## FORWARD-LOOKING STATEMENTS

This Red Herring Prospectus contains certain “forward-looking statements” which are not historical facts. These forward-looking statements generally can be identified by words or phrases such as “aim”, “anticipate”, “believe”, “can”, “could”, “expect”, “estimate”, “intend”, “may”, “likely”, “objective”, “plan”, “propose”, “project”, “seek to”, “will”, “will continue”, “will pursue” or other words or phrases of similar import but are not the exclusive means of identifying such statements. Similarly, statements that describe our strategies, objectives, plans, goals, future events, future financial performance, or financial needs are also forward-looking statements. All forward-looking statements are subject to risks, uncertainties, expectations, and assumptions about us that could cause actual results to differ materially from those contemplated by the relevant forward-looking statement.

These forward-looking statements, whether made by us or a third-party, are based on our current plans, estimates, presumptions and expectations and actual results may differ materially from those suggested by forward-looking statements due to risks or uncertainties associated with expectations relating to, *inter alia*, regulatory changes pertaining to the industries in India and other jurisdictions in which we operate and our ability to respond to them, our ability to successfully implement our strategy, our growth and expansion, technological changes, our exposure to market risks, general economic and political conditions in India or other relevant jurisdictions which have an impact on its business activities or investments, the monetary and fiscal policies of India or other relevant jurisdictions, inflation, deflation, unanticipated turbulence in interest rates, foreign exchange rates, equity prices or other rates or prices, the performance of the financial markets in India and globally, changes in domestic laws, regulations and taxes and changes in competition in the industries in which we operate.

Certain important factors that could cause actual results to differ materially from our expectations include, but are not limited to, the following:

- Our Company is heavily dependent on few global institutions of higher education for our revenue. Any loss of such global institutions of higher education may have an adverse impact on our business, results of operations and financial conditions;
- We are heavily dependent on the service of our agents. Loss of any or all such agents may have an adverse impact on our business, results of operations and financial conditions;
- Our success depends on our continued collaboration with global institutions of higher education. Our inability to maintain our collaboration with such global institutions of higher education may have an adverse impact on our business, results of operations and financial conditions;
- Our source of revenue is concentrated to certain geographical locations. During Fiscal 2025, Fiscal 2024 and Fiscal 2023, we derived 95.12%, 96.13%, and 96.42% of our revenue from operations, based on our Proforma Consolidated Financial Information, from the global institutions of higher educations located in The United Kingdom. Our inability to operate and grow our business in such countries may have an adverse effect on our business, financial condition, result of operation, cash flow and future business prospects; and
- The global institutions of higher education with whom we work have differing criteria to determine our eligibility to earn revenues from education consultancy services.

For further discussion on factors that could cause actual results to differ from expectations, see ‘*Risk Factors*’, ‘*Our Business*’ and ‘*Management’s Discussion and Analysis of Financial Condition and Results of Operations*’ on pages 41, 189 and 353 respectively. By their nature, certain market risk disclosures are only estimates and could be materially different from what actually occurs in the future. As a result, actual gains or losses could materially differ from those that have been estimated and are not a guarantee of future performance.

We cannot assure you that the expectations reflected in these forward-looking statements will prove to be correct. Given these uncertainties, investors are cautioned not to place undue reliance on such forward-looking statements and not to regard such statements to be a guarantee of our future performance.

Forward-looking statements reflect current views as of the date of this Red Herring Prospectus and are not a guarantee of future performance. These statements are based on our management’s beliefs and assumptions, which in turn are based on currently available information. Although we believe the assumptions upon which these forward-looking statements are based are reasonable, any of these assumptions could prove to be inaccurate, and the forward-looking statements based on these assumptions could be incorrect. Neither our Company, the Selling

Shareholders, our Directors, the BRLMs nor any of their respective affiliates have any obligation to update or otherwise revise any statements reflecting circumstances arising after the date hereof or to reflect the occurrence of underlying events, even if the underlying assumptions do not come to fruition. In accordance with the SEBI ICDR Regulations, our Company, the Selling Shareholders and the BRLMs will ensure that the investors in India are informed of material developments pertaining to our Company and the Offered Shares from the date of this Red Herring Prospectus until the time of the grant of listing and trading permission by the Stock Exchanges for this Offer.

## SECTION II: RISK FACTORS

The risks described in this section are not the only ones relevant to us or the Equity Shares but also includes the industry and segments in which we currently operate. Additional risks and uncertainties not presently known to us or that we currently deem immaterial may also impair our businesses, results of operations, financial condition and cash flows. If any of the following risks, or a combination of risks, or other risks that are not currently known or are currently deemed immaterial, actually occur, our businesses, results of operations, financial condition and cash flows could be adversely affected, the trading price of the Equity Shares could decline, and you may lose all or part of your investment. ### **Internal Risk Factors**

- 1. Our Company is heavily dependent on few global institutions of higher education for our revenue. Any loss of such global institutions of higher education may have an adverse impact on our business, results of operations and financial conditions.***

We are a B2B education platform for agents and global institutions of higher education offering international student recruitment solutions to global institutions of higher education in United Kingdom, Canada, Republic of Ireland, Australia and New Zealand (ANZ). While revenue from any particular institution of higher education may vary between financial reporting periods depending on the nature and term of on-going contracts, historically, we have been dependent on a limited set of global institutions of higher education for a majority of our revenue from operations.

During Fiscal 2025, Fiscal 2024, and Fiscal 2023, our revenue from operations from our top 3, 5 and 10 global institutions of higher education, from our Proforma Consolidated Financial Information was, as set out below:

*(in ₹ million)*

Particular	Fiscal 2025		Fiscal 2024		Fiscal 2023	
	Revenue	% of revenue from operations	Revenue	% of revenue from operations	Revenue	% of revenue from operations
Top 3 global institutions of higher education	4,489.91	52.85%	4,065.80	64.04%	3,018.27	63.81%
Top 5 global institutions of higher education	5,120.57	60.28%	4,488.91	70.71%	3,447.78	72.90%
Top 10 global institutions of higher education	5,994.25	70.56%	5,114.17	80.56%	3,897.00	82.39%

Some of the global institutions of higher education with whom we work with include University of Birmingham, University of Surrey, University of Sunderland, Nottingham Trent University, University of Greenwich, University of West London, University of Portsmouth, De Montfort University, Glasgow Caledonian University, Aston University, University of Dundee, Dundalk Institute of Technology, Coventry University and Swansea University.

Our business, results from operations, and financial conditions are heavily dependent on the ability to continue our relationship with our top 10 global institutions of higher education. Our failure or inability to continue such relationship for any reason (including, due to failure to negotiate acceptable terms or adverse change in the financial or economic conditions) could have a material adverse impact on our business, results of operations, financial condition and cash flows. Further, all or any of the aforementioned global institutions of higher education may cease to collaborate with us or replace us with an alternative. There can be no assurance that we will not lose all or a portion of our revenue due to our inability to maintain our relations with these global institutions of higher education or we will be able to offset any loss of such collaborations by having new collaborations.

**2. *We are heavily dependent on the service of our agents. Loss of any or all such agents may have an adverse impact on our business, results of operations and financial conditions.***

Our business model requires us to establish and maintain a wide network of agents in India and in global markets. As of March 31, 2025, we have around 10,362 Registered Agents globally who are registered on our proprietary technology platform and during Fiscal 2025 Fiscal 2024 and Fiscal 2023 we had 3,948, 2,532, and 1,819, active agents respectively (i.e., agents from whom we received applications during the relevant periods (**Active Agents**)) in over 39 countries overseas including United Kingdom, Nigeria, Pakistan, Bangladesh, Nepal, Sri Lanka, Cameroon, Ghana, Kenya, Vietnam, Canada and Egypt. During the Fiscal 2025, Fiscal 2024 and Fiscal 2023, our Company has made payments to 1,801, 1,491, and 1,043, Active Agents. Set out in the table below is a geographic break-up of our registered agent network in India and overseas:

Countries / Region	As on March 31, 2025	As on March 31, 2024	As on March 31, 2023
<b>Total no. of Registered Agents<sup>#</sup></b>			
India	6,046	3,931	3,056
Asia (excluding India)	2,087	1,269	561
Africa	1,390	875	507
Others	839	434	290
<b>Total</b>	<b>10,362</b>	<b>6,509</b>	<b>4,414</b>

<sup>#</sup> Total number of agents registered on the Company's portal.

Set out below are the details of our Active Agents and Registered Agents:

Particulars	As on March 31, 2025	As on March 31, 2024	As on March 31, 2023
Active Agents*	3,948	2,532	1,819
Registered Agents**	10,362	6,509	4,414

\*Agents from whom we received applications during the relevant periods

\*\*Total number of agents registered on the Company's portal.

These agents' source for us, on a non-exclusive basis, aspiring students who are looking for higher education overseas and are, therefore, critical to our business. We cannot assure you that we will be able to maintain a similar proportion of our Active Agents to our Registered Agents. If the proportion of non-Active Agents increases then it may adversely impact our business, results of operations and financial conditions. Further, considering these agents work with us on a non-exclusive basis, they can also directly work with global institutions of higher education. Since our revenue is directly related to the numbers of aspiring students who enrol with the global institutions of higher learning, and agents are the source of students, continuously deepening our ties with existing agents and augmenting the number of agents who avail of our services is essential to our business. During Fiscal 2025, Fiscal 2024, and Fiscal 2023 our revenue from operations from our top 3, 5, 10 agents, from our Proforma Consolidated Financial Information was, as set out below:

Particular		Fiscal 2025		Fiscal 2024		Fiscal 2023	
		Revenue (₹ million)	% of revenue from operations	Revenue (₹ million)	% of revenue from operations	Revenue (₹ million)	% of revenue from operations
Top 3 agents	3	458.50	5.40 %	269.99	4.25%	393.36	8.32%
Top 5 agents	5	584.28	6.88 %	381.12	6.00%	516.34	10.92%
Top 10 agents	10	843.84	9.93 %	601.76	9.48%	700.08	14.80%

Our ability to continue to generate revenue from our operations is significantly dependent on our ability to maintain our relations with our agents. If any of our top 10 agents cease to work with us or collaborate with us or choose to work with others, our business, our results of operations and financial conditions will be impacted. There can be no assurance that we will be able to retain our agents, in particular, our top 10 agents or we will be able to find suitable replacements for such agents or we will be able to offset any loss of such agents by having new agents. Further, a significant portion of our revenue is generated from recruitment services to global institutions of higher education in various jurisdictions through agents. Based on our Proforma Consolidated Financial Information, Fiscal 2025, Fiscal 2024 and Fiscal 2023 our payments to agents was ₹ 5,992.38 million, ₹ 4,446.36 million, and ₹ 3,076.12 million, constituting 70.54%, 70.04%, and 65.04%, respectively, of our revenue from operations.

Our agents also work with various other organisations which are our competitors. Our agents may also directly work with global institutions of higher education which are associated with us. In the absence of an exclusive agreement or arrangement, our agents may process the applications directly to global institutions of higher education or through such competitors which may also have an adverse effect on our business operations, revenue and financial condition. We cannot assure you that our existing agents will continue to provide students for enrolment in global institutions of higher education through our Company. In the absence of exclusive contracts or exclusive arrangements, our agents may cease to associate with us for better commissions from competing organisations as well as provide their services to competing organisations or global institutions of higher education. Further, we cannot assure you that we will be able to identify and work with qualified and trained agents to replace the existing agents. Our failure to meet such requirements may adversely affect our growth plans and have an impact on the financial results.

**3. *Our success depends on our continued collaboration with global institutions of higher education. Our inability to maintain our collaboration with such global institutions of higher education may have an adverse impact on our business, results of operations and financial conditions.***

Our ability to grow our business is directly correlated to our ability to maintain and expand our entrenched collaboration with a global network of institutions of higher education in countries such as United Kingdom, Republic of Ireland, Canada, and ANZ. During Fiscals 2023, 2024 and 2025, we worked with over 173 global institutions of higher education primarily in United Kingdom, Republic of Ireland, Canada and USA. Some of the global institutions of higher education with whom we work with include University of Birmingham, University of Surrey, University of Sunderland, Nottingham Trent University, University of Greenwich, University of West London, University of Portsmouth, De Montfort University, Glasgow Caledonian University, Aston University, University of Dundee, Dundalk Institute of Technology, Coventry University and Swansea University.

Further, set out in the table below are the number of global institutions of higher education catered to by our Company based on the additions and loss of revenue from such global institutions of higher education during the Fiscal 2025, Fiscal 2024, and Fiscal 2022.

<b>Particulars</b>	<b>UK</b>	<b>Canada</b>	<b>Ireland</b>	<b>Other Countries</b>

<b><i>No. of global institutions of higher education from which revenue was received in Fiscal 2023</i></b>	60	34	3	14

Lost** in Fiscal 2023	13	1	2	7
<b><i>No. of global institutions of higher education from which revenue was received in Fiscal 2022</i></b>	66	25	4	15

\* Added means global institutions of higher education from which we had not received revenues in previous financial year but have received revenue in this financial year

\*\* Lost means global institutions of higher education from which we had received revenues in previous financial year but have not received revenue in this financial year

Out of our top 30 global institutions of higher learning, based on our revenue from operations, during Fiscal 2025, Fiscal 2024, and Fiscal 2023, we have had longstanding relationship of over 5 years with more than 20 global institutions of higher learning.

We have entered into contracts with global institutions of higher education, which are typically valid for 1-3 years and our commissions are typically fixed and are based on certain threshold of number of students enrolled. Our inability to meet such threshold requirement may have an adverse impact on our business, result of operation and financial condition. Further, we cannot assure you that we will be able to maintain our existing relationships in the future with any of such existing global institutions of higher education.

Further, our contracts with global institutions of higher education expire on a periodic basis and we may or may not be able to renew such contracts in time or at all. While in the past such expiry of contracts has not impacted our ability to work with such global institutions of higher education as they continue to honour their commitments under the expired contracts, we cannot assure you that our global institutions of higher education will continue to honour such commitment in the future. As of date of this Red Herring Prospectus, some of our contracts with global institutions of higher education have expired and we cannot assure you that such contracts will be renewed at terms commercially similar to the expired contracts or that they will get renewed at all. Our inability to renew such contracts or to renew such contracts at terms commercially comparable to the expired agreements, or our customers choosing to not make payments for our services where the contracts have expired, may adversely affect our business, results of operations and financial condition.

4. ***Our source of revenue is concentrated to certain geographical locations. During Fiscal 2025, Fiscal 2024 and Fiscal 2023, we derived 95.12%, 96.13%, and 96.42% of our revenue from operations, based on our Proforma Consolidated Financial Information, from the global institutions of higher educations located in The United Kingdom. Our inability to operate and grow our business in such countries may have an adverse effect on our business, financial condition, result of operation, cash flow and future business prospects.***

The source of our revenue is concentrated on few geographies which can be bifurcated based on geographical location of global institutions of higher education. Based on our Proforma Consolidated Financial Information, set out below are details of our revenue from operations bifurcated based on the geographical location of the global institutions of higher education:

Loss of all or a substantial portion of revenue from these geographies, for any reason (including due to any recession or economic downturn or material adverse social, political or economical development, civil disruptions, or changes in policies of the state government or local government in these countries) could have an adverse effect on our business results of operations, financial conditions, cash flows and future business prospects in these countries.

**5. *The global institutions of higher education with whom we work have differing criteria to determine our eligibility to earn revenues from education consultancy services.***

All of our customers, i.e. global institutions of higher education, have different criteria to determine whether we are eligible to earn revenues for any student who has been enrolled through us. Such criteria include payment of fees by the student, completing joining formalities as may be indicated by the institution and completion of a minimum period of education, stay, and, or, enrolment at the institution. Once a student fulfils such criteria, the institution confirms our eligibility to earn revenues from such enrolment of such students and makes payment as per the terms of our contract with such institution. Our proprietary technology platform assists us in tracking all the applications made to the global institutions of higher education and also assists the agents to track the applications of students who have been selected by the global institutions of higher education. While we work with our agent network to minimize the gap between students who are enrolled through us and students deemed eligible, for payment of our fee, we cannot assure you that the eligibility criteria set by such global institutions of higher education will be met to make us eligible to receive fee pertaining to enrolment of a student. These agents' source for us, on a non-exclusive basis, aspiring students who are looking for higher education overseas and are, therefore, critical to our business. For details, see 'Our Business' on page 189. While our agreement with our agents for payment of fee to them is based on our receipt of revenues from education consultancy services for the specific student placed through us by the agent, we cannot assure that there will be no commercial disputes arising between us and members of our agent network for any difference in perception regarding a specific application. While there have been no instances of delay or default by us in making payments to our agents during Fiscal 2025, Fiscal 2024 and Fiscal 2023, there can be no assurance that there will not be any delay or default in making such payment to our agents. Further, since our revenue is directly related to the numbers of aspiring students who enrol with the global institutions of higher education, and agents are the source of students, continuously deepening our ties with existing agents and augmenting the number of agents who avail of our services is essential to our business.

We source applications for enrolment into global institutions of higher education from over 75 countries, through our agents globally who are registered on our proprietary technology platform. The details of applications processed by us from different geographies is as under:

Some of our contracts with institutions of higher education include the institutions making payment for our services assuming that the student will continue in enrolment for the entire duration of the course. In case, the student discontinues the course before completion of an identified milestone, the institution may have the right to seek reversal of part of the payments made by the institution towards our services. For instance, in Fiscal 2024, one of the global institutions of higher education based out of United Kingdom has sought reversal of around GBP 10,000 on this account. During Fiscal 2025, 2024, and Fiscal 2023 such reversals were around 0.02% of our revenues from operations, based on our Proforma Consolidated Financial Information for each of these periods.

**6. *Proforma Consolidated Financial Information included in this Red Herring Prospectus is presented for illustrative purposes only and may not accurately reflect our financial condition and results of operations.***

This Red Herring Prospectus contains our Proforma Consolidated Financial Information as of Financial year ended March 31, 2025, March 31, 2024, and March 31, 2023. Crizac UK became our Subsidiary on November 20, 2023 pursuant to a Share Purchase Agreement of even date by and between Dr. Vikash Agarwal and our Company. For details of the Share Purchase Agreement, see ‘History and Certain Corporate Matters - Details regarding material acquisition of business/undertakings, mergers, amalgamations and revaluation of assets in the last 10 years’ on page 217. The Proforma Consolidated Financial Information of our Company included in this Red Herring Prospectus has been prepared to show retroactively the impact of the acquisition of Crizac UK, our Material Subsidiary, on our restated financial information for financial years ended March 31, 2024, and March 31, 2023, as if such transaction was completed on April 1, 2022. The Proforma Consolidated Financial Information also contains financial information for Fiscal 2025, in addition to financial information for 2024 and Fiscal 2023, for completeness, and easy comparability of Proforma Consolidated Financial Information with previous fiscals i.e., Fiscal 2024 and Fiscal 2023.

The Proforma Consolidated Financial Information have been prepared in accordance with the requirements of the SEBI ICDR Regulations. Our Proforma Consolidated Financial Information as at and for Fiscal Years 2025, 2024, and 2023, present a theoretical situation to show the impact of acquisition of Crizac UK, including the results of operations and the financial position that would have resulted, had the acquisition been completed at a date prior to the first period presented in the Proforma Consolidated Financial Information. Accordingly, our Proforma Consolidated Financial Information may not necessarily be indicative of what our actual results of operations and financial position would have been for such periods or as of such dates, nor are these intended to be indicative of expected results or operations in the future periods or our future financial position. Our Proforma Consolidated Financial Information does not include all of the information required for financial information under Ind AS and should be read in conjunction with the ‘*Management’s Discussion and Analysis of Financial Condition and Results of Operation - Significant Accounting Policies to Proforma Consolidated Financial Information*’ on page 381 and ‘*Management’s Discussion and Analysis of Financial Condition and Results of Operation - Material Accounting Policies to Restated Financial Information*’ on page 357 included in this Red Herring Prospectus. Accordingly, the degree of reliance placed by investors in other jurisdictions on our Proforma Consolidated Financial Information should be limited.

**7. *Any change in the regulations or legislations in relation to Visa from foreign countries or restriction on travel could adversely affect our ability to conduct our business and impact our financial conditions.***

Our business operations are completely dependent on enrolling students from various jurisdictions into global institutions of higher education which are located in a different jurisdiction. Accordingly, the norms for issuing Visa’s, in particular, student Visa’s play a significant role in our business operations and our ability to generate revenue is heavily reliant on such legislations. Further, the global institutions of higher education with whom we collaborate are majorly concentrated in United Kingdom, Canada and Republic of Ireland. Any adverse restriction on travel or change in the Visa issuing norms, in particular student Visa, such as (i) Canada which has recently announced the ending of fast-track visa program for international students, (ii) United Kingdom which has changed norms with effect from January 1, 2024 in relation to dependants accompanying students (who have obtained a student’s Visa), or student immigration norms from any of these countries may have an adverse impact on our business operations. Recently, in May 2025, the U.S. Embassy and consulates in India have paused scheduling new appointments for student visa applicants, which will affect Indians the most as they constitute the largest group of foreign students in the USA. Moreover, The enhanced screening of foreign students in the USA is the latest worry for students and comes after the USA government launched a “catch and revoke” policy to deport students for their writings, presence at protests, or legal misdemeanours. The U.S. Embassy added in an advisory that a student could lose his or her visa status for skipping classes or leaving a programme without informing campus authorities. The enhanced social media vetting also could now mean fewer visas would be issued. (*Source F&S Report*) Any such adverse actions or potential actions or perception of such actions may have an adverse impact on our business operations particularly in relations to applications for global institutions of higher education in the USA. For further details on threats, please see ‘*Industry Overview - Threats & challenges to the growth of the industry*’ at page 186. While there has been no material impact on our operations including loss of any global institution of higher education in the immediately preceding 3 Fiscal due to travel restrictions or change in Visa norms in any of the jurisdictions in which we operate, any such restriction or change may impact our business operations, financial condition and results of operations. Further, while there has not been any loss of any global institution of higher education, in the immediately preceding 3 Fiscals on account of change in regulations or legislations, any such change may impact our ability to enrol students from our major revenue generating jurisdictions which may have an adverse impact on our financial conditions, results of operations and future business prospects. There can be no assurance that our Company will be able to successfully identify other jurisdictions in a timely manner or at all, in relation to both global institutions of higher education and students, to mitigate the impact of such adverse change in the legislations.

**8. *Adverse geopolitical conditions between the jurisdictions of students and jurisdictions of the global institutions of higher education or factors affecting the safety or security of students could adversely affect our business, results of operations and financial condition.***

Adverse geopolitical conditions such as increased tensions between any of the country of students and the country of the global institutions of higher education, resulting in any conflict, including closing down borders or including any military conflict in the region could adversely affect our business and operations in both the countries i.e., the country of the students and country of the global institutions of higher education. Such an event may lead to any of these countries imposing restrictions on such other country. Further, if there are safety or security issues in the country of the global institutions of higher education with whom we have a

collaboration or if such institutions themselves have or are perceived to have safety or security issues, students may elect to not be enrolled in such institutions or study in such countries. While there have been no such instances which have had a material adverse impact on our business and operations in the immediately preceding 3 Fiscals, if the aforementioned factors materialise in the context of our business operations, it could adversely affect our results of operations and financial condition. For further details on threats to the growth to the industry, please see 'Industry Overview - Threats & challenges to the growth of the industry' at page 186.

**9. *Inability to obtain or protect our intellectual property rights may adversely affect our business.***

As on the date of this Red Herring Prospectus, our Company has not made an application for trademark of

the logo of our Company viz. . Further, our Company has made 3 applications for registering our word mark viz. 'CRIZAC' in India which are currently objected. In the absence of the

registered trademark of  or the wordmark of 'CRIZAC', our ability to protect our intellectual property may be diluted to such extent, and could adversely affect our reputation and business, which could in turn adversely affect our financial performance and the market price of the Equity Shares. We

cannot assure you that  and, or, 'CRIZAC' will be registered in our name, and we will continue to enjoy uninterrupted use of the said. Any claim of intellectual property infringement from third parties, regardless of merit or resolution of such claims, could force us to incur significant costs in responding to, defending, and resolving such claims, and may divert the efforts and attention of our management and technical personnel away from our business. Our inability to obtain or maintain our trademarks in our business, could adversely affect our reputation, goodwill, business prospectus, and results of operations.

Further, these applications are made in India under the provisions of the Trade Marks Act, 1999. Accordingly, upon registration, our Company will only be able to protect its rights in relation to these marks in India only. There can be no assurance that our rights to use such marks will be equally protected in any jurisdiction outside India.

**10. *Conflicts of interest may arise out of common pursuits between our Company, Subsidiaries, entities forming part of promoter group and our group companies.***

While our Company and our Subsidiaries i.e., Crizac UK and UCOL FZE, are in the same line of business, there are no conflict of interest as both Crizac UK and UCOL FZE are wholly owned subsidiaries of our Company. Further, there are common pursuits amongst our Company and 2 Group Companies i.e., UCOL Ltd and Crizac Informatics Ltd, by virtue of these companies engaging in similar business activities as that of our Company. There is no formal agreement, arrangement or memorandum of understanding between our Company and these Companies to address any conflict of interest arising out of such common pursuits. Whilst we cannot assure you that a conflict of interest will not arise if the entity decides to pursue such activities in future which may impact our Company's business and revenue from operations, our Company shall adopt necessary procedures and practices as permitted by law and regulatory guidelines to address any instances of conflict of interest, if and when they may arise.

**11. *Our Company has inadvertently in the past made corporate filings with factual inaccuracies.***

There has been two instances of factual inaccuracy and incorrect filing in our corporate filings. Our Company had filed form MGT-7 for Fiscal 2023 with incorrect net worth of our Company. In the form MGT-7, the net worth of our Company was inadvertently mentioned as ₹ 4,199.42 million instead of ₹ 2,199.70 million. In relation to bonus issue of 9,978,800 Equity Shares on February 28, 2022, our Company has inadvertently mentioned that 8,481,980 Equity Shares and 1,496,820 Equity Shares were allotted to Pinky Agarwal and Manish Agarwal, respectively, instead of 8,398,000 Equity Shares and 1,580,800 Equity Shares. However, the Board resolution dated February 28, 2022 approving this allotment and the form PAS-3 (Return of Allotment) filed with the RoC mentions the correct number of Equity Shares allotted i.e., 8,398,000 Equity Shares to Pinky Agarwal and 1,580,800 Equity Shares to Manish Agarwal. Further, our Company has made

incorrect filings in the past i.e., during Fiscal 2021 and 2022, our Board had 8 and 12 meetings, respectively, the MGT-7 (Annual Returns) filed by our Company with the RoC incorrectly records that 4 and 11 meeting were held during the same period. While our Company has, pursuant to the letters dated December 12, 2024, and April 15, 2025 informed the RoC of the aforementioned inaccuracies, and no action has been initiated from the RoC against our Company for such inaccurate filing, we cannot assure you that the RoC will not take any action in the future for such inaccuracy. Our Company will take all the necessary and applicable actions to comply with the orders received from ROC, in case the ROC initiate any actions against our Company.

**12. *A slowdown in economic growth in India, or in the countries we operate, or a global economic instability could result in an adverse effect on our business, financial condition and results of operations.***

The structure of the Indian economy has undergone considerable changes in the last decade. These include increasing importance of external trade and of external capital flows. Any slowdown in the growth of the Indian economy or any future volatility in global process could adversely affect our business, financial condition and results of operations. India's economy could be adversely affected by a general rise in interest rates, fluctuations in currency exchange rates, adverse conditions affecting commodity prices or various other factors. Further, conditions outside India, such as slowdowns in the economic growth of other countries, could have an impact on the growth of the Indian economy and government policy may change in response to such conditions. Depreciation in Indian Rupees against currencies of other countries where we operate may result in increase in tuition fees and living expenses for students. An increase in tuition fee or living expenses may discourage students to move out of India for higher education which may have an impact on our business, financial condition and results from operation. For further details on threats to the growth to the industry, please see '*Industry Overview - Threats & challenges to the growth of the industry*' at page 186. The Indian economy and financial markets are also significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States, France, Europe or China or Asian emerging market countries, may have an impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss of investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets, and could have an adverse effect on our business, financial condition and results of operations and the price of the Equity Shares.

**13. *Any disruption or failure in our proprietary technology platform or our information technology systems or security breaches in our information technology systems may adversely affect our business, results of operations and prospects.***

One of the key features of our service offerings is our strong focus on technology. Pursuant to a Software Purchase Agreement dated December 19, 2023 amongst our Company and one of our Group Company which is also a member of the Promoter Group, i.e., Crizac Technologies Private Limited, we have purchased all the rights, title, and interest of a central application management system software i.e., our over our proprietary technology platform. For further details, see '*Outstanding Litigation and Other Material Development - Material Developments since the date of the last Balance Sheet*' on page 399. Our proprietary technology platform facilitates streamlined communication with around 10,362 of our Registered Agents globally, who are registered on our proprietary technology platform as on March 31, 2025, our Company, and our global institutions of higher education, and provides a comprehensive 'one-stop' window for a seamless experience, which enhances efficiency and accessibility. Any failure in our system or any security breach including theft of data, whether internal or external, on our system may have a significant impact on our business operations. Such failure of our system or security breach may also result in the loss of information and personal data collected from students on our portal. There can be no assurance that security measures taken by us will be sufficient to prevent security breaches. Further, our Company may be subjected to additional costs in the event of any security breach and consequent loss of personal data or may be subjected to legal proceedings, the outcome of which may have an adverse effect on the revenue. While there has been no such instances of system failure or security breaches in the past, we cannot assure you that such an event will not occur in the future, or our Company will be successfully able to mitigate such an event.

We also rely on our information technology systems in connection with enrolments and student related data, and the general running of our day-to-day business. As our operations grow in size and scope, we must continuously upgrade our systems and infrastructure, while maintaining the reliability and integrity of our systems and infrastructure in a cost-effective manner. Factors such as fires, power outages,

telecommunications or technical failures, disruption in internet infrastructure or access due to earthquakes, floods or other natural calamities or adverse weather conditions, acts of war or terrorism, computer viruses, sabotage, break-ins and electronic intrusion attempts from external or internal sources, difficulties in linkages with our students' systems may cause system interruptions, delays, security breaches or corruption or loss of critical data, and may prevent us from operating some or all our business for a significant period of time, which could have an adverse effect on our reputation, business, results of operations and prospects.

**14. *A significant portion of our revenues are from outside India. Adverse foreign currency exchange rate fluctuations could adversely impact our business, results of operation and financial condition.***

A significant portion of our revenues are generated from outside India and majority of such contracts entail our revenues to be denominated in foreign currency and thus we face foreign exchange rate risk to the extent of our revenue that are denominated in a currency other than the Indian Rupee.

Set out in the table below is our revenues from overseas, based on our Proforma Consolidated Financial Information:

Particulars	Fiscal 2025		Fiscal 2024		Fiscal 2023	
	₹ in million	% of revenue from operations	₹ in million	% of revenue from operations	₹ in million	% of revenue from operation
Overseas Revenues	8,456.93	99.55%	6,348.66	100.00%	4,729.74	100.00%

While we have forex management systems in place and from time to time avail forward cover to minimise the foreign exchange related risks, we may experience foreign exchange losses and gains in respect of transactions denominated in foreign currencies. While we enter into hedging transactions including through derivative instruments to minimize our foreign currency exchange risks, there can be no assurance that such measures will enable us to manage our foreign currency risks. Certain jurisdictions in which we operate may be subject to foreign exchange repatriation and exchange control risks, which may result in either delayed recovery or even non-realization of revenue. In addition, the policies of the RBI may also change from time to time, which may limit our ability to effectively hedge our foreign currency exposures and may have an adverse effect on our results of operations and cash flows. Any adverse fluctuations of the Indian Rupee vis-à-vis foreign currency to which we have an exposure cannot be accurately predicted and our attempts to mitigate the adverse effects of exchange rate fluctuations may not be successful, which may adversely affect our business, results of operations and financial condition.

**15. *Our Company also provides services such as marketing, brand management and admission office management to select global institutions of higher education. Our business may be adversely affected if such global institutions of higher education start directly marketing their programs.***

Our Company provides services such as marketing, brand management and admission office management to select global institutions of higher education. As a part of these services, we are required to facilitate marketing campaigns to raise awareness about the global institutions of higher education and maintain branding across communication channels such as including our website, social media, and marketing materials.

However, in the event such global institutions of higher education invest resources towards developing their own capabilities for marketing, brand management and admission office management, for their own programs, the business of our Company may be adversely affected. While no such material instance has occurred in the past, there can be no assurance that the global institutions of higher education will not explore alternatives to develop their own marketing and business promotion capabilities, which may adversely affect our business, financial condition, and results of operations.

**16. *Our success is dependent on the quality of content and delivery of courses and programs of the global institutions of higher education associated with us. Any negative publicity on the content or courses or programs will have an impact on our ability to drive enrolments.***

The global institutions of higher education associated with us are responsible for the academic content of their programs, faculty appointments, providing lectures, granting degrees, and making decisions regarding

admission and registration criteria. There can be no assurance that such global institutions of higher education will be able to continue with their track record and quality of content and programs. Any failure to maintain the required track record could receive negative publicity which will have an adverse impact on the brand value of the global institutions of higher education associated with us. Further, the name of our Company may also get associated with such negative publicity which, even if inaccurate, can have an adverse impact on our brand and thereby affect our ability to drive enrolments in future. For further details on threats to the growth to the industry, please see '*Industry Overview - Threats & challenges to the growth of the industry*' at page 186. While there has been no such instance of negative publicity in the past, we cannot assure you that such an event will not occur in the future or the business, results of operations and financial conditions will not be affected due to such negative publicity.

- 17. *We have recently acquired our Material Subsidiary i.e., Crizac Ltd from one of our Promoters i.e. Dr. Vikash Agarwal pursuant to a share purchase agreement dated November 20, 2023. We are significantly reliant on our Material Subsidiary, Crizac Ltd, for our business prospects.***

Our Company provides student recruitment solutions to global institutions of higher education in United Kingdom, Canada, Republic of Ireland and ANZ. We have recently acquired our Material Subsidiary i.e., Crizac Ltd from one of our Promoters i.e. Dr. Vikash Agarwal pursuant to a share purchase agreement dated November 20, 2023 (*SPA*) for an aggregate consideration of ₹ 63.20 million. For details, see '*History and Certain Corporate Matters - Details regarding material acquisition of business/undertakings, mergers, amalgamations and revaluation of assets in the last 10 years*' on page 217. The SPA was entered into between the parties for the purchase of share capital held by Dr. Vikash Agarwal in Crizac UK, a private company limited by shares incorporated and existing under the Laws of England and Wales and having its current registered office at 24 Great Chapel Street, Soho London, England, W1F 8FS. Pursuant to the SPA, our Company has purchased 100 Equity Shares of Crizac UK for an agreed consideration of ₹ 63.20 million, from Dr. Vikash Agarwal, representing 100.00% of the share capital of Crizac Ltd. Consequently, Crizac Ltd has become the wholly owned subsidiary of our Company. The Company has obtained a valuation report dated August 15, 2023 issued by Nilesh Ajmera (ASPN & Company, Chartered Accountants), a registered valuer for the fair valuation of shares. Set out below are the revenue from operations from our Material Subsidiary (on a standalone basis), and our revenue from operations (on a consolidated basis), based on Proforma Consolidated Financial Information.

(in ₹ million)

Particulars	Fiscal 2025	Fiscal 2024	Fiscal 2023
Material Subsidiary (Standalone)	8,328.42	2,912.28	1,988.76
Company (Consolidated)	8,494.91	6,348.66	4,729.74

Any legal restriction on our Material Subsidiary from continuing its business operations or any change in the geopolitical situation resulting in any restriction on our Material Subsidiary may have an adverse impact on our revenue from operations, financial conditions and business prospects. While there have been no such instances of restrictions on our Material Subsidiary in the past, we cannot assure you that such event will not arise in the future. Further, there can be no assurance that our Company will be successfully able to mitigate such instances of restrictions.

- 18. *We are highly dependent on the services of Dr. Vikash Agarwal, our Chairman and Managing Director, Manish Agarwal, our Whole Time Director, our key managerial personnels and our members of senior management. Any loss of their services may impair our ability to operate effectively and may have an adverse impact on our business and financial condition.***

In order to successfully manage and expand our business, we are dependent on the services of our Promoters, key managerial personnel and members of senior management, and their ability to attract, train, motivate and retain skilled employees and other professionals. Our success depends largely on the continued services of our Promoters, Dr. Vikash Agarwal who is also the Chairman and Managing Director, Manish Agarwal who is also the Chief Financial Officer and Whole-time Director. Our promoters have considerable experience in providing international student recruitment solutions to global institutions of higher education. They play a vital role in building and maintaining relationships with global institutions of higher education and agents. Our Promoters have engendered the business and overseen its growth from inception. They have also over the years leveraged their extensive connect with global institutions of higher education to help us establish our brand and reputation. The loss of the services of any or all of our Promoters, key managerial personnel

and members of senior management may have an adverse effect on our business, financial condition, and results of operations.

Attracting and retaining top-quality managerial talent is essential for our continued growth. If we are unable to hire additional personnel or retain existing skilled personnel, in particular our key managerial personnel and our members of senior management and persons with requisite skills, our operations and our ability to expand our business may be impaired. Further, we may be unable to hire and retain enough skilled and experienced employees to replace those who leave or may not be able to re-deploy existing resources successfully. Failure to hire or retain key managerial personnel, members of senior management and skilled and experienced employees could adversely affect our business and results of operations.

**19. *Our Company will not receive any proceeds from the Offer for Sale. The Selling Shareholders will receive the net proceeds from the Offer for Sale.***

The Offer consists of an Offer for Sale comprising [●] of the total Offer size. The Selling Shareholders will be entitled to the Net Proceeds from the Offer for Sale, which comprises proceeds from the Offer for Sale net of Offer Expenses shared by the Selling Shareholders, and our Company will not receive any proceeds from the Offer for Sale.

**20. *We have a large work force and our employee benefit expense is one of the larger components of our fixed operating costs. An increase in employee benefit expense could reduce our profitability. Further, our operations could be adversely affected by work stoppages or increased wage demands by our employees or any other kind of disputes with our employees.***

Our pool of employees consists of employees as part of *inter alia* senior management team, agent relation management team, application management and assessment team, university relationship management team, and others including accounts, compliance, human resources and technology development team. As on April 1, 2022 we had 28 employees which increased to 368 employees as on March 31, 2025. Our employee benefit expense during Fiscal 2025, Fiscal 2024, and Fiscal 2023, based on our Restated Financial Information, was ₹ 191.62 million, ₹ 66.88 million, and ₹ 40.43 million, constituting approximately 2.81%, 1.68%, and 2.36%, respectively of our total expense and, based on our Proforma Consolidated Financial Information was ₹ 191.62 million, ₹ 66.88 million, and ₹ 40.97 million, constituting approximately 2.81%, 1.33%, and 1.11%, respectively of our total expense.

Due to economic growth in the past and the increase in competition for skilled and semi-skilled employees in India, wages in India have, in recent years been increasing at a fast rate. Our Company may need to increase our compensation levels to remain competitive in attracting and retaining the quality and number of skilled and semi-skilled employees that our business requires. Further, a shortage in the labour pool or general inflationary pressures will also increase our labour costs. A significant long-term increase in our employee benefit expense could reduce our profitability, which could, amongst others, impact our growth prospects.

Further, our business model is human resource intensive and as at March 31, 2025, our Company's work force comprised 368 employees including our senior management team. Our Company's average attrition rate of employees during the last 3 Fiscals is set out below:

Particulars	Fiscal 2025	Fiscal 2024	Fiscal 2023
No of employee's left during the year (A)	148	68	100
No of employees at the beginning of the year + No of employees joined during the year (B)	515	329	214
Employee attrition ratio (A/B) (%)	28.74	20.67	46.73

While we consider our current employee relations to be good, we cannot assure you that we will not experience disruptions in work due to disputes or other problems with our work force, which may adversely affect our ability to perform our obligations for the projects. Any disputes may also result in disruptions in our operations, which may adversely affect our business and results of operation.

Our proprietary technology platform is essential to our business operations and facilitates streamlined communication between our around 10,362 Registered Agents globally, who are registered on our proprietary technology platform as on March 31, 2025, our Company, and our global institutions of higher education, and provides a comprehensive 'one-stop' window for a seamless experience, which enhances efficiency and accessibility. Our proprietary technology platform can be accessed by our agents who are the point of contact with the students. Our agents upload the information about the student onto the platform including basic demographic information, documents for identity proof, marksheets of previous schooling and education and importantly the current preferred destination and course that the student wishes to pursue. This information is then accessed on our proprietary technology platform by our team which understands the preference of global institutions of higher education in terms of their admission criteria and accordingly assesses whether the students meet the relevant criteria and process only eligible applications. 23. *We are a B2B education platform for agents and global institutions of higher education and our business operations are completely dependent on enrolment of students from various jurisdictions into global institutions of higher education which are located in a different jurisdiction. ***higher education are involved in illegal admission then we may be accused of aiding or abetting these offences, which could have a material adverse effect on our reputation, business and financial condition.***

We are a B2B education platform for agents and global institutions of higher education and our business operations are completely dependent on enrolment of students from various jurisdictions into global institutions of higher education which are located in a different jurisdiction. If the students are involved in Visa fraud or illegal immigration or if the students, agents and / or global institutions of higher education are involved in illegal admission then we may be accused of aiding or abetting these offences, which could have a material adverse effect on our reputation, business and financial condition. Further, admission process in global institutions of higher education may be prone to applicants submitting falsified or forged documents, or through bribery, to gain admissions through such fraudulent means. While our agents upload information about the student onto our proprietary technology platform including basic demographic information, documents for identity proof, marksheets of previous schooling and education, in case any forged or falsified or forged documents are used for gaining admission into global institutions of higher education, then we may be accused of aiding or abetting these offences. Though we maintain abundant caution and care in processing of the applications, should such instance occur, our Company may face potential accusations of aiding or abetting visa fraud, illegal immigration or running illegal admissions racket. While there have been no such instances of our Company being accused of aiding or abetting visa fraud, illegal immigration or running illegal admissions racket during the last 3 Fiscals, our Company's failure to successfully defend such accusation may result in legal liability or impairment to our reputation, which could have a material adverse effect on our business, financial condition and results of operations.

- 24. *As part of our growth strategy, we intend to diversify our service offerings which will include foraying into B2C (i.e., catering directly to the student population without an agent in between) business model through inorganic growth. While this presents significant opportunities for expansion and diversification, we cannot assure you that we will be able to effectively implement this strategy.***

One of our strategies to grow our business of providing international student recruitment solutions to global institutions of higher education through inorganic growth by acquisition of control of certain companies, which have not been identified yet, which our Company deems will fit well into our business objectives. The inorganic growth will be focused towards foraying into the B2C (i.e., catering directly to the student population without an agent in between) business model, and will also fit well with our strategy of diversifying our service offerings which will be focused on providing guidance on available financial aid options, and engaging in other aspects which form a part of the international study eco-system such as (i) student loans and foreign exchange facility for which we are proposing to enter into tie-ups with financial institutions, (ii) Visa application assistance, and (iii) accommodation for which we will enter into tie-ups with property management services and accommodation providers across our focus geographies. We cannot assure you that we will be able to execute our strategy in a timely manner or at all. We believe that our business and growth strategies will place significant demands on our senior management and other resources and will require us to develop and improve operational, financial and other internal controls. Any inability to manage our business and growth strategies could adversely affect our business, financial condition and results of operations.

- 25. *We have dues which are outstanding to our creditors. Any failure in payment of these dues may have a material adverse effect on our reputation, business and financial condition.***

All these factors may have a material adverse effect on our reputation, business and financial condition.

**26. Our business operations are asset light, and a substantial portion of our assets comprise monetary assets.**

Our other income increased by 186.52% from ₹ 448.72 million in Fiscal 2023 to ₹ 1,285.68 million in Fiscal 2024. This exceptional increase was primarily due to an increase in (i) gain on fair valuation of investment measured at FVTPL (i.e., fair value through profit or loss) from ₹ 139.29 million in Fiscal 2023 to ₹ 524.49 million in Fiscal 2024 and profit on sale of investments at FVTPL (i.e., fair value through profit or loss). While there have been no such instances of significant increase in other income and, or expenses in the past we cannot assure you that our Company will have similar increase in income and, or expenses in the future.

**32. Our entire revenue from operations is generated from the education consultancy services industry. A general decline or disruption in the education industry in relevant jurisdictions may adversely affect our business operations, results of operations and financial condition.**

Our business activity primarily falls within a single business segment, i.e., educational consultancy services and our entire revenue from operations is generated from this industry. Our services are primarily focused on the jurisdiction of United Kingdom, Republic of Ireland and Canada. During Fiscal 2025, Fiscal 2024, and Fiscal 2023, our revenue from educational consultancy services, based on our Proforma Consolidated Financial Information, was ₹ 8,494.91million, ₹ 6,348.66 million, and ₹ 4,729.74 million, respectively. For the Fiscals March 31, 2025, March 31, 2024, and March 31, 2023, we sourced applications for enrolment into global institutions of higher education from over 75 countries including Nigeria, Pakistan, Bangladesh, Sri Lanka, Nepal, Cameroon, China, Ghana, Kenya, and the United Kingdom. While students and parents are increasingly recognizing the value of acquiring a global perspective, accessing world-class educational institutions, and experiencing diverse cultures, student's willingness to study abroad may be impacted by cultural barriers, homesickness, and differences in teaching methods. More global institutions are offering tailored, flexible, and cost-effective programs, leading to stiff competition for top talent from India. (Source: F&S Report) While there have been no instances in the last 3 Fiscals leading to a decline or disruption in the education industry in our key geographies, any such decline or disruption, may have an adverse impact on our revenue from operations and financial conditions. Further, there can be no assurance that our revenue from other jurisdictions will increase or be sufficient to set-off any reduction in revenue from our currently largest revenue generating jurisdictions.

**33. Delay or default in payments and receivables from global institutions of higher education may have an adverse impact on our profits and cash flow.**

Our operations involve the practice of providing recruitment solutions to global institutions of higher education. Once such institutions of higher education confirm the candidature of the student and after a gestation period, which may vary from 15 days to 90 days, we typically receive our payments. Customer credit risk is managed by our Company through its established policies, procedures and control relating to customer credit risk management. Further, our Company regularly monitors and reconciles outstanding customer receivables regularly. Further, we cannot assure you that we will be able to accurately access the creditworthiness of our customers in future. If such delays are for a prolonged period, our profit margin and cash flows may be affected.

**35. Our Company's operations are subject to varied business risks including risk of financial misappropriation, theft and employee negligence. Our Company maintains negligible insurance cover which may prove inadequate to cover the economic losses of our Company.**

Our Company's operations may be subject to various risks and hazards, including risks emanating from financial misappropriation, theft and employee negligence which may adversely affect revenue generation and profitability of our Company. While our Company believes that it has taken adequate safeguards to protect our Company's assets from various risks inherent in our Company's business, our Company maintains negligible insurance cover, which may not provide adequate coverage in certain circumstances.

While our Company maintains negligible insurance cover, certain types of losses may be either uninsurable, not economically viable to insure or not offered for insurance, such as losses due to acts of terrorism or war. If any uninsured loss occurs, our Company could lose our investment in, as well as anticipated profits and cash flows from the asset. In addition, even if any such loss is insured, there may be a significant deductible on any claim for recovery prior to our insurer being obligated to reimburse us for the loss, or the amount of the loss may exceed our coverage for the loss. Further, even in the case of an insured risk occurring there can be no assurance that our Company will be successful in claiming insurance in part or full, or that the insurance purchased by us will be sufficient to cover the loss occasioned by the risk. While during the last 3 Fiscals there has not been any instance of insurance claim made by our Company, we cannot assure you that we will be able to claim, in full, or at all, any insurance claim made by us. Any loss that is not covered by insurance, or for which our Company is unable to successfully claim insurance, or which is in excess of the insurance cover could, in addition to damaging our Company's reputation, have an adverse effect on our Company's business, cash flows, financial condition and results of operation. Further, an insurance claim once made could lead to an increase in our Company's insurance premium.

In addition, our Company's insurance coverage expires from time to time. Our Company will apply for the renewal of our insurance coverage in the normal course of its business, but our Company cannot assure you that such renewals will be granted in a timely manner, at acceptable cost or at all. To the extent that our Company suffer loss or damage for which it did not obtain or maintain insurance, and which is not covered by insurance or exceeds our Company's insurance coverage or where its insurance claims are rejected, the loss would have to be borne by our Company and its results of operations, cash flows and financial condition may be adversely affected.

**36. Our business operations are seasonal in nature.**

Our Company operates in the educational consultancy services industry and as a service, we assist in enrolling students to global institutions of higher education. Enrolment into global educational institution is seasonal in nature and typically, enrolments are undertaken during specified intakes. Key intakes which are currently relevant to us occur during the months of January/ February, April/ May and September/ October. As our revenue is generated solely from our educational consultancy service, our revenue during the enrolment season is significantly higher than the rest of the year. Accordingly, our performance during the seasonal

period may not be indicative of our performance for that particular year. Further, due to such seasonal variations, our sales and results of operations may vary for every quarter and may not be relied upon as indicators of the sales or results of operations of other fiscal quarters, or of our future performance. We have experienced, and expect to continue to experience, significant variability in our total revenue from operations, operating cash flows, operating expenses and net revenues on a seasonal basis.

- 37. *Majority of our directors including our independent directors do not have any experience of being a director in a listed company. This may require them to divert their attention from our business concerns to understand the detailed operations of a listed company.***

Currently, our Board comprises of 6 directors out of which 3 are independent directors. 2 of our independent directors namely, Rakesh Kumar Agrawal and Anuj Saraswat have never been appointed as an independent director on the board of a listed company. While the aforementioned independent directors possess the required qualifications and appropriate skills, experience and knowledge required to act as independent director of our Company and are experienced in their respective fields, they may not have adequate experience in being a director of a listed company. Accordingly, such directors will need to familiarise themselves with the regulatory framework within which listed companies in India operate and to the extent that they are unfamiliar with such framework their ability to discharge their functions as independent directors could be adversely affected. As a listed company, we will be subject to increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company and will also be subject to increased corporate governance requirements. Accordingly, the lack of experience of a majority of our directors of never having been directors of a listed company, may require them to divert their attention from our business concerns to understand the detailed operations of a listed company.

- 38. *We operate in a competitive industry. Any inability to compete effectively may lead to a lower market share or reduced operating margins.***

We operate in a competitive industry with a number of other entities that offer competing solutions, both in India and internationally. For further details, see ‘*Our Business - Competition*’ on page 209. Some of our key competitors include entities such as ApplyBoard which offers a recruitment platform that helps international students apply for post-secondary studies abroad, SI-UK, which is an international education consultant organisation, and works with universities and higher education institutions and helps students with the application and selection process at UK universities, KC Overseas which in addition to aiding students in navigating overseas admissions, KC Overseas provides pre-admission services such as career counselling, test preparation, and assistance with financial aid. Other competitors include LeapScholar and Leverage Edu. While some of these entities provide various services, our Company’s focus is to provide international student recruitment solutions to global institutions of higher education and admission office management. Some of our competitors may have certain advantages, including greater financial, technical and, or, marketing resources, which could enhance their ability to finance growth, fund future expansion, and, or, operate in more diversified geographies. As a result, to remain competitive in the market we must, in addition, continuing growth strategies, continuously strive to reduce our costs and improve our operating efficiencies. If we fail to do so, it may have an adverse effect on our market share and results of operations. For further details on threats to the growth to the industry, please see ‘*Industry Overview - Threats & challenges to the growth of the industry*’ at page 186. We cannot assure you that we can continue to effectively compete with such competitors in the future, and failure to compete effectively may have an adverse effect on our business, financial condition, and results of operations. Moreover, the competitive nature of the industry that we operate in may result in lower commissions and decreased profit margins, which may materially adversely affect our revenue and profitability.

- 39. *Our Company does not have any comparable listed peer companies in India and internationally which provide international student recruitment solutions to global institutions of higher education. Therefore, investors must rely on their own examination of accounting ratios of our Company for the purposes of investment in this Offer.***

While we operate in a competitive industry with a number of other entities that offer competing solutions, both in India and internationally, our Company does not have any listed peer companies in India and internationally which provide international student recruitment solutions to global institutions of higher education. Therefore, there is limited information in the public domain about entities that may be considered our peers and, consequently, it may be difficult to benchmark and evaluate our financial performance against other Indian or global companies who provide international student recruitment solutions to global institutions

of higher education. While we have listed Indiamart InterMesh Ltd, and IDP Education Limited as our peers, our international student recruitment solutions to global institutions of higher education services do not align with those of these companies; for instance (i) Indiamart InterMesh Ltd is an online business-to-business marketplace provider for business products and services; and (ii) IDP Education Limited is a student placement service provider and oversees the administration of the IELTS test. These companies are consultancy and platform providers, and consequently, we have considered these companies as our proxy set of listed peers. While our Company does not have any listed peers in India, there are multiple unlisted competitors in India which are in the similar business as that of our Company such as KC Overseas, Leap Scholar, Leverage Edu, Canam. For further information, see '*Basis for the Offer Price - Comparison of accounting ratios with Listed Industry Peers*' on page 129. Therefore, investors must rely on their own examinations of accounting ratios of our Company for the purposes of investment in this Offer.

**40. *Our Material Subsidiary had applied for change of accounting period.***

Our Material Subsidiary i.e., Crizac Ltd, had historically prepared its unaudited financial statements for the period May 1 to April 30 of the respective year as compared to our Company which follows the accounting period of April 1 to March 31 of respective year. Our Material Subsidiary had made an application dated November 13, 2023 with Companies House, United Kingdom seeking permission to change its accounting period to April 1 to March 31 and the same was approved. To this extent, the financial statements of our Material Subsidiary going forward may not be comparable to the financial statements of our Material Subsidiary for any prior period. While the Proforma Consolidated Financial Information have been prepared taking into the special purpose audited financial statements of our Material Subsidiary for the accounting period of April 1 to March 31 of the respective years, which are also available on the website of the Company at [www.crizac.com/investors](http://www.crizac.com/investors) any reliance placed by investors on financial statements of our Material Subsidiary with different accounting period may not represent a correct picture of the business and result of operations of our Material Subsidiary.

**41. *Any failure to obtain, renew and maintain requisite statutory and regulatory permits, licenses and approvals for our operations from time to time may adversely affect our business.***

In terms of applicable laws, we require various statutory and regulatory permits, licenses, registrations, certifications, consents and approvals to carry out our business and operations (cumulatively, the **Approvals**). Some of these Approvals are granted for a limited duration and must be periodically renewed. Further, we cannot assure you that such Approvals will be issued or granted to us in a timely manner, or at all. If we do not receive these Approvals or if we are unable to renew the Approvals in a timely manner, or at all, then our business and operations may be adversely affected. For details, see '*Government and Other Approvals*' at page 400.

Moreover, the Approvals are subject to numerous conditions and there can be no assurance that these Approvals will not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Suspension or revocation of the Approvals by the relevant regulatory authority, either on account of non-compliance or otherwise, would impair our Company's operations and, consequently, have an adverse effect on our business, cash flows and financial condition. Our Company may also be liable to monetary penalties and concerned officers in default may be subject to imprisonment.

Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy in the jurisdictions in which we operate, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future. Further, if we are affected, directly or indirectly, by the application or interpretation of any provision of such laws and regulations or any related proceedings or are required to bear any costs in order to comply with such provisions or to defend such proceedings, our business and financial performance may be adversely affected.

**42. *Our Company has in the past entered into related party transactions and may continue to do so in the future and we cannot assure you that we could not have achieved more favourable terms if such transactions had not been entered into with related parties and that such transactions will not have an adverse effect on our financial conditions and result of operations.***

Our Company has engaged in the past, and may engage in the future, in transactions with related parties, *inter alia*, including our Promoters, Key Managerial Personnel, and their relatives on an arm's length basis. Such transactions include remuneration, advances etc.

We cannot assure you that the related parties will not default on the loans or advances or guarantees or securities. While there have been no instances of default of payment from related parties in the past, there can be no assurance that such default will not occur in the future. Further, there can be no assurance that in the event of occurrence of such default, our Company will be able to recover such amount from the related parties. While all such transactions have been conducted on an arm's length basis and contain commercially reasonable terms, we cannot assure you that we could not have achieved more favourable terms had such transactions been entered into with unrelated parties. Such related party transactions may potentially involve conflicts of interest which may be detrimental to our Company and which our Company will endeavour to duly address as and when they may arise. - 43. Regulatory, legislative or self-regulatory developments regarding privacy and data security matters could adversely affect our ability to conduct our business and impact our financial condition. We are subjected to stringent data protection laws, in particular the General Data Protection Regulations of the European Union, and other similar laws in jurisdictions where we operate. Our failure to comply with the provisions of such laws may have an adverse impact on our business operations and our financial conditions.**

Several domestic and international laws and regulations address privacy and the collection, storing, sharing, use, disclosure, and protection of certain types of data. These laws, rules, and regulations evolve frequently, and their scope may continually change, through new legislation, amendments to existing legislation, and changes in enforcement. Changes in laws or regulations relating to privacy, data protection, and information security, particularly any new or modified laws or regulations, or changes to the interpretation or enforcement of such laws or regulations, that require enhanced protection of certain types of data or new obligations with regard to data retention, transfer, or disclosure, could increase our operating expenses and have an adverse impact on our financial condition.

As part of our Company's operations, it is required to comply with the Information Technology Act, 2000 and the rules thereof, which provide for civil and criminal liability including compensation, fines, and imprisonment for various offences. These include offences relating to unauthorized access to computer systems, damaging such systems or modifying their contents without authorization, unauthorized disclosure of confidential information and commission of fraudulent acts through computers. In April 2011, the Ministry of Electronics and Information Technology notified the Information Technology (Reasonable Security Practices and Procedures and Sensitive Personal Data or Information) Rules, 2011

**(IT Personal Data Protection Rules)** under Section 43A of the Information Technology Act, 2000 and again in February 2021 notified the Information Technology (Intermediary Guidelines and Digital Media Ethics Code) Rules, 2021 (**Intermediary Guidelines**) under Section 87 of the Information Technology Act, 2000. The IT Personal Data Protection Rules prescribe directions for the collection, disclosure, transfer, and protection of sensitive personal data. The Digital Personal Data Protection Act, 2023, which was promulgated on August 11, 2023, requires companies that collect and deal with high volumes of personal data to fulfil certain additional obligations such as appointment of a data protection officer for grievance redressal. Our Company may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Our Company's failure to adhere to or successfully protect the privacy of our customers could result in legal liability or impairment to our reputation, which could have a material adverse effect on our business, financial condition and results of operations.

Further, one of the key features of our service offerings is our strong focus on technology which facilitates streamlined communication and enhanced efficiency and accessibility and which can be accessed by the agents to upload all the information about the students onto the platform including basic demographic information, documents for identity proof, marksheets of previous schooling and education and importantly the current preferred destination and course that the student wishes to pursue. This information is then accessed on the platform by the company team experts who have a strong understanding of the global institutions of higher education's preference in terms of their admission criteria. The collection, usage, storage, transmission of personal information has been subjected to strict scrutiny in several jurisdictions where we operate. For instance, the General Data Protection Regulation of the European Union which regulates the collection, control, processing, sharing, disclosure, and other use of personal data in the Europe and United Kingdom.

As demonstrated, our Company operates majorly in Europe in particular, United Kingdom. While our Company has been compliant with the regulatory requirement in relation to storage and usage of personal data, there can be no assurance that our Company will continue to be in compliance with such regulations including the General Data Protection Regulation. Our Company is accordingly required to strictly comply with the provisions of General Data Protection Regulation. Our failure to comply with the standards prescribed under the General Data Protection Regulation may have an adverse impact on our operations in Europe and United Kingdom and affect our business operations and financial conditions.

**44. *Our Company, promoters, directors or our Subsidiaries, may become involved in legal proceedings in the future, which, if determined against them, could have a material adverse effect on our business, cash flows, financial condition and results of operations.***

While our Company, Promoters, Directors, and our Subsidiaries are currently not involved in any legal proceedings, if they become involved in any legal proceedings in the future, then they may be required to devote management and financial resources in the defence or prosecution of such legal proceedings. Should any new developments arise, including a change in Indian law or rulings against us by the appellate courts or tribunals, we may face losses and have to make further provisions in our financial statements, which could increase our expenses and our liabilities. There can be no assurance that any litigation will not be brought against us in the future. Decisions in such proceedings adverse to our interests may have a material adverse effect on our business, cash flows, financial condition, and results of operations. Further, delay in settlement of statutory dues, vendor payments and employee settlement cases may also have an adverse impact on us.

In the event significant claims are determined against us and we are required to pay all or a portion of the disputed amounts, in any such future legal proceedings, then there could be a material adverse effect on our business and profitability. We cannot provide any assurance that these matters will be decided in our favour. Furthermore, we may not be able to quantify all the claims in which we are involved. Even if we are successful in defending such cases, we will be subjected to legal and other costs relating to defending such litigation, and such costs could be substantial. This could adversely affect our business, cash flows, financial condition, and results of operation.

**45. *Our future success will depend on our ability to effectively implement our business and growth strategies failing which our results of operations may be adversely affected.***

The diversification and expansion of our business is primarily driven by the needs of global institutions of higher education, the agents that we work with, as well as the students who are enrolled by such agents. Our success will depend, in large part, on our ability to effectively implement our business and growth strategies. We cannot assure you that we will be able to execute our strategies in a timely manner or within budget estimates or that we will meet the expectations of our clients and other stakeholders. We believe that our business and growth strategies will place significant demands on our senior management and other resources and will require us to develop and improve operational, financial and other internal controls. Any inability to manage our business and growth strategies could adversely affect our business, financial condition and results of operations.

In addition, we believe that our ability to implement our business and growth strategies will also depend on our ability to expand into other global markets. Our inability to maintain our growth or failure to successfully implement our growth strategies within time and cost expectations could have an adverse impact on the results of our operations, our financial condition and our business prospects.

**46. *Inability to maintain adequate internal controls may affect our ability to effectively manage our operations resulting in error or information lapse.***

As we continue to expand, our success depends on our ability to effectively utilise our resources and maintain internal controls. We may need to modify and improve our financial and management control processes, and other internal controls and compliance procedures to meet our evolving business needs. If we are unable to improve our controls, systems and procedures, they may become ineffective and adversely affect our ability to manage our operations resulting in errors or information lapses that affect our business. Our efforts in improving our internal control systems may not result in eliminating all risks. If we are not successful in discovering and eliminating weaknesses in our internal controls, our ability to manage our business effectively may materially and adversely be affected.

**47. *Our Promoters will, even after the completion of the Offer, continue to be our largest Shareholders and can influence the outcome of resolutions, which may potentially involve conflict of interest with the other Shareholders.***

Currently, our Promoters and members of the Promoter Group hold an aggregate of 174,982,500 Equity Shares, constituting 100.00% of the Equity Share capital of our Company and they will continue to hold [●] % of the Equity Share capital after the completion of this Offer. Accordingly, our Promoters and the Promoter Group will have the ability to significantly influence our corporate decision-making process. This will include the ability to appoint Directors on our Board and the right to approve significant actions at the Board and at the Shareholders' meetings, including the issue of Equity Shares and dividend payments, business plans, mergers and acquisitions, any consolidation or joint venture arrangements and any amendment to the constitutional documents. Our Company cannot assure you that the interest of the Promoters in any such scenario will not conflict with the interest of other Shareholders or with our Company's interests. Any such conflict may adversely affect our Company's ability to execute its business strategy or to operate our Company's business effectively or in the best interests of the other Shareholders of our Company.

**48. *We may not be able to secure additional funding in the future. In the event our Company is unable to obtain sufficient funding, it may delay our growth plans and have a material adverse effect on our business, cash flows and financial condition.***

From time to time, our Company's plans may change due to changing circumstances, new business developments, new challenges or investment opportunities or unforeseen contingencies. If our plans change or if we are required to adapt to changing circumstances or business realities, our Company may need to obtain additional financing to meet its financial requirements. Such financing may be in the form of debt funding, which may be raised through borrowings from commercial banks, issue of debentures or other debt securities. If we raise funds in future by incurring debts, the interest and debt repayment obligations of our Company will increase, and we may be subject to covenants, which could limit our ability to access cash flow from operations and, or, other means of financing. Moreover, these additional funds could come at a higher cost which may impact our profitability. Further, we cannot assure you that we will be able to obtain adequate financing to fund future financial requirements on acceptable terms, in time.

**49. *Our Company has not paid dividends in the last 3 Fiscals and during the current Fiscal on restated basis. There can be no assurance that our Company will be in a position to pay dividends in the future.***

While our Company has not declared any dividends during Fiscal 2025, Fiscal 2024, and Fiscal 2023. Further, our Company has not declared any dividends during the period from March 31, 2025 till the date of this Red Herring Prospectus. However, our Company's ability to pay dividends in the future will depend upon a variety of internal and external parameters, including (i) profits earned during the financial year; (ii) retained earnings; (iii) earnings outlook; (iv) present and future capital expenditure plans / working capital requirements of the our Company; (v) past dividend trends; (v) any other relevant factors and material events as may be deemed fit by our Board; (vi) dividend pay-out ratios of companies in the same industry; (vii) macro-economic environment significant changes in macro-economic environment materially affecting the businesses in which our Company is engaged in the geographies in which our Company operates; (viii) capital commitment; and (ix) capital markets changes. Subject to aforementioned factors, our Board shall, in the immediately succeeding 3 financial years propose at least 40% of our Company's standalone net profit as dividend every year. In addition, our ability to pay dividends may be impacted by a number of other factors, including any tax and regulatory changes in the jurisdiction in which our Company operates which significantly affects the business, taxation and other regulatory changes and restrictive covenants under our future loan or financing documents or arrangements, our Company may enter into finance our fund requirements for our business activities from time to time, applicable Indian legal restrictions, our Company's Articles of Association, and other factors considered relevant by the Board of Directors of our Company. Further, our Promoters and Promoter Group will continue to hold a significant portion of our post-Offer paid-up Equity Share capital and may have a significant ability to control the payment and/or the rate of dividends. Therefore, our Company cannot assure you that it will be able to declare dividends, of any particular amount or with any frequency in the future. For further details, see the 'Dividend Policy' at page 250.

**50. *This Red Herring Prospectus contains information from an industry report prepared by F&S which we have commissioned and paid for.***

***External Risk Factors***

**51. *The Equity Shares have never been publicly traded and the Offer may not result in an active or liquid market for the Equity Shares. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Offer Price.***

Prior to the Offer, there has been no public market for the Equity Shares, and an active trading market on the Indian Stock Exchanges may not develop or be sustained after the Offer. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, there will be liquidity of such market for the Equity Shares. The Offer Price of the Equity Shares may bear no relationship to the market price of the Equity Shares after the Offer. The market price of the Equity Shares after the Offer can be volatile as a result of several factors beyond our control, including volatility in the Indian and global securities markets, our results of operations, the performance of our competitors, developments in the Indian and global machine tools industry, changing perceptions in the market about investments in this sector in India, investor

perceptions of our future performance, adverse media reports about us or our sector, changes in the estimates of our performance or recommendations by financial analysts, significant developments in India's economic liberalisation and deregulation policies, and significant developments in India's fiscal regulations. In addition, the Stock Exchanges may experience significant price and volume fluctuations, which may have a material adverse effect on the market price of the Equity Shares. General or industry specific market conditions or stock performance or domestic or international macroeconomic and geopolitical factors unrelated to our performance may also affect the price of the Equity Shares. In particular, the stock market as a whole in the past has experienced extreme price and volume fluctuations that have affected the market price of many companies in ways that may have been unrelated to the companies' operating performances. For these reasons, investors should not rely on recent trends to predict future share prices, results of operations or cash flow and financial condition.

**52. *The requirements of being a publicly listed company may strain our resources.***

We are not a publicly listed company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the SEBI Listing Regulations, which will require us to file audited annual and unaudited quarterly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and, or, we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies. Further, as a publicly listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, our management's attention may be diverted from our business concerns, which may adversely affect our business, prospects, results of operations and financial condition.

**53. *Any further issuance of Equity Shares, or convertible securities or other equity linked instruments by us may dilute your shareholding. Further, sale of Equity Shares by our Promoters in future may adversely affect the market price of the Equity Shares.***

We may be required to finance our growth through future equity offerings. Any future equity issuances by us, including a primary offering of Equity Shares, convertible securities or securities linked to Equity Shares including through exercise of employee stock options, may lead to the dilution of investors' shareholdings in our Company. Any future equity issuances by us or sales of our Equity Shares by the Promoters may adversely affect the trading price of the Equity Shares, which may lead to other adverse consequences including difficulty in raising capital through offering of our Equity Shares or incurring additional debt. In addition, any perception by investors that such issuances or sales might occur may also affect the market price of our Equity Shares. We cannot assure you that we will not issue Equity Shares, convertible securities or securities linked to Equity Shares or that our Shareholders will not dispose of, pledge, or encumber their Equity Shares in the future.

Further, after the completion of the Offer, our Promoters will still own a significant percentage of our issued Equity Shares. Sale of a large number of the Equity Shares by our Promoters could adversely affect the market price of the Equity Shares. Similarly, the perception that any such primary or secondary sale may occur, could adversely affect the market price of the Equity Shares. No assurance may be given that our Promoters will not dispose of, pledge, or encumber their Equity Shares in the future.

**54. *There are restrictions on daily movements in the trading price of the Equity Shares, which may adversely affect a shareholder's ability to sell Equity Shares or the price at which Equity Shares can be sold at a particular point in time.***

Following the Offer, our listed Equity Shares will be subject to a daily "circuit breaker" imposed on listed companies by the Stock Exchanges, which does not allow transactions beyond certain volatility in the trading price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian Stock Exchanges. The percentage limit on the Equity Shares' circuit breaker will be set by the Stock Exchanges based on historical volatility in the price and trading volume of the Equity Shares. The Stock Exchanges are not required to inform our Company of the percentage limit

of the circuit breaker, and they may change the limit without our knowledge. This circuit breaker would effectively limit the upward and downward movements in the trading price of the Equity Shares beyond the circuit breaker limit set by the Stock Exchanges. As a result of this circuit breaker, we cannot give you any assurance regarding the ability of shareholders to sell Equity Shares or the price at which shareholders may be able to sell their Equity Shares.

- 55. *The determination of the Price Band and Offer Price is based on various factors and assumptions and the Offer Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Offer. Further, the current market price of some securities listed pursuant to certain previous issues managed by the BRLM is below the respective issue price.***

The determination of the Price Band is based on various factors and assumptions and will be determined by our Company in consultation with the BRLM. Furthermore, the Offer Price of the Equity Shares will be determined by our Company in consultation with the BRLM through the Book Building Process. These will be based on numerous factors, including factors as described under ‘Basis for the Offer Price’ on page 125 and may not be indicative of the market price for the Equity Shares after the Offer. In addition to the above, the current market price of securities listed pursuant to certain previous initial public offerings managed by the BRLM is below their respective issue price. For further details, see ‘Other Regulatory and Statutory Disclosures – Price information of past issues handled by the BRLM’ on page 414. The factors that could affect the market price of the Equity Shares include, among others, broad market trends, our financial performance and results post-listing, and other factors beyond our control. We cannot assure you that an active market will develop, or sustained trading will take place in the Equity Shares or provide any assurance regarding the price at which the Equity Shares will be traded after listing.

- 56. *There is no guarantee that our Equity Shares will be listed on the BSE and the NSE in a timely manner or at all.***

There is no guarantee that our Equity Shares will be listed on the BSE and the NSE in a timely manner or at all. In accordance with Indian law, permission for listing and trading of our Equity Shares will not be granted until after certain actions have been completed in relation to this Offer and until Allotment of Equity Shares pursuant to this Offer. In accordance with current regulations and circulars issued by SEBI, our Equity Shares are required to be listed on the BSE and the NSE within such time as mandated under UPI Circulars, subject to any change in the prescribed timeline in this regard. However, we cannot assure you that the trading in our Equity Shares will commence in a timely manner or at all. Any failure or delay in obtaining final listing and trading approvals may restrict your ability to dispose of your Equity Shares.

- 57. *You may not be able to immediately sell any of the Equity Shares you subscribe to in this Offer on an Indian Stock Exchange.***

The Equity Shares are proposed to be listed on the Stock Exchanges. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and commence trading, including the crediting of the investor’s demat accounts within the timeline specified under applicable law. Further, in accordance with Indian law, permission for listing and trading of our Equity Shares will not be granted until after certain actions have been completed in relation to this Offer and until Allotment of Equity Shares pursuant to this Offer. The Allotment of Equity Shares in the Offer and the credit of Equity Shares to the investor’s demat account with the relevant depository participant and listing is expected to be completed within the period as may be prescribed under applicable law. Any failure or delay in obtaining the approvals or otherwise commence trading in the Equity Shares would restrict investors’ ability to dispose of their Equity Shares. We cannot assure you that the Equity Shares will be credited to investor’s demat accounts, or that trading in the Equity Shares will commence, within the prescribed time periods or at all, which could restrict your ability to dispose of the Equity Shares.

- 58. *Increasing employee compensation in India may erode some of our competitive advantage and may reduce our profit margins, which may have a material adverse effect on our business, financial condition, cash flows and results of operations.***

Employee compensation in India has historically been significantly lower than employee compensation in the United States and Western Europe for comparably skilled professionals. However, compensation increases in India may erode some of this competitive advantage and may negatively affect our profit margins. Employee compensation in India is increasing at a faster rate than in the United States and Western Europe,

which could result in increased costs relating to managers and other mid-level professionals. We may need to continue to increase the levels of our employee compensation to remain competitive and manage attrition. Compensation increases may have an adverse effect on our business, financial condition, cash flows and results of operations.

**59. *Political, economic or other factors that are beyond our control may have an adverse effect on our business and results of operations.***

While our Company is incorporated in India and our Subsidiaries are incorporated in United Kingdom, and United Arab Emirates respectively, and our operations are based in India, United Kingdom we cater to overseas global institutions of higher education. As a result, we are highly dependent on prevailing economic conditions in India and other economies and our results of operations and cash flows are significantly affected by factors influencing the Indian and global economies.

Other factors that may adversely affect the economy, and hence our results of operations and cash flows, may include:

- a. high rates of inflation in India, United Kingdom, and in countries where such global institutions of higher education are based could increase our costs without proportionately increasing our revenue, and as such decrease our operating margins;
- b. any slowdown in economic growth or financial instability in India, United Kingdom and in countries where such global institutions of higher education are based;
- c. any scarcity of credit or other financing, resulting in an adverse impact on economic conditions and scarcity of financing for our expansions;
- d. prevailing income conditions of global institutions of higher education;
- e. volatility in, and actual or perceived trends in trading activity on, the relevant market's principal stock exchanges;
- f. changes in existing laws and regulations in India, United Kingdom, United Arab Emirates and in countries where such global institutions of higher education are based;
- g. political instability, terrorism or military conflict in the region or globally, including in various neighbouring countries;
- h. occurrence of natural or man-made disasters;
- i. any downgrading of debt rating of India and United Kingdom by a domestic or international rating agency; and
- j. instability in financial markets.

For further details on threats to the growth to the industry, please see '*Industry Overview - Threats & challenges to the growth of the industry*' at page 186.

**60. *Governmental actions and changes in policy could adversely affect our business.***

The Government of India and the State Governments in India have broad powers to affect the Indian economy and our business in numerous ways. Additionally, we operate our business in several countries and any change in policies in such countries such as Canada which has recently announced the ending of fast-track visa program for international students or any other change in Visa norms, may affect our business. Any change in the existing policies of Government of India and, or, State Government, or foreign government policies, or new policies affecting the economy of India or any foreign country, where we operate our business, could adversely affect our business operations. Moreover, we also cannot assure you that the Central Government or State Governments in India, or foreign government in countries where we operate will not implement new

regulations and policies which will require us to obtain additional approvals and licenses from the Government and other regulatory bodies or impose onerous requirements and conditions on our operations. For further details on threats to the growth to the industry, please see '*Industry Overview - Threats & challenges to the growth of the industry*' at page 186. We cannot predict the terms of any new policy, and we cannot assure you that such policy will not be onerous. Such new policy may also adversely affect our business, cash flows, financial condition and prospects.

**61. *We may be affected by competition law in India and any adverse application or interpretation of the Competition Act could adversely affect our business.***

The Competition Act, 2002, of India, as amended (**Competition Act**) regulates practices having an appreciable adverse effect on competition (AAEC) in the relevant market in India. Under the Competition Act, any formal or informal arrangement, understanding or action in concert, which causes or is likely to cause an AAEC is considered void and results in the imposition of substantial penalties. Further, any agreement among competitors which directly or indirectly involves the determination of purchase or sale prices, limits or controls production, shares the market by way of geographical area or number of guests in the relevant market or directly or indirectly results in bid-rigging or collusive bidding is presumed to have an AAEC in the relevant market in India and is considered void. The Competition Act also prohibits abuse of a dominant position by any enterprise. On March 4, 2011, the Government issued and brought into force the combination regulation (merger control) provisions under the Competition Act with effect from June 1, 2011. These provisions require acquisitions of shares, voting rights, assets or control or mergers or amalgamations that cross the prescribed asset and turnover based thresholds to be mandatorily notified to and pre-approved by the Competition Commission of India (CCI). Additionally, on May 11, 2011, the CCI issued Competition Commission of India (Procedure for Transaction of Business Relating to Combinations) Regulations, 2011, as amended, which sets out the mechanism for implementation of the merger control regime in India. The Competition Act aims to, among others, prohibit all agreements and transactions which may have an AAEC in India. Consequently, all agreements entered into by us could be within the purview of the Competition Act. Further, the CCI has extra-territorial powers and can investigate any agreements, abusive conduct or combination occurring outside India if such agreement, conduct or combination has an AAEC in India. However, the impact of the provisions of the Competition Act on the agreements entered into by us cannot be predicted with certainty at this stage. We are currently not a party to an outstanding proceeding, nor have we received any notice in relation to non-compliance with the Competition Act and the agreements entered into by us. However, if we are affected, directly or indirectly, by the application or interpretation of any provision of the Competition Act, or any enforcement proceedings initiated by the CCI, or any adverse publicity that may be generated due to scrutiny or prosecution by the CCI or if any prohibition or substantial penalties are levied under the Competition Act, it would adversely affect our business, results of operations and prospects.

**62. *A downgrade in ratings of India, may affect the trading price of the Equity Shares.***

Our borrowing costs and our access to the debt capital markets depend significantly on the credit ratings of India. India's sovereign rating is Baa3 with a 'stable' outlook (Moody's), BBB- with a 'stable' outlook (S&P) and BBB- with a 'stable' outlook (Fitch). Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing and the interest rates and other commercial terms at which such financing is available, including raising any overseas additional financing. A downgrading of India's credit ratings may occur, for example, upon a change of government tax or fiscal policy, which are outside our control. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

**63. *The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.***

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, fires, explosions, pandemic disease or any other health crisis and man-made disasters, including acts of terrorism and military actions, could result in campus closure or travel bans which will adversely affect our results of operations, cash flows or financial condition. For further details on threats to the growth to the industry, please see '*Industry Overview - Threats & challenges to the growth of the industry*' at page 186. Terrorist attacks and other acts of violence or war may adversely affect the Indian securities markets. In addition, any

deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years, and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

**64. *Significant differences exist between Ind AS and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the Restated Financial Information and the Proforma Consolidated Financial Information prepared and presented in accordance with SEBI ICDR Regulations contained in this Red Herring Prospectus.***

We have not attempted to quantify the impact of U.S. GAAP or any other system of accounting principles on the financial data, prepared and presented in accordance with Ind AS for Fiscal 2025, Fiscal 2024, and Fiscal 2023, included in this Red Herring Prospectus, nor do we provide a reconciliation of our financial statements to those of U.S. GAAP or any other accounting principles. U.S. GAAP differs in significant respects from Ind AS. Accordingly, the degree to which the Restated Financial Information and the Proforma Consolidated Financial Information included in this Red Herring Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Ind AS and SEBI ICDR Regulations. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Red Prospectus should accordingly be limited. Additionally, Ind AS differs in certain respects from IFRS and therefore financial statements prepared under Ind AS may be substantially different from financial statements prepared under IFRS.

**65. *Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.***

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

**66. *Financial difficulty and other problems in certain financial institutions in India could have a material adverse effect on our business, results of operations, future cash flows and financial condition.***

Indian financial system may be affected by financial difficulties faced by all or some of the Indian financial institutions whose commercial soundness may be closely related as a result of credit, trading, clearing or other relationships. This risk, which is sometimes referred to as 'systemic risk', may adversely affect financial intermediaries, such as clearing agencies, banks, securities firms and exchanges. Any such difficulties or instability of the Indian financial system in general could create an adverse market perception about Indian financial institutions and banks and adversely affect our business.

**67. *Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.***

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. The Income Tax Act levies taxes on such long-term capital gains exceeding ₹ 0.1 million arising from sale of equity shares on or after April 1, 2018, while continuing to exempt the unrealized capital gains earned up to January 31, 2018, on such equity shares subject to specific conditions. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of a securities transaction tax (STT), on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Any gain realized on the sale of Equity Shares held for more than 12 months, which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempted from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

**68. *Investors may have difficulty enforcing foreign judgments against us or our management.***

We are incorporated under the laws of India and all our Directors and Key Managerial Personnel reside in India. A majority of our assets, and the assets of our Directors and officers, are also located in India. Where investors wish to enforce foreign judgments in India, they may face difficulties in enforcing such judgments. India is not a party to any international treaty in relation to the recognition or enforcement of foreign judgments. India exercises reciprocal recognition and enforcement of judgments in civil and commercial matters with a limited number of jurisdictions. In order to be enforceable, a judgment obtained in a jurisdiction which India recognises as a reciprocating territory must meet certain requirements of the Code of Civil Procedure, 1908, of India (**Civil Code**). Further, the Civil Code only permits enforcement of monetary decrees not being in the nature of any amounts payable in respect of taxes or, other charges of a like nature or in respect of a fine or other penalty and does not provide for the enforcement of arbitration awards. Judgments or decrees from jurisdictions not recognised as a reciprocating territory by India cannot be enforced or executed in India. Even if a party were to obtain a judgment in such a jurisdiction, it would be required to institute a fresh suit upon the judgment and would not be able to enforce such judgment by proceedings in execution. Further, the party which has obtained such judgment must institute the new proceedings within three years of obtaining the judgement. As a result, you may be unable to: (i) effect service of process outside of India upon us and such other persons or entities; or (ii) enforce in courts outside of India judgments obtained in such courts against us and such other persons or entities. It is unlikely that a court in India would award damages on the same basis as a foreign court if an action is brought in India. Furthermore, it is unlikely that an Indian court would enforce foreign judgments if it viewed the amount of damages awarded as excessive or inconsistent with Indian practice. A party seeking to enforce a foreign judgment in India is required to obtain prior approval from the RBI to repatriate any amount recovered pursuant to the execution of such foreign judgment, and any such amount may be subject to income tax in accordance with applicable laws.

**69. *Financial instability, economic developments and volatility in securities markets in other countries may also cause the price of the Equity Shares to decline.***

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investors' reactions to developments in one country may have adverse effects on the market price of securities of companies located in other countries, including India. For instance, the economic downturn in the U.S. and several European countries during a part of Fiscals 2008 and 2009 adversely affected market prices in the global securities markets, including India. Following the United Kingdom's exit from the European Union (**Brexit**), there still remains significant uncertainty around the impact of Brexit on the general economic conditions in the United Kingdom and the European Union and any consequential impact on global financial markets. In addition, China is one of India's major trading partners and there are rising concerns of a possible slowdown in the Chinese economy as well as a strained relationship with India, which could have an adverse impact on the trade relations between the two countries. Further, the recent collapse of the Silicon Valley Bank also caused economic downturn. Negative economic developments, such as rising fiscal or trade deficits, or a default on national debt, in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy, including the movement of exchange rates and interest rates in India. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity, and the price of the Equity Shares.

**70. *Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely impact the trading price of the Equity Shares.***

Under foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the valuation and reporting requirements specified by the RBI. If a transfer of shares is not in compliance with such requirements and does not fall under any of the exceptions specified by the RBI, then the RBI's prior approval is required. In addition, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities. We cannot assure you that any required approval from the RBI or any other

Government agency can be obtained on any particular terms or at all. For further details, see '*Restrictions on Foreign Ownership of Indian Securities*' on page 451. Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020, issued by the DPIIT and the FEMA Rules, any investment, subscription, purchase or sale of equity instruments by entities, investments under the foreign direct investment route by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country will require prior approval of the Government of India. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/purview, such subsequent change in the beneficial ownership will also require approval of the Government of India. We cannot assure you that any required approval from the RBI or any other governmental agency can be obtained on any particular terms, in a timely manner or at all.

**71. *Our ability to raise foreign capital may be constrained by Indian law.***

As an Indian company, we are subject to exchange controls that regulate borrowing in foreign currencies. Such regulatory restrictions could constrain our ability to obtain financings on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that any required regulatory approvals for borrowing in foreign currencies will be granted to us without onerous conditions, or at all. Limitations on foreign debt may have an adverse effect on our business growth, financial condition, and results of operations.

**72. *If security or industry analysts do not publish research or publish unfavourable or inaccurate research about the business of our Company, the price and trading volume of the Equity Shares may decline.***

The trading market for the Equity Shares may depend, in part, on the research and reports that securities or industry analysts publish about us or our business. We may be unable to sustain coverage by established and, or, prominent securities and industry analysts. If either none or only a limited number of securities or industry analysts maintain coverage of our Company, or if these securities or industry analysts are not widely respected within the general investment community, the trading price for our Equity Shares would be negatively impacted. In the event we obtain securities or industry analyst coverage, if one or more of the analysts downgrade our Equity Shares or publish inaccurate or unfavourable research about our business, our Equity Shares price may decline. If one or more of these analysts cease coverage of our Company or fail to publish reports on us regularly, demand for our Equity Shares could decrease, which might cause the price and trading volume of our Equity Shares to decline.

**73. *Holders of Equity Shares may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby suffer future dilution of their ownership position.***

Under the Companies Act, a company incorporated in India must offer its equity shareholders pre-emptive rights to subscribe and pay for a proportionate number of equity shares to maintain their existing ownership percentages prior to issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the equity shares voting on such resolution. However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. If we elect not to file a registration statement, the new securities may be issued to a custodian, who may sell the securities for your benefit. The value such custodian receives on the sale of any such securities and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interests in our Company may be reduced.

**74. *QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid.***

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Investors can revise their Bids during the Bid/Offer Period and withdraw their Bids until Bid/Offer Closing Date. While our Company is required to complete Allotment pursuant to the Offer within 3 Working Days from the Bid/Offer Closing Date, events affecting the Bidders' decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operation or financial condition may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity

Shares even if such events occur, and such events limit the Bidders' ability to sell the Equity Shares Allotted pursuant to the Offer or cause the trading price of the Equity Shares to decline on listing.

**75. *A third party could be prevented from acquiring control of our Company because of anti-takeover provisions under Indian law.***

As a listed Indian entity, there are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company. Under the SEBI Takeover Regulations, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to its stakeholders, it is possible that such a takeover would not be attempted or consummated because of SEBI Takeover Regulations.

**76. *The Offer Price, market capitalisation to revenue multiple and price to earnings ratio based on the Offer Price of our Company, may not be indicative of the market price of the Equity Shares on listing.***

Our revenue, EBITDA, and profit after tax for Fiscal 2025 was ₹ 8,494.91 million, ₹ 2,128.22 million and ₹ 1,529.33 million, respectively on a restated basis and ₹ 8,494.91 million, ₹ 2,128.22 million, and ₹ 1,529.33 million on proforma basis. Our market capitalisation (based on the Offer Price) to revenue (Fiscal 2025) multiple is [●] times; our market capitalisation (based on the Offer Price) to price to earnings ratio (based on profit after tax for Fiscal 2025) is [●] at the upper end of the Price Band; and our enterprise value to EBITDA ratio (based on EBITDA for Fiscal 2025) is [●].

The Offer Price will be determined by our Company in consultation with BRLMs based on various factors and assumptions. Furthermore, the Offer Price of the Equity Shares will be determined by our Company in consultation with Book Running Lead Manager through the Book Building Process, and will be based on numerous factors, including factors as described under 'Basis for the Offer Price' beginning on page 125 and may not be indicative of the market price for the Equity Shares after the Offer. Accordingly, the Offer Price, multiples and ratio may not be indicative of the market price of the Equity Shares on listing or thereafter. The factors that could affect the market price of the Equity Shares include, among other, broad market trends, our financial performance and results post-listing, and other factors beyond our Company's control. Our Company cannot assure you that an active market will develop, or sustained trading will take place in the Equity Shares or provide any assurance regarding the price at which the Equity Shares will be traded after listing.

**77. *Our Company may be subject to pre-emptive surveillance measures like Additional Surveillance Measure (ASM) and Graded Surveillance Measures (GSM) by the Stock Exchanges in order to enhance market integrity and safeguard the interest of investors, once the Equity Shares of our Company are listed.***

The Equity Shares of our Company may be subject to general market conditions which may include significant price and volume fluctuations, once the Equity Shares of our Company are listed. The price of the Equity Shares may fluctuate after the Offer due to several factors such as volatility in the Indian and global securities market, our performance and profitability, or any other political or economic factor. The occurrence of these factors may lead to the surveillance measures stipulated by SEBI and the Stock Exchanges for placing securities under the GSM or ASM framework being triggered in relation to the Equity Shares. If the Equity Shares are covered under such surveillance measures implemented by SEBI and the Stock Exchanges, we may be subject to certain additional restrictions in relation to trading of the Equity Shares such as limiting trading frequency (for example, trading either allowed once in a week or a month) or freezing of price on upper side of trading which may have an adverse effect on the market price of the Equity Shares or may in general cause disruptions in the development of an active trading market for the Equity Shares.

## ANNEXURE C

### **STATEMENT OF POSSIBLE TAX BENEFITS AVAILABLE TO THE COMPANY'S MATERIAL SUBSIDIARY**

Based on the UK corporation tax computations for the period ended March 31, 2025 for the Companies, the Company has not claimed any tax benefit except the category in which it falls under standard tax rates.

Overview of UK corporation tax regime and common general tax benefits

A UK resident company is subject to tax on its worldwide income, including any capital gains, at the UK corporation tax rate.

UK resident companies with profits in excess of £50,000 are subject to UK corporation tax at rate of 25%, which applied with effect from 1 April 2023. The corporate tax rates are as follows:

Taxable Profits	Tax Rates
Up to GBP 50,000	19 percent
GBP 50,001 to 249,999	25 percent, subject to marginal relief. This is a Tapered rate that gradually increases from 19% to 25%.
GBP 250,000 or more	25 percent

Dividends paid by a UK resident company are not subject to withholding tax in the UK except in respect of property income dividends (PID'S) paid by UK REITs, which are subject to WHT at 20% subject to certain exemptions. Dividends received by UK resident companies are exempt from UK corporation tax if they meet the prescribed conditions, however, one of several criteria must be met, but these are widely drawn (one test, for example, is that the recipient controls the payer).

Payments of interest and royalties between companies within the charge to UK corporation tax are exempt from withholding tax. However, UK domestic law requires a UK payer to withhold income tax of 20% on the payment of interest and royalties to non-residents. Interest paid to a bank in the UK, in respect of a borrowing of less than 1 year (short interest), or in respect of quoted Eurobonds are also exempt from UK withholding tax.

There is an optional exemption for profits of foreign permanent establishments of UK companies. Where the election is in place, any profits or losses incurred by the foreign permanent establishment will be left out of account in computing UK taxable profits. The election is irrevocable. A non-resident company is subject to UK corporation tax on the trading profits of a UK PE and, irrespective of whether there is a UK PE, if the trading profits attributable to a trade of dealing in or developing UK land, as well as profits from a UK property rental business.

Assets qualifying for capital allowances can be depreciated for UK tax purposes on a reducing balance basis at a rate of 18% per annum for main pool assets; or 6% per annum for special rate pool assets and a tax deduction claimed against current year profits. A Structures and Buildings Allowance ("SBA") is available at 3% of qualifying expenditure on structures and buildings used for qualifying activities. Companies can also claim the Annual Investment Allowance ("AIA") in respect of capital expenditure incurred on qualifying assets. Each corporate group (or groups under common control) is entitled to an AIA of £1m per annum. This allows a 100% first year deduction of the qualifying capital expenditure to be taken in the year the capital expenditure is incurred. From 1 April 2021 to 31 March 2023, a "super-deduction" is available which allows companies within the charge to corporation tax to deduct 130% of expenditure on qualifying plant and machinery that would otherwise attract writing-down allowances at the main pool rate of 18% a year. The "SR allowance" allows companies to deduct 50% of the expenditure on qualifying plant and the remaining 50% of the cost can be claimed through capital allowances over future years, as per the standard rules currently at 6% annually. From 1 April 2023, until the end of March 2026 'full capital expensing' offers 100% first-year relief to companies on qualifying new main rate plant and machinery investments.

UK transfer pricing legislation requires all transactions between connected parties must be conducted on an arm's length basis for tax purposes. This applies equally whether the transactions are between UK and non-UK parties, or parties who are both resident in the UK. Where this is not the case and a potential UK tax advantage arises for one or both parties, HMRC can impose an adjustment for tax purposes that brings the transaction into a position that they deem to be arm's length. However, if a company / group falls within the definition of a SME for UK

transfer pricing purposes, they are exempt from the requirement to comply with the UK transfer pricing legislation, subject to a notice being issued by HMRC in the case of a medium sized enterprise. Though there is a specific SME definition for transfer pricing documentation purposes (literally translated, the definition refers to “smaller enterprises”). For these purposes, only the amount of cross-border transactions with related parties is considered.

UK resident companies are restricted on the amount of tax relief they can claim on finance interest expenditure for a given year. The Corporate Interest Restriction is an EBITDA-based restriction on the deductibility of interest for periods of account beginning on or after 1 April 2017. There is a de minimis exception for groups that have net interest expense of less than GBP 2 million falling within the scope of corporation tax per year. Any disallowed finance expense can be carried forward and can potentially be utilised in a future period.

Any loss incurred by UK resident companies should first be set-off against the taxable profits (including capital gains) of the same year to the extent possible, and the remaining loss can then be carried back against any taxable profits of the previous accounting period (only going back 1 year).

Losses incurred which have not been utilised in the current year or carried back 1 year or could then be carried forward and utilised against future taxable profits, subject to some restrictions depending on the type of income. However, the utilisation of brought forward losses is subject to a maximum of GBP 5 million per annum (the deductions allowance), after which only 50% of the taxable profits can be offset by brought forward tax losses.

Capital gains are treated as part of business income and are chargeable to tax at the corporation tax rate. UK resident companies can join up to a maximum of one capital gains group. To be part of a capital gains group a company must be beneficially owned and under at least 75% of control of another company and indirect subsidiaries must be beneficially owned with at least a 50% interest. Companies within capital gains groups can transfer capital assets between the companies at nil gain nil loss.

#### UK Value Added Tax (“VAT”)

UK VAT is charged on any supply of goods or services, other than an exempt supply, made in the UK by a taxable person in the course of business.

A taxable person is a person who is registered, or required to be registered, for VAT purposes.

Type of supply	VAT rate
Standard rated	20 percent
Reduced rated	5 percent
Zero rated	0 percent
Exempt	Not within the charge to VAT

VAT on costs incurred in making a VAT-able supply can be recovered, while VAT incurred in making an exempt supply cannot.

## Définitions

Different levels of education defined as follows :

### UNESCO Definition:

UNESCO defines secondary education as one which exists between primary education and higher education. Students enter secondary education as children and depart as young adults at the age of 17 or 18, ready to enter university. In most Asia-Pacific countries, secondary education lasts six or seven years. It is usually divided into lower secondary and upper secondary.

Other definitions have secondary education as the second stage in formal education, beginning about age 11 to 13 and ending usually at age 15 to 18.

UNESCO defines higher education as all types of education at the post-secondary level, including academic, professional, technical, artistic, pedagogical, and long distance learning. It also includes training and research guidance at institutions such as universities that are authorized as higher education institutions by state authorities.

UNESCO defines tertiary education as education that takes place after secondary school, and is also known as "third level" education. It includes academic education, advanced vocational education, and higher vocational education.

## 1. Global Economic Outlook

The year 2024 witnessed the global economy stabilize after the shocks of the early 2020s, but growth remained steady yet underwhelming. Global GDP expanded by an estimated 3.3% in 2024, which is below the long-term average (3.7% for 2000–2019) and reflects a middling performance across regions. Advanced economies grew around 1.8% on average in 2024, while emerging market and developing economies grew about 4.3%. This modest global expansion occurred alongside a gradual cooling of inflation and ongoing geopolitical and environmental challenges:

**Inflation:** After peaking in 2022–23, inflation pressures eased somewhat in 2024. Global headline inflation fell to an estimated 5.7% (from over 8% in 2022), though it remained above central bank targets in many countries. Advanced economies saw inflation retreat toward single digits – on track to reach ~2% by 2026 – while many emerging economies still faced inflation near mid-single digits. Notably, the United States and United Kingdom encountered stickier price pressures, with their 2025 inflation forecasts revised upward by 1.0 and 0.7 percentage points respectively (partly due to wage growth and energy/regulatory price shocks). In contrast, China’s inflation stayed surprisingly subdued after a series of downside surprises, reflecting weak domestic demand.

**Geopolitical factors:** The ongoing Russia–Ukraine war continued to disrupt commodity markets and European energy supplies. Although Europe adapted to reduced Russian gas flows, a colder-than-expected 2024/25 winter drove up gas demand/prices. Food commodity prices fluctuated with war-related supply uncertainties – for example, wheat prices hit historic highs in early 2025 amid weather and conflict concerns. Beyond Ukraine, new conflicts added uncertainty: late 2024 saw a flare-up in the Middle East (e.g. the Israel–Gaza crisis) that unsettled markets and threatened regional trade. Heightened U.S.–China strategic tensions also loomed over 2024, manifesting in export controls and investment restrictions alongside the brewing tariff dispute (discussed below). These geopolitical flashpoints eroded business confidence and prompted some investors to seek safe havens.

**Environmental factors:** Climate and environmental events left an economic mark in 2024. In Europe, severe floods in late 2024 disrupted activity in some regions but prompted reconstruction spending that actually boosted growth in early 2025 (as seen in Spain). Meanwhile, extreme weather influenced commodity markets: harsh winter weather spiked energy usage, and droughts or heatwaves impacted crop yields, contributing to rising beverage and cereal prices by early 2025. These climate-related shocks have raised food security concerns in vulnerable countries. The IMF cautioned that intensifying climate disasters could further worsen living conditions and heighten inflation volatility, especially in low-income economies. The global higher education landscape had been greatly affected by COVID-19, leading to disruptions like border closures and a transition to online learning. This prompted numerous international students to reconsider or delay their plans to study abroad, impacting institutions that heavily depend on foreign student fees. Despite these challenges, there is an anticipated increase in the demand for international education. This offers higher education institutions and governments a chance to reevaluate their strategies, requiring adjustments in policies and programs to adapt to the changing circumstances.

### 1.1. Global GDP Growth

The global macroeconomic outlook reflects a complex interplay of growth opportunities, inflationary pressures, geopolitical uncertainties, and shifting monetary policies.

The global economy is navigating a delicate balance between slowing growth and persistent inflation, with regional disparities becoming more pronounced. Geopolitical risks and energy market volatility remain key concerns, but opportunities in technology and sustainability offer potential for future resilience. Policymakers will need to carefully navigate these challenges to ensure a stable economic outlook.

The IMF’s recent ‘World Economic Outlook’ published in April 2025 presents a sobering forecast for global growth. Under the report’s “reference forecast” (which incorporates known tariff actions as of April 4, 2025), world economic growth is projected to fall to 2.8% in 2025 from 3.3% in 2024. This represents a significant downgrade from prior forecasts and reflects the multifaceted headwinds confronting the economy.

## 1.2. GDP growth rate of Key Select Economies, Global, 2022 - 2026

Various geopolitical challenges pose significant hurdles for global economies, encompassing the enduring Russia-Ukraine conflict, the Israel-Palestine dispute, heightened tensions between China and Taiwan, climate-induced catastrophes, and the rise of unpredictable and progressively protectionist trade measures. These strains reverberate across economies, manifested through inflationary pressures leading to subsequent interest rate adjustments, disruptions in supply chains, spikes in energy prices, and a buoyant labor market.

Countries such as India and China are expected to witness the highest growth owing to the economic resurgence backed by the services and manufacturing sector respectively.

The economic data spanning reflects a spectrum of trends across nations. Australia experienced a recovery with a deceleration in growth by 2023. Brazil rebounded from a pronounced contraction in 2020. India, following a substantial 2020 contraction, displayed a robust recovery. Ireland's growth, significant in 2021, saw a moderation in 2022 and a further decline in 2023. The United Kingdom grappled with a significant contraction in 2020, witnessing minimal growth by 2023. The United States rebounded in 2021 but exhibited moderated growth in 2022 and 2023, underscoring the intricate impact of the COVID-19 pandemic and subsequent economic recoveries.

### 1.3. Key Macroeconomic Trends Affecting Consumer Spending Globally

**Rising Young Population:** The expanding demography of young individuals has a propensity for financial prudence as they face constraints on their income. However, projections indicate that their substantial population size (a population of 1.24 billion in 2023 in the age group of 15-24 years rising to 1.33 billion by 2030) and

individual spending levels are anticipated to undergo substantial growth by 2030. The substantial demographic of young individuals, numbering 1.2 billion globally, presents opportunities for both labor supply and consumer demand.

**Growing Middle Class:** The rise of an ambitious and progressively discriminating middle class in many countries across the globe represents a highly noteworthy social and demographic phenomenon in the 21st century.

**Growing Disposable Income:** The increase in global per capita income, particularly in emerging economies, has led to a significant rise in consumer demand. According to estimates, the rate of disposable income in these countries is projected to exceed that of developed nations in the next decade. From 2019 to 2030, the number of households in developing countries with an annual disposable income in the range of USD 45,000 to USD 100,000 (PPP) is projected to increase by 5.6% per year on an average. This growth significantly surpasses the anticipated average annual growth of 1.2% for the overall number of households.

**Increase in Discretionary Spending:** The contribution of discretionary spending to economic growth is substantial, since it plays a crucial role in stimulating consumer spending, which constitutes around 40% of the global economy. Despite uncertainties around growing interest rates and inflation, global discretionary spending appears to increase in recent years.

#### 1.4. Disposable income worldwide is on the upswing

**Exhibit 3: Worldwide disposable income - per capita. (In thousands USD)**

\* Forecasted

Source: Statista Market Insights, World Bank, OECD, Eurostat, World Bank PovcalNet, WID - World Inequality Database

The information illustrates a steady rise in disposable income between 2019 and 2029, climbing from USD 8.1 to 12 thousand. Although there are variations in annual fluctuations, the general trajectory. Disposable income significantly influences the extent to which individuals and households can allocate funds for education-related expenses. This residual income, calculated after deducting taxes and mandatory deductions, is earmarked for discretionary spending, including educational costs.

**Exhibit 4: Disposable income - per capita. (In thousands USD) for China, India & Pakistan**

Source: Statista Market Insights, World Bank, OECD, Eurostat, World Bank PovcalNet, WID - World Inequality Database

India and China figure as the top source countries for students moving abroad for higher education, and both these countries are expected to witness a tremendous uptick in their disposable income. India is expected to increase its per capita disposable income from USD 2.63 thousand in 2023 to USD 4.33 thousand by 2029 at a CAGR of 8.7%, while for China its expected to increase from USD 5.72 thousand in 2023 to USD 8.21 thousand by 2029.

The demand for affordable and accessible international education is on the rise in India, fueled by the expanding middle class and limited domestic options. The United States has once again become the preferred destination for Indian students, closely followed by Canada, owing to factors like high-quality education and promising career opportunities. Germany has also emerged as a promising education hub, offering scholarships and post-study benefits. The United Kingdom has also emerged as a highly sought-after destination for international education as it sets high academic standards and is home to some of the world's best universities.

As much as 57 per cent of the Indian middle-class population (with an annual household income of INR 3 Lakhs – 10 Lakhs) is inclined to study abroad, per a recent industry survey

## 1.5. India: World's Fastest Growing Economy

India's GDP growth was 6.5% in 2024 and is forecasted at 6.2% in fiscal year 2025 and 6.3% in fiscal 2026 because pent-up demand accumulated during the pandemic has been exhausted. For Fiscal year 2027 onwards the annual growth rate is forecasted to be at 6.5%.

### 1.5.1. Demographic Trends in India - Rising Middle-Class Income Levels

Over the next ten years, India's middle-class demographic is expected to expand, contributing to increased consumer demand and expenditure. By 2030, it is projected that the upper and lower middle classes will make up approximately 43.5% (up from 20.8% in 2018) and 34.2% (up from 33.1% in 2018) of the population, respectively. With the growth in disposable income, discretionary spending is anticipated to surge, leading to an uptick in transactions, cash volume, and related economic activities.

### Increase in Working-Age Population

India's working-age population is forecasted to increase from CY 2018 to CY 2030, driven by its demographic shift with a sizable youth population. With 12 million individuals added annually to the workforce, the share of the working-age population is expected to rise from 66.77% to 68.4% by CY 2030.

## 1.6. Increasing Enrolment Ratio in Higher Education Globally

**Exhibit 8: Global higher education enrolments, (1970 – 2030), Millions**

Student enrollments globally in higher education has become 8X over the period of 1970 - 2022

**2.5X**

Student enrollments globally in higher education has become 2.5X over the period of 2000 - 2022

Global higher education enrolment reflects both the aspirations of individuals seeking advanced learning opportunities and the broader socio-economic and geopolitical trends shaping educational landscapes. There has been a remarkable surge in higher education enrolment over recent decades, from about 33 million in 1970 to 254 million in 2022. This has been driven by various factors including increasing demand for skilled labor in the knowledge economy, advancements in technology facilitating access to education, and efforts to achieve higher levels of educational attainment globally. This expansion has been particularly pronounced in emerging economies where rising middle-class populations are seeking to improve their prospects through education.

**Exhibit 9: Secondary & Tertiary Enrollment rates (%)**

Gross enrolment ratio has been defined as number of children of any age group who are enrolled in secondary / tertiary education expressed as a percentage of the total population of the official secondary / tertiary school age.

Definitions: UNESCO defines secondary education as one which exists between primary education and higher education. Students enter secondary education as children and depart as young adult at the age of 17 or 18, ready to enter university. In most Asia-Pacific countries, secondary education lasts six or seven years. It is usually divided into lower secondary and upper secondary.

Other definitions have secondary education as the second stage in formal education, beginning about age 11 to 13 and ending usually at age 15 to 18.

UNESCO defines tertiary education as formal education that builds on secondary education and provides learning activities in specialized fields of education. It aims at learning at a high level of complexity and specialization. Tertiary education includes academic education and advanced vocational or professional education.

Measured by Gross Enrolment Ratio (GER), global participation in tertiary education doubled from 19% to 40% between 2000 and 2020. The largest expansion took place in South and West Asia and East Asia and the Pacific where the numbers of students grew by more than 200% and 280% respectively. As of 2020, Central and Eastern Europe have surpassed North America and Western Europe, the region with historically the highest participation ratio in tertiary education. With gross enrolment ratio of 87% and 81% respectively, these two regions remain the global leaders despite considerable progress in other regions.

Countries like India, Brazil, China, Pakistan and Vietnam witnessed a manifold increase in gross enrolment ratio in tertiary education. While India witnessed an increase in the same from 5% in 1980 to 34% in 2024, the same for Brazil was 11% in 1980 and 60% in 2022. China witnessed an outstanding transformation as well with its enrolment ratio increasing from as low as 1% in 1980 to 75% in 2023. Vietnam is another success story with an enrolment ratio of 45% in 2022, up from 2% in 1980.

## 2. Global Education Economy Overview

The overseas education market has experienced significant growth in recent years, driven by several factors. Increasing globalization, coupled with the pursuit of quality education and international exposure, has led to a surge in demand for studying abroad. Students and parents are increasingly recognizing the value of acquiring a global perspective, accessing world-class educational institutions, and experiencing diverse cultures.

The global education market, valued at approximately USD 6 trillion in 2024, is projected to expand to around \$7.4 trillion by 2030. This includes the segments of Pre-K, K-12 and Higher education.

Higher education (post K-12 education at universities, colleges etc.) stands as one of the largest segment within this education market, presenting substantial growth prospects. The segment is expected to reach a spending level of USD 2.4 trillion by 2030, increasing from USD 1.9 trillion in 2024.

**Exhibit 10: Global Education sector Market Size, FY2024-2030 (USD Trillion)**

Source: Frost & Sullivan analysis

**Investment in Education:** Over \$6.2 trillion is spent every year on education and training worldwide by governments, businesses, families, and individuals. Common international benchmarks on education spending range from almost 4% - 6% of GDP or 15% - 20% of public budgets).

### 2.1. Spend on Foreign / Overseas Education Globally

A substantial portion of the global education economy is made up of the money spent on studying abroad.

The cost of studying abroad has been steadily increasing over the years, driven by factors such as inflation, currency fluctuations, rising tuition fees at foreign institutions, and increasing living expenses in popular study destinations.

The growth in international tertiary education enrolment has been phenomenal. From close to 2 million students travelling each year to study overseas to about 6.7 million in 2023, the growth has been unprecedented.

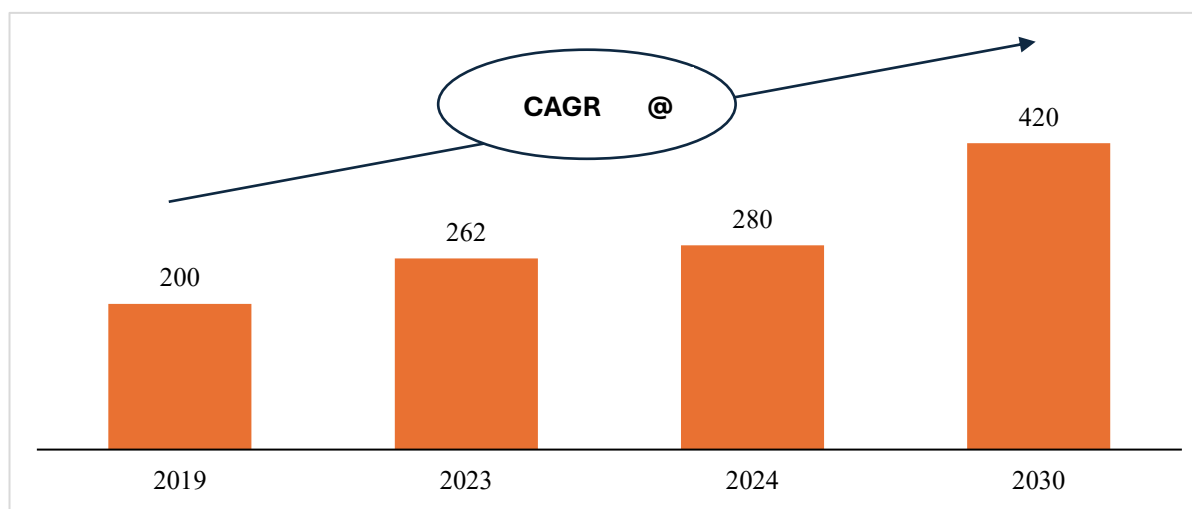

There has been a corresponding increase in direct annual expenditure as well by these students going abroad for higher studies. While the total spend by students abroad was estimated to USD 200 BN by 2019, the same is estimated to grow to USD 262 BN by 2023 and USD 420 BN by 2030 growing at a CAGR of 7% (2023-2030).

While international education has consistently faced adversity, with COVID-19 standing out as the most significant disruption to date, it has exhibited remarkable resilience, buoyed by the unwavering demand from countless undergraduate, and postgraduate students worldwide who aspire to pursue studies abroad and beyond their native shores.

**Student Enrollment:** It is anticipated that by 2030, there will be over 8 million enrolled internationally mobile students, up from 6 million in 2019. The hike in total annual spending will be somewhat attributed to this increase in enrollments.

**Regional Demand:** It is anticipated that Asia and Africa will have the highest demand for international education. Approximately 80 per cent of the world's population is expected to reside on both continents between 2060 and 2070.

Total Indian students pursuing higher education abroad totalled around 7,70,000 in 2019, increasing to about an estimated 14,80,000 by 2023. The total number of Indian students studying abroad is expected to reach 25,00,000 by 2030 growing at a CAGR of 7.8% (2023-2030). US, UK, Australia and Canada are the top destinations Indian students flock to for higher studies.

The growing number of students seeking to study abroad significantly benefits companies involved in recruiting candidates for foreign universities. As demand for international education rises, these companies experience increased business opportunities, expanding their reach and services to meet the needs of a diverse student population. They benefit from higher enrollment numbers, partnerships with global institutions, and a broader client base. Additionally, these companies can offer specialized services such as visa assistance, academic counseling, and career guidance, positioning themselves as essential intermediaries in the education sector and driving their overall growth.

Crizac is one such B2B education platform for agents and global institutions of higher education offering international student recruitment solutions to global institutions of higher education in United Kingdom, Canada, Republic of Ireland, Australia and New Zealand (ANZ). The company is well placed to capture this market given its wide network of partner universities. Student recruitment solutions from India into the United Kingdom is Crizac's strength as a result of its strong relationships built over time with global institutions of higher education in the United Kingdom.

While the total number of students who flock to foreign shores increase year on year, there's a corresponding increase expected in total direct student expenditure as well, which has increased to an estimated USD 61 billion in 2023 from USD 29 billion in 2019. The expenditure is further expected to increase to USD 125 billion by 2030, becoming 2X the spend in 2023.

Expenditure for overseas education is a significant investment and encompasses various costs including tuition fees, living expenses, travel expenses, accommodation, insurance, and other miscellaneous expenses.

The cost of overseas education vary significantly depending on the destination country and the chosen institution. For example, studying in Western countries like the United States, United Kingdom, Canada, or Australia generally tends to be more expensive compared to studying in other regions.

Tuition fee is the most significant component (with a total of about 40 – 45% of expenditure allocated to it) of expenditure for students going abroad for studies. The tuition fee for a postgraduate program could vary from as

low as USD 10k per year to USD 70k per year in some of the top destination countries like the United States and United Kingdom depending on the course selected. The tuition fee is on the higher side for these top destination countries of USA, UK and Australia, whereas for some of the other countries like Spain, France and Germany, its significantly lower.

There has been a remarkable shift in international education over the past two decades. While the total number of international students has increased at a CAGR of 5.3% from 2 million in 2000, to an estimated fourfold 6.9 million in 2024, the share of top 5 host destinations for international students has come down from 69% in 2000 to 52% in 2024.

This growth has not only expanded the overall volume of international students worldwide but has also diversified the host countries.

While USA, UK, France and Australia continue to be in the top 5 host destinations for international students, Canada has replaced Germany in the top 5 with an estimated 12% of market share in 2024, up from only 2% in 2000.

The USA remains a top destination for international students due to its world-class universities, diverse academic programs, and cutting-edge research opportunities. Students benefit from innovative teaching methods, hands-on industry collaborations, and access to advanced technology. Post-study work options like Optional Practical Training (OPT) and the H-1B visa enhance employability, while the country's multicultural environment and strong support services help students adapt. OPT is temporary employment that is directly related to an F-1 student's major area of study. Eligible students can apply to receive up to 12 months of OPT employment authorization before completing their academic studies (pre-completion) or after completing their academic studies (post-completion).

US degrees are globally recognized, and universities offer flexibility in academics, vibrant campus life, and professional development. Financial aid, entrepreneurial resources, and access to global networks further enhance the appeal of studying in the USA. While, the United States has a vast academic landscape with more than 3000 universities, these institutions also stand for academic excellence as the country has close to 200 universities in the Top 1500 of '2025 QS World University Rankings'.

While the overall international education market is estimated to be USD 262 Bn in 2023, bulk of the spend will happen in these top destination countries of USA, UK, Canada and Australia. Almost USD 140+ Bn is estimated to be spent in these top destinations. International students are estimated to have spent around USD 53 Bn for higher education in USA in the year 2023, while the same for UK is USD 36 BN. For Canada and Australia the estimated spend is USD 33 Bn and USD 18 Bn respectively.

While the top 5 destinations accounted for 50% of the total international students in 2023, new destinations are emerging as destination of choice for students pursuing higher education abroad. Philippines, as a host destination has witnessed a growth of 226% in the 2020-2023 period. Canada continues to foster its position as one of the top destination for higher education, with a growth of 31% in the 2020-2023 period. Even United Kingdom has witnessed a 30% growth over this period further cementing its position as one of the top destination for higher education globally.

### 2.3. Market drivers, restraints, and opportunities influencing the Global Foreign education industry

**Market Drivers: Overseas / international education is driven by several key factors:**

**World class universities imparting quality education** is the biggest driver for students pursuing education abroad. More students seek to attend esteemed international universities as the importance of high-quality education is acknowledged on a global scale. This is especially true in developing nations, where local universities might not be able to keep up with the rising demand for top-notch education.

**Prosperity and career opportunities:** As international education opens up global career opportunities and enhance employability prospects

**A rise in disposable income** has been attributed to economic progress in many emerging nations. The need for overseas education is growing as more families are willing to pay for their kids' education.

**Specialized courses:** Students flock to foreign universities for courses in special fields that may not be available in their home countries.

**Government policies and financial aid:** In order to provide students a global exposure, several governments have established policies that encourage them to study abroad. Scholarships and financial help are frequently included in these plans for students who want to study overseas. More students may choose to pursue their education abroad if scholarships and financial help are available. The accessibility and affordability of international education may increase with these financial aids.

Besides, many students also look at it as a pathway to immigration and look for it as a steppingstone for obtaining citizenship.

**Market constraints: Several market constraints affect the expansion of the global foreign education sector.**

For many students, **high tuition costs** can be a significant barrier to receiving an education abroad. This is especially true for students from underdeveloped nations or low-income families, for whom attending college abroad may be unaffordable.

The expansion of international education sector may also be hampered by **regulatory obstacles** in certain nations. These can include limitations on student visas, prerequisites for accreditation, and further legal obstacles.

Further, the development can also be impacted by **geopolitical events**, such as modifications to immigration laws and student mobility. Stricter immigration laws, for instance, might discourage foreign students from enrolling in universities in particular nations.

**Language proficiency requirements and cultural differences** can pose challenges for international students, affecting their academic performance, social integration, and overall experience abroad.

These limitations have the power to influence the choices made by legislators, educators, and students as well as to mold the direction of the international education sector.

### 2.4. Growing enrollment/admission of international students in universities in UK, USA, Canada, Ireland, Australia, and New Zealand at Undergrad and Post Graduate level

In recent years, there has been a notable increase in the number of overseas students enrolled in institutions in the UK, USA, Canada, Ireland, Australia, and New Zealand.

**United Kingdom-** Reaching the 600,000-objective set by the UK government's International Education Strategy over ten years ahead of schedule, the UK welcomed 7,18,085 international students in the 2022–23 academic year.

**USA:** Over a million overseas students were enrolled in US universities during the 2022–2023 academic year, surpassing pre-pandemic levels. There were 467,027 foreign graduate students and 347,602 international undergraduate students enrolled in courses.

**Canada:** Close to 6,60,230 international students enrolled in higher education courses in Canada during the 2022–2023 academic year. The country attracted the maximum students from the countries of India, China, Philippines, France and Nigeria.

**Ireland-** Ireland admitted 23,196 international students in 2022–23. Ireland's welcoming policies and excellent educational systems make it a popular choice for overseas students.

**Australia-** In Australia, 24% of all higher education enrolments in 2022-23 were from overseas while the same increased to a whopping 44% in 2023-2024. Close to 3,61,247 international students enrolled in higher education courses in Australia during the 2022–2023 academic year and the same increased to 4,37,485 in the 2023-2024 academic year. The country attracted the maximum students from the countries of China, India, Nepal, Vietnam and Hong Kong.

**New Zealand:** Close to 24,515 international students enrolled in higher education courses in New Zealand during the 2022–2023 academic year and this increased to 36,560 during the next academic year 2023-2024. The country attracted the maximum students from the countries of China, India, Vietnam, South Korea and Malaysia.

### 3. Indian Education System

India boasts one of the world's largest higher education systems, enrolling over 70 million students, with an additional capacity for 40 million created in the last two decades. In FY 2020, the Indian education sector was valued at around US\$117 billion. Projections anticipate its growth to \$225 billion by FY 2025 and US\$ 313 by FY2030. The National Education Policy 2020 spurred significant progress in India's education sector in 2023. Reforms included multiple entry and exit options for higher education, flexible credit systems, and diverse multidisciplinary courses. The introduction of the Common Universities Entrance Test standardized college admissions nationally. States also increased inclusivity by offering engineering and medical courses in regional languages.

**Consistent Growth from 2017 to 2019:** There is a continual rise in the number of Indian students pursuing education abroad from 2017 to 2019. This trend signifies steady growth, reflecting an increasing inclination among Indian students towards seeking higher education opportunities overseas during this timeframe.

**Significant Decline in 2020:** The year 2020 witnessed a marked decrease in the number of Indian students studying abroad. This notable drop can be attributed to multiple factors, including the global COVID-19 pandemic, imposed travel restrictions, and disruptions in international educational activities caused by the pandemic.

**Substantial Increase in number of Indian students pursuing higher education abroad:** The data for 2022 and forecast until 2030 indicates a significant surge in the number of Indian students studying abroad. This upswing may suggest a recovery from the pandemic's impact as restrictions eased and international education opportunities resumed. Alternatively, it could be indicative of other factors such as enhanced accessibility to educational avenues abroad or alterations in government policies.

Overall, the data portrays a dynamic scenario regarding the number of Indian students opting for international education, shaped by a multitude of factors including economic circumstances, geopolitical dynamics, available educational prospects, and global occurrences like the COVID-19 pandemic.

## 4. UK Education Industry Overview

The education industry in the United Kingdom is a vast sector comprising several establishments and enterprises. With 26,105 enterprises, London is the most popular location for education companies, while Northern Ireland has the fewest, with just 1,046.

It is anticipated that the UK will remain at the forefront of the global education scene until 2025 and beyond. There is a growing demand for income diversification as it will be essential to mitigate financing constraints through the creation of new revenue streams. Institutions will have to concentrate their funding on technology, enhancing the student experience, and strengthening environmental, social, and governance (ESG) aspects. Apart from the US, the UK continues to have the highest number of universities ranked in the top 100 and the highest number of international students worldwide. All educational providers may find themselves considering additional ways to increase revenue and profit margins through new business ventures and by drawing in more international students.

### 4.1. Size and Growth of UK Education Industry

The education sector in the UK had a notable expansion between FY 2020 and FY 2024. The industry is predicted to generate more than USD 60 billion in revenues in 2024 and 2025. In 2022–2023, the UK government allocated 4.2% of its GDP on education while the same for 2023–2024 remained at 4.1%. The entire amount spent by the UK government on education in the country rose from 109.6 billion pounds in 2022–2023 to 115.8 billion pounds in 2023–2024..

It is anticipated that the UK education sector would keep expanding in FY 2025. Being the second most popular study destination worldwide, the UK Higher Education sector enjoys a well-established international reputation for its world-class academic education and research.

**Exhibit 45: Public sector expenditure on higher education in the United Kingdom (billion GBP)**

Source(s): GOV.UK; HM Treasury; House of Commons

Government spending on higher education in the United Kingdom was GBP 7.16 billion in 2023/24, compared to 4.56 billion in the previous financial year.

Almost, 79% of education spending went on schools -primary and secondary education. The relatively low share going on higher education is also because of the subsidy element of student loans which forms a large majority of higher education spending in England. There is a shift from direct funding to loans in England.

Further, there was a cap of £9,000 tuition fee introduced for domestic students in UK in 2012, which increased to £9,250 five years later. With the UK economy reeling under a rise in inflation, driving up the operating costs and salaries, in real-terms the value of domestic tuition fees has further come down. Universities face a shortfall on every home undergraduate student now, each academic year, which is bound to keep increasing.

In such a situation, universities in UK have become increasingly dependent on international students, who pay about double the domestic fees, and now account for a significant proportion of universities' income.

**Higher Education:** Over the next few years, there will likely be a major growth in demand for higher education in the UK. A crucial group for higher education, those between the ages of 18 and 25, is predicted to become less numerous starting in 2030. Nonetheless, the demand for higher education is significantly influenced by the participation rate. The number of people pursuing higher education has been steadily increasing in England, Scotland, and Northern Ireland in recent years. These numbers would sharply rise in England if the anticipated

increases in participation are taken into account, resulting in a requirement for about 358,000 additional student spots.

**International Students:** Almost ten years ahead of schedule, the UK has enrolled 600,000 more international students than it had planned for 2030. In 2020–21, there were little over 605,000 foreign students enrolled at UK universities. This rising tendency is noteworthy since it coincides with both the COVID-19 epidemic and the UK's exit from the European Union. In 2021, the UK issued a record number of student visas, largely due to expansion in non-EU markets. This suggests that international students are still drawn to higher education in the UK.

## 4.2. University Landscape (No. of Universities, Average no. of courses offered etc.)

**Number of Universities:** 303 higher education institutions in the UK provided data to the Higher Education Statistics Agency (HESA) as of 2023-24. Universities and other providers of higher education fall under this category.

**Enrollment:** During the 2023–2024 academic year, there were more than 2.9 million students enrolled in UK higher education programs. This was the most students enrolled in this time frame that was offered.

**Intakes :** There are typically three admission cycles in the UK - September Intake/Fall Intake, January Intake/Winter Intake and May Intake/Spring Intake

**Courses provided:** Depending on the size and emphasis of the university, different courses are provided at different numbers. For example, with 587,165 enrolments in the 2023/24 academic year, business and management studies was the most popular subject category.

**Future Goals:** Some universities want to rank among the top 100 young universities worldwide and among the best modern universities in the UK by 2030. They want to become one of the UK's top civic universities, significantly expand their global reach and reputation, lead in environmental sustainability and become climate positive, meet changing demand and broaden participation, deliver globally recognized research and creative solutions that improve society, and immerse every student in a life-changing educational experience.

#### 4.3. Share of international students in undergraduate and postgraduate courses.

22% of all students in higher education in the United Kingdom were students from abroad in 2022-23. This suggests that there is a sizable number of foreign students enrolled in undergraduate programs, which adds to the diversity and global viewpoint of these courses.

In 2020–21, the UK accepted 605,130 overseas students, fulfilling the 600,000-target set forth in the UK government's overseas Education Strategy nearly ten years ahead of schedule in 2030. The data indicates a notable increase in the quantity of overseas students opting to pursue their higher education in the United Kingdom. It was anticipated that the 2018–19 international student cohort brought in a total of £28.8 billion to the UK economy. Each parliamentary constituency saw an average net economic contribution from international students of £40 million to the UK economy.

#### **4.5. Key factors that attract students to the UK (VISA, Employability, Courses etc.)**

The UK is a desirable destination for overseas students for several reasons:

**Education Quality:** The United Kingdom is home to several of the world's best universities, providing internationally renowned academic establishments. One of the main attractions for overseas students is the excellent caliber of education and research available.

**Extensive Course Selection:** Students have an abundance of options when it comes to degrees offered by UK universities. Due to the variety, students can select a course that best suits their own interests and professional objectives.

**Impact on Future Careers:** A degree from a UK university is highly valued by many employers. A student's career may benefit from studying in the UK if it opens up job options both domestically and abroad.

**Employment Opportunities:** International students can find employment in the UK. During their studies, students are permitted to perform part-time jobs; upon graduation, they can apply for a work visa and obtain UK work experience.

**Cultural Experience:** With a rich history and culture, the UK is a multicultural nation. This is something that international students can personally experience, which enhances their educational experience.

**Ease of Visa Process:** International students now have an easier time obtaining a student visa thanks to changes made by the UK government. More over 484,000 visas were granted in 2022, demonstrating a simplified and effective procedure.

**Scholarships and financing:** International students studying in the UK have access to a wide range of scholarships and financing opportunities. The cost of studying abroad may be lessened with the help of these financial aid programs.

**Cost and Time Considerations:** One big advantage of the UK is that it is significantly less expensive and requires a shorter application process than the US. Because UK master's programs only last a year, they are more widely accepted and are thought to offer better value for the money.

## 5. Related Markets / Services

### 5.1. India - Total overseas education expenditure split

**Exhibit 53: India - Total overseas education expenditure split (%)**

Source: Frost & Sullivan

Expenditure for overseas education is a significant investment and encompasses various costs including tuition fees, living expenses, travel expenses, accommodation, insurance, and other miscellaneous expenses.

The cost of overseas education vary significantly depending on the destination country and the chosen institution. For example, studying in Western countries like the United States, United Kingdom, Canada, or Australia generally tends to be more expensive compared to studying in other regions.

Tuition fee is the most significant component (with a total of about 40 – 45% of expenditure allocated to it) of expenditure for students going abroad for studies. The tuition fee for a postgraduate program could vary from as low as USD 20k per year to USD 40k per year in some of the top destination countries like the United States and United Kingdom depending on the course selected. The tuition fee is on the higher side for these top destination countries of USA, UK and Australia, whereas for some of the other countries like Spain, France and Germany, its significantly lower.

#### **India: Overseas education Loan Value/Market for Higher Education**

(The section highlights overseas education loans extended by public sector banks only)

Education loans are serving as catalysts for the aspirations of students from economically disadvantaged backgrounds in various ways. The appetite for education loans in India has been steadily increasing, propelled by several factors such as escalating educational expenses, a surge in higher education enrolment, and heightened awareness regarding the advantages of educational financing. Non-Banking Financial Companies (NBFCs) have assumed a progressively significant role in India's education loan sector. NBFCs offer more adaptable terms and conditions compared to traditional banks, extending loans even to students with modest credit ratings. While Public Sector Banks (PSU banks) have traditionally been the primary providers of education loans in India, their dominance in the market has waned in recent times due to heightened competition from NBFCs.

Based on data from the Reserve Bank of India (RBI), the total outstanding amount of education loans surged by 17 percent to reach INR 96,8.47 billion during the fiscal year 2022-23, compared to INR 827.23 billion in the preceding year.

As reported by Public Sector Banks (PSBs), in the last 10 years, a total of 0.46 million students availed educational loans for studying abroad while INR 392.66 billion have been disbursed for study abroad loans in the last 10 years.

Except for the pandemic-impacted year of 2020-21, there has been a consistent year-on-year rise over the past decade both in terms of the number of students and the total amount of loans disbursed. In 2012-13, while the Public Sector Banks (PSBs) distributed loans to 20.37 thousand students, the same for 2019-20 stood at 62.95 thousand, just before the onset of the pandemic. The number of Indian students seeking education abroad rebounded in 2021-22, as evidenced by the rise in students taking loans for overseas education, which surged to 69.89 thousand. In essence, the number of students obtaining loans for studying abroad more than tripled over this ten-year period.

The growth rate is notably higher concerning the total value of loans disbursed for studying abroad. In 2012-13, PSBs lent a total of INR 11.8 billion for overseas education purposes. With a consistent annual increase, this figure climbed to INR 58.8 billion in the year prior to the pandemic, i.e., 2019-20. In 2020-21, it decreased to INR 45

billion. However, in 2021-22, the total loan amount reached INR 75.8 billion, marking a more than six-fold increase compared to the amount disbursed in 2012-13.

## 5.2. India: Student Visa Market Potential

The number of study visas granted to Indians is increasing leaps and bounds as more and more students from India pursue higher studies abroad.

Overall, air travel is a significant financial consideration for international students, and careful planning and budgeting is essential to manage these expenses effectively. Additionally, seeking out discounts, booking flights

well in advance, and exploring alternative travel options can help minimize the financial burden of air travel for international students.

Indian students are estimated to have spent around USD 296 – 434 Mn on air travel alone in 2022 flying out to their respective destination from the country. The same for 2023 is estimated to be USD 366 – 536 Mn.

### CRIZAC LIMITED

Crizac is a B2B education platform for agents and global institutions of higher education offering international student recruitment solutions to global institutions of higher education in United Kingdom, Canada, Republic of Ireland, Australia and New Zealand (ANZ). Student recruitment solutions from India into the United Kingdom is Crizac's strength as a result of its strong relationships built over time with global institutions of higher education in the United Kingdom.

The number of Inbound International higher education students into the UK has been growing steadily from 5.5 Lakh in 2020 to 7.6 Lakh in 2024. Going further we expect this number to increase at a CAGR of 3.6% over the next six years until 2030.

Crizac, as an international student recruitment solutions company, is well placed to capture this market given its wide network of partner universities across the United Kingdom.

Based on our comparison with peer companies - Crizac is one of the few companies among the given peer set that has not raised external capital to support its growth and is profitable. Crizac is also among the few players to offer additional services to universities admission office management. Providing these additional services ensures University stickiness and ensures a long-term working relationship between Crizac and the Universities.

Moreover, there is tremendous potential for Crizac to expand into large untapped markets such as the USA by leveraging their existing global agent network.

The number of Inbound International higher education students into the USA has been growing steadily from 10.6 Lakh in 2023 to 11.3 Lakh in 2024. The number of Indian Higher Education Level students in the USA meanwhile increased from 2.7 Lakh in 2023 to 3.3 Lakh in 2024 representing a 23% growth YoY.

India is one of the top two sources of international students in the United States. With increasing numbers of young Indians seeking quality education, the U.S. is poised for further growth in its international student base, especially from India.

### Threats & Challenges to the growth of the industry

However, the business of recruiting student for overseas éducation and the companies focused on the same face some key threats and challenges:

#### 1. Visa and Immigration Policies

- **Tightening of Visa Regulations:** Changes in immigration laws, visa restrictions, or delays in processing student visas can deter prospective students.

- **Post-study Work Opportunities:** Uncertainty around post-study work options may discourage students if they feel there's no job security after graduation.

## 2. Political and Economic Instability

- **Geopolitical Tensions:** Strained relations between countries can affect student exchange programs or make the visa process more difficult.
- **Economic Downturns:** Economic instability in regions such as India, Nigeria, China may impact the ability of students and their families to afford international education.

## 3. Competition

- **Growing Local Institutions:** Indian universities are improving their quality and expanding programs, reducing the incentive to study abroad.
- **Other Destination Countries:** Emergence of new destination countries for international students could increasingly become attractive due to favourable visa policies, lower costs, or high-quality education and can act as a threat to existing ones.
- **Online Education and Remote Learning:** The rise of online learning platforms and remote degree programs can reduce the appeal of traveling abroad for education.

## 4. Cost of Education

- **Tuition Fees and Living Costs:** High costs of tuition and living expenses in top destination countries like the UK and USA are a significant deterrent. Fluctuations in currency exchange rates can further exacerbate this.
- **Lack of Scholarships or Financial Aid:** Limited access to financial aid or scholarships may dissuade students from pursuing overseas education.

## 5. Changing Student Preferences

- **Interest in Emerging Fields:** Interest in emerging fields like AI, data science, or sustainability, can force students to look elsewhere if they do not see these courses being offered by existing top destination countries / universities.
- **Cultural Differences:** Cultural barriers, homesickness, and differences in teaching methods could affect students' willingness to study abroad.

## 6. Reputation of Educational Institutions

- **Institutional Rankings:** Declining rankings or negative reviews about universities may lead students to seek alternatives.

## 7. Regulatory and Compliance Challenges

- **Changes in Education Policies:** Regulatory changes in the UK or USA regarding international student enrollment, or compliance issues with agencies in India, can pose obstacles.

## 8. Health and Safety Concerns

- **Pandemic-Related Disruptions:** Health crises like COVID-19 can lead to travel bans, campus closures, or a shift towards online learning, reducing the demand for physical relocation.
- **Security Concerns:** Personal safety issues in the host country, like campus crime, racial discrimination, or political unrest, can discourage students from enrolling.

## 9. Economic and Currency Fluctuations

- **Currency Depreciation:** Depreciation of the Indian rupee against currencies like the British pound or US dollar can increase costs for Indian students.
- **Economic Instability in Host Countries:** A struggling economy in the UK or USA could mean fewer part-time job opportunities or post-graduation employment options.

## 10. Cultural and Social Adaptation

- **Cultural Adaptation:** Difficulty adapting to the cultural differences in the destination countries could make international students hesitant to apply.

## 11. Global Competition for Talent

- **Shift in Talent Preferences:** More global institutions are offering tailored, flexible, and cost-effective programs, leading to stiff competition for top talent from India.

### Recent developments also act as a threat for international student mobilization

Issues like the diplomatic tensions between India and Canada, predominantly in the second half of 2023, may have notable implications for Indian students currently studying in or aspiring to study in Canada. While relations between the two countries since remain fragile but have moved from outright confrontation toward cautious, transactional engagement, with the June, 2025 G7 summit viewed as the next litmus test. But if such diplomatic relations continue to strain, it could result in delays in visa processing, reduced availability of post-study work opportunities, and potential restrictions on bilateral educational programs, all of which would impact Indian students' academic and career plans. Moreover, prospective students may face uncertainties in funding options or government-backed scholarships.

Since late 2023 a series of street actions has flared across rich democracies, all driven chiefly by hostility to new arrivals. In September, 2023 Lampedusa (Italy) witnessed islanders blocking roads and a Red-Cross bus after 12,000 boat migrants landed in one week, forcing Rome to fly in riot police. Later that year in November, 2023 Dublin's (Ireland) city-centre erupted when hundreds of anti-immigration rioters torched buses and looted shops after a stabbing by a foreign national. Similarly, in the United States in February, 2024, the "Take Our Border Back" truck convoy rallied at three southern-border crossings, demanding a military blockade and mass deportations. In United Kingdom (August, 2024), about 750 far-right activists tried to burn a Rotherham hotel housing asylum seekers, injuring 51 police officers in the worst UK riot for 13 years. Later in the month of September (2024), Texas in the United States saw residents and militia supporters march on state-controlled Shelby Park, denouncing an "invasion" and urging an end to migrant crossings.

Earlier this year (May, 2025), in the United Kingdom, more than a thousand "Stop the Boats" demonstrators—bikers, Reform UK activists and fringe groups—paraded through Dover shouting "get them out", with a heavy police cordon preventing clashes with pro-refugee counter-protesters.

Together these episodes show a rising, networked protest culture that quickly ignites after high-profile crimes, migration surges or asylum-housing plans, turning local grievances into nationally resonant anti-immigration flashpoints.

### Uncertainty around US Student Visa's

In one of the most recent developments (May, 2025) the U.S. Embassy and consulates in India have paused scheduling new appointments for student visa applicants. This will affect Indians the most as they constitute the largest group of foreign students in the U.S. Moreover, The enhanced screening of foreign students in the U.S. is the latest worry for students and comes after the U.S. government launched a "catch and revoke" policy to deport students for their writings, presence at protests, or legal misdemeanours. The U.S. Embassy added in an advisory that a student could lose his or her visa status for skipping classes or leaving a programme without informing campus authorities. The enhanced social media vetting also could now mean fewer visas would be issued

## STRATEGIES

We will continue to seek opportunities to realize sustainable growth of our business. To achieve this, we plan to focus on the following strategies:

### ***Deepening and augmenting our agent network in India and globally***

One of aspects that will be critical for our continued growth will be to deepen our ties with our existing agent network and to augment our agent network in India and globally. As of March 31, 2025 we have around 10,362 Registered Agents globally who are registered on our proprietary technology platform and during Fiscal 2025, we had 3,948 Active Agents in over 39 countries overseas including United Kingdom, Nigeria, Pakistan, Bangladesh, Nepal, Sri Lanka, Cameroon, Ghana, Kenya, Vietnam, Canada and Egypt.

We will continuously seek to deepen our ties with existing agents and increasing the number of agents who avail of our services. Further, we propose to augment our network of agents in China. India and China are the top two sources of students going abroad for education and accounting for close to 40% of the total international higher education expenditure. While these countries have the maximum students outbound for studies abroad every year, they also have the maximum students (more than a million) studying abroad across various undergraduate and post graduate courses. In CY 2023, close to 1.48 million students were pursuing higher education globally from India, while the same for China stood at over a million (*Source: F&S Report*) These agents' source for us aspiring students who are looking for higher education overseas and are, therefore, critical to our business. We anticipate that augmenting our network in China will lead to greater applications from Chinese students being routed through us, which will in turn have a positive impact on our business and results of operation.

As on March 31, 2025, we had 158 employees who are part of agent relation management team globally engage with prospective agents and highlight our experience, the depth and breadth of our global institutions of higher education network, our competitive commission structure, and our informative and easy to use proprietary technology platform. We also host annual events featuring representatives from global institutions of higher education, alumni, and industry experts, to market our Company.

For Fiscals March 31, 2025, March 31, 2024 and March 31, 2023, we sourced applications for enrolment into global institutions of higher education from over 75 countries through our agents globally who are registered on our proprietary technology platform. We intend to further expand our agent network in countries across Asia (excluding India), Africa, Latin America and further improve the sourcing mix of applications across geographies.

**Expanding our geographic footprint with a particular focus on expanding our network of global institutions of higher education in Ireland, Canada and ANZ and establishing relationship with global institutions of higher education in the USA**

During Fiscals 2025, 2024 and 2023, we processed over 7.11 lakh student applications while working with over 173 global institutions of higher education. We propose to expand our geographic footprint to include in particular global institutions of higher education in the Republic of Ireland, Canada and ANZ. India and China are the top two sources of students going abroad for education and accounting for close to 40% of the total international higher education expenditure. While these countries have the maximum students outbound for studies abroad every year, they also have the maximum students (more than a million) studying abroad across various undergraduate and post graduate courses. In CY 2023, close to 1.48 million students were pursuing higher education globally from India, while the same for China stood at over a million. Both these countries are expected to witness a tremendous uptick in their disposable income. Further, in particular, the demand for affordable and accessible international education is on the rise in India, fueled by the expanding middle class and limited domestic options. (Source: F&S Report)

Set out below is a geographical split of total foreign / overseas higher education expenditure, based on source countries, during CY 2023:

Total Foreign / Overseas Tertiary Education Expenditure, 2023 (US\$ Bn)		
Country	Expenditure (USD Bn)	Share (%) in Global Expenditure
India	61	23%
China	40	15%
Vietnam	4.5	2%
Brazil	4	2%
Pakistan	2.5	1%
Other Countries	150	57%
Total	262	

(Source: F&S Report)

In academic year 2023-2024, ANZ witnessed an aggregate of 474,045 enrolment in higher education courses with a maximum number of students from China and India. (Source: F&S Report) While we have established relationship with few global institutions of higher education in ANZ, we will augment our focus to increase our reach and forge new relationships with global institutions of higher education across ANZ.

The USA remains a top destination for international students due to its world-class universities, diverse academic programs, and cutting-edge research opportunities. Students benefit from innovative teaching methods, hands-on industry collaborations, and access to advanced technology (Source: F&S Report). International students are estimated to have spent around USD 53 Bn for higher education in USA in the year 2023, while the same for UK

is USD 36 BN. For Canada and Australia the estimated spend is USD 33 Bn and USD 18 Bn respectively. (Source: F&S Report)

The chart below sets out the top host countries for international students:

Inbound Students in Select Countries (2024)		
Country	Inbound Students	Share (%) in Global Landscape

We have effectively commenced our recruitment journey in the US in Fiscal 2024. We have also entered into contracts with certain global institutions of higher education in US. The tuition fees in US varies between USD 13,000 to USD 65,000 per year. Tuition fee is the most significant component (with a total of about 40 - 45% of expenditure allocated to it) of expenditure for students going abroad for studies, and the tuition fee is on the higher side for these top destination countries of USA, UK and Australia. (Source: F&S Report).

There is tremendous potential for our Company to expand into large untapped markets such as the USA by leveraging their existing global agent network. The number of Inbound International higher education students into the USA has been growing steadily from 10.3 Lakh in 2023 to 11.3 Lakh in 2024. The number of Indian Higher Education level students in the USA meanwhile increased from 2.7 Lakh in 2023 to 3.3 Lakh in 2024 representing a 23% growth YoY. While, the United States has a vast academic landscape with more than 3,000 universities, these institutions also stand for academic excellence as the country has close to 200 universities in the Top 1,500 of '2025 QS World University Rankings'. (Source: F&S Report)

India is one of the top two sources of international students in the United States. With increasing numbers of young Indians seeking quality education, the U.S. is poised for further growth in its international student base, especially from India. (Source: F&S Report)

We expect that partnership with global institutions of higher education in the USA and ANZ will heighten our visibility and increase our profile and, consequently, garner us more agents and increase the number of students who seek to apply to global institutions of higher education through us, all of which ought to have a positive effect on our reputation and business.

### ***Diversify our service offerings***

Currently, our service bouquet comprises primarily admission related services. We intend to diversify our service offerings to include a wider range of services. We anticipate that offering a wider range of service offerings will make our service proposition more attractive to future students, while also broad-basing our revenue source. While tuition fee is the largest component of overseas education expenses, other aspects also contribute to the overall education expenditure. The chart below sets out the total overseas education expenditure of Indian students:

(Source: F&S Report)

We propose to provide guidance on available financial aid options, and engaging in other aspects which form a part of the international study eco-system such as (i) student loans and foreign exchange facility for which we are proposing to enter into tie-ups with financial institutions, (ii) Visa application assistance, and (iii) accommodation for which we will enter into tie-ups with property management services and accommodation providers across our focus geographies. Currently, we are contemplating the viability of these added services on a ‘per-lead basis’ and, or, on a ‘commission model’ with entities providing these services. We view these offerings as ‘value added services’ which we expect will broaden our target audience and also give us a deeper connect with them, in particular when we venture into the B2C (i.e., catering directly to the student population without an agent in between) business model. We also propose to invest in continual market research to identify emerging study destinations, popular courses, and changing student preferences. This is expected to involve the use of data analytics to anticipate trends and tailor our services.

We are also in the process of developing various new features in our platform which will make the process more technology enabled and hence more efficient. This will ensure that our proprietary technology platform is scalable and nimble, capable of being customised to suit the preferences of disparate global institutions of higher education while continuing to provide agents and students a seamless experience.

### ***Enhance our brand profile including our online presence and implement more efficient marketing strategies***

One of the elements that we anticipate will be key to further business growth and success is enhancing our brand profile. The essential aspect for that will be to clearly articulate our ‘unique value proposition’, emphasizing aspects such as dedicated relationship managers for the global institutions of higher education and select agents, our extensive partnerships with global institutions of higher education and our proprietary technology platform. This will be buttressed by maintaining consistent branding across all communication channels, including our website, social media, and marketing materials. Online presence is an integral aspect of our branding and visibility, and we propose to enhance our online presence and thereby reap the anticipated benefits from enhanced brand profile. We propose to invest in enhancing the user-friendliness of our website and making it more informative, optimize our online presence for search engines, and leverage social media to attract greater global audience. We also propose to implement virtual counselling services to connect with students remotely.

We also propose to tailor our marketing strategies for target audiences and for different regions within India and geographies globally. One of the elements we have identified for this purpose is to engage in targeted online advertising, increase our participation in local events, and collaborate with influencers or student ambassadors to increase brand visibility. We also propose to engage with local communities and educational institutions through outreach programs, workshops, and seminars and build a positive brand image by contributing to educational initiatives and community development.

***Inorganic growth to foray into B2C (i.e., catering directly to the student population without an agent in between) business model***

One of our strategies to grow our business of providing international student recruitment solutions to global institutions of higher education through inorganic growth by acquisition of control of certain companies, which have not been identified yet, which our Company deems will fit well into our business objectives. The inorganic growth will be focused towards foraying into the B2C (i.e., catering directly to the student population without an agent in between) business model. Such inorganic growth will make our service proposition more attractive to future students and will also increase our revenue source, while reducing reliance on our agent network. The inorganic growth towards the B2C (i.e., catering directly to the student population without an agent in between) business model will also fit well with our strategy of diversifying our service offerings which will be focused on providing guidance on available financial aid options, and engaging in other aspects which form a part of the international study eco-system such as (i) student loans and foreign exchange facility for which we are proposing to enter into tie-ups with financial institutions, (ii) Visa application assistance, and (iii) accommodation for which we will enter into tie-ups with property management services and accommodation providers across our focus geographies.

***Enhancing our proprietary technology platform***

We are in process of developing and adding various new features in our proprietary technology platform through tools such as artificial intelligence and machine learning, which will make the process more technology enabled and hence more efficient. We have integrated artificial intelligence and machine learning tools into processing and managing applications for global institution of higher education. Currently, a majority of the applications are submitted through an automated system, streamlining the entire submission workflow. Additionally, we are also testing third party artificial intelligence tools to evaluate incoming applications for global institution of higher education. This tool also incorporates machine learning algorithms that analyze historical admission data to identify patterns such as the likelihood of acceptance based on academic background and grades - allowing the system to make an informed, data-driven decisions on whether to accept or reject an application. We have also developed an artificial intelligence driven interview platform which involves a virtual bot conducting mock or final interviews with candidates, which facilitates not only interaction but also evaluation of the quality of responses and assigns scores based on the candidate's performance, offering a consistent and objective assessment method. We intend to also provide the various service offerings which form a part of the international study eco-system as described above, through our proprietary technology platform. We also intend to enhance our proprietary technology platform for our intended B2C (i.e., catering directly to the student population without an agent in between) business model. These will provide students and agents a seamless experience, making our service proposition more attractive.

### **2.1 Statement of Compliance**

The Group has adhered to all accounting policies in the preparation of these financial statements, ensuring compliance with the Indian Accounting Standards (Ind AS) as prescribed by the Ministry of Corporate Affairs under section 133 of the Companies Act, 2013, in conjunction with the Companies (Indian Accounting Standards) Rules, as amended, and in accordance with Schedule III of the Companies Act, 2013, where applicable. The statement of cash flows which has been prepared and presented as per the requirements of Ind AS 7 "Statement of Cash Flows".

Effective 01st April 2024 the Company has applied the following amendments to existing standards which has been notified by the Ministry of Corporate Affairs ("MCA")

#### **1. Ind AS 117, Insurance Contracts**

The MCA through its notification dated 28 September 2024, permitted insurer or insurance company to prepare its financial statements as per Ind AS 104 for the purpose of submitting information to their holding companies for consolidation, till the IRDAI has notified Ind AS 117.

Non-insurance companies would need to evaluate the terms of their contracts to determine definition of an insurance contract.

Some of the key contracts that should be examined for implications of Ind AS 117 include contracts, fixed-fee service contracts and group company warranties.

## 2. Ind AS 116, Leases

At the time of initial recognition, seller-lessee includes variable lease payments when it measures a lease liability arising from sale and-leaseback transaction.

After initial recognition, the seller-lessee applies the general requirements for subsequent accounting of the lease liability such that it does not recognise any gain or loss relating to the right of use it retains. Estimated lease payments can be determined in a number of ways at the date of transaction-

e.g. as 'expected lease payments' or as 'equal periodic payments' over the lease term. The seller-lessee would reduce the lease liability as if the 'lease payments' estimated at the date of the transaction had been paid. It would recognise any difference between those lease payments and the amounts actually paid in profit or loss.

## **2.4 Use of Estimates and Critical Accounting Judgments**

The preparation of Restated Financial Information in conformity with Ind AS requires judgements, estimates and assumptions to be made that affect the reported amount of assets and liabilities, disclosure of contingent liabilities on the date of the Restated Financial Information and the reported amount of revenues and expenses during the reporting period. Difference between the actual results and estimates are recognized in the period in which the results are known/ materialized.

## 2.5 Operating Cycle for current and non-current classification

All assets and liabilities have been classified as current or non-current as per the Group's normal operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013 and Ind AS 1. The Group has ascertained its operating cycle as twelve months for the purpose of current and non-current classification of assets and liabilities.

An asset is classified as current when it is:

- Expected to be realized or intended to sold or consumed in normal operating cycle;
- Held primarily for the purpose of trading;
- Expected to be realized within twelve months after the reporting period; or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All the other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle;
- It is held primarily for the purpose of trading;
- It is due to be settled within twelve months after the reporting period; or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

The Group classifies all other liabilities as non-current. Deferred Tax Assets and Liabilities are classified as non-current assets and liabilities respectively.

## 2.6 Measurement of Fair Values

A number of the Group's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Group. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the Consolidated Financial Statements are categorised within the fair value hierarchy, described as follows, based on the input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable and
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

External valuers are involved for valuation of significant assets & liabilities. Involvement of external valuers is decided by the management of the Group considering the requirements of Ind AS and selection criteria include market knowledge, reputation, independence and whether professional standards are maintained.

### 3 MATERIAL ACCOUNTING POLICIES

#### 3.1 USEFUL LIVES OF PROPERTY, PLANT AND EQUIPMENT & OTHER INTANGIBLES ASSETS

Property, plant, and equipment and Intangible Assets used in supply of services or administration are recorded at cost, less accumulated depreciation and impairment losses. Cost includes the purchase price (net of discounts and rebates), import duties (if any), non-refundable taxes, directly attributable costs to bring the asset to working condition, and the present value of dismantling and restoration costs. Significant parts with different useful lives are accounted for as separate components. An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Gains or losses from disposal are recognized in the Statement of Profit and Loss.

Depreciation is recognised so as to write off the cost of assets (other than freehold land and properties under construction) less their residual values over their useful lives, using the written down value method using rates determined based on the useful life of the respective assets and the residual values in accordance with Schedule II of the Companies Act, 2013 or as reassessed by the Group based on the technical evaluation. The estimated useful lives and residual values are reviewed at the end of each reporting period and changes, if any, are treated as changes in accounting estimate. The useful lives are based on technical estimates and the management believe that the useful lives are realistic and fair approximation over the period of which the assets are likely to be used (Refer Note-6).

Particulars	Useful Life	Depreciation Rate
Buildings	30 Years	9.50%
Computer & Accessories	3 Years	63.16%
Furniture and Fixtures	10 Years	25.89%
Motor Vehicles	8 Years	31.23%
Office Equipments	5 Years	45.07%

#### 3.2 INTANGIBLE ASSETS

Intangible assets purchased are measured at cost as at the date of acquisition, as applicable, less accumulated amortisation and accumulated impairment, if any.

Intangible assets comprise software licences and contract assets. Software licences are amortised over their estimated economic useful life i.e. license period of five years using the WDV method. Contract assets are amortised over a period of five years, which represents their estimated economic useful life, using the SLM method.

Intangible assets with finite life are evaluated for recoverability whenever there is any indication that their carrying amounts may not be recoverable. If any such indication exists, the recoverable amount (i.e. higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the cash generating unit (CGU) to which the asset belongs.

If the recoverable amount of an asset (or CGU) is estimated to be less than its carrying amount, the carrying amount of the asset (or CGU) is reduced to its recoverable amount.

Particulars	Useful Life	Amortisation Rate
Software Acquired	5 Years	45.07%
Contract Asset	5 Years	20.00%

### 3.2.1 GOODWILL

Goodwill arising on an acquisition of business is carried at cost as established at the date of acquisition of the business less accumulated impairment losses, if any. Goodwill is tested for impairment annually and for the purposes of impairment testing, goodwill is allocated to the cash-generating units that is expected to benefit from the synergies of the combination.

### 3.3 RIGHT OF USE ASSETS

The Group recognizes right-of-use assets at the lease commencement date, measured at cost less accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost includes the recognized lease liabilities, initial direct costs, lease payments made before or at commencement (less any lease incentives received). These assets are depreciated on a written down value basis over the shorter of the lease term or the assets' useful lives and are subject to impairment (Refer Note-7).

Particulars	Useful Life	Amortisation Rate
Leasehold Buildings	30 Years	9.50%

### 3.4 INVESTMENT PROPERTY

Investment properties are initially recognized at cost including transaction costs. Subsequently investment properties comprising buildings are carried at cost less accumulated depreciation and accumulated impairment losses, if any. Depreciation on buildings is calculated using the written down value method to allocate their cost, net of their residual values, over their estimated useful lives. Depreciation is provided on useful life of assets as prescribed in Schedule II to the Companies Act, 2013 (Refer Note-8).

Particulars	Useful Life	Depreciation Rate
Investment Property	30 Years	9.50%

### 3.5 CASH AND CASH EQUIVALENTS

The Group considers all highly liquid investments that are readily convertible to known amounts of cash and subject to insignificant risk of value change as cash equivalents. Cash and cash equivalents include unrestricted bank balances, cash in hand and cheques in hand.

Bank Deposit	Classification
Original maturity 3 months or less	Cash and cash equivalent (Refer Note 15)
Original maturity more than 3 months but less than 12 months	Bank balances other than cash and cash equivalent (Refer Note 16)
Remaining maturity more than 12 months	Other financial assets – Non current (Refer Note 11)
Remaining maturity less than 12 months	Other financial assets – Current (Refer Note 17)

### 3.6 RECOGNITION OF CURRENT TAX AND DEFERRED TAX

The income tax expense or benefit for the period includes the tax due on the current period's taxable income at the rates prescribed by the Income Tax Act, 1961, adjusted for any changes in deferred tax assets and liabilities arising from temporary differences and unutilized tax losses. Revenue, costs, allowances, and disallowances are allocated based on judgements informed by relevant rulings to determine the income tax provision.

#### 3.6.1 Current Tax

Current tax assets and liabilities are measured at the amounts expected to be recovered or paid, using the tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

#### 3.6.2 Deferred Tax

Deferred tax assets and liabilities are measured using the tax rates that are expected to apply in the period when the asset is realized or the liability is settled, based on the rates and laws that have been enacted or substantively enacted by the balance sheet date. Deferred tax related to items recognized directly in equity or in other comprehensive income is recorded in the same area, matching the transaction that generated the deferred tax. Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax assets against current tax liabilities and they relate to taxes levied by the same tax authority on either the same taxable entity or different taxable entities which intend to settle balances on a net basis. The recognition of deferred tax assets is contingent upon the likelihood of sufficient future taxable profits against which they can be utilized, necessitating significant judgement about possible legal or economic constraints.

### 3.7 LEASES

#### Lease accounting by lessee

The Company as lessee will measure the right-of-use asset at cost by recognition a right-of-use asset and a lease liability on initial measurement of the right-of-use asset at the commencement date of the lease. The cost of the right-of-use asset will comprise:

- i) the amount of the initial measurement of the lease liability,
- ii) any lease payments made at or before the commencement date less any incentives received,
- iii) any initial direct costs incurred,
- iv) an estimate of costs to be incurred in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease, unless those costs are incurred to produce inventories.

Lease liability will be initially measured at the present value of the lease payments that are not paid at that date. The lease payments are discounted using the interest rate implicit in the lease, if the rate cannot be readily determined incremental borrowing rate will be considered. Interest on lease liability in each period during the lease will be the amount that produces a constant periodic rate of interest on the remaining balance of the lease liability.

Lease payments will comprise the following payments for the right-of-use the underlying asset during the lease term that are not paid at the commencement date:

- i) fixed payments less any lease incentives receivable,
- ii) variable lease payments,
- iii) amounts expected to be payable under residual value guarantees,
- iv) the exercise price of a purchase option, if the Company is reasonably certain to exercise that option,
- v) payments of penalties for terminating the lease, if the lease term reflects the Company exercising an option to terminate the lease.

Subsequent measurement of the right-of-use asset after the commencement date will be at cost, the value of right-of-use asset will be initially measured at cost less accumulated depreciation and any accumulated impairment loss and adjustment for any remeasurement of the lease liability. The right-of-use asset will be depreciated from the commencement date to the earlier of the end of the useful life of the asset or the end of lease term, unless lease transfers ownership of the underlying asset to the Company by the end of the lease term or if the cost of the right-of-use asset reflects that the Company will exercise a purchase option, in such case the Company will depreciate asset to the end of the useful life.

Subsequent measurement of the lease liability after the commencement date will reflect the initially measured liability increased by interest on lease liability, reduced by lease payments and re-measuring the carrying amount to reflect any re-assessment or lease modification.

Right-of-use asset and lease liability are presented on the face of Balance Sheet. Depreciation charge on right-of-use assets is presented under depreciation expense as a separate line item. Interest charge on lease liability is presented under finance costs as a separate line item. Under the Statement of Cash Flows, cash flow from lease payments including interest are presented under financing activities. Short-term lease payments, payments for leases of low-value assets and variable lease payments that are not included in the measurement of the lease liabilities are presented as cash flows from operating activities.

**Lease accounting by lessor**

The Company as a lessor needs to classify each of its leases either as an operating lease or a finance lease. A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership of an underlying asset. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership of an underlying asset.

**Finance lease**

At the commencement date, the Company will recognise assets held under a finance lease in its Balance Sheet and present them as a receivable at an amount equal to the net investment in the lease. Net investment is the discount value of lease receipts net of initial direct costs using the interest rate implicit in the lease. For subsequent measurement of finance leased assets, the Company will recognise interest income over the lease period, based on a pattern reflecting a constant periodic rate of return on the Company's net investment in the lease.

**Operating lease**

The Company will recognise lease receipts from operating leases as income on either a straight-line basis or another systematic basis. The Company will recognise costs, including depreciation incurred in earning the lease income as expense.

**3.8 REVENUE RECOGNITION**

Revenue from contracts with customers is recognized on transfer of control of promised services to a customer at an amount that reflects the consideration to which the Group is expected to be entitled to in exchange for those services.

Revenue towards satisfaction of a performance obligation is measured at the amount of transaction price (net of variable consideration) allocated to that performance obligation. The transaction price of services rendered is net of variable consideration on account of various discounts and schemes offered by the Group as part of the contract. This variable consideration is estimated based on the expected value of outflow. Revenue (net of variable consideration) is recognized only to the extent that it is highly probable that the amount will not be subject to significant reversal when uncertainty relating to its recognition is resolved.

Turnover represents commission received from universities which is recognized in the year when the performance obligation and approval of the commission amount is received from the universities, accordingly the cost of commission payable to the agents of Crizac who are liable to be paid for supplying them with the students is recognized in the same year in order to match the revenue against the cost.

### **3.9 EMPLOYEE BENEFITS**

#### **3.9.1 Short Term Benefits**

Short term employee benefit obligations are measured on an undiscounted basis and are expensed as the related services are provided. Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within twelve months after the end of the period in which the employees render the related service are recognized in respect of employees' services up to the end of the reporting period.

#### **3.9.2 Post-Employment Benefits**

The Group operates the following post-employment schemes:

##### **➤ Defined Contribution Plan**

Defined contribution plans such as Provident Fund, ESI etc. are charged to the statement of profit and loss as and when incurred and paid to Authority.

##### **➤ Defined Benefit Plans**

The liability or asset recognized in the Balance Sheet in respect of defined benefit plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The Group's net obligation in respect of defined benefit plans is calculated separately for each plan by estimating the amount of future benefit that employees have earned in the current and prior periods. The defined benefit obligation is calculated for every period end by Actuaries using the projected unit credit method.

The liability recognized for defined benefit plans is the present value of the defined benefit obligation at the reporting date less the fair value of plan assets, together with adjustments for unrecognized actuarial gains or losses and past service costs. The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. The benefits are discounted using the government securities (G-Sec) at the end of the reporting period that have terms approximating to the terms of related obligation.

Remeasurements of the net defined benefit obligation, which comprise actuarial gains and losses, the return on plan assets (excluding interest) and the effect of the asset ceiling, are recognized in other comprehensive income. Remeasurements recognized in other comprehensive income are reflected immediately in retained earnings and will not be reclassified to the statement of profit and loss.

### **3.10 INVESTMENT IN BULLION**

Investment in Bullion is measured and carried at Cost.

### **3.11 FINANCIAL INSTRUMENTS**

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

### 3.11.1 Financial Assets

➤ Recognition and Initial Measurement:

All financial assets are initially recognized when the Group becomes a party to the contractual provisions of the instruments. A financial asset is initially measured at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. However, trade receivables that do not contain a significant financing component are measured at transaction price.

➤ Classification and Subsequent Measurement:

For purposes of subsequent measurement, financial assets are classified in four categories:

- Measured at Amortized Cost;
- Measured at Fair Value Through Other Comprehensive Income (FVTOCI);
- Measured at Fair Value Through Profit or Loss (FVTPL); and
- Equity Instruments designated at Fair Value through Other Comprehensive Income (FVTOCI).

Financial assets are not reclassified subsequent to their initial recognition, except if and in the period the Group changes its business model for managing financial assets.

- Measured at Amortized Cost: A debt instrument is measured at the amortized cost if both the following conditions are met:
  - The asset is held within a business model whose objective is achieved by both collecting contractual cash flows; and
  - The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortized cost using the effective interest rate (EIR) method. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included in finance income in the statement of profit or loss. The losses arising from impairment are recognized in the profit or loss. This category generally applies to trade receivables, cash and bank balances, loans and other financial assets of the Group.

- Measured at FVTOCI: A debt instrument is measured at the FVTOCI if both the following conditions are met:
  - The objective of the business model is achieved by both collecting contractual cash flows and selling the financial assets; and
  - The asset's contractual cash flows represent SPPI.

Debt instruments meeting these criteria are measured initially at fair value plus transaction costs. They are subsequently measured at fair value with any gains or losses arising on remeasurement recognized in other comprehensive income, except for impairment gains or losses and foreign

exchange gains or losses. Interest calculated using the effective interest method is recognized in the statement of profit and loss in investment income.

- Measured at FVTPL: FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as FVTPL. In addition, the Group may elect to designate a debt instrument, which otherwise meets amortized cost or FVTOCI criteria, as at FVTPL. Debt instruments included within the FVTPL category are measured at fair value with all changes recognized in the statement of profit and loss. Equity instruments which are, held for trading are classified as at FVTPL.
- Equity Instruments designated at FVTOCI: For equity instruments, which has not been classified as FVTPL as above, the Group may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The Group makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable. In case the Group decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to P&L, even on sale of investment.
- Investment in subsidiaries: A subsidiary is an entity controlled by the Company. Control exists when the Company has power over the entity, is exposed, or has rights to variable returns from its involvement with the entity and has the ability to affect those returns by using its power over entity. Power is demonstrated through existing rights that give the ability to direct relevant activities, those which significantly affect the entity's returns. Investments in subsidiaries are carried at cost. The cost comprises price paid to acquire investment and directly attributable cost.

Name of Company	Country of Incorporation	Shareholding % as on 31 <sup>st</sup> March, 2025	Number of Shares	Par value per share	Purchase Consideration (INR in Lakhs)
<u>Incorporated Outside India</u> Crizac Ltd	United Kingdom-incorporated on 7 <sup>th</sup> April, 2017	100%	100	1 GBP	631.97
<u>Incorporated Outside India</u> UCOL FZE	Dubai-incorporated on 18 <sup>th</sup> March, 2025	100%	50	1,000 AED	11.78

➤ Derecognition:

The Group derecognizes a financial asset on trade date only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity.

➤ Impairment of Financial Assets:

The Group assesses at each date of balance sheet whether a financial asset or a group of financial assets is impaired. Ind AS – 109 requires expected credit losses to be measured through a loss allowance. The Group recognizes impairment loss for trade receivables that do not constitute a financing transaction using expected credit loss model, which involves use of a provision matrix constructed on the basis of historical credit loss experience. For all other financial assets, expected credit losses are measured at an amount equal to the 12 month expected credit losses or at an amount equal to the life time expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition.

➤ Trade Receivables:

A receivable is classified as a 'trade receivable' if it is in respect to the amount due from customers on account of goods sold or services rendered in the ordinary course of business. Trade receivables are recognised initially at transaction value except trade receivable that contains significant financing component that are subsequently measured at amortised cost using the effective interest method, less provision for impairment. For some trade receivables, the Company may obtain security in the form of guarantee, security deposit or letter of credit which can be called upon if the counterparty is in default under the terms of the agreement.

### **3.11.2 Financial Liabilities**

➤ Recognition and Initial Measurement:

Financial liabilities are classified, at initial recognition, as at fair value through profit or loss, loans and borrowings, payables or as derivatives, as appropriate. All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

➤ Subsequent Measurement:

Financial liabilities are measured subsequently at amortized cost or FVTPL. A financial liability is classified as FVTPL if it is classified as held-for-trading, or it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognized in profit or loss. Other financial liabilities are subsequently measured at amortized cost using the effective interest rate method. Interest expense and foreign exchange gain and losses are recognized in profit or loss. Any gain or loss on derecognition is also recognized in profit or loss.

➤ Derecognition:

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires.

### **3.11.3 Offsetting financial instruments**

Financial assets and liabilities are offset and the net amount is reported in the balance sheet when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously. The legally enforceable right must not be

contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the counterparty.

### **3.12 Earnings per Share**

Basic Earnings per share (EPS) amounts are calculated by dividing the profit for the year attributable to equity holders by the weighted average number of equity shares outstanding during the year. Diluted EPS amounts are calculated by dividing the profit attributable to equity holders adjusted for the effects of potential equity shares by the weighted average number of equity shares outstanding during the year plus the weighted average number of equity shares that would be issued on conversion of all the dilutive potential equity shares into equity shares.

### **3.13 Impairment of Non-Financial Assets**

The Group assesses, at each reporting date, whether there is an indication that an asset may be impaired. An asset is treated as impaired when the carrying cost of the asset exceeds its recoverable value being higher of value in use and net selling price. Value in use is computed at net present value of cash flow expected over the balance useful lives of the assets. For the purpose of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or group of assets (Cash Generating Units – CGU).

An impairment loss is recognized as an expense in the Statement of Profit and Loss in the year in which an asset is identified as impaired. The impairment loss recognized in earlier accounting period is reversed if there has been an improvement in recoverable amount.

### **3.14 Provisions, Contingent Liabilities and Contingent Assets**

#### **3.14.1 Provisions**

Provisions are recognized when there is a present obligation (legal or constructive) as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Provisions are determined by discounting the expected future cash flows (representing the best estimate of the expenditure required to settle the present obligation at the balance sheet date) at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The unwinding of the discount is recognized as finance cost.

#### **3.14.2 Contingent Liabilities**

Contingent liability is a possible obligation arising from past events and the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Group or a present obligation that arises from past events but is not recognized because it is not possible that an outflow of resources embodying economic benefit will be required to settle the obligations or reliable estimate of the amount of the obligations cannot be made. The Group discloses the existence of contingent liabilities in Other Notes to Financial Statements.

### 3.14.3 Contingent Assets

Contingent assets usually arise from unplanned or other unexpected events that give rise to the possibility of an inflow of economic benefits. Contingent Assets are not recognized though are disclosed, where an inflow of economic benefits is probable.

### 3.14.4 BUSINESS COMBINATIONS

The acquisitions of businesses are accounted for using the acquisition method. The cost of the acquisition is measured at the aggregate of the fair values at the date of exchange of assets given, liabilities incurred or assumed and equity instruments issued by the Company in exchange for control of the acquiree. The acquiree's identifiable assets, liabilities and contingent liabilities that meet the condition for recognition are recognised at their fair value.

## 4 SIGNIFICANT JUDGEMENTS AND KEY SOURCES OF ESTIMATION IN APPLYING ACCOUNTING POLICIES

Estimates and judgments are continually evaluated. They are based on historical experience and other factors, including expectations of future events that may have a financial impact on the Group and that are believed to be reasonable under the circumstances.

### 4.1 Critical Accounting Estimates and Key Sources of Estimation Uncertainty:

Information about Significant judgements and Key sources of estimation made in applying accounting policies that have the most significant effects on the amounts recognized in the Restated Financial Statements is included in the following notes:

- **Recognition of Deferred Tax Assets:** The extent to which deferred tax assets can be recognized is based on an assessment of the probability of the Group's future taxable income against which the deferred tax assets can be utilized. In addition, significant judgement is required in assessing the impact of any legal or economic limits.
- **Right-of-use assets and lease liability:** The Group has exercised judgement in determining the lease term as the non-cancellable term of the lease, together with the impact of options to extend or terminate the lease if it is reasonably certain to be exercised. Where the rate implicit in the lease is not readily available, an incremental borrowing rate is applied. This incremental borrowing rate reflects the rate of interest that the lessee would have to pay to borrow over a similar term, with a similar security, the funds necessary to obtain an asset of a similar nature and value to the right of-use asset in a similar economic environment. Determination of the incremental borrowing rate requires estimation.
- **Defined Benefit Obligation (DBO):** Employee benefit obligations are measured on the basis of actuarial assumptions which include mortality and withdrawal rates as well as assumptions concerning future developments in discount rates, medical cost trends, anticipation of future salary increases and the inflation rate. The Group considers that the assumptions used to measure its obligations are appropriate. However, any changes in these assumptions may have a material impact on the resulting calculations.

- **Provisions and Contingencies:** The assessments undertaken in recognising provisions and contingencies have been made in accordance with Indian Accounting Standards (Ind AS) 37, 'Provisions, Contingent Liabilities and Contingent Assets'. The evaluation of the likelihood of the contingent events is applied best judgement by management regarding the probability of exposure to potential loss.
- **Impairment of Financial Assets:** The Group reviews its carrying value of investments carried at amortized cost annually, or more frequently when there is indication of impairment. If recoverable amount is less than its carrying amount, the impairment loss is accounted for.
- **Allowances for Doubtful Debts:** The Group makes allowances for doubtful debts through appropriate estimations of irrecoverable amount. The identification of doubtful debts requires use of judgment and estimates. Where the expectation is different from the original estimate, such difference will impact the carrying value of the trade and other receivables and doubtful debts expenses in the period in which such estimate has been changed.
- **Fair value measurement of financial Instruments:** When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques. The input to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

## 4.2 Basis of Consolidation

### Consolidation procedure

Combine like items of assets, liabilities, equity, income, expenses and cash flows of the Holding Company with those of its subsidiaries. For this purpose, income and expenses of the subsidiary are based on the amounts of the assets and liabilities recognized in the Restated Consolidated Financial Statements at the acquisition date. Offset (eliminate) the carrying amount of the Holding Company's investment in each subsidiary and the Holding Company's portion of equity of each subsidiary. Business combinations policy explains how to account for any related goodwill. Eliminate in full intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between entities of the group (profits or losses resulting from intragroup transactions that are recognized in assets, such as inventory and fixed assets, are eliminated in full). Intragroup losses may indicate an impairment that requires recognition in the Restated Consolidated Financial Statements. Ind AS 12 Income Taxes applies to temporary differences that arise from the elimination of profits and losses resulting from intragroup transactions. Profit or loss and each component of other comprehensive income (OCI) are attributed to the equity holders of the Holding Company and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

### 4.2.1 Subsidiaries

These Restated Financial Information for the years ended March 31, 2025, March 31, 2024 and March 31, 2023 are prepared in accordance with Ind AS specified under Section 133 of the Act. Subsidiaries are entities controlled by the Group. The Group controls an entity when it is exposed to, or has rights to, variable returns

from its involvement with the entity and has the ability to affect those returns through its power over the entity. The Financial Statements of subsidiaries are included in the Restated Financial Information from the date on which control commences until the date on which control ceases. (Refer Point 3.12.1 above)

#### **4.2.2 Non-Controlling Interest (NCI)**

NCI are measured at their proportionate share of the subsidiary's net identifiable assets at the date of acquisition. Changes in the Group's equity interest in a subsidiary that do not result in a loss of control are accounted for as equity transactions.

#### **4.2.3 Loss of control**

When the Group loses control over a subsidiary, it derecognises the assets and liabilities of the subsidiary, and any related NCI and other components of equity. Any interest retained in the former subsidiary is measured at fair value at the date the control is lost. Any resulting gain or loss is recognised in profit or loss.

#### **4.2.4 Transactions eliminated on consolidation**

The financial statements of the Holding Company and its subsidiaries used in the consolidation procedures are drawn upon the same reporting date i.e. 31<sup>st</sup> March, 2025 and March 31, 2024. The financial statements of the Holding Company and its subsidiary companies are combined on a line-by-line basis by adding together the book values of like items of assets, liabilities, income and expenses. Intra-group balances and transactions, and any unrealised income and expenses arising from intra-group transactions, are eliminated.

### **4.3 Recent Pronouncement**

The Ministry of Corporate Affairs (MCA) regularly notifies new standards or amendments to existing standards under the Companies (Indian Accounting Standards) Rules. For the year ending 31<sup>st</sup> March, 2025, the MCA has not notified any new standards or amendments to the standards that are applicable to the Group.

**5 a) Audit qualifications for the respective years, which do not require any adjustments in the restated financial information:**

There are no audit qualification in auditor's reports on the restated financial information for financial years ended March 31, 2025; March 31, 2024 and March 31, 2023.

**b) Material reclassification**

Appropriate regroupings have been made in the Restated Statements of Assets and Liabilities, profit and loss and cash flows, wherever required, by reclassification of the corresponding items of income, expenses, assets, liabilities and cash flows, in order to bring them in line with the accounting policies and classification as per the financial statement of the company for the year ended March 31, 2025, and prepared in accordance with Schedule III of the Act, requirements of Ind AS 1 - 'Presentation of Restated Financial Information and other applicable Ind AS principles and the requirements of the SEBI ICDR regulations, as amended.

**46.2 Defined Benefit Plan (Unfunded):**

The Group has a defined benefit gratuity plan.

**46.2.1 Gratuity Plan**

Every employee who has completed five years or more of service is entitled to Gratuity as per the provisions of the Payment of Gratuity Act, 1972. The present value of defined benefit obligation and related current cost are measured using the Projected Unit Credit Method with actuarial valuation being carried out at Balance Sheet date. The scheme is unfunded.

**46.2.2 Risk Exposure**

Through its defined benefit plans, the company is exposed to a number of risks, the most significant of which are detailed below:

<b>Interest Rate Risk</b>	The plan exposes the Company to the risk of fall in interest rates. A fall in interest rates will result in an increase in the ultimate cost of providing the above benefit and will thus result in an increase in the value of liability (as shown in the financial statements)
<b>Salary Growth Risk</b>	The present value of the defined benefit plan is calculated with the assumption of salary increase rate of plan participants in future. Deviation in the rate of increase of salary in future for plan participants from the rate of increase in salary used to determine the present value of obligation will have a bearing on the plan's liability.
<b>Demographic Risk</b>	The Company has used certain mortality and attrition assumptions in valuation of the liability. The Company is exposed to the risk of actual experience turning out to be worse compared to the assumption.
<b>Liquidity Risk</b>	This is the risk that the Company is not able to meet the short – term gratuity pay-outs. This may arise due to non-availability of enough cash/cash equivalent to meet the liabilities or holding of illiquid assets not being sold in time.
<b>Regulatory Risk</b>	Gratuity benefit is paid in accordance with the requirements of the Payment of Gratuity Act, 1972 (as amended from time to time). There is a risk of change in regulations requiring higher gratuity pay-outs (e.g. Increase in the maximum limit on gratuity of Rs 20,00,000).

\* The fair values of derivatives are estimated by using pricing models, where the inputs to those models are based on readily observable market parameters basis contractual terms, period to maturity and market parameters such as interest rates, foreign exchange rates and volatility. These models do not contain a high level of subjectivity as the valuation techniques used do not require significant judgement, and inputs thereto are readily observable from actively quoted market prices. Management has evaluated the credit and non-performance risks associated with its derivative counterparties and believe them to be insignificant and not warranting a credit adjustment.

**Fair Values of Financial Assets and Financial Liabilities measured at Amortised Cost**

The management considers that the carrying amounts of Financial assets and Financial liabilities recognised at nominal cost/amortised cost in the Consolidated Financial Statements approximate their fair values.

**50 Fair Value Hierarchy**

The following are the judgements and estimates made in determining the fair values of the financial instruments that are (a) recognized and measured at fair value and (b) measured at amortized cost and for which fair value are disclosed in the Restated Standalone Financial Information. To provide an indication about the reliability of the inputs used in determining fair value, the company has classified its financial instruments into the three levels of fair value measurement as prescribed under the Ind AS 113 "Fair Value Measurement".

The hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and lowest priority to unobservable inputs (Level 3 measurements). Fair value of the financial instruments is classified in various fair value hierarchies based on the following three levels:

- Level 1: Quoted prices (unadjusted) in active market for identical assets or liabilities.
- Level 2: Inputs other than quoted price including within level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices). The fair value of financial instruments that are not traded in an active market is determined using valuation techniques which maximize the use of observable market data and rely as little as possible on entity-specific estimates. If significant inputs required to fair value an instrument are observable, the instrument is included in Level 2, and
- Level 3: Inputs for the assets or liabilities that are not based on observable market data (unobservable inputs). If one or more of the significant inputs is not based on observable market data, the fair value is determined using generally accepted pricing models based on a discounted cash flow analysis, with the most significant input being the discount rate that reflects the credit risk of counterparty. This is the case with listed instruments where market is not liquid and for unlisted instruments.

**51 Financial Risk Management**

Financial management of the Group has been receiving attention of the top management of the Group. The management considers finance as the lifeline of the business and therefore, financial management is carried out meticulously on the basis of detailed management information systems and reports at periodical intervals extending from daily reports to long-term plans. Importance is laid on liquidity and working capital management with a view to reduce over-dependence on borrowings and reduction in interest cost. Various kinds of financial risks and their mitigation plans are as follows:

**51.1 Credit Risk**

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Group is exposed to credit risk from its operating activities (primarily trade receivables). On account of adoption of Ind AS 109, the Group uses an expected credit loss model to assess the impairment loss.

**a Trade Receivables**

Customer credit risk is managed by the Group's established policy, procedures and control relating to customer credit risk management. Outstanding customer receivables are regularly monitored and reconciled. Based on historical trend, industry practice and the business environment in which the Group operates, an impairment analysis is performed at each reporting date for trade receivables. Based on above, the Group has assessed that provision for doubtful debts for the year ended March 31, 2025, 31st March, 2024 & 31st March, 2023 respectively is not required. Refer Note 49.

**b Other Financial Assets**

Credit Risk on cash and cash equivalent, deposits with the banks/financial institutions is generally low as the said deposits have been made with the banks/financial institutions who have been assigned high credit rating by international and domestic rating agencies. Refer Note 49.

**51.2 Liquidity Risk**

The Group's objective is to maintain optimum levels of liquidity to meet its cash and collateral requirements at all times. The Group relies on a mix of borrowings and excess operating cash flows to meet its needs for funds. The current committed lines of credit are sufficient to meet its short to medium/ long term expansion needs. The Group monitors rolling forecasts of its liquidity requirements to ensure it has sufficient cash to meet operational needs.

Market risk comprises of Foreign Exchange Risk and Interest Rate Risk.

**51.3.1 Foreign Exchange Risk**

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. Note 21.2- Adjustments due to Prior Period item

Pursuant to the observations received from SEBI, the Company determined that the IPO-related expenses amounting to ₹27.50 million, previously recognized in the Statement of Profit and Loss for the year ended 31st March, 2024 under Other Expenses, are recoverable from the identified selling shareholders. Accordingly, in the current financial year the Company reclassified this amount under Other Current Financial Asset as IPO expenses recoverable and recognized the same under Other Income. However, the Company has reassessed these expenses and made relevant adjustments to restate the presentation and disclosure of the underlying financial Statement line items as follows:

- 1. The amount of ₹27.50 million has been derecognized from **Other Income** during the current financial year.
- 2. The comparative figures of the expenses for the previous year, totalling to ₹27.50 million, have been reduced from **Other Expenses** of the previous year.
- 3. The IPO expenses recoverable of ₹32.45 million has been recognised in **Other Current Financial Asset** of the previous financial year.
- 4. The GST Input Tax Credit (ITC) of ₹4.95 million, availed on the expenses in the previous year, has been reduced from **Other Current Asset** of previous year.
- 5. The **Current tax expense** of the previous year has been increased by ₹6.92 million, being the tax impact of the reduced "Other expenses".
- 6. Consequently, the retained earnings as at 1st April, 2024 has increased by ₹20.58 million.

### OVERVIEW

We are a B2B education platform for agents and global institutions of higher education offering international student recruitment solutions to global institutions of higher education in United Kingdom, Canada, Republic of Ireland, Australia and New Zealand (ANZ). Student recruitment solutions from India into the United Kingdom is our strength as a result of our strong relationships built over time with global institutions of higher education in the United Kingdom. (Source: F&S Report)

For the Fiscals March 31, 2025, March 31, 2024 and March 31, 2023, we sourced applications for enrolment into global institutions of higher education from over 75 countries through our agents globally who are registered on our proprietary technology platform. During the Fiscals 2025, 2024 and 2023, we processed over 7.11 lakh student applications while working with over 173 global institutions of higher education. As of March 31, 2025 we have around 10,362 Registered Agents globally who are registered on our proprietary technology platform and during Fiscal 2025, we had 3,948 active agents (i.e., agents from whom our Company has received applications during Fiscal 2025) (**Active Agents**) comprising

2,237 Active Agents in India and around 43.33% Active Agents i.e., 1,711 Active Agents in over 39 countries overseas including United Kingdom, Nigeria, Pakistan, Bangladesh, Nepal, Sri Lanka, Cameroon, Ghana, Kenya, Vietnam, Canada and Egypt.

Students and parents are increasingly recognizing the value of acquiring a global perspective, accessing world-class educational institutions, and experiencing diverse cultures (*Source: F&S Report*), and since commencement of our operations in Fiscal 2011, we have worked with our agent network to enable the students and parents in fulfilling such aspirations.

We also work in close collaboration with global institutions of higher education, which has helped us in developing expertise and understanding of their recruitment preferences and develop bespoke strategies that reflect and highlight their unique goals and strengths. This has enabled us to scale our business, and we have grown at a CAGR of 100.18% in terms of increase in our revenue from operations in Fiscal 2015 to our revenue from operations, based on Proforma Consolidated Financial Information, for Fiscal 2025.

During the Fiscals 2023, 2024 and 2025, we worked with over 173 global institutions of higher education primarily in United Kingdom, Republic of Ireland, Canada and USA. Some of the global institutions of higher education with whom we work with include University of Birmingham, University of Surrey, University of Sunderland, Nottingham Trent University, University of Greenwich, University of West London, University of Portsmouth, De Montfort University, Glasgow Caledonian University, Aston University, University of Dundee, Dundalk Institute of Technology, Coventry University and Swansea University.

We are based in India with co-primary operations in London, United Kingdom. In addition to extensive operations and employees in India, we have consultants in multiple countries including Cameroon, China, Ghana, and Kenya. As on March 31, 2025, we had a team of 368 employees and 12 consultants with extensive experience of the international educational landscape. Set out below is the geographic spread of our employees and consultants.

(This map is only for the purpose of representation and is not to be considered an accurate geopolitical representation.)

As of March 31, 2025 we have around 10,362 Registered Agents globally who are registered on our proprietary technology platform. We have developed an internal system to meticulously identify prospective agents, establishing connections and nurturing the relationship with agents. We seek to identify and work with agents whose objectives align with ours and foster a collaborative and symbiotic partnership. During Fiscal 2025, we had 3,948 Active Agents. Set out in the table below is a break-up of our agent network across geographies:

Sr. No.	Geography	Number of Active Agents during Fiscal 2025
1.	India	2,237

Our ability to grow our business is directly correlated to our ability to maintain and expand the entrenched relationship that we have with global institutions of higher education. We have over the years established long standing relationship with a global network of institutions of higher learning and for Fiscals ended March 31, 2025, March 31, 2024, and March 31, 2023 we worked with over 173 global institutions of higher education predominantly across United Kingdom, Republic of Ireland, Canada and USA. We are one of the leading education platforms offering international student recruitment solutions to global institutions of higher education in United Kingdom, Canada, Republic of Ireland, Australia and New Zealand (ANZ). Student recruitment solutions from India into the United Kingdom is our strength as a result of our strong relationships built over time with global institutions of higher education in the United Kingdom. (Source: F&S Report) Out of our top 30 global institutions of higher learning, based on our revenue from operations, during Fiscal 2025, Fiscal 2024, and Fiscal 2023, we have had longstanding relationship of over 5 years with more than 20 global institutions of higher learning. During Fiscals 2023, 2024, and 2025 we processed over 7.11 lakh student applications while working with over 173 global institutions of higher education. During Fiscal 2025, Fiscal 2024, and Fiscal 2023, our revenue from our 10 top global institutions of higher education, based on our Proforma Consolidated Financial Information was ₹ 5,994.25 million, ₹ 5,114.17 million and ₹ 3,897.00 million, constituting 70.56%, 80.56%, and 82.39% of our revenue from operations, respectively. While growth in new relationship with global institutions of higher education is key to increasing our revenue base, our revenue model also requires us to broad-base the services provided to future students. Accordingly, we intend to diversify our service offerings to include a wider range of services such as providing guidance on available financial aid options, and engaging in other aspects which form a part of the international study eco-system such as (i) student loans and foreign exchange facility for which are proposing to enter into tie-ups with financial institutions, (ii) Visa application assistance, and (iii) accommodation for which we will enter into tie-ups with property management services and accommodation providers across our focus geographies. We anticipate that offering a wider range of service offerings will make our service proposition more attractive to future students, while also broad-basing our revenue source.

#### ***Widening the pool of agents in India and overseas***

As of March 31, 2025 we have around 10,362 Registered Agents globally who are registered on our proprietary technology platform. We have developed an internal system to meticulously identify prospective agents, establishing connections and nurturing the relationship with agents. We seek to identify and work with agents whose objectives align with ours and foster a collaborative and symbiotic partnership. During Fiscal 2025, we had 3,948 active agents (i.e., agents from whom our Company has received applications during Fiscal 2024) (**Active Agents**) comprising 2,237 Active Agents in India and around 43.33% Active Agents i.e., 1,711 Active Agents in over 39 countries overseas including United Kingdom, Nigeria, Pakistan, Bangladesh, Nepal, Sri Lanka, Cameroon, Ghana, Kenya, Vietnam, Canada and Egypt. Our top 10 agents, based on our Proforma Consolidated Financial Information, contributed ₹ 702.05 million, ₹ 601.76 million, and ₹ 700.08 million, during, Fiscal 2025, Fiscal 2024, Fiscal 2023, constituting 8.26%, 9.48%, and 14.80%, of our revenue from operations, respectively. One of aspects that will be critical for our continued growth will be to deepen our ties with our existing agent network and to augment our agent network in India and globally. We will continuously seek to deepen our ties with existing agents and increasing the number of agents who avail of our services. Further, we propose to augment our network of agents in China. India and China are the top two sources of students going abroad for education and accounting for close to 40% of the total international higher education expenditure. While these countries have the maximum students outbound for studies abroad every year, they also have the maximum students (more than a million) studying abroad across various undergraduate and post graduate courses. In CY 2023, close to 1.48 million students were pursuing higher education globally from India, while the same for China stood at over a million (Source: F&S Report) These agents source for us aspiring students who are looking for higher education overseas and are, therefore, critical to our business. Based on our Proforma Consolidated Financial Information, in Fiscal 2025, Fiscal 2024, and Fiscal 2023, our payments to agents was ₹ 5,992.38 million, ₹ 4,446.36 million, and ₹ 3,076.12 million, constituting 70.54%, 70.04%, and 65.04%, respectively, of our total revenue from operations. Since our revenue is directly related to the numbers of aspiring students who enrol with the global institutions of higher learning, and agents are the source of students, continuously deepening our ties with existing agents and augmenting the number of agents who avail of our services is essential to our business. Accordingly, we continually work on factors that increase the attractiveness of our services to agents and also provide access to our proprietary technological platform on which agents can avail our service offering. We also anticipate that augmenting our network in China will lead to greater applications from Chinese students being routed through us, which will in turn have a positive impact on our business and results of operation. Further, we expect that us establishing relationship with global institutions of higher education in the USA will be a crucial factor in deepening our existing agent network since it will increase the opportunities that students will have.

***Expanding our geographic footprint with a particular focus on expanding our network of global institutions of higher education in Ireland, Canada and ANZ and establishing relationship with global institutions of higher education in the USA***

We have over the years established long standing relationship with a global network of institutions of higher learning and for Fiscals ended March 31, 2025, March 31, 2024, and March 31, 2023 we worked with over 173 global institutions of higher education predominantly across United Kingdom, Republic of Ireland, Canada and USA. During the Fiscals 2023, 2024 and 2025, we processed over 7.11 lakh student applications while working with over 173 global institutions of higher education. We propose to expand our geographic footprint to include in particular global institutions of higher education in the Republic of Ireland, Canada and ANZ. India and China figure as the top source countries for students moving abroad for higher education, and both these countries are expected to witness a tremendous uptick in their disposable income. Further, in particular, the demand for affordable and accessible international education is on the rise in India, fueled by the expanding middle class and limited domestic options. (Source: F&S Report)

In academic year 2023-2024, ANZ witnessed an aggregate of 474,045 enrolment in higher education courses with a maximum number of students from China and India. (Source: F&S Report) While we have established relationship with few global institutions of higher education in ANZ, we will augment our focus to increase our reach and forge new relationships with global institutions of higher education across ANZ. International students are estimated to have spent around USD 53 Bn for higher education in USA in the year 2023, while the same for UK is USD 36 Bn. For Canada and Australia the estimated spend is USD 33 Bn and USD 18 Bn respectively. (Source: F&S Report) We have effectively commenced our recruitment journey in the US in Fiscal 2024. We have also entered into contracts with certain global institutions of higher education in US. We expect that partnership with global institutions of higher education in the USA and ANZ will heighten our visibility and increase our profile and, consequently, garner us more agents and increase the number of students who seek to apply to global institutions of higher education through us, all of which ought to have a positive effect on our reputation and business.

***Expanding the range of our services by harnessing our proprietary technological platform***

Currently, our service bouquet comprises primarily admission related services. We intend to diversify our service offerings to include a wider range of services. We anticipate that offering a wider range of service offerings will make our service proposition more attractive to future students, while also broad-basing our revenue source. While tuition fee is the largest component of overseas education expenses, other aspects also contribute to the overall education expenditure. We propose to provide guidance on available financial aid options, and engaging in other aspects which form a part of the international study eco-system such as (i) student loans and foreign exchange facility for which are proposing to enter into tie-ups with financial institutions, (ii) Visa application assistance, and (iii) accommodation for which we will enter into tie-ups with property management services and accommodation providers across our focus geographies. Currently, we are contemplating the viability of these added services on a 'per-lead basis' and, or, on a 'commission model' with entities providing these services. We view these offerings as 'value added services' which we expect will broaden our target audience and also give us a deeper connect with them, in particular when we venture into the B2C (i.e., catering directly to the student population without an agent in between) business model. We also propose to invest in continual market research to identify emerging study destinations, popular courses, and changing student preferences. This is expected to involve the use of data analytics to anticipate trends and tailor our services. We are also in the process of developing various new features in our proprietary technology platform which will make the process more technology enabled and hence more efficient. This will ensure that our proprietary technology platform is scalable and nimble, capable of being customised to suit the preferences of disparate global institutions of higher education while continuing to provide agents and students a seamless experience. Harnessing technology will, in addition to, augmenting the 'look-and-feel' of our brand will also enable us to engage with a much broader audience and garner greater attention.

### **2. Ind AS 116, Leases**

At the time of initial recognition, seller-lessee includes variable lease payments when it measures a lease liability arising from sale and-leaseback transaction.

After initial recognition, the seller-lessee applies the general requirements for subsequent accounting of the lease liability such that it does not recognise any gain or loss relating to the right of use it retains. Estimated lease payments can be determined in a number of ways at the date of transaction-

e.g. as 'expected lease payments' or as 'equal periodic payments' over the lease term. The seller-lessee would reduce the lease liability as if the 'lease payments' estimated at the date of the transaction had been paid. It would recognise any difference between those lease payments and the amounts actually paid in profit or loss.

Non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated into the functional currency at the exchange rate when the fair value was determined. Non-monetary assets and liabilities that are measured based on historical cost in a foreign currency are translated at the exchange rate at the date of the transaction.

### **2.4 Use of Estimates and Critical Accounting Judgments**

The preparation of Restated Financial Information in conformity with Ind AS requires judgements, estimates and assumptions to be made that affect the reported amount of assets and liabilities, disclosure of contingent liabilities on the date of the Restated Financial Information and the reported amount of revenues and expenses during the reporting period. Difference between the actual results and estimates are recognized in the period in which the results are known/materialized.

### **2.5 Operating Cycle for current and non-current classification**

All assets and liabilities have been classified as current or non-current as per the Group's normal operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013 and Ind AS 1. The Group has ascertained its operating cycle as twelve months for the purpose of current and non-current classification of assets and liabilities.

An asset is classified as current when it is:

- Expected to be realized or intended to sold or consumed in normal operating cycle;
- Held primarily for the purpose of trading;
- Expected to be realized within twelve months after the reporting period; or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All the other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle;
- It is held primarily for the purpose of trading;
- It is due to be settled within twelve months after the reporting period; or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

The Group classifies all other liabilities as non-current. Deferred Tax Assets and Liabilities are classified as non-current assets and liabilities respectively.

### **2.6 Measurement of Fair Values**

A number of the Group's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Group. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the Consolidated Financial Statements are categorised within the fair value hierarchy, described as follows, based on the input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable and
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

External valuers are involved for valuation of significant assets & liabilities. Involvement of external valuers is decided by the management of the Group considering the requirements of Ind AS and selection criteria include market knowledge, reputation, independence and whether professional standards are maintained.

### 3 MATERIAL ACCOUNTING POLICIES

#### 3.1 USEFUL LIVES OF PROPERTY, PLANT AND EQUIPMENT & OTHER INTANGIBLES ASSETS

Property, plant, and equipment and Intangible Assets used in supply of services or administration are recorded at cost, less accumulated depreciation and impairment losses. Cost includes the purchase price (net of discounts and rebates), import duties (if any), non-refundable taxes, directly attributable costs to bring the asset to working condition, and the present value of dismantling and restoration costs. Significant parts with different useful lives are accounted for as separate components. An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Gains or losses from disposal are recognized in the Statement of Profit and Loss.

Depreciation is recognised so as to write off the cost of assets (other than freehold land and properties under construction) less their residual values over their useful lives, using the written down value method using rates determined based on the useful life of the respective assets and the residual values in accordance with Schedule II of the Companies Act, 2013 or as reassessed by the Group based on the technical evaluation. The estimated useful lives and residual values are reviewed at the end of each reporting period and changes, if any, are treated as changes in accounting estimate. The useful lives are based on technical estimates and the management believe that the useful lives are realistic and fair approximation over the period of which the assets are likely to be used (Refer Note-6).

Particulars	Useful Life	Depreciation Rate
Buildings	30 Years	9.50%
Computer & Accessories	3 Years	63.16%
Furniture and Fixtures	10 Years	25.89%
Motor Vehicles	8 Years	31.23%
Office Equipments	5 Years	45.07%

#### 3.2 INTANGIBLE ASSETS

Intangible assets purchased are measured at cost as at the date of acquisition, as applicable, less accumulated amortisation and accumulated impairment, if any.

Intangible assets comprise software licences and contract assets. Software licences are amortised over their estimated economic useful life i.e. license period of five years using the WDV method. Contract assets are amortised over a period of five years, which represents their estimated economic useful life, using the SLM method.

Intangible assets with finite life are evaluated for recoverability whenever there is any indication that their carrying amounts may not be recoverable. If any such indication exists, the recoverable amount (i.e. higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the cash generating unit (CGU) to which the asset belongs.

If the recoverable amount of an asset (or CGU) is estimated to be less than its carrying amount, the carrying amount of the asset (or CGU) is reduced to its recoverable amount.

Particulars	Useful Life	Amortisation Rate
Software Acquired	5 Years	45.07%
Contract Asset	5 Years	20.00%

### 3.2.1 GOODWILL

Goodwill arising on an acquisition of business is carried at cost as established at the date of acquisition of the business less accumulated impairment losses, if any. Goodwill is tested for impairment annually and for the purposes of impairment testing, goodwill is allocated to the cash-generating units that is expected to benefit from the synergies of the combination.

### 3.3 RIGHT OF USE ASSETS

The Group recognizes right-of-use assets at the lease commencement date, measured at cost less accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost includes the recognized lease liabilities, initial direct costs, lease payments made before or at commencement (less any lease incentives received). These assets are depreciated on a written down value basis over the shorter of the lease term or the assets' useful lives and are subject to impairment (Refer Note-7).

Particulars	Useful Life	Amortisation Rate
Leasehold Buildings	30 Years	9.50%

### 3.4 INVESTMENT PROPERTY

Investment properties are initially recognized at cost including transaction costs. Subsequently investment properties comprising buildings are carried at cost less accumulated depreciation and accumulated impairment losses, if any. Depreciation on buildings is calculated using the written down value method to allocate their cost, net of their residual values, over their estimated useful lives. Depreciation is provided on useful life of assets as prescribed in Schedule II to the Companies Act, 2013 (Refer Note-8).

Particulars	Useful Life	Depreciation Rate
Investment Property	30 Years	9.50%

### 3.5 CASH AND CASH EQUIVALENTS

The Group considers all highly liquid investments that are readily convertible to known amounts of cash and subject to insignificant risk of value change as cash equivalents. Cash and cash equivalents include unrestricted bank balances, cash in hand and cheques in hand.

### 3.6 RECOGNITION OF CURRENT TAX AND DEFERRED TAX

The income tax expense or benefit for the period includes the tax due on the current period's taxable income at the rates prescribed by the Income Tax Act, 1961, adjusted for any changes in deferred tax assets and liabilities arising from temporary differences and unutilized tax losses. Revenue, costs, allowances, and disallowances are allocated based on judgements informed by relevant rulings to determine the income tax provision.

#### 3.6.1 Current Tax

Current tax assets and liabilities are measured at the amounts expected to be recovered or paid, using the tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

#### 3.6.2 Deferred Tax

Deferred tax assets and liabilities are measured using the tax rates that are expected to apply in the period when the asset is realized or the liability is settled, based on the rates and laws that have been enacted or substantively enacted by the balance sheet date. Deferred tax related to items recognized directly in equity or in other comprehensive income is recorded in the same area, matching the transaction that generated the deferred tax. Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax assets against current tax liabilities and they relate to taxes levied by the same tax authority on either the same taxable entity or different taxable entities which intend to settle balances on a net basis. The recognition of deferred tax assets is contingent upon the likelihood of sufficient future taxable profits against which they can be utilized, necessitating significant judgement about possible legal or economic constraints.

### 3.7 LEASES

#### Lease accounting by lessee

The Company as lessee will measure the right-of-use asset at cost by recognition a right-of-use asset and a lease liability on initial measurement of the right-of-use asset at the commencement date of the lease. The cost of the right-of-use asset will comprise:

- i) the amount of the initial measurement of the lease liability,
- ii) any lease payments made at or before the commencement date less any incentives received,
- iii) any initial direct costs incurred,
- iv) an estimate of costs to be incurred in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease, unless those costs are incurred to produce inventories.

Lease liability will be initially measured at the present value of the lease payments that are not paid at that date. The lease payments are discounted using the interest rate implicit in the lease, if the rate cannot be readily determined incremental borrowing rate will be considered. Interest on lease liability in each period during the lease will be the amount that produces a constant periodic rate of interest on the remaining balance of the lease liability.

Lease payments will comprise the following payments for the right-of-use the underlying asset during the lease term that are not paid at the commencement date:

- i) fixed payments less any lease incentives receivable,
- ii) variable lease payments,
- iii) amounts expected to be payable under residual value guarantees,
- iv) the exercise price of a purchase option, if the Company is reasonably certain to exercise that option,
- v) payments of penalties for terminating the lease, if the lease term reflects the Company exercising an option to terminate the lease.

Subsequent measurement of the right-of-use asset after the commencement date will be at cost, the value of right-of-use asset will be initially measured at cost less accumulated depreciation and any accumulated impairment loss and adjustment for any remeasurement of the lease liability. The right-of-use asset will be depreciated from the commencement date to the earlier of the end of the useful life of the asset or the end of lease term, unless lease transfers ownership of the underlying asset to the Company by the end of the lease term or if the cost of the right-of-use asset reflects that the Company will exercise a purchase option, in such case the Company will depreciate asset to the end of the useful life.

Subsequent measurement of the lease liability after the commencement date will reflect the initially measured liability increased by interest on lease liability, reduced by lease payments and re-measuring the carrying amount to reflect any re-assessment or lease modification.

Right-of-use asset and lease liability are presented on the face of Balance Sheet. Depreciation charge on right-of-use assets is presented under depreciation expense as a separate line item. Interest charge on lease liability is presented under finance costs as a separate line item. Under the Statement of Cash Flows, cash flow from lease payments including interest are presented under financing activities. Short-term lease payments, payments for leases of low-value assets and variable lease payments that are not included in the measurement of the lease liabilities are presented as cash flows from operating activities.

#### **Lease accounting by lessor**

The Company as a lessor needs to classify each of its leases either as an operating lease or a finance lease. A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership of an underlying asset. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership of an underlying asset.

#### **Finance lease**

At the commencement date, the Company will recognise assets held under a finance lease in its Balance Sheet and present them as a receivable at an amount equal to the net investment in the lease. Net investment is the discount value of lease receipts net of initial direct costs using the interest rate implicit in the lease. For subsequent measurement of finance leased assets, the Company will recognise interest income over the lease period, based on a pattern reflecting a constant periodic rate of return on the Company's net investment in the lease.

#### **Operating lease**

The Company will recognise lease receipts from operating leases as income on either a straight-line basis or another systematic basis. The Company will recognise costs, including depreciation incurred in earning the lease income as expense.

### **3.8 REVENUE RECOGNITION**

Revenue from contracts with customers is recognized on transfer of control of promised services to a customer at an amount that reflects the consideration to which the Group is expected to be entitled to in exchange for those services.

Revenue towards satisfaction of a performance obligation is measured at the amount of transaction price (net of variable consideration) allocated to that performance obligation. The transaction price of services rendered is net of variable consideration on account of various discounts and schemes offered by the Group as part of the contract. This variable consideration is estimated based on the expected value of outflow. Revenue (net of variable consideration) is recognized only to the extent that it is highly probable that the amount will not be subject to significant reversal when uncertainty relating to its recognition is resolved.

Turnover represents commission received from universities which is recognized in the year when the performance obligation and approval of the commission amount is received from the universities, accordingly the cost of commission payable to the agents of Crizac who are liable to be paid for supplying them with the students is recognized in the same year in order to match the revenue against the cost.

### **3.9 EMPLOYEE BENEFITS**

#### **3.9.1 Short Term Benefits**

Short term employee benefit obligations are measured on an undiscounted basis and are expensed as the related services are provided. Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within twelve months after the end of the period in which the employees render the related service are recognized in respect of employees' services up to the end of the reporting period.

#### **3.9.2 Post-Employment Benefits**

The Group operates the following post-employment schemes:

##### **➤ Defined Contribution Plan**

Defined contribution plans such as Provident Fund, ESI etc. are charged to the statement of profit and loss as and when incurred and paid to Authority.

##### **➤ Defined Benefit Plans**

The liability or asset recognized in the Balance Sheet in respect of defined benefit plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The Group's net obligation in respect of defined benefit plans is calculated separately for each plan by estimating the amount of future benefit that employees have earned in the current and prior periods. The defined benefit obligation is calculated for every period end by Actuaries using the projected unit credit method.

The liability recognized for defined benefit plans is the present value of the defined benefit obligation at the reporting date less the fair value of plan assets, together with adjustments for unrecognized actuarial gains or losses and past service costs. The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. The benefits are discounted using the government securities (G-Sec) at the end of the reporting period that have terms approximating to the terms of related obligation.

Remeasurements of the net defined benefit obligation, which comprise actuarial gains and losses, the return on plan assets (excluding interest) and the effect of the asset ceiling, are recognized in other comprehensive income. Remeasurements recognized in other comprehensive income are reflected immediately in retained earnings and will not be reclassified to the statement of profit and loss.

### **3.10 INVESTMENT IN BULLION**

Investment in Bullion is measured and carried at Cost.

### 3.11 FINANCIAL INSTRUMENTS

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

#### 3.11.1 Financial Assets

➤ Recognition and Initial Measurement:

All financial assets are initially recognized when the Group becomes a party to the contractual provisions of the instruments. A financial asset is initially measured at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. However, trade receivables that do not contain a significant financing component are measured at transaction price.

➤ Classification and Subsequent Measurement:

For purposes of subsequent measurement, financial assets are classified in four categories:

- Measured at Amortized Cost;
- Measured at Fair Value Through Other Comprehensive Income (FVTOCI);
- Measured at Fair Value Through Profit or Loss (FVTPL); and
- Equity Instruments designated at Fair Value through Other Comprehensive Income (FVTOCI).

Financial assets are not reclassified subsequent to their initial recognition, except if and in the period the Group changes its business model for managing financial assets.

- Measured at Amortized Cost: A debt instrument is measured at the amortized cost if both the following conditions are met:
  - The asset is held within a business model whose objective is achieved by both collecting contractual cash flows; and
  - The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortized cost using the effective interest rate (EIR) method. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included in finance income in the statement of profit or loss. The losses arising from impairment are recognized in the profit or loss. This category generally applies to trade receivables, cash and bank balances, loans and other financial assets of the Group.

- Measured at FVTOCI: A debt instrument is measured at the FVTOCI if both the following conditions are met:
  - The objective of the business model is achieved by both collecting contractual cash flows and selling the financial assets; and
  - The asset's contractual cash flows represent SPPI.

Debt instruments meeting these criteria are measured initially at fair value plus transaction costs. They are subsequently measured at fair value with any gains or losses arising on remeasurement recognized in other comprehensive income, except for impairment gains or losses and foreign exchange gains or losses. Interest calculated using the effective interest method is recognized in the statement of profit and loss in investment income.

- Measured at FVTPL: FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as FVTPL. In addition, the Group may elect to designate a debt instrument, which otherwise meets amortized cost or FVTOCI criteria, as at FVTPL. Debt instruments included within the FVTPL category are measured at fair value with all changes recognized in the statement of profit and loss. Equity instruments which are, held for trading are classified as at FVTPL.

- Equity Instruments designated at FVTOCI: For equity instruments, which has not been classified as FVTPL as above, the Group may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The Group makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable. In case the Group decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to P&L, even on sale of investment.
- Investment in subsidiaries: A subsidiary is an entity controlled by the Company. Control exists when the Company has power over the entity, is exposed, or has rights to variable returns from its involvement with the entity and has the ability to affect those returns by using its power over entity. Power is demonstrated through existing rights that give the ability to direct relevant activities, those which significantly affect the entity's returns. Investments in subsidiaries are carried at cost. The cost comprises price paid to acquire investment and directly attributable cost.

➤ Derecognition:

The Group derecognizes a financial asset on trade date only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity.

➤ Impairment of Financial Assets:

The Group assesses at each date of balance sheet whether a financial asset or a group of financial assets is impaired. Ind AS – 109 requires expected credit losses to be measured through a loss allowance. The Group recognizes impairment loss for trade receivables that do not constitute a financing transaction using expected credit loss model, which involves use of a provision matrix constructed on the basis of historical credit loss experience. For all other financial assets, expected credit losses are measured at an amount equal to the 12 month expected credit losses or at an amount equal to the life time expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition.

➤ Trade Receivables:

A receivable is classified as a 'trade receivable' if it is in respect to the amount due from customers on account of goods sold or services rendered in the ordinary course of business. Trade receivables are recognised initially at transaction value except trade receivable that contains significant financing component that are subsequently measured at amortised cost using the effective interest method, less provision for impairment. For some trade receivables, the Company may obtain security in the form of guarantee, security deposit or letter of credit which can be called upon if the counterparty is in default under the terms of the agreement.

### 3.11.2 Financial Liabilities

➤ Recognition and Initial Measurement:

Financial liabilities are classified, at initial recognition, as at fair value through profit or loss, loans and borrowings, payables or as derivatives, as appropriate. All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

➤ Subsequent Measurement:

Financial liabilities are measured subsequently at amortized cost or FVTPL. A financial liability is classified as FVTPL if it is classified as held-for-trading, or it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognized in profit or loss. Other financial liabilities are subsequently measured at amortized cost using the effective interest rate method. Interest expense and foreign exchange gain and losses are recognized in profit or loss. Any gain or loss on derecognition is also recognized in profit or loss.

➤ Derecognition:

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires.

### **3.11.3 Offsetting financial instruments**

Financial assets and liabilities are offset and the net amount is reported in the balance sheet when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the counterparty.

### **3.12 Earnings per Share**

Basic Earnings per share (EPS) amounts are calculated by dividing the profit for the year attributable to equity holders by the weighted average number of equity shares outstanding during the year. Diluted EPS amounts are calculated by dividing the profit attributable to equity holders adjusted for the effects of potential equity shares by the weighted average number of equity shares outstanding during the year plus the weighted average number of equity shares that would be issued on conversion of all the dilutive potential equity shares into equity shares.

### **3.13 Impairment of Non-Financial Assets**

The Group assesses, at each reporting date, whether there is an indication that an asset may be impaired. An asset is treated as impaired when the carrying cost of the asset exceeds its recoverable value being higher of value in use and net selling price. Value in use is computed at net present value of cash flow expected over the balance useful lives of the assets. For the purpose of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or group of assets (Cash Generating Units – CGU).

An impairment loss is recognized as an expense in the Statement of Profit and Loss in the year in which an asset is identified as impaired. The impairment loss recognized in earlier accounting period is reversed if there has been an improvement in recoverable amount.

### **3.14 Provisions, Contingent Liabilities and Contingent Assets**

#### **3.14.1 Provisions**

Provisions are recognized when there is a present obligation (legal or constructive) as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Provisions are determined by discounting the expected future cash flows (representing the best estimate of the expenditure required to settle the present obligation at the balance sheet

date) at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The unwinding of the discount is recognized as finance cost.

### 3.14.2 Contingent Liabilities

Contingent liability is a possible obligation arising from past events and the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Group or a present obligation that arises from past events but is not recognized because it is not possible that an outflow of resources embodying economic benefit will be required to settle the obligations or reliable estimate of the amount of the obligations cannot be made. The Group discloses the existence of contingent liabilities in Other Notes to Financial Statements.

### 3.14.3 Contingent Assets

Contingent assets usually arise from unplanned or other unexpected events that give rise to the possibility of an inflow of economic benefits. Contingent Assets are not recognized though are disclosed, where an inflow of economic benefits is probable.

### 3.14.4 BUSINESS COMBINATIONS

The acquisitions of businesses are accounted for using the acquisition method. The cost of the acquisition is measured at the aggregate of the fair values at the date of exchange of assets given, liabilities incurred or assumed and equity instruments issued by the Company in exchange for control of the acquiree. The acquiree's identifiable assets, liabilities and contingent liabilities that meet the condition for recognition are recognised at their fair value.

## 4 SIGNIFICANT JUDGEMENTS AND KEY SOURCES OF ESTIMATION IN APPLYING ACCOUNTING POLICIES

Estimates and judgments are continually evaluated. They are based on historical experience and other factors, including expectations of future events that may have a financial impact on the Group and that are believed to be reasonable under the circumstances.

### 4.1 Critical Accounting Estimates and Key Sources of Estimation Uncertainty:

Information about Significant judgements and Key sources of estimation made in applying accounting policies that have the most significant effects on the amounts recognized in the Restated Financial Statements is included in the following notes:

- **Recognition of Deferred Tax Assets:** The extent to which deferred tax assets can be recognized is based on an assessment of the probability of the Group's future taxable income against which the deferred tax assets can be utilized. In addition, significant judgement is required in assessing the impact of any legal or economic limits.
- **Right-of-use assets and lease liability:** The Group has exercised judgement in determining the lease term as the non-cancellable term of the lease, together with the impact of options to extend or terminate the lease if it is reasonably certain to be exercised. Where the rate implicit in the lease is not readily available, an incremental borrowing rate is applied. This incremental borrowing rate reflects the rate of interest that the lessee would have to pay to borrow over a similar term, with a similar security, the funds necessary to obtain an asset of a similar nature and value to the right of-use asset in a similar economic environment. Determination of the incremental borrowing rate requires estimation.
- **Defined Benefit Obligation (DBO):** Employee benefit obligations are measured on the basis of actuarial assumptions which include mortality and withdrawal rates as well as assumptions concerning future developments in discount rates, medical cost trends, anticipation of future salary increases and the inflation rate. The Group considers that the assumptions used to measure its obligations are appropriate. However, any changes in these assumptions may have a material impact on the resulting calculations.
- **Provisions and Contingencies:** The assessments undertaken in recognising provisions and contingencies have been made in accordance with Indian Accounting Standards (Ind AS) 37, 'Provisions, Contingent Liabilities and Contingent

Assets'. The evaluation of the likelihood of the contingent events is applied best judgement by management regarding the probability of exposure to potential loss.

- **Impairment of Financial Assets:** The Group reviews its carrying value of investments carried at amortized cost annually, or more frequently when there is indication of impairment. If recoverable amount is less than its carrying amount, the impairment loss is accounted for.
- **Allowances for Doubtful Debts:** The Group makes allowances for doubtful debts through appropriate estimations of irrecoverable amount. The identification of doubtful debts requires use of judgment and estimates. Where the expectation is different from the original estimate, such difference will impact the carrying value of the trade and other receivables and doubtful debts expenses in the period in which such estimate has been changed.
- **Fair value measurement of financial Instruments:** When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques. The input to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

## 4.2 Basis of Consolidation

### Consolidation procedure

Combine like items of assets, liabilities, equity, income, expenses and cash flows of the Holding Company with those of its subsidiaries. For this purpose, income and expenses of the subsidiary are based on the amounts of the assets and liabilities recognized in the Restated Consolidated Financial Statements at the acquisition date. Offset (eliminate) the carrying amount of the Holding Company's investment in each subsidiary and the Holding Company's portion of equity of each subsidiary. Business combinations policy explains how to account for any related goodwill. Eliminate in full intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between entities of the group (profits or losses resulting from intragroup transactions that are recognized in assets, such as inventory and fixed assets, are eliminated in full). Intragroup losses may indicate an impairment that requires recognition in the Restated Consolidated Financial Statements. Ind AS 12 Income Taxes applies to temporary differences that arise from the elimination of profits and losses resulting from intragroup transactions. Profit or loss and each component of other comprehensive income (OCI) are attributed to the equity holders of the Holding Company and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

#### 4.2.1 Subsidiaries

These Restated Financial Information for the years ended March 31, 2025, March 31, 2024 and March 31, 2023 are prepared in accordance with Ind AS specified under Section 133 of the Act. Subsidiaries are entities controlled by the Group. The Group controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The Financial Statements of subsidiaries are included in the Restated Financial Information from the date on which control commences until the date on which control ceases. (Refer Point 3.12.1 above)

#### 4.2.2 Non-Controlling Interest (NCI)

NCI are measured at their proportionate share of the subsidiary's net identifiable assets at the date of acquisition. Changes in the Group's equity interest in a subsidiary that do not result in a loss of control are accounted for as equity transactions.

#### 4.2.3 Loss of control

When the Group loses control over a subsidiary, it derecognises the assets and liabilities of the subsidiary, and any related NCI and other components of equity. Any interest retained in the former subsidiary is measured at fair value at the date the control is lost. Any resulting gain or loss is recognised in profit or loss.

#### 4.2.4 Transactions eliminated on consolidation

The financial statements of the Holding Company and its subsidiaries used in the consolidation procedures are drawn upon the same reporting date i.e. 31<sup>st</sup> March, 2025 and March 31, 2024. The financial statements of the Holding Company and its subsidiary companies are combined on a line-by-line basis by adding together the book values of like items of assets, liabilities, income and expenses. Intra-group balances and transactions, and any unrealised income and expenses arising from intra-group transactions, are eliminated.

#### 4.2.5 Recent Pronouncement

The Ministry of Corporate Affairs (MCA) regularly notifies new standards or amendments to existing standards under the Companies (Indian Accounting Standards) Rules. For the year ending 31<sup>st</sup> March, 2025, the MCA has not notified any new standards or amendments to the standards that are applicable to the Group.

### NON-GAAP MEASURES AS PER PROFORMA CONSOLIDATED FINANCIAL INFORMATION

#### **Earnings before Interest, Taxes, Depreciation and Amortization Expenses (EBITDA)/ EBITDA Margin/ Return on Capital Employed / PAT Margin / Return on Equity / Gross Profit/ Gross Margin/ Net Working Capital as # days of Revenues from Operations**

In addition to our results determined in accordance with Ind AS, we believe the following Non-GAAP measures are useful to investors in evaluating our operating performance and liquidity. We use the following Non-GAAP financial information to evaluate our ongoing operations and for internal planning and forecasting purposes. We believe that Non-GAAP financial information, when taken collectively with financial measures disclosed in the financial statements prepared in accordance with Ind AS, may be helpful to investors because it provides an additional tool for investors to use in evaluating our ongoing operating results and trends and in comparing our financial results with other companies in our industry because it provides consistency and comparability with past financial performance. However, our management does not consider these Non-GAAP measures in isolation or as an alternative to financial measures.

Gross Profit, Gross Margin, EBITDA, EBITDA Margin, PAT Margin, Return on Capital Employed, Return on Equity and Net Working Capital as # days of Revenues from Operations (**Non-GAAP Measures**) presented in this Red Herring Prospectus is a supplemental measure of our performance and liquidity that is not required by, or presented in accordance with, Ind AS, IFRS or US GAAP. Further, EBITDA is not a measurement of our financial performance or liquidity under Ind AS, IFRS or US GAAP and should not be considered in isolation or construed as an alternative to cash flows, profit/ (loss) for the year or any other measure of financial performance or as an indicator of our operating performance, liquidity, profitability or cash flows generated by operating, investing or financing activities derived in accordance with Ind AS, IFRS or US GAAP. In addition, Non-GAAP Measures are not standardised terms, hence a direct comparison of Non-GAAP Measures between companies may not be possible. Other companies may calculate the Non-GAAP Measure differently from us, limiting its usefulness as a comparative measure. Although Non-GAAP Measures is not a measure of performance calculated in accordance with applicable accounting standards, our Company's management believes that it is useful to an investor in evaluating us because it is a widely used measure to evaluate a company's operating performance. See '*Risk Factors - Certain non-GAAP financial measures and certain other statistical information relating to our operations and financial performance like Gross Profit, Gross Margin, EBITDA, EBITDA Margin, PAT Margin, Return on Capital Employed, Return on Equity and Net Working Capital as # days of Revenues from Operations have been included in this Red Herring Prospectus. These non-GAAP financial measures are not measures of operating performance or liquidity defined by Ind AS and may not be comparable*' on page 58.

## FISCAL 2025 COMPARED TO FISCAL 2024

### Income

#### *Total Income*

Our total income increased by 34.34% from ₹ 6,586.20 million in Fiscal 2024 to ₹ 8,847.76 million in Fiscal 2025, due to an increase in our revenue from operations and other income as discussed below.

#### *Revenue from operations*

Our revenue from operations increased by 60.27% from ₹ 5,300.52 million in Fiscal 2024 to ₹ 8,494.91 million in Fiscal 2025, due to an increase in the revenue from our education consultancy services.

#### *Other income*

Our other income decreased by (72.56%) from ₹ 1,285.68 million in Fiscal 2024 to ₹ 352.85 million in Fiscal 2025. This is primarily due to our other income in Fiscal 2024 had (i) a gain on fair valuation of investment measured at FVTPL (i.e., fair value through profit or loss) of ₹ 524.49 million in Fiscal 2024 which was ₹ Nil in Fiscal 2025; (ii) a profit on sale of investments measured at FVTPL (i.e., fair value through profit or loss) of ₹ 502.24 million in Fiscal 2024 which was only ₹ 92.73 million in Fiscal 2025; and (iii) income from derivative instruments of ₹ 121.92 million in Fiscal 2024 which was ₹ Nil in Fiscal 2025. However, this was partially offset primarily by an increase in interest income from ₹ 83.04 million (comprising interest income on fixed deposits of ₹ 62.93 million and interest income of ₹

20.11 million on interest on income tax refund, loan and bonds) in Fiscal 2024 to ₹ 213.91 million (comprising only of interest income on fixed deposits) in Fiscal 2025.

## **Expenses**

### *Total Expenses*

Our total expenses increased by 71.89% from ₹ 3,969.60 million in Fiscal 2024 to ₹ 6,823.36 million in Fiscal 2025, due to an increase in various expenses as discussed below.

### *Cost of services*

## Mechanism for redressal of Investor Grievances

SEBI, by way of its Master Circular no. SEBI/HO/MIRSD/POD-1/P/CIR/2023/70 dated May 17, 2023 (to the extent applicable) has identified the need to put in place measures, in order to manage and handle investor issues arising out of the UPI Mechanism, *inter alia*, in relation to delay in receipt of mandates by Bidders for blocking of funds due to systemic issues faced by Designated Intermediaries/SCSBs and failure to unblock funds in cases of partial allotment/non allotment within prescribed timelines and procedures. Per the Master Circular no. SEBI/HO/MIRSD/POD-1/P/CIR/2023/70 dated May 17, 2023 (to the extent applicable), SEBI has prescribed certain mechanisms to ensure proper management of investor issues arising out of the UPI Mechanism, including: (i) identification of a nodal officer by SCSBs for the UPI Mechanism; (ii) delivery of SMS alerts by SCSBs for blocking and unblocking of UPI Mandate Requests; (iii) hosting of a web portal by the Sponsor Banks containing statistical details of mandate blocks/unblocks; (iv) limiting the facility of reinitiating UPI Bids to Syndicate Members to once per Bid; and (v) mandating SCSBs to ensure that the unblock process for non-allotted/partially allotted applications is completed by the closing hours of 1 Working Day subsequent to the finalisation of the Basis of Allotment.

The processing fees for applications made by UPI Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Master Circular no. SEBI/HO/MIRSD/POD-1/P/CIR/2023/70 dated May 17, 2023 (to the extent applicable) and SEBI Master Circular no. SEBI/HO/CFD/PoD-2/P/CIR/2023/00094 dated June 21, 2023 (to the extent applicable).

In terms of SEBI Master Circular no. SEBI/HO/MIRSD/POD-1/P/CIR/2023/70 dated May 17, 2023 (to the extent applicable) and SEBI Master Circular no. SEBI/HO/CFD/PoD-2/P/CIR/2023/00094 dated June 21, 2023 (to the extent applicable) and subject to applicable laws, any ASBA Bidder whose Bid has not been considered for Allotment, due to failure on the part of any SCSB, shall have the option to seek redressal of the same by the concerned SCSB within 3 months of the date of listing of the Equity Shares. SCSBs are required to resolve these complaints within 15 days, failing which the concerned SCSB would have to pay interest at the rate of 15% p.a. for any delay beyond this period of 15 days. Further, the investors shall be compensated by the SCSBs in accordance with SEBI Master Circular no. ### **Phased implementation of UPI**

SEBI has issued UPI Circulars in relation to streamlining the process of public issue of equity shares and convertibles by introducing an alternate payment mechanism using UPI. Pursuant to the UPI Circulars, UPI has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by UPI Bidders through intermediaries with the objective to reduce the time duration from public issue closure to listing from 6 Working Days to up to 3 Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced and implemented the UPI payment mechanism in 3 phases in the following manner:

- a) **Phase I:** This phase was applicable from January 1, 2019 until March 31, 2019 or floating of 5 main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended

until June 30, 2019. Under this phase, an RII also had the option to submit the ASBA Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing would continue to be 6 Working Days.

- b) **Phase II:** This phase has become applicable from July 1, 2019. SEBI through its Circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 (SEBI Master Circular no. SEBI/HO/MIRSD/POD-1/P/CIR/2023/70 dated May 17, 2023 ((to the extent applicable))) decided to extend the timeline for implementation of UPI Phase II until March 31, 2020. Further, SEBI through its Circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 (as superseded by SEBI Master Circular no. SEBI/HO/MIRSD/POD-1/P/CIR/2023/70 dated May 17, 2023 (to the extent applicable)) decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the physical ASBA Form by an RII through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds has been discontinued and is replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be 6 Working Days during this phase.
- c) **Phase III:** Pursuant to SEBI circular no. SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023, Phase III has been notified, and accordingly the revised timeline of T+3 days (i.e., the time duration from public issue closure to listing of be 3 Working Days) has been made applicable in two phases i.e., (i) voluntary for all public issues opening on or after September 1, 2023; and (ii) mandatory on or after December 1, 2023 (**T+3 Circular**). The Offer shall be undertaken pursuant to the processes and procedures as notified in the T+3 Circular as applicable, subject to any circulars, clarification or notification issued by SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one Working Day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the applicable law. Additionally, if there is any delay in the redressal of investors' complaints, the relevant SCSB as well as the post-Offer BRLMs will be required to compensate the concerned investor.

Further, in terms of the UPI Circulars, the payment of processing fees to the SCSBs shall be undertaken pursuant to an application made by the SCSBs to the BRLMs, and such application shall be made only after (i) unblocking of application amounts for each application received by the SCSB has been fully completed, and (ii) applicable compensation relating to investor complaints has been paid by the SCSB.

The Offer will be made under UPI Phase III of the UPI Circular.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using UPI. Our Company will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the UPI Bidders using the UPI.

Further, pursuant to SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2022/45 dated April 5, 2022, all UPI Bidders applying in public issues where the application amount is up to ₹ 0.50 million shall use the UPI Mechanism and shall also provide their UPI ID in the Bid cum Application Form submitted with any of the entities mentioned herein below:

Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment.
