SUMMARY OF OUR INDUSTRY

Education is a human right, a powerful driver of development, and one of the strongest instruments for reducing poverty and improving health, gender equality, peace, and stability. It delivers large, consistent returns in terms of income, and is the most important factor to ensure equity and inclusion.

In low- and middle-income countries, the share of children living in Learning Poverty (that is, the proportion of 10-year-old children that are unable to read and understand a short age-appropriate text) increased from 57% before the pandemic to an estimated 70% in 2022.

However, learning is in crisis. More than 70 million more people were pushed into poverty during the COVID pandemic, a billion children lost a year of school, and three years later the learning losses suffered have not been recouped. If a child cannot read with comprehension by age 10, they are unlikely to become fluent readers. They will fail to thrive later in school and will be unable to power their careers and economies once they leave school.

SECTION III – RISK FACTORS

An investment in Equity Shares involves a high degree of financial risk. Investors should carefully consider all information in this Draft Red Herring Prospectus, including the risks described below, before making an investment in our Equity Shares. If any of the following risks, or other risks that are not currently known or are now deemed immaterial, actually occur, our business, results of operations, cash flows and financial condition could suffer, the price of the Equity Shares could decline, and you may lose all or part of your investment. In making an investment decision, prospective investors must rely on their own examination of us and the terms of the Issue including the merits and risks involved. Investors should consult their tax, financial and legal advisors about particular consequences to them of an investment in the Issue. The risk factors set forth below do not purport to be complete or comprehensive in terms of all the risk factors that may arise in connection with our business or any decision to purchase, own or dispose of the Equity Shares. This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. However, there are certain risk factors where the financial impact is not quantifiable and, therefore, such financial impact cannot be disclosed in such risk factors. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial or other implications of any of the risks described in this section. Any of the following risks, as well as the other risks and uncertainties discussed in this Draft Red Herring Prospectus, could have a material adverse effect on our business and could cause the trading price of our Equity Shares to decline and you may lose all or part of your investment.

This Draft Red Herring Prospectus also contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Draft Red Herring Prospectus. See chapter titled “Forward Looking Statements” beginning on page 20 of this Draft Red Herring Prospectus.

To obtain a better understanding of our business, you should read this chapter in conjunction with other chapters of this Draft Red Herring Prospectus, including the chapters titled “Our Business”, “Management’s Discussion and Analysis of Financial Condition and Results of Operations”, “Industry Overview” and “Restated Financial Statements” on page 129, 224, 104 and 184 respectively of this Draft Red Herring Prospectus, together with all other Restated Financial Statements contained in this Draft Red Herring Prospectus. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Draft Red Herring Prospectus.

Unless otherwise stated, the financial data in this chapter is derived from our Restated Financial Statements for the financial years ended March 31, 2024, 2023, and 2022 as included in “Restated Financial Statements” beginning on page 184 of this Draft Red Herring Prospectus.

MATERIALITY

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

- Some events may have material impact quantitatively;
- Some events may have material impact qualitatively instead of quantitatively.
- Some events may not be material individually but may be found material collectively.
- Some events may not be material at present but may be having material impact in future.

INTERNAL RISKS

1. Changes in the foreign Policy on Student VISA and Immigration may affect our business adversely.

Our business operations are completely dependent on enrolling students from various jurisdictions into global institutions of higher education which are located in a different jurisdiction. Accordingly, the norms for issuing VISAs, in particular, student VISAs play a significant role in our business operations and our ability to generate revenue is heavily reliant on such legislations. Further, the global institutions of higher education with whom we collaborate are majorly concentrated in Canada.

Any change in the immigration policy of the countries, any adverse political scenario of the country and the reduction of the job opportunity in particular country may reduce the clients opting for immigration visa. The revenue of the Company will be affected due to such situation and it will result in to loss of revenue and the profitability and the cash flow of the Company. Due to rift between Canada and India on account of statement by the prime minister of Canada alleging the killing of pro Khalistani, Indian Government had ordered Canada to Remove most of diplomats from the India and India has stopped issuing the Indian Visa to Canadian Citizen. On account of political situation, the issue of Canada visa were delayed.

Loss of all or any of the global institutions of higher education or our ability to enrol students from our major revenue generating jurisdictions may have an adverse impact on our financial conditions, results of operations and future business prospects. There can be no assurance that our Company will be able to successfully identify other jurisdictions in a timely manner or at all, in relation to both global institutions of higher education and students, to mitigate the impact of such adverse change in the legislations.

2. ***We generate our major portion of sales from our operations from a particular geographical region, Canada. Any adverse developments affecting our operations in this country could have an adverse impact on our revenue and results of operations.***

For the Financial year ended March 31, 2024, 2023 and 2022 our revenue from the Institutions situated in Canada contributed 69.61%, 57.30% and 52.30% respectively of our total revenue as per the audited financial statements. Such geographical concentration of our business in this country heightens our exposure to adverse developments related to competition as well as economic and demographic changes in this country which may adversely affect our business prospects, financial conditions and results of operations. We may not be able to leverage our experience in that country to expand our operations in other parts of world, should we decide to further expand our operations. Factors such as competition, regulatory regimes, business practices and customs, industry needs, where we may expand our operations may differ from those in such regions and our experience in these regions may not be applicable to other industries. In addition, as we plan to enter new geographical areas, we are likely to compete not only with national players, but also local players who might have an established local presence and are more familiar with local regulations, business practices and industry needs, have stronger relationships with local dealers, relevant government authorities or are in a stronger financial position than us, all of which may give them a competitive advantage over us. Our inability to expand into areas may adversely affect our business prospects, financial conditions and results of operations. While our management believes that the Company has requisite expertise and vision to grow and mark its presence in other countries going forward, investors should consider our business and prospects in light of the risks, losses and challenges that we may face and should not rely on our results of operations for any prior periods as an indication of our future performance.

3. ***Our Company is heavily dependent on few global institutions of higher education for our revenue. Any loss of such global institutions of higher education may have an adverse impact on our business, results of operations and financial conditions.***

We are one of the education platforms offering Indian student counselling to pursue education in global institutions for higher education majorly in Canada. While revenue from any particular institution of higher education may vary between financial reporting periods depending on the nature and term of on-going contracts, historically, we have been dependent on a limited set of global institutions of higher education for a majority of our revenue from operations. During the Fiscal 2024, Fiscal 2023 and Fiscal 2022, our revenue from operations from our top 5 and 10 global institutions of higher education, was as set out below:

(Rs. in Lakhs)

Particulars	2024		2023		2022	
	Revenue	% of revenue from operations	Revenue	% of revenue from operations	Revenue	% of revenue from operations
Our top 5 global institutions of higher education	1,879.78	53.88	767.18	39.17	632.21	34.46
Our top 10 global institutions of higher education	2,170.73	62.22	987.98	50.45	869.21	47.38

Note: As certified by M/s Sukhpal Singh & Co. Chartered Accountants through their certificate dated August 22, 2024.

Our business, results from operations and financial conditions are heavily dependent on the ability to continue our relationship with our top 10 global institutions of higher education. Our failure or inability to continue such relationship for any reason (including, due to failure to negotiate acceptable terms or adverse change in the financial or economic conditions) could have a material adverse impact on our business, results of operations, financial condition and cash flows. Further, all or any of the aforementioned global institutions of higher education may cease to collaborate with us or replace us with an alternative. There can be no assurance that we will not lose all or a portion of our revenue due to our inability to maintain our relations with these global institutions of higher education or we will be able to offset any loss of such collaborations by having new collaborations.

4. *The global institutions of higher education with whom we work have differing criteria to determine our eligibility to earn revenues from education consultancy services.*

All of our customers i.e. global institutions of higher education, have different criteria to determine whether we are eligible to earn revenues for any student who has been enrolled through us. Such criteria include payment of fees by the student, completion of joining formalities as may be indicated by the institution and completion of a minimum period of education, stay, and/or enrolment at the institution. Once a student fulfils such criteria, the institution confirms our eligibility to earn revenues from such enrolment of such students and makes payment as per the terms of our contract with such institution. However, we cannot assure you that the eligibility criteria set by such global institutions of higher education will be met to make us eligible to receive fee pertaining to enrolment of a student. Some of our contracts with institutions of higher education include the institutions making payment for our services assuming that the student will continue in enrolment for the entire duration of the course. In case, the student discontinues the course before completion of an identified milestone, the institution may have the right to seek reversal of part of the payments made by the institution towards our services.

5. *Rejection of VISA by the foreign Embassy may adversely affect our Reputation, Business and Financial results.*

Customers are approaching us for different types of Visas such as Students Visa, Tourist/Business or Permanent Residency Visa (PRV). The VISA issuance policy of different countries is different and their eligibility criteria for Visa issue also differ from country to country. Looking to our experience in the field of Visa and immigration, generally we prepare our customers in such way, so that they get the Visa easily and without any hindrances or rejection. However, we cannot give any assurance about the getting of Visa of particular country. In case of rejection of Visa in number of cases, will adversely affect our brand image, Business and financial results.

6. *Our Company had negative cash flows in the past years from investing and Financing activities, details of which are given below. Sustained negative cash flow could impact our growth and business.*

We have experienced negative cash flows in the past from investing and Financing activities which have been set out below as per the restated consolidated financial statements:

(Rs. in Lakhs)

Particulars	March 31, 2024	March 31, 2023	March 31, 2022
Net cash generated from/ (used in) operating activities	712.69	252.36	395.52
Net cash generated from/ (used in) investing activities	(32.55)	72.66	(377.62)
Net cash generated from/ (used in) financing activities	8.32	(395.43)	(85.19)

Cash flows of a company is a key indicator to show the extent of cash generated from the operations of a company to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows, it may adversely affect our business and financial operations. For further details, see section titled “Restated Financial Statements” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” on pages 184 and 224, respectively of this Draft Red Herring Prospectus.

7. *At present we are not subject to any strict Governmental regulation, Introduction of any future Regulations or failure by us to renew, maintain or obtain the required permits or approvals may increase our compliance requirements and may result in the interruption of our operations and may have a material adverse effect on our business.*

We are governed by various laws and regulations for our business and operations. We are required, and will continue to be required, to obtain and hold relevant licenses, approvals and permits at state and central government levels for doing our business. The approvals, licenses, registrations and permits obtained by us may contain conditions. Further we will need to apply for renewal of certain approvals, licenses, registrations and permits, which expire or need to update pursuant to change in name and conversion of company to public Company.

While we have obtained a significant number of approvals, licenses, registrations and permits from the relevant authorities, all our lease deeds entered for the purpose of running our offices / centers/ branch offices are for period of 12 months and above and that none of them have been registered with the sub-registrar of the region. Although there is no major risk with an unregistered lease deed except that in case of any dispute, the lease cannot be challenged in law. Further there can be no assurance that the relevant authority will issue or renew expired approvals within the applicable time period or at all. Any delay in receipt or non-receipt of such approvals, licenses, registrations and permits could result in cost and time overrun or which could affect our related operations.

These laws and regulations governing us are increasingly becoming stringent and may in the future create substantial compliance or liabilities and costs. While we endeavor to comply with applicable regulatory requirements, it is possible that such compliance measures may restrict our business and operations, result in increased cost and onerous compliance measures, and an inability to comply with such regulatory requirements may attract penalty. For further details regarding the material approvals, licenses, registrations and permits, see “Government and Other Statutory Approvals” on page 239 of this Draft Red Herring Prospectus.

Furthermore, we cannot assure you that the approvals, licenses, registrations and permits issued to us will not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Any suspension or revocation of any of the approvals, licenses, registrations and permits that has been or may be issued to us may affect our business and results of operations.

8. Our major portion of revenue from operations is generated from the education consultancy services industry. A general decline or disruption in the education industry in relevant jurisdictions may adversely affect our business operations, results of operations and financial condition.

Our business activity primarily falls within a dual business segment, i.e., global educational consultancy services and immigration consultancy services, however, our majority of the revenue from operations is generated from the global education consultancy services. Our services are primarily focused on the jurisdiction of Canada. During Fiscal 2024, Fiscal 2023 and Fiscal 2022, our revenue from global educational consultancy services, based on our Financial Information, following is the break-up of revenue from services for the financial year ended March 31, 2024, 2023 and 2022.

(Rs. in Lakhs)

Particulars	For the year ended March 31, 2024		For the year ended March 31, 2023		For the year ended March 31, 2022	
	Amount	% of total Revenue	Amount	% of total Revenue	Amount	% of total Revenue
Global Educational Consultancy Services (GEC)						
Commission Fees	2,943.81	84.38%	1,194.98	61.02%	1,357.24	73.99%
Franchisee Fees	4.00	0.11%	Nil	Nil	5.01	0.27%
Immigration Consultancy Services (IC) for Tourist/Business and application for Permanent Residency (PR)						
Processing Fees	541.07	15.51%	763.30	38.98%	472.16	25.74%
Total	3,488.88	100.00%	1,958.28	100.00%	1,834.41	100.00%

Note: As certified by M/s Sukhpal Singh & Co. Chartered Accountants through their certificate dated August 09, 2024.

While there have been no instances in the last 3 Fiscals leading to a decline or disruption in the education industry in our key geographies, any such decline or disruption, may have an adverse impact on our revenue from operations and financial conditions. Further, there can be no assurance that our revenue from other jurisdictions will increase or be sufficient to set-off any reduction in revenue from our currently largest revenue generating jurisdictions.

We operate our business through branch offices as well as through franchisee. We have 3 Franchisee model offices operating at Jammu, Karnal and Jind. In our franchise agreement all the point relating to the operation of business activities and reporting are covered. However, we cannot be sure that all the franchisee will strictly follow and observe the prescribed standards of SOP, payment schedules or reporting scheduled in all the cases. The franchisee relationship with client and services to the client will play much more role in expansion of our business and value addition to our brand. Any of the non-compliance of SOP or other terms and conditions of franchisee agreement may adversely affect our business, results of our operations and brand image.

13. Any disruption in our information technology systems may adversely affect our business, results of operations and prospects.

We are highly dependent on the information technology systems of our company. Our entire business is based on the successful and smooth running of information technology system of our organization. The growth of our business is dependent on smooth functioning of information technology systems of our company. The information and technology system are subject to damage or incapacitation by natural disasters, human error, power loss, sabotage, computer viruses, hacking, acts of terrorism and similar events or the loss of support services from third parties. Considering the nature of our business and the industry in which we operate, it is imperative for us to have a robust information technology platform. If our data capturing, processing and sharing cannot be integrated and/or we experience any defect or disruption in the use of, or damage to, our information technology systems, it may adversely affect our business and income of the Company.

14. We conduct our business majorly in Canada and may be unsuccessful in operating and expanding into new regions and face numerous legal and regulatory requirements while operating and expanding and violation of these regulations could harm our business.

We conduct our business majorly in Canada. The region in which we operate are diverse and fragmented, with varying levels of economic and infrastructure development and distinct legal and regulatory systems and do not operate seamlessly across borders as a single or common industry. The costs involved in entering and establishing ourselves in new regions and operating and expanding such operations may be higher than expected and we may face significant competition in these regions. The political, economic and market conditions in certain regions may also subject us to high costs of compliance, cultural challenges and taxation risks. Moreover, breaking the incumbency of local or global competition among clients may require us to make investments that may adversely affect our results of operations. We may also face additional risks in setting up operations in new markets in which we have no prior operating history. These factors may have an adverse effect on our ability to expand into emerging markets and thus on our business and financial condition.

We are subject to risks relating to compliance with a variety of national and local laws. Our failure to comply with applicable regulatory requirements could have a material adverse effect on our business, results of operations and financial condition. Additionally, we are also subject to risks relating to the complexities of assimilating varying work cultures that are needed to ensure smooth running of our operations

15. Our inability to cater to and suitably update and enhance the depth of our course and service offerings may adversely affect our business, financial condition and results of operations.

We are continuing to explore opportunities to increase penetration of consultancy service business. In addition, we are continuing to explore opportunities to expand our distribution network, by entering into agreements with new colleges. We may incur substantial costs in expanding our market reach, including in relation to due diligence, infrastructure costs, difficulty in recruiting and training faculty and other personnel. We cannot guarantee that our service offerings will be successful, on account of factors within and outside our control, including general economic conditions or our failure to understand and anticipate evolving market demand and trends. We may lose or be required to write off part of our investment in development and promotion of service offerings.

16. Our business operations are seasonal in nature, Due to such seasonal variations, our sales and results of operations may vary for every quarter and may not be relied upon as indicators of the sales or results of operations of other fiscal quarters, or of our future performance.

Our Company operates in the global educational and immigration consultancy service industry and as a service, we assist in enrolling students to global institutions of higher education. Enrolment into global educational institution is seasonal in nature and typically, enrolments are undertaken during specified intakes. Key intakes which are currently relevant to us occur during the months of January/ February, April/ May and September/ October. As our revenue is generated majorly from our global educational consultancy services, our revenue during the enrolment season is significantly higher than the rest of the year. Accordingly, our performance during the seasonal period may not be indicative of our performance for that particular year. Further, due to such seasonal variations, our sales and results of operations may vary for every quarter and may not be relied upon as indicators of the sales or results of operations of other fiscal quarters, or of our future performance. We have experienced and expect to continue to experience, significant variability in our total revenue from operations, operating cash flows, operating expenses and net revenues on a seasonal basis

17. We have not entered into contracts or agreements with few of our Associated Colleges in relation to terms of our appointment. As a result, they may terminate their relationships with us without any notice and without consequence, which could materially and adversely impact our business.

We have not entered into any contracts or agreements with few of our Associated Colleges. As a result, they may terminate their relationships with us without any notice and without consequence which could materially and adversely impact our business. Consequently, our revenue may be subject to variability because of fluctuations in demand for our services. Although we place a strong emphasis on quality, pricing and timely delivery of our services, personal interaction by the top management with the associated colleges, etc., in the absence of contracts, any sudden change in the demand could adversely affect the business and the profitability of our Company.

18. We have not yet placed orders in relation to the funding Capital expenditure for setting-up new branches for which it is proposed to be financed from the Issue proceeds of the IPO. In the event of any delay in placing the orders, or in the event the expenditure towards setting up branches is not completed in a timely manner, or at all, may result in time and cost over-runs and our business, prospects and results of operations may be adversely affected.

We intend to use a part of the Net Proceeds for Funding Capital expenditure for setting up branches at different locations in India.

Total estimated cost as per quotation dated July 18, 2024, August 05, 2024 and August 07, 2024 issued by Vendors Chopra Brothers, Rakesh Electronics and Mitras Technocrafts Private Limited respectively in respect of Funding Capital Expenditure towards setting up 18 branches at different locations is ₹ 1,345.68 Lakhs. We are yet to place orders for the capital expenditure for the Proposed Project. We have not entered into any definitive agreements to utilize the Net Proceeds for this object of the Issue. Additionally, in the event of any delay in placement of such orders, the proposed schedule of implementation and deployment of the Net Proceeds may be extended or may vary accordingly. We cannot assure you that we will be able to undertake such capital expenditure within the cost indicated by such quotations or that there will not be cost escalations.

Our Proposed Project may be subject to potential problems and uncertainties that construction projects face including cost overruns or delays. Problems that could adversely affect our expansion plans include labour shortages, increased costs of equipment or manpower, delays in completion, defects in design or construction, the possibility of unanticipated future regulatory restrictions, delays in receiving governmental, statutory, environmental and other regulatory approvals, taxes and duties, interest and finance charges, environment and ecology costs and other external factors which may not be within the control of our management. Further, there can be no assurance that our budgeted costs may be sufficient to meet our proposed capital expenditure requirements. If our actual capital expenditures significantly exceed our budgets or even if our budgets were sufficient to cover these projects, we may not be able to achieve the intended economic benefits of these projects, which in turn may materially and adversely affect our financial condition, results of operations, cash flows, and prospects.

19. We are yet to identify the exact locations or properties for the setting up branches pursuant to which we intend to utilize the amount from Net Proceeds.

As on the date of this Draft Red Herring Prospectus, we are yet to identify the exact locations or enter into agreements for lease of suitable properties for setting up the branches pursuant to which we intend to utilize the amount from Net Proceeds. While we may open branches in, inter alia, top tier Indian cities, however, these locations are not exhaustive and may undergo changes. The locations will be decided by our Company after conducting a detailed analysis of the demographics, foot falls, lease rentals and other business and industry considerations. For further details, please see "Objects of the Issue" on page 74 of this Draft Red Herring Prospectus.

20. The deployment of the portion of the Net Proceeds towards our strategic acquisitions and investments may not take place within the period currently intended, and may be reduced or extended.

Our Company proposes to utilise up to ₹1,200 Lakhs from the Net Proceeds towards strategic acquisitions and investments as permitted under the Memorandum of Association, in particular, with a view to expand our business through acquisition of entity, brand acquisition, purchase of assets/business. For further details, see "Objects of the Issue-Details of the Objects-Funding strategic acquisitions and investments" on page 74 of this Draft Red Herring Prospectus. As we have not identified the potential acquisition targets, this amount is based on our management's current estimates, budgets and other relevant consideration and may not be the total value or cost of any such acquisitions. In the event the portion of the Net Proceeds to be utilised for the strategic acquisitions are insufficient, we may have to seek alternative sources of funding at additional finance costs, and the proposed acquisitions may not be completed on schedule, if at all.

While we intend to deploy the aforesaid portion of the Net Proceeds towards strategic acquisitions and investments over the next two financial years from listing of the Equity Shares pursuant to the Issue, and as described in the section titled "Objects of the Issue" on page 74, the actual deployment of funds will depend on a number of factors, including the timing, nature, size, location, cost of acquisition and number of acquisitions undertaken, as well as general macro or

microeconomic factors affecting our results of operation, financial condition and access to funds (debt or equity). Depending upon such factors, we may, subject to applicable law, have to reduce or extend the deployment period for the funding of strategic acquisitions and investments beyond the estimated two financial years, at the discretion of our management.

21. Our Company has entered into related party transactions in the past and may continue to enter into related party transactions in the future, which may potentially involve conflicts of interest with the equity shareholders.

Our Company in the past has entered into Related Party Transactions and may continue to do so in future also, which may affect our competitive edge. Our Company had entered into various transactions with our Promoters, Promoter Group, Directors and their Relatives. Also, the transactions are in compliance with Companies Act, 2013 and other applicable provisions. While we believe that all our related party transactions have been conducted on an arm's length basis, we cannot assure you that we may not have achieved more favorable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise.

Additionally, in the event of any delay in placement of such orders, the proposed schedule of implementation and deployment of the Net Proceeds may be extended or may vary accordingly. We cannot assure you that we will be able to undertake such capital expenditure within the cost indicated by such quotation or that there will not be cost escalations.

Our revenues are influenced by our marketing plans including advertising. If we adopt unsuccessful marketing and advertising campaigns, we may fail to attract new customers or retain existing customers. If our marketing and advertising strategies are unsuccessful, our business and results of operations could be materially adversely affected. In addition to it, the support of our employees is also critical for the success of our marketing programs, such as local marketing and any new strategic initiatives we seek to undertake. While we intend to deploy the aforesaid portion of the Net Proceeds towards advertising over the next two financial years from listing of the Equity Shares pursuant to the Issue, and as described in the section titled "Objects of the Issue" on page 74, the actual deployment of funds will depend on a number of factors.

23. We have entered into agreement with a vendor for social media advertising services for which it is proposed to be financed from the Issue proceeds of the IPO, however, if parties fail to fulfil the terms of the agreement, then this may adversely affect our business and results of operations.

We could be harmed by employee misconduct if our customers confidential information is misappropriated by us or our employees, our customers may consider us liable for that act and seek damages and compensation from us, in addition, to seeking termination of the contract. While there have been no instances during the last three financial year, of information technology breach or instances of cyber-attack, assertions of misappropriation of confidential information or the intellectual property of our customers against us, if successful, could have a material adverse effect on our business, financial condition and results of operations. Even if such assertions against us are unsuccessful, they may cause us to incur reputational harm and substantial cost.

Although we closely monitor our employees, misconduct, including acts of bribery, corruption or fraud by employees or executives, such acts could include binding us to transactions that exceed authorized limits or present unacceptable risks or they may hide unauthorized or unlawful activities from us, which may result insubstantial financial losses and damage to our reputation and loss of business from our customers. Employee or executive misconduct could also involve the improper use or disclosure of confidential information, which could result in regulatory sanctions and serious reputational or financial harm, including harm to our brand. While we have not experienced any such employee misconduct in the past, it is not always possible to deter employee or executive misconduct and the precautions taken and systems put in place to prevent and detect such activities may not be effective in all cases. Any instances of such misconduct could adversely affect our business and our reputation.

26. Our global consultancy service industry depends substantially on the consultants of our company and our ability to attract and retain them. Sudden decrease in the number of our consultants due to attrition may affect our operations and business. Strong competition in the immigration consultancy service sector could also decrease our market share and compel us to reduce fees or provide higher discounts on our fees.

This may have a material adverse impact on our Student Count, revenues and profitability. We may fail to identify, recruit or retain adequate qualified faculty members. Any failure to meet such human resource requirements may materially adversely affect our growth plans or negatively impact our quality and consistency of our services. Safety of students is becoming an increasing area of concern in the global education and immigration consultancy service industry. A few instances of safety breaches in the recent past by other educational institutions, including the victimization and harassment of students in educational institutions, have recently come into focus. Safety and security of students is a serious issue for educational institutions, students across all educational levels, and their parents. Failure to provide necessary safeguards to prevent the occurrence of harmful incidents or any physical injury to our students may materially adversely affect our reputation, business and financial condition. Further, any negative publicity regarding safety and security of students at our Centers may materially adversely affect the operations of Centers which, in turn, may materially adversely affect our enrolments and Student Count.

Our success largely depends upon the knowledge and experience of our Promoters, Directors, Key Managerial Personnel and Senior Management as well as our ability to attract and retain skilled personnel. We depend on the management skills and guidance of our Promoters for development of business strategies, monitoring their successful implementation and meeting future challenges. Further, we also significantly depend on the expertise, experience and continued efforts of our Key Managerial Personnel and Senior Management. Our future performance will depend largely on our ability to retain the continued service of our management team. If one or more of our Key Managerial Personnel or Senior Management Personnel are unable or unwilling to continue in his or her present position, it could be difficult for us to find a suitable or timely replacement and our business, financial condition and results of operations could be adversely affected.

In addition, we may require a long period of time to hire and train replacement personnel when personnel with technical expertise terminate their employment with us. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting and retaining personnel with technical expertise that our business requires. The loss of the services of such persons could have an adverse effect on our business, results of operations, cash flows and financial condition.

There is significant competition for management and other skilled personnel in our industry in which we operate, and it may be difficult to attract and retain the personnel we require in the future. There can be no assurance that our competitors will not offer better compensation packages, incentives and other perquisites to such skilled personnel. If we are not able to attract and retain talented employees as required for conducting our business, or if we experience high attrition levels which are largely out of our control, or if we are unable to motivate and retain existing employees, our business, financial condition and results of operations may be adversely affected. For further information, see “*Our Management*” on page 163 of this Draft Red Herring Prospectus.

30. Fluctuations in foreign currency exchange rates could materially affect our financial results.

We generate majority of our revenues in foreign currencies. Our customer base is spread across the globe with presence majorly in the Canada. Therefore, increases or decreases in the value of the Indian Rupees against other major currencies affect our net operating revenues, operating income and the value of balance sheet items denominated in foreign currencies. A significant portion of our consolidated operations are international and we may continue to earn a significant portion of our revenue in foreign currencies. Our ultimate realised loss or gain with respect to currency fluctuations will generally depend on the size and type of cross-currency exposures that we are exposed to the currency exchange rates associated with these exposures and changes in those rates, and other factors. All of these factors could materially adversely impact our results of operations, financial position and cash flows.

The following table sets out our revenues denominated in foreign currencies and their percentage in comparison with revenues from operations for the financial year ended March 31, 2024, 2023 and 2022:

(₹ in lakhs)

Particulars	For the Financial Year ended on		
	2024	2023	2022
Revenues in Foreign Currencies	2,428.45	1,123.81	1,001.57
Percentage of revenue from Operations (%)	69.61%	57.39%	54.60%

Economic, political and market conditions can adversely affect our business, results of operations and financial condition, including our revenue growth and profitability, which in turn could adversely affect our stock price. For further details, see "Management's Discussion and Analysis of Financial Condition and Results of Operations" on page 152 of the Draft Red Herring Prospectus.

31. We may not be fully insured for all losses we may incur.

Although we attempt to limit and mitigate our liability for damages arising from negligent acts, errors or omissions through contractual provisions, limitations of liability set forth in our contracts may not be enforceable in all instances or may not otherwise protect us from liability for damages.

In addition, certain liabilities, such as claims of third parties for which we may be required to indemnify our customers, are generally not limited under those agreements. We face the risk of loss resulting from, and the adverse publicity associated with, lawsuits, whether or not such claims are valid. Although we believe we have adequate insurance

coverage but that coverage may not continue to be available on reasonable terms or to be available in sufficient amounts to cover one or more large claims, and our insurers may disclaim coverage as to any future claim. Insurance coverage may be an inadequate remedy where the loss suffered is not easily quantifiable, for example, in the event of severe damage to our reputation. The successful assertion of one or more large claims against us that exceed available insurance coverage, or changes in our insurance policies (including premium increases or the imposition of large deductible or co-insurance requirements), could have a material adverse effect on our business, reputation, results of operations, financial condition and cash flows.

32. All the premises including our registered office and branch offices are not owned by us and we have only lease rights over such premises. In the event we lose such rights or are required to negotiate it, our cash flows, business, financial conditions and results of operations could be adversely affected.

Our Company has entered into certain lease or license agreements in relation to registered office, and branch offices. For further details, please see chapter titled “Our Business” beginning on page 129. Any of these lease or license agreements can be terminated, and any such termination could result in any of these offices being shifted. There can be no assurance that we will, in the future, be able to retain, renew or extend the leases for the existing locations on same or similar terms, or will be able to find alternate locations for these offices on similar terms favourable to us, in time or at all. Accordingly, we may experience business disruption, and this may materially and adversely affect our business, financial condition and result of operations.

33. Our Company’s Logo”  ” is not registered with Registrar of Trademark and Brand name “Landmark Immigration Consultants” is registered, any infringement of our logo or failure to get it registered may adversely affect our Business. Further, any kind of negative publicity or misuse of our brand name could hamper our Goodwill and our future Growth Strategies could be adversely affected.

The measures we take to protect our Intellectual Property including initiating legal proceedings, may not be adequate. Further, we may not be able to prevent infringement of our trademarks and a passing off action may not provide sufficient protection until such time that the aforesaid registration is granted.

Our logo “” is not registered, however, company have made an application for registration with the Registrar of Trademark for registration of our logo. Further, our brand name “Landmark Immigration Consultants” under class 39 is a registered trademark. If we are unable to register our logo in the future in our name or any objection on the same may require us to change our logo and brand name, we may lose the goodwill created so far. Further, the same may involve costly litigations and penal provisions if some legal consequences arise if someone from outside use our logo and brand name of the Company. We believe that our future growth and competitiveness would depend on our ability to establish and strengthen our Brand. We cannot guarantee that we will be able to make a lasting brand image with our clients and other people in the absence of a logo and brand name. Although, we believe that our present systems are adequate to protect our confidential information and intellectual property, there can be no assurance that our intellectual property data, will not be copied, infringed or obtained by third parties. Further, our efforts to protect our intellectual property may not be adequate and may lead to erosion of our Business Values and our Operations could be adversely affected. This may lead to litigations and any such litigations could be time consuming and costly and their outcome cannot be guaranteed. Our Company may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property, which may adversely affect our Business, Financial Condition and Results of Operations.

34. We operate in a competitive environment and face fair competition in our business from organized and unorganized players, which may adversely affect our business operations and financial condition.

The industry in which the Company operates is fairly competitive and our results of operations and financial condition are sensitive to, and may be materially adversely affected by competitive pricing and other factors. Competition may result in pricing pressures, reduced profit margins, lost market share or a failure to grow our market share, any of which could substantially harm our business and results of operations. The domestic segment which we cater to is fragmented and fairly competitive. We compete primarily on the basis of quality of our services, customer satisfaction and marketing. Thus, some of our competitors may have certain other advantages over us, including established track record, superior service offerings, larger portfolio of services, technology and greater market penetration, which may allow our competitors to better respond to market trends. They may also have the ability to spend more aggressively on marketing initiatives and may have more flexibility to respond to changing business and economic conditions than we do. We believe that in order to compete effectively, we must continue to maintain our reputation, be flexible and prompt in responding to rapidly changing market demands and customer preferences, and offer customer quality services at

competitive prices. There can be no assurance that we can effectively compete with our competitors in the future, and any such failure to compete effectively may have a material adverse effect on our business, financial condition and results of operations.

35. Conflicts of interest may arise out of common pursuits between our Company and entities forming part of promoter group and group company

There are common pursuits amongst our Company and Om Student Visas Private Limited, which forms part of our promoter group and group company and by virtue of this company engaging in similar business activities as that of our Company. Whilst we cannot assure you that a conflict of interest will not arise if the entity decides to pursue such activities in future, our Company shall adopt necessary procedures and practices as permitted by law and regulatory guidelines to address any instances of conflict of interest, if and when they may arise.

36. If we are unable to source business opportunities effectively, we may not achieve our financial objectives.

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees and to implement systems capable of effectively accommodating our growth. However, we cannot assure you that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It is also possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

37. We may not be successful in implementing our business strategies.

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

38. We are subject to risks associated with expansion into new geographic regions.

Expansion into new geographic regions, including different states in India, subjects us to various challenges, including those relating to our lack of familiarity with the culture, legal regulations and economic conditions of these new regions, language barriers, difficulties in staffing and managing such operations, and the lack of brand recognition and reputation in such regions. The risks involved in entering new geographic markets and expanding operations, may be higher than expected and we may face significant competition in such markets. By expanding into new geographical regions, we could be subject to additional risks associated with establishing and conducting operations, including laws and regulations, uncertainties and customer's preferences, political and economic stability. By expanding into new geographical regions, we may be exposed to significant liability and could lose some or all of our investment in such regions, as a result of which our business, financial condition and results of operations could be adversely affected.

39. The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.

Since, the Proceeds from Issue is less than Rs.10,000 lakh, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. However, as per the Section 177 of the Companies Act, 2013 and applicable laws, the Audit Committee of our Company would be monitoring the utilization of the Issue Proceeds. The deployment of these funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

40. Within the parameters as mentioned in the chapter titled "Objects of this Issue" beginning on page 74 of this Draft Red Herring Prospectus, our Company's management will have flexibility in applying the proceeds of the Issue. The fund requirement and deployment mentioned in the Objects of this Issue have not been appraised by any bank or financial institution.

We intend to use Net Proceeds towards capital expenditure for setting up of branches, Advertisement expenses towards enhancing the awareness and visibility of our brand and pursuing inorganic growth initiatives towards acquisitions. We intend to deploy the Net Proceeds in financial year 2024 – 25 and 2025 – 2026 such deployment is based on certain assumptions and strategy which our Company believes to implement in future. The funds raised from the issue may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc., For further details on the use of the Net Proceeds, please refer chapter titled “*Objects of the Issue*” beginning on page 74 of this Draft Red Herring Prospectus.

The deployment of funds for the purposes described above is at the discretion of our Company’s Board of Directors subject to the applicable laws. The fund requirement and deployment are based on internal management estimates and has not been appraised by any bank or financial institution. Accordingly, within the parameters as mentioned in the chapter titled “*Objects of the Issue*” beginning on page 74 of this Draft Red Herring Prospectus, the Management will have significant flexibility in applying the proceeds received by our Company from the Issue. Our Board of Directors will monitor the proceeds of this Issue. However, Audit Committee will monitor the utilization of the proceeds of this Issue and prepare the statement for utilization of the proceeds of this Issue. However, in accordance with Section 27 of the Companies Act, 2013, and relevant provisions of SEBI ICDR Regulations, 2018, a company shall not vary the objects of the Issue without our Company being authorised to do so by our shareholders by way of special resolution and other compliances in this regard. Our Promoters and controlling shareholders shall provide exit opportunity to such shareholders who do not agree to the proposal to vary the objects, at such price, and in such manner, as may be prescribed by SEBI, in this regard.

41. Our ability to pay dividends will depend upon future earnings, financial condition, cash flows, working capital requirements, capital expenditures and other factors.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Additionally, under some of our loan agreements, we may not be permitted to declare any dividends, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “*Dividend Policy*” on page 183 of this Draft Red Herring Prospectus.

42. We have not commissioned an industry report for the disclosures made in the section titled ‘Industry Overview’ and made disclosures on the basis of the data available on the internet and such data has not been independently verified by us.

We have neither commissioned an industry report, nor sought consent from the quoted website source for the disclosures which need to be made in the section titled “*Industry Overview*” beginning on page 104. of this Draft Red Herring Prospectus. We have made disclosures in the said chapter on the basis of the relevant industry related data available online for which relevant consents have not been obtained. We have not independently verified such data. We cannot assure you that any assumptions made are correct or will not change and, accordingly, our position in the market may differ from that presented in this Draft Red Herring Prospectus. Further, the industry data mentioned in this Draft Red Herring Prospectus or sources from which the data has been collected are not recommendations to invest in our Company. Accordingly, investors should read the industry related disclosure in this Draft Red Herring Prospectus in this context

43. Our Promoters and members of the Promoter Group will continue jointly to retain majority control over our Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.

After completion of the Issue, our Promoters and Promoter Group will collectively own [•] % of the Equity Shares. As a result, our Promoters together with the members of the Promoter Group will be able to exercise a significant degree of influence over us and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

44. Our future funds requirements, in the form of issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.

We may require additional capital from time to time depending on our business needs. Any issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

45. In addition to normal remuneration or benefits and reimbursement of expenses, some of our directors and key managerial personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.

Our Directors and Key Managerial Personnel (“KMP”) are interested in our Company to the extent of remuneration paid to them for services rendered and reimbursement of expenses payable to them. In addition, some of our Directors and KMP may also be interested to the extent of their shareholding and dividend entitlement in our Company. For further information, see “*Capital Structure*” and “*Our Management*” on pages 65 and 163 respectively, of this Draft Red Herring Prospectus.

46. Our culture and values have been critical to our success and if we cannot maintain this culture and our values as we grow, our business and reputation could be adversely affected.

We believe that our culture and values have been critical to our success. We may face a number of challenges that may affect our ability to sustain our corporate culture and values, including a potential failure to attract and retain employees who embrace and further our culture and values, any expansion into additional regions and competitive pressures that may divert us from our priorities, vision and integration of new personnel.

While we aim to build a fair, admired, compliant and performing culture with regular education and training to employees, including zero tolerance of any violations around our code of conduct (including on the prevention of sexual harassment), there could be violations which could affect our reputation and impact our cultural fabric. Any unethical or illegal employee actions and behavior may harm our reputation and possibly expose us to sanctions or penalties. Employee misconduct, fraud or error could harm us by impairing our ability to attract and retain consumers and we may be subject to significant legal liability and reputational harm. If we are not able to maintain our culture and values as we continue to grow, our business, financial condition, cash flows and results of operations could be adversely affected.

47. The average cost of acquisition of Equity Shares by our Promoters could be lower than the price determined at time of registering the Prospectus.

Our Promoters average cost of acquisition of Equity Shares in our Company could be lower than the Price as may be decided by the Company in consultation with the BRLM. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer chapter title “*Capital Structure*” beginning on page 65 of this Draft Red Herring Prospectus.

EXTERNAL RISKS

48. The determination of the Price Band is based on various factors and assumptions and the Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares upon listing on the Stock Exchange.

The determination of the Price Band is based on various factors and assumptions, and will be determined by our Company in consultation with the Book Running Lead Manager. Furthermore, the Issue Price of the Equity Shares will be determined by our Company in consultation with the Book Running Lead Manager through the Book Building Process. These will be based on numerous factors, including those described under “*Basis for Issue Price*” on page 93 of this Draft Red Herring Prospectus, and may not be indicative of the market price of the Equity Shares upon listing on the Stock Exchange. The price of our Equity Shares upon listing on the Stock Exchange will be determined by the market and may be influenced by many factors outside of our control.

49. An investment in the Equity Shares is subject to general risk related to investments in Indian Companies.

Our Company is incorporated in India and all of our assets and employees are located in India. Consequently, our business, results of operations, financial condition and the market price of the Equity Shares will be affected by changes in interest rates in India, policies of the Government of India, including taxation policies along with policies relating to industry, political, social and economic developments affecting India.

50. We have issued Equity Shares during the last one year at a price below the Issue Price.

Our Company had issued Bonus shares of 1,50,00,000 equity shares on March 16, 2024 in the ratio 1500:1 in the last 12 months which may be at lower than the Issue Price. The Equity Shares allotted to shareholders pursuant to this Issue may be priced significantly higher due to various reasons including better performance by the Company, better economic conditions and passage of time. For further details, see “*Capital Structure*” on page 65 of this Draft Red Herring Prospectus. The prices at which Equity Shares have been issued by us in last one year should not be taken to be indicative of the Issue Price and the trading price of our Equity Shares after listing.

51. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.

The Issue Price of our Equity Shares shall be determined by book building method. The price is based on numerous factors (For further information, please refer chapter titled “*Basis for Issue Price*” beginning on page 93 of this Draft Red Herring Prospectus) and may not be indicative of the market price of our Equity Shares after the Issue.

The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

- i. quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- ii. changes in revenue or earnings estimates or publication of research reports by analysts;
- iii. results of operations that vary from those of our competitors;
- iv. speculation in the press or investment community;
- v. new laws and governmental regulations applicable to our industry;
- vi. future sales of the Equity Shares by our shareholders;
- vii. general market conditions; and
- viii. domestic and international economic, legal and regulatory factors unrelated to our performance.

52. The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.

Prior to the Issue, there has been no public market for the Equity Shares and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation do not guarantee that a market for the Equity Shares will develop or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is proposed to be determined through a Book Building Process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

53. There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the BSE SME in a timely manner or at all.

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the BSE SME. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

54. Any future issuance of Equity Shares may dilute your shareholding and sale of our Equity Shares by our Promoters or other shareholders may adversely affect the trading price of the Equity Shares.

Any future equity issuances by us, including in a primary offering, may lead to the dilution of investors' shareholdings in our Company. Any future equity issuances by us or sales of our Equity Shares by our Promoters or other major shareholders may adversely affect the trading price of the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares.

55. There are restrictions on daily weekly monthly movement in the price of the equity shares, which may adversely affect the shareholder's ability to sell for the price at which it can sell, equity shares at a particular point in time.

Once listed, we would be subject to circuit breakers imposed by the stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI. The percentage limit on circuit breakers is said by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchange does not inform us of the percentage limit of the circuit breaker in effect from time to time, and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of the circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

56. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws and regulations, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. A securities transaction tax ("STT") is levied on and collected by an Indian stock exchange on which equity shares are sold. Any capital gain exceeding ₹100,000, realized on the sale of equity shares held for more than 12 months immediately preceding the date of transfer, which are sold using any other platform other than on a recognized stock exchange and on which no STT has been paid, are subject to long-term capital gains tax in India.

The Finance Act, 2019 amended the Indian Stamp Act, 1899 with effect from July 1, 2020 and clarified that, in the absence of a specific provision under an agreement, the liability to pay stamp duty in case of sale of securities through stock exchanges will be on the buyer, while in other cases of transfer for consideration through a depository, the onus will be on the transferor. The stamp duty for transfer of securities other than debentures on a delivery basis is specified at 0.015% and on a non-delivery basis is specified at 0.003% of the consideration amount. The Finance Act, 2020, has, among others things, provided a number of amendments to the direct and indirect tax regime, including, without limitation, a simplified alternate direct tax regime and that dividend distribution tax will not be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, that such dividends not be exempt in the hands of the shareholders, both resident as well as non-resident, and that such dividends likely be subject to tax deduction at source. The Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source from such dividend. Investors should consult their own tax advisors about the consequences of investing or trading in the Equity Shares.

Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. In cases where the seller is a non-resident, capital gains arising from the sale of the equity shares will be partially or wholly exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Historically, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the equity shares.

Further, we cannot predict whether any tax laws or other regulations impacting it will be enacted, or predict the nature and impact of any such laws or regulations or whether, if at all, any laws or regulations would have a material adverse effect on our business, financial condition, results of operations and cash flows. The Government of India had announced the union budget for financial year 2024 and the Finance Act, 2024 received assent from the President of India on February 15, 2024. There is no certainty on the impact that the Finance Act, 2024 may have on our business and operations or in the industry we operate in.

57. *The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.*

Prior to this Issue, there has been no public market for our Equity Shares. Our Company and the Book Running Lead Manager have appointed Market Maker for the equity shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets and Finance industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnership, joint ventures, or capital commitments.

58. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the exchange control regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain restrictions) if they comply with the pricing guidelines and reporting requirements specified by the Reserve Bank of India. If the transfer of shares is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then the approval of the Reserve Bank of India will be required for such transaction to be valid.

Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities. Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as Department of Industrial Policy and Promotion) and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares a land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, will require prior approval of the Government of India, as prescribed in the Consolidated FDI Policy and the FEMA Rules. These investment restrictions shall also apply to subscribers of offshore derivative instruments. Neither the Consolidated FDI Policy nor the FEMA Rules provide a definition of the term "beneficial owner". The interpretation of "beneficial owner" and enforcement of this regulatory change may differ in practice, which may have an adverse effect on our ability to raise foreign capital. We cannot assure you that any required approval from the Reserve Bank of India or any other governmental agency can be obtained on any particular terms or at all.

59. *Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

60. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

61. *Changing laws, rules and regulations and legal uncertainties, including adverse application or interpretation of corporate and tax laws, may adversely affect our business, prospects and results of operations.*

The regulatory and policy environment in which we operate is evolving and subject to change. Our business and financial performance could be adversely affected by unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations applicable to us and our business. In such instances, and including the instances mentioned below, our business, results of operations and prospects may be adversely impacted, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. Any political

instability in India, such as corruption, scandals and protests against certain economic reforms, which have occurred in the past, could slow the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting foreign investment, currency exchange rates and other matters affecting investment in India could change as well.

Additionally, the Government of India has introduced (a) the Code on Wages, 2019; (b) the Code on Social Security, 2020; (c) the Occupational Safety, Health and Working Conditions Code, 2020; and (d) the Industrial Relations Code, 2020 which consolidate, subsume and replace numerous existing central labour legislations. While the rules for implementation under these codes have not been notified, the implementation of such laws could increase our employee and labour costs, thereby adversely impacting our results of operations, cash flows, business and financial performance.

The application of various Indian tax laws, rules and regulations to our business, currently or in the future, is subject to interpretation by the applicable taxation authorities. For instance, companies can voluntarily opt in favour of a concessional tax regime (subject to no other special benefits/exemptions being claimed), which reduces the rate of income tax payable to 22% subject to compliance with conditions prescribed, from the erstwhile 25% or 30% depending upon the total turnover or gross receipt in the relevant period. Any such future amendments may affect our other benefits such as exemption for income earned by way of dividend from investments in other domestic companies and units of mutual funds, exemption for interest received in respect of tax-free bonds, and long-term capital gains on equity shares if withdrawn by the statute in the future, and the same may no longer be available to us. Any adverse order passed by the appellate authorities/ tribunals/ courts would have an effect on our profitability.

Further, the GoI has announced the union budget for Fiscal 2024, pursuant to which the Finance Bill, 2024 (“Finance Bill”), has introduced various amendments. The Finance Bill has received assent from the President of India on February 15, 2024, and has been enacted as the Finance Act, 2024. We cannot predict whether any amendments made pursuant to the Finance Act, 2024 would have an adverse effect on our business, financial condition and results of operations. Furthermore, changes in capital gains tax or tax on capital market transactions or the sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance.

There can be no assurance that the GoI will not implement new regulations and policies requiring us to obtain approvals and licenses from the GoI or other regulatory bodies, or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment or change to governing laws, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent in the jurisdictions in which we operate may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future. It may also have a material adverse effect on our business, financial condition, cash flows and results of operations. In addition, we may have to incur expenditures to comply with the requirements of any new regulations, which could materially harm our results of operations or cash flows. Any unfavourable changes to the laws and regulations applicable to us could also subject us to additional liabilities.

We are unable to determine the impact of any changes in or interpretations of existing, or the promulgation of, new, laws, rules and regulations applicable to us and our business. If that was to occur it could result in us, our business, operations or group structure being deemed to be in contravention of such laws and/or may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future.

62. Our business is substantially affected by prevailing economic, political and other conditions.

We are incorporated in and substantially all our operations are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations and cash flows are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations and cash flows, may include:

- any increase in Indian interest rates or inflation;
- any exchange rate fluctuations;
- any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;

- prevailing income conditions among Indian consumers and Indian corporates;
- volatility in, and actual or perceived trends in trading activity on India's principal stock exchanges;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- occurrence of natural or man-made disasters;
- prevailing regional or global economic conditions, including in India's principal export markets;
- any downgrading of India's debt rating by a domestic or international rating agency;
- financial instability in financial markets; and
- other significant regulatory or economic developments in or affecting India or its construction sector.

On February 24, 2022, Russian military forces invaded Ukraine. Although the length, impact and outcome of the ongoing military conflict in Ukraine is highly unpredictable, this conflict and responses from international communities could lead to significant market and other disruptions, including significant volatility in commodity prices and supply of energy resources, instability in financial markets, supply chain interruptions, political and social instability, changes in consumer or purchaser preferences as well as increase in cyberattacks and espionage.

To date, we have not experienced any material interruptions in our supply chain, manufacturing facility and distribution network in connection with these conflicts. We have no way to predict the progress or outcome of the conflict in Ukraine as the conflict, and any resulting government reactions, are rapidly developing and beyond our control. The extent and duration of the military action, sanctions and resulting market disruptions could be significant and could potentially have a substantial impact on the global economy and our business for an unknown period of time. Any of the abovementioned factors could affect our business, financial condition and results of operations.

In addition, any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely affect our business, results of operations, cash flows and financial condition and the price of the Equity Shares.

63. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

64. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

65. The ability of Indian companies to raise foreign capital may be constrained by Indian law.

As an Indian Company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

66. QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid, and Retail Individual Investors are not permitted to withdraw their Bids after Bid/Issue Closing Date.

Pursuant to the SEBI ICDR Regulations, Qualified Institutional Buyers and Non-Institutional Investors are required to pay the Bid Amount on submission of the Bid and are not permitted to withdraw or lower their Bids (in terms of quantity

of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Similarly, Retail Individual Investors can revise or withdraw their Bids at any time during the Bid/Issue Period and until the Bid/Issue Closing Date, but not thereafter. Therefore, Qualified Institutional Buyers and Non-Institutional Investors will not be able to withdraw or lower their Bids following adverse developments in international or national monetary policy, financial, political or economic conditions, our business, results of operations or otherwise at any stage after the submission of their Bids.

SECTION VI – ABOUT THE COMPANY

INDUSTRY OVERVIEW

The information in this chapter has been extracted from various websites and publicly available documents from various industry sources. The data may have been re-classified by us for the purpose of presentation. None of the Company and any other person connected with the Issue have independently verified this information. Industry sources and publications generally state that the information contained therein has been obtained from believed to be reliable, but their accuracy, completeness and underlying assumptions are not guaranteed, and their reliability cannot be assured. Industry sources and publications are also prepared based on information as of specific dates and may no longer be current or reflect current trends. Industry sources and publications may also base their information on estimates, projection forecasts and assumptions that may prove to be incorrect. Accordingly, investors should not place undue reliance on information.

GLOBAL ECONOMIC OVERVIEW

Moderating Inflation and Steady Growth Open Path to Soft Landing

- Global growth is projected at 3.1 percent in 2024 and 3.2 percent in 2025, with the 2024 forecast 0.2 percentage point higher than that in the October 2023 World Economic Outlook (WEO) on account of greater-than expected resilience in the United States and several large emerging market and developing economies, as well as fiscal support in China. The forecast for 2024–25 is, however, below the historical (2000–19) average of 3.8 percent, with elevated central bank policy rates to fight inflation, a withdrawal of fiscal support amid high debt weighing on economic activity, and low underlying productivity growth. Inflation is falling faster than expected in most regions, in the midst of unwinding supply-side issues and restrictive monetary policy. Global headline inflation is expected to fall to 5.8 percent in 2024 and to 4.4 percent in 2025, with the 2025 forecast revised down.
- With disinflation and steady growth, the likelihood of a hard landing has receded, and risks to global growth are broadly balanced. On the upside, faster disinflation could lead to further easing of financial conditions. Looser fiscal policy than necessary and then assumed in the projections could imply temporarily higher growth, but at the risk of a more costly adjustment later on. Stronger structural reform momentum could bolster productivity with positive cross-border spillovers. On the downside, new commodity price spikes from geopolitical shocks—including continued attacks in the Red Sea—and supply disruptions or more persistent underlying inflation could prolong tight monetary conditions. Deepening property sector woes in China or, elsewhere, a disruptive turn to tax hikes and spending cuts could also cause growth disappointments.
- Policymakers’ near-term challenge is to successfully manage the final descent of inflation to target, calibrating monetary policy in response to underlying inflation dynamics and—where wage and price pressures are clearly dissipating—adjusting to a less restrictive stance. At the same time, in many cases, with inflation declining and economies better able to absorb effects of fiscal tightening, a renewed focus on fiscal consolidation to rebuild budgetary capacity to deal with future shocks, raise revenue for new spending priorities, and curb the rise of public debt is needed. Targeted and carefully sequenced structural reforms would reinforce productivity growth and debt sustainability and accelerate convergence toward higher income levels. More efficient multilateral coordination is needed for, among other things, debt resolution, to avoid debt distress and create space for necessary investments, as well as to mitigate the effects of climate change.

Forces Shaping the Outlook

The global economic recovery from the COVID-19 pandemic, Russia’s invasion of Ukraine, and the cost-of-living crisis is proving surprisingly resilient. Inflation is falling faster than expected from its 2022 peak, with a smaller-than-expected toll on employment and activity, reflecting favorable supply side developments and tightening by central banks, which has kept inflation expectations anchored. At the same time, high interest rates aimed at fighting inflation and a withdrawal of fiscal support amid high debt are expected to weigh on growth in 2024. Growth resilient in major economies. Economic growth is estimated to have been stronger than expected in the second half of 2023 in the United States, and several major emerging market and developing economies. In several cases, government and private spending contributed to the upswing, with real disposable income gains supporting consumption amid still-tight—though easing—labor markets and households drawing down on their accumulated pandemic-era savings. A supply-side expansion also took hold, with a broad-based increase in labor force participation, resolution of pandemic-era supply chain problems, and declining delivery times. The rising momentum was not felt everywhere, with notably subdued growth in the euro area, reflecting weak consumer sentiment, the lingering effects of high energy prices, and weakness in interest-rate-sensitive manufacturing and business investment.

The Forecast

Growth Outlook: Resilient but Slow

Global growth, estimated at 3.1 percent in 2023, is projected to remain at 3.1 percent in 2024 before rising modestly to 3.2 percent in 2025. Compared with that in the October 2023 WEO, the forecast for 2024 is about 0.2 percentage point higher, reflecting upgrades for China, the United States, and large emerging market and developing economies. Nevertheless, the projection for global growth in 2024 and 2025 is below the historical (2000–19) annual average of 3.8 percent, reflecting restrictive monetary policies and withdrawal of fiscal support, as well as low underlying productivity growth. Advanced economies are expected to see growth decline slightly in 2024 before rising in 2025, with a recovery in the euro area from low growth in 2023 and a moderation of growth in the United States. Emerging market and developing economies are expected to experience stable growth through 2024 and 2025, with regional differences. World trade growth is projected at 3.3 percent in 2024 and 3.6 percent in 2025, below its historical average growth rate of 4.9 percent. Rising trade distortions and geoeconomics fragmentation are expected to continue to weigh on the level of global trade. Countries imposed about 3,200 new restrictions on trade in 2022 and about 3,000 in 2023, up from about 1,100 in 2019, according to Global Trade Alert data.

These forecasts are based on assumptions that fuel and nonfuel commodity prices will decline in 2024 and 2025 and that interest rates will decline in major economies. Annual average oil prices are projected to fall by about 2.3 percent in 2024, whereas nonfuel commodity prices are expected to fall by 0.9 percent. IMF staff projections are for policy rates to remain at current levels for the Federal Reserve, the European Central Bank, and the Bank of England until the second half of 2024, before gradually declining as inflation moves closer to targets. The Bank of Japan is projected to maintain an overall accommodative stance. For advanced economies, growth is projected to decline slightly from 1.6 percent in 2023 to 1.5 percent in 2024 before rising to 1.8 percent in 2025. An upward revision of 0.1 percentage point for 2024 reflects stronger-than-expected US growth, partly offset by weaker-than-expected growth in the euro area.

- In the United States, growth is projected to fall from 2.5 percent in 2023 to 2.1 percent in 2024 and 1.7 percent in 2025, with the lagged effects of monetary policy tightening, gradual fiscal tightening, and a softening in labor markets slowing aggregate demand. For 2024, an upward revision of 0.6 percentage point since the October 2023 WEO largely reflects statistical carryover effects from the stronger-than-expected growth outcome for 2023.
- Growth in the euro area is projected to recover from its low rate of an estimated 0.5 percent in 2023, which reflected relatively high exposure to the war in Ukraine, to 0.9 percent in 2024 and 1.7 percent in 2025. Stronger household consumption as the effects of the shock to energy.

- In Latin America and the Caribbean, growth is projected to decline from an estimated 2.5 percent in 2023 to 1.9 percent in 2024 before rising to 2.5 percent in 2025, with a downward revision for 2024 of 0.4 percentage point compared with the October 2023 WEO projection. The forecast revision for 2024 reflects negative growth in Argentina in the context of a significant policy adjustment to restore macroeconomic stability. Among other major economies in the region, there are upgrades of 0.2 percentage point for Brazil and 0.6 percentage point for Mexico, largely due to carryover effects from stronger-than-expected domestic demand and higher-than-expected growth in large trading-partner economies in 2023.

Inflation Outlook: Steady Decline to Target

Global headline inflation is expected to fall from an estimated 6.8 percent in 2023 (annual average) to 5.8 percent in 2024 and 4.4 percent in 2025. The global forecast is unrevised for 2024 compared with October 2023 projections and revised down by 0.2 percentage point for 2025. Advanced economies are expected to see faster disinflation, with inflation falling by 2.0 percentage points in 2024 to 2.6 percent, than are emerging market and developing economies, where inflation is projected to decline by just 0.3 percentage point to 8.1 percent. The forecast is revised down for both 2024 and 2025 for

advanced economies, while it is revised up for 2024 for emerging market and developing economies, mainly on account of Argentina where the realignment of relative prices and elimination of legacy price controls, past currency depreciation, and the related pass-through into prices is expected to increase inflation in the near term. The drivers of declining inflation differ by country but generally reflect lower core inflation as a result of still-tight monetary policies, a related softening in labor markets, and pass-through effects from earlier and ongoing declines in relative energy prices.

Overall, about 80 percent of the world's economies are expected to see lower annual average headline and core inflation in 2024. Among economies with an inflation target, headline inflation is projected to be 0.6 percentage point above target for the median economy by the fourth quarter of 2024, down from an estimated gap of 1.7 percentage points at the end of 2023. Most of these economies are expected to reach their targets (or target range midpoints) by 2025. In several major economies, the downward revision to the projected path of inflation, combined with a modest upgrade to economic activity, implies a softer-than-expected landing.

Risks to the Outlook

With the likelihood of a hard landing receding as adverse supply shocks unwind, risks to the global outlook is broadly balanced. There is scope for further upside surprises to global growth, although other potential factors pull the distribution of risks in the opposite direction. Upside risks. Stronger global growth than expected could arise from several sources:

- **Faster disinflation:** In the near term, the risk that inflation will fall faster than expected could again become a reality, with stronger-than-expected pass-through from lower fuel prices, further downward shifts in the ratio of vacancies to unemployed persons, and a compression of profit margins to absorb past cost increases. Combined with a decline in inflation expectations, such developments could allow central banks to move forward with their policy-easing plans and could also contribute to improving business, consumer, and financial market sentiment, as well as raising growth.
- **Slower-than-assumed withdrawal of fiscal support:** Governments in major economies might withdraw fiscal policy support more slowly than necessary and then assumed during 2024–25, implying higher-than-projected global growth in the near term. However, such delays could in some cases exacerbate inflation and, with elevated public debt, result in higher borrowing costs and a more disruptive policy adjustment, with a negative impact on global growth later on.
- **Faster economic recovery in China:** Additional property sector-related reforms—including faster restructuring of insolvent property developers while protecting home buyers' interests—or larger than-expected fiscal support could boost consumer confidence, bolster private demand, and generate positive cross-border growth spillovers.
- **Artificial intelligence and supply-side reforms:** Over the medium term, artificial intelligence could boost workers' productivity and incomes, although this would depend on countries' harnessing the potential of artificial intelligence. Advanced economies may experience benefits from artificial intelligence sooner than emerging market and developing economies, largely because their employment structures are more focused on cognitive-intensive roles.² For emerging market and developing economies with constrained policy environments, faster progress on implementing supply-enhancing reforms could result in greater-than-expected domestic and foreign investment and productivity and faster convergence to higher income levels.

Downside risks. Several adverse risks to global growth remain plausible:

Commodity price spikes amid geopolitical and weather shocks: The conflict in Gaza and Israel could escalate further into the wider region, which produces about 35 percent of the world's oil exports and 14 percent of its gas exports. Continued attacks in the Red Sea—through which 11 percent of global trade flows—and the ongoing war in Ukraine risk generating fresh adverse supply shocks to the global recovery, with spikes in food, energy, and transportation costs. Container shipping costs have already sharply increased, and the situation in the Middle East remains volatile. Further geoeconomics fragmentation could also constrain the cross-border flow of commodities, causing additional price volatility. More extreme weather shocks, including floods and drought, could, together with the El Niño phenomenon, also cause food price spikes, exacerbate food insecurity, and jeopardize the global disinflation process.

Policy Priorities

As inflation declines toward target levels across regions, the near-term priority for central banks is to deliver a smooth landing, neither lowering rates prematurely nor delaying such lowering too much. With inflation drivers and dynamics differing across economies, policy needs for ensuring price stability are increasingly differentiated. At the same time, in many cases, amid rising debt and limited budgetary room to maneuver, and with inflation declining and economies better able to absorb effects of fiscal tightening, a renewed focus on fiscal consolidation is needed. Intensifying supply enhancing reforms would facilitate both inflation and debt reduction and enable a durable rise in living standards.

Managing the final descent of inflation.

The faster-than-expected fall in inflation is allowing an increasing number of central banks to move from raising policy rates to adjusting to a less restrictive stance. In this context, ensuring that wage and price pressures are clearly dissipating and avoiding the appearance of prematurely “declaring victory” will guard against later having to backpedal in the event of upside surprises to inflation. At the same time, where measures of underlying inflation and expectations are clearly moving toward target-consistent levels, adjusting rates to more neutral levels—while signaling continued commitment to price stability—may be necessary (considering long transmission lags) to avoid protracted economic weakness and target undershoots. In some emerging market economies, in which the monetary tightening cycle paved the way for earlier rate reductions, continuing to calibrate the pace of monetary adjustments based on a broad array of wage and price pressure gauges is appropriate. With borrowing costs still high, careful monitoring of financing conditions and readiness to deploy financial stability tools will remain vital for avoiding financial sector strains.

prepandemic levels and higher debt-service costs, fiscal consolidation based on credible medium-term plans, with the pace of adjustment depending upon country-specific circumstances, is warranted to restore room for budgetary maneuver. Increasing fiscal balances over a sustained period, while protecting priority investments and support to the vulnerable, is needed in many cases. Well-calibrated plans can support fiscal policy credibility, allow the pace of consolidation to be adjusted as a function of the strength of private demand, and avert disruptive front-loaded adjustments. Mobilizing domestic revenue, addressing spending rigidities, and reinforcing institutional fiscal frameworks are likely to support adjustment efforts, both in economies with sizable spending needs and in others as well. For countries in or at high risk of debt distress, orderly debt restructuring may also be necessary. Faster and more efficient coordination on debt resolution, through the Group of Twenty Common Framework and the Global Sovereign Debt Roundtable, would help mitigate the risk of debt distress spreading.

Enabling durable medium-term growth.

Targeted and carefully sequenced structural reforms can reinforce productivity growth and reverse declining medium-term growth prospects despite constrained policy space. Bundling reforms that alleviate the most binding constraints to economic activity can front-load the resulting output gains, even in the short term, and secure public buy-in. 3 Industrial policies can be pursued where clearly identifiable externalities or important market failures are well established and other more effective policy options are unavailable, but the policies need to be consistent with World Trade Organization (WTO) rules. Such policies are more likely to be successful if complemented with appropriate economy-wide reforms and good governance frameworks. Carbon pricing, subsidies for green investments, reducing energy subsidies, and carbon border-adjustment mechanisms can speed the green transition but must be designed to support consistency with WTO rules. Investments in climate adaptation activities and infrastructure are also needed to support resilience.

Strengthening resilience through multilateral cooperation.

Intensified cooperation in areas of common interest is vital for mitigating the costs of the separation of the world economy into blocs. In addition to coordination on debt resolution, cooperation is required to mitigate the effects of climate change and facilitate the green energy transition, building on recent agreements at the 2023 Conference of the Parties to the UN Framework Convention on Climate Change (COP28). Safeguarding the transportation of critical minerals, restoring the WTO’s ability to settle trade disputes, and ensuring the responsible use of potentially disruptive new technologies such as artificial intelligence by, among other things, upgrading domestic regulatory frameworks and harmonizing global principles are further priorities. The IMF Board of Governors’ conclusion of the 16th Review of Quotas is a welcome step that needs now to be followed by members’ providing their consent to their respective quota increases.

INDIAN ECONOMY OVERVIEW

Introduction

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Real GDP at constant prices in the second quarter of 2022–23 is estimated at US\$ 1.94 trillion (Rs. 160.06 trillion), showing a growth of 7.2% as compared to the First Revised Estimates of GDP for the year 2021-22 of US\$ 1.81 trillion (Rs. 149.26 trillion), indicating a strong start for India’s recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. In FY22, India’s service exports stood at US\$ 254.4 billion. Furthermore, India’s overall exports (services and merchandise) was estimated at US\$ 770.18 billion in FY23.

Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-December 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable as a result of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

Market Size

India's nominal gross domestic product (GDP) at current prices is estimated to be at US\$ 3.31 trillion (Rs. 272.41 trillion) in FY22. Additionally, the Nominal GDP at current prices in Q3 of 2022-23 was US\$ 874.84 billion (Rs. 71.82 trillion), as against US\$ 792.3 billion (Rs. 65.05 trillion) in 2021-22, estimating a growth of 10.4%. With 115 unicorns valued at more than US\$ 350 billion, as of February 2023, India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at US\$ 1.3 billion, 0.2% of GDP in the fourth quarter of FY23.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- As of January 6, 2023, India's foreign exchange reserves stood at US\$ 561,583 million.
- 1,261 deals were recorded of more than US\$ 46 billion of Private Equity (PE) – Venture Capitalist (VC) investments in 2022. 111 mega transactions (rounds of US\$ 100 million or more) totalling US\$ 31 billion were completed in 2022.
- Merchandise exports in March 2023 stood at US\$ 38.38 billion, with total merchandise export of US\$ 447.46 billion during the period of April-March 2023. The overall exports (merchandise and service exports) in 2022-23 was estimated at US\$ 770.18, exhibiting a positive growth of 13.84%.
- India ranks 3rd position in the global number of scientific publications further improving India's Global Innovation Index (GII) rank from 81st in 2014 to 40th in 2022.
- PMI Services remained comfortably in the expansionary zone at 57.8 in the month of June 2023.

- In June 2023, the gross Goods and Services Tax (GST) revenue collection stood at US\$ 19.63 billion (Rs.1,61,497 crore), of which CGST is US\$ 3.77 billion (Rs. 31,013 crore), SGST is US\$ 4.65 billion (Rs. 38,292 crore), IGST is US\$ 9.76 billion (Rs. 80,292 crore).
- Between April 2000 – March 2023, cumulative FDI equity inflows to India stood at US\$ 9919.63 billion.
- In May 2023, the overall IIP (Index of Industrial Production) stood at 145. The Indices of Industrial Production for the mining, manufacturing and electricity sectors stood at 128.1, 142.3 and 201.6, respectively, in May 2023.
- According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) based retail inflation reached 4.81% in June 2023.
- In FY23, the Foreign Portfolio Investment (FPI) outflows stood at US\$ 14.81 billion (Rs. 1.21 trillion). As per depository data, Foreign Portfolio Investors (FPIs) invested Rs. 22,000 crore (US\$ 2.67 billion) in India during the first week of July 2023.
- The wheat procurement during RMS 2022-23 was estimated to be 262 lakh metric tonnes and the rice procured in KMS 2022-23 was 624.18 lakh metric tonnes (518 LMT for Kharif crop and 106.18 LMT for Rabi crop). Moreover, in the budget 2022-23, direct payment of (Maximum Selling Price) MSP was launched that estimated to be US\$ 31.74 billion (Rs. 2.37 trillion) in order to boost farmers' income.

Government Initiatives

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, is aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:

- From April 1st, 2023, Foreign Trade Policy 2023 was unveiled to create an enabling ecosystem to support the philosophy of 'AtmaNirbhar Bharat' and 'Local goes Global'.
- In order to enhance India's manufacturing capabilities by increasing investment and production in the sector, the government of India has introduced the Production Linked Incentive Scheme (PLI) for Pharmaceuticals.
- Prime Minister's Development Initiative for North-East Region (PM-DevINE) was announced in the Union Budget 2022-23 with a financial outlay of US\$ 182.35 million (Rs. 1,500 crore).
- Prime Minister Mr Narendra Modi has inaugurated a new food security scheme for providing free food grains to Antodaya Ann Yojna (AAY) & Primary Household (PHH) beneficiaries, called Pradhan Mantri Garib Kalyan Ann Yojana (PMGKAY) from 1st January 2023.
- The Amrit Bharat Station scheme for Indian Railways envisages the development of stations on a continuous basis with a long-term vision, formulated on 29th December 2022 by the Ministry of Railways.
- On 7th October 2022, the Department for Promotion of Industry and Internal Trade (DPIIT) launched Credit Guarantee Scheme for Start-ups (CGSS) aiming to provide credit guarantees up to a specified limit by start-ups, facilitated by Scheduled Commercial Banks, Non-Banking Financial Companies and Securities and Exchange Board of India (SEBI) registered Alternative Investment Funds (AIFs).
- Telecom Technology Development Fund (TTDF) Scheme was launched in October 2022 by the Universal Service Obligation Fund (USOF), a body under the Department of Telecommunications. The objective is to fund R&D in rural-specific communication technology applications and form synergies among academia, start-ups, research institutes, and the industry to build and develop the telecom ecosystem.
- Home & Cooperation Minister Mr. Amit Shah laid the foundation stone and performed Bhoomi Pujan of Tanot Mandir Complex Project under Border Tourism Development Programme in Jaisalmer in September 2022.
- In August 2022, Mr. Narendra Singh Tomar, Minister of Agriculture and Farmers Welfare inaugurated four new facilities at the Central Arid Zone Research Institute (CAZRI), which has been rendering excellent services for more than 60 years under the Indian Council of Agricultural Research (ICAR).

Road Ahead

In the second quarter of FY23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY23 (until August 2022), stood 46.8% higher than the same period last year. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels. Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In June 2023 (Provisional), CPI-C inflation was 4.81%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

GLOBAL EDUCATION INDUSTRY

Education is a human right, a powerful driver of development, and one of the strongest instruments for reducing poverty and improving health, gender equality, peace, and stability. It delivers large, consistent returns in terms of income, and is the most important factor to ensure equity and inclusion.

For individuals, education promotes employment, earnings, health, and poverty reduction. Globally, there is a 9% increase in hourly earnings for every extra year of schooling. For societies, it drives long-term economic growth, spurs innovation, strengthens institutions, and fosters social cohesion. Education is further a powerful catalyst to climate action through widespread behavior change and skilling for green transitions.

Developing countries have made tremendous progress in getting children into the classroom and more children worldwide are now in school. But learning is not guaranteed, as the 2018 World Development Report (WDR) stressed.

Making smart and effective investments in people's education is critical for developing the human capital that will end extreme poverty. At the core of this strategy is the need to tackle the learning crisis, put an end to Learning Poverty, and help youth acquire the advanced cognitive, socioemotional, technical and digital skills they need to succeed in today's world.

In low- and middle-income countries, the share of children living in Learning Poverty (that is, the proportion of 10-year-old children that are unable to read and understand a short age-appropriate text) increased from 57% before the pandemic to an estimated 70% in 2022.

However, learning is in crisis. More than 70 million more people were pushed into poverty during the COVID pandemic, a billion children lost a year of school, and three years later the learning losses suffered have not been recouped. If a child cannot read with comprehension by age 10, they are unlikely to become fluent readers. They will fail to thrive later in school and will be unable to power their careers and economies once they leave school.

The effects of the pandemic are expected to be long-lasting. Analysis has already revealed deep losses, with international reading scores declining from 2016 to 2021 by more than a year of schooling. These losses may translate to a 0.68 percentage point in global GDP growth. The staggering effects of school closures reach beyond learning. This generation of children could lose a combined total of US\$21 trillion in lifetime earnings in present value or the equivalent of 17% of today's global GDP – a sharp rise from the 2021 estimate of a US\$17 trillion loss.

Action is urgently needed now – business as usual will not suffice to heal the scars of the pandemic and will not accelerate progress enough to meet the ambitions of SDG 4. We are urging governments to implement ambitious and aggressive Learning Acceleration Programs to get children back to school, recover lost learning, and advance progress by building better, more equitable and resilient education systems.

GLOBAL TRAVEL & TOURISUM INDUSTRY

International Tourism to Reach Pre-Pandemic Levels in 2024

Following a strong 2023, international tourism is well on track to return to pre-pandemic levels in 2024.

According to the first UNWTO World Tourism Barometer of the year, **international tourism ended 2023 at 88% of pre-pandemic levels**, with an estimated 1.3 billion international arrivals. The unleashing of remaining pent-up demand, increased air connectivity, and a stronger recovery of Asian markets and destinations, are expected to underpin a full recovery by the end of 2024.

Middle East, Europe and Africa performed strongest in 2023

The latest UNWTO World Tourism Barometer provides a comprehensive overview of the sector's performance in 2023, tracking recovery by global region, sub-region and destination. Key takeaways include:

- The **Middle East** led recovery in relative terms as the only region to overcome pre-pandemic levels with arrivals 22% above 2019.
- **Europe**, the world's most visited region, reached 94% of 2019 levels, supported by intra-regional demand and travel from the United States.
- **Africa** recovered 96% of pre-pandemic visitors and **Americas** reached 90%.
- **Asia and the Pacific** reached 65% of pre-pandemic levels following the reopening of several markets and destinations. However, performance is mixed, with South Asia already recovering 87% of 2019 levels and North-East Asia around 55%.

International Tourist Arrivals (% change over 2019)

Available data shows several destinations, including both large, established destinations as well as small and emerging ones, reporting double-digit growth in international arrivals in 2023 when compared to 2019. Four sub-regions exceeded their 2019 arrival levels: Southern Mediterranean Europe, Caribbean, Central America and North Africa.

UNWTO Secretary-General Zurab Pololikashvili says: "The latest UNWTO data underscores tourism's resilience and rapid recovery, with pre-pandemic numbers expected by the end of 2024. The rebound is already having a significant impact on

economies, jobs, growth and opportunities for communities everywhere. These numbers also recall the critical task of progressing sustainability and inclusion in tourism development"

International tourism hit US\$1.4 trillion in 2023

The latest UNWTO data also highlights the economic impact of recovery.

- International tourism receipts reached USD 1.4 trillion in 2023 according to preliminary estimates, about 93% of the USD 1.5 trillion earned by destinations in 2019.
- Total export revenues from tourism (including passenger transport) are estimated at USD 1.6 trillion in 2023, almost 95% of the USD 1.7 trillion recorded in 2019.
- Preliminary estimates on the economic contribution of tourism, measured in tourism direct gross domestic product (TDGDP) point to USD 3.3 trillion in 2023, or 3% of global GDP. This indicates a recovery of pre-pandemic TDGDP driven by strong domestic and international tourism.

Several destinations reported strong growth in international tourism receipts during the first ten to twelve months of 2023, exceeding in some cases growth in arrivals. Strong demand for outbound travel was also reported by several large source markets this period, with many exceeding 2019 levels.

The sustained recovery is also reflected in the performance of industry indicators. According to the UNWTO Tourism Recovery Tracker, both international air capacity and passenger demand recovered about 90% of pre-pandemic levels through October 2023 (IATA). Global occupancy rates in accommodation establishments reached 65% in November, slightly above 62% in November 2022 (based on STR data).

Looking Ahead to 2024

International tourism is expected to fully recover pre-pandemic levels in 2024, with initial estimates pointing to 2% growth above 2019 levels. This central forecast by UNWTO remains subject to the pace of recovery in Asia and to the evolution of existing economic and geopolitical downside risks.

The positive outlook is reflected in the latest UNWTO Tourism Confidence Index survey, with 67% of tourism professionals indicating better or much better prospects for 2024 compared to 2023. Some 28% expect similar performance, while only 6% expect tourism performance in 2024 to be worse than last year. Key considerations include:

- There is still significant room for recovery across Asia. The reopening of several source markets and destinations will boost recovery in the region and globally.
- Chinese outbound and inbound tourism is expected to accelerate in 2024, due to visa facilitation and improved air capacity. China is applying visa-free travel for citizens of France, Germany, Italy, the Netherlands, Spain and Malaysia for a year to 30 November 2024.
- Visa and travel facilitation measures will promote travel to and around the Middle East and Africa with the Gulf Cooperation Council (GCC) countries to implement a unified tourist visa, similar to the Schengen visa, and measures to facilitate intra-African travel in Kenya and Rwanda.
- Europe is expected to drive results again in 2024. In March, Romania and Bulgaria will join the Schengen area of free movement, and Paris will host the Summer Olympics in July and August.
- Strong travel from the United States, backed by a strong US dollar, will continue to benefit destinations in the Americas and beyond. As in 2023, robust source markets in Europe, the Americas and the Middle East, will continue to fuel tourism flows and spending around the world.
- Economic and geopolitical headwinds continue to pose significant challenges to the sustained recovery of international tourism and confidence levels. Persisting inflation, high interest rates, volatile oil prices and disruptions to trade can continue to impact transport and accommodations costs in 2024.
- Against this backdrop, tourists are expected to increasingly seek value for money and travel closer to home. Sustainable practices and adaptability will also play an increasing role in consumer choice.
- Staff shortages remain a critical issue, as tourism businesses face a shortfall in labor to cope with high demand.

- The evolution of the Hamas-Israel conflict may disrupt travel in the Middle East and impact traveler confidence. Uncertainty derived from the Russian aggression against Ukraine as well as other mounting geopolitical tensions, continue to weigh on confidence.

Prevention of Money Laundering Act, 2002 and Anti – Money Laundering regulation as (AML Regulations)

An Act to prevent money-laundering and to provide for confiscation of property derived from, or involved in, money-laundering and for matters connected therewith or incidental thereto.

Money laundering is the processing of criminal proceeds to disguise its illegal origin. Terrorism, illegal arms sales, financial crimes, smuggling, and the activities of organized crime, including drug trafficking and prostitution rings, generate huge sums. Embezzlement, insider trading, bribery and computer fraud also produce large profits and create an incentive to legitimize the ill-gotten gains through money laundering. When a criminal activity generates substantial profits, the individual or group involved in such activities route the funds to safe heavens by disguising the sources, changing the form, or moving the funds to a place where they are less likely to attract attention.

Most fundamentally, money laundering is inextricably linked to the underlying criminal activity that generates it. In essence, the laundering enables criminal activity to continue. Offence of money-laundering is punishable with rigorous imprisonment for a period of not less than three years but may extend to seven years and with fine up to five lakh rupees

The financial statements are presented as per schedule III to Companies Act, 2013.

b) Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires the management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent liabilities on the date of the financial statements and the results of operations during the reporting periods. Although these estimates are based upon management's knowledge of current events and actions, actual results could differ from those estimates and revisions, if any, are recognised in the current and future periods.

c) Revenue Recognition

The Company follows the accrual method of accounting and all claims, receivable and liabilities are provided on that basis. All revenue is recognized on accrual basis except non-recruiting income is accounted otherwise.

Sale of goods

Sales are recognised, net of returns and trade discounts, on transfer of significant risks and rewards of ownership to the buyer. Sales excludes Goods & Service Tax

Revenue from sale of services is recognized net of goods and service tax and as and when the services are rendered. Interest incomes/expenses are recognised using the time proportion method based on the rates implicit in the transaction

d) Property, Plant and Equipment

Property, plant and equipment are carried at cost less accumulated depreciation / amortisation and impairment losses, if any. The cost of Property, Plant and Equipment comprises its purchase price net of any trade discounts and rebates, any import duties and other taxes (other than those subsequently recoverable from the tax authorities), any directly attributable expenditure on making the asset ready for its intended use, other incidental expenses.

e) Depreciation

i. Property, Plant & Equipment

Depreciable amount for assets is the cost of an asset, or other amount substituted for cost, less its estimated residual value.

Depreciation on tangible fixed assets has been provided on the written down value method as per the useful lives as prescribed in Schedule II to the Companies Act, 2013.

Assets	Estimated uselives
Plant & Machinery	15 Years
Furniture & Fixtures	10 Years

Intangible asset are recognised as per Accounting Standard 26 Intangible Asset.

An intangible asset is recognised if and only if

- (a) it is probable that the future economic benefits that are attributable to the asset will flow to the enterprise; and
- (b) the cost of the asset can be measured reliably.

f) Inventories

Inventories are valued at the lower of cost and the net realisable value after providing for obsolescence and other losses, where considered necessary. Cost is generally determined on weighted average basis except for inventory segregated for a specific order / project, in which case it is valued at their specific costs of purchase. Cost includes all charges in bringing the goods to the point of sale, including octroi and other levies, transit insurance and receiving charges.

g) Foreign currency transactions

Initial recognition:

Transactions in foreign currencies entered into by the Company are accounted at the exchange rates prevailing on the date of the transaction or at rates that closely approximate the rate at the date of the transaction.

Measurement at the balance sheet date:

Foreign currency monetary items (other than derivative contracts) of the Company, outstanding at the balance sheet date are restated at the year-end rates. Non-monetary items of the Company are carried at historical cost.

Treatment of exchange differences:

Exchange differences arising on settlement / restatement of foreign currency monetary assets and liabilities of the Company are recognised as income or expense in the Statement of Profit and Loss.

h) Employee benefits

Short-term employee benefits

All employee benefits payable within twelve months of rendering the service are classified as short term benefits. Such benefits include salaries, wages, leave encashment, incentives etc. and the same are recognised in the period in which the employee renders the related service.

Defined contribution plans

The Company's contribution to provident fund is considered as defined contribution plans and are charged as an expense based on the amount of contribution required to be made and when services are rendered by the employees.

Defined benefit plans

For defined benefit plans in the form of gratuity (unfunded), the cost of providing benefits is determined using the Projected Unit Credit method, with actuarial valuations being carried out at each balance sheet date. Actuarial gains and losses are recognised in the Statement of Profit and Loss in the period in which they occur. Past service cost is recognised immediately to the extent that the benefits are already vested and otherwise is amortised on a straight-line basis over the average period until the benefits become vested. The retirement benefit obligation recognised in the Balance Sheet represents the present value of the defined benefit obligation as adjusted for unrecognised past service cost.

i) Taxation

Current tax is the amount of tax payable on the taxable income for the year as determined in accordance with the applicable tax rates and the provisions of the Income Tax Act, 1961 and other applicable tax laws.

Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax. Accordingly, MAT is recognised as an asset in the Balance Sheet when it is highly probable that future economic benefit associated with it will flow to the Company.

Deferred tax is recognised on timing differences, being the differences between the taxable income and the accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted as at the reporting date. Deferred tax liabilities are recognised for all timing differences. Deferred tax assets are recognised for timing differences of items other than unabsorbed depreciation and carry forward losses only to the extent that reasonable certainty exists that sufficient future taxable income will be available against which these can be realised. However, if there are unabsorbed depreciation and carry forward of losses and items relating to capital losses, deferred tax assets are recognised only if there is virtual certainty supported by convincing evidence that there will be sufficient future taxable income available to realise the assets. Deferred tax assets and liabilities are offset if such items relate to taxes on income levied by the same governing tax laws and the Company has a legally enforceable right for such set off. Deferred tax assets are reviewed at each balance sheet date for their realisability.

j) Provisions and contingencies

A provision is recognised when the Company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reliable estimate can be made. Provisions (excluding retirement benefits) are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates. Contingent liabilities are disclosed in the Notes. Contingent assets are not recognised in the financial statements.

k) Borrowing costs

Costs in connection with the borrowing of funds to the extent not directly related to the acquisition of qualifying assets are charged to the Statement of Profit and Loss over the tenure of the loan.

l) Earnings per Share

Basic earnings per share is computed by dividing the profit/(loss) after tax (including the post tax effect of extra ordinary items, if any) by the weighted average number of equity shares outstanding during the year.

Diluted earnings per share is computed using the weighted average number of equity shares that could have been issued on the conversion of all dilutive potential equity shares, if any.

m) Impairment of assets

The carrying values of assets/ cash generating units at each balance sheet date are reviewed for impairment. If any indication of impairment exists, the recoverable amount of such assets is estimated and impairment is recognised, if the carrying amount of these assets exceeds their recoverable amount. The recoverable amount is the greater of the net selling price and their value in use. Value in use is arrived at by discounting the future cash flows to their present value based on an appropriate discount factor.

n) Operating Cycle:

All assets and liabilities have been classified as current or non-current as per the Company's normal operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013. Based on the nature of products / activities of the Company and the normal time between acquisition of assets and their realisation in cash or cash equivalents, the Company has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current.
