SECTION III - RISK FACTORS

An investment in our Equity Shares involves a high degree of financial risk. Prospective investors should carefully consider all the information in the Draft Prospectus, particularly the **“Financial Information of the Company”** and the related notes, **“Our Business”** and **“Management’s Discussion and Analysis of Financial Condition and Results of Operations”** on page 129, 84 and 168 respectively of this Draft Prospectus and the risks and uncertainties described below, before making a decision to invest in our Equity Shares.

The risk factors set forth below are not exhaustive and do not purport to be complete or comprehensive in terms of all the risk factors that may arise in connection with our business or any decision to purchase, own or dispose of the Equity Shares. This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. Any of the following risks, individually or together, could adversely affect our business, financial condition, results of operations or prospects, which could result in a decline in the value of our Equity Shares and the loss of all or part of your investment in our Equity Shares. While we have described the risks and uncertainties that our management believes are material, these risks and uncertainties may not be the only risks and uncertainties we face. Additional risks and uncertainties, including those we currently are not aware of or deem immaterial, may also have an adverse effect on our business, results of operations, financial condition and prospects.

This Draft Prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Draft Prospectus. The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors below. However, there are risk factors the potential effects of which are not quantifiable and therefore no quantification has been provided with respect to such risk factors. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of the Issue, including the merits and the risks involved. You should not invest in this Issue unless you are prepared to accept the risk of losing all or part of your investment, and you should consult your tax, financial and legal advisors about the particular consequences to you of an investment in our Equity Shares.

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

1. Some events may not be material individually but may be found material collectively.
2. Some events may have material impact qualitatively instead of quantitatively.
3. Some events may not be material at present but may be having material impact in future.

Note:

The risk factors as envisaged by the management along with the proposals to address the risk if any. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial implication of any of the risks described in this section.

In this Draft Prospectus, any discrepancies in any table between total and the sums of the amount listed are due to rounding off. Any percentage amounts, as set forth in **“Risk Factors”** on page 21 and **“Management Discussion and Analysis of Financial Condition and Results of Operations”** on page 168 of this Draft Prospectus unless otherwise indicated, has been calculated on the basis of the amount disclosed in the **“Restated Financial Statements”**.

INTERNAL RISK FACTORS

1. **Our business is seasonal in nature and therefore our results of operations for any quarter in a given year may not, therefore, be comparable with other quarters in that year**

Our business is seasonal in nature and as a result, our operating results may fluctuate. Since our business is influenced by the traditional crop season in India, our production as well as the demand for our products may be affected by seasonal factors such as weather conditions, irrigation facilities, availability of credit to farmers and overall agricultural production. For example, weak rainfall during a particular year may result in lower than normal area under cultivation for certain crops and this may affect overall agricultural production in India. Consequently, the results of one reporting period may not be necessarily comparable with the

preceding, succeeding or corresponding reporting periods. Our revenues recorded during planting and harvesting seasons are typically lower as compared to revenues recorded during the periods preceding these crop seasons. During periods of low sales activity, we continue to incur substantial operating expenses in connection with, among other things, product promotion expenses which are not reduced significantly during such periods, while our revenues remain reduced. We also experience significant fluctuations in our working capital requirements during the planting and harvesting cycles.

We have experienced, and expect to continue to experience, significant variability in our total revenue, operating cash flows, operating expenses and net revenues on a quarterly basis. In particular, our sales during the first quarter i.e., between the months of April and June, are significantly greater than sales recorded during any other quarterly period as sale of groundnut seeds and other kharif season crops are generally sown during this period. Similarly, our sales during the first half (i.e., between the months of April and September) are significantly greater than our sales during the second half (i.e., between the months of October and March). The seasonality of our business and its impact may cause fluctuations in our result of operations and financial conditions.

2. We are highly dependent on the sale of Groundnut seeds and our business is exposed to risks related to product concentration, which could materially and adversely affect our business, financial condition, results of operations, and prospects.

The sale of Groundnut seeds is the largest contributor towards our total revenue, and contributed 72.90%, 83.14% and 78.64% to our revenue from operations in Fiscal 2022, Fiscal 2021 and Fiscal 2020, respectively. As a result, our business is exposed to risks related to product concentration. Our inability to produce sufficient quantities of our existing products in a timely manner or at all, our failure to develop new products that meet the evolving demands of our end consumers or to obtain the regulatory approvals for such products, the development of successful products by our competitors and general economic conditions. We cannot assure you that the performance of our groundnut seeds will continue to meet our customers' expectations. In addition, our business, financial condition, results of operations and prospects could be materially and adversely affected if one or more of these uncertainties or disruptions occur.

3. Our inability to predict accurately the demand for our products and to manage our production and inventory levels could materially and adversely affect our business, financial condition, results of operations and prospects.

We sell our seed products primarily to dealers, who in turn sell the products primarily to farmers, who are our end consumers. We monitor our inventory levels at different stages of our supply chain based on our own estimates of future demand for our products. Because of the length of time necessary to produce commercial quantities of seeds, we are typically required to make production decisions a year in advance of sales. Our end consumers generally make purchasing decisions for our products based on market prices, economic and weather or climatic conditions and certain other factors that we or our dealers may not be able to anticipate accurately in advance. Demand for our products may also be affected by factors such as irrigation facilities, availability of credit, overall agricultural production, farmers' ability to generate income from their produce. Any negative change in preferences of our end consumers for our products could result in reduced demand for our products.

An inaccurate forecast of demand for any of our products can result in the unavailability of seeds that are in high demand, which may adversely affect our results of operations, customer relationships and market share. Conversely, an inaccurate forecast of demand or return of our products can also result in a surplus of seeds, which may increase storage and other related costs, negatively impact cash flows, reduce the quality of inventory, erode margins substantially and may ultimately result in write-offs of inventory, any of which circumstances could materially and adversely affect our business, financial condition, results of operations and prospects. These factors could result in lower revenue or operating margins and in turn, materially and adversely affect our business, financial condition, results of operations and prospects.

4. Substantial portion of our revenues has been dependent upon few customers. The loss of any one or more of our major customers would have a material adverse effect on our business, cash flows, results of operations and financial condition.

The substantial portion of our revenues has been dependent upon few customers. For instance, our top ten customers accounted for 49.56%, 54.48% and 57.14% (aprox.) of our revenue from operations for the Fiscal 2022, Fiscal 2021 and Fiscal 2020, respectively. We have not entered into long term agreements with our customers and the success of our business is accordingly significantly dependent on us maintaining good relationships with them. The loss of one or more of these significant customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations,

financial condition and cash flows. We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future. Further, the sales volume may vary due to our customers' attempts to manage their inventory, market demand, product and supply pricing trends, change in customer preferences etc., which may result in decrease in demand or lack of commercial success of our products, which could reduce our sales and adversely affect our business, cash flows, results of operations and financial condition.

In addition, we are exposed to payment delays and/or defaults by our major customers and our financial position and financial performance are dependent on the creditworthiness of our customers. There is no guarantee that all or any of our customers will honor their outstanding amounts in time and whether they will be able to fulfill their obligations, due to any financial difficulties, cash flow difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur from all or any of our major customer, our financial performance and our operating cash flows may be adversely affected.

5. *Our business is also dependent on certain suppliers and loss of any one or more of them would have a material adverse effect on our business.*

The substantial portion of our purchases has been dependent upon few suppliers. For instance, our top ten suppliers accounted for 41.28%, 57.68% and 54.93% (aprox.) of our total purchase for the Fiscal 2022, Fiscal 2021 and Fiscal 2020, respectively. We have not entered into long term agreements with our suppliers and the success of our business is accordingly significantly dependent on us maintaining good relationships with them for regular supply of our raw material. The inability of a supplier to meet these requirements, the loss of a significant supplier, or any labour issues or work stoppages at a significant supplier could disrupt the supply of raw materials and parts to our facilities, preventing our Company from delivering to its customers, or cause returns of products.

6. *We rely on third-party farmers who assist us in growing seeds (the "Seed Growing Farmers") to produce our seeds, and any problems with such Seed Growing Farmers may negatively affect our sales, cash flows from operations and results of operations, and may further expose us to reputational risk.*

We generally undertake our seed production through contractual arrangements with certain selected Seed Growing Farmers during every crop season. We provide these Seed Growing Farmers with the required farm inputs and closely manage their activities during all stages of seed production. However, our arrangements with these Seed Growing Farmers carry risks that they may have economic or other interests that are inconsistent with our interests. They may take actions that are contrary to our instructions or requests, or may be unable or unwilling to fulfill their obligations, especially those that relate to timely delivery of the produce. Under the provisions of the Protection of Plant Varieties and Farmers' Rights Act, 2001 (the "PPV & FR Act"), farmers may be entitled to statutory protection, thereby enabling farmers to save, use, sow, re-sow, exchange, share or sell their farm produce in any manner they want and we may not be able to enforce provisions in our agreements with such Seed Growing Farmers to restrict them from doing so. Further, any failure by us to monitor closely the activities of our Seed Growing Farmers could expose our crops to risks related to genetic contamination, disease or pest infestation and other types of problems that could affect the quality of our seeds. While we have had long-term relationships with several of our Seed Growing Farmers who are now familiar with our quality standards and other parameters, we do not have long-term contracts with our Seed Growing Farmers and cannot assure you that such Seed Growing Farmers will continue to work with us on expiry of the relevant contract period.

7. *Weather conditions, crop diseases and pest attacks could adversely affect the production of our seed products, as well as the demand for our seed products, which may adversely affect our business, financial condition, results of operations and prospects.*

Our seed production activities and the Indian seeds industry are subject to substantially all the risks faced by the agriculture industry in India. Crop yields depend significantly on the absence of any crop disease or pest attacks and favourable weather conditions such as adequate rainfall and temperature, which vary from location to location. Adverse weather conditions such as windstorms, flood, drought or frost may cause crop failures and reduce harvests, which may adversely affect our operations. However, results of changes in weather and climatic conditions are difficult to predict and may affect crop planning and timing. In addition to factors such as soil quality and the use of fertilisers, weather conditions may also affect the presence of diseases and pests. Any of these factors may adversely affect our production of seeds. As we are obliged to pay our Seed Growing Farmers a mutually

agreed compensation regardless of the seed yield, we bear the risks associated with bad weather and climatic conditions. Furthermore, if crop diseases and pests develop resistance to our products, this could adversely affect our Seed Growing Farmers' crop yields. Additionally, we cannot assure you that adverse weather patterns in the future or potential crop diseases will not affect our ability to produce the desired quality or quantity of products to meet demand and in turn, their pricing. Any of these factors, or a combination thereof, can adversely affect the quality of our seeds, yield and inventory levels, could increase our cost of operations, strain our operating margins and reduce our operating revenue, which could materially and adversely affect our business, financial condition, results of operations and prospects.

8. *We are highly dependent on markets in the state of Gujarat and are exposed to risks related to the concentration of our operations in Gujarat. Any disruption to our operations in these states could materially and adversely affect our business, financial condition, results of operations and prospects.*

We derive a significant proportion of our revenue from the state of Gujarat. The total contribution from Gujarat was 87.99%, 81.68% and 73.80% respectively, to our revenue from operations in Fiscal 2022, Fiscal 2021 and Fiscal 2020. Such geographical concentration of our business in this region heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in this region, which may adversely affect our business prospects, financial conditions and results of operations.

We cannot assure you that we will be able to reduce our dependence on operations in state of Gujarat, or that such dependence will not increase in the future. Our inability to expand into other areas may adversely affect our business prospects, financial conditions and results of operations. While our management believes that the Company has requisite expertise and vision to grow and mark its presence in other markets going forward, investors should consider our business and prospects in light of the risks, losses and challenges that we face and should not rely on our results of operations for any prior periods as an indication of our future performance.

9. *We are dependent on certain Government agriculture universities and other parties for the supply of raw materials. Any significant increase in the prices of these raw materials or decrease in the availability of the raw materials, could adversely affect our results of operations.*

We obtain various nucleus and breeders seeds from Government agricultural universities & third parties and deliver such seeds to farmers to produce foundation seeds. In the event that any of our suppliers of raw materials curtail, discontinue or delay their delivery of raw materials to us, we will be required to replace such suppliers. There can be no assurance that we will be able to replace such suppliers on commercially acceptable terms, or at all, which could adversely affect our production schedule, volumes and results of our operations. Further, if we are unable to pass such increased costs to our customers, this could have a material adverse effect on our financials, business and results of operations.

Further, the success of our operations depends on, inter-alia, our ability to source raw materials at competitive prices. For instance, the price and supply of raw material (breeder and nucleus seeds) depend on factors beyond our control, including crop season, competition, consumer demand, production levels and transportation costs. While we have long term relationships with many of them, but we have not entered into any supply contracts with such parties to ensure regular and timely supplies of raw materials. Such disruption in the supply chain would delay our production process and consequently, our results of operations. Historically, we have not encountered any problems in sourcing our raw materials. However, we cannot assure you about the same in future and that we may be unable to procure raw material in time or in the required quantities or may have to procure it at a higher price, which may adversely affect our results of operations and financial performance.

10. *Actual or alleged claims relating to defective or low-quality products could materially and adversely affect our business, financial condition, results of operations, reputation and prospects.*

Although our seeds undergo extensive quality checks, they may still contain defective or undesired characteristics that may be difficult to detect prior to their sale and use. Further, our seeds may be subject to contamination by external sources over which we may have little, if any, or no control. In particular, we have limited control of the handling and storage of our seed products once these products have been sold to our dealers and farmers. Any defects in our products, whether through our own fault or the fault of a third party, such as a dealers, could result in losses to farmers, which may include the value of lost crops and any claims for such losses could greatly exceed the value of the seeds that we sell, and could adversely affect our market reputation.

Further, the Seeds Act 1966, the Seeds Rules 1968 and the Seeds (Control) Order 1983 (the “**Central Seeds Statutes**”) prescribe stringent standards in relation to the quality and reliability of seeds, which are implemented and enforced by various central or state government authorities. Although we believe we take appropriate storage and handling precautions, our seeds are biological products which may deteriorate naturally over time as a result of natural biological processes. In the event the seeds sold by us or by our dealers are defective, contaminated or substandard for any reason, including due to human errors at any stage of seed processing or conditioning, a large number of farmers may experience crop failures and government or regulatory authorities, individual farmers and other representative groups may pursue claims or actions against us.

11. We have in the past entered into related party transactions and may continue to do so in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our Company’s financial condition and results of operations.

Our Company has entered into various transactions with our Directors, Group companies, Promoters and Promoter Group members/entities. These transactions, inter-alia includes, sales, purchase, remuneration and loans and advances etc.

We have entered into certain transactions with related parties and are likely to continue to do so in the future. For the Financial Years 2022, 2021 and 2020, our sale of products to related parties was Rs. 609.76 lakhs, Rs. 1118.52 lakhs and Rs. 285.92 lakhs respectively, constituting 8.08%, 17.89%, and 16.35% of our total revenue from operation, respectively.

Further, For the Financial Years 2022, 2021 and 2020, the aggregate total of purchases from related parties were Rs. 1837.46 lakhs, Rs. 504.40 lakhs, and Rs. 91.37 lakhs respectively, constituting 24.57%, 9.52%, and 5.24% of our total purchase respectively.

For details, please refer to Annexure X - Related Party Transactions” under Section titled “Financial Information of the Company” and Chapter titled “Capital Structure” beginning on page 146 and 129 respectively of this Draft Prospectus. Our Company has entered into such transactions due to easy proximity and quick execution. While we believe that all such transactions have been conducted on an arm’s length basis and in the ordinary course of business, there can be no assurance that we could not have achieved more favorable terms had such transactions not been entered into with related parties.

Furthermore, it is likely that we may enter into related party transactions in the future. Any future transactions with our related parties could potentially involve conflicts of interest. Accordingly, there can be no assurance that such transactions, individually or in the aggregate, will not have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.

12. Our Company operates under several statutory and regulatory permits, licenses and approvals. Our inability to obtain, renew or maintain the statutory and regulatory licenses, permits and approvals required to operate our business may have an adverse effect on our business & operations

We require various statutory and regulatory licenses, permits and approvals to operate our business. We need to make compliance and applications at appropriate stages of our business to continue our operations. There can be no assurance that the relevant authorities will issue these approvals or licenses, or renewals thereof in a timely manner, or at all. Further any default by our Company in complying with the same may result in the cancellation of such licenses, approvals or registrations which may adversely affect our operations and financial strength.

We have applied for our factory license vide application no 2339795 dated 09/06/2022 on Investor Facilitation Portal (IFP-Gujarat) in respect of our processing facility located at Kuvada, rajkot, which is pending for approval by concerned authorities. For further details on pending approvals, please refer to section titled “Government and Other Approvals” beginning on page 181 of the Draft Prospectus.

Further, certain licenses and registrations obtained by our Company contain certain terms and conditions, which are required to be complied by us. Any default by our Company in complying with the same, may result in inter alia the cancellation of such licenses, consents, authorizations and/or registrations, which may adversely affect our operations. There can be no assurance that the relevant authorities will issue or renew any of such permits or approvals in time or at all. Failure to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business.

13. Our Group Company and Promoter Group entity is engaged in the similar line of business as of our Company. There are no non-competes agreements between our Company and such entities. We cannot assure that our Promoter will not favour the interests of such entities over our interest or that the said entity will not expand which may increase our competition and may adversely affect business operations and financial condition of our Company.

Our Group Company, namely Bombay Super Hybrid Seeds Limited, listed on NSE, and our Promoter Group entity, M/s American Genetics (formerly known as M/s Veer Enterprises) are engaged inter-alia in the business of agriculture seeds, which is similar line of business as of our Company.

For the Financial Years 2022, 2021 and 2020, our sale of products to related parties was Rs. 609.76 lakhs, Rs. 1118.52 lakhs and Rs. 285.92 lakhs respectively, constituting 8.08%, 17.89%, and 16.35% of our total revenue from operation, respectively.

We have not entered into any non-competes agreement with the said entities. We cannot assure that our Promoters who have common interest in said entities will not favour the interest of the said entities. As a result, conflicts of interests may arise in allocating business opportunities amongst our Company and aforesaid entities in circumstances where our respective interests diverge. In cases of conflict, our Promoter may favour other entities in which our Promoter has interests. There can be no assurance that our Promoters or our Promoter Group entities will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition which may adversely affect our profitability and results of operations.

14. There are certain discrepancies/errors noticed in some of our corporate records relating to forms filed with the Registrar of Companies and other provisions of Companies Act, 2013. Any penalty or action taken by any regulatory authorities in future, for non-compliance with provisions of corporate or any other law could impact the financial position of the Company to that extent.

There are few discrepancies noticed in some of our corporate records relating to e-forms filed with the Registrar of Companies, which inter-alia includes clerical errors in the Annual Returns filed by our Company with the ROC in past years, for instance, list of share transfers was not attached in the Annual Return filed by our Company for F.Y. 2017-18 and 2019-20, the Cash Flow Statements were not attached in the AOC-4 forms filed in the past years and the shareholding details mentioned in PAS-6 form filed for the half year ended September 30, 2020 were inaccurate.

Our company has appointed Mrs. Sonalben Kakadiya, one of the promoter director as CFO on November 2021 however, we inadvertently failed to file form MR-1 for her office, as she became the whole-time director upon her appointment as full time KMP, however we have now appointed her as WTD effective from April 2022.

Further, the Company has accepted deposit from shareholders and relative of directors during F.Y. 2019-20 and F.Y. 2020-21 respectively, which was a violation of section 73 of the Companies Act, 2013, however, the same was repaid in the next year and no such loan exist as on date.

Further, our Company has not filed E Form CHG-1 for creation of charge for certain vehicle loan, which is a non-compliance of Section 77 of Companies Act, 2013, however such loan is now been repaid. Also, in the past, there has been an instance of share transfer, which was made in the physical form, instead of dematerialized form, however all the equity shares has now been dematerialized. In case of any action being taken by the regulatory authorities against the Company and/or its officers, the same may have an adverse effect on our business, financial conditions and result of operations.

Further, our company has made certain errors in complying with certain Accounting Standards in the past such as AS -18 (Related Party Disclosures) and AS-20 (Earnings per Share), however the same have been rectified by us in the restated financial statements. Although, no show cause notice in respect of the above has been received by the Company till date, any penalty imposed for such

non-compliance in future by any regulatory authority could affect our financial conditions to that extent.

15. Our Company has limited operating history in the business of seeds and therefore investors may not be able to assess our company's prospects based on past results.

Our Company was incorporated and commenced business operations in the year 2017 and thus we have limited operating history in the seeds business. However, our Promoter, Mr. Arvindkumar Jadavjibhai Kakadia has an experience of over 23 years in the seed processing business and holds the position of Managing Director of Bombay Super Hybrid Seeds Limited, which is listed on NSE. Since we have limited operating history in this business, there will be only limited information with which to evaluate the overall position of the Company and our current or future prospects, and therefore prospective investors may not be able to assess our Company's prospects based on past results. For details regarding to our business, please refer to Chapter titled "Our Business" on page 84 of this Draft Prospectus.

16. We are subject to competition from both organized and unorganized players in the market, which may significantly affect the fixation and realisation of the price for our product, which may adversely affect our business operation and financial condition.

The market for our products is competitive on account of existence of both the organized and unorganized players. Competition occurs generally on the key attributes such as quality of products, distribution network, pricing and timely delivery. Some of our competitors have longer industry experience and greater financial, technical and other resources, which may enable them to adopt faster in changing market scenario and remain competitive. Moreover, the unorganized sector can offers their products at highly competitive prices which may not be matched by us and consequently affect our volume of sales and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

We operate in a rapidly consolidating industry. The strength of combined companies could affect our competitive position in all of our business areas. Furthermore, if one of our competitors or their customers acquires any of our customers or suppliers, we may lose business from the customer or lose a supplier, which may adversely affect our business, results of operations and financial condition.

17. We do not own the trademark, which we are using for our business. Further, one of the trademarks applied by us for registration is under objection.

The trademark  which we are using for our business, has been applied for registration under the Trade Marks Act, 1999. The trademark application is currently objected and the same is not granted/approved as on date and we do not enjoy the statutory provisions that are accorded to a registered trademark. The use of our logo by third parties could adversely affect our reputation, which could in turn adversely affect our business and results of operations. There can be no assurance that our trademark application will be approved. Further the objection raised on our trademark applications may challenge our use of the logo. In the event that our logo is successfully challenged, we could be forced to rebrand our products, which could result in loss of brand recognition, and could require us to devote resources in advertising and marketing new brand.

We may not be able to detect any unauthorized use or infringement or take appropriate and timely steps to enforce or protect our intellectual property, nor can we provide any assurance that any unauthorized use or infringement will not cause damage to our business prospects. Notwithstanding the precautions we take to protect our intellectual property rights, it is possible that third parties may copy or otherwise infringe on our rights, which may have an adverse effect on our business, results of operations, cash flows and financial condition.

For further details on above and other trademarks, please refer to chapter titled "Our Business" beginning on page 84 of this Draft Prospectus.

The amount may be subject to additional interest/other charges being levied by the concerned authorities which are unascertainable as on date of this draft prospectus. For further details, please refer to the chapter titled "Outstanding Litigations and Material Developments" on page 176 of this Draft Prospectus.

There can be no assurance that these litigations will be decided in favour of our Company and our Group Company, respectively, and consequently it may divert the attention of our management and Promoter and waste our corporate resources and we may incur significant expenses in such proceedings and may have to make provisions in our financial statements, which could increase our expenses and liabilities. If such claims are determined against us, there could be a material adverse effect on our reputation, business, financial condition and results of operations, which could adversely affect the trading price of our Equity Shares.

19. Our continued operations are critical to our business and are subject to operating risks such as breakdown or failure of machinery, disruption to power sources or any temporary shutdown of our processing facility, in the event of which, our business, results of operations, financial condition and cash flows can be adversely affected.

Our processing facility are subject to operating risks, such as the breakdown or failure of machinery, power supply or processes, performance below expected levels of efficiency, obsolescence of equipment or machinery, labour disputes, natural disasters, industrial accidents and the need to comply with the directives of relevant government authorities. Our customers rely significantly on the timely delivery of our products and our ability to provide an uninterrupted and timely supply of our products is critical to our business. We also require substantial electricity for our processing facility which is sourced from state electricity boards. Our customer relationships, business and financial results may be materially adversely affected by any disruption of operations of our products, including as a result of any of the factors mentioned above.

20. We are heavily dependent on our Promoters and Key Managerial Personnel for the continued success of our business through their continuing services and strategic guidance and support.

Our success heavily depends upon the continued services of our Promoters and Key managerial personnel, particularly, Mr. Arvindkumar Jadavjibhai Kakadia, Mrs. Sonalben Arvindbhai Kakadiya and Mr. Viken Jentilal Kakadiya. We also depend significantly on our Key Managerial Persons for executing our day to day activities. The loss of any of our Promoter and Key Management Personnel, or failure to recruit suitable or comparable replacements, could have an adverse effect on us. The loss of service of the Promoters and other senior management could seriously impair the ability to continue to manage and expand the business efficiently. If we are unable to retain qualified employees at a reasonable cost, we may be unable to execute our growth strategy. For further details of our Directors and key managerial personnel, please refer to Section "Our Management" on page 110 of this Draft Prospectus.

21. Changes in technology may render our current technologies obsolete or require us to make substantial investments.

Modernization and technology up gradation is essential to reduce costs and increase the output. Our technology and machineries may become obsolete or may not be upgraded timely, hampering our operations and financial conditions and we may lose our competitive edge. Although we believe that we have installed updated technology, we shall continue to strive to keep our technology, plant and machinery in line with the latest technological standards. Further, the costs in upgrading our technology and modernizing the plant and machineries are significant which could substantially affect our finances and operations.

22. Our operations are subject to high working capital requirements. Our inability to maintain an optimal level of working capital required for our business may impact our operations adversely.

Our business requires significant amount of working capital and major portion of our working capital is utilized towards debtors and inventories. Our growing scale and expansion, if any, may result in increase in the quantum of current assets. Seed production requires various raw materials including foundation seeds as well as other key inputs such as pesticides, fertilisers, fuel, electricity and water. The costs of seed production, including the cost of materials consumed and production expense as adjusted for changes in inventories, constituted 91.27%, 96.42% and 94.95% of our total operating expenditure, after excluding finance costs, depreciation, amortisation and exceptional item and tax expenses, in Fiscal 2022, Fiscal 2021 and 2020 respectively.

Also, our inventories as at the end of the Fiscal period 2022, 2021 and 2020 stood at Rs. 2700.75 Lakhs, Rs. 384.61 Lakhs and Rs. 180.51 Lakhs which constituted 78.47%, 29.43% and 40.24% of the total current assets respectively.

Our inability to maintain sufficient cash flow, credit facility and other sourcing of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations.

23. We have experienced negative cash flows in the past.

We had negative net cash flow from operating activities of Rs. 1286.27 lakhs for the F.Y. 2021-22 due to increase in Current Assets. Any negative cash flows in the future could adversely affect our Company's results of operations and financial condition. For further details on our cash flows, see Annexure III - Restated Summary Statement of Cash Flow on page 129 of this Draft Prospectus.

24. We do not own the warehouses in which we store our raw materials (i.e., seeds). Any dispute in relation to use of the premises would have a material adverse effect on our business and results of operations.

The seeds produced by the farmers requires space for storage, for which we obtain warehouses on lease basis. We do not own the warehouses in which we store our finished goods (i.e., seeds). The seeds requires adequate infrastructure and storage facility for quality maintenance. In the event that the existing rent agreements with warehouse owners are terminated or they are not renewed on commercially acceptable terms, we may suffer a disruption in our operations. If alternative warehouses are not available at the same or similar costs, size or locations, then our business, financial condition and results of operations may be adversely affected.

Also, the warehouses are obtained by us on sharing basis and if the quality of warehouse maintenance is improper or not as per the requirement of our products, it may diminish the quality of inventory of seeds and may cause damages to our inventories, which may adversely affect our business, financial condition and results of operations.

25. The average cost of acquisition of Equity Shares by our Promoters could be lower than the Issue Price.

Our Promoters average cost of acquisition of Equity Shares in our Company is lower than the Issue Price. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer to the chapters "Capital Structure" beginning on page 51 of this Draft Prospectus.

26. *Dependence upon transportation services for supply and transportation of our products are subject to various uncertainties and risks, and delays in delivery may result in rejection of products by customer.*

We do not have an in-house transportation facility and we rely on third party transportation and other logistic facilities at every stage of our business activity including for procurement of products from our suppliers and for transportation of our finished products to our customers. For this purpose, we hire services of transportation companies. However, we have not entered into any definitive agreements with any third party transport service providers and engage them on a needs basis. Additionally, availability of transportation solutions in the markets we operate in is typically fragmented. The cost of our goods carried by such third party transporters is typically much higher than the consideration paid for transportation, due to which it may be difficult for us to recover compensation for damaged, delayed or lost goods.

27. *Our Company has during the preceding one year from the date of the Draft Prospectus have allotted Equity Shares at a price which is lower than the Issue Price*

In the last 12 months, we have made a right Issue of 30,30,000 Equity Shares of Face Value of Rs. 10/- to our promoters and promoter group, which is lower than the Issue Price. For further details, please refer to section titled “Capital Structure” on page 51 of this Draft Prospectus. The Issue Price is not indicative of the price that will prevail in the open market following listing of the Equity Shares.

28. *Delays or defaults in client payments could affect our operations.*

We may be subject to working capital risks due to delays or defaults in payment by clients, which may restrict our ability to procure raw materials and make payments when due. In addition, any delay or failure on our part to supply the required quantity or quality of products, within the time stipulated by our agreements, to our customers may in turn cause delay in payment or refusal of payment by the customer. Such defaults/delays by our customers in meeting their payment obligations to us may have a material effect on our business, financial condition and results of operations.

29. *Our insurance coverage may not be adequate to protect us against certain operating hazards and this may have a material adverse effect on our business.*

We have obtained insurance coverage in respect of certain risks. Our significant insurance policies consist of, among others Bharat Laghu Udyam Suraksha Policy for our cold storage property, Bulglary & House Breaking insurance and stock insurance in respect of certain of our premises. While we believe that we maintain insurance coverage in adequate amounts consistent with size of our business, our insurance policies do not cover all risks, specifically risks such as product defect/liability risk, loss of profits, crop insurance, machinery breakdown, Cash in transit, goods in transit, Directors & Officers Liability and losses due to terrorism. Our policy of covering these risks through insurance may not always be effective or adequate. Failure to effectively cover ourselves against the associated risks may potentially lead to material losses. There can be no assurance that our insurance policies will be adequate to cover the losses/damages suffered or that such insurance coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. If we suffer a significant uninsured loss or if insurance claim in respect of the subject matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected.

30. *The Indian income tax authorities may challenge our use of certain income tax exemptions. If these exemptions become unavailable to us, our tax liability could increase significantly and, in turn, our results of operations, financial condition and cash flows could be materially and adversely affected.*

Income derived from agricultural operations is exempt under Section 10(1) of the Indian Income Tax Act, 1961 (the “I.T. Act”). In accordance with Section 2(1A) of the I.T. Act, any income derived from land situated in India, through the performance of any process to render agricultural produce fit to be taken to the market, constitutes agricultural income. There are varying judicial views in India relating to the taxability of income derived from the production, marketing and sale of seeds. These views are yet to be settled by the Supreme Court of India. Our Company is of the view that it is entitled to the exemption available in relation to agricultural income under the provisions of the I.T. Act and that this exemption would be available to income generated from the production, marketing and sale of seed products.

31. *Failure to effectively manage labour/staff or failure to ensure availability of sufficient labour/staff could affect the business operations of the Company.*

Our business activities are dependent on availability of skilled and unskilled labour/staff. Non-availability of labour or staff at any time or any disputes with them may affect our production schedule and timely delivery of our products to customers which may adversely affect our business and result of operations. Though we have not faced any labour/staff problem in the past we cannot assure that we will not experience disruptions to our operations due to disputes or other problems with our work force, which may lead to strikes, lock-outs or increased wage demands. Such issues could have adverse affect on our business, and results of operations.

32. *The Promoters (including Promoter Group) and Directors hold 96.92% of the Equity Shares of Our Company and are therefore interested in the Company's performance in addition to their remuneration and reimbursement of expenses.*

Our Promoters and Directors are interested in our Company, in addition to regular remuneration or benefits and reimbursement of expenses, to the extent of their shareholding in our Company or their relatives, dividend entitlement, or loans advanced by them to the Company, and benefits deriving from the directorship in our Company. There can be no assurance that our Promoters will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. For further information, please refer to the chapters/section titled ***“Our Business”, “Our Promoter and Promoter Group”*** and ***“Annexure-X - Related Party Transactions”***, beginning on pages 84, 123 and 146 respectively of this Draft Prospectus.

33. *We have incurred indebtedness which exposes us to various risks which may have an adverse affect on our business and results of operations*

Our ability to borrow and the terms of our borrowings will depend on our financial condition, the stability of our cash flows, general market conditions, economic and political conditions in the markets where we operate and our capacity to service debt. As on March 31, 2022, our total outstanding indebtedness was ₹ 1498.98 lakhs.

Our significant indebtedness in future may result in substantial amount of debt service obligations which could lead to:

1. increasing our vulnerability to general adverse economic, industry and competitive conditions;
2. limiting our flexibility in planning for, or reacting to, changes in our business and the industry;
3. affecting our credit rating;
4. limiting our ability to borrow more money both now and in the future; and
5. increasing our interest expenditure and adversely affecting our profitability.

If the loans are recalled on a short notice, we may be required to arrange for funds to fulfil the necessary requirements. The occurrence of these events may have an adverse affect on our cash flow and financial conditions of the company. For further details regarding our indebtedness, see “Statement of Financial Indebtedness” on page 129 of this Draft Prospectus.

34. *Loans availed by Our Company has been secured on personal guarantees of our Director. Our business, financial condition, results of operations, cash flows and prospects may be adversely affected in case of invocation of any personal guarantees provided by our Directors.*

Our Promoters & Directors, Mr. Arvindkumar Jadavjibhai Kakadia, Mrs. Sonalben Arvindbhai Kakadiya and Mr. Viken Jentilal Kakadiya has provided personal guarantee to secure a significant portion of our existing borrowings taken from the banks and may continue to provide such guarantees and other security post listing. In case of a default under our loan agreements, any of the personal/corporate guarantees provided by the aforesaid may be invoked which could negatively impact their reputation and net worth. Also, we may face certain impediments in taking decisions in relation to our Company, which in turn would result in a material adverse affect on our financial condition, business, results of operations and prospects and would negatively impact our reputation. We may also not be successful in procuring alternate guarantees/ alternate security satisfactory to the lenders, as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial

condition and cash flows. For further details regarding loans availed by our Company, please refer “Statement of Financial Indebtedness” on page 161 of this Draft Prospectus.

35. We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be affective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

36. Our lenders have charge over our immovable and movable properties in respect of finance availed by us.

We have secured our lenders by creating a charge over our movable and immovable properties in respect of working loan availed by us from lenders. We have been extended such loan against hypothecation of our Company’s property and current assets. For further information on the financing and loan agreements along with the total amounts outstanding and the details of the repayment schedule, please refer to chapter “*Statement of Financial Indebtedness*” beginning on page 161 of this Draft Prospectus.

37. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule.

The proposed fund requirement for funding working capital requirements, as detailed in the section titled “*Objects of the Issue*” is to be funded from the proceeds of this Issue. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute our future plans/strategy within the given timeframe. For details, please refer to the Chapter titled “*Objects of the Issue*” beginning on page 65 of this Draft Prospectus.

38. Relevant copy of educational qualifications of our Promoter i.e Mr. Arvindkumar Jadavjibhai Kakadia are not traceable

Relevant copy of the educational qualifications of Mr. Arvindkumar Jadavjibhai Kakadia are not traceable. In accordance with the disclosure requirements brief biographies of the Promoter are disclosed in the section entitles “Our Promoters and Promoter Group” and “Our Management” on page 123 and 110 of this Draft Prospectus. However, we have relied on affidavits provided by Promoter i.e Mr. Arvindkumar Jadavjibhai Kakadia.

39. Our contingent liabilities as stated in our Restated Financial Statements could affect our financial condition.

Our Contingent liability as on March 31, 2022 was Rs. 4.27 Lakhs related to Income tax. If this contingent liability materializes, fully or partly, the financial condition of our Company could be affected. For further details, please refer to the chapter titled “Outstanding Litigations and Material Developments” on page 176 of this Draft Prospectus

40. We may not be able to sustain effective implementation of our business and growth strategy.

The success of our business will largely depend on our ability to effectively implement our business and growth strategy. In the past we have generally been successful in execution of our business but there can be no assurance that we will be able to execute our strategy on time and within the estimated budget in the future. If we are unable to implement our business and growth strategy, this may have an adverse affect on our business, financial condition and results of operations.

41. We are subject to the restrictive covenants of banks in respect of the Loans/ Credit Limits and other banking facilities availed from them.

Our financing arrangements contain restrictive covenants whereby we are required to obtain approval from our lender, regarding, among other things such as major changes in share capital, management, changes in fixed assets, creation of any other charge, undertake any guarantee obligation etc. There can be no assurance that such consents will be granted or that we will be able to

comply with the financial covenants under our financing arrangements. In the event we breach any financial or other covenants contained in any of our financing arrangements, we may be required under the terms of such financing arrangements to immediately repay our borrowings either in whole or in part, together with any related costs. This may adversely impact our results of operations and cash flows. For further details on the Cash Credit Limits and other banking facilities, please see “Statement of Financial Indebtedness” on page 161 of the Draft Prospectus.

42. Any Penalty or demand raised by statutory authorities in future will affect our financial position of the Company.

Our Company is engaged in business of agriculture seeds which attracts tax liability such as Goods and Service Tax, Income Tax as per the applicable provisions of Law. Currently we are not required to get registration under the labour laws like Provident Fund and ESI but in future we may be subjected to deposit of Provident Fund and ESI contribution of employees. However, we have deposited the required returns under various applicable Acts but any demand or penalty raised by the concerned authority in future for any previous year and current year will affect the financial position of the Company.

43. The Objects of the Issue for which funds are being raised, are based on our management estimates and have not been appraised by any bank or financial institution or any independent agency.

The deployment of funds will be entirely at our discretion, based on the parameters as mentioned in the chapter titled “Objects of the Issue”. The fund requirement and deployment, as mentioned in the “**Objects of the Issue**” on page 65 of this Draft Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter “Objects of the Issue” is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter “Objects of the Issue” will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

44. Our ability to pay any dividends will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our Dividend history refer to the Section “**Dividend Policy**” on page 128 of the Draft Prospectus.

45. There is no monitoring agency appointed by Our Company to monitor the utilization of the Issue proceeds.

Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

46. We may require further equity issuance, which will lead to dilution of equity and may affect the market price of our Equity Shares or additional funds through incurring debt to satisfy our capital needs, which we may not be able to procure and any future equity offerings by us.

Our growth is dependent on having a strong balance sheet to support our activities. In addition to the IPO Proceeds and our internally generated cash flow, we may need other sources of financing to meet our capital needs which may include entering into

new debt facilities with lending institutions or raising additional equity in the capital markets. We may need to raise additional capital from time to time, dependent on business conditions. The factors that would require us to raise additional capital could be business growth beyond what the current balance sheet can sustain; additional capital requirements imposed due to changes in regulatory regime or significant depletion in our existing capital base due to unusual operating losses. Any fresh issue of shares or convertible securities would dilute existing holders, and such issuance may not be done at terms and conditions, which are favourable to the then existing shareholders of our Company. If our Company decides to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. Such financings could cause our debt to equity ratio to increase or require us to create charges or liens on our assets in favour of lenders. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be affected if we are unable to implement our expansion strategy.

Any future issuance of Equity Shares by our Company may dilute shareholding of investors in our Company; and hence affect the trading price of our Company's Equity Shares and its ability to raise capital through an issue of its securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Company's Equity Shares. Additionally the disposal, pledge or encumbrance of Equity Shares by any of our Company's major shareholders, or the perception that such transactions may occur may affect the trading price of the Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

47. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.

The issue price of the equity shares have been based on many factor and may not be indicative of the market price of our Equity Shares after the Issue. For further information please refer the section titled "***Basis for Issue Price***" beginning on page 70 of the Draft Prospectus. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price.

48. Investors other than retail (including non-institutional investors and Corporate Bodies) are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Amount) at any stage after submitting an application.

Pursuant to the SEBI ICDR Regulations, Investors other than retail (including non-institutional investors and Corporate Bodies) are not permitted to withdraw or lower their application (in terms of quantity of Equity Shares or the Amount) at any stage after submitting an application. While our Company is required to complete Allotment pursuant to the issue within six Working Days from the issue Closing Date, events affecting the Applicants decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operation or financial condition, may arise between the date of submission of the Application and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the applicant's ability to sell the Equity Shares Allotted pursuant to the issue or cause the trading price of the Equity Shares to decline on listing.

49. Certain data mentioned in this Draft Prospectus has not been independently verified

We have not independently verified data from industry publications contained herein and although we believe these sources to be reliable, we cannot assure that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the limitation that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

EXTERNAL RISK FACTORS

50. The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Famine, War, Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, famine, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Our operations may be adversely affected by natural disasters and/or severe weather conditions, which can result in damage to our seeds inventory and hamper our productivity and may slow down our business operations temporarily or any other factor, which can adversely affect agriculture market in which we operate. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

In addition, India has witnessed local civil disturbances in recent years, in particular communal violence across ethnic or communal lines involving conflicts, riots and other forms of violence between communities of different religious faith or ethnic origins, and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Terrorist attacks and other acts of violence or war may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

51. The extent to which the Coronavirus disease (COVID-19) may affect our business and operations in the future is uncertain and cannot be predicted.

During the first half of calendar year 2020, COVID-19 spread to a majority of countries across the world, including India. The COVID-19 pandemic has had, and may continue to have, significant repercussions across local, national and global economies and financial markets. In particular, a number of governments and organizations have revised GDP growth forecasts for calendar year 2020 downward in response to the economic slowdown caused by the spread of COVID-19. The global impact of the COVID-19 pandemic has been rapidly evolving and public health officials and governmental authorities have responded by taking measures, such as prohibiting people from assembling in large numbers, instituting quarantines, restricting travel, issuing “stay-at-home” orders and restricting the types of businesses that may continue to operate, among many others. On March 14, 2020, India declared COVID-19 as a “notified disaster” and imposed a nationwide lockdown beginning on March 25, 2020. The lockdown lasted until May 31, 2020, and has been extended periodically by varying degrees by state governments and local administrations. The lifting of the lockdown across various regions has been regulated with limited and progressive relaxations being granted for movement of goods and people in other places and calibrated re-opening of businesses and offices. Despite the lifting of the lockdown, there is significant uncertainty regarding the duration and long-term impact of the COVID-19 pandemic, as well as possible future responses by the Government, which makes it impossible for us to predict with certainty the impact that COVID-19 will have on our business and operations in the future. We are closely monitoring the impact of COVID-19 on our financial condition, liquidity, operations, suppliers and workforce. Any intensification of the COVID-19 pandemic or any future outbreak of another highly infectious or contagious disease may adversely affect our business, results of operations and financial condition.

52. A slowdown in economic growth in India may adversely affect our business, financial condition, cash flows, results of operations and prospects.

The performance and growth of our business are necessarily dependent on economic conditions prevalent in India, which may be materially and adversely affected by centre or state political instability or regional conflicts, a general rise in interest rates, inflation, and economic slowdown elsewhere in the world or otherwise. There have been periods of slowdown in the economic growth of India. India’s economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports (oil and oil products), global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall which affects agricultural production. Any continued or future

slowdown in the Indian economy or a further increase in inflation could have a material adverse affect on the price of our raw materials and demand for our products and, as a result, on our business and financial results. The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse affects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and financial results.

53. Changing laws, rules and regulations and legal uncertainties in India, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. For further details please refer to the chapter "***Government and Other Approvals***" on page 181 for details of the laws currently applicable to us. There can be no assurance that the central or the state governments in India may not implement new regulations and policies which will require us to obtain approvals and licenses from the central or the state governments in India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the implementation of the new regulations may have a material adverse affect on all our business, financial condition and results of operations. In addition, we may have to incur capital expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. For instance, the Government has proposed a comprehensive national goods and services tax ("***GST***") regime that will combine taxes and levies by the Central and state Governments into a unified rate structure. Given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to the tax regime following implementation of the GST. The implementation of this new structure may be affected by any disagreement between certain state Governments, which could create uncertainty. Any such future amendments may affect our overall tax efficiency, and may result in significant additional taxes becoming payable.

54. Our performance is linked to the stability of policies and the political situation in India.

The Government of India has traditionally exercised, and continues to exercise, a significant influence over many aspects of the economy. Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Any political instability in India may adversely affect the Indian securities markets in general, which could also adversely affect the trading price of our Equity Shares. Any political instability could delay the reform of the Indian economy and could have a material adverse affect on the market for our Equity Shares. There can be no assurance to the investors that these liberalization policies will continue under the newly elected government. Protests against privatization could slow down the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting companies in the industrial equipment manufacturing sectors, foreign investment, currency exchange rates and other matters affecting investment in our securities could change as well. A significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India and thereby affect our business

55. Instability in financial markets could materially and adversely affect our results of operations and financial condition.

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse affects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion affect of the global financial turmoil, evident from the sharp decline in SENSEX or NIFTY, BSE's and NSE benchmark index respectively. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse affect on our business,

operations, financial condition, profitability and price of our Equity Shares.

56. Government regulation of foreign ownership of Indian securities may have an adverse affect on the price of the Equity Shares.

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in affect in India, transfer of shares between non residents and residents are freely permitted(subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

57. If certain labour laws become applicable to us, our profitability may be adversely affected.

India has stringent labour legislations that protect the interests of workers, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Any change or modification in the existing labour laws may affect our flexibility in formulating labour related policies.

ANNEXURE TO THE STATEMENT OF SPECIAL TAX BENEFITS

The information provided below sets out the special tax benefits available to the Company and the Equity Shareholders under the Income Tax Act, 1961 presently in force in India. It is not exhaustive or comprehensive and is not intended to be a substitute for professional advice. Investors are advised to consult their own tax consultant with respect to the tax implications of an investment in Equity Shares particularly in view of the fact that certain recently enacted legislation may not have a direct legal precedent or may have a different interpretation on the benefits, which an investor can avail.

A. SPECIAL DIRECT AND INDIRECT TAX BENEFITS TO THE COMPANY:

Under the Income Tax Act, 1961 (“the Act”)

Special tax benefits available to the Company

- The Company is entitled to claim exemption for agricultural income under section 10(1) of the Act subject to the fulfillment of the conditions mentioned therein.

B. SPECIAL DIRECT AND INDIRECT TAX BENEFITS TO THE SHAREHOLDERS:

The Shareholders of the Company are not entitled to any special tax benefits under the Income Tax Act, 1961 and GST Act.

NOTES:

1. The above Annexure of special tax benefits sets out the provisions of Tax Laws in a summary manner only and is not a complete analysis or listing of all potential tax consequences of the purchase, ownership and disposal of shares.
2. The above Annexure covers only the special tax benefits under the Act, read with the relevant rules, circulars and notifications and does not cover any benefit under any other law in force in India. This Annexure also does not discuss any tax consequences, in the country outside India, of an investment in the shares of an Indian company.
3. The above Annexure of special tax benefits is as per the current direct tax laws relevant for the assessment year 2023-24. Several of these benefits are dependent on the Company or its shareholders fulfilling the conditions prescribed under the relevant provisions of the Tax Laws.
4. In respect of non-residents, the tax rates and consequent taxation mentioned above will be further subject to any benefits available under the relevant Double Taxation Avoidance Agreement, if any, entered into between India and the country in which the non-resident has fiscal domicile.
5. The option under section 115BAA of the Act once exercised cannot be subsequently withdrawn for any future financial year. The Amendment Act, 2019 further provides that domestic companies availing such option will not be required to pay Minimum Alternate Tax (“MAT”) under Section 115JB. The CBDT has further issued Circular 29/2019 dated October 02, 2019 clarifying that since the MAT provisions under Section 115JB itself would not apply where a domestic company exercises option of lower tax rate under Section 115BAA, MAT credit would not be available.

In such a case, the Company is not allowed to claim any of the following deductions/ exemptions under the Act: -

- ✓ Deduction under the provisions of Section 10AA.
- ✓ Deduction under clause (iia) of sub-section (1) of Section 32 (additional depreciation).
- ✓ Deduction under section 32AD or Section 33AB or Section 33ABA
- ✓ Deduction under section 35AD or Section 35CCC
- ✓ Deduction under section 80G

Lower corporate tax rate under Section 115BAA of the Act and Minimum Alternate Tax (“MAT”) credit under section 115JAA of the Act which are in general available and hence may not be treated as special tax benefits.

The Company has evaluated and decided to exercise the option permitted under Section 115BAA of the Act for the purpose of computing its income-tax liability with effect from Financial Year 2019-20 and accordingly, the same available for Financial Year 2021-22, are captured to the extent the same are relevant to a Company exercising such option.

6. This Annexure is intended only to provide general information to the investors and is neither designed nor intended to be a substitute for professional tax advice. In view of the individual nature of tax consequences, each investor is advised to consult his or her tax advisor with respect to specific tax consequences of his/her investment in the shares of the Company.

Global Economy

Global economic recovery from the COVID-19 pandemic hinges on a delicate balance amid new waves of infection, labour market challenges, lingering supply-side constraints and rising inflationary pressures weighing heavily on near-term growth prospects. The global economy grew by 5.5 per cent in 2021 – the highest growth rate since 1976 – after contracting by 3.4 per cent in 2020. World gross product in 2021 was 1.9 per cent higher than in 2019 but still 3.3 per cent below the level projected before COVID-19. The recovery of output in 2021 largely represented the resumption of household spending and investment, which had come to a screeching halt in 2020 amid lockdown measures worldwide. The world economy is projected to grow by 4 per cent in 2022 and 3.5 per cent in 2023, converging towards its long-term trend of around 3 per cent per year between 2010 and 2019. But these aggregate figures mask strong divergence in growth prospects as a significant number of developing countries are struggling to recover from the pandemic.

Notes: (a) estimated, (b) forecast, (c) excludes Libya, (d) growth rates are on a calendar year basis (for fiscal year growth figures, please refer to the statistical annex), (e) includes goods and services, and (f) based on a 2015 benchmark.

The projected growth rates for 2022 mark a small upward revision from the forecasts in the World Economic Situation and Prospects 2021, even as significant downside risks emerged during the fourth quarter of 2021 (table I.1). The growth momentum of the first three quarters of 2021 – especially in the United States, the European Union and China – slowed as the stimulating effects of fiscal and monetary measures began to dissipate and supply-side challenges emerged at the end of the year. The easing of supply-side constraints and the taming of inflationary pressures will remain critical to keep the global economy on the projected near-term growth trajectory. Growth prospects, however, face significant risks and uncertainties, including new mutations of COVID-19, such as the Omicron variant that began spreading in late November 2021. Growth forecasts presented in this report remain susceptible to potential lockdowns and other restrictive measures worldwide. In addition, as major central banks start to withdraw their extraordinary policy support, global financial conditions may tighten considerably, weighing on global recovery.

According to current forecasts, the gross domestic product (GDP) of 16 hard-hit developing countries – including many small island developing States – will be more than 5 per cent smaller in 2022 than in 2019.¹ Well over a fifth of developing countries, 28 in total, will have to wait until 2022 to see GDP return to pre-crisis levels. Twenty or nearly a fifth of developing countries will still be below their 2019 output levels by the end of 2023. On the other hand, by 2023, more than half of the world’s economies will exceed their 2019 output levels by at least 7 per cent. In East and South Asia, average GDP in 2023 is projected to be 18.4 per cent above its 2019 level, compared to only 3.4 per cent in Latin America and the Caribbean (figure I.1). But this does not mean that countries will regain lost output. In fact, despite the robust recovery, East and South Asia’s GDP in 2023 is projected to be 1.7 per cent below the level forecast prior to the pandemic. Africa and Latin America and the Caribbean are expected to see losses of 5.5 and 4.2 per cent, respectively, compared to pre-pandemic projections.

Figure I.1
Change from 2019 average gross domestic product

Inequality between countries is widening

A full economic recovery measured in terms of GDP per capita will remain elusive for developing countries in the near term. In 2022, the per capita output of developing countries and economies in transition is projected to be more than 2 per cent below the level expected prior to the pandemic. The GDP per capita gap between what they will achieve and what they could have achieved without the pandemic will persist well into 2023 (figure I.2). On the other hand, the GDP per capita of the developed economies is projected to almost fully recover by 2023 relative to pre-pandemic projections. The uneven pace of recovery between developed

and developing countries will widen income inequality across countries and make it all but impossible to reduce global inequality by 2030, as targeted in the global Sustainable Development Goals.

Indian economy Overview:

The last two years have been difficult for the world economy on account of the COVID-19 pandemic. Repeated waves of infection, supply-chain disruptions and, more recently, inflation have created particularly challenging times for policy-making. Faced with these challenges, the Government of India’s immediate response was a bouquet of safety-nets to cushion the impact on vulnerable sections of society and the business sector. It next pushed through a significant increase in capital expenditure on infrastructure to build back medium-term demand as well as aggressively implemented supply-side measures to prepare the economy for a sustained long-term expansion.

Advance estimates suggest that the Indian economy is expected to witness real GDP expansion of 9.2 per cent in 2021-22 after contracting in 2020-21. This implies that overall economic activity has recovered past the pre-pandemic levels. Almost all indicators show that the economic impact of the “second wave” in Q1 was much smaller than that experienced during the full lockdown phase in 2020-21 even though the health impact was more severe.

Agriculture and allied sectors have been the least impacted by the pandemic and the sector is expected to grow by 3.9 per cent in 2021-22 after growing 3.6 per cent in the previous year. Advance estimates suggest that the GVA of Industry (including mining and construction) will rise by 11.8 per cent in 2021-22 after contracting by 7 per cent in 2020- 21. The Services sector has been the hardest hit by the pandemic, especially segments that involve human contact. This sector is estimated to grow by 8.2 per cent this financial year following last year’s 8.4 per cent contraction.

Total Consumption is estimated to have grown by 7.0 per cent in 2021-22 with significant contributions from government spending. Similarly, Gross Fixed Capital Formation exceeded pre-pandemic levels on the back of ramped up public expenditure on infrastructure. Exports of both goods and services have been exceptionally strong so far in 2021-22, but imports also recovered strongly with recovery in domestic demand as well as higher international commodity prices.

With the vaccination programme having covered the bulk of the population, economic momentum building back and the likely long-term benefits of supply-side reforms in the pipeline, the Indian economy is in a good position to witness GDP growth of 8.0-8.5 per cent in 2022-23.

Nonetheless, the global environment still remains uncertain. At the time of writing, a new wave in the form of the Omicron variant was sweeping across the world, inflation had jumped up in most countries, and the cycle of liquidity withdrawal was being initiated

by major central banks. This is why it is especially important to look at India's macroeconomic stability indicators and their ability to provide a buffer against the above stresses.

Despite all the disruptions caused by the global pandemic, India's balance of payments remained in surplus throughout the last two years. This allowed the Reserve Bank of India to keep accumulating foreign exchange reserves (they stood at US\$ 634 billion on 31st December 2021). This is equivalent to 13.2 months of merchandise imports and is higher than the country's external debt. The combination of high foreign exchange reserves, sustained foreign direct investment, and rising export earnings will provide an adequate buffer against possible global liquidity tapering in 2022-23.

The fiscal support given to the economy as well as to the health response caused the fiscal deficit and government debt to rise in 2020-21. However, a strong rebound in government revenues in 2021-22 has meant that the Government will comfortably meet its targets for the year while maintaining the support, and ramping up capital expenditure. The strong revival in revenues (revenue receipts were up over 67 per cent YoY in April-November 2021) means that the Government has fiscal space to provide additional support if necessary.

The financial system is always a possible area of stress during turbulent times. However, India's capital markets, like many global markets, have done exceptionally well and have allowed record mobilization of risk capital for Indian companies. More significantly, the banking system is well capitalized and the overhang of Non-Performing Assets seem to have structurally declined even allowing for some lagged impact of the pandemic.

Vaccination is not merely a health response but is critical for opening up the economy, particularly contact-intensive services. Therefore, it should be treated for now as a macro-economic indicator. Over the course of a year, India delivered 157 crore doses that covered 91 crore people with at least one dose and 66 crore with both doses. The vaccination process for boosters and for the 15-18 year age group was also gathering pace at the time of writing.

Inflation has reappeared as a global issue in both advanced and emerging economies. India's Consumer Price Index inflation stood at 5.6 per cent YoY in December 2021 which is within the targeted tolerance band. Wholesale price inflation, however, has been running in double-digits. Although this is partly due to base effects that will even out, India does need to be wary of imported inflation, especially from elevated global energy prices.

Overall, macro-economic stability indicators suggest that the Indian economy is well placed to take on the challenges of 2022-23. One of the reasons that the Indian economy is in a good position is its unique response strategy. Rather than pre-commit to a rigid response, Government of India opted to use safety-nets for vulnerable sections on one hand while responding iteratively based on Bayesian-updating of information.

Another distinguishing feature of India's response has been an emphasis on supply-side reforms rather than a total reliance on demand management. These supply-side reforms include deregulation of numerous sectors, simplification of processes, removal of legacy issues like 'retrospective tax', privatisation, production-linked incentives and so on. Even the sharp increase in capital spending by the Government can be seen both as demand and supply enhancing response as it creates infrastructure capacity for future growth.

The Indian economy, as seen in quarterly estimates of GDP, has been staging a sustained recovery since the second half of 2020-21. Although the second wave of the pandemic in April-June 2021 was more severe from a health perspective, the economic impact was muted compared to the national lockdown of the previous year (see Figure 1). Advance estimates suggest that GDP will record an expansion of 9.2 per cent in 2021-22. This implies that the level of real economic output will surpass the pre-COVID level of 2019-20.

Figure 1: Gross Domestic Output (Constant Prices, Base Year:2011-12)

Growth Outlook:

The Indian economy is estimated to grow by 9.2 per cent in real terms in 2021-22 (as per the First Advance Estimates), after a contraction of 7.3 per cent in 2020-21. Growth in 2022-23 will be supported by widespread vaccine coverage, gains from supply-side reforms and easing of regulations, robust export growth, and availability of fiscal space to ramp up capital spending. The year ahead is also well poised for a pick-up in private sector investment with the financial system in a good position to provide support to the revival of the economy. Thus, India’s GDP is projected to grow in real terms by 8.0-8.5 per cent in 2022-23. This projection is based on the assumption that there will be no further debilitating pandemic related economic disruption, monsoon will be normal, withdrawal of global liquidity by major central banks will be broadly orderly, oil prices will be in the range of US\$70-\$75/bbl, and global supply chain disruptions will steadily ease over the course of the year.

The above projection is comparable with the World Bank’s and Asian Development Bank’s latest forecasts of real GDP growth of 8.7 per cent and 7.5 per cent respectively for 2022-23. As per the IMF’s latest World Economic Outlook (WEO) growth projections released on 25th January, 2022, India’s real GDP is projected to grow at 9 per cent in both 2021-22 and 2022-23 and at 7.1 per cent in 2023-24. This projects India as the fastest growing major economy in the world in all these three years (Table 1).

Seed Industry

Global Seed Market

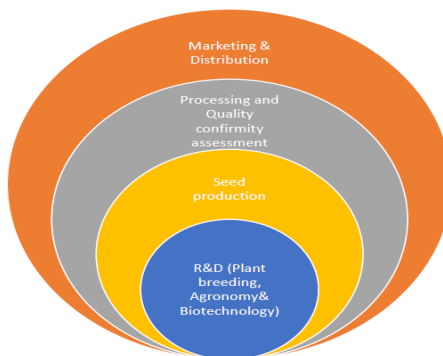

The global seeds market is expected to register USD 90.37 billion in 2024 witnessing a CAGR of 7.9% during the forecast period 2019-2024. The growing demand for grains, oils, and vegetables is a significant driver for the seeds market. Grains represent the biggest portion of daily calorie intake in developing countries of the Middle East & Africa, Asia/Oceania, and CIS, and therefore, the demand for grains will be one of the most critical stimulants for the seed market.

The shift in farming practices worldwide has necessitated adoption of commercially produced enhanced seed varieties by the farmers as opposed to using seeds from the last harvest. High yield, improved nutritional quality, reduced crop damage, disease resistance, etc. motivated farmers in investing in commercial seeds. The massive increase in the demand for biofuel, buoyed by the large subsidies provided in many western countries, has increased production of global biofuels. As per a FAO report, the biofuel boom had a major impact on the evolution of world food demand for cereals and vegetable oils. Moreover, it states that without biofuel, the growth rate of world cereal consumption is equal to 1.3%, as compared to 1.8% of biofuel and thus is an important factor behind expansion of global seed market.

Besides these, acceptance of area under genetically modified crops, increasing demand for animal feed, rapid adoption of biotech crops and decreasing per capita farmland are contributing to the growth of seed market. On the other hand factors like rising concerns over GM seeds, years involved in development of new traits and long GM approval timelines and government regulation have been holding the sector back. The North American seeds market serving the farmers mainly in grains, cereals, fruits, vegetables, and oil and forage crops. The market is expected to reach USD 30.9 billion by 2024 and is estimated to register a CAGR of 6.46%, during the forecast period. North America is the largest commercial seeds market, accounting for more than 35% of the market share.

Indian Seed Industry

Indian Seed industry is a sub-sector within Agri-input sector of Agriculture and allied industry. Seed is the primary input in Agriculture, which encapsulates the genetics of Plant variety. At the core of Indian Seed Industry is Plant variety development through conventional plant breeding in the process of genetic improvement of crops. Plant variety therefore is the key product of seed industry, with each new variety showing incremental advantage over pre-existing varieties. The seeds of such identified best varieties are evaluated for their suitability for specific agro-climatic conditions before commercialization and then multiplied through standard seed production process, tested for genetic purity and seed quality standards, processed and then marketed to farmers across various distribution channels. The seed industry is structured based on different functions of the overall production process.

Another important dimension of seed industry is seeds being self-replicating entities based on their nature of reproduction which is a natural life process. In most of the self-pollinated crops like foodgrains, pulses, oilseeds and certain vegetable crops, forage crops, fruit crops, sugarcane, potatoes, etc., seeds can be directly produced by farmers from the agricultural output produced by them. Such seed is called Farm Saved Seed (FSS), which is widely prevalent in many of the crops mentioned above. However, there is an increased trend of farmers replacing the FSS with newly purchased seed once in every 2-3 years.

The increasing trend of Seed Replacement Rate (SRR) by farmers in various crops expands the size of commercial seed industry. Over the period of time the SRR of various crops has been increasing from 10% to more than 50% in many of the crops where Open Pollinated Varieties (OPV) seeds are used. This leads to a large section of farmers using FSS and being out of purview of the commercial seed industry. It should be noted that in case of crops where hybrid seeds are used, the SRR is 100% as the farmers cannot re-use the seed for the next generation as re-use of hybrid seed leads to dilution of genetic purity due to genetic segregation of characters in the next generations.

Globally the growth of seed industry and especially private seed sector happened over the harnessing of the concept of Hybrid vigour or Heterosis, where the hybrid seeds express significant improvement in economic attributes over the parent varieties. Hybrid seed initially launched in crops like Maize, Millets, Cotton, Vegetable crops, etc, have also been developed in Rice, Mustard, etc. However, in many of the self-pollinated crops, like Wheat, Pulses, groundnut, etc., the concept of heterosis is yet to be harnessed and as there is no significant advantage of hybrid seed over varietal seeds. Therefore, still OPV seeds are utilized in crops like Wheat, Rice, Redgram, Greengram, Blackgram, Soybean, Groundnut, etc.

The Indian seeds is expected to grow at a CAGR of 13.6% during 2019-2024, reaching a value of US\$ 9.1 Billion by 2024. Coupled with increasing domestic demand and demand for quality seeds in various foreign countries, mainly the South East Asian countries, seed industry in India is witnessing new paradigms of growth and development. The use of hybrid seeds has silently but consistently witnessed growth along with several other driving factors like increasing middle class and increasing disposable income, growth in the food processing sector, increasing seed replacement ratio and other allied factors. Rising awareness among the farmers related to the benefits of using certified/ quality seeds has led to an increase in the demand for seeds over the past few years. This has resulted in an increasing willingness among the farmers to pay higher price for quality seeds. When compared to the global seed production India’s share is very less. India is way behind countries like USA and China in terms of total seed market size.

Region & Crop-wise Seed producing regions of India:

India has diverse agro-climatic zones, which describe suitability of agriculture crops in a land or a region in terms of a combination of major climatic patterns, temperature, water availability and soil types. India has 15 major agro-climatic zones and 127 agro-climatic regions and 20 agro-ecological zones based on soils classifications. The cropping patterns in different States of India is also dependent on the agro-climatic suitability of particular crops in India. The total land area in India is 328 mha out of which 156 mha is arable land.

In terms of global trade, India is almost self-sufficient in flower, fruits and vegetables and field crops seeds. The Indian seed market is majorly dominated by non-vegetable seeds such as corn, cotton, paddy, wheat, sorghum, sunflower and millets. Grain seeds represent the largest seed type, accounting for more than half of the total seed production. Uttar Pradesh represents the largest producer, accounting for around 12% of the total market share of grain seed production.

The Indian seed market has witnessed a major restructuring as a result of the implementation of some progressive policies by the government. Seed Development, 1988 and National Seed Policy, 2002 have helped in strengthening the Indian seed industry in the areas of R&D, product development, supply chain management and quality assurance. Owing to this, India has emerged as the fifth largest seed market across the globe. Moreover, the active participation of both, public and private sectors has also played a vital role in laying a strong foundation of the industry.

With enormous geographical and agro-climatic diversity, there is an excellent opportunity for India for exporting seeds to both sub-tropical and tropical regions of the world. Further India has skilled manpower for catering needs of R&D in plant breeding, Biotechnology, seed production and seed technologies which create an enabling environment for India to become a global seed hub for breeding varieties for varied global markets and to undertake custom seed production. With similar agro-climatic conditions and edaphic conditions, Indian Plant varieties have an excellent fit in South Asian, South East Asian and African countries.

Government of India has released operational guidelines for promotion of Farmer Producer Organizations (FPOs) in 2020 in which seed production has been considered among the higher revenue generating activities for FPOs. The scheme envisages the following objectives.

- 1) To provide holistic and broad based supportive ecosystem to form new 10,000 FPOs to facilitate development of vibrant and sustainable income oriented farming and for overall socio-economic development and wellbeing of agrarian communities.
- 2) To enhance productivity through efficient, cost-effective and sustainable resource use and realize higher returns through better liquidity and market linkages for their produce and become sustainable through collective action.
- 3) To provide handholding and support to new FPOs up to 5 years from the year of creation in all aspects of management of FPO, inputs, production, processing and value addition, market linkages, credit linkages and use of technology etc.
- 4) To provide effective capacity building to FPOs to develop agriculture entrepreneurship skills to become economically viable and self-sustaining beyond the period of support from government.

The scope for FPOs as Seed production partners of seed companies is very promising. Both public and private sector can engage FPOs in foundation seed production, seed production of both hybrids and OPVs and developing nurseries for planting material. The FPO partnership shall also enable building decentralized supply chains in seed industry.

In the coming future, more and more seed companies shall engage in seed production with FPOs given the advantages of collectivization for ensuring a reliable supply of quality seeds. The seed industry is among the few in agriculture sector which has already standardized Contract farming type of arrangements with respect to seed production and partnership with FPOs with right skill development and capacity building will become a natural progression in Indian seed sector. NSAI, as the apex industrial association of Indian seed industry shall promote FPOs and also work with them as partners in the vision to achieve Atma Nirbhar Bharat

Overview

We are a technology driven seeds manufacturing Company engaged in business of growing, developing, processing and marketing of variety of seeds for a range of field crops and vegetables. We are primarily involved in seed processing wherein the improved genetic materials of the breeder seed is grown and multiplied into foundation seed. Thereafter, the foundation seed undergoes next level of processing in which the foundation seed is grown and multiplied into commercial seeds, which is then sold in market for crop production. We have different variants of seeds being sold for each crop depending upon suitability of our seeds for varying agro-climatic conditions, such as water availability, crop duration and soil attributes, across different geographic regions in India.

Breeder seeds are genetically pure seed with physical purity produced from basic nucleus seed stock and procured from original breeder. Some of the state Government agricultural universities from which we procure breeder seeds include Mahatma Phule Krishi Vidapeeth, Rajasthan Agricultural Research Institute, Indian Agricultural Research Institute etc.

Our company enters into seed grower production agreement with seed growing farmers for leasing thier land on lease rentals to develop and produce the foundation and commercial seeds. Under these agreements, the farmer is engaged to carry out agricultural operations over the leased agricultural land, however the ownership of the entire crop and the risk of crop failure is retained with our company. The farmers are compensated for their services of producing such seeds and for all production expenses such as land preparation, irrigation, sowing, fertilization, combat against pests and diseases, weeding, harvesting, thrashing etc. During large-scale production, we monitor the crops under given field conditions and have the farmers carry out all the required steps until maturity to produce the seeds to be sold at the desired levels of quality. We choose the location for production of the seeds to be sold based on the agro-climatic conditions required for different crops, availability of skilled labour and other related infrastructure etc. Such grown commercial seeds are then processed at our processing unit, which is equipped with modern technology and is spread across an area of more than 45,000 sq. feet, situated at Kuvadva, Rajkot.

OUR MANUFACTURING PROCESS

The key phases of the process before the final product is ready to be sold in the market include procurement of nucleus seed and breeder seeds from Universities, supply of nucleus & breeder seeds to contractual farmers for production of foundation seeds, supply of foundation seeds to contractual farmers for multiplication or large-scale field production of seeds, processing, conditioning, quality control, packing and storage. Set out below is a graphical representation of our business process from the procurement of breeder seeds to marketing our products.

➤ **Procurement of Raw Material**

We obtain various nucleus seeds and breeders seeds from various agricultural universities and deliver to farmers to produce foundation seeds.

➤ **Seed Production**

Breeding is the process of bringing together two specific parent plants to produce a new offspring plant which will have the desired traits and characteristics. In seed production programme, such breeder seeds undergo manufacturing process to grow foundation seeds at the agricultural lands of farmers which are taken by us on lease rental basis under contract basis. These foundation seeds are produced under strict supervision of our team. The seeds produced are then processed at our plant located at Kuvadava, Rajkot. Our Company has an adequate storage with convenient loading and unloading system which enables us to store the seeds without deterioration of its quality.

➤ **Seed Processing and Conditioning**

Post production, the seeds are brought to our processing facilities. The seeds undergo various stages of processing including drying, cleaning, de-weeding, screening etc. The moisture content in seeds is reduced to the optimum level in order to increase its storage life. We use certain technologies like chemical treatment and seed coating with insecticides and fungicides to ensure faster germination, qualitative and quantitative yield and disease resistant crop.

➤ **Quality control in Seed Conditioning**

We seek to ensure that our seeds meet the required quality parameters such as germination, genetic purity, physical purity and vigour, produce the expected yields and maximise profitability for farmers, who are the endconsumers of our products. We adhere to our pre-determined quality assurance standards during production and at our processing facilities that we believe are in compliance with the statutorily prescribed standards. During production, quality assurance teams inspect the seed crops independently at the key stages of the hybridisation process, in addition to regular inspections by our production team. After the seed lots reach our processing facilities, we draw out samples and send to our seed testing laboratories (“STLs”) and grow-out test (“GOT”) centres in order to conduct GOTs and other tests for quality.

➤ **Storage**

Our Company has adequate storage capacity with very easy loading and unloading system. This facility enables us to store seeds without any deterioration of quality. Our conditioned storage facilities ensure that our seeds are stored for long periods without loss of viability or vigour.

➤ **Packaging:**

Our company has adopted 2-layer packaging, which is moisture resistant, air tight and temper proof. Packaging of product is done at processing unit of our company. We have standardised packaging design across our various products and implemented barcodes on the packages for improved product traceability. As a result, our products utilise a uniform design including colour and logo, which enhances the prominence of our Company’s brand on the package.

➤ **Transportation & Distribution:**

Our company has wide customer base spread all over India, once finished product is prepared it is dispatched for selling to customers. To reach our customer we have adopted facility of third party transportation by way of road transport.

Food Safety & Standards Act, 2006 [“Food Act”]

Food Safety and Standards Act, 2006 is an integrated law that seeks to consolidate the laws relating to food and establish the Food Safety and Standards Authority of India (FSSAI).

It lay down science-based standards for articles of food and regulates their manufacture, storage distribution, sale and import, to ensure availability of safe and wholesome food for human consumption and for matters connected therewith or incidental thereto.

The Food Act seeks to harmonise Indian standards with international standards like CODEX and facilitates international trade in food articles. Under Section 31 of the Food Act, no person may carry on any food business except under a license granted by the FSSAI. The Food Act sets forth the requirements for licensing and registering food businesses in addition to laying down the general principles for safety, responsibilities and liabilities of food business operators.

The Enforcement of the Food Act is generally facilitated by ‘state commissioners of food safety’ and other officials at local level.

Under section 51 of the Food Act, any person who manufactures sub-standard food for human consumption is liable to pay a penalty which may extend up to Rs. 5.00 lakh. The Food Act has defined sub-standard food as an article of food which doesn't meet the specified standards but not so as to render the article of food unsafe.

The provisions of the Food Act require every distributor to be able to identify any food article by its manufacturer, and every seller by its distributor that should be registered under the Food Act and every entity in the sector is bound to initiate recall procedures if it finds that the food marketed by the entity has violated specified standards. Food business operators are required to ensure that persons in their employment do not suffer from infectious or contagious diseases. The Food Act also imposes liabilities upon manufacturers, packers, wholesalers, distributors and sellers requiring them to ensure that inter alia unsafe and misbranded products are not sold or supplied in the market.

In order to address certain specific aspects of the Food Act, the FSSAI has framed several regulations such as the following:

- a) Food Safety and Standards (Contaminants, Toxins and Residues) Regulations, 2011;
- b) Food Safety and Standards (Food Products Standards and Food Additives) Regulations, 2011;
- c) Food Safety and Standards (Licensing and Registration of Food Businesses) Regulation, 2011;
- d) Food Safety and Standards (Packaging and Labelling) Regulations, 2011; and
- e) Food Safety and Standards (Prohibition and Restrictions on Sales) Regulations, 2011.
- f) Food Safety and Standards (Laboratory and sampling analysis) Regulations, 2011.

In addition to the six principal regulations as stated above, notified on 1st August 2011, following new regulations are notified. These include:

- a) Food Safety and Standards (Food or Health Supplements, Nutraceuticals, Foods for Special Dietary Uses, Foods for Special Medical Purpose, Functional Foods and Novel Food) Regulations, 2016
- b) Food Safety and Standards (Food Recall Procedure) Regulation, 2017
- c) Food Safety and Standards (Import) Regulation, 2017
- d) Food Safety and Standards (Approval for Non-Specified Food and Food Ingredients) Regulations, 2017.
- e) Food Safety and Standards (Organic Food) Regulation, 2017.

The Central Government has also framed the Food Safety and Standards Rules, 2011 (the “FSSR”) which have been operative since August 5, 2011. The FSSR provides the procedure for registration and licensing process for food business and lays down detailed standards for various food products. The FSSR also sets out the enforcement structure of ‘commissioner of food safety’, ‘the food safety officer’ and ‘the food analyst’ and procedures of taking extracts, seizure, sampling and analysis.

Essential Commodities Act, 1955

The Essential Commodities Act, 1955 vests Government of India with the authority to issue notifications for controlling the production, supply and distribution of certain essential commodities, which include seeds. The ECA was enacted in 1955, and has since been used by the Government to regulate the production, supply, and distribution of a whole host of commodities that it declares ‘essential’ in order to make them available to consumers at fair prices. Additionally, the government can also fix the minimum support price (MSP) of any packaged product that it declares an “essential commodity”. This act was modified by the Essential Commodities (Amendment) Act, 2020 as part of the 2020 Indian farm reforms. The Amended law allow the Government of India to delist certain commodities as essential, allowing the government to regulate their supply and prices only in cases of war, famine, extraordinary price rises, or natural calamities. The commodities that have been deregulated are food items, including cereals, pulses, potato, onion, seeds, and oils. These can only be regulated in the extraordinary circumstances previously mentioned, by imposing limits on the number of stocks of such items that can be held by persons. The law states that government regulation of stocks will be based on rising prices, and can only be imposed if there is a 100% increase in retail price (in the case of horticultural produce) and a 50% increase in retail price (in the case of non-perishable agricultural food items). These restrictions will not apply to stocks of food held for public distribution in India.

Hazardous and other Wastes (Management and Trans boundary Movement) Rules, 2016 (“HW Rules”)

The HW Rules impose an obligation on every occupier of an establishment generating hazardous waste to recycle or reprocess or reuse such wastes through a registered recycler or to dispose of such hazardous wastes in an authorized disposal facility. Every person engaged, inter alia, in the generation, processing, treatment, package, storage and disposal of hazardous waste is required to obtain an authorization from the relevant state PCB for collecting, recycling, reprocessing, disposing, storing and treating the hazardous waste. The new HW Rules as compared to the Rules of 2008 have enlarged the scope of regulated wastes by including ‘other wastes’ in its ambit. Other wastes include: Waste tires, paper waste, and metal scrap, used electronic items, etc. and are recognized as a resource for recycling and reuse. These resources supplement the industrial processes and reduce the load on the virgin resource of the country.

1.1 Basis of Preparation of Financial Statements: -

These financial statements have been prepared to comply with the Generally Accepted Accounting Principles in India (Indian GAAP), including the Accounting Standards notified under Section 133 of the Companies Act, 2013 read with rule 7 of the companies (Accounts) rules 2015.

The financial statements are prepared on accrual basis under the historical cost convention, except for certain fixed Assets which are carried at revalued amounts. The financial statements are presented in Indian rupees.

1.2 Use of Estimates: -

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities on the date of the financial statements and the results of operations during the reporting periods. Although these estimates are based upon management's knowledge of current events and actions, actual results could differ from those estimates and revisions, if any, are recognized in the current and future periods.

1.3 Property, Plant and Equipment: -

1. Tangible Fixed Assets: -

All property, plant and equipment are stated at cost, which includes capitalized borrowing costs, less accumulated depreciation, and impairment loss, if any. Cost includes purchase price, including non-refundable duties and taxes, expenditure that is directly attributable to bring the assets to the location and condition necessary for its intended use and estimated costs of dismantling and removing the item and restoring the site on which it is located, if any

Properties in the course of construction for production, supply or administrative purposes are carried at cost, less any recognized impairment loss. Cost includes professional fees, and for qualifying assets, borrowing costs capitalized in accordance with the Company’s accounting policies. Such properties are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use. Depreciation of these assets, on the same basis as other property assets, commences when the assets are ready for their intended use. Spare parts are treated as capital assets when they meet the definition of property, plant and equipment. Otherwise, such items are classified as inventory.

If significant parts of an item of property, plant and equipment have different useful lives, then they are accounted for, as separate items (major components) of property, plant and equipment. Any gains or losses on their disposal, determined by comparing sales proceeds with carrying amount, are recognized in the Statement of Profit or Loss.

Subsequent expenditure: -

Subsequent expenditure is capitalized only if it is probable that the future economic benefits associated with the expenditure will flow to the Company.

De-Recognition: -

An item of property, plant and equipment is de-recognized upon disposal or when no future economic benefits are expected to arise from its use. Any gain or loss arising from its de-recognition is measured as the difference between the net disposal proceeds and the carrying amount of the asset and is recognized in Statement of Profit and Loss when the asset is de-recognized.

Depreciation methods, estimated useful lives and residual value: -

Depreciation on property, plant and equipment is provided using the written down value method based on the life and in the manner prescribed in Schedule II to the Companies Act, 2013, and is generally recognized in the statement of profit and loss. Cost of Lease hold is amortized over the tenure of lease agreement. Freehold land is not depreciated. In case where the cost of part of asset is significant to total cost of the asset and useful life of that part is different from the useful life of the remaining assets, the useful life of that significant part has been determined separately.

Asset Group	Useful Life
BULIDING AND STRUCTURES	30 Year
COMPUTERS EQUIPMENTS	3 Year
PRINTER	3 Year
ELECTRIC FITTINGS	10 Year
CAR	8 Year
VEHICLES	10 Year
OFFICE EQUIPMENTS	5 Year
PLANT AND MACHINERY	15 Year

The depreciation methods, useful lives and residual values are reviewed at each financial year-end and adjusted if appropriate. Based on technical evaluation and consequent advice, the management believes that its estimates of useful lives as given above best represent the period over which management expects to use these assets. Depreciation on additions (disposals) is provided on a pro-rata basis i.e., from (upto) the date on which asset is ready for use (disposed of).

Capital work in progress: -

Capital work-in-progress is carried at cost, comprising direct cost and related incidental expenses.

BASIS OF ALLOTMENT

1. The total number of Shares to be allocated to each category as a whole shall be arrived at on a proportionate basis i.e., the total number of Shares applied for in that category multiplied by the inverse of the over subscription ratio (number of applicants in the category X number of Shares applied for).
2. The number of Shares to be allocated to the successful applicants will be arrived at on a proportionate basis in marketable lots (i.e., Total number of Shares applied for into the inverse of the over subscription ratio).

If the proportionate allotment to an applicant works out to a number that is not a multiple of 1200 Equity shares, the applicant would be allotted Shares by rounding off to the nearest multiple of 1200 Equity shares subject to a minimum allotment of 1200 Equity shares.

If the Shares allotted on a proportionate basis to any category is more than the Shares allotted to the applicants in that category, the balance available Shares for allocation shall be first adjusted against any category, where the allotted Shares are not sufficient for proportionate allotment to the successful applicants in that category, the balance Shares, if any, remaining after such adjustment will be added to the category comprising of applicants applying for the minimum number of Shares. If as a result of the process of rounding off to the nearest multiple of 1200 Equity shares, results in the actual allotment being higher than the shares offered, the final allotment may be higher at the sole discretion of the Board of Directors, up to 110% of the size of the offer specified under the Capital Structure mentioned in this Draft Prospectus.

The above proportionate allotment of shares in an Issue that is oversubscribed shall be subject to the reservation for small individual applicants as described below:

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 ("FEMA"). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India ("RBI") and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India ("DIPP").

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated Foreign Direct Investment Policy notified by the DPIIT File No. 5(2)/2020-FDI Policy dated October 15, 2020, with effect from October 15, 2020 (the "FDI Policy"), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT or the DPIIT that were in force and effect prior to October 15, 2020. The Government of India proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DPIIT issues an updated circular.

In terms of the FEMA NDI Rules, a person resident outside India may make investments into India, subject to certain terms and conditions, and provided that an entity of a country, which shares land border with India or the beneficial owner of an investment into India who is situated in or is a citizen of any such country, shall invest only with government approval.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the foreign direct investment policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI / RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country ("Restricted Investors"), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank of fund in India. Each Bidder should seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Offer in writing about such approval along with a copy thereof within the Offer Period.
