SECTION II – SUMMARY OF THE ISSUE DOCUMENT

Overview of the Industry

Healthcare Introduction

Healthcare has become one of India's largest sector, both in terms of revenue and employment. Healthcare comprises hospitals, medical devices, clinical trials, outsourcing, telemedicine, medical tourism, health insurance and medical equipment. The Indian healthcare sector is growing at a brisk pace due to its strengthening coverage, services and increasing expenditure by public as well private players.

Indian healthcare delivery system is categorised into two major components public and private. The Government, i.e. public healthcare system, comprises limited secondary and tertiary care institutions in key cities and focuses on providing basic healthcare facilities in the form of primary healthcare centres (PHCs) in rural areas. The private sector provides majority of secondary, tertiary, and quaternary care institutions with major concentration in metros and tier I and tier II cities.

India's competitive advantage lies in its large pool of well-trained medical professionals. India is also cost competitive compared to its peers in Asia and Western countries. The cost of surgery in India is about one-tenth of that in the US or Western Europe.

Healthcare has become one of India's largest sector, both in terms of revenue and employment. The industry is growing at a tremendous pace owing to its strengthening coverage, service and increasing expenditure by public as well private players. In 2016–22, the market is expected to record a CAGR of 17.69%. The total industry size is estimated to reach US\$ 193.83 billion by 2020 and US\$ 372 billion by 2022. In Budget 2021, India's public expenditure on healthcare stood at 1.2% as a percentage of the GDP. Health insurance is gaining momentum in India. Gross direct premium income underwritten by health insurance grew 17.16% y-o-y to Rs. 51,637.84 crore (US\$ 7.39 billion) in FY20. This is due to rising income, easier access to high-quality healthcare facilities and greater awareness of personal health and hygiene. Greater penetration of health insurance aided the rise in healthcare spending, a trend likely to intensify in the coming decade. Economic prosperity is driving the improvement in affordability for generic drugs in the market. In Budget 2021, India's public expenditure on healthcare stood at 1.2% as a percentage of the GDP. The Government is planning to increase public health spending to 2.5% of the country's GDP by 2025. The share of healthcare in GDP is expected to rise 19.7% by 2027.

Diagnostic Sector

The diagnostic industry has emerged as an attractive play in India's growing healthcare sector and is one of the fastest growing services in the country. The domestic diagnostic industry is estimated at USD9bn (around INR 675bn) and is expected to grow at a compounded annual growth rate (CAGR) of ~10% over the next 5 years. Growth will be primarily driven by change in demographics, increase in lifestyle diseases, and higher income levels across all strata of society, rise in preventive testing, deeper penetration with asset-light expansion, and spread of healthcare services and insurance.

The diagnostic segment is a critical component of the healthcare sector. Globally, ~80% of physician diagnoses are a result of laboratory tests. There are mainly 3 types of tests: Routine, clinical lab and specialty tests.

- Routine tests: Common tests like sugar, cholesterol, HIV, pap, pregnancy, etc.
- Clinical lab tests to monitor diseases and drug treatments
- Specialty tests: Genetics, immunology, oncology, endocrinology and other critical segments

The industry is broadly segregated into pathology testing and imaging diagnostic services. Pathology testing (in-vitro diagnosis) includes sample collection in the form of blood, urine and stool. This is followed by the sample's analysis using laboratory equipment and technology to derive useful clinical information for assisting in patient treatment. The imaging diagnostic segment consist of more complex tests like computed tomography (CT) scans and magnetic resonance imaging (MRI) and other highly specialised tests like positron emission tomography (PET)-CT scans. As per estimates, the pathology segment contributes ~58% of total market revenue.

The market share is categorized as: unorganized (47%), hospital-based lab (37%) while the remaining (~16%) is with the organized players. Doctor referrals constitute a large part of this business. This includes commission payments to doctors in lieu of referring a diagnostic lab. Further, currently, the illness diagnosis segment is more prevalent than wellness segment in India.

The diagnostic industry has emerged as an attractive play in India's growing healthcare sector and is one of the fastest growing service segments in the country. Diagnostic is a business of economies of scale and the most important metric is the cost of processing a sample. The existing players are still in the nascent stages of their growth cycles and have a long runway ahead. We are positive on the national diagnostic chains in India, given their advantages of many years of experience, brand trust and recall, global quality standards and accreditations, wide test menus, extensive patient touchpoints to service patients locally, value-added offerings, and ability to sustainably grow in new markets. Potential consolidation in the industry, organic and inorganic expansion, complemented by their strong balance sheets and return ratios, would provide tailwinds to their growth in the medium term.

The large listed Indian diagnostic chains - Dr. Lal, Metropolis, Thyrocare - remain beneficiaries of what we view as attractive long-term industry growth story. Given the outbreak of COVID-19 and its impact on people mindset about healthcare and preventive measures over the next one to two years; we are giving higher valuation to these stocks. We see the potential for increased inclusion of diagnostic testing in health insurance and ample runway for higher market penetration as standards of living increase and preventive healthcare awareness rises.

The risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality of the Risk Factors:

- 1. Some events may not be material individually but may be material when considered collectively.*
- 2. Some events may have material impact quantitatively.*
- 3. Some events may have an impact which is qualitative though not quantitative.*
- 4. Some events may not be material at present but may have a material impact in the future.*

Note:

The risk factors are as envisaged by the management along with the proposals to address the risk, if any. The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are risk factors where the impact may not be quantifiable and hence the same has not been disclosed in such risk factors. Unless otherwise stated, we are not in a position to specify or quantify the financial or other risks mentioned herein. For capitalized terms used but not defined in this chapter, refer to the chapter titled "Definitions and Abbreviation" beginning on page 4 of this Draft Prospectus. The numbering of the risk factors has been done to facilitate ease of reading and reference and does not in any manner indicate the importance of one risk factor over another.

In this Draft Prospectus, any discrepancies in any table between total and sums of the amount listed are due to rounding off. Any percentage amounts, as set forth in "Risk Factors" and elsewhere in this Draft Prospectus unless otherwise indicated, has been calculated on the basis of the amount disclosed in our restated financial statements prepared in accordance with Indian GAAP.

INTERNAL RISK FACTORS

RISKS RELATING TO OUR COMPANY AND BUSINESS

1. *There are certain outstanding tax proceedings against our Company and our Promoters which may adversely affect our business, financial condition and results of operations.*

There are certain tax proceedings pending at different levels of adjudication before various authorities, enquiry officers and appellate forums. Such proceedings could divert management time, attention and consume financial resources in their defense. Further, an adverse judgment in some of these proceedings could have an adverse impact on our business, financial condition and results of operations. A summary of the outstanding proceedings against our Company and our Promoters as disclosed in this Draft Prospectus, to the extent quantifiable, have been set out below:

Nature of case	Number of cases	Cases filed by	Cases filed Against
		Amount involved (₹ in lakhs)	
Promoter	3	160.56	23.47
Group Entities	4	485.78	6.97

The table above does not include those penalties, interests and costs, if any, which may be imposed or which may have been pleaded but not quantified in the course of legal proceedings, or which the Court / Tribunal otherwise has the discretion to impose. The imposition and amount of such penalties / interests / costs are at the discretion of the court / tribunal where the case is pending. Such liability, if any, would crystallize only on the order of the tribunal where the case(s) is / are pending.

For further details, please refer to section titled "**Outstanding Litigation and Material Developments**" beginning on page no. 211 of this Draft Prospectus.

2. *Our business and prospects may be adversely affected if we are unable to maintain and grow our brand name and brand image.*

Since we primarily derive almost all of our revenues from walk-in customers, our brand and reputation are critical for the success of our business and operations. Our ability to maintain and improve our brand name and brand image is dependent on factors such as quality, accuracy and efficiency of our diagnostic tests, turnaround time and patient satisfaction, the performance of our service network, the introduction of new tests and services. Further, as we expand into new geographic markets within India, and as the market becomes increasingly competitive, maintaining and enhancing our brand may become costly and difficult.

Our services are designed to diagnose and detect early symptoms of diseases and to help prevent diseases and other health conditions by monitoring a variety of health indicators. While there have not been any past material incidences of errors, users of our services have a greater sensitivity to errors than users of services or products that are not intended for the diagnosis, treatment and prevention of diseases. We train our medical personnel, including physicians, radiologists, technicians and other staff to provide accurate and timely test results. However, any delays or inaccuracies in the results we provide, including due to inherent limitations in the technology and equipment used or due to wrong interpretation of test results by doctors, may result in the wrong treatment being prescribed to a patient, which may cause potential harm to such patient and may induce negative publicity and cause other harm to our brand and reputation. In addition, if our personnel make errors in the handling and labelling of patient specimens, or in the operation of our complex medical equipment, or if they inadequately or improperly extract specimens from patients causing bodily harm, our test results may not be accurate and we may become liable under healthcare or other laws for acts or omissions by our employees, which may adversely affect our brand and reputation.

Further, our quality certifications and accreditations are critical for our brand image. As of June 30, 2021, all of our laboratories are PCPNDT accreditations. If our testing services fail to meet accreditation standards, or if we fail to adapt to evolving diagnostic standards, we could lose one or more of our accreditations, which may adversely affect our business and prospects.

3. ***Any inability on our part to maintain quality standards could adversely impact our business, results of operations and financial condition.***

Quality of services is a vital element for our sector. We provide distinguished services to a variety of customers which provides us a safeguard against the change of trend with any type of customer as our operational cash influxes get balanced with other type of our customer base. Any rapid change in our customers' expectation on account of changes in technology or introduction of new kind of services or any other reason and failure on our part to meet their expectation could adversely affect our business, results of operations and financial condition. Any failure on our part to successfully meet customer demand or preference may negatively affect our business, results of operation and financial condition.

4. ***Negative publicity with respect to our products or the industry in which we operate could adversely affect our business, financial condition and results of operations.***

Our business is dependent on the trust our clients have in the quality of our services and products. Any negative publicity regarding our Company, services, brand, products and industry including those arising from a drop in quality of our services, or any other unforeseen events could affect our reputation and our results from operations. Any damage to our brand or our reputation may result in withdrawal of business by our existing clients as well as loss of new business. Furthermore, negative publicity may result in an increase in regulatory scrutiny of industry practices as well as an increase in claims litigation, which may further increase our costs of doing business and affect our profitability. Accordingly, any adverse effect on our brand and reputation may have an adverse effect on our business, financial condition and results of our operations.

Also, any failure or defect in our services could result in a claim against us for damages, regardless of our responsibility for such a failure or defect. We currently carry no services liability insurance with respect to our services. Although we attempt to maintain quality standards, we cannot assure that all our services would be of uniform quality, which in turn could adversely affect the value of our brand, and our sales could be diminished if we are associated with negative publicity.

5. ***The recent outbreak of the novel coronavirus could have a significant effect on our results of operations, and could negatively impact our business, revenues, financial condition and results of operations.***

An outbreak of COVID-19 was recognized as a pandemic by the WHO on March 11, 2020. In response to the COVID-19 outbreak, the governments of many countries, including India, have taken preventive or protective actions such as imposing country-wide lockdowns, as well as restrictions on travel and business operations. Since May 2020 many of these measures have been lifted. We proactively engaged with our clients to reassure them and to demonstrate our commitment to restart our operations and to build confidence in the safety protocols deployed at our office. If we do not respond appropriately to the pandemic, or if customers do not perceive our response to be adequate, we could suffer damage to our reputation and our brand, which could adversely affect our business in the future.

Further, the lockdown was again imposed by the government in some parts of India during April 2021, which was partially relaxed in June 2021, during this lockdown although we have continued with our business, the execution of our business operations was delayed by few weeks.

We cannot predict the degree to, or the time period over, which our business will be affected by the COVID-19 outbreak. For example, this pandemic could necessitate further lockdowns, resulting in significant additional effects on our revenue, financial condition and results of operations. There are numerous uncertainties associated with the COVID-19 outbreak, including the number of individuals who will become infected, availability of a vaccine or a cure that mitigates the effect of the virus, the extent of the protective and preventative measures imposed by governments and whether the virus' impact will be seasonal, among others. Consequently, there may be adverse effects of this pandemic on our short-term business operations and our financial results may be impacted.

6. ***Our operations are concentrated in Northern District of Mumbai and Pune and Southern District of Pune, and any loss of business in such region could have an adverse effect on our business, results of operations and financial condition.***

While 35 diagnostic cum collection centres are well spread in Northern District of Mumbai and Pune and Southern District of Pune, our significant portion of our operations are concentrated in the Northern District of Mumbai. We derived 90 %, 91%, 91 % and 84%, of our revenue from operations from Northern District of Mumbai for the three months ended June 30, 2021 and the financial years 2021, 2020 and 2019, respectively. We also derived 10%, 9 %, 9 % and 6%, of our revenue from operations from Northern District of and Southern District of Pune for the three months ended June 30, 2021 and the financial years 2021, 2020 and 2019, respectively. In the event of a regional slowdown in the economic activity in any of the respective locations, or any other developments including political or civil unrest, disruption or sustained economic downturn that reduce the demand for our services in the city of Mumbai and Pune and/ or states of Maharashtra, could adversely affect our business, results of operations and financial condition, which are largely dependent on the performance and other prevailing conditions affecting the economies of Northern District of Mumbai.

7. *We have not entered into any long-term contracts with any of our suppliers and / or customers and orders are not backed-up by a letter of credit facility.*

We do not have any long-term contracts with our suppliers and any change in the selling pattern of the suppliers could adversely affect the business of our Company. Although we have satisfactory business relations with our suppliers and have received continued business from them in the past, there is no certainty that the same will continue in the years to come and may affect our profitability.

8. *Our operations are significantly located in the Northern District of Mumbai and Pune and Southern District of Pune and failure to expand our operations may restrict our growth and adversely affect our business*

Currently, all diagnostic centre's are situated in the Northern District of Mumbai and Pune and Southern District of Pune and we are carrying our business mainly from these centres. Our registered/ corporate offices is also Northern District of Mumbai. Hence our major revenues are generated from operations in these regions only. In the event that demand for our services in general reduces or stops by any reason including political discord or instability or change in policies of State, then our financial condition and operating results may be materially and adversely affected. Geographical and functional expansion of our business domain requires establishment of adequate network. As we seek to diversify our regional focus we may face the risk that our competitors may be better known in other markets, enjoy better relationships with customers. Our lack of exposure in geographical boundaries outside our operating region could impact our future revenues.

9. *Our Company entered into various Business Agreements for expansion our business. Any termination or dispute in relation to these agreements may have an adverse effect on our business operations and results thereof.*

Our Promoters along with the Management decided to expand our business through the business models in the year 2000. Owing to this strategy, Our Company has entered into a APSC agreement with Metropolis Healthcare Limited and Franchise Agreements with various parties as on the date of filing this Draft Prospectus. For details on the same, please refer to the chapter titled 'Business Overview' and "History and Certain Corporate Matters" beginning on page no. 100 and 128 respectively of the Draft Prospectus. Any non-compliance by either of the parties in relation to any period of agreement, term & conditions, any dispute due to owing to usage of Nidan brand names or any other, may result in the termination of the agreements and consequently we lose business. This will further either lead to reduced revenues or increase cost of operations or lose of client or cancellation of events. Further, we also cannot assure you that either of the parties will not terminate the agreement before the expiry date of the agreement, which would require us to either locate another parties or negotiate the terms with the existing parties or execute our operations and services at hundred percent. This may have an adverse effect on our conducting our business operations, economics of scale and revenues.

10. *Our success depends largely on our senior management and our ability to attract and retain our key personnel.*

Our success is dependent on our management team whose loss could seriously impair the ability to continue to manage and expand business efficiently. Our success largely depends on the continued services and performance of our management and other key personnel. The loss of service of the Key Managerial Personnel and other senior management could seriously impair the ability to continue to manage and expand the business efficiently. Further, the loss of any of the senior management or other key personnel may adversely affect the

operations, finances and profitability of our Company. Any failure or inability of our Company to efficiently retain and manage its human resources would adversely affect our ability to expand our business.

11. *Our Promoter is disqualified u/s 164 (2) of the Companies Act, 2013.*

Our Promoter is disqualified u/s 164 (2) of the Companies Act, 2013 due to irregular filings or non-filings done by various of Promoter Group Companies/ Entities. Due to this reason, he has not been appointed as the Director or KMP of the Company since April 04, 2019. For details on the same, please refer to the chapter titled “*Our Promoter & Promoter Group Companies*” beginning on page no.146 of this Draft Prospectus.

12. *We are dependent on our Promoter, our senior management, directors and key personnel of our Company for success whose loss could seriously impair the ability to continue to manage and expand business efficiently.*

They provide expertise which enables us to make well informed decisions in relation to our business and our future prospects. For further details of our Directors and key managerial personnel, please refer to Section “Our Management” on page 132 of this Draft Prospectus. Our success largely depends on the continued services and performance of our management and other key personnel. The loss of service of the Promoters and other senior management could seriously impair the ability to continue to manage and expand the business efficiently.

Further, the loss of any of the senior management or other key personnel may adversely affect the operations, finances and profitability of our Company. Any failure or inability of our Company to efficiently retain and manage its human resources would adversely affect our ability to implement new projects and expand our business.

13. *Our Company doesn’t own the premises where its registered and corporate office is situated, and leave & license agreement have been executed for the same. Any termination or dispute in relation to this lease/ rental agreement may have an adverse effect on our business operations and results thereof.*

Our Registered office is situated at Swapnshilpa, Behind Aarti Apartment, Vartak Road, Virar (West) – 401303, Palagar, Maharashtra, India, is a leased premises which we have been taken for 55 months on lease beginning from 01/09/2021 which is owned by Nitin Vitthalrao Thorave, who is the Promoter of our Company. Our business operations are also conducted from the said premise. As per the leave & license agreement, the lease is for a period of 55 months and any non-compliance by us in relation to any term of lease may result in the termination of the leave & license agreement and consequently we have to vacate the said premises. We also cannot assure you that lessor will not terminate the leave & license agreement, which would require us to locate to another premise and may have an adverse effect on our conducting our business operations.

14. *Our intellectual property rights may be infringed upon or we may infringe the intellectual property rights of third parties.*

Our Company has registered for various trademarks under the Trade Marks Act, 1999. For details of our trademarks, please refer the chapter titled “*Government and Other Statutory Approvals*” beginning on page 224 of this Draft Prospectus. However, there is no assurance that our Trademark will not be infringed upon. Depending on whether we are able to discover any such infringement of our Trademark or successfully enforce our legal rights in the jurisdictions where such infringements may occur, our business and branding may suffer as a result of any misuse of our trademark. In such circumstances, our reputation and business may be adversely affected. Further, if we decide to pursue action against such infringements to protect our reputation, it could result in diversion of our resources and our financial results may be adversely affected. Similarly, we may also infringe the intellectual property rights of third parties in the use of our Trademark in our operations. Although we are not aware of any such infringement by us, there is no assurance that we will not infringe or have not infringed the intellectual property rights of any third party. In the event of any such infringement, we may be subject to our claims or actions and our business, reputation, financial condition and results of operations may be adversely affected.

Further, some of our trademarks are registered under the name of Abhi Diagnostic Imagings Private Limited. Our Company is yet to make an application for changing the name from to “Nidan Laboratories and Healthcare

Limited". While filing the application for change of name, if the same is not accepted or if there are oppositions filed against the trademark application if any, are successful, our company may lose the statutory protection available to it under the Trade Marks Act, 1999 for such trademarks thereby affecting our business, reputation, financial condition and results of operations.

15. Certain agreements may be inadequately stamped or may not have been registered or may not have necessary disclosure as a result of which our operations may be adversely affected.

Few of our agreements may not be stamped adequately or registered or may not have not the necessary disclosures. The effect of inadequate stamping is that the document is not admissible as evidence in legal proceedings and parties to that agreement may not be able to legally enforce the same, except after paying a penalty for inadequate stamping. The effect of non-registration, in certain cases, is to make the document inadmissible in legal proceedings. Any potential dispute due to non-compliance of local laws relating to stamp duty and registration may adversely impact the operations of our Company. Further, effect of non-disclosure of certain necessary points as required under the Contract Act, 1872 (as amended from time to time) and/ or under any other law, rules, regulations, in certain cases, is to make the document inadmissible in legal proceedings. If we are not able to generate sufficient cash flow, it may adversely affect our business and financial operations. 18. *We depend on third-parties to provide us our testing equipment and reagents, and any failure to continue to do so or recall of existing testing equipment and reagents could adversely affect our business, results of operations and financial condition.*

We depend on third-party vendors and suppliers to procure our testing equipment and reagents and we enter into lease agreements and rental agreements with fixed term with them. Certain of these agreements require us to purchase minimum quantity or value of purchases. We cannot assure you that we will be able to continue to obtain adequate supplies of equipment, reagents and test kits, in a timely manner and without any defects, in the future. Any disruption in our business may also result in us not meeting our minimum purchase obligations under these agreements resulting in an event of default and leading to potential disruption to our supply of equipment or reagents. Any such reductions or interruptions in the supply of equipment or reagents, defects in reagent and test kits and any inability on our part to find alternate sources for the procurement of such items, may have an adverse effect on our ability to provide our services in a timely or cost effective manner. Further, the procurement cost of testing equipment and reagents produced outside India may increase due to depreciation of Indian Rupee, and the suppliers may therefore demand to re-negotiate the supply contracts with us. In the event of an increase in the price of such items, we cannot assure you that we will be able to correspondingly increase the price of our services.

In addition, under our lease and reagent supply agreements, the supplier typically has the discretion to terminate the agreement with written notice in the event of a breach of any material term or condition of such agreement, including on account of a default in the purchase of a committed amount of reagents, movement of the leased equipment without prior consent of the manufacturer. Further, the equipment is at all times the exclusive property of the manufacturer and our Company has rights only as a lessee. In addition, manufacturers may discontinue the supply of, or recall reagents, test kits, instruments or equipment which could adversely affect our operations. Any such recall or termination and consequent removal of the installed equipment can adversely affect our business, results of operations and financial condition.

19. *Failure or malfunction of our equipment could adversely affect our ability to conduct our operations.*

Our operations are subject to risks inherent in the use of complex medical equipment. We have experienced routine breakdowns and may experience breakdowns and failures or there could be injury to our employees or others either because of defects, faulty maintenance or repair, or improper use or lack of timely servicing of our equipment. Our Company has entered into comprehensive maintenance contracts for which we pay fixed fees for maintenance of major medical equipment and have not incurred any material costs associated with repair and maintenance of medical equipment in the past three fiscal years. However, any significant malfunction or breakdown of our equipment may entail significant repair and maintenance costs and cause disruptions and delays in our operations. Any injury caused by our medical equipment in our diagnostic centres due to equipment defects, improper maintenance or improper operation could subject us to liability claims. We cannot assure you that we would be able to effectively respond to any such events, in a timely manner and at an acceptable cost, which could lead to an inability to effectively provide our services and, therefore, affect our business and reputation.

20. *Non-compliance with and changes in any of the applicable laws, rules or regulations, including pricing, safety, health and environmental laws, may adversely affect our business, results of operations and financial condition and cash flows.*

Our diagnostic centres through which we provide our services are subject to stringent health and safety laws. We are required to maintain licenses under various health and safety legislations and regulations which, among others, include registration under the Clinical Establishments (Registration and Regulations) Act, 2010 or under respective State clinical establishment legislation, specifically PCPNDT, as applicable, issued by the appropriate State authority, authorizations under the Bio-Medical Waste (Management and Handling) Rules, 2016, issued by the respective State Pollution Control Boards, registration for operation of medical diagnostic x-ray equipment issued by the Atomic Energy Regulatory Board and no objection certificates for the radioactive substances which are in our possession and covered under the applicable Shops and Establishments Acts, in Mumbai and Pune. Additionally, our diagnostic centres also possess licenses to operate X-ray equipment, such as the bone densitometer, mammography machine and computer tomography (CT) scanners, as required under the Atomic Energy Rules.

In addition to this, our Company and our diagnostic centres are also required to obtain trade licenses as issued by appropriate local municipalities under applicable local laws, relevant registrations under the Employees' State Insurance Act, 1948, the Contract Labour (Registration and Abolition) Act, 1970, Maharashtra Tax on Profession Trade, Calling and Employment Act, 1987 and a shops and establishments registration, in the states that we operate. Our Company and all diagnostic centre's are also required to obtain Shops and Establishments under the Maharashtra Shops and Establishments Act, 1948. As on the date of the Draft Prospectus, our Company was not required to obtain the Shop and Establishments for our registered office and for certain diagnostic centres.

For not making an application with the respective authorities, we may be penalized for non-compliance with the aforementioned laws for which we have not obtained the requisite Licenses.

For some of our diagnostic centres we are also required, depending on the height and the proportion of the premises we occupy, to obtain a fire no objection certificate ("**Fire NOC**") from the relevant local authorities. For certain diagnostic centres located in multistoried buildings, we occupy part of the building with other tenants occupying the balance building. As on the date of the Draft Prospectus, our Company was not required to obtain a Fire NOC for certain diagnostic centres (a) since the height of the building in which such diagnostic centres are located is less than the height statutorily prescribed for obtaining Fire NOCs; or (b) because we occupy only a part of the building even though the height of the building is more than the height statutorily prescribed for obtaining Fire NOCs since the owner of such building is required to obtain the Fire NOCs. While we have ensured that and our staff is well versed with the fire safety protocols and all our diagnostic centres are equipped with the requisite fire-fighting equipment. However, the relevant local authorities may also institute any civil or criminal actions (including the temporary sealing of the premises) for any non-compliance of this requirement at this aforesaid location which may in turn interrupt our operations or collections at this diagnostic centre, and consequently our results of operations, financial conditions and cash flows.

Our business operations are primarily conducted on premises leased from third parties (including certain related parties). The owners of these premises are required to obtain, depending on the date of completion of construction of the premises, an occupancy certificate. As on the date of the Draft Prospectus, the owners for certain locations in which our diagnostic centres are located have not applied for an occupancy certificate. We cannot assure you that such owners will apply for or obtain the occupancy certificate for such premises in a timely manner or at all. Any non-possession of occupancy certificates may result in the functional agencies not providing a regular connections for electricity, water, drainage and sewerage or imposition of higher property tax and water and electricity charges.

If a determination is made that we are in violation of any of the applicable laws, rules or regulations, including conditions in the permits required for our operations, we may be subjected to regulatory sanctions, have to pay fines, modify or discontinue our operations, incur additional operating costs or make capital expenditures which would adversely affect our business, results of operations, financial position and cash flows. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, applicable laws, rules or regulations or policies, may also adversely affect the viability of our current business or restrict our ability to grow our business in the future. Further, the adoption of stricter applicable laws and regulations, stricter interpretations of existing laws, increased governmental enforcement of laws or other developments in the future may require that we make additional capital expenditures, incur additional expenses or take other actions in order to remain compliant and maintain our current operations. Complying with, and changes in, these laws

and regulations or terms of approval may increase our compliance costs and adversely affect our business, results of operations, financial condition and cash flows.

We are also subject to the laws and regulations governing relationships with employees in such areas as minimum wage, gratuity, provident fund and maximum working hours, overtime, working conditions, hiring and termination of employees, contract labour and work permits. There is a risk that we may inadvertently fail to comply with such regulations, which could lead to enforced shutdowns and other sanctions imposed by the relevant authorities, as well as the withholding or delay in receipt of regulatory approvals. We cannot assure you that we will not be involved in future litigation or other proceedings or be held liable in any litigation or proceedings including in relation to safety, health and environmental matters, the costs of which may be significant.

Further, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of the relevant permits, licenses or approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change, we may be subject to further compliances, increased costs, be subject to penalties or suffer a disruption in our business activities, any of which could adversely affect our results of operations. For further details, please see chapters titled “Key Industry Regulations and Policies” and “Government and Other Key Approvals” at page nos. 115 and 224 respectively of this Draft Prospectus.

21. We require certain approvals, licenses, registrations and permits for conducting our business and our inability to obtain, retain or renew them in a timely manner, or at all, may adversely affect our business, results of operations and financial condition.

We require certain statutory and regulatory approvals, licenses, registrations and permissions, and applications need to be made at the appropriate stages for our business to operate. We have obtained required license for carrying our business activity however there can be no assurance that the relevant authorities will issue these approvals or licenses, or renewals thereof in a timely manner, or at all. As a result, we may not be able to execute our business plan as planned. An inability to obtain or maintain approvals or licenses required for our operations may adversely affect our operations. Government approvals, licenses, clearances and consents are often also subject to numerous conditions, some of which are onerous and may require significant expenditure. Furthermore, approvals, licenses, clearances, and consents covering the same subject matter are often required at State Government levels. If we fail to comply, or a regulator claims that we have not complied, with these conditions, we may not be able to commence or continue with work. For further information on various approvals or licenses required in connection with our operations, please see the section entitled “Government and other Statutory Approvals” and “Key Industry Regulations And Policies” on page no. 224 and 115 respectively of this Draft Prospectus.

22. We may not be successful in implementing our business strategies.

The success of our business depends substantially on our ability to implement our business strategies effectively or at all. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted customers. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

23. We depend on skilled personnel and if we are unable to recruit and retain skilled personnel, our ability to operate or grow our business could be affected.

Our services are skilled and creative manpower intensive and we engage a considerable number of skilled personnel every year to sustain our growth. Further, we spend significant time and resources in training the manpower we hire. Our success is substantially dependent on our ability to recruit, train and retain skilled manpower. High attrition and competition for manpower may limit our ability to attract and retain the skilled manpower necessary for our future growth requirements. We cannot assure you that skilled manpower will

continue to be available in sufficient numbers suitable to our requirements or that we will be able to grow our workforce in a manner consistent with our growth objectives, which may affect our business, financial condition, results of operations and prospects.

The diagnostics industry in India is highly competitive with several companies present in the market, and therefore it is challenging to improve market share and profitability. Our competitors include diagnostic healthcare service providers in India, hospital-based laboratories, independent clinical laboratories, other smaller-scale providers of diagnostic services (with more established local and regional presence in certain geographies) such as pathology, radiology laboratories and preventive care providers as well as international service providers, which may establish and expand their operations in future. We compete on the breadth of our test offerings, the geographical reach of our network, our ability to accurately process specimens and report data in a timely manner and our customer relationships. Some of our competitors may have greater financial, research and development, marketing and other resources, broader service offerings, more experience in obtaining regulatory approvals or greater geographic reach or economies of scale. Further, the diagnostics industry is highly fragmented, the lack of regulations and low entry barriers allow a multitude of organised and unorganised players to compete in the market.

Also, the pricing-related competition may intensify in the near future which may have an adverse effect on the results of our operations, including our profit margins. Increase in the number of comparable diagnostic healthcare facilities may exert additional pricing pressure on some or all of our services. The manufacturers of laboratory equipment and test kits may also enter the diagnostic industry by marketing point-of-care laboratory equipment to physicians and by selling self-test kits, which may be more convenient to the patients and cheaper than our services. If we are unable to compete effectively, our business could decline or contract and our business, results of operations and financial condition could be adversely affected.

24. Any inadequacy in collection of, or failure or delay in the delivery of, specimens to our processing laboratories could compromise or destroy the integrity of such specimens, which could adversely affect our business, results of operations and financial condition.

The process of collecting specimens is highly dependent on the skill and performance of our front-end employees. Any losses, errors or delays in the specimen collection, preparation, labelling and storage process could result in us not being able to effectively provide our services and adversely affect our business and reputation.

The timely pickup, transportation and delivery of specimens depend on several factors beyond our control, including weather and road conditions. Any disruptions in transportation services on account of natural disasters, strikes, lock-outs, terrorism, inadequacies in the road or air infrastructure, weather related problems, or other events could affect our ability to receive specimens and generate test results in a timely manner. For example, the lockdown due to the outbreak of COVID-19 has marginally affected the process and timeliness of collection and delivery of specimens. While most of our diagnostic centres are serviced through our in-house logistics team, we also rely on the services of third-party phlebotomists and logistics providers including for collection of COVID-19 samples. As a result, we may experience loss of specimens, delays and inefficiencies, including mislabeling of specimen, which are not within our control. If we are unable to deliver or receive specimens at our processing laboratories in a timely manner, their integrity as well as the outcome of results may be compromised, or the reporting of results of tests to patients may be delayed, which could adversely affect our reputation. Further, specimens may be lost, damaged or contaminated due to mishandling while in transit. In the event specimens are lost, destroyed, damaged or contaminated, we may incur additional costs, such as the cost of re-administering tests or from delays in the generation of critical test results. The occurrence of any such events could adversely affect our reputation, business, results of operations and financial condition.

Further, certain agreements we entered into with the third-party phlebotomists and logistics providers include clauses for termination without cause with advance notice. In the event the services provided by these third-party phlebotomists and logistics providers are terminated, we may not be able to find replace in a timely manner, or at all, which may adversely affect our business, results of operations and financial condition.

25. We operate in a highly competitive business environment, and our inability to compete effectively could have an adverse effect on our business, results of operations and financial condition.

The diagnostics industry in India is highly competitive with several companies present in the market, and therefore it is challenging to improve market share and profitability. Our competitors include diagnostic healthcare service providers in India, hospital-based laboratories, independent clinical laboratories, other smaller-scale providers of diagnostic services (with more established local and regional presence in certain geographies) such as pathology, radiology laboratories and preventive care providers as well as international service providers, which may establish and expand their operations in future. We compete on the breadth of our test offerings, the geographical reach of our network, our ability to accurately process specimens and report data in a timely manner and our customer relationships. Some of our competitors may have greater financial, research and development, marketing and other resources, broader service offerings, more experience in obtaining regulatory approvals or greater geographic reach or economies of scale. Further, the diagnostics industry is highly fragmented, the lack of regulations and low entry barriers allow a multitude of organised and unorganised players to compete in the market.

Also, the pricing-related competition may intensify in the near future which may have an adverse effect on the results of our operations, including our profit margins. Increase in the number of comparable diagnostic healthcare facilities may exert additional pricing pressure on some or all of our services. The manufacturers of laboratory equipment and test kits may also enter the diagnostic industry by marketing point-of-care laboratory equipment to physicians and by selling self-test kits, which may be more convenient to the patients and cheaper than our services. If we are unable to compete effectively, our business could decline or contract and our business, results of operations and financial condition could be adversely affected.

26. Implementation of pricing policies by the Government or other authorities could adversely affect our business, results of operations and financial condition.

The prices that we charge for our services could become subject to recommended or maximum fees set by the Government or other authorities. For example, the government could introduce “price lists” for services that could be mandatory or, even if not mandatory, result in guidance for the prices we charge for our diagnostic healthcare services. Further, we are not empanelled diagnostic centre under the Central Government Health Scheme (“CGHS”) and hence we are not entitled to enjoy our services at CGHS rates and/or CGHS recommended rates. However, in future, if we get our diagnostic centre’s empanelled, then we may enjoy the benefits at a future date. The implementation of such policies and the restriction under CGHS affecting the prices we charge could, in effect, limit our ability to charge customers higher prices for our services, which may have an adverse effect on our business, results of operations and financial condition.

27. Failure to introduce new tests, services and technologies or acquire new or improved equipment could adversely affect our business, results of operations and financial condition.

The diagnostic healthcare services industry is subject to constant innovations in, and improvements to tests and services, processes and technologies. In order to maintain our position in our industry, we must continue to anticipate and keep abreast of the demands and needs of our patients through investing in technologies and equipment to develop new tests and services and improve existing tests and services. If we fail to anticipate trends in the industry, or we are not able to introduce or develop new tests, services and technologies before or at least concurrently with our competitors and at competitive prices, we may consequently be unable to deliver our diagnostic healthcare services involving new tests, services or technologies in an efficient and effective manner. As a result, our business, results of operations and financial condition may be adversely affected.

In addition, technological advancement could lead to the development of more cost-effective technologies or non-invasive diagnostic healthcare tests which are more convenient or less expensive than the tests that we offer. The introduction of such technology and its subsequent use by our existing and potential patients could lead to a decline in the demand for our services. Advances in technology may lead to the development of more cost-effective tests that can be performed outside a commercial clinical laboratory, such as tests that can be performed by hospitals in their own laboratories, point-of-care tests that can be performed by doctors in their surgeries, or home-testing that can be performed by patients or other non-medical professionals themselves, such as pregnancy and diabetes tests. In addition, manufacturers of laboratory equipment and test kits could seek to increase their sales by marketing point-of-care laboratory equipment to physicians and by selling test kits approved for home use to both physicians and patients. Increased testing by physicians in their offices and home use by patients could affect the market for our services and, therefore, adversely affect our business, results of operations and financial condition.

28. *We rely on our information technology systems and third-party platform for the operation of our business and any disruption to our systems and/or third-party platform could adversely affect our business and reputation and result in litigation.*

We rely on information technology systems and third-party website to support our business processes, including for placing order for tests by our customers, conducting tests, transmission of testing results, billing services, quality control, tracking logistics, human resources, finance and other patient service functions. As a result, our business depends on the capacity and reliability of third-party vendors whom we engage and will continue to do so. Interruptions in these technology systems and/or the third-party website, whether due to fire, power loss, telecommunications failures, system failures or errors, human errors, malicious software, physical or electronic break-ins, denial-of-service attacks, or otherwise could affect the availability of our services and prevent or hinder the ability of consumers to access our services. For example, from time to time, we have suffered interruptions in our technology systems, for short durations at one or more of our centres due telecommunications failures. Effective response to such interruptions will require effort and diligence on the part of our third-party vendors and employees to avoid any adverse effect to our business operations. Sustained system failures or interruption of our information technology systems (including systems of third-party vendors) in one or more of our diagnostic centre operations could disrupt our ability to process laboratory requisitions, perform testing, provide test results in a timely manner and bill the appropriate party. The occurrence of any such events could adversely affect our business, interrupt our operations, subject us to increased operating costs and expose us to litigation.

29. *Cyber threats and non-compliance with and changes in privacy laws and regulations may adversely affect our business, results of operations and financial condition and cash flows.*

We may face cyber threats such as (i) phishing and trojans - targeting constituents, wherein fraudsters send unsolicited mails to the constituents seeking account sensitive information or to infect their systems to search and attempt ex-filtration of account sensitive information; (ii) hacking – wherein attackers seek to hack into our website and portal with the primary intention of causing reputational damage to us by disrupting services; (iii) data theft – wherein cyber criminals may attempt to intrude into our network with the intention of stealing our data or information; and (iv) advanced persistent threat – a network attack in which an unauthorised person gains access to our network and remains undetected for a long period of time with an intention to steal our data or information rather than to cause damage to our network or organization.

Our systems are also potentially vulnerable to data security breaches, whether by our employees, or others that may expose sensitive data to unauthorised persons. We process and transfer data, including personal information, financial information and other confidential data provided to us by constituents. Although we maintain systems and procedures to prevent unauthorised access and other security breaches, it is possible that unauthorised individuals could improperly access our systems, or improperly obtain or disclose sensitive data that we process or handle. Data security breaches could lead to the loss of intellectual property or could lead to the public exposure of personal information (including sensitive financial and personal information) of constituents. Any such security breaches or compromises of technology systems could result in damage to our reputation, institution of legal proceedings against us and potential imposition of penalties, which may have an adverse effect on our business and results of operations.

Further, we must comply with privacy laws and regulations with respect to the use, storage and disclosure of protected patients' health information, as well as laws pertaining to the electronic transmission of such information, such as the Information Technology (Reasonable security practices and procedures and sensitive personal data on information) Rules, 2011 ("IT Rules"). In the ordinary course of our business, we receive certain personal information about our customers and their patients, including by electronic means. Under the provisions of the IT Rules, we are required to and we have ensured security of all personal data collected by us, formulated a privacy policy and subsequently published such policy on our website. Accordingly, we depend upon our internal information technology system for the storage and transmission of such confidential information. A compromise in our security systems (including systems of third-party information technology vendors) that results in customer or patient personal information being obtained by unauthorised persons or our failure to comply with security requirements for use, storage and transmission of sensitive information could adversely affect our reputation with our customers and result in litigation against s or the imposition of penalties and fines, all of which may adversely impact our business, results of operations, financial condition and liquidity. Further, new requirements for additional security and protection of the privacy of patient information

could prove technically difficult, time-consuming or expensive to implement. Failure to comply with privacy laws and regulations may adversely impact our business and reputation and result in litigation.

30. *If we are unable to establish and maintain an effective internal controls and compliance system, over financial reporting, our reputation could be adversely affected.*

We take reasonable steps to maintain appropriate procedures for compliance and disclosure and to maintain effective internal controls over our financial reporting so that we produce reliable financial reports and prevent financial fraud. As risks evolve and develop, internal controls must be reviewed on an ongoing basis. Maintaining such internal controls requires human diligence and compliance and is therefore subject to lapses in judgment and failures that result from human error. Any lapses in judgment or failures that result from human error can affect the accuracy of our financial reporting, resulting in a loss of investor confidence and a decline in the price of our equity shares.

31. *Our Promoters have given personal guarantees in relation to certain debt facilities provided to our Company by our lenders. In event of default on the debt obligations, the personal guarantees may be invoked thereby adversely affecting our Promoters/ Directors ability to manage the affairs of our Company and consequently this may impact our business, prospects, financial condition and results of operations.*

Some of the debt facilities provided to our Company by our lenders stipulate that the facility shall be secured by a personal guarantee of our Promoters. In event of default on the debt obligations, the personal guarantees may be invoked thereby adversely affecting our Promoters/ Directors / Key Managerial Personnel(s) ability to manage the affairs of our Company and consequently this may impact our business, prospects, financial condition and results of operations. Further, in an event our Promoters withdraws or terminates his/their guarantee/s or security, the lenders for such facilities may ask for alternate guarantee/s or securities or for repayment of amounts outstanding under such facilities or even terminate such facilities. We may not be successful in procuring guarantee/s or collateral securities satisfactory to the lender and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could adversely affect our financial condition. For more information, please see the chapter titled “*Statement of Financial Indebtedness*” beginning on page no. 207 of this Draft Prospectus.

32. *We have entered into certain related party transactions and may continue to do so.*

We have entered into related party transactions with our Promoters, Promoter Group, Its Group Companies/ Entities, Directors and Other Associates. While we believe that all such transactions have been conducted on the arms length basis, however it is difficult to ascertain whether more favorable terms would have been achieved had such transactions been entered with unrelated parties. Furthermore, it is likely that we will continue to enter into related party transactions in the near future. For further details regarding the related party transactions, see the disclosure on related party transactions contained in the financial statements included in this Draft Prospectus and, also see the section “*Annexure 32: Statement of Related Party Transactions*” on page no. 199 of this Draft Prospectus.

33. *Our Company may require additional capital resources to achieve our expansion plans.*

The rate of our expansion will depend to an extent on the availability of adequate debt and equity capital. Further, the actual expenditure incurred may be higher than current estimates owing to but not limited to, implementation delays or cost overruns. We may, therefore, primarily try to meet such cost overruns through our internal generations and in case if the same is not adequate, we may have to raise additional funds by way of additional term debt from banks/ financial institutions and unsecured loans, which may have an adverse effect on our business and results of operations.

34. *We have not received No Objection Certificate from all the lenders of loans to our company.*

Our Company has 6 banks that act as “Bankers to the Company”. For details on the same, please refer to the section titled “*General Information*” on page no. 48 of this Draft Prospectus. Our company has made an application with our existing bankers / financial institutions to obtain a “No Objection Certificate” (NOC) from them. However, we have received NOC from 5 of our Bankers and are yet to obtain the same from them 1 banker, i.e Union Bank Of India Limited.

- 35. *Our business is working capital requirements. If we are unable to generate sufficient cash flows to allow us to make required payments on our debt or fund working capital requirements, there may be an adverse effect on our results of operations.***

Our business requires significant amount of working capital including fund requirement for payment for bulk purchases of various products across different brands and service verticals. Hence, major portion of our working capital is utilized towards debtors and inventory. The results of operations of our business are dependent on our ability to effectively manage our inventory and trade receivables. However, if our management fails to manage our inventory or misjudges expected clients demand or shortage of materials/ products or an accumulation of excess inventory or accurately evaluate the credit worthiness of our clients, it may lead to bad debts, delays in recoveries and / or write-offs which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. A liquidity crunch may also result in increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability.

We have a sanctioned limit for working capital of Rs. 3709.11 Lakhs from the existing bankers / financial institutions including unsecured loan from the Promoters, Group Companies, Directors and Relatives. Our growing scale and expansion, if any, may result in increase in the quantum of working capital. Our inability to maintain sufficient cash flow, credit facility and other sourcing of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations.

- 36. *Our insurance coverage may not be sufficient or adequate in protecting us against all or certain operating hazards and from all or certain losses and this may have an adverse impact on the financial conditions of the business.***

As on the date of this Draft Prospectus, Our Company has availed of various insurance coverage. We believe that the insurance coverage taken by us will protect our products/ business and from any damages or losses that we may suffer in the future. Further, our insurance coverage would be reasonably adequate to cover the normal risks associated with the operation of our businesses. However, we cannot assure you that any claim under the insurance policies maintained by us will be honoured fully, in part or on time, or that we have taken out sufficient insurance to cover all our losses. In addition, our insurance coverage expires from time to time. We may or may not apply for the renewal of our insurance coverage in the normal course of our business, but we cannot assure you that such renewals will be granted in a timely manner, at acceptable cost or at all. To the extent that we suffer loss or damage, or successful assertion of one or more large claims against us for events for which we are not insured, or for which we did not obtain or maintain insurance, or which is not covered by insurance, exceeds our insurance coverage or where our insurance claims are rejected, the loss would have to be borne by us and our results of operations, financial performance and cash flows could be adversely affected.

- 37. *We are dependent upon key suppliers for supplying the products and any disruption in their supply could disrupt our business and adversely affect our financial results.***

For financial year ending June 30, 2021, our top 10 suppliers have accounted approximately 35% of our total purchases/ cost of goods, respectively. We purchase our products from various suppliers on either pre-agreed rates or flexible rates linked to the prevailing market benchmark. However, we do not enter into any long term agreements with our suppliers and our arrangements with them are on short-term and spot basis. Hence, there is no assurance that in future also we will be able to source our products on timely basis and execute our orders on time or find alternative resources to source our products. Further, if we are unable to source our products at commercially acceptable prices, or at all, it may affect our ability to fulfill our supply commitments, or to fulfill them in an economical manner, which will have an adverse effect on our business, financial condition and results of operations.

- 38. *Our ability to attract individual patients is largely dependent on the disposable income and increasing general health awareness of India's general population, which could decline due to a variety of factors.***

Our key source of income is from individual patients. Our individual consumer business contributed to 90% of our revenue from operations for June 30, 2021. The growth of these types of customers is dependent on brand recognition, wider acceptance of our business in the communities in which we operate and our ability to compete effectively within our industry, all of which we may be negatively affected by a wide variety of reasons. For example, individual decisions regarding when to access healthcare services may be impaired by the

absence of a developed health insurance sector or the lack of appropriate government programs to cover the costs of healthcare. Moreover, given the small proportion of people in India presently with health insurance, customers in India generally are responsible for all or part of the cost of diagnostic healthcare services, which means that a decrease in disposable income that can be allocated for healthcare services, or even the perception thereof, such as during times of economic downturn, can lead to a reduction in individuals' expenditures for healthcare services. In addition, we cannot assure you that the current increasing trend in health awareness and demand for preventive healthcare services will continue, and it may even reverse. Any of the above reasons may affect our ability to maintain or increase growth in walk-in customers, which may adversely affect our business, financial condition, results of operations and cash flows.

39. Delays in the service to clients may result in an adverse impact on our reputation, business, financial condition and prospects.

Factors beyond our control or any unforeseen events may cause our services to be delayed. Any delay in such case may result in an adverse impact on our reputation, business, financial condition and prospects. Moreover, any significant delay could result in a delayed payment from clients, additional funding requirements, cost overruns. This may have an adverse impact on our reputation and could have a material adverse effect on our business, financial condition and prospects.

40. Employee misconduct, errors or fraud could expose us to business risks or losses that could adversely affect our business prospects, results of operations and financial condition.

Employee misconduct, errors or frauds could expose us to business risks or losses, including regulatory sanctions, penalties and serious harm to our reputation. Such employee misconduct includes breach in security requirements, misappropriation of funds, hiding unauthorized activities, failure to observe our stringent operational standards and processes, and improper use of confidential information. It is not always possible to detect or deter such misconduct, and the precautions we take to prevent and detect such misconduct may not be effective. In addition, losses caused on account of employee misconduct or misappropriation of petty cash expenses and advances may not be recoverable, which we may result in write-off of such amounts and thereby adversely affecting our results of operations. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions in which case, our reputation, business prospects, results of operations and financial condition could be adversely affected.

41. We are subject to foreign currency exchange rate fluctuations which could have a material and adverse effect on our results of operations and financial conditions.

We have recently started exporting our products in some countries and receive sale proceeds against such export sales in foreign currency. Changes in value of currencies with respect to the Rupee may cause fluctuations in our operating results expressed in Rupees. The exchange rate between the Rupee and other currencies is variable and may continue to fluctuate in future. Fluctuations in the exchange rates may affect our Company to the extent of cost of sales in foreign currency terms. Any adverse or unforeseen fluctuations with respect to the unhedged exchange rate of any foreign currency for Indian Rupees may affect our Company's results of operations.

42. Delay in raising funds from the IPO could adversely impact the implementation schedule.

The proposed expansion, as detailed in the section titled "Objects of the Issue" is to be mainly funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute the expansion process within the given timeframe, or within the costs as originally estimated by us. Any time overrun, or cost overrun may adversely affect our growth plans and profitability.

43. The requirements of being a public listed company may strain our resources and impose additional requirements.

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock

Exchange(s) which require us to file unaudited financial results on a half yearly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner.

44. *The Company has not appointed any independent agency for the appraisal of the proposed Project.*

The Project, for which we intend to use our Issue proceeds as mentioned in the objects of the Issue, has not been appraised by any bank or financial institution. The total cost of Project is our own estimates based on current conditions and are subject to changes in external circumstances or costs. Our estimates for total cost of Project has been based on various quotations received by us from different suppliers and our internal estimates and which may exceed which may require us to reschedule our Project.

45. *Our Board of Directors and management may change our operating policies and strategies without prior notice or shareholder approval.*

Our Board of Directors and management has the authority to modify certain of our operating policies and strategies without prior notice (except as required by law) and without shareholder approval. We cannot predict the effect that any changes to our current operating policies or strategies would have on our business, operating results and the price of our Equity Shares.

46. *In addition to normal remuneration or benefits and reimbursement of expenses, some of our Directors and key managerial personnel are interested in our Company to the extent of their shareholding in our Company.*

Our Directors and Key Managerial Personnel are interested in our Company to the extent of remuneration paid to them for services rendered and reimbursement of expenses payable to them. In addition, some of our Directors and Key Managerial Personnel may also be interested to the extent of their shareholding in our Company. For further information, see "*Capital Structure*" and "*Our Management*" on page nos. 58 and 132, respectively, of this Draft Prospectus.

47. *There is no monitoring agency appointed by our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by the Audit Committee.*

As per SEBI (ICDR) Regulations, 2018, as amended from time to time, appointment of monitoring agency is required only for Issue size above Rs. 10,000 Lakhs. Since this Issue Size is less than Rs. 10,000 Lakhs, our Company has not appointed any monitoring agency for this Issue. Hence, we have not appointed a monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds.

Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the NSE and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

48. *We propose to utilize the Net Proceeds for purposes identified in the section titled "Objects of the Issue" in this Draft Prospectus. Any variation in the utilization of the Net Proceeds as disclosed in this Draft Prospectus shall be subject to certain compliance requirements, including prior Shareholders' approval.*

We propose to utilize the Net Proceeds for purposes identified in the section titled "*Objects of the Issue*" beginning on page no. 69 of this Draft Prospectus. The manner deployment and allocation of such funds is entirely at the discretion of our management and our Board, subject to compliance with the necessary provisions of the Companies Act.

In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Draft Prospectus without obtaining the shareholder's approval through a special resolution. In the event of any such circumstances that requires us to undertake variation in the disclosed utilization of the Net Proceeds, we may not be able to obtain the Shareholder's approval in a timely manner, or

at all. Any delay or inability in obtaining such Shareholder's approval may adversely affect our business or operations. Further, our Promoter or controlling shareholders would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to modify the objects of the Issue as prescribed in the SEBI (ICDR) Regulations, 2018, as amended from time to time. If our Shareholder's exercise such exit option, our business and financial condition could be adversely affected. Therefore, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company, which may restrict our ability to respond to any change in our business or financial condition, and may adversely affect our business and results of operations.

RISKS RELATED TO OUR EQUITY SHARES AND EQUITY SHARE HOLDERS

- 49. *Our Promoters, together with our Promoter Group, will continue to retain majority shareholding in our Company after the proposed Initial Public Issue, which will allow them to exercise significant control over us. We cannot assure you that our Promoters and Promoter Group members will always act in the best interests of the Company.***

After the completion of our Initial Public Issue, our Promoters, along with our Promoter Group members, will hold, approximately 71.22% of our post issue paid up equity capital of our Company. As a result, our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board and determine matters requiring shareholder approval or approval of our Board. Our Promoters may take or block actions with respect to our business, which may conflict with our interests or the interests of our minority shareholder. By exercising their control, our Promoters could delay, defer or cause a change of our control or a change in our capital structure, delay, defer or cause a merger, consolidation, takeover or other business combination involving us, discourage or encourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of our Company. We cannot assure you that our Promoters and Promoter Group members will always act in our Company's or your best interests. For further details, please refer to the chapters titled "*Capital Structure*" and "*Our Promoter, Promoter Group and Group Companies*", beginning on page no. 69, 146 and 154 respectively, of this Draft Prospectus.

- 50. *Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.***

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

- 51. *Any future issuance of Equity Shares may dilute your shareholdings, and sales of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.***

Any future equity issuances by our Company may lead to the dilution of investors' shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

- 52. *We cannot assure you that we will pay dividend in future.***

We have not paid any dividends on our Equity Shares since inception and there can be no assurance that dividends will be paid in future. The declaration of dividends in the future will be recommended by our Board, at its sole discretion, and will depend upon our future earnings, financial condition, cash flows, working capital requirements and capital expenditures. There can be no assurance that we will be able to pay dividend in the future. Further, we may be restricted by the terms of our debt financing from making dividend payments, in the event we default in any of the debt repayment installments.

- 53. *Investors may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.***

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a

stock exchange held for more than 12 months will not be subject to capital gains tax in India if STT has been paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the equity shares are sold. It is pertinent to note that pursuant to the Finance Bill, 2017, it has been proposed, that with effect from April 1, 2017, this exemption would only be available if the original acquisition of equity shares was chargeable to STT. The Central Government is expected to, however notify the transactions which would be exempt from the application of this new amendment. Any gain realized on the sale of equity shares held for more than 12 months, which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to applicable short-term capital gains tax in India. Capital gains arising from the sale of the equity shares will be exempt from taxation in India in cases where the exemption is provided under a treaty between India and the country of which the seller is resident, subject to the availability of certain documents. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares. For more details, please refer to "Statement of Tax Benefits" on page no. 77 of this Draft Prospectus.

54. We cannot assure you that our Equity Shares will be listed on the EMERGE Platform of NSE in a timely manner or at all, which may restrict your ability to dispose of the Equity Shares.

In terms of Chapter IX of the SEBI (ICDR) Regulations, 2018, as amended from time to time, we are not required to obtain any in-principle approval from SEBI for listing of our Equity Shares. We have only applied to NSE to use its name as the Stock Exchange in this Offer Document for listing our Equity Shares on the NSE EMERGE. Permission for listing of the Equity Shares will be granted only after the Equity Shares offered in this Issue have been allotted. Approval from NSE will require all relevant documents authorizing the issuing of the Equity Shares to be submitted to it. There could be a failure or delay in listing the Equity Shares on the NSE EMERGE. Further, certain procedural and regulatory requirements of SEBI and the Stock Exchanges are required to be completed before the Equity Shares are listed and trading commences. Trading in the Equity Shares is expected to commence within 6 Working Days from the Issue Closing Date. However, we cannot assure you that the trading in the Equity Shares will commence in a timely manner or at all. Any failure or delay in obtaining the approvals would restrict your ability to dispose off your Equity Shares.

55. The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.

Prior to this Issue, there has been no public market for our Equity Shares. NNM Securities Private Limited is acting as Market Maker for the Equity Shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. In addition, if the stock markets experience a loss of investor confidence, the trading price of our Equity Shares could decline for reasons unrelated to our business, financial condition or operating results. The trading price of our Equity Shares might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. Each of these factors, among others, could materially affect the price of our Equity Shares. There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Issue, or that the price at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Issue. For further details of the obligations and limitations of Market Makers, please refer to the section titled "General Information – Details of the Market Making Arrangement for this Issue" on page no. 48 of this Draft Prospectus.

56. There may be restrictions on daily/monthly movements in the price of our Equity Shares, which can adversely affect shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point of time.

Subsequent to listing, our Company may be subject to a daily circuit breaker imposed on listed companies by all stock exchanges in India, which does not allow transactions having crossed certain volatility limit in the price of its Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers

generally imposed by SEBI on Indian stock exchanges. The percentage limit on our Company's circuit breaker is set by the stock exchanges based on certain factors such as the historical volatility in the price and trading volume of the Equity Shares. The stock exchange is not required to inform us of the percentage limit of the circuit breaker from time to time and may change it without our knowledge. This circuit breaker, if imposed, would effectively limit the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, we cannot assure that the shareholders will be able to sell the Equity Shares at desired prices at any particular time.

EXTERNAL RISK FACTORS

57. Any changes in the regulatory framework could adversely affect our operations and growth prospects.

The company is subject to various regulations and policies. For details see section titled **"Key Industry Regulations"** beginning on page no. 115 of this Draft Prospectus. The company's current businesses and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that it will succeed in obtaining all requisite regulatory approvals in the future for its operations or that compliance issues will not be raised in respect of its operations, either of which could have a material adverse effect on the business, financial condition and results of operations.

58. Our business is subject to a significant number of tax regimes and changes in legislation governing the rules implementing them or the regulator enforcing them in any one of those jurisdictions could negatively and adversely affect our results of operations.

The revenues recorded, and income earned is taxed on differing bases, including net income actually earned, net income deemed earned and revenue-based tax withholding. The final determination of the tax liabilities involves the interpretation of local tax laws as well as the significant use of estimates and assumptions regarding the scope of future operations and results achieved and the timing and nature of income earned, and expenditures incurred. Changes in the operating environment, including changes in tax laws, could impact the determination of the tax liabilities of our Company for any year.

59. The nationalized Goods and Services Tax (GST) regimes proposed by the Government of India may have material impact on our operations.

The Government of India has proposed a comprehensive national goods and service tax (GST) regime that will combine taxes and levies by the Central and State Governments into a unified rate structure. Given the limited liability of information in the public domain covering the GST we are unable to provide/ measure the impact this tax regime may have on our operations.

60. Significant differences exist between Indian GAAP and other accounting principles, such as US GAAP and IFRS, which may be material to investors' assessments of our Company's financial condition. Our failure to successfully adopt IFRS may have an adverse effect on the price of our Equity Shares. The proposed adoption of IFRS could result in our financial condition and results of operations appearing materially different than under Indian GAAP.

Our financial statements, including the financial statements provided in this Draft Prospectus, are prepared in accordance with Indian GAAP. We have not attempted to quantify the impact of IFRS or U.S. GAAP on the financial data included in this Draft Prospectus, nor do we provide a reconciliation of our financial statements to those of U.S. GAAP or IFRS. U.S. GAAP and IFRS differ in significant respects from Indian GAAP. For details, see **"Presentation of Financial, Industry and Market Data"** on page no. 14 of this Draft Prospectus. Accordingly, the degree to which the Indian GAAP financial statements included in this Draft Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Prospectus should accordingly be limited.

India has decided to adopt the "Convergence of its existing standards with IFRS" and not the "International Financial Reporting Standards" ("IFRS"), which was announced by the MCA, through the press note dated January 22, 2010. These "IFRS based / synchronized Accounting Standards" are referred to in India as IND

(AS). Public companies in India, including our Company, may be required to prepare annual and interim financial statements under IND (AS). The MCA, through a press release dated February 25, 2011, announced that it will implement the converged accounting standards in a phased manner after various issues, including tax related issues, are resolved. Further, MCA Notification dated February 16, 2015, has provided an exemption to the Companies proposing to list their shares on the SME Exchange as per Chapter IX of the SEBI ICDR Regulations and hence the adoption of IND (AS) by a SME exchange listed company is voluntary. Accordingly, we have made no attempt to quantify or identify the impact of the differences between Indian GAAP and IFRS or to quantify the impact of the difference between Indian GAAP and IFRS as applied to its financial statements. There can be no assurance that the adoption of IND-AS will not affect our reported results of operations or financial condition. Any failure to successfully adopt IND-AS may have an adverse effect on the trading price of our Equity Shares. Currently, it is not possible to quantify whether our financial results will vary significantly due to the convergence to IND (AS), given that the accounting principles laid down in the IND (AS) are to be applied to transactions and balances carried in books of accounts as on the date of the applicability of the converged standards (i.e., IND (AS) and for future periods.

Moreover, if we volunteer for transition to IND (AS) reporting, the same may be hampered by increasing competition and increased costs for the relatively small number of IND (AS)-experienced accounting personnel available as more Indian companies begin to prepare IND (AS) financial statements. Any of these factors relating to the use of converged Indian Accounting Standards may adversely affect our financial condition.

61. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection / tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

62. Instability in financial markets could materially and adversely affect our results of operations and financial condition.

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets.

The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in NIFTY, NSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

63. Conditions in the Indian securities market and stock exchanges may affect the price and liquidity of our Equity Shares.

Indian stock exchanges, which are smaller and more volatile than stock markets in developed economies, have in the past, experienced problems which have affected the prices and liquidity of listed securities of Indian companies. These problems include temporary exchange closures to manage extreme market volatility, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading, limited price movements and restricted margin requirements. Further, disputes have occurred on occasion between listed companies and the Indian

stock exchanges and other regulatory bodies that, in some cases, have had a negative effect on market sentiment. If similar problems occur in the future, the market price and liquidity of the Equity Shares could be adversely affected. Further, a closure of, or trading stoppage on, either of the Stock Exchanges could adversely affect the trading price of our Equity Shares.

64. Any downgrading of India's debt rating by a domestic or international rating agency could adversely affect our Company's business.

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our Company's ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could harm our Company's business and financial performance and ability to obtain financing for capital expenditures.

65. Natural calamities (Act of God) and force majeure events may have a negative impact on the Indian economy and cause our business to suffer.

India has experienced natural calamities such as earthquakes, a tsunami, floods and drought in the past few years. These natural disasters may cause significant interruption to our operations, and damage to the environment that could have a material adverse impact on us. The extent and severity of these natural disasters determines their impact on the Indian economy. Further prolonged spells of deficient or abnormal rainfall or other natural calamities in the future could have a negative impact on the Indian economy, adversely affecting our business and the price of the Equity Shares.

66. Terrorist attacks, civil unrests and other acts of violence in India and around the region could adversely affect the markets, resulting in loss of consumer confidence and adversely affect the business, results of operations, financial condition and cash flows.

Terrorist attacks, civil unrests and other acts of violence or war in India and around the region may adversely affect worldwide financial markets and result in a loss of consumer confidence and ultimately adversely affect the business, results of operations, financial condition and cash flows. Political tensions could create a perception that an investment in Indian companies involves higher degrees of risk and on the business and price of the Equity Shares.

67. Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance.

Certain events that are beyond the company's control such as earthquake, fire, floods and similar natural calamities may cause interruptions in the business operations. The operations and financial results and the market price and liquidity of the equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India. In addition, any political instability in India may adversely affect the Indian economy and the Indian securities markets in general, which could also affect the trading price of our Equity Shares.

68. In future the company may depend on banks and financial institutions and other sources for meeting its short and medium term financial requirements.

Any delay in the disbursement of funds from these bodies can act as a bottleneck to the project execution capabilities and thereby its results of operations. The company cannot assure that it will be able to do so on commercially reasonable terms. Any increase in interest expense may have a material adverse effect on its business prospects, financial condition and results of operations.

69. Increases in interest rates may affect the results of operations.

Currently, the company does not have any debt, but it cannot be assured that it will not incur indebtedness with a floating rate of interest in the future. As such, increases in interest rates may adversely affect the cost of future borrowings.

The company has not entered into any interest rate hedging or swaps transactions. It cannot be assured to the prospective investor that the company, if it does not enter into any interest rate hedging or swap transactions,

will be able to do so on commercially reasonable terms, or that any of such agreements will protect the company fully against interest rate risk. Any increase in interest expense may have an adverse impact on its business, prospects, financial condition and results of operations.

70. We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and trading industry contained in the Draft Prospectus.

Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

Healthcare Introduction

Healthcare has become one of India’s largest sector, both in terms of revenue and employment. Healthcare comprises hospitals, medical devices, clinical trials, outsourcing, telemedicine, medical tourism, health insurance and medical equipment. The Indian healthcare sector is growing at a brisk pace due to its strengthening coverage, services and increasing expenditure by public as well private players.

Indian healthcare delivery system is categorised into two major components public and private. The Government, i.e. public healthcare system, comprises limited secondary and tertiary care institutions in key cities and focuses on providing basic healthcare facilities in the form of primary healthcare centres (PHCs) in rural areas. The private sector provides majority of secondary, tertiary, and quaternary care institutions with major concentration in metros and tier I and tier II cities.

India's competitive advantage lies in its large pool of well-trained medical professionals. India is also cost competitive compared to its peers in Asia and Western countries. The cost of surgery in India is about one-tenth of that in the US or Western Europe.

As of February 3, 2021, India became the fastest country in the world to reach the 4 million COVID-19 vaccination

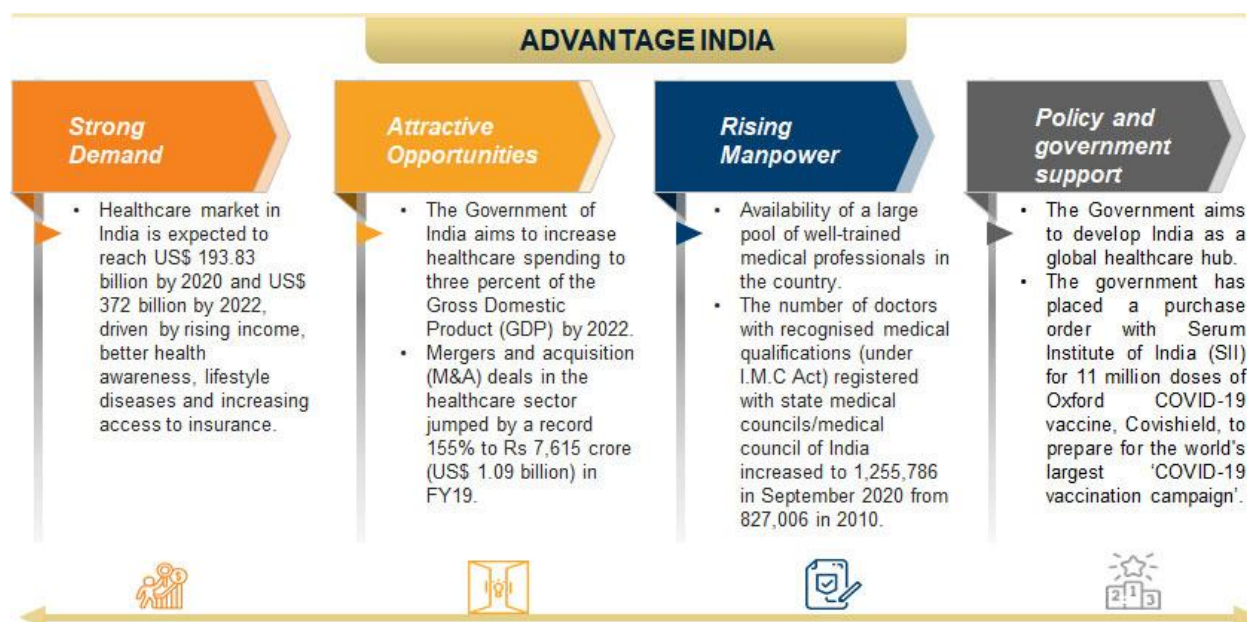

mark in 18 days.

Market Size

Healthcare has become one of India's largest sector, both in terms of revenue and employment. The industry is growing at a tremendous pace owing to its strengthening coverage, service and increasing expenditure by public as well private players. In 2016–22, the market is expected to record a CAGR of 17.69%. The total industry size is estimated to reach US\$ 193.83 billion by 2020 and US\$ 372 billion by 2022. In Budget 2021, India's public expenditure on healthcare stood at 1.2% as a percentage of the GDP. Health insurance is gaining momentum in India. Gross direct premium income underwritten by health insurance grew 17.16% y-o-y to Rs. 51,637.84 crore (US\$ 7.39 billion) in FY20. This is due to rising income, easier access to high-quality healthcare facilities and greater awareness of personal health and hygiene. Greater penetration of health insurance aided the rise in healthcare spending, a trend likely to intensify in the coming decade. Economic prosperity is driving the improvement in affordability for generic drugs in the market. In Budget 2021, India's public expenditure on healthcare stood at 1.2% as a percentage of the GDP. The Government is planning to increase public health spending to 2.5% of the country's GDP by 2025. The share of healthcare in GDP is expected to rise 19.7% by 2027.

Diagnostic Sector

The diagnostic industry has emerged as an attractive play in India's growing healthcare sector and is one of the fastest growing services in the country. The domestic diagnostic industry is estimated at USD9bn (around INR 675bn) and is expected to grow at a compounded annual growth rate (CAGR) of ~10% over the next 5 years. Growth will be primarily driven by change in demographics, increase in lifestyle diseases, and higher income levels

across all strata of society, rise in preventive testing, deeper penetration with asset-light expansion, and spread of healthcare services and insurance.

The diagnostic segment is a critical component of the healthcare sector. Globally, ~80% of physician diagnoses are a result of laboratory tests. There are mainly 3 types of tests: Routine, clinical lab and specialty tests.

- Routine tests: Common tests like sugar, cholesterol, HIV, pap, pregnancy, etc.
- Clinical lab tests to monitor diseases and drug treatments
- Specialty tests: Genetics, immunology, oncology, endocrinology and other critical segments

The Indian diagnostic industry is highly fragmented and under-penetrated despite the presence of over 1 lakh labs. Diagnostic chains command ~16% market share. The 4 major players – Dr Lal PathLabs (DLPL), Metropolis Healthcare (METROHL), SRL Diagnostics (SRL) and Thyrocare Technologies – have a share of ~6%. So, there is a huge opportunity for national players to consolidate and for organic expansion. We believe organized players with national presence would grow at 15-17% CAGR over the next five years and continue to garner market share, led by asset light models and strong cash flows. The growth of these diagnostics would be majorly volume-driven, given the high level of competition and government-imposed regulations. Attracted by historically high growth rates (20-25%) lucrative returns, and low entry barriers, most players compete on pricing to garner volumes quickly and move up the cost curve, supported by PE investors. To capture the increasingly important shift towards the consumer, industry leaders have started to implement initiatives such as retailer partnering, offering home testing, and enhancing engagement with patients through digital presence, in addition to maintaining their basic testing services as a safety net. A faster shift of unorganized business to organized players, potential consolidation, likely increase in preventive check-ups and sizeable scale would benefit large organized players with strong balance sheets.

The industry is broadly segregated into pathology testing and imaging diagnostic services. Pathology testing (in-vitro diagnosis) includes sample collection in the form of blood, urine and stool. This is followed by the sample's analysis using laboratory equipment and technology to derive useful clinical information for assisting in patient treatment. The imaging diagnostic segment consists of more complex tests like computed tomography (CT) scans and magnetic resonance imaging (MRI) and other highly specialised tests like positron emission tomography (PET)-CT scans. As per estimates, the pathology segment contributes ~58% of total market revenue.

With private diagnostic chains taking the lead with superior and quality services, highly accurate and wider test menu -- resulting in market share gains – we expect consolidation in the sector going forward. Currently, only 1% of labs are National Accreditation Board of Laboratories (NABL) and/or College of American Pathologists (CAP) accredited. Only a few large national players like SRL, DLPL, METROHL, Thyrocare, Max Healthcare and Apollo Clinic have accredited labs.

Indian diagnostic industry – Market structure

The market share is categorized as: unorganized (47%), hospital-based lab (37%) while the remaining (~16%) is with the organized players. Doctor referrals constitute a large part of this business. This includes commission payments to doctors in lieu of referring a diagnostic lab. Further, currently, the illness diagnosis segment is more prevalent than wellness segment in India.

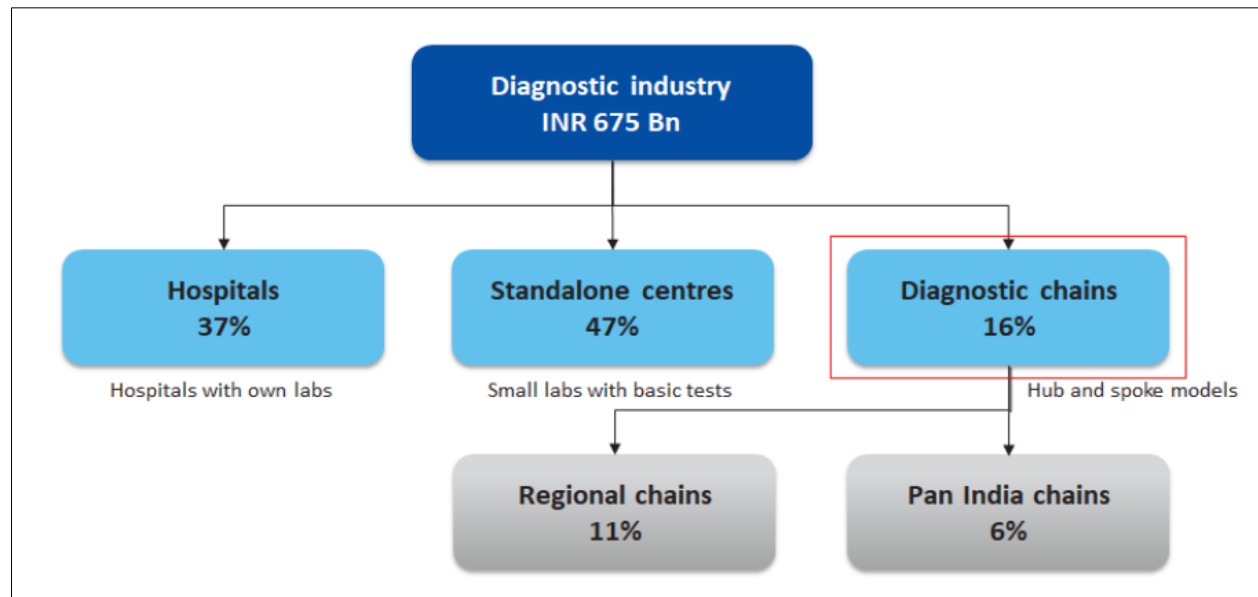

Services:

Pathology testing or invitro diagnosis involves the collection of samples in the form of blood, urine, stool, etc., and analyzing them using laboratory equipment and technology to arrive at useful clinical information that assists in treatment of diseases. It includes biochemistry, immunology, hematology, urine analysis, molecular diagnosis, and microbiology.

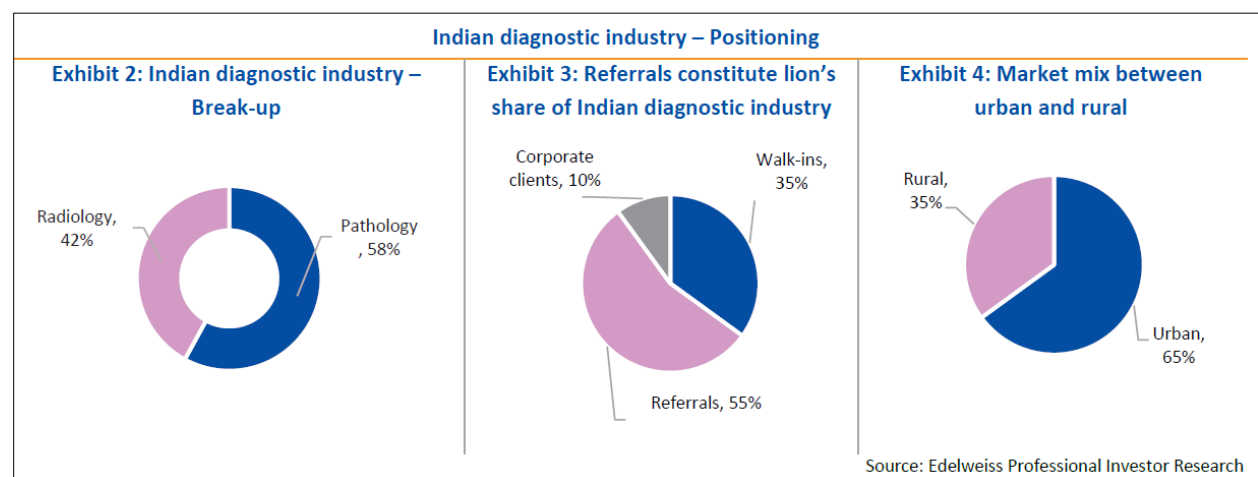

Imaging diagnosis or radiology involves imaging procedures such as X-rays and ultrasounds that help determine anatomical or physiological changes inside a patient's body, thus assisting doctors in diagnosing. It includes more complex tests such as CT scans, MRIs, and highly specialized PET-CT scans.

Wellness and preventive diagnostic services aim at identifying pre-existing diseases or the likely risk of particular diseases before the onset of symptoms. It is expected that wellness and preventive diagnostic services will assist people more accurately identify risks so that they can take corrective or precautionary measures before any chronic

condition develops. Wellness and preventive tests are generally aligned to either specifically screen for a chronic

disease or contain a series of tests to ascertain the overall health condition of an individual.

The diagnostic sector in India is highly fragmented with large chains, standalone centres and hospital-based laboratories. The lack of regulatory framework and minimum standard requirements led to low-entry barriers. However, limited test menu/offerings by regional standalone laboratories and partial coverage of hospital-based laboratories have resulted in higher opportunities for diagnostic chain players.

Diagnostic chains have the advantage of years of experience, brand trust and recall, global quality standards and accreditations, brand experience, expansive test menu, patient touch-points to service patients locally, value-added offerings for patients and the ability to sustainably grow into newer markets. Pan India diagnostic players have been gaining market share continuously over the past few years on account of expanding collection centres and laboratory networks, which has helped them improve their asset utilisation. National diagnostic players would gain market share in coming years, especially post the COVID-19 pandemic, which would further lead to industry growth.

Asset Light Model for Growth:

Hub and spoke model: Most organized diagnostic chains operate on hub and spoke business model, which brings economies of scale benefits. To gain a competitive advantage, reap scale economy benefits and control operating costs, these diagnostic chains constantly endeavor to increase their network rapidly. They do so by adding satellite laboratories and collection centers (majorly on a franchisee model).

Reagent rental model: Suppliers sell their equipment to lab testing companies at almost zero capital costs. Lab testing companies agree to buy reagent batches (batch of testing chemicals) exclusively from the company whose equipment is installed in their lab and pay a periodic rental (given a lease rental type agreement), which is booked as an operating expense.

Shop in Shop model: Diagnostic players are entering into outsourcing contracts with hospitals, whereby they would handle the entire diagnostic operations for them. Such models of outsourcing clinical tests to private laboratories are expected to rise to streamline and increase efficiency.

Home collection: Home sample collection and testing has been on the rise, provided by almost all organized players and some unorganized ones as well. Phlebotomist collects the sample and transports it in a specially designed transportation box (cold box) to the designated processing center. Home sample collection is one of the key reasons for the success of diagnostic chains and their rapid penetration in the urban market.

Formalization of Diagnostic Industry:

The diagnostics industry is highly fragmented with large chains, standalone centers, and hospital-based laboratories. Owing to low entry barriers, the industry is fragmented and is witnessing a lot of small and medium sized players; however, very few are able to scale in a profitable manner. Regional Standalone Laboratories have a limited test menu and, hence, lack the capacity needed to expand in terms of service offerings and perceived quality of testing, which may not be as good as that of an established chain's. Hospital-based laboratories are restricted to the hospital's inpatients, with a limited test menu and charges that are higher than diagnostic chains. Diagnostic chains, on the other hand, have an advantage of years of experience, brand trust and recall, global quality standards and accreditations, brand experience, expansive test menus, patient touch points to service patients locally, value added offerings for patients and the ability to sustainably grow in new markets.

Diagnostic chains have managed rapid growth through opening more collection centers, which has improved their asset utilization. Moreover, large chains have greater bargaining power that allows them to keep their input costs (bulk purchase of reagents) lower than standalone centers. Standalone ones also tend to lose out on some business as they are unable to carry out complex tests and customers hold the perception that their quality does not match that of branded chains'. Hence, we can say diagnostic chains would continue to eat into standalone centers' market share. Their situation is further strengthened after the COVID-19 breakout, with the shift from unorganized to organized players expected to happen at a faster rate now, as patients prefer visiting branded and recognized labs that give better quality and enhanced safety. Organized players are also likely to benefit from rise in home collection, given their strong brand recognition, reliability and quality services. The unorganized and smaller labs offer a chance to the bigger players to expand their reach and presence through acquisitions and franchisee operation model.

Positive Impact of COVID-19:

The current health scare of COVID-19 is set to change the mindset of Indian customers. An increasing number of customers will now evaluate and label diagnostics chains as 'COVID-19 capable' and 'non-COVID-19 capable'. With these tests becoming the new norm, a higher market share is expected to shift towards the labs offering COVID-related tests. The pandemic is helping the organized players build their brand value and goodwill, which will help attract patients.

Customers are now anticipated to place quality over pricing when it comes to diagnostics. Higher quality standards, authentic reports, after sales service, and doctor engagement will be the key deciding factors in the lab selection process. Unorganized and standalone labs were facing severe cost pressures due to lockdown. The faster adoption of quality standards, partly enforced by the Government and partly forced upon by customers, indirectly, could result in the closure of operations for many unorganized standalone labs. A faster consolidation in the industry, along with changes in the regulatory framework, is also anticipated soon. Diagnostics chains with a lean balance sheet, strong consumer-connect, high brand recall, and following global quality standards will gain market share. We believe that the current disruption led by COVID-19 will help the industry leaders in absorbing the small and mid-sized labs, which are facing operational challenges.

Challenges faced by industry:

Lower/no entry barrier: One of the key reasons for the industry to be fragmented is low entry barrier. The historically high growth rates (20-25%) had attracted quite a few PE investors into this setup. Private equity (PE)

players were very active in this space during 2011-15; but the number of deals has gone down on the back of high competition. Also, limited test menu/offerings by regional standalone laboratories and partial coverage of hospital-based laboratories have resulted in higher opportunities for diagnostic chain players.

Challenge in entering new geographies: India is a vast country with diverse cultures and disease profiles across its various regions. The diversity in demographics, disease profiles, and healthcare systems present big challenges. Large diagnostic players face competition from local players who have an edge due to their familiarity with local market dynamics. Also, most players have substantial presence in metros and Tier I. However, the Tier II, III and IV cities are something that has not been tapped aggressively and is largely run by local standalone players offering basic tests. Nevertheless, companies have now started to tap the interiors in order to drive volumes by partnering with local players, which is driving consolidation. National diagnostics players, after having set up centers in new locations, take time to engage with doctors (as referrals contribute high share in this sector) who have long relationships with regional players. Doctors take their own time, which also depends on how much visibility the national players have created of their services in local areas. These national players garnering higher market share from unorganized counterparts take time to scale up their operations.

Pricing pressures: India's diagnostics industry is highly competitive with unorganized players still garnering approximately 84% market share. This increases competition among organized and unorganized diagnostic chains in terms of volumes of patients' samples and pricing of diagnostic tests.

Vulnerability to technological advancements: Medical devices and analyzers are constantly undergoing technological advancements. To stay ahead of the competition, diagnostics centers have to constantly upgrade their technology. However, these upgrades not only involve significant capital investments, but also increase maintenance costs. This is critical, especially for smaller players who face a paucity of funds.

Recent Trends:

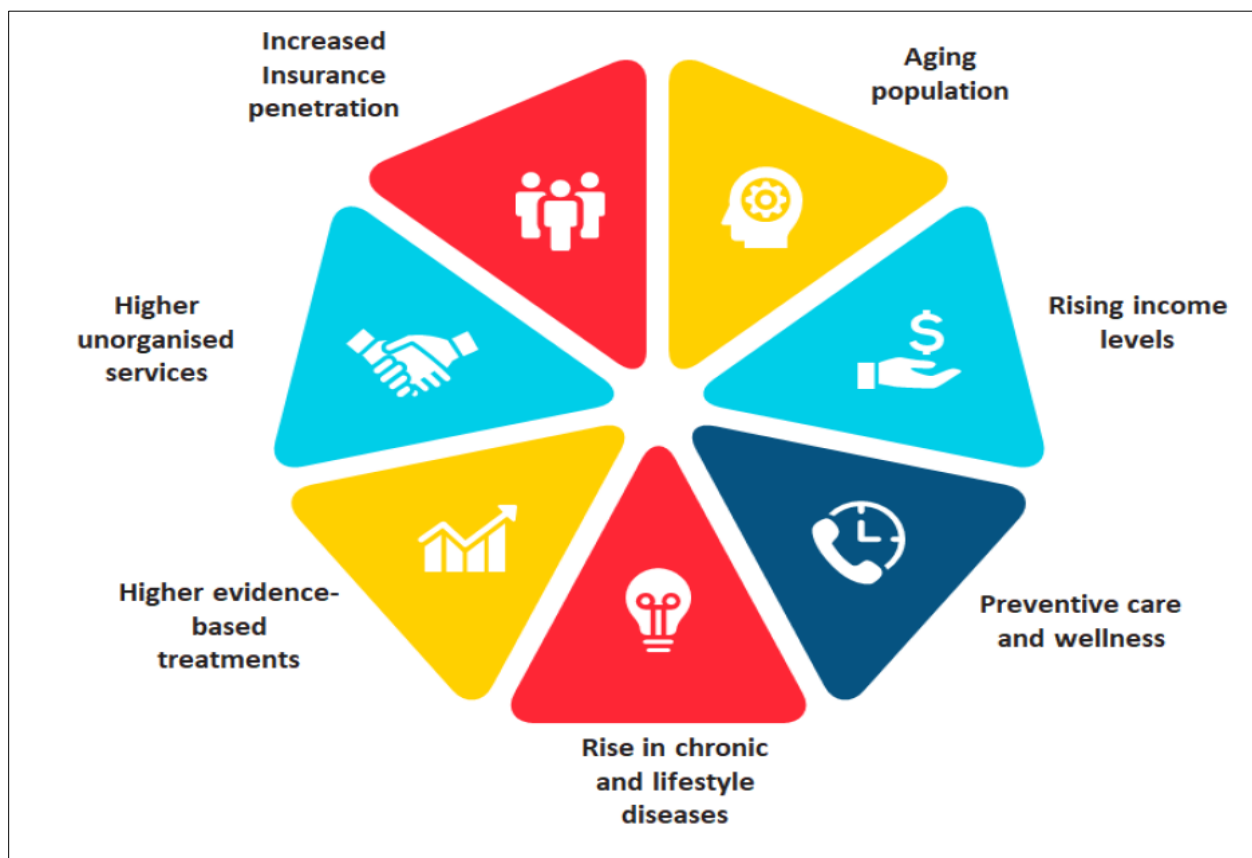

Focus on Preventive and Wellness services: Organized players are increasingly targeting healthy individuals with sedentary lifestyles, who are more prone to lifestyle diseases such as cardiovascular ailments and diabetes. Bulk business from employer schemes is a key driver of this market. Emerging trend of precision medicine and focus on preventive care and walk-in/direct-to-customer diagnostic services are expected to drive growth in the diagnostics arena.

Consolidation, shift from unorganized to organized: India's diagnostics industry is highly fragmented. With emergence of pan-India diagnostic chains, the sector has seen more and more consolidation via mergers and acquisitions and increased market share of organized chains.

Brand building initiatives: All the major diagnostic players are investing in brand building and creating online and offline marketing campaigns to differentiate their offerings, quality, and test accuracy from their competitors. They are launching advertising campaigns, healthcare camps, and various wellness and preventive test packages under their own brands. Their focus on repeat sales and conversion of referral customers into owned ones is the path they are following in this competitive market.

Emergence of Online Aggregators: Online aggregators provide a robust website platform for customers to the most suitable diagnostic packages. They also provide a feature for choosing the service provider along with display of the price it offers. Individual health check-up providers suggest various packages to customers based on their requirements and handle the booking of packages at designated service providers. These facilities are bringing diagnostic and testing services to the fingertips of customers, offering them a number of available options almost instantly.

National players have majority of accredited labs in the country, focus on quality

National diagnostic players focus on quality through their accredited lab network has helped them establish a brand for themselves in their core market of operation. There are around 1,216 NABL accredited labs, which is ~1% of total labs in India and works out to less than 1 lab per million. The top 4 players have the maximum number of NABL accredited labs. Though the number of accredited labs in India have been growing at 16% CAGR to 1,216 in 2020 from 576 in 2015, there is still a long way to go to reach the numbers of peer nations such as the UK, US and Australia, which have more than 10 labs per million. Quality will be the key future growth driver for the diagnostic industry, where national players are ahead of sector peers.

National diagnostic players poised to gain market share

Diagnostic players, with revenue above INR 100 crore, are profitable with better operating margins as the benefits of scale in test coverage and market penetration brings operating leverage.

Benefits of scale:

1. Diagnostic companies procure their main raw material of chemicals/reagents from equipment manufacturers. Moreover, machines are supplied to them free of cost, lowering their upfront capex requirement for expansion. This arrangement is available to scaled up players only as they can procure reagents in bulk.
2. Large organised diagnostic chains are in a position to perform high revenue generating complex tests.
3. Their strong brand visibility and widespread network of labs and patient service centres attracts more B2C revenue.
4. Doctors' associations play a crucial role in growth, which is driven by a strong brand
5. The hub and spoke model ushers cost efficiencies with bulk testing and increased penetration.
6. Their efficient IT infrastructure, centralised operations and streamlined pan India processes help them gain market share.

Expected increase in health insurance coverage

Most diagnostic testings in India is still an out of pocket expense and is hardly covered by any of the prevailing insurance schemes in the market.

While the Insurance Regulatory and Development Authority of India (IRDAI) pegs the health insurance opportunity size at INR 3 lakh crore, the market size as on FY19-end stands under INR 50,000 crore. This highlights the industry's strong growth potential going forward. Life insurers mostly provide benefit policies for health protection, attached as riders to the base policy, although standalone policies have also been offered.

As per IRDAI, only 36 crore individuals had health insurance coverage, of which only 20% was via commercial insurance providers in the life and non-life space, as bulk of it comes from Central and state government-sponsored schemes. Private health expenditure is expected to rise significantly as life expectancy continues to increase. Till date, the lion's share of healthcare expenditure has come from out-of-pocket expenditure, which is the highest in India compared to its regional peers.

A multitude of factors — under-penetration, low government share of expenditure, rising life expectancy and higher healthcare cost — will be the key growth drivers in this segment.

Inclusion of diagnostic tests under insurance coverage could act as a booster shot

Besides the under-penetration of health insurance, India trails the world in outpatient department (OPD) and diagnostic tests coverage. As per various industry estimates, ~20% of total diagnostic services are being reimbursed via insurance claims, the rest is met by out of pocket expense. This is resulting in a significant section of the population opting for cheaper alternatives. The inclusion of OPD and diagnostic tests in insurance coverage in many Western countries had led to an inflection in the growth rate of the diagnostic industry. We expect a similar trends to emerge in India if such tests are covered by insurance policies.

Competition softens with fall in private equity deals

Private equity (PE) players were very active in this space during 2011-15, but the number of deals is slowly softening. PE investments usually have a 5-7 year tenure. Payers backed by PEs typically focus of creating scale in the market or try to gain market share by pushing prices lower. The diagnostic sector is now relatively immune to price competition as we are observing a slowdown in PE deals.

National players gain market share through the inorganic route

National players are driving growth through acquisitions, business mix, by offering high end complex tests and competitive pricing. This inorganic expansion is the result of competitive pricing, lower scale of business and slowdown in PE investments. This mode of growth is one of the major vectors of market share gains for national players in this fragmented market. Global players like LabCorp and Quest Diagnostics in the US have also grown through acquisitions and this model is being followed by Indian diagnostic players. National players are more focused on Tier II, III cities for inorganic expansion.

Highly Dominated by the Unorganised Sector, the India Diagnostic Laboratories Market is in Dire Need for Regulations to Pave Out the Path for Future Growth: Ken Research

Comments:

The diagnostic industry has emerged as an attractive play in India's growing healthcare sector and is one of the fastest growing service segments in the country. Diagnostic is a business of economies of scale and the most important metric is the cost of processing a sample. The existing players are still in the nascent stages of their growth cycles and have a long runway ahead. We are positive on the national diagnostic chains in India, given their advantages of many years of experience, brand trust and recall, global quality standards and accreditations, wide test menus, extensive patient touchpoints to service patients locally, value-added offerings, and ability to sustainably grow in new markets. Potential consolidation in the industry, organic and inorganic expansion, complemented by their strong balance sheets and return ratios, would provide tailwinds to their growth in the medium term.

The large listed Indian diagnostic chains - Dr. Lal, Metropolis, Thyrocare - remain beneficiaries of what we view as attractive long-term industry growth story. Given the outbreak of COVID-19 and its impact on people mindset about healthcare and preventive measures over the next one to two years; we are giving higher valuation to these stocks. We see the potential for increased inclusion of diagnostic testing in health insurance and ample runway for higher market penetration as standards of living increase and preventive healthcare awareness rises.

Evolution fo Nidan Healthcare

Our Diagnostic Centre's and Operational Network

Since incorporation, our diagnostic's centre's are located within the Northern District of Mumbai and Pune and Southern District of Pune. As on this date, 30 diagnostic cum collection centres are operational under the brand name of "Nidan Healthcare" and offer radiology, neurology, cardiology, dental as well as pathology services. Out of the 35 Centre's, 16 centre's are under the Franchisee model where 1 centre acts as a fully operated diagnostic centre and 15 centre's act solely as standalone collection centres. For details on our centre's please refer to "**Our Properties**" on page no. 110 of this Draft Prospectus. Our diagnostic centres are designed in accordance with certain specifications, which include requirements in relation to design of work area, physical infrastructure and placement of technical equipment, with an aim to provide our customers with uniformity of experience for every visit. Our diagnostic centres are for the purpose of walk-in customers as well as our institutional customers to provide their specimens for pathology tests and/or to receive radiology tests, depending on the nature of the test sought.

Since 2000, private and government hospitals have been using our services and diagnostics centre's for various pathology and radiology tests. After more than a decade of experience, we have successfully set our diagnostics centre in Asian Heart Hospital, Mumbai under the name of "Asian Nidan Imaging Centre". To enable our patients to easily distinguish our pathology and radiology services, we introduced "NIDANPATH" and "NIDAN DIAGNOSTICS" respectively in the year 2017. As on March 31, 2021, we offer a comprehensive range of approximately 740 routine and 3000 specialized pathology tests and approximately 220 basic and 320 advanced radiology tests that cover a range of specialties and disciplines. As on March 31, 2021, our diagnostic services are provided by a medical professional team consisting of 94 laboratory doctors, radiologists, physicians and 256 well-trained technical staff in our operational network. As of June 30, 2021, all of our centre's are Pre-Conception and Pre-Natal Diagnostic Techniques ("PCPNDT") accreditations.

Typically, customers come to our diagnostic centres when they need to undergo certain pathology and/or radiology tests for preventive and/or curative purposes either on their own or for servicing prescribed tests requests from a physician, other qualified healthcare professional or a hospital, clinic or nursing home. Based on the particular request, our staff at diagnostic centres collect the specimens required for pathology tests and/or conduct radiology

tests. Specimens collected at our diagnostic centres are delivered through our logistics network to a reference laboratory pre-designated to process the type of test requested from the specific diagnostic centre that collected the sample. Our dedicated logistics team is responsible for monitoring, in real time, daily shipments from all locations, recording the status of the shipment from the time of collection of the specimen or sample, until it arrives and is accepted at our laboratories.

Sample Receipt, Registration and Barcoding

NOM assigns a unique identification number and barcode to each specimen, which helps control and manage the entire process from registration to specimen collection until the release of the test report. The barcode generated is tagged on to the appropriate customer tube at the time of specimen collection.

Specimens are received in the accession department of our reference laboratories. Specimens delivered to our reference laboratories are required to be accompanied by a sample data sheet or a test request form, which includes information such as test to be performed and the necessary demographic, medical and billing information. Each specimen and its test request form is rechecked for completeness.

Our staff follows specimen acceptance and rejection criteria laid down by our quality assurance department to ensure that poor quality or insufficient specimens are rejected. If the specimens meet our defined acceptance criteria, they are distributed to the relevant departments.

Testing Procedures

Most of our pathology tests are conducted through fully automated systems. The specimens are placed in the testing equipment and/or instrument, which are interfaced bi-directionally with NOM. The testing equipment and/or instrument can take instructions from NOM after it reads the sample barcode and automatically connects to LIMS for customer and test details. The process is fully automated, and once the equipment and/or instrument concludes the testing, the results are automatically uploaded into NOM under the relevant barcode. Authorized signatories of

the department closely monitor the results and, wherever needed, orders re-check. Validated results, if relevant, are then transferred into NOM for a medical review by lab doctors including pathologists, microbiologists, biochemists, histopathologists and geneticists review and authenticate the results in reports.

As part of our standard operating procedure, we select certain test results for re-testing as part of our quality assurance practices. Pursuant to our biomedical waste management agreements with authorized third parties, specimens are disposed of through a waste management system that complies with applicable environment and health and safety laws.

The Clinical Establishments (Registration and Regulation) Act, 2010 (“CERR Act”)

The CERR Act provides for registration and regulation of clinical establishments and prescribes minimum standards for facilities and services provided by them. Currently, the CERR Act is in effect in the States of Arunachal Pradesh, Himachal Pradesh, Mizoram, Sikkim, Uttar Pradesh, Rajasthan, Bihar, Uttarakhand and Jharkhand and all Union Territories except Delhi (“Notified Areas”). Additionally, the States of Bihar, Jharkhand, Uttarakhand, Himachal Pradesh, Arunachal Pradesh and Sikkim, and Union Territories of Puducherry, Dadra & Nagar Haveli, Daman & Diu and Andaman & Nicobar Islands have framed rules applicable to their respective states under the CERR Act prescribing inter alia the powers of registration authority, procedure for registration of clinical establishments and applicable fee.

The CERR Act defines a “clinical establishment” to include inter alia a place established in connection with the diagnosis or treatment of diseases where pathological, bacteriological, genetic, radiological, chemical, biological investigations or other diagnostic or investigative services with the aid of laboratory or other medical equipment, are usually carried.

While draft minimum standards under the CERR Act for various services to be provided by, and application formats for permanent registration of, clinical establishments have been made publicly available, these are yet to be notified in the Official Gazette. In the interim, clinical establishments in Notified Areas are required to apply for provisional registration under the CERR Act within six months of establishment, irrespective of prior registration under any other applicable laws, which would be valid for an initial period of 12 months, subject to renewal for time periods as prescribed under the CERR Act. Permanent registration shall only be applied for and granted if the clinical establishment meets the prescribed standards for registration under the CECG Rules, once notified. Unless revoked on account of contravention of any provisions of the CERR Act or CECG Rules, such registration would be valid for a period of five years and may be renewed pursuant to an application made within six months before the expiry of the permanent registration.

The Clinical Establishments (Central Government) Rules 2012 (“CECG Rules”)

The Ministry of Health and Family Welfare, Government of India by a notification dated May 23, 2012 brought into force the CECG Rules, which are applicable to the states wherein the CERR Act is in operation. The CECG Rules inter alia, provide conditions for registration and continuation of clinical establishments. In terms of CECG Rules, clinical establishments are required to display the rates for each type of services in vernacular and English language, the rates to be charged are ought to be within the range as determined by the Central Government, the clinical establishments are required to ensure compliance with standard treatment guidelines as determined and issued by the Central Government or the State Governments as the case may be, clinical establishments are required to maintain electronic records of every patient. Additionally, clinical establishments are also required to maintain information and statistics in accordance with the CECG Rules.

Foreign Exchange Management Act, 1999

Foreign investment in Indian companies is governed by the provisions of the Foreign Exchange Management Act, 1999 (“FEMA”) read with the applicable regulations. The Department of Industrial Policy and Promotion (“DIPP”), Ministry of Commerce and Industry has issued the Consolidated FDI Policy (the “FDI Circular”) which consolidates the policy framework on Foreign Direct Investment (“FDI”), with effect from September 7, 2016. The FDI Circular consolidates and subsumes all the press notes, press releases, and clarifications on FDI issued by DIPP till September 6, 2016. All the press notes, press releases, clarifications on FDI issued by DIPP till September 6, 2016 stand rescinded as on September 7, 2016. Foreign investment is permitted (except in the prohibited sectors) in Indian companies either through the automatic route or the approval route, depending upon the sector in which foreign investment is sought to be made. Under the approval route, prior approval of the Government of India through FIPB is required. FDI for the items or activities that cannot be brought in under the automatic route may be brought in through the approval route. Where FDI is allowed on an automatic basis without the approval of the FIPB, the RBI would continue to be the primary agency for the purposes of monitoring and regulating foreign investment. In cases where FIPB approval is obtained, no approval of the RBI is required except with respect to fixing the issuance price, although a declaration in the prescribed form, detailing the foreign investment, must be filed with the RBI once the foreign investment is made in the Indian company. The RBI, in exercise of its power

under the FEMA, has also notified the Foreign Exchange Management (Transfer or Issue of Security by a Person Resident outside India) Regulations, 2000 to prohibit, restrict or regulate, transfer by or issue security to a person resident outside India. The Consolidated FDI Circular dated September 7, 2016 issued by the DIPP does not prescribe any cap on the foreign investments in the sector in which the Company operates. Therefore, foreign investment up to 100% is permitted in the Company under the automatic route. No approvals of the FIPB or the RBI are required for such allotment of equity Shares under this Issue. The Company will be required to make certain filings with the RBI after the completion of the Issue. RBI has also issued Master Circular on Foreign Investment in India dated July 01, 2015. In terms of the Master Circular, an Indian company may issue fresh shares to persons resident outside India (who are eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh issue of shares shall be subject to inter-alia, the pricing guidelines prescribed under the Master Circular. As mentioned above, the Indian company making such fresh issue of shares would be subject to the reporting requirements, inter-alia with respect to consideration for issue of shares and also subject to making certain filings including filing of Form FC-GPR.

FEMA Regulations

As laid down by the FEMA Regulations, no prior consents and approvals are required from the Reserve Bank of India, for Foreign Direct Investment under the automatic route within the specified sectoral caps. In respect of all industries not specified as FDI under the automatic route, and in respect of investment in excess of the specified sectoral limits under the automatic route, approval may be required from the FIPB and/or the RBI. The RBI, in exercise of its power under the FEMA, has notified the Foreign Exchange Management (Transfer or Issue of Security by a Person Resident Outside India) Regulations, 2000 ("FEMA Regulations") to prohibit, restrict or regulate, transfer by or issue security to a person resident outside India. Foreign investment in India is governed primarily by the provisions of the FEMA which relates to regulation primarily by the RBI and the rules, regulations and notifications there under, and the policy prescribed by the Department of Industrial Policy and Promotion, Ministry of Commerce & Industry, Government of India.

The Companies Act, 1956

The Act deals with the laws relating to company and certain other associations. It was enacted by the parliament in 1956. The Companies Act, 1956 primarily regulated the formation, financing, functioning and winding up of the companies. The Act prescribes regulatory mechanism regarding all relevant aspect including organizational, financial and managerial aspects of companies. Regulation of financial and management aspects constitutes the main focus of the Act. In the functioning of the corporate sector, although freedom of the companies is important, protection of the investors and shareholders, on whose funds they flourish, is equally important. The Companies Act plays the balancing role between these two competing factors, namely management autonomy and investor protection.

The Companies Act, 2013 (To the extent notified)

The Companies Act, 2013, has been introduced to replace the existing Companies Act, 1956 in a phased manner. The Ministry of Corporate Affairs has vide its notification dated September 12, 2013 has notified 98 (Ninety Eight) Sections of the Companies Act, 2013 and the same are applicable from the date of the aforesaid notification. A further 183 (One Eighty Three) Sections have been notified on March 26, 2014 and have become applicable from April 1, 2014. The Companies (Amendment) Act, 2015 has inter-alia amended various Sections of the Companies

Act, 2013 to take effect from May 29, 2015. Further, vide the Companies (Amendment) Act, 2015, Section 11 of the Companies Act, 2013 has been omitted and Section 76A has been inserted in the Companies Act, 2013. The Ministry of Corporate Affairs, has also issued rules complementary to the Companies Act, 2013 establishing the procedure to be followed by companies in order to comply with the substantive provisions of the Companies Act, 2013.

Competition Act, 2002

The Competition Act, 2002 (“**Competition Act**”) aims to prevent anti-competitive practices that cause or are likely to cause an appreciable adverse effect on competition in the relevant market in India. The Competition Act regulates anti-competitive agreements, abuse of dominant position and combinations. The Competition Commission of India (“**Competition Commission**”) which became operational from May 20, 2009 has been established under the Competition Act to deal with inquiries relating to anti-competitive agreements and abuse of dominant position and regulate combinations. The Competition Act also provides that the Competition Commission has the jurisdiction to inquire into and pass orders in relation to an anti-competitive agreement, abuse of dominant position or a combination, which even though entered into, arising or taking place outside India or signed between one or more non-Indian parties, but causes an appreciable adverse effect in the relevant market in India.

Indian Contract Act, 1872

The Indian Contract Act, 1872 (“**Contract Act**”) codifies the way in which a contract may be entered into, executed, implementation of the provisions of a contract and effects of breach of a contract. A person is free to contract on any terms he chooses. The Contract Act consists of limiting factors subject to which contract may be entered into, executed and the breach enforced. It provides a framework of rules and regulations that govern formation and performance of contract. The contracting parties themselves decide the rights and duties of parties and terms of agreement.

The Specific Relief Act, 1963

The Specific Relief Act is complimentary to the provisions of the Contract Act and the T.P. Act, as the Act applies both to movable property and immovable property. The Act applies in cases where the Court can order specific performance of a contract. Specific relief can be granted only for purpose of enforcing individual civil rights and not for the mere purpose of enforcing a civil law. ‘Specific performance’ means Court will order the party to perform his part of agreement, instead of imposing on him any monetary liability to pay damages to other party.

Transfer of Property Act, 1882

The transfer of property, including immovable property, between living persons, as opposed to the transfer property by operation of law, is governed by the Transfer of Property Act, 1882 (“**T.P. Act.**”). The T.P. Act establishes the general principles relating to the transfer of property, including among other things, identifying the categories of property that are capable of being transferred, the persons competent to transfer property, the validity of restrictions and conditions imposed on the transfer and the creation of contingent and vested interest in the property. Transfer of property is subject to stamping and registration under the specific statutes enacted for the purposes which have been dealt with hereinafter.

The T.P. Act recognizes, among others, the following forms in which an interest in an immovable property may be transferred:

- Sale: The transfer of ownership in property for a price, paid or promised to be paid.
- Mortgage: The transfer of an interest in property for the purpose of securing the payment of a loan, existing or future debt, or performance of an engagement which gives rise to a pecuniary liability. The T.P. Act recognises several forms of mortgages over a property.
- Charges: Transactions including the creation of security over property for payment of money to another which are not classifiable as a mortgage. Charges can be created either by operation of law, e.g. decree of the court attaching to specified immovable property, or by an act of the parties.
- Leases: The transfer of a right to enjoy property for consideration paid or rendered periodically or on specified occasions. Leave and License: The transfer of a right to do something upon immovable property without creating interest in the property.

Further, it may be noted that with regards to the transfer of any interest in a property, the transferor transfers such interest, including any incidents, in the property which he is capable of passing and under the law, he cannot transfer a better title than he himself possesses.

The Registration Act, 1908

The Registration Act, 1908 was passed to consolidate the enactments relating to the registration of documents. The main purpose for which the Act was designed was to ensure information about all deals concerning land so that correct land records could be maintained. The Act is used for proper recording of transactions relating to other immovable property also.

The Act provides for registration of other documents also, which can give these documents more authenticity. Registering authorities have been provided in all the districts for this purpose.

The Indian Stamp Act, 1899

The Indian Stamp Act, 1899 prescribes the rates for the stamping of documents and instruments by which any right or liability is, or purports to be, created, transferred, limited, extended, extinguished or recorded. Under the Indian Stamp Act, 1899, an instrument not 'duly stamped' cannot be accepted as evidence by civil court, an arbitrator or any other authority authorised to receive evidence. However, the document can be accepted as evidence in criminal court.

Maharashtra Stamp Act, 1958

The Maharashtra Stamp Act, 1958 ("**Maharashtra Stamp Act**") prescribes the different rates of duties on the instrument falling within the various descriptions set-out in Schedule I of the Maharashtra Stamp Act., then the instrument is chargeable with the highest of the duty prescribed. In addition, the Maharashtra Stamp Act also prescribes methodology for adjudication, refund of duties, grievance processes and prosecutions. The Collector is normally vested with the power of adjudication. If a document is not stamped or adequately stamped, it is likely to be impounded.

TAX RELATED LEGISLATIONS

Income Tax Act, 1961

Income Tax Act, 1961 is applicable to every Domestic / Foreign Company whose income is taxable under the provisions of this Act or Rules made under it depending upon its —Residential Status and —Type of Income involved. U/s 139(1) every Company is required to file its Income tax return for every Previous Year by 31st October of the Assessment Year. Other compliances like those relating to Tax Deduction at Source, Fringe Benefit Tax, Advance Tax, and Minimum Alternative Tax and the like are also required to be complied by every Company.

Goods and Services Tax Act, 2017 (the "GST Act")

Goods and Services Tax (GST) is considered to be the biggest tax reform in India since independence. It will help realize the goal of "One Nation-One Tax-One Market." GST is expected to benefit all the stakeholders – industry, government and consumer. Goods and Services Tax (GST) is an [indirect tax](#) throughout India and was introduced as [The Constitution \(One Hundred and Twenty Second Amendment\) Act 2017](#), following the passage of Constitution 122nd Amendment Bill. The GST is governed by GST Council and its Chairman is [Union Finance Minister of India - Arun Jaitley](#). This Act has been made applicable with effect from 1st July 2017.

With the introduction of GST all central, state level taxes and levies on all goods and services have been subsumed within an integrated tax having two components – central GST and a state GST. Thus there will be a comprehensive and continuous mechanism of tax credits.

The Central government passed four sets of GST Acts in the Budget session this year. These were Central GST Act, 2017; Integrated GST Act, 2017; Union Territory GST Act, 2017 and GST (Compensation to States) Act, 2017. The Acts were approved by the Parliament after they were introduced as the part of the Money Bill. Following the

passage of GST Acts, the GST council has decided 4 tax rate slabs viz., 5%, 12%, 18% and 28% on supply of various goods and services.

India has adopted a dual GST model, meaning that taxation is administered by both the Union and State Governments. Transactions made within a single State will be levied with Central GST (CGST) by the Central Government and State GST (SGST) by the government of that State. For inter-state transactions and imported goods or services, an Integrated GST (IGST) is levied by the Central Government. GST is a consumption-based tax, therefore, taxes are paid to the State where the goods or services are consumed and not the State in which they were produced.

Customs Act, 1962

The provisions of the Customs Act, 1962 and rules made there under are applicable at the time of import of goods i.e. bringing into India from a place outside India or at the time of export of goods i.e. taken out of India to a place outside India. Any Company requiring to import or export any goods is first required to get itself registered and obtain an IEC (Importer Exporter Code).

INTELLECTUAL PROPERTY RIGHTS LEGISLATIONS

The laws relating to intellectual property will also apply to the Company.

The Trade Marks Act, 1999

The Trade Marks Act, 1999 (“Trademark Act”) governs the statutory protection of trademarks in India. In India, trademarks enjoy protection under both statutory and common law. Indian trademarks law permits the registration of trademarks for goods and services. Certification trademarks and collective marks are also registrable under the Trade Mark Act. An application for trademark registration may be made by any person claiming to be the proprietor of a trademark and can be made on the basis of either current use or intention to use a trademark in the future. The registration of certain types of trademarks is absolutely prohibited, including trademarks that are not distinctive and which indicate the kind or quality of the goods.

Applications for a trademark registration may be made for in one or more international classes. Once granted, trademark registration is valid for 10 years unless cancelled. If not renewed after 10 years, the mark lapses and the registration for such mark has to be obtained afresh.

While both registered and unregistered trademarks are protected under Indian law, the registration of trademarks offers significant advantages to the registered owner, particularly with respect to proving infringement. Registered trademarks may be protected by means of an action for infringement, whereas unregistered trademarks may only be protected by means of the common law remedy of passing off. In case of the latter, the plaintiff must, prior to proving passing off, first prove that he is the owner of the trademark concerned. In contrast, the owner of a registered trademark is prima facie regarded as the owner of the mark by virtue of the registration obtained.

The Patents Act, 1970

The Patents Act, 1970 (‘Patents Act’) is the primary legislation governing patent protection in India. In addition to broadly requiring that an invention satisfy the requirements of novelty, utility and non obviousness in order for it to avail patent protection, the Patents Act further provides that patent protection may not be granted to certain specified types of inventions and materials even if they satisfy the above criteria. The term of a patent granted under the Patents Act is for a period of twenty years from the date of filing of application for the patent. The Patents Act deems that computer programs per se are not ‘inventions’ and are therefore, not entitled to patent protection. This position was diluted by The Patents Amendment Ordinance, 2004, which included as patentable subject matter:

1. Technical applications of computer programs to industry; and
2. Combinations of computer programs with the hardware.

However, the Patents Amendment Act, 2005, does not include this specific amendment and consequently, the Patents Act, as it currently stands, disentitles computer programs per se from patent, may disentitle the said invention to patent protection on grounds of lack of novelty. Under the Patents Act, an invention will be regarded as having ceased to be novel (and hence not patentable), inter alia, by the existence of:

1. Any earlier patent on such invention in any country;
2. Prior publication of information relating to such invention;
3. An earlier product showing the same invention; or
4. A prior disclosure or use of the invention that is sought to be patented.

Following its amendment by the Patents Amendment Act, 2005, the Patents Act permits opposition to grant of a patent to be made, both pre-grant and post-grant. The grounds for such patent opposition proceedings, inter alia, include lack of novelty, inventiveness and industrial applicability, non-disclosure or incorrect mention of source and geographical origin of biological material used in the invention and anticipation of invention by knowledge (oral or otherwise) available within any local or indigenous community in India or elsewhere. The Patents Act also prohibits any person resident in India from applying for patent for an invention outside India without making an application for the invention in India. Following a patent application in India, a resident must wait for six weeks prior to making a foreign application or may obtain the written permission of the Controller of Patents to make foreign applications prior to this six week period. The Controller of Patents is required to obtain the prior consent of the Central Government before granting any such permission in respect of inventions relevant for defense purpose or atomic energy. This prohibition on foreign applications does not apply, however, to an invention for which a patent application has first been filed in a country outside India by a person resident outside India.

Copyright Act, 1957

The Copyright Act, 1957 ("Copyright Act") protects original literary, dramatic, musical and artistic works, Cinematographic films and sound recordings from unauthorized use of such works. Unlike the case with patents, copyright protects the expressions and not the ideas. There is no copyright in an idea. The object of copyright law is to encourage authors, artists and composers to create original works by rewarding them with exclusive right for a fixed period to reproduce the works for commercial exploitation. Copyrights subsist in following class of works:

- a) Original literary, musical, dramatic and artistic works
- b) Cinematograph films
- c) Sound recordings

Under the copyright law the creator of the original expression in a work is its author who is vested with a set of exclusive rights with respect to the use and exploitation of the work. The author is also the owner of the copyright, unless there is a written agreement by which the author assigns the copyright to another person or entity, such as a publisher, where work is done under a 'work for hire' agreement, the copyright vests with the hirer, i.e., the person providing the work. The owner of copyright in a work can assign or license his copyright to any person, such as publisher, under a written agreement. Copyright subsists in a work since the time it comes into being. Therefore, registration of copyright neither creates any rights nor precludes enforcement of the existing ones. However, owing to its evidentiary value, a registered copyright is easier to establish in the court of law. The term of copyright varies across different types of works. In the case of broadcasts, the Act grants "broadcast reproduction rights" to broadcasting organizations which subsist for 25 years.

I. Civil Cases filed by our Company

Nidan Laboratories and Healthcare Limited(formerly known as Abhi Dignostics Pvt Ltd) (Applicants) V/s Kalyan Dombivali Municipal Corporation (KDMC)(Respondents)- no. ARP/4/2013& 5776/2012

Our Company has filed a writ petition under Section 11 of the Arbitration and Conciliation Act, 1996 before the High Court of Judicature at Bombay against KDMC ("Resposndents"). The Respondents had entered into a lease agreement dated 06/08/2008 to set up and start a cardiac unit ("agreement") with the Company pursuant to which the company was permitted to use the premises for long term lease of 30 years to provide distinctive services of cardiac hospital. However, the Respondents failed to fulfill terms of the agreement and company suffered huge lossess on account of non-performance of respondents. Hence the company being aggrieved party filed writ petition against the responsndets for suitable orders.

On the basis of an advertisement published in the local Marathi newspaper dated 17/03/2006 an expression of interest (EOI) was floated by Kalyan Dombivali Muncicipal Corporation to set up a super specialty hospital in Cardiology with the objective of providing all the necessary essential medical facilities and treatment in cardiology and against which the KDMC offered to provide premises on a long term lease of 30 years. Accordingly the applicants and its Managing Director DR. NITIN THORVE expressed their interest in EOI to set up and start the Cardiac Unit within the premises of KDMC to fulfill the nobel objective of the said EOI to start up super specialty Cardiac Hospital so that the facilities and treatment are within the reach of the poor and needy people and also for the benefit of all the employees of the KDMC. The project was encouraged and executed on similar lines as of public-private partnership. Having successfully fulfilled the criteria of EOI, the applicant on the strength of their managing successfully numerous diagnostic and sonography centers across different localities was found suitable for the proposed hospital project. The Respondents invited the applicant to participate in the said project as defined in the EOI and later several meetings took place between them, in which the modalities and terms and conditions of the proposed lease agreement were discussed in detail, along with and in-depth discussion on the possible structural

changes/design modification in the building for the effecting an installations and operation of sophisticated and modern cardiology equipment's and machineries. After a great deal of discussion and understanding of the delivery of cardiac health facilities, a Lease Agreement dated 06/08/2008 came to be executed between Applicant and the Respondents, whereby KDMC is to leased out the said premises consisting Ground plus two storey structure with built up space admeasuring 144 sq. meters on ground floor and 288 sq. meters on first and second floor for the period of 29 years to the Applicant. Before entering the said Lease Agreement, a committee comprising of 15 coporators of KDMC went into details of medical services and treatment to be offer and scrutinized every aspect of proposed project. Based on their recommendations the applicable fee/charges rate structure were incorporated. Before signing of the agreement the said committee also visited few of the centers of the applicant hospitals/clinic/diagnostic centers (NIDAN) and only after their total satisfaction about managerial and financial capacity and medical skills and competence of the applicant the agreement came to be signed. Due to the sensitivity of having healthy and hygienic environment, the Applicant have suggested certain modifications within the lease premises which was appreciated by the respondent's officials and corporators/members of the standing committee and hence in its General Body Meeting No.10 dated 15/12/2009, KDMC overwhelmingly approved and granted certain facilities and also made an exemption on payment of octroi charge of importing the machineries to be installed in the proposed hospital. The applicant states that as per the terms and clauses of the said lease agreement and after detailed planning an discussion and in order to meet the project deadline and to avoid in the delay of the project, the applicant from their own funds have spent substantial amount in carrying out the requiste changes which were supposed to be carried out by respondents in their capacity as owner of the premises and as duty of the lessor. However the applicant carried out a very challenging task as the cardiac and allied machinery and equipment were modern, sophisticated as well as expensive and huge cost and expenditure incurred in procuring and importing them. After the successful inauguration of the hospital, the woes of the applicant began to arise. It attracted the histiulity and prejudices from some of the corporators who had malafide intention and vested interest, in total disregard and abuse of the due process of law, started harassing the applicant and demanded illegitamte claims. Failure to satisfy them and their needs, they carried a malicious and hostile campaign and vendetta against the Applicant. They started to create hurdles and unwarranted interference in the management of the affairs of the hospital. It was also alleged that some unauthorized construction work was carried out in the hospital premises. Having made personal clarification by the officials of the applicant and submission of all the facts and circumstances of the matter, the respondents issued order dated 16/12/2011 whereby directed to demolish the construction work within eight days of the order. The respondent disregarded the fact of filing Civil Suit No.521/2011 before District Court for injunction against demolition of the said premises, the vendetta was carried to its logical end with the demolition of the newly created structure. Without even a sense of the application of mind, forgetting that the premises belonged to them, as they were owners/lessor and that the hospital project was a kind of public private partnership for the benefit of poor people and a pride of health facility in the surrounding areas, the demolition damaged the expensive machinery and importantly brought to a standstill further expansion plans and end to an efficient and functioning health services in the area. Applicant states that the demolition was not only illegal, but total abuse of due process of law. The Applicant had filed writ petition against respondents for their high handed and unconstitutional activities. The matter is presently pending.

The Appellant states that due to the false representation on the part of the Opposite Party the Appellant sustained irreparable loss and damage and also caused danger to his life and life of his family members including small children. The Appellant states that the Opposite Party therefore, has committed the guilty of “deficiency in service” and further “unfair trade practise” U/s. 2(1) (g) and (r) of The Consumer Protection Act. The Appellant thereafter called the Opposite Party to pay the compensation amount of Rs.25,79,336/- (Rupees Twenty Five Lakhs Seventy Nine Thousand Three Hundred Thirty Six) for the loss and damage suffered by him due to the act of “deficiency in service” and further “unfair trade practise” committed by the Opposite Party. The Appellant through his Advocate sent Legal Notice dated 25-10-2012 to the Opposite Party regarding the Claim and compensation. The said Notice was sent on the Showroom address and the registered address of the Opposite Party and same has been received by the Opposite Party. There was No Reply was given by the Opposite Party within the prescribed time as mentioned therein. Thus, the Opposite Party had committed an offense of deficiency in service and unfair trade practise moreover, they also cheated, duped and deceived the Appellant. The Appellant filed the Complaint No.CC/13/313 against the Opposite Parties for redressal of grievances so also for compensation for the loss and damages sustained by the Appellant/Org. Applicant therein. The Appellant had filed the Consumer Complaint on 05-07-2013 against the Opposite Party. Hon’ble State Consumer Disputes Redressal Commission, Maharashtra, Mumbai had issued the Notice before admission on 16-09-2013 and kept the matter for admission on 09-12-2013. On 09-12-2013, the Opposite Party had taken the adjournment on the ground that Vice President was unable to attend the Commission due the death of his close relative, therefore, the matter was adjourned to 06-01-2014. On 06-01-2014, the Opposite Party had filed the Vakalatnama and replied to oppose the admission of the complaint and then the matter was fixed for hearing on admission on 11-02-2014. On 11-02-2014, the Advocate appearing for the Complainant due to heavy traffic reached to the Court late in meantime the matter was called out and the Hon’ble Commission marked absent. The Hon’ble Commission without keeping back the matter, hurriedly passed the Order on 11-02-2014 and thereby rejected the complaint without giving an opportunity of hearing to the Complainant or to his counsel appearing on record on admission stage itself. The Hon’ble Commission given observation that repeatedly the matter was adjourned on point of admission. In fact, as per the Roznama the Complainant to his counsel was present on every date, however, the Opposite Party by one way or the other reason took the adjournments. The Hon’ble State Commission wrongly held that the claim of the Complainant is below one lakh in fact the complainant has filed his claim to the tune of Rs.25,00,000/-. It is further wrongly held by the State Commission in its Order dated 11-02-2014, that the Complainant had failed to make out the case on the point of pecuniary jurisdiction. The State Commission had passed the Order dated 11-02-2014 without giving opportunity of hearing to the Complaint through his counsel and thereby committed gross error and further without keeping back the matter rejected the complaint by hearing one side and thus, committed injustice against the Complainant. Therefore, the Appellant filed separate Application for delay condonation. The delay is not intentional or deliberate, hence, it needs to be condoned and the Appeal may be admitted, in the interest of justice and the matter is presently pending.

Phased implementation of Unified Payments Interface

SEBI has issued a **UPI Circulars** in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 until June 30, 2019. Under this phase, a Retail Individual Applicant would also have the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing would continue to be six Working Days.

Phase II: This phase commenced upon completion of Phase I and will continue for a period of three months or floating of five main board public issues, whichever is later. Under this phase, submission of the Application Form by a Retail Individual Applicant through intermediaries to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 extended the timeline for implementation of UPI Phase II till March 31, 2020. Further SEBI vide its circular no. RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are FIPB and the RBI.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”), issued consolidated FDI Policy Circular of 2018, which with effect from January 04, 2018 consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on January 04, 2018. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidation FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares by an Indian resident to a Non-Resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI/RBI.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.
