This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. Any of the following risks, individually or together, could adversely affect our business, financial condition, results of operations or prospects, which could result in a decline in the value of our Equity Shares and the loss of all or part of your investment in our Equity Shares. While we have described the risks and uncertainties that our management believes are material, these risks and uncertainties may not be the only risks and uncertainties we face. Additional risks and uncertainties, including those we currently are not aware of or deem immaterial, may also have an adverse effect on our business, results of operations, financial condition and prospects.

This Red Herring Prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Red Herring Prospectus. The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors below. Any percentage amounts, as set forth in “Risk Factors” beginning on page 23 and “Management Discussion and Analysis of Financial Condition and Results of Operations” beginning on page 163 unless otherwise indicated, has been calculated on the basis of the amount disclosed in the “Audited Financial Statements, as restated” prepared in accordance with the Generally Accepted Accounting Principles in India (Indian GAAP).

INTERNAL RISK FACTORS

- 1. We are heavily reliant on a few vendors/ suppliers and we typically do not enter into long term contracts or arrangements with our vendors. Any loss of such vendors / suppliers or any increase in the price will have a material adverse impact on our business and our revenue***

We are heavily reliant on few vendors/suppliers for purchase of inter alia IT equipment’s such as switches, routers, wireless devices, Wi-Fi devices, security devices in order to cater the needs of our customers and provide our tailored IT solutions across various Customer Industries. During the period ended in Fiscal 2025, Fiscal 2024 and Fiscal 2023, cost of purchase of inter alia IT products, spare parts and related accessories and cloud space, from our top 10 vendors/suppliers aggregated ₹ 4470.92 lakhs, ₹ 4,325.66 lakhs, and ₹ 3,532.63 lakhs, constituting 72.20%, 64.16% and 71.15% respectively

Further, we typically place purchase orders with our vendors for the purchase of the aforementioned products and do not enter into long term of contracts or arrangements with our vendors. We cannot assure you that we will be retain any of our top 10 vendors or be able to place purchase orders on favorable terms with our existing top 10 vendors. Further, we may not be able to find a suitable replacement for any of our existing top 10 vendors. Our inability to maintain our relationship with our existing top 10 vendors and/or failure to procure equipment from vendors/suppliers on favorable terms may have an adverse effect on our revenue, results of operation and would have an impact on our financial condition. Further, our margins and profitability will be adversely affected if, and to the extent, we are unable to pass on the price escalation in our input materials to our customers.

2. Our financial condition could be materially and adversely affected if we fail to secure new government and PSU projects.

As part of our business, we bid for projects on an ongoing basis. These projects are awarded through competitive bidding processes and require satisfaction of prescribed pre-qualification criteria. While factors such as service quality, technological capacity, performance, health and safety records, personnel reputation, experience, and financial resources are important considerations in client decisions, there is no assurance that we will meet these qualification criteria, especially for large development projects, whether managed independently or in collaboration with our partners.

Furthermore, even if we meet the pre-qualification requirements, projects are typically awarded based on the lowest bid. We cannot guarantee that we will choose to submit a bid even if we qualify, or that our bids, whether submitted or already submitted, will be accepted.

If we are unable to pre-qualify independently for large projects, we may need to partner with other companies to bid. If we cannot form such partnerships or lack the credentials to be a preferred partner, we may miss out on bidding opportunities for large projects, potentially affecting our growth plans.

Additionally, the tender processes conducted by the government and PSUs may be subject to changes in qualification criteria, unexpected delays, and uncertainties. There is no assurance that the projects we bid for will be tendered within a reasonable timeframe, if at all. The growth of our business largely depends on our ability to secure new contracts in our operating sectors. Predicting whether and when we will be awarded a new contract is generally very difficult. Consequently, our future results of operations and cash flows may fluctuate materially from period to period based on the timing of contract awards.

3. A Significant proportion of our orders are from government related entities which award the contract through the process of tender. Tenders, typically, are awarded to the lower bidder once all other eligibility criteria are met. Our performance could be adversely affected if we are not able to successfully bid for these contracts or required to lower our bid value.

Our business is substantially dependent on contracts undertaken by various government bodies, government entities, and government institutions of the government of India (**Government customers**) including, inter alia, various public sector undertakings and other entities funded by the Government. A vast majority of contract awarded by Government Customers are tender based. We compete with various companies while submitting the tender for these contracts. Set out in the table below are details of our revenues from operations from Government customers:

4. We depend on few Customer Industries for majority of our revenue from operations. Loss of customers in these Customer industries may result in an adverse effect on our business, revenue from operations and financial conditions.

Our range of customized offerings and our ability to specifically tailor solutions to the specific needs of customers have enabled us to garner prominent customers across industries and we count leading public and private sector undertakings across diverse customer industries such as public administration, IT & ITes, Energy, Public infrastructure, Railways, Education. (**Customer Industries**)

Our commercial success also depends to a large extent on the success of our customers, therefore, our sales may be adversely affected by any downturn in sales of such industries or specifically, our customers. Therefore, our business operations, revenue from operations and financial condition may be adversely affected, as a result of, *inter alia*, decline in demand of our services including due to the emergence of cost effective and, or, if entities in the Customer Industries move towards developing our solutions in-house, macro-economic conditions affecting these Customer Industries, increase in competition, pricing pressures, and change in government policies and regulatory action. Any or all of these factors may have an adverse effect on our business prospects, and sales of our solution offerings could decline substantially. Further, we cannot assure you that the sales to the other Customer Industries will increase or be sufficient to off-set any reduction in revenue from our currently largest revenue generating Customer Industries.

5. *Any increase in the cost of, or a shortfall in the supply of IT Equipment's, may adversely affect the pricing and supply of our products and have an adverse effect on our business, results of operations and financial condition.*

For Turnkey IT solutions, the procurement of IT equipment such as switches, routers, wireless devices, Wi-Fi devices, security devices, etc., depends on the terms of the awarded contract. The price and availability of these products depend on several factors beyond our control, including overall economic conditions, production levels, market demand and competition for these materials, production and transportation costs, duties and taxes, and trade restrictions. We usually do not enter into long-term supply contracts with any of our suppliers and typically place orders with them only after firm orders are received. The absence of long-term contracts at fixed prices exposes us to volatility in the prices of products that we require. If we are unable to compensate for or pass on our increased costs to end customers, such price increases could have an adverse impact on our results of operations, financial condition, and cash flows. We also face the risk that one or more of our existing suppliers may discontinue their supplies to us. Any inability on our part to procure products from alternate suppliers in a timely fashion, or on terms acceptable to us, may adversely affect our operations.

6. *There are certain discrepancies/errors noticed in some of our corporate records relating to forms filed with the Registrar of Companies and other provisions of Companies Act, 2013. Some of our corporate records are not traceable. Any penalty or action taken by any regulatory authorities in future, for non-compliance with provisions of corporate and other law could impact the reputation and financial position of the Company to that extent.*

There are a few discrepancies in our corporate records related to e-forms filed with the Registrar of Companies. These discrepancies include clerical errors in the annual returns filed by our Company with the ROC in past years. For instance, Cash Flow statements are not attached to the AOC-4, MGT-8 is not attached to form MGT-7 for FY 2021-22 and there are some errors in forms filed for Appointment of statutory auditor such as term of appointment and date of meeting of appointment not mentioned properly. Apart from these, there are some clerical errors in Board Reports filed for previous years such as section references were not made as per Companies Act, 2013 and no proper disclosures were made for board meetings. We have also observed some discrepancies in relation to appointment of Directors like: improper resolutions due to clerical errors were attached in e-forms.

Further, Our Company has not filed consolidated financial Statements for the financial year 2022-23 with its then subsidiary company, TNPL IT Services Private Limited which inter-alia includes non-compliance of section 129 and 137 of the Companies Act, 2013 and AS-21 as per Indian GAAP. However, our company has now prepared Audited Consolidated financial statements of the company for the FY 22-23 and FY 23-24 for the purpose of compilation of the same in the restated financial statements. Accordingly, we have presented the Consolidated Financial Statements of FY 2022-23 and 2023-24 in the restated financial statements.

Further, our Company has not filed Form CHG-1 for creation of charge on certain vehicle loan taken in the past, which is non-compliance of section 77 of the Companies Act, 2013 read with rules made thereunder and is subject to penalty under section 86 of the Companies Act, 2013.

Our Company has failed to comply with the provisions of section 135 of the Companies Act, 2013 to spend on CSR expenses for the FY 2020-21, which is in non-compliance of section 135 of the Companies Act, 2013 read with rules made thereunder which is subject to the penalty under section 135(7) of the Companies Act, 2013 which states that the company shall be liable to a penalty of twice the amount required to be transferred by the company to the Fund specified in Schedule VII or the Unspent Corporate Social Responsibility Account, as the case may be, or one crore rupees, whichever is less, and every officer of the company who is in default shall be liable to a penalty of one-tenth of the amount required to be transferred by the company to such Fund specified in Schedule VII, or the Unspent Corporate Social Responsibility Account, as the case may be, or two lakh rupees, whichever is less.

Further, The Company has identified discrepancies in its corporate records concerning unsecured loans obtained from its partnership firm, Takyon Network. This transaction was non-compliant with Section 73 of the Companies Act, 2013, which regulates the acceptance of deposits from the public. Although, the loan was repaid during the financial year 2020-2021. Additionally, the Company has extended loans and advances to the same partnership firm. As of the date of the Red Herring Prospectus, there are no outstanding balances with Takyon Network; however, this past lending activity raises concerns regarding compliance with Section 185 of the Companies Act, which governs loans to directors and related parties.

Although, no show cause notice in respect of the non-compliances has been received by the Company till date, any penalty imposed for such non-compliance in future by the any regulatory authority could affect our financial conditions to that extent. In case of any action being taken by the regulatory authorities against the Company and/or its officers, the same may have an adverse effect on our business and reputation. Our company has not complied with certain Accounting Standards such as AS-21 and AS-15 however the same have been duly complied by the company in the restated financial statements. Although, no show cause notice in respect of the above has been received by the Company till date, any penalty imposed for such non-compliance in future by any regulatory authority could affect our financial conditions to that extent.

7. *If we cannot attract and retain highly-skilled IT professionals, our ability to obtain, manage and staff new projects and to continue to expand existing projects may result in loss of revenue and an inability to expand our business.*

Our ability to execute and expand existing projects and obtain new customers depends largely on our ability to hire, train and retain highly-skilled IT professionals, particularly project managers, IT engineers and other senior technical personnel. Given our recent growth and strong demand for IT professionals from our competitors, we cannot assure you that we will be able to hire or retain the number of technical personnel necessary to satisfy our current and future customer needs. We also may not be able to hire and retain enough skilled and experienced IT professionals to replace those who leave. If we have to replace personnel who have left our employment, we will incur increased costs not only in hiring replacements but also in training such replacements until their productivity is enhanced. We tend to hire IT professionals for particular projects as and when needed and as such there is no assurance that we will be able to find such IT professionals in time, or at all.

Further, due to the growing demand for IT professionals in India, we may have to increase the levels of employee compensation in order to retain our employees and may be unable to pass on this increase to our customers. In addition, we may not be able to redeploy and retrain our IT professionals in anticipation of continuing changes in technology, evolving standards and changing customer preferences. Our inability to attract and retain IT professionals could have a material adverse effect on our business, financial condition and results of operations.

8. *Our current order book value is not necessarily indicative of future growth. Further, some of the orders that constitute our current order could be cancelled, put in abeyance, delayed, or not paid for by our customers, which could adversely affect our financial condition*

Our business operations have long lead times between our Company pitching for an order from new customers, and such new customer placing the purchase order for our solution offerings. We expend significant time and effort of our management for these pitches. Even after expending significant time and effort of our management, our pitch may not materialize into a purchase order, and may consequently impact our business operations. Our order book as of June 30, 2025, stands at Rs. 7,159.46 lakhs

Our order book value is neither an indicative of future growth nor is it a guarantee of future revenues. Further, our order book value is based on purchase orders which are considered firm orders. However, these orders may be subject to vagaries including due to factors that may be beyond our control such as orders being cancelled or being put in abeyance, or the implementation schedules being delayed. While there have been no such instances during the last three financial years, we cannot assure you that such an event of cancellation of orders or orders being put in abeyance will not occur in future. In the event our customers renege on our purchase orders or payments terms, our anticipated revenues may not materialize and we may be required to seek recourse to dispute resolution mechanisms which could be time consuming and, or, expensive which could adversely affect our financial condition. While we expect our order book to translate into future revenues, we cannot assure you that such revenues will be realized on time or be profitable.

9. *We have working capital requirements. If we experience insufficient cash flows to make required payments on our debt or fund working capital requirements, there may be an adverse effect on our results of operations.*

Our business requires significant amount of working capital and major portion of our working capital is utilized towards debtors and inventories. Our Trade Receivables for the period ended March 31, 2025, March 31, 2024 and March 31, 2023 were Rs. 5,993.71 lakhs, 3,937.51 lakhs and 3,050.20 lakhs our inventories for the period ended March 31, 2025, March 31, 2024 and March 31, 2023 were Rs. 827.13 lakhs, 1,180.43 lakhs and 1,739.89 lakhs respectively.

The results of operations of our business are dependent on our ability to effectively manage our inventory and trade receivables. To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. However, if our management fails to accurately evaluate the terms and conditions with our customers, it may lead to write-offs bad debts and/or delay in recoveries which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. A liquidity crunch may also result in increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability.

Our inability to maintain sufficient cash flow, credit facility and other sourcing of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. In the event we are not able to recover our dues from our trade receivables or sell our inventory, we may not be able to maintain our Sales level and thus adversely affecting our financial health.

For further details of working capital requirements, please refer to the chapter titled "**Objects of the Issue**" on page 63 of the Red Herring Prospectus.

10. The IT solutions market is highly competitive and our competitors may have advantages that could allow them to compete more effectively than we do to secure customer contracts. Any failure to compete effectively could have a material adverse effect on our business, financial condition and results of operations.

The IT solutions market in which we operate includes a large number of participants, and we have faced, and expect to continue to face, intense competition from IT solutions providers both within and outside India. We believe that the principal competitive factors in our markets are the breadth and depth of service offerings, reputation and track record, ability to tailor service offerings to customer needs, industry expertise, service quality, pricing, scalability of infrastructure, financial stability, and sales and marketing skills. We are particularly susceptible to the risk of price competition from existing and new entrants in our focus verticals.

To obtain engagements for our integrated IT solutions, we are also competing with large, well-established IT solutions companies as well as other India-based IT solutions companies resulting in increased competition and marketing costs. Our key competitors in our business are domestic IT services providers such as Allied Digital Services Limited, Trimax IT infrastructure & services Limited and Synoptics Technologies Limited.

The IT solutions industry in which we compete is experiencing rapid changes in its competitive landscape. Some of the large consulting firms, infrastructure management services firms and other IT service providers that we compete with have significant resources and financial capabilities combined with a greater number of IT professionals. Many of our competitors are significantly larger and some have gained access to public and private capital or have merged or consolidated with better capitalized partners, which has created, and may in the future create, larger and better capitalized competitors. These competitors may have superior abilities to compete for market share and for our existing and prospective customers. Our competitors may be better able to use significant economic incentives, such as lower fixed price terms, to secure contracts with our existing and prospective customers. These competitors may also be better able to compete for and retain skilled professionals by offering them more attractive compensation or other incentives. These factors may provide these competitors with advantages over us to meet customer demands in an engagement for large numbers and varied types of resources with specific experience or skill-sets that we may not have available in the short or long-term. In addition, these competitors may refocus on the Indian market in light of global economic conditions. We cannot assure you that we can maintain or enhance our competitive position against current and future competitors. Our failure to compete effectively could have a material adverse effect on our business, financial condition and results of operations.

11. We have experienced negative cash flows in previous years. Any operating losses or negative cash flows in the future could adversely affect our results of operations and financial conditions

The details of Cash flows of our Company are as follows:

Particulars	Consolidated		
	F.Y. 2024-25	F.Y. 2023-24	F.Y. 2022-23
Net Cash flow from Operating activities	781.77	468.04	-1,366.19
Net Cash flow from Investing activities	36.90	-63.12	-56.65
Net Cash flow from Financing activities	-872.64	-349.56	1,155.03

Cash flow of a Company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and to make new investments without raising finance from external resources. Any operating losses or negative cash flows could affect our results of operations and financial conditions. If we are not able to generate sufficient cash flows, it may adversely affect our business and financial operations. For further details, see "**Financial Statements**" and "**Management's Discussion and Analysis of Financial Condition and Results of Operations**" on page 124 and 163, respectively. We cannot assure you that our net cash flows will be positive in the future.

12. Our Company has taken unsecured loans that may be recalled by the lenders at any time and our Company may not have adequate working capital to make timely payments or at all.

Our Company has availed unsecured loans which may be recalled by its lenders at any time. As of March 31, 2025, such loans amounted to Rs. 256.17lakhs. In the event that any lender seeks a repayment of any such loan, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. As a result, any such demand may materially and affect our business, cash flows, financial condition and results of operations. For further details, please see the section entitled "**Statement of Financial Indebtedness**" on page 160 of this Red Herring Prospectus.

13. The Registered office from where we carry out our business activities is owned by our Promoters, and has been obtained by us on a lease/rental basis. 36. *Certain key performance indicators for certain listed industry peers included in this Red Herring Prospectus have been sourced from public sources and there is no assurance that such financial and other industry information is complete*

Pursuant to the requirements of the SEBI ICDR Regulations, we have included certain key performance indicators, comprising financial and operational information, for certain listed industry peers, in the “*Basis for Issue Price*” beginning on page 70 of the Red Herring Prospectus. Although this information is sourced from and relied upon on the audited financial statements of the relevant listed industry peers as available on the websites of the Stock Exchanges, including the annual reports of the respective companies submitted to Stock Exchanges, there is no assurance that this information with respect to industry peers is either complete. There may be different methodologies and formulas used to compute the various ratios.

37. *We may require further equity issuance, which will lead to dilution of equity and may affect the market price of our Equity Shares or additional funds through incurring debt to satisfy our capital needs, which we may not be able to procure and any future equity offerings by us.*

Our growth is dependent on having a strong balance sheet to support our activities. In addition to the IPO Proceeds and our internally generated cash flow, we may need other sources of financing to meet our capital needs which may include entering into new debt facilities with lending institutions or raising additional equity in the capital markets. We may need to raise additional capital from time to time, dependent on business conditions. The factors that would require us to raise additional capital could be business growth beyond what the current balance sheet can sustain; additional capital requirements imposed due to changes in regulatory regime or significant depletion in our existing capital base due to unusual operating losses. Any fresh issue of shares or convertible securities would dilute existing holders, and such issuance may not be done at terms and conditions, which are favorable to the then existing shareholders of our Company. If our Company decides to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. Such financings could cause our debt - equity ratio to increase or require us to create charges or liens on our assets in favor of lenders. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be affected if we are unable to implement our expansion strategy.

Any future issuance of Equity Shares by our Company may dilute shareholding of investors in our Company; and hence affect the trading price of our Company's Equity Shares and its ability to raise capital through an issue of its securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Company's Equity Shares. Additionally, the disposal, pledge or encumbrance of Equity Shares by any of our Company's major shareholders, or the perception that such transactions may occur may affect the trading price of the Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

38. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation do not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares will be determined by our Company in consultation with the BRLMs through the Book Building Process. This price will be based on numerous factors, as described under ***"Basis for the Issue Price"*** on page 70 and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, problems such as temporary closure, broker default and settlement delays experienced by the Indian Stock Exchanges, strategic actions by us or our competitors, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors. Consequently, the price of our Equity Shares may be volatile, and you may be unable to resell your Equity Shares at or above the Issue Price, or at all. There has been significant volatility in the Indian stock markets in the recent past, and our Equity Share price could fluctuate significantly because of market volatility. A decrease in the market price of our Equity Shares could cause investors to lose some or all of their investment.

40. Any of the Bidders are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid

Pursuant to the SEBI ICDR Regulations, Any of the Bidders are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. While we are required to complete Allotment, listing and commencement of trading pursuant to the Issue within Three (3) Working Days from the Bid/ Issue Closing Date, events affecting the Bidders' decision to invest in our Equity Shares, including adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations, cash flows and financial condition may arise between the date of submission of the Bid and Allotment, listing and commencement of trading. We may complete the Allotment, listing and commencement of trading of our Equity Shares even if such events occur and such events may limit the Bidders' ability to sell our Equity Shares Allotted pursuant to the Issue or may cause the trading price of our Equity Shares to decline on listing.

EXTERNAL RISK FACTORS

41. Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe and certain emerging economies in Asia. Financial turmoil in Asia, Russia and elsewhere in the world in recent years has adversely affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby negatively affect the Indian economy. Financial disruptions could materially and adversely affect our business, prospects, financial condition, results of operations and cash flows. Further, economic developments globally can have a significant impact on our principal markets. Concerns related to a trade war between large economies may lead to increased risk aversion and volatility in global capital markets and consequently have an impact on the Indian economy. Recent developments in the ongoing conflict between Russia and Ukraine has resulted in and may continue to result in a period of sustained instability across global financial markets, induce volatility in commodity prices, increase borrowing costs, cause outflow of capital from emerging markets and may lead to overall slowdown in economic activity in India. In addition, China is one of India's major trading partners and there are rising concerns of a possible slowdown in the Chinese economy as well as a strained relationship with India, which could have an adverse impact on the trade relations between the two countries.

42. Our business and results of operations could be adversely affected by disruptions in global economic and geo political conditions.

As substantially all of our operations are dependent on our customers who have their head offices or parent companies situated outside India, our financial performance and growth are necessarily dependent on economic conditions prevalent globally. The global economy may be materially and adversely affected by political instability or regional conflicts; a general rise in interest rates; inflation; exchange rate fluctuations; changes in tax, trade, and monetary policies; occurrence of natural or man-made disasters; downgrade in debt rating; and adverse economic conditions occurring elsewhere in the world, such as a slowdown in economic growth in China, the repercussions of the United Kingdom exit from the European Union and other matters. While the Indian economy has grown significantly in recent years, it has experienced economic slowdowns in the past due to global economic and geo political conditions. The Indian economy in particular could be adversely impacted by inflationary pressures, currency depreciation, the poor performance of economy, trade deficits, recent initiatives by the Indian government and other factors. Unfavorable changes in the above factors or in other business and economic conditions affecting our customers could result in a corresponding decline in our business.

43. If certain labour laws become applicable to us, our profitability may be adversely affected.

India has stringent labour legislations that protect the interests of workers, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Any change or modification in the existing labour laws may affect our flexibility in formulating labour related policies.

44. The continuing effect of the COVID-19 pandemic on our business, results of operations and financial condition is highly uncertain and cannot be predicted.

The outbreak, or threatened outbreak, of any severe communicable disease (particularly COVID-19) could adversely affect the overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The outbreak of COVID-19 has resulted in authorities implementing several measures such as travel bans and restrictions, quarantines and lockdowns. These measures have impacted and may further impact our workforce and operations, the operations of our consumers. In case there is a rapid increase in severe cases of infections leading to deaths, where the measures taken by governments are not successful or are any bans imposed by the government in this regard are lifted prematurely, may cause significant economic disruption in India and in the rest of the world. If any of our employees were suspected of contracting COVID-19 or any other epidemic disease, this could require us to quarantine some or all of these employees or disinfect the facilities. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general. The outbreak has significantly increased economic uncertainty. It is likely that the current outbreak or continued spread of COVID-19 will cause an economic slowdown and it is possible that it could cause a global recession.

45. A slowdown in economic growth in India may adversely affect our business, financial condition, cash flows, results of operations and prospects.

The performance and growth of our business are necessarily dependent on economic conditions prevalent in India, which may be materially and adversely affected by center or state political instability or regional conflicts, a general rise in interest rates, inflation, and economic slowdown elsewhere in the world or otherwise. There have been periods of slowdown in the economic growth of India. India's economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports (oil and oil products), global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall which affects agricultural production. Any continued or future slowdown in the Indian economy or a further increase in inflation could have a material adverse effect on the price of our

raw materials and demand for our products and, as a result, on our business and financial results. The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and financial results.

46. *Changing laws, rules and regulations and legal uncertainties in India, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.*

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. For further details please refer to the chapter ***“Government and Other Approvals”*** on page 176 for details of the laws currently applicable to us. The governmental and regulatory bodies in India and other jurisdictions where we operate may notify new regulations and/or policies, which may require us to obtain approvals and licenses from the government and other regulatory bodies, or impose onerous requirements and conditions on our operations, in addition to those which we are undertaking currently. Any such changes and the related uncertainties with respect to the implementation of new regulations may have a material adverse effect on our business, financial condition, results of operations and cash flows.

In addition, unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment laws governing our business, operations and investments in our Company by non-residents, could result in us being deemed to be in contravention of such laws and/or may require us to apply for additional approvals. Tax and other levies imposed by the central and state governments in India that affect our tax liability include central and state taxes and other levies, income tax, turnover tax, goods and services tax, stamp duty and other special taxes and surcharges which are introduced on a temporary or permanent basis from time to time. The final determination of our tax liabilities involves the interpretation of local tax laws and related regulations in each jurisdiction as well as the significant use of estimates and assumptions regarding the scope of future operations and results achieved and the timing and nature of income earned and expenditures incurred. We are involved in various disputes with tax authorities. For details of these disputes, see ***“Outstanding Litigation and Material Developments”*** on page 172 of this Red Herring Prospectus. Moreover, the central and state tax scheme in India is extensive and subject to change from time to time.

Any change in Indian tax laws could have an effect on our operations. For instance, the Taxation Laws (Amendment) Ordinance, 2019, a new tax ordinance issued by India's Ministry of Finance on September 20, 2019, prescribes a number of changes to the income tax rate applicable to companies in India. According to this new ordinance, companies can henceforth voluntarily opt for a concessional tax regime (subject to no other special benefits/exemptions being claimed), which would ultimately reduce the effective tax rate for Indian companies. Any such future amendments may affect other benefits such as an exemption for income earned by way of dividend from investments in other domestic companies and units of mutual funds, exemption for interest received in respect of tax-free bonds, and long-term capital gains on equity shares if withdrawn by the statute in the future, and the same may no longer be available to us. Any adverse order passed by the appellate authorities/ tribunals/ courts would influence our profitability.

The Finance Act, 2022 (“Finance Act”), has, amongst others things, provided a number of amendments to the direct and indirect tax regime, including, without limitation, a simplified alternate direct tax regime and that dividend distribution tax (“DDT”), will not be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, such dividends would not be exempt in the hands of the shareholders, both resident as well as non- resident and are likely to be subject to tax deduction at source. The Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source from such dividend. Investors should consult their own tax advisors about the consequences of investing or trading in the Equity Shares. Further, the Government of India has notified the Finance Act, 2023, which has introduced various amendments to taxation laws in India. There is no certainty on the impact that the Finance Act may have on our business and operations or on the industry in which we operate. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future.

47. *Instability in financial markets could materially and adversely affect our results of operations and financial condition.*

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil,

evident from the sharp decline in SENSEX, NSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

48. Natural calamities could have a negative impact on the Indian economy and cause Our Company's business /to suffer.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

49. Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares.

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in affect in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

50. Our performance is linked to the stability of policies and the political situation in India.

The Government of India has traditionally exercised, and continues to exercise, a significant influence over many aspects of the economy. Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Any political instability in India may adversely affect the Indian securities markets in general, which could also adversely affect the trading price of our Equity Shares. Any political instability could delay the reform of the Indian economy and could have a material adverse effect on the market for our Equity Shares. There can be no assurance to the investors that these liberalization policies will continue under the newly elected government. Protests against privatization could slow down the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting companies in the industrial equipment manufacturing sectors, foreign investment, currency exchange rates and other matters affecting investment in our securities could change as well. A significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India and thereby affect our business.

Since, the entire fund requirement is to be funded from the proceeds of the Issue, Short term borrowings and Internal Accruals, there is no requirement to make firm arrangements of finance under Regulation 230(1)(e) of the SEBI ICDR Regulations through verifiable means towards at least 75% of the stated means of finance, excluding the amounts to be raised through the proposed Issue.

Subject to applicable law, if the actual utilization towards the Objects is lower than the proposed deployment, such balance will be used for general corporate purposes to the extent that the total amount to be utilized towards general corporate purposes will not exceed 25% of the Gross Proceeds in accordance with Regulation 230(2) of the SEBI ICDR Regulations. In case of a shortfall in raising the requisite capital from the Net Proceeds or an increase in the total estimated cost of the Objects, business considerations may require us to explore a range of options including utilizing our internal accruals and seeking additional debt from existing and/or future lenders. We believe that such alternate arrangements would be available to fund any such shortfalls. Further, in case of variations in the actual utilization of funds earmarked for the purpose set forth above, increased funding requirements for a particular purpose may be financed by surplus funds, if any, available in respect of other purposes for which funds are being raised in the Fresh Issue. Any variation in the utilization of the Net Proceeds as disclosed in this Red Herring Prospectus shall be subject to certain compliance requirements, including prior approval of the shareholders of our Company. The Objects may be varied in the manner provided in “**Objects of the Issue – Variation in Objects**” on page 63 of this Red Herring Prospectus. However, we confirm that no bridge financing has been availed as on date, which is subject to being repaid from the Issue Proceeds.

As we operate in competitive environment, our Company may have to revise its business plan from time to time and consequently our fund requirements may also change. Our Company’s historical expenditure may not be reflective of our future expenditure plans. Our Company may have to revise its estimated costs, fund allocation and fund requirements owing to various factors such

as economic and business conditions, increased competition and other external factors which may not be within the control of our management. This may entail rescheduling or revising the planned expenditure and funding requirements, including the expenditure for a particular purpose at the discretion of the Company's management.

For further details on the risks involved in our business plans and executing our business strategies, please see the section titled **“Risk Factors”** beginning on page 23 of this Red Herring Prospectus.

Assumptions for working capital requirements

The following table sets forth the details of the holding period (with days rounded to the nearest whole number) considered for years ended March 31, 2025, March 31, 2024 and March 31, 2023, as well as projections for financial year ended March 31, 2026.

Particulars	Unit	March 31, 2023	March 31, 2024	March 31, 2025	March 31, 2026
		Audited	Audited	Audited	Estimated
Inventories	Days	87	71	57	51
Trade Receivables	Days	148	132	174	155
Trade Payables	Days	165	116	143	125

Justification:

Inventories	The historical holding days of inventories has been in range of 57 days to 87 days from FY 2022-2023 to FY 2024-2025. The inventory levels are dependent on the nature, size, and timelines of the IT projects. As project volumes increase, so does the need for higher inventory levels to meet demand. For instance, larger or more complex projects often require substantial amounts of inventory to ensure that materials are available when needed, which can lead to longer holding periods. Conversely, smaller projects or those with quicker turnaround times may result in shorter inventory holding days. Given our current order book and plans to expand operations, we anticipate that inventory holding days will average around 51 days for Fiscal 2026. This projection aligns with our need to manage larger inventories due to ongoing and upcoming projects
Trade Receivables	The historical holding days for trade receivables have ranged from 132 days to 174 days from FY 2022-2023 to FY 2024-2025. This extended period is largely due to the nature of our business, which provides IT

	networking solutions to a diverse range of industries, with a significant portion of our projects being government-related. Government projects typically involve payment cycles ranging from 120 to 140 days, which contributes to the high receivable days reflected in our historical data. Delays in project completion or in the submission of bills to government entities can further lengthen receivable days. Looking ahead, we expect trade receivable days to stabilize at 155 days by Fiscal 2026. This forecasted stability reflects our efforts to improve payment collection processes. We anticipate these improvements will come from enhanced coordination with government departments and greater efficiency in project execution.
Trade Payables	The historical trend of trade payable days has ranged from 116 days to 165 days from FY 2022-2023 to FY 2024-25. However, we anticipate reducing this to 125 days in Fiscal 2026. By shortening the time it takes to settle our payables, we aim to negotiate more favorable terms and conditions with our suppliers, which will help us secure competitive pricing for the IT equipment's we purchase. Additionally, some of our purchases require advance payments to suppliers, and timely payments are crucial for strengthening long-term relationships and maintaining a balanced supply chain. By offering advance and prompt payments, we expect to benefit from cash discounts and better purchase prices, ultimately enhancing the overall profitability of our company.

2. Repayment of a portion of certain borrowing availed by our Company

Our Company has entered into various borrowing arrangements with banks including borrowings in the form of business loan, term loan and car loan for details of our outstanding financial indebtedness, see '**Statement of Financial Indebtedness**' on page 160 of this Red Herring Prospectus. As at June 30, 2025, we had various borrowings facilities with total Outstanding of ₹ 909.92 lakhs.

We propose to utilise an estimated amount of ₹300.00 Lakhs from the Net Proceeds to repay in part or full certain borrowing, listed below, availed from the lender by our Company. Pursuant to the terms of the financing arrangements, prepayment of certain borrowings may attract prepayment charges as prescribed by the respective lender. Such prepayment charges, as applicable, will be funded from the internal accruals of our Company.

We believe that such repayment will help reduce our outstanding indebtedness and debt servicing costs and enable utilization of our internal accruals for further investment in our business growth and expansion. Additionally, we believe that the leverage capacity of our Company will improve our ability to raise further resources in the future to fund our potential business development opportunities and plans to grow and expand our business.

GLOBAL ECONOMIC OUTLOOK

Global growth is expected to hold steady at 2.7 percent in 2025-26. However, the global economy appears to be settling at a low growth rate that will be insufficient to foster sustained economic development— with the possibility of further headwinds from heightened policy uncertainty and adverse trade policy shifts, geopolitical tensions, persistent inflation, and climate-related natural disasters. Against this backdrop, emerging market and developing economies (EMDEs)—which fuel 60 percent of global growth—are set to enter the second quarter of the twenty-first century with per capita incomes on a trajectory that implies substantially slower catch-up toward advanced-economy living standards than they previously experienced. Without course corrections, most low-income countries are unlikely to graduate to middle-income status by the middle of the century. Policy action at both global and national levels is needed to foster a more favorable external environment, enhance macroeconomic stability, reduce structural constraints, address the effects of climate change, and thus accelerate long-term growth and development.

Global growth is stabilizing as inflation returns closer to targets and monetary easing supports activity in both advanced economies and emerging market and developing economies (EMDEs). This should give rise to a broad-based, moderate global expansion over 2025-26, at 2.7 percent per year, as trade and investment firm. However, growth prospects appear insufficient to offset the damage done to the global economy by several years of successive negative shocks, with particularly detrimental outcomes in the most vulnerable countries.

From a longer-term perspective, catch-up toward advanced economy income levels has steadily weakened across EMDEs over the first quarter of the twenty-first century. Heightened policy uncertainty and adverse trade policy shifts represent key downside risks to the outlook. Other risks include escalating conflicts and geopolitical tensions, higher inflation, more extreme weather events related to climate change, and weaker growth in major economies. On the upside, faster progress on disinflation and stronger demand in key economies could result in greater-than-expected global activity.

The subdued growth outlook and multiple headwinds underscore the need for decisive policy action. Global policy efforts are required to safeguard trade, address debt vulnerabilities, and combat climate change. National policy makers need to resolutely pursue price stability, as well as boost tax revenues and rationalize expenditures in order to achieve fiscal sustainability and finance needed investments. Moreover, to raise longer term growth and put development goals on track, interventions that mitigate the impact of conflicts, lift human capital, bolster labor force inclusion, and confront food insecurity will be critical.

Global prospects

Global growth is set to stabilize below its pre-pandemic pace, with a slowdown in China and the United States offset by firming growth elsewhere. Trade growth is poised to be lower than its 2010-19 average in nearly two-thirds of economies. Moderating oil prices partly reflect decelerating global oil consumption. The share of economies with above target inflation in 2025 is set to decline to its lowest level since the peak in 2022. Monetary policy rates are generally expected to ease further over the forecast horizon, supporting growth, although advanced economy rates are set to remain well above the low levels of the 2010s. Risks to the global outlook remain tilted to the downside. Surging trade-distorting measures—to which EMDEs have been heavily exposed—could dampen global activity.

The global economic context has become modestly more favorable since last June, following several years characterized by overlapping negative shocks. Inflation appears to be moderating without a substantial slowdown in key economies, and monetary policy easing has now become widespread. In the next couple of years, deceleration in the two main engines of the global economy—the United States and China—is expected to be offset by firming growth elsewhere, including in many emerging market and developing economies. In all, the post-pandemic global economic expansion is forecast to remain on a steady path. However, the global economy appears to be settling at a relatively low level of growth—one insufficient to foster sustained economic development and catchup in per capita incomes—with the possibility of further headwinds from heightened policy uncertainty, growing trade fragmentation, slower than- anticipated progress in reducing inflation, and weaker activity in major economies. Global trade growth rebounded last year, despite weak manufacturing activity in some key advanced economies. The recovery was driven by goods trade, which firmed in the third quarter of last year, partly owing to inventory buildups. Meanwhile, services trade growth continued to moderate. In 2025-26, trade growth is set to pick up further but will still remain below its 2010-19 average pace in nearly two-thirds of economies. Recourse to trade restrictions remains prevalent—with the number of new measures implemented in 2024 five times higher than the 2010-19 average.

Aggregate commodity prices softened by about 3 percent in 2024, primarily reflecting improving supply conditions for energy and food commodities, despite heightened geopolitical tensions. Commodity prices are projected to ease further over the forecast horizon. A small decline in oil prices last year reflected ample potential oil supply amid decelerating global oil consumption (figure 1.1.C). A significant further decrease in oil prices is expected in 2025-26 as production expands while global oil demand growth remains modest. Base metals prices are set to stabilize over the forecast horizon, mirroring steady global growth. Meanwhile, prices for staple food crops, having fallen notably in 2024, are expected to post a small further decline.

Global headline inflation has continued to gradually ease, in part reflecting falling commodity prices and the lagged effects of monetary tightening. Inflation is now close to targets in many advanced economies and EMDEs, with the share of economies with above-target inflation on a downward trend and set to reach in 2025 its lowest level since the peak in 2022. Core inflation briefly edged up in some EMDEs and advanced economies at about the middle of last year on persistent strength in services inflation. However, it has since generally resumed a gradual decline.

Global financial conditions have eased slightly, in aggregate, since mid-2024, mainly owing to the onset of monetary easing in the United States and generally robust risk appetite. Advanced-economy policy rates are expected to decline somewhat further this year but remain well above the unusually low levels of the 2010s. For much of last year, improving investor sentiment translated into capital inflows and improving financial conditions in EMDEs. Following the U.S. presidential election, risk appetite in the United States strengthened further. However, a general appreciation of the U.S. dollar, rising U.S. bond yields, and various idiosyncratic domestic risks pared back the easing in EMDE financial conditions late in the year, with many EMDE currencies weakening amid debt and equity outflows. Growing debt-service burdens continue to pose considerable headwinds to economic activity in countries with elevated financial vulnerabilities, particularly in many low-income countries (LICs). Among middle-income countries with weak credit ratings, sovereign spreads normalized substantially last year, although borrowing costs remain far higher than in the 2010s. Fiscal policy is estimated to have been broadly neutral for global growth in 2024, with previously expected fiscal consolidation plans delayed in some major economies. Going forward, fiscal policy is generally anticipated to be modestly contractionary. The pace of fiscal consolidation is expected to pick up in EMDEs excluding China, and in some advanced economies—although not in the United States—as governments intensify efforts to realign spending with revenues. This is likely to exert a modest drag on near-term global growth.

The global outlook is surrounded by substantial uncertainty, and the balance of risks remains tilted to the downside. Global growth could be weaker than projected on account of potential adverse changes in trade policies and heightened policy uncertainty. A surge in trade-distorting measures, implemented mainly by advanced economies but often disproportionately affecting EMDEs, poses a risk to global trade and economic activity. Beyond specific trade-related policy shifts, a sustained increase in global economic policy uncertainty could dampen growth, particularly in EMDEs. Heightened geopolitical tensions and conflict escalations relating to Russia's invasion of Ukraine, events in the Middle East, and instability elsewhere could disrupt global trade and commodity markets, hurting growth. In affected EMDEs, intense conflicts could set back a wide range of development goals and result in large and long-term output losses.

INDIAN ECONOMY OUTLOOK

Introduction

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP or GDP at Current Prices in the year 2023-24 is estimated at Rs. 295.36 lakh crores (US\$ 3.54 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 269.50 lakh crores (US\$ 3.23 trillion). The growth in nominal GDP during 2023-24 is estimated at 9.6% as compared to 14.2% in 2022-23. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the second half of FY24. During the period April-June 2025, India's exports stood at US\$ 109.11 billion, with Engineering Goods (25.35%), Petroleum Products (18.33%) and electronic goods (7.73%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable because of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

Market Size

Real GDP or GDP at Constant (2011-12) Prices in the year 2023-24 is estimated at Rs. 173.82 lakh crores (US\$ 2.08 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 160.71 lakh crores (US\$ 1.92 trillion). The growth in real GDP during 2023-24 is estimated at 8.2% as compared to 7.0% in 2022-23. There are 113 unicorn startups in India, with a combined valuation of over US\$ 350 billion. As many as 14 tech startups are expected to list in 2024 Fintech sector is poised to generate the largest number of future unicorns in India. With India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving

the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between the same time periods. India's current account deficit (CAD) narrowed to 0.7% of GDP in FY24. The CAD stood at US\$ 23.2 billion for the 2023-24 compared to US\$ 67.0 billion or 2.0% of GDP in the preceding year. This was largely due to decrease in merchandise trade deficit. Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry,

Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- According to HSBC Flash India PMI report, business activity surged in April to its highest level in about 14 years as well as sustained robust demand. The composite index reached 62.2, indicating continuous expansion since August 2021, alongside positive job growth and decreased input inflation, affirming India's status as the fastest-growing major economy.
- As of July 5, 2024, India's foreign exchange reserves stood at US\$ 657.15 billion.
- In May 2024, India saw a total of US\$ 6.9 billion in PE-VC investments.
- Merchandise exports in June 2024 stood at US\$ 35.20 billion, with total merchandise exports of US\$ 109.96 billion during the period of April 2024 to June 2024.
- India was also named as the 48th most innovative country among the top 50 countries, securing 40th position out of 132 economies in the Global Innovation Index 2023. India rose from 81st position in 2015 to 40th position in 2023. India ranks 3rd position in the global number of scientific publications.
- In June 2024, the gross Goods and Services Tax (GST) stood at the highest monthly revenue collection at Rs. 1.74 lakh crore (US\$ 20.83 billion) vs Rs. 1.73 lakh crore (US\$ 20.71 billion)
- Between April 2000–March 2024, cumulative FDI equity inflows to India stood at US\$ 97 billion.

Government Initiatives

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, is aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:

- In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at Rs. 47,65,768 crore (US\$ 571.64 billion) of which total capital expenditure is Rs. 11,11,111 crore (US\$ 133.27 billion).

The objective is to fund R&D in rural-specific communication technology applications and form synergies among academia, start-ups, research institutes, and the industry to build and develop the telecom ecosystem.
- In July 2022, Deendayal Port Authority (DPA) announced plans to develop two Mega Cargo Handling Terminals on a Build-Operate-Transfer (BOT) basis under Public-Private Partnership (PPP) Mode at an estimated cost of Rs. 5,963 crore (US\$ 747.64 million).
- In July 2022, the Union Cabinet chaired by Prime Minister Mr. Narendra Modi, approved the signing of the Memorandum of Understanding (MoU) between India & Maldives. This MoU will provide a platform to tap the benefits of information technology for court digitization and can be a potential growth area for IT companies and start-ups in both countries.
- In July 2022, the Reserve Bank of India (RBI) approved international trade settlements in Indian rupees (Rs.) to promote the growth of global trade with emphasis on exports from India and to support the increasing interest of the global trading community.
- Rajnath Singh, Minister of Defence, launched 75 newly developed Artificial Intelligence (AI) products/technologies during the first-ever 'AI in Defence' (AIDef) symposium and exhibition organized by the Ministry of Defence in New Delhi on July 11, 2022.
- In June 2022, Prime Minister Mr. Narendra Modi laid the foundation stone of 1,406 projects worth more than Rs. 80,000 crore (US\$ 10.01 billion) at the ground-breaking ceremony of the UP Investors Summit in Lucknow. In the Union Budget 2022-23, effective capital expenditure is expected to increase by 27% at Rs. 10.68 trillion (US\$ 142.93 billion) to boost the economy. This will be 4.1% of the total Gross Domestic Production (GDP).
- In the Union Budget of 2022, Minister for Finance & Corporate Affairs Ms. Nirmala Sitharaman announced that a scheme for design-led manufacturing in 5G would be launched as part of the PLI scheme.

Prime Minister of India Mr. Narendra Modi launched the Make in India initiative with an aim to boost the country's manufacturing sector and increase the purchasing power of the average Indian consumer, which would further drive demand and spur development, thus benefiting investors. The Government of India, under its Make in India initiative, is trying to boost the contribution made by the manufacturing sector with an aim to take it to 25% of the GDP from the current 17%. Besides, the government has also come up with the Digital India initiative, which focuses on three core components: the creation of digital infrastructure, delivering services digitally, and increasing digital literacy.
- In August 2021, Prime Minister Mr. Narendra Modi launched a digital payment solution, e-RUPI, a contactless and cashless instrument for digital payments.

Strategic priorities for FY 2024-25:

The Government's fiscal policy stance has been to make the domestic economy more resilient to exogenous shocks and to mitigate the risks of global economic downturn without compromising on the overall macroeconomic balances. The FY 2024-25 fiscal strategy of the government is based on the following broad intents:

- Directing towards more inclusive, sustainable and more resilient domestic economy to absorb the unanticipated shocks, if any;
- Channelizing and allocating increased resources towards capital spending to sustain infrastructure development momentum;
- Continuing the holistic approach of fiscal federalism towards enhancing the public infrastructure by supporting efforts of the States for capital spending;
- Focus on integrated and coordinated planning and implementation of infrastructure projects in the country, embracing the principles of PM Gati Shakti;
- Prioritization of expenditure towards the key developmental sectors viz., drinking water, housing, sanitation, green energy, health, education, agriculture, rural development etc. for long run sustainable and inclusive betterment of the citizens;
- Enhancing the effectiveness of cash management through just-in-time release of resources by using SNA/TSA system etc.

Road Ahead

In the second quarter of FY24, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2023. India's comparatively strong position in the external sector reflects the country's positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in 2023-24, stood 37.4% higher than the same period last year. In the budget of 2023-24, capital expenditure took lead by steeply increasing the capital expenditure outlay by 37.4 % in BE 2023-24 to Rs.10 lakh crore (US\$ 120.12 billion) over Rs. 7.28 lakh crore (US\$ 87.45 billion) in RE 2022-23. The ratio of revenue expenditure to capital outlay increased by 1.2% in the current year, signaling a clear change in favour of higher-quality spending. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels. In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at Rs. 47,65,768 crore (US\$ 571.64 billion) of which total capital expenditure is Rs. 11,11,111 crore (US\$ 133.27 billion).

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

Recent Trends and Strategies:

1. **Global delivery Model:** Indian software product industry is expected to reach US\$ 100 billion by 2025. Indian companies are focusing on investing internationally to expand their global footprint and enhance their global delivery centres. In line with this, in February 2021, Tata Consultancy Services announced plans to recruit 1,500 technology employees across the UK over the next year. The development would build capabilities for TCS to deliver their services efficiently to the UK customers.
2. **India to become the data annotation and labelling hub:** The data annotation market in India stood at US\$ 250 million in FY20, of which the US market contributed almost 60% to the overall value. The market is expected to reach US\$ 7 billion by 2030 due to accelerated domestic demand for AI.
3. **New technologies:** Disruptive technologies such as cloud computing, social media and data analytics are offering new avenues of growth across verticals for IT companies. The SMAC (social, mobility, analytics, cloud) market stood at US\$ 225 billion in 2020. In June 2022, ZStack International, a worldwide market leader in cloud computing, IaaS and PaaS solutions, announced that they were entering India and the SAARC Region. American-Irish consumer credit reporting company Experian is planning a major expansion of its global innovation centre (GIC) in Hyderabad to about 4,000 employees over the next three to five years. According to sources, GIC will concentrate on employing emerging technologies in the BFSI (banking, financial services, and insurance) sector, including cloud computing, big data analytics, artificial intelligence, and machine learning.

Growth Drivers and Opportunities:

1. **Combat Cyber-Security:** The Data Security Council of India (DSCI) - National Center of Excellence for Cyber Security Technology Development (NCoE) and Chitkara University have collaborated to undertake joint programs on cyber security and privacy. In April 2022, the Indian Computer Emergency Response Team (CERT-In) issued directions to strengthen the cybersecurity in the country.
2. **Talent Pool:** India will need over 30 million digitally skilled professionals by 2026. According to a NASSCOM report, India ranks first in AI skill penetration and talent concentration and fifth in AI scientific publications. According to a report published by Microsoft, consultancy firm Bain & Co, and industry body Internet and Mobile Association of India (IAMAI), India produces 16% of the entire world's AI talent pool – the third highest in the world.
3. **Public Cloud Market:** The revenue of India's public cloud services market totalled US\$ 6.2 billion in 2022, and it is expected to reach US\$ 17.8 billion by 2027 growing at a CAGR of 23.4%. Comparing to pre-pandemic level from FY2019, the cloud deals in FY2023 have grown by more than 4 times. Cloud's potential is boundless, and it forms a crucial foundation for successful digital transformation.

4. **Infrastructure:** Infrastructure software revenue in India was forecasted to reach US\$ 4.6 billion in 2021, an increase of 12% YoY, driven by rising demand for security-as-a-service offerings, and detection and response capabilities.
5. **Policy Support:** More liberal system for raising capital, seed money and ease of doing business. Government of India launched India AI Mission in March 2024, with an initial outlay of Rs. 10,300 crore (US\$ 1.2 billion) to bolster India's AI ecosystem. The government introduced the STP Scheme, which is a 100% export-oriented scheme for the development and export of computer software, including export of professional services using communication links or physical media. Tax holidays for STPI and SEZs.

Accelerating demand for cloud to be a major growth driver:

- With digital transformation accelerating across sectors, the pandemic has driven demand for cloud services worldwide, and the Internet has become a lifeline for people both for work and entertainment. This move towards cloud services has accelerated hyper-scale data centre investments, with global investments estimated to exceed US\$ 200 billion per year by 2025.
- India's data centre market is expected to reach a value of US\$ 9.96 billion by 2028 from US\$ 5.42 billion in 2022, growing at a CAGR of 10.69%.

India's data center industry is rapidly expanding, projected to double its capacity from 0.9 GW in 2023 to nearly 2 GW by 2026.

The demand for cloud technology professionals is expected to reach 2 million by 2025.

The cumulative investments in data centres in India are estimated to reach US\$ 28 billion between 2019-25, at a CAGR of 5%, 2x faster than the global average.

The COVID-19 pandemic has accelerated the demand for third-party data centre services in India.

The key data centre locations are Mumbai, Chennai, Bangalore, Hyderabad and Delhi (NCR).

- In November 2022, Amazon Web Services announced the launch of its second AWS infrastructure region in India - the AWS Asia Pacific (Hyderabad) Region. By 2030, it is anticipated that the region will support more than 48,000 full-time jobs annually thanks to investments totalling more than US\$ 4.4 billion in India.
- In November 2022, Google established a partnership with local gaming startup Super Gaming through its Google Cloud division. As part of the collaboration, game developers who use Google Cloud to create, host, and distribute their games will have access to Super Gaming's Super Platform game engine.

- Amazon partnered with Airtel to sell Amazon Web Services (AWS) to its customers and intends to inject US\$ 1.6 billion in their two upcoming data centres in Hyderabad.

Expansion of focus areas to aid future growth:

- The Cabinet approved an allocation of over US\$ 1.2 billion (Rs 10,300 crore) for the IndiaAI Mission, marking a significant step towards bolstering India's AI ecosystem. This substantial financial infusion, slated over the next 5 years, is poised to catalyse various components of the IndiaAI Mission, including pivotal initiatives like the IndiaAI Compute Capacity, IndiaAI Innovation Centre (IAIC), IndiaAI Datasets Platform, IndiaAI Application Development Initiative, IndiaAI FutureSkills, IndiaAI Startup Financing, and Safe & Trusted AI. A cornerstone of this effort is the IndiaAI Compute Capacity, envisioned to erect a cutting-edge, scalable AI computing infrastructure by deploying over 10,000 Graphics Processing Units (GPUs) through strategic public-private collaborations.

Technologies, such as telemedicine, health, remote monitoring solutions and clinical information systems, would continue to boost demand for IT services across the globe.

IT sophistication in the utilities segment and the need for standardisation of the process are expected to drive demand.

Digitisation of content and increased connectivity is leading to a rise in IT adoption by the media.

RBI is executing a plan to reduce online transaction costs to encourage digital banking in India.

- The rollout of fifth-generation (5G) wireless technology by telecommunication companies is expected to bring at least US\$ 10 billion global business to Indian IT firms by 2019-25.

SUMMARY STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES & NOTES TO RESTATED FINANCIAL INFORMATION

COMPANY OVERVIEW

TAKYON NETWORKS LIMITED was, incorporated on 12th may 2015 having its registered office at CP 37, Viraj Khand Gomti Nagar, Lucknow, Uttar Pradesh, India, 226010 and is engaged in the business of providing IT Infra solutions, enterprise networking, network security and Web based surveillance services.

I. SIGNIFICANT ACCOUNTING POLICIES

A. Basis of preparation of Financial Statements:

The Restated Statement of Consolidated Assets and Liabilities as at March 31, 2025, March 31, 2024, March 31, 2023 and the Restated Statements of Consolidated Profit and Loss, the Restated Consolidated Cash Flow Statement for the year ended March 31, 2025, March 31, 2024 and March 31, 2023 and the Summary Statement of Significant Accounting Policies, the Notes and Annexures as forming part of these Restated Consolidated Financial Statements (collectively, the “Restated Consolidated Financial Information”), as approved by the Board of Directors of the company.

These Restated financial statements are prepared in accordance with Indian Generally Accepted Accounting Principles (GAAP) under the historical cost convention on the accrual basis. GAAP comprises mandatory accounting standards as prescribed under Section 133 of the Companies Act, 2013 (‘the Act’) read with Rule 7 of the Companies (Accounts) Rules, 2014, the provisions of the Act. The accounting policies adopted in the preparation of Consolidated Financial statements have been consistently applied. All assets and liabilities have been classified as current or non-current as per the company’s normal operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013. Based on the nature of operations and time difference between the provision of services and realization of cash and cash equivalents, the company has ascertained its operating cycle as 12 months for the purpose of current and non-current classification of assets and liabilities.

B. Use of Estimates

The preparation of financial statements is in conformity with Indian GAAP requires judgments, estimates and assumptions to be made that affect the reported amount of assets and liabilities, disclosure of contingent liabilities on the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Difference between the actual results and estimates are recognized in the period in which the results are known / materialized.

C. Subsidiary:

Principles of Consolidation

The Restated Consolidated Financial Information comprise the financial statements of the Parent and its subsidiaries for the year ended March 31, 2025, March 31, 2024 and March 31, 2023. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if and only if the Group has:

- Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee)
- Exposure, or rights, to variable returns from its involvement with the investee, and
- The ability to use its power over the investee to affect its returns.

Generally, there is a presumption that a majority of voting rights result in control. To support this presumption and when the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual arrangement with the other vote holders of the investee
- Rights arising from other contractual arrangements
- The Group’s voting rights and potential voting rights

Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control over the subsidiary. Any gain/loss on acquisition or disposal of subsidiary are included in profit or loss from the date the Group gains control until the date when the Group ceases to control the subsidiary.

The Group combines the restated financial statements of the parent and its subsidiary line by line adding together like items of assets, liabilities, equity, income and expenses. Intercompany transactions, balances and unrealized gains on transactions between group companies are eliminated. Unrealized losses are also eliminated unless the transaction provides evidence of an impairment of the transferred asset. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group. Non-controlling interests in subsidiaries are identified separately from the Group’s equity therein.

The Company has following investment in subsidiary:

Name of the Company	Country of Incorporation	Relationship	Ownership Interest March 31, 2025	Ownership Interest March 31, 2024	Ownership Interest March 31, 2023
TNPL IT Services Pvt Ltd	India	Subsidiary	99.99%	99.99%	99.99%

D. ACCOUNTING CONVENTION

The Company follows the mercantile system of accounting, recognizing income and expenditure on accrual basis. The accounts are prepared on historical cost basis and as a going concern. Accounting policies not referred to specifically otherwise, are consistent with the generally accepted accounting principles.

The following significant accounting policies are adopted in the preparation and presentation of these restated financial statements:

1. Revenue Recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duties collected on behalf of the government.

Interest income is accrued on a time proportion basis, by reference to the principle outstanding and the effective interest rate applicable.

2. Property, Plant and Equipment:

Tangible Assets

- a) Property, Plant and Equipment are stated as per Cost Model i.e., at cost less accumulated depreciation and impairment, if any;
- b) Costs directly attributable to acquisition are capitalized until the Property, Plant and Equipment are ready for use, as intended by the management;
- c) Subsequent expenditures relating to Property, Plant and Equipment are capitalized only when it is probable that future economic benefits associated with these will flow to the Company and the cost of the item can be measured reliably. Repairs & maintenance costs are recognized in the Statement of profit & Loss when incurred;
- d) The cost and related accumulated depreciated are eliminated from the Financial Statements upon sale or retirement of the asset and the resultant gains or losses are recognized in the Statement of Profit or Loss. Assets to be disposed of are reported at the lower of the carrying value or the fair value less cost to sell;
- e) Depreciation on fixed assets will be calculated using the Straight Line (SLM) method, which involves applying depreciation rates prescribed under Schedule II to the Companies Act 2013. to the carrying amount of the asset. The carrying amount is reduced each year by the amount of depreciation charged.
- f) Depreciation methods, useful lives, and residual values are reviewed periodically, including at each financial year end;

Intangible Assets

Initial Recognition

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, Intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any.

Amortization

Intangible assets are amortized on straight line basis over the estimated useful economic life of the asset. The company presumes that the useful economic life of the software is ten years from the year in which it is acquired and ready to use.

3. IMPAIRMENT

The Management periodically assesses, using external and internal sources, whether there is an indication that an asset may be impaired. An impairment loss is recognized wherever the carrying value of an asset exceeds its recoverable amount. The recoverable amount is higher of the asset's net selling price and value in use, which means the present value of future cash flows expected to arise from the continuing use of the asset and its eventual disposal. An impairment loss for an asset is reversed if, and only if, the reversal can be related objectively to an event occurring after the impairment loss was recognized. The carrying amount of an asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount

that would have been determined (net of any accumulated amortization or depreciation) had no impairment loss been recognized for the asset in prior years.

4. RETIREMENT BENEFITS & OTHER EMPLOYEE BENEFITS

Short-term employee benefits:

Short-term employee benefits are recognized as an expense at the undiscounted amount in the Statement of Profit and Loss for the year which includes benefits like Salary, wages and bonus, and are recognized as expenses in the period in which the employee renders the related service.

Post- Employment Benefits:

(a) Defined Contribution Plans

The Company has Defined Contribution Plans for post-employment benefits in the form of Provident Fund and Pension Fund for all employees which are administered by Regional Provident Fund Commissioner. Provident Fund and Pension Fund are classified as defined contribution plans as the Company has no further obligation beyond making the contributions. The Company's contributions to Defined Contribution plans are charged to the Statement of Profit and Loss as and when incurred.

(b) Defined Benefit Plans

Non-Funded Plan: The Company has a defined benefit plan for Post-employment benefit in the form of Gratuity and Leave Encashment.

Liability for the above defined benefit plan is provided on the basis of valuation, as at the Balance Sheet date, carried out by an independent actuary. The actuarial method used for measuring the liability is the Projected Unit Credit method.

5. Inventory

Cost of inventories comprises all cost of purchase and other costs incurred in bringing the inventories to their present location and condition.

Inventories are valued after providing for obsolescence, as follows:

Stock in Trade -Lower of cost and net realizable value. Cost is determined on First in First Out Method (FIFO) basis.

6. CASH FLOW STATEMENT

Cash flows are reported using the indirect method, whereby profit before tax is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities are segregated.

7. BORROWING COSTS

Borrowing costs that are directly attributable to the acquisition or construction of a qualifying asset are capitalized as part of the cost of that asset till such time the asset is ready for its intended use. A qualifying asset is an asset that necessarily takes a substantial period of time to get ready for its intended use. Costs incurred in raising funds are amortized equally over the period for which the funds are acquired. All other borrowing costs are charged to profit and loss account.

8. INCOME TAX

The accounting treatment for the Income Tax in respect of the Company's income is based on the Accounting Standard on 'Accounting for Taxes on Income' (AS-22). The provision made for Income Tax in Accounts comprises both, the current tax and deferred tax. Provision for Current Tax is made on the assessable Income Tax rate applicable to the relevant assessment year after considering various deductions available under the Income Tax Act, 1961.

Deferred tax is recognized for all timing differences; being the differences between the taxable income and accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Such deferred tax is quantified using the tax rates and laws enacted or substantively enacted as on the Balance Sheet date. The carrying amount of deferred tax asset/liability is reviewed at each Balance Sheet date and consequential adjustments are carried out.

9. EARNINGS PER SHARE

Basic earnings per share is computed by dividing the net profit after tax by the weighted average number of equity shares outstanding during the period. Diluted earnings per share is computed by dividing the profit after tax by the weighted average number of equity shares considered for deriving basic earnings per share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares.

The diluted potential equity shares are adjusted for the proceeds receivable had the shares been actually issued at fair value which is the average market value of the outstanding shares. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

10. PROVISIONS AND CONTINGENT LIABILITIES

A provision is recognized if, as a result of a past event, the Company has a present legal obligation that is reasonably estimable, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by the best estimate of the likely future outflow of economic benefits required to settle the obligation at the reporting date.

Where no reliable estimate can be made, a disclosure is made as contingent liability. A disclosure for a contingent liability is also made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

11. CASH & CASH EQUIVALENTS

Cash and cash equivalents comprise cash and cash on deposit with banks. The Company considers all highly liquid investments with a remaining maturity at the date of purchase of three months or less and that are readily convertible to known amounts of cash to be cash equivalents.

12. SEGMENT REPORTING

The business segment has been considered as the primary segment. The Company's primary business segments are reflected based on principal business activities, the nature of service, the differing risks and returns, the organization structure and the internal financial reporting system.

The Company is engaged in the business of providing IT Infra solutions, enterprise networking, network security and Web based surveillance services and accordingly this is the only segment as envisaged in Accounting Standard 17 'Segment Reporting' therefore disclosure for Segment reporting is not applicable.

13. INVESTMENTS

Long-term/ Non-Current investments are stated at cost. Provision is made for diminution in the value of the investments, if, in the opinion of the management, the same is considered to be other than temporary in nature. Current investments are carried at lower of cost and fair value determined on an individual basis. On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the Statement of Profit and Loss.

14. Leases

Leases where the Lessor effectively retains substantially all the risks and benefits of ownership of the Leased Asset, are classified as 'Operating Leases'. Lease rentals with respect to assets taken on 'Operating Lease' are charged to Statement of Profit and Loss on a straight line basis over the lease term.

Leases which effectively transfer to the Company substantially all the risks and benefits incidental to the ownership of the leased item are classified as 'Finance Lease'. Assets acquired on Finance Lease which substantially transfer all the risks and rewards of ownership to the Company are capitalized as assets by the Company at the lower of the fair value and the present value of the minimum lease payment and a liability is created for an equivalent amount. Lease rentals payable is apportioned between the liability and finance charge so as to obtain a constant periodic rate of interest on the outstanding liability for each year.

13. EMPLOYEE BENEFITS

The Company has adopted the Accounting Standard 15 (revised 2005) on Employee Benefits during the restated financials period. The disclosure as envisaged under the Accounting Standard is provided hereunder:

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 ("FEMA"). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India ("RBI") and the Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India ("DIPP").

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated Foreign Direct Investment Policy notified by the DPIIT File No. 5(2)/2020-FDI Policy dated October 15, 2020, with effect from October 15, 2020 (the "FDI Policy"), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT or the DPIIT that were in force and effect prior to October 15, 2020. The Government of India proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DPIIT issues an updated circular.

In terms of the FEMA NDI Rules, a person resident outside India may make investments into India, subject to certain terms and conditions, and provided that an entity of a country, which shares land border with India or the beneficial owner of an investment into India who is situated in or is a citizen of any such country, shall invest only with government approval.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the foreign direct investment policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/ RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country ("Restricted Investors"), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank or fund in India. Each Bidder should seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Offer in writing about such approval along with a copy thereof within the Offer Period.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue and in accordance with the extant FDI guidelines on sectoral caps, pricing guidelines etc. as amended by Reserve bank of India, from time to time. Investors are advised to confirm their eligibility under the relevant laws before investing and / or subsequent purchase or sale transaction in the Equity Shares of our Company. Investors will not offer, sell, pledge or transfer the Equity Shares of our Company to any person who is not eligible under applicable laws, rules, regulations, guidelines. Our Company, the Underwriters and their respective directors, officers, agents, affiliates and representatives, as applicable, accept no responsibility or liability for advising any investor on whether such investor is eligible to acquire Equity Shares of our Company.
