercise their rights as Shareholders to the benefit and best interest of our Company. As a result, our Directors will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. Our Directors may take or block actions with respect to our business, which may conflict with our best interests or the interests of other minority Shareholders, such as actions with respect to future capital raising or acquisitions. We cannot assure you that our Directors will always act to resolve any conflicts of interest in our favour, thereby adversely affecting our business and results of operations and prospects.

64. Our Corporate Promoters, have incurred losses in recent financial years.

Our Corporate Promoters, have incurred losses during the preceding Financial Years. For further details of the, see "*Our Promoter and Promoter Group*", beginning on page 140. There can be no assurance that the Group Companies will not incur losses in the future or that there will not be an adverse effect on our Company's reputation or business as a result of such losses.

65. The Promoter and Director holds Equity Shares in our Company and are therefore interested in our Company's performance in addition to their remuneration and reimbursement of expenses.

Mr. Kushant Gupta, our Promoter and Managing Director and Mr. Mithlesh kumar Agrawal, our Promoter and Non-Executive Director are interested in our Company to the extent of their shareholding in our Company, in addition to any regular remuneration, sitting fees, benefits or reimbursement of expenses as may be payable to them. We cannot assure you that our Promoter or Director will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters and Promoter Group will continue to influence decisions requiring voting of shareholders. For details on the interest of our Promoter and Director of our Company, other than reimbursement of expenses incurred or normal remuneration or benefits, see "*Our Management – Interest of our Directors*" and "*Promoter, Promoter Group and Group Companies*" - Interest of our Promoters" on pages 134 and 146, respectively.

66. The average cost of acquisition of Equity Shares by our Promoters is lower than the issue price.

Our Promoters average cost of acquisition of Equity Shares in our Company is lower than the issue price. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer chapter title "*Capital Structure*" beginning on page 60 of this Prospectus.

67. Our Promoters and Promoter Group will continue to retain majority shareholding in us after the Issue, which will allow them to exercise significant influence over us and potentially create conflicts of interest.

Our Promoter and Promoter Group may beneficially own approximately 73.50 % of our post-Issue equity share capital. As a result, the Promoter Group may have the ability to control our business including matters relating to any sale of all or substantially all of our assets, the timing and distribution of dividends and the election or termination of appointment of our officers and directors. This control could delay, defer or prevent a change in

control of the Company, impede a merger, consolidation, takeover or other business combination involving the Company, or discourage a potential acquirer from making a tender Offer or otherwise attempting to obtain control of the Company even if it is in the Company's best interest. In addition, for so long as the Promoter Group continues to exercise significant control over the Company, they may influence the material policies of the Company in a manner that could conflict with the interests of our other shareholders. The Promoter Group may have interests that are adverse to the interests of our other shareholders and may take positions with which our other shareholders do not agree.

68. Employee misconduct, errors or fraud could expose us to business risks or losses that could adversely affect our business prospects, results of operations and financial condition.

Employee misconduct, errors or frauds could expose us to business risks or losses, including regulatory sanctions, penalties and serious harm to our reputation. Such employee misconduct includes breach in security requirements, misappropriation of funds, hiding unauthorized activities, failure to observe our stringent operational standards and processes, and improper use of confidential information. It is not always possible to detect or deter such misconduct, and the precautions we take to prevent and detect such misconduct may not be effective. In addition, losses caused on account of employee misconduct or misappropriation of petty cash expenses and advances may not be recoverable, which we may result in write-off of such amounts and thereby adversely affecting our results of operations. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions in which case, our reputation, business prospects, results of operations and financial condition could be adversely affected.

69. Any disproportionate increase in labour costs including increase in wage/salary demand, labour unrest or labour claims arising from accidents may adversely affect our business operations and financial conditions.

Our increasing business operations may require our employee strength to increase in future. In the past our Company has not experienced any labour unrest, but there is no assurance that it will not experience the same at any time in the future. Also, there is a possibility that the labour costs increase disproportionately due to increase in wage/salary demand. In this event, if our Company is unable to pass on the increased costs to our customers, our business operations and financial conditions may be adversely affected.

70. Our company is yet to file necessary documents with the regulatory / statutory authorities and agencies for the notation of the change of name after conversion into a limited company.

Our Company was converted from Private Limited Company to a Public Limited Company vide Certification of Incorporation dated March 21, 2018. The licenses and registrations obtained by our company are still in the previous name. All such approvals/ licenses /registrations are required to be revised. Our Company is in the process of getting such licenses / registration renewed / revised from the concerned regulatory / statutory authorities and agencies. Our business operations may be impacted till we receive the aforesaid registration. For further details please refer to the section titled "Government Approvals and Licensing Arrangements" on page 207 of this Prospectus.

71. Certain agreements, Transfer Deeds may be inadequately stamped or may not have been registered as a result of which our operations may be adversely affected.

Few of our agreements, transfer deeds may not be stamped adequately or registered. The effect of inadequate stamping is that the document is not admissible as evidence in legal proceedings and parties to that agreement may not be able to legally enforce the same, except after paying a penalty for inadequate stamping. The effect of non-registration, in certain cases, is to make the document inadmissible in legal proceedings. Any potential dispute due to non-compliance of local laws relating to stamp duty and registration may adversely impact the operations of our Company.

72. Negative publicity could adversely affect our revenue model and profitability of our Company.

Our business is dependent on the trust our customers have reposed in the quality of our services. Any negative publicity our Company and service due to any other unforeseen events could affect our reputation and our results from operations. Further, our business may also be affected if there is any negative publicity associated with the

services which are being rendered by our Company which may indirectly result in erosion of our reputation and goodwill.

73. In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects / schedule of implementation of this issue which would in turn affect our revenues and results of operations.

The funds that we receive would be utilized for the Objects of the Fresh Issue as has been stated in the Chapter “Objects of the Issue” on page no. 72 of the Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management’s estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, we may have to revise our business, development and working capital plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and results of operations.

74. Statistical and industry data in this Prospectus may be inaccurate, incomplete or unreliable.

We have not independently verified data obtained from industry publications and other sources referred to in this Prospectus. This Prospectus includes information that is derived from the website of IBEF and other relevant sources. Neither we, nor the LMs, nor any other person connected with the issue has verified the information in the website of IBEF and other sources. 75. The requirements of being a public listed company may strain our resources and impose additional requirements.

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange which require us to file unaudited financial results on a half yearly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management’s attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner.

RISK FACTORS RELATED TO EQUITY SHARES

76. Any further issuance of Equity Shares by Our Company or sales of Equity Shares by any significant shareholders may adversely affect the trading price of the Equity Shares.

Any future issuance of Equity Shares by our Company could dilute the investors’ shareholding. Any such future issuance of Equity Shares or sales of Equity Shares by any of our significant shareholders may also adversely affect the trading price of the Equity Shares, and could impact our ability to raise capital through an Issuing of securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares.

77. There is no existing market for our Equity Shares, and we do not know if one will develop. Our stock price may be highly volatile after the Issue and, as a result, you could lose a significant portion or all of your investment.

There is no guarantee that our Equity Shares will be listed on the Stock Exchanges in a timely manner or at all and any trading closures at the Stock Exchanges may adversely affect the trading price of our Equity Shares. Prior to the Issue, there has not been a public market for the Equity Shares. Further, we cannot predict the extent to which investor interest will lead to the development of an active trading market on the Stock Exchanges or how liquid that market will become. If an active market does not develop, you may experience difficulty selling the Equity Shares that you purchased. The Issue Price is not indicative of prices that will prevail in the open market following the Issue. Consequently, you may not be able to sell your Equity Shares at prices equal to or greater than the Issue Price. The market price of the Equity Shares on the Stock Exchanges may fluctuate after listing as a result of several factors, including the following:

- i. Volatility in the Indian and other Global Securities Markets;
- ii. The performance of the Indian and Global Economy;
- iii. Risks relating to our business and industry, including those discussed in this Prospectus;
- iv. Strategic actions by us or our competitors;
- v. Investor perception of the investment opportunity associated with the Equity Shares and our future performance;
- vi. Adverse media reports about us, our shareholders or our Group Companies;
- vii. Future sales of the Equity Shares;
- viii. Variations in our quarterly results of operations;
- ix. Differences between our actual financial and operating results and those expected by investors and analysts;
- x. Our future expansion plans;
- xi. Perceptions about our future performance or the performance of textile sector companies;
- xii. Performance of our competitors in the Textile industry and the perception in the market about investments in the Textile sector;
- xiii. Significant developments in the regulation of the Textile industry in our key locations;
- xiv. Changes in the estimates of our performance or recommendations by financial analysts;
- xv. Significant developments in India's economic liberalisation and deregulation policies; and
- xvi. Significant developments in India's fiscal and environmental regulations. There has been significant volatility in the Indian stock markets in the recent past, and our Equity Share

Price could fluctuate significantly as a result of market volatility. A decrease in the market price of the Equity Shares could cause you to lose some or all of your investment.

78. Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements, and that of our associate and the dividends they distribute to us. In the past, we have not made dividend payments to the Shareholders of our Company. The Company may decide to retain all future earnings, if any, for use in the operations and expansion of the business. In such situation, the Company may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board and will depend on factors that our Board deems relevant, including among others, our future earnings, financial condition, cash requirements, business prospects and any other financing arrangements. We cannot state with any certainty whether we will be able to pay dividends in the future. Accordingly, realization of a gain on Shareholders' investments will depend on the appreciation of the price of the Equity Shares. There is no guarantee that our Equity Shares will appreciate in value.

79. Our Equity Shares are quoted in Indian Rupees in India, and therefore investors may be subject to potential losses arising out of exchange rate risk on the Indian Rupee and risks associated with the conversion of Indian Rupee proceeds into foreign currency.

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchange. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse

movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by Equity Shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may have an adverse effect on the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

80. Our Company may be subject to Indian taxes on the sale of the Equity Shares.

Under current Indian tax laws, capital gains arising from the sale of Equity Shares in an Indian company are generally taxable in India. However, any gain realized on the sale of listed equity shares on or before March 31, 2018 on a stock exchange held for more than 12 months will not be subject to long term capital gains tax in India if Securities Transaction Tax ("STT") is paid on the sale transaction and additionally, as stipulated by the Finance Act, 2017, STT had been paid at the time of acquisition of such equity shares on or after October 1, 2004, except in the case of such acquisitions of equity shares which are not subject to STT, as notified by the Central Government under notification no. 43/2017/F. No. 370142/09/2017- TPL on June 5, 2017. However, the Finance Act, 2018, has now levied taxes on such long-term capital gains exceeding ₹ 100,000 arising from sale of Equity Shares on or after April 1, 2018, while continuing to exempt the unrealized capital gains earned up to January 31, 2018 on such Equity Shares subject to specific conditions. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realised on the sale of listed Equity Shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on again upon the sale of the Equity Shares. Additionally, in view of the individual nature of the tax consequences and the changing tax laws, each prospective investor is advised to consult their own tax consultant with respect to the specific tax implications arising out of their participation in this issue.

Further, the Government has announced the interim union budget for Fiscal 2020 and the Finance Act, 2019 has been granted Presidential assent on February 21, 2019 and published in the Gazette on the same date. It includes amendments to the Indian Stamp Act, 1899 that stipulate the buyer to be responsible for payment of stamp duty, in case of sale of securities through stock exchanges, and the transferor/issuer in case the transaction is undertaken through a depository or otherwise than through a stock exchange. Accordingly, the Finance Act proposes that the sale, transfer and issue of securities through exchanges, depositories or otherwise be charged with stamp duty. The Finance Act, 2019 has also clarified that, in the absence of a specific provision under an agreement, the liability to pay stamp duty in case of sale of securities through stock exchanges will be on the buyer, while in other cases of transfer for consideration through a depository, the onus will be on the transferor. The stamp duty for transfer of securities other than debentures, on a delivery basis is specified at 0.015% and on a non-delivery basis is specified at 0.003% of the consideration amount. The proposed amendments to the Indian Stamp Act, 1899 pursuant to the Finance Act, 2019 shall be effective from a date yet to be notified by the Government in the Gazette.

As such, there is no certainty on the impact that the Finance Act, 2019 may have on our business and operations or on the industry in which we operate. Further, the budget which has been currently proposed for Fiscal 2020, is merely an interim budget. The full union budget is likely to be announced post the general elections, scheduled this year, pursuant to which the Government may introduce additional tax proposals. We cannot predict whether any tax laws or regulations impacting our products will be enacted, what the nature and impact of the specific terms of any such laws or regulations will be or whether, if at all, any laws or regulations would have a material adverse effect on our business, financial condition, results of operations and cash flows.

EXTERNAL RISK FACTORS

81. The Companies Act, 2013 has effected significant changes to the existing Indian company law framework, which may subject us to higher compliance requirements and increase our compliance costs.

A majority of the provisions and rules under the Companies Act, 2013 have recently been notified and have come into effect from the date of their respective notification, resulting in the corresponding provisions of the Companies Act, 1956 ceasing to have effect. The Companies Act, 2013 has brought into effect significant changes to the Indian company law framework, such as in the provisions related to issue of capital, disclosures

in prospectus, corporate governance norms, audit matters, related party transactions, introduction of a provision allowing the initiation of class action suits in India against companies by shareholders or depositors, a restriction on investment by an Indian company through more than two layers of subsidiary investment companies (subject to certain permitted exceptions), prohibitions on loans to directors and insider trading and restrictions on directors and key managerial personnel from engaging in forward dealing. Further, companies meeting certain financial thresholds are also required to constitute a committee of the board of directors for corporate social responsibility activities and ensure that at least 2% of the average net profits of the company during three immediately preceding financial years are utilized for corporate social responsibility activities. Penalties for instances of non-compliance have been prescribed under the Companies Act, 2013, which may result in inter alia, our Company, Directors and key managerial employees being subject to such penalties and formal actions as prescribed under the Companies Act, 2013, should we not be able to comply with the provisions of the New Companies Act within the prescribed timelines, and this could also affect our reputation.

To ensure compliance with the requirements of the Companies Act, 2013 within the prescribed timelines, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention. While we shall endeavour to comply with the prescribed framework and procedures, we may not be in a position to do so in a timely manner.

The Companies Act, 2013 introduced certain additional requirements which do not have corresponding equivalents under the Companies Act, 1956. Accordingly, we may face challenges in interpreting and complying with such provisions due to limited jurisprudence on them. In the event, our interpretation of such provisions of the Companies Act, 2013 differs from, or contradicts with, any judicial pronouncements or clarifications issued by the Government in the future, we may face regulatory actions or we may be required to undertake remedial steps. Additionally, some of the provisions of the Companies Act, 2013 overlap with other existing laws and regulations (such as the corporate governance norms and insider trading regulations). We may face difficulties in complying with any such overlapping requirements. Further, we cannot currently determine the impact of provisions of the Companies Act, 2013, which are yet to come in force. Any increase in our compliance requirements or in our compliance costs may have an adverse effect on our business and results of operations.

82. Our business and the price of the Equity Shares may be adversely affected by the implementation of GAAR.

The Government of India has also proposed provisions relating to GAAR which came into effect from April 1, 2017. The GAAR provisions intend to catch arrangements declared as “impermissible avoidance arrangements”, which is any arrangement the main purpose or one of the main purposes of which is to obtain a tax benefit and which satisfy atleast one of the following tests:

- (i) creates rights, or obligations, which are not ordinarily created between persons dealing at arm’s length; (ii) results in misuse, or abuse, of the provisions of the tax laws;
- (iii) lacks commercial substance or is deemed to lack commercial substance, in whole or in part; or
- (iv) is entered into, or carried out, by means, or in a manner, which are not ordinarily employed for bona fide purposes.

The onus to prove that the transaction is not an “impermissible avoidance agreement” is on the assessee, i.e., an arrangement shall be presumed, unless it is proved to the contrary by the assessee, to have been entered into, or carried out, for the main purpose of obtaining a tax benefit, if the main purpose of a step in, or a part of, the arrangement is to obtain a tax benefit, notwithstanding the fact that the main purpose of the whole arrangement is not to obtain a tax benefit. If GAAR provisions are invoked, then the tax authorities will have wide powers, including denial of tax benefit or a benefit under a tax treaty which may have an adverse tax impact on us.

83. Public companies in India, including our Company, are required to compute income tax under the ICDS. The transition to ICDS in India is very recent and we may be negatively affected by such transition.

The Ministry of Finance had issued a notification dated March 31, 2015 notifying ICDS which creates a new framework for the computation of taxable income. However, the Central Board of Direct Taxes (“**CBDT**”), Ministry of Finance of India, according to its press release dated July 6, 2016, had deferred the applicability of the ICDS with fiscal 2017 being the first assessment year. ICDS deviates in several respects from concepts that are followed under general accounting standards, including Indian GAAP and IND AS. It is often seen that ICDS based calculations of taxable income can differ from Indian GAAP or IND AS-based concepts and they can have

the effect of requiring taxable income to be recognized earlier, increasing overall levels of taxation or both. There can be no assurance that the adoption of ICDS will not adversely affect our business, results of operation and financial conditions.

84. Any changes in the regulatory framework could adversely affect our operations and growth prospects.

Our Company is subject to various regulations and policies. For details see section titled “*Key Industry Regulations and Policies*” beginning on page no. 115 of this Prospectus. Our business and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse effect on our business, financial condition and results of operations.

85. QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid.

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Investors can revise their Bids during the Bid/Issue Period and withdraw their Bids until Bid/Issue Closing Date. While our Company is required to complete Allotment pursuant to the Issue within six Working Days from the Bid/Issue Closing Date, events affecting the Bidders’ decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operation or financial condition may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the Bidders’ ability to sell the Equity Shares Allotted pursuant to the Issue or cause the trading price of the Equity Shares to decline on listing.

86. Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.

In the recent past, India has experienced fluctuating wholesale price inflation as compared to historical levels due to the global economic downturn. The annual rate of inflation was at 5.77% (provisional) for the month of June 2018 (over June 2017) as compared to 4.43% (provisional) for the previous month and 0.90% during the corresponding month of 2017. (Source: *Index Numbers of Wholesale Price in India, Review for the month of June 2018, published on July 16, 2018 by Government of India, Ministry of Commerce and Industry*). Continued high rates of inflation may increase our expenses related to salaries or wages payable to our employees, prices of raw materials or any other expenses that we incur. We cannot assure you that we will be able to pass on any additional expenses to our patients or that our revenue will increase proportionately corresponding to such inflation. Accordingly, high rates of inflation in India could have an adverse effect on our profitability and, if significant, on our financial condition.

87. It may not be possible for investors outside India to enforce any judgment obtained outside India against our Company or our management or any of our associates or affiliates in India, except by way of a suit in India.

Our Company is incorporated under the laws of India. Our Company’s assets are primarily located in India and all of our Directors and Key Managerial Personnel are residents of India. As a result, it may not be possible for investors to effect service of process upon our Company or such persons in jurisdictions outside India, or to enforce against them judgments obtained in courts outside India. Recognition and enforcement of foreign judgements are provided for under Section 13 of the Civil Procedure Code (“CPC”) on a statutory basis. Section 13 of the CPC provides that foreign judgements shall be conclusive regarding any matter directly adjudicated upon, except (i) where the judgement has not been pronounced by a court of competent jurisdiction; (ii) the judgement has not been given on the merits of the case; (iii) where it appears on the face of the proceedings that the judgement is founded on an incorrect view of international law or a refusal to recognise the law of India in

cases to which such law is applicable; (iv) where the proceedings in which the judgement was obtained were opposed to natural justice; (v) where the judgement has been obtained by fraud; or (vi) where the judgement sustains a claim founded on a breach of any law then in force in India. Under the CPC, a court in India shall, upon the production of any document purporting to be a certified copy of a foreign judgement, presume that the judgement was pronounced by a court of competent jurisdiction, unless the contrary appears on record. However, under the CPC, such presumption may be displaced by proving that the court did not have jurisdiction. India has reciprocal recognition and enforcement of judgments in civil and commercial matters with only a limited number of jurisdictions, including the United Kingdom, Singapore and Hong Kong. In order to be enforceable, a judgment from a jurisdiction with reciprocity must meet certain requirements of the Indian Code of Civil Procedure, 1908 (the “Civil Code”). The Civil Code only permits the enforcement and execution of monetary decrees in the reciprocating jurisdiction, not being in the nature of any amounts payable in respect of taxes, other charges, fines or penalties. Judgments or decrees from jurisdictions which do not have reciprocal recognition with India cannot be enforced by proceedings in execution in India. Therefore, a final judgment for the payment of money rendered by any court in a non-reciprocating territory for civil liability, whether or not predicated solely upon the general laws of the non-reciprocating territory, would not be enforceable in India. Even if an investor obtained a judgment in such a jurisdiction against us, our officers or directors, it may be required to institute a new proceeding in India and obtain a decree from an Indian court. However, the party in whose favor such final judgment is rendered may bring a fresh suit in a competent court in India based on a final judgment that has been obtained in a non-reciprocating territory within three years of obtaining such final judgment.

The United States and India do not currently have a treaty providing for reciprocal recognition and enforcement of judgements, other than arbitration awards, in civil and commercial matters. Therefore, a final judgement for the payment of money rendered by any federal or state court in the United States on civil liability, whether or not predicated solely on the federal securities laws of the United States, would not be enforceable in India. However, the party in whose favour such final judgement is rendered may bring a new suit in a competent court in India based on a final judgement that has been obtained in the United States. The suit must be brought in India within three years from the date of the judgement in the same manner as any other suit filed to enforce a civil liability in India. It is unlikely that a court in India would award damages on the same basis as a foreign court if an action was brought in India. Furthermore, it is unlikely that an Indian court would enforce a foreign judgement if that court were of the view that the amount of damages awarded was excessive or inconsistent with public policy or Indian practice. It is uncertain as to whether an Indian court would enforce foreign judgements that would contravene or violate Indian law. However, a party seeking to enforce a foreign judgement in India is required to obtain approval from the RBI under FEMA to execute such a judgement or to repatriate any amount recovered.

88. Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements prepared and presented in accordance with SEBI ICDR Regulations contained in this Prospectus.

As stated in the reports of the Auditor included in this Prospectus under chapter “Financial Statements as restated” beginning on page 155, the financial statements included in this Prospectus are based on financial information that is based on the audited financial statements that are prepared and presented in conformity with Indian GAAP and restated in accordance with the SEBI ICDR Regulations, and no attempt has been made to reconcile any of the information given in this Prospectus to any other principles or to base it on any other standards. Indian GAAP differs from accounting principles and auditing standards with which prospective investors may be familiar in other countries, such as U.S. GAAP and IFRS. Significant differences exist between Indian GAAP and U.S. GAAP and IFRS, which may be material to the financial information prepared and presented in accordance with Indian GAAP contained in this Prospectus. Accordingly, the degree to which the financial information included in this Prospectus will provide meaningful information is dependent on familiarity with Indian GAAP, the Companies Act, the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian GAAP on the financial disclosures presented in this Prospectus should accordingly be limited.

89. Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, results of operations, financial condition and prospects.

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations, financial condition and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. The GoI has proposed a comprehensive national goods and services tax ("GST") regime that will combine taxes and levies by the Central and State Governments into a unified rate structure which is proposed to be effective from July 01, 2017. While the GoI and other state governments have announced that all committed incentives will be protected following the implementation of the GST, given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to this or any other aspect of the tax regime following implementation of the GST. The implementation of this rationalized tax structure may be affected by any disagreement between certain state governments, which may create uncertainty. Any such future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable.

Further, the General Anti Avoidance Rules ("GAAR") are proposed to be made effective from April 1, 2017. The tax consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain. If the GAAR provisions are made applicable to our Company, it may have an adverse tax impact on us.

We have not determined the impact of these proposed legislations on our business. Uncertainty in the applicability, Interpretation or implementation of any amendment to, or change in, governing law, regulation or policy in the jurisdictions in which we operate, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future. Further, the GoI may introduce a waiver or incentive scheme in relation to specific population segments such as MSEs in public interest, pursuant to which we may be required to Issue our products and services at discounted rates. This may affect our business and results of operations.

90. Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance.

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

91. Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect the financial markets and our business.

Terrorist attacks and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, impede travel and other services and ultimately adversely affect our business. In addition, any deterioration in relations between India and Pakistan might result in investor concern about stability in the region, which could adversely affect the price of our Equity Shares.

India has also witnessed civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic and political events in India could have a negative impact on the value of share prices generally as well as the price of our Equity Shares. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the price of our Equity Shares.

92. Instability in financial markets could materially and adversely affect our results of operations and financial condition.

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets.

The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

93. Any further downgrading of our debt ratings or of India's sovereign debt rating may adversely affect our business.

Any downgrading of our credit ratings may increase interest rates on our outstanding debt, increase interest rates for refinancing our outstanding debt, which would increase our financing costs, and materially and adversely affect our ability to raise new capital on a competitive basis, which may adversely affect our profitability and future growth. In addition, any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely affect our ability to raise additional financing and the interest rates and other commercial terms at which such financing is available. This may materially and adversely affect our capital expenditure plans, business and future financial performance and our ability to fund our growth in future.

94. The ability of Indian companies to raise foreign capital may be constrained by Indian law.

As an Indian company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

95. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

Assumption for working capital requirements

(In No. of Days)

Particulars	Holding level as on 31 March 2017-2018 (Audited)	Holding level as on 31 March 2018-2019 (Audited)	Holding level as on 31 March 2019-2020 (Projected)
Current Assets			
Trade Receivables	61	81	98
Inventories	27	36	54
Current Liabilities			
Trade Payables	96	65	40

Justification for "Holding Period" levels:

The justifications for the holding levels mentioned in the table above are provided below:

<i>Assets- Current Assets</i>	
Trade Receivables	In textile industry, general payment terms are 90-120 days of credit period. The company was not having enough working capital, so we were focusing mainly on the job work. After the increase in working capital, the company would be able to offer better credit terms to its customers to increase the business. Debtor holding period was low at 61 days in F.Y. 2017-2018 as we were mostly doing job work, which was estimated to increase to 81 days as on 31.3.2019. This period will slowly grow to 98 days in the FY 2019-20.
Inventories	Our inventories primarily consist of colors, chemicals, coals and grey fabrics. The inventory holding level as on 31.3.2018 was @27 days. The level was estimated to increase to 36 days as on 31.3.2019 and further projected to increase to 54 days as on 31.3.2020. The inventory level is projected to increase considerably, as the company is slowly increasing sale of own products in the market. Earlier, the company was focusing mainly on the job work.

<i>Assets- Current Assets</i>	
<i>Liabilities- Current Liabilities</i>	
Trade Payables	Average creditors period is 96 days as on 31.3.2018 and the same is estimated to reduce to 65 days as on 31.3.2019 and further to 40 days as on 31.3.2020. When the company will have enough working capital, it would start making faster payment to its suppliers and can avail better purchase terms.

Basis of Estimation

The incremental working capital requirements are based on historical Company data and estimation of the future requirements in FY 2019-20 considering the growth in activities of our Company and in line with norms generally accepted by banker(s).

3. General Corporate Purpose

We confirm that any issue related expenses shall not be considered as a part of General Corporate Purpose. Further, we confirm that the amount for general corporate purposes, as mentioned in this Prospectus, shall not exceed 25% of the amount raised by our Company through this Issue.

GLOBAL ECONOMIC OULOOK

After strong growth in 2017 and early 2018, global economic activity slowed notably in the second half of last year, reflecting a confluence of factors affecting major economies. China's growth declined following a combination of needed regulatory tightening to rein in shadow banking and an increase in trade tensions with the United States. The euro area economy lost more momentum than expected as consumer and business confidence weakened and car production in Germany was disrupted by the introduction of new emission standards; investment dropped in Italy as sovereign spreads widened; and external demand, especially from emerging Asia, softened. Elsewhere, natural disasters hurt activity in Japan. Trade tensions increasingly took a toll on business confidence and, so, financial market sentiment worsened, with financial conditions tightening for vulnerable emerging markets in the spring of 2018 and then in advanced economies later in the year, weighing on global demand. Conditions have eased in 2019 as the US Federal Reserve signaled a more accommodative monetary policy stance and markets became more optimistic about a US-China trade deal, but they remain slightly more restrictive than in the fall.

Following a broad-based upswing in cyclical growth that lasted nearly two years, the global economic expansion decelerated in the second half of 2018. Activity softened amid an increase in trade tensions and tariff hikes between the United States and China, a decline in business confidence, a tightening of financial conditions, and higher policy uncertainty across many economies. Against this global backdrop, a combination of country- and sector-specific factors further reduced momentum. After peaking at close to 4 percent in 2017, global growth remained strong, at 3.8 percent in the first half of 2018, but dropped to 3.2 percent in the second half of the year.

Mr. Narendra Modi, Prime Minister of India, has launched the Make in India initiative with an aim to boost the manufacturing sector of Indian economy, to increase the purchasing power of an average Indian consumer, which would further boost demand, and hence spur development, in addition to benefiting investors. The Government of India, under the Make in India initiative, is trying to give boost to the contribution made by the manufacturing sector and aims to take it up to 25 per cent of the GDP from the current 17 per cent. GLOBAL TEXTILE & APPAREL INDUSTRY OVERVIEW

The Global Textile & Apparel industry is continuously evolving and has witnessed multiple shifts in consumption and production hubs. Driven by the availability of cheap labour, the industry has witnessed transitions in geographical shifts over the time. The origin of the industry dates back to 18th century starting with the Industrial Revolution in Britain, then shifting towards the United States due to the technological advancement and then moving from developed countries to developing countries primarily to the emerging economies of South Asia and South East Asia, owing to availability of cheap labour and raw material.

Global Textile & Apparel Trade:

The Textile and Apparel trade in 2017 was worth USD 748 Bn which is envisaged to grow at a CAGR of 3.7% to reach USD 1209 Bn by 2030. During this period, Apparel trade is expected to grow at a CAGR of 4.5% and Textiles at a CAGR of 2.5%

The global fibre trade, which is currently estimated to be worth USD 29 Bn, is expected to grow at a CAGR of 0.8% to reach USD 32 Bn by 2030.

The global yarn trade which is currently estimated to be worth USD 44 Bn is expected to grow at a CAGR of 1% to reach USD 50 Bn by 2030.

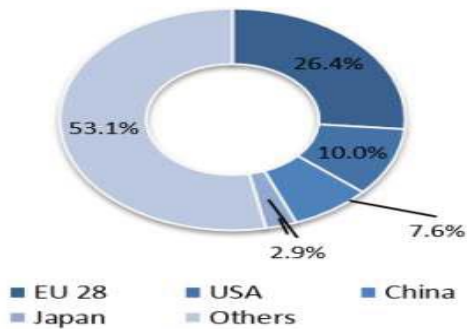

The global fabric trade which is currently estimated to be worth USD 118 Bn is expected to grow at a CAGR of 2% to reach USD 153 Bn by 2030.

In global T&A trade Apparel is one of the fastest growing segments. The apparel trade was worth USD 452 Bn in 2017, and is expected to grow at a CAGR of 4.5 % to reach USD 801 Bn by 2030. Demand for Apparel is declining in developed markets of EU and US. Developing economies are witnessing huge Apparel demands. Countries such as India, China, Russia and Brazil are becoming consuming markets. However, India and China have strong Textile manufacturing base, thus, emerging as both sourcing and consuming nations

Top Textile Importers, 2017

Top Textile Exporters, 2017

India is the second largest Textile exporter, accounting 5.4% of Global Textile trade. However, due to its increasingly strong Textile value chain, it is positioned to grow at higher rate and capture 8% to 10% of global trade by 2030.

Top Apparel Exporters, 2017

According to World Bank, the growth in South Asia is forecasted to accelerate to 6.9% in 2018, when compared to the lower growth rate of advanced economies of 2.3% in 2018.

In the last 4-5 years Bangladesh and Vietnam have taken benefit of China's slowdown thus, gaining share in global Apparel exports. However, India is the only country other than China in the region, with entire Textile value chain capability. Thus, it is strategically positioned to gain maximum share of order migration from China.

In recent years, Sub-Saharan African countries, in particular, Ethiopia and Kenya have also emerged as attractive sourcing destinations for Apparel. With an aim of making Ethiopia a leading Textile and Apparel manufacturing hub in Africa by 2025, the government is aiming to build fully vertical value chain to attract the leading players from across the industry. It also enjoys duty free access to the markets of US through AGOA (the African Growth and Opportunity Act) and EU through LDC status.

Top Apparel Importers, 2017

Evolving Global Industry Structure:

Currently, China holds the largest share in Textile & Apparel Global trade. It has vertically integrated supply chain from production of fibre to weaving of fabric and garmenting. It has capability to manufacture all categories of products and conducive eco-system to provide complete service offering to brands and retailers. However, with rising labour cost it is losing its sheen in the global market and is facing a stiff competition from other developing nations such as Vietnam, Bangladesh, India etc. Increasing labour and energy cost has to some extent weakened the international competitive advantage of China. The global Apparel manufacturers are finding Bangladesh, Vietnam and India as competitive markets over China. Thus, it is expected that manufacturing will witness a gradual shift towards other South Asian nations including India.

Synthetic Apparel is growing at higher rate than cotton Apparel

The global synthetic Apparel trade is witnessing a growth at 5.1 times higher than the cotton Apparel trade. The growth of synthetic Apparel can be attributed to a number of factors such as low cost, easy supply of artificial fibre, durability and their resistance to shrinkage.

The diminishing capacity for cultivating cotton due to increased demand of land for food grains and other human needs is leading to the reduction in the cultivating capacity and thus impacting the supply of cotton and other natural fibre. Thus, synthetic Apparel has emerged as a substitute for cotton Apparel.

OVERVIEW OF INDIAN TEXTILE INDUSTRY

Introduction

Note: SITP - Scheme for Integrated Textile Park, ASEAN - Association of Southeast Asian Nations

It contributed two per cent to the GDP of India and employs more than 45 million people in 2017-18. The sector contributed 15 per cent to the export earnings of India in 2017-18.

The production of raw cotton in India is estimated to have reached 36.1 million bales in FY19[^].

Investment

The textiles sector has witnessed a spurt in investment during the last five years. The industry (including dyed and printed) attracted Foreign Direct Investment (FDI) worth US\$ 3.09 billion during April 2000 to December 2018.

Some of the major investments in the Indian textiles industry are as follows:

- In May 2018, textiles sector recorded investments worth Rs 27,000 crore (US\$ 4.19 billion) since June 2017.

OUR BUSINESS

Overview

Our Company was incorporated as “Foolproof Vyapaar Private Limited” at Kolkata, West Bengal on - December 26, 2005 by Mr. Sukanta Kumar Sahu and Mr. Sanjeev Kumar Singh with the main object of trading. Present management took over the company during 2009 and consequently, registered office of the Company was also shifted to Gujarat. There was not much activity in our company till 2014-15.

Our company started business of trading in the fabric during FY 2015-16. During initial period, our company used to deal only in cotton fabrics. Subsequently, we started dealing into other types of fabrics as well but at very small scale. We used to purchase fabrics from grey fabric manufacturers and large wholesalers.

In 2016-17, we started procuring the fabrics directly from the manufacturers at competitive prices and started direct supply. Our major customers were garments manufacturers and very small fabric traders, who used to buy in small quantities.

While, in the trading activity, we used to deal mainly in the following products:

100% Cotton fabric,
Poly cotton fabrics
Poplin fabrics
Satin fabrics
Oxford fabrics
Suiting fabrics.

After gaining the knowledge and experience in trading of fabrics, we entered into processing of fabrics in 2017-18. During the month of June 2017, we took factory on rent with existing plant & machinery for processing of fabrics. The plant is located in approx. 50,000 sq.ft. area List of the existing plant & machinery, which was taken on rent, are mentioned below:

Yamuna 8 chamber Stunter	1
Dyeing Jigger machine	9
Batching Trolley	10
Laboratory Equipment	2
Oil boiler	2 ton capacity

Presently, we are mainly doing job work for various clients, where-in, the client provides us their grey fabric and we process the same and give finished fabrics to the client. The client pays us fee for the same. Simultaneously, we are also processing own fabric in small quantity and selling it in the market. Once, demand for our own fabric picks-up, we would focus more on sale of own fabrics and reduce the proportion of job work.

Steps Involved in Our Manufacturing Process

Our Clients deliver their grey fabrics to our manufacturing unit. We get both natural and man-made composition fabrics such as cotton, polyester, nylon, viscose etc. These raw materials are received in roll packing of certain size and sent through transport.

Grey unfolding

The objective of Grey unfolding process is to convert the Grey roll packages into beam in trolley having desired length and containing requisite number of ends. Uniform tension checking is maintained on individual beams during unfolding. Using the unfolding machine, through hundreds of grey rolls are set regularly as design. A simplified view of the unfolding process is shown below:

We receive grey in roll pack form, usually rolls of 100-300 meters. Thereafter grey is unfolded here into laury and checked during the process. If there is any problem in grey it is stopped there only.

Desizing

The Desizing process is done on the grey fabrics where beam of certain meters in passed through a closed machine where all chemicals are input for removing dust and rust from the grey fabrics. This process removes all the dust from grey fabrics which can be further processed for bleaching. .

Bleaching

De-sized and scoured fabric still contains colouring matters which include natural pigments or added colours for yarn identification. Fabric is subjected to bleaching to remove colouring matters by treating fabric with bleaching agents i.e. chlorine bleach, hydrogen peroxide etc. This process is carried out on Jiggers or CBR machine. After bleaching fabric is dried and given optical whitener treatment if white fabric is the end product or subjected to drying and dyeing and/or printing.

Mercerizing.

After the bleaching process, Fabric is further transferred to mercerising machine where fabric is passed through Caustic lye (chemical) this process converts hard molecules of cotton into soft and flexible cotton so that it can accept dyes which is next process for dyeing of fabrics. This machine is mainly for making fabric flexible enough to do further process.

Heat Setting

Polyester and manmade fabrics are subjected to heat setting (or thermo setting) to impart dimensional stability and to achieve desired width prior to dyeing and printing.

Ready For Dyeing

Ready for dyeing is a process done on jigger machine which is similar to bleaching machine. This Process is done to mercerised fabrics into white colour fabric. Mercerized fabric is quoted with white colour dyes and chemical for make the fabric ready for dyeing.

Jigger Dyeing

After the ready for dyeing process fabrics are loaded to jigger dyeing machine. These machines are similar to bleaching machines and fabric according to capacity of machine is load. This is the main process of our unit where Dyeing process of fabric is done. Fabric loaded in machine is processed for certain period with some chemicals and dyes which further produce dyes fabrics.

Drying range.

Drying range is used to dry fabrics which are received from jigger dyeing machines. This machine uses steam to dry the fabrics. As per the process requirement dyed fabrics are to be dried immediately to maintain the quality.

Stunter

After the drying process, the fabric received is ready for finishing. Stunter is a machine where fabrics are process very high temperature with certain chemicals. This process sets the elongation and width of fabrics. As we have 8-chamber stunter, our machine is highly capable of providing best quality for suiting fabrics.

Double zero.

This machine is used to set the final width of fabric. This is the final process of our unit and fabric’s flexibility is lowered here to provide strength to the fabric. After thus process the final fabric received is than sent for checking and packing.

All the above processes are basic for manufacturing finished fabrics; other special machines are used only as per client’s requirement for providing certain type of quality.

RAW MATERIALS

The main raw materials used in the manufacture of finished fabrics are –

Grey fabrics

All our Grey fabrics are sourced from various grey manufacturers and traders locally as well as in other parts of India. Our factory is located at an industrial area and we have an established infrastructure and thus the supply of raw material is done with sufficient ease.

Dyes, Chemicals and Coal.

Though the grey fabric is basic raw material we require other dyes and chemicals for processing of finished fabrics. Dyes and chemicals are sourced from local manufacturers and coal is sourced from traders or importers. Dyes and chemicals are sourced according the fabric quality requirement of client and coal is used for the purpose of steam generation and oil boiling.

Significant factors affecting our results of operations and financial condition

We believe that the following factors significantly affect our results of operations and financial condition during the periods under review and may continue to affect our results of operations and financial condition in the future as well

Revenue Generation

We earn majority of our revenue from sale of Finished fabrics which includes own fabric and fabric for Job work undertaken. Regular income is the only source to create a healthy working of our Company. Once a Job Work assignment is entered into, our revenues are fixed, while revenue from own products depend on the domestic and export demand. Our revenue growth is impacted by Job work orders received and also by the own fabric processed.

We have a robust marketing team allocated amongst different divisions each handled by well-trained Managers who are in turn headed by our promoters. For details, please refer to “Our Promoter and Promoter Group” and “Our Management” on page no. 146 and 134 respectively of this Prospectus.

Cost of Material Consumed

Yarn and grey cloth are the primary inputs required for processing our products. Our grey yarn and grey fabric requirements depend on the quality of our end products as per the requirements of our clients. Our Company has developed a healthy and long term relationship with the quality suppliers of both yarn and grey cloth from whom we source our current requirements. Our Company places back to back order for yarn and grey cloth based on sales order received thereby minimizing exposure to price volatility of raw material. Our endeavour is to efficiently utilize the input material and get maximum output.

Our ability to successfully implement its strategy and its growth and expansion plans

Our growth plans are considerable and would put significant demands on our management team and other resources. Any delay in implementation of our strategy and growth and expansion plans could impact our Company’s roll out schedules and cause cost and time over runs.

Increasing competition in the industry

Our Company faces competition from local, national and international processing units. Our Company operates in competitive environment which may force us to reduce the prices of our processed fabrics and it may have an effect on our margins.

General economic and business conditions

As a Company with its complete operations in India, we are affected by general economic conditions in the country and in particular economic factors that affect textile industry in India. India's gross domestic product, or GDP, has been and will continue to be of importance in determining our operating results and future growth.

Quantitative and Qualitative Risks

1 Unusual or infrequent events or transactions

Except as described in the Prospectus, during the periods under review there have been no transactions or events, which in our best judgment, would be considered unusual or infrequent.

2 Significant economic changes that materially affected or are likely to affect income from continuing Operations

Other than as described in the Section titled “*Financial Information*” and chapter titled “*Management’s Discussion and Analysis of Financial Conditions and Results of Operations*”, beginning on pages 155 and 189 respectively of this Prospectus respectively, to our knowledge there are no significant economic changes that materially affected or are likely to affect income from continuing Operations.

3 Known trends or uncertainties that have had or are expected to have a material adverse impact on Revenue or income from continuing operations

Other than as described in the chapter titled “*Risk Factors*” and “*Management’s Discussion and Analysis of Financial Conditions and Result of Operations*”, beginning on pages 17 and 189 respectively of this Prospectus respectively to our knowledge there are no known trends or uncertainties that have or had or are expected to have a material adverse impact on revenues or income of our company from continuing operations.

4 Future relationship between Costs and Income

Other than as described in the chapter titled “*Risk Factors*” beginning on page 17 of this Prospectus, to our knowledge there are no factors, which will affect the future relationship between costs and income or which are expected to have a material adverse impact on our operations and finances.

5 Any significant dependence on a single or few suppliers or customers

Our customers include various distributors that market our products, direct sellers, wholesalers, fabric traders and also large corporate houses. For the eleven month period ended June 30, 2019, our top ten client’s accounted for approximately 55.33% of our gross revenue from operations. The loss of any significant client would have a material effect on our financial results. We cannot assure you that we can maintain the historical levels of business from these clients/distributors or that we will be able to replace these clients/distributors in case we lose any of them. Furthermore, major events affecting our clients, such as bankruptcy, change of management, mergers and acquisitions could impact our business. If any of our major clients becomes bankrupt or insolvent, we may lose some or all of our business from that client and our receivable from that client would increase and may have to be written off, impacting our income and financial condition.

6 Effect of Government Decision

The GoI has provided several incentives to the textile sector, from which our Company may benefit, including the TUFs interest and capital subsidies. These incentives could be modified or removed at any time, or new regulations could be introduced applicable to our Company’s business, which could adversely affect our Company’s operations and financial results. Our Company is also subject to various regulations and textile policies, primarily in India. Our Company’s business and prospects could be adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for its operations or that

compliance issues will not be raised in respect of its operations, either of which would have a material adverse effect on the Company's operations and financial results.

7 Competitive Conditions

Despite the fact that we are not affected by competition in the short-term, our results of operations could be affected by competition in the textile industry in India and in abroad in the future. We expect competition to intensify due to possible changes in government policy, existing competitors further expanding their operations and our entry into new markets where we may compete with well-established fabric processing companies. This we believe may impact our financial condition and operations.

8 Inflation

In the recent past, India has experienced fluctuating wholesale price inflation as compared to historical levels due to the global economic downturn. The annual rate of inflation was at 5.77% (provisional) for the month of June 2018 (over June 2017) as compared to 4.43% (provisional) for the previous month and 0.90% during the corresponding month of 2017. (Source: *Index Numbers of Wholesale Price in India, Review for the month of June 2018, published on July 16, 2018 by Government of India, Ministry of Commerce and Industry*). Continued high rates of inflation may increase our expenses related to salaries or wages payable to our employees, prices of raw materials or any other expenses that we incur. We cannot assure you that we will be able to pass on any additional expenses to our patients or that our revenue will increase proportionately corresponding to such inflation. Accordingly, high rates of inflation in India could have an adverse effect on our profitability and, if significant, on our financial condition.
