Our Company has presented certain numerical information in this Prospectus in "Lakhs" units. One Lakh represents 1,00,000. In this Prospectus, any discrepancies in any table between the total and the sums of the amounts listed are due to rounding off. All figures derived from our Financial Statements in decimals have been rounded off to the second decimal and all percentage figures have been rounded off to two decimal places.

Use of Industry & Market Data

Unless stated otherwise, industry and market data used in this Prospectus has been obtained or derived from a report titled "Report on Engineering, Procurement & Construction (EPC) Industry *(Focus on the Oil & gas transportation, distribution & refining as well as thermal power)*" of September 09, 2026 prepared by Dun & Bradstreet ("**D&B Report**"), which has been prepared exclusively for the purpose of understanding the industry in connection with the Offer and commissioned and paid for by our Company, pursuant to the engagement contract dated August 09, 2025. The D&B Report was made available on the website of our Company at the following web-link: www.vectrasgroup.com until the Bid/Offer Closing Date. Unless otherwise indicated, all financial, operational, industry and other related information derived from the D&B Report and included in this Prospectus with respect to any particular year, refers to such information for the relevant calendar/financial year. Dun & Bradstreet is an independent agency which has no relationship with our Company, our Promoters, members of our Promoter Group, any of our Directors, Key Managerial Personnel, Senior Management Personnel, Group Companies, Promoter Selling Shareholders or the Book Running Lead Manager.

Industry publications generally state that the information contained in such publications has been obtained from publicly available documents from various sources believed to be reliable but accuracy, completeness relevance of such information shall be subject to the disclaimers, context and underlying assumptions of such sources. The data used in these sources may have been reclassified by us for the purposes of presentation and may also not be comparable. The excerpts of the D&B Report are disclosed in this Prospectus and there are no parts, information, data (which may be relevant for the Offer), left out or changed in any manner. The extent to which the industry and market data presented in this Prospectus is meaningful and depends upon the reader's familiarity with, and understanding of, the methodologies used in compiling such information. There are no standard data gathering methodologies in the industry in which our Company conducts business and methodologies, and assumptions may vary widely among different market and industry sources. Such information involves risks, uncertainties and numerous assumptions and is subject to change based on various factors, including those discussed in "*Risk Factor – Industry information included in this Prospectus has been derived from an industry report prepared by Dun & Bradstreet exclusively commissioned and paid for by us for such purpose.*" on page 33 of this Prospectus. Accordingly, no investment decision should be solely made on the basis of such information.

In accordance with the SEBI (ICDR) Regulations, the section titled "*Basis for Offer Price*" on page 97 of this Prospectus includes information relating to our peer group companies. Such information has been derived from publicly available sources, and neither we, nor the BRLM, have independently verified such information.

FORWARD – LOOKING STATEMENTS

All statements contained in this Prospectus that are not statements of historical fact constitute forward-looking statements. All statements regarding our expected financial condition and results of operations, business, plans and prospects are forward-looking statements. These forward-looking statements include statements with respect to our business strategy, our revenue and profitability, our projects and other matters discussed in this Prospectus regarding matters that are not historical facts. We have included statements in this Prospectus which contain words or phrases such as "will", "aim", "is likely to result", "believe", "expect", "will continue", "anticipate", "estimate", "intend", "plan", "contemplate", "seek to", "future", "objective", "goal", "project", "should", "will pursue" and similar expressions or variations of such expressions, that are "forward-looking statements". Also, statements which describe our strategies, objectives, plans or goals are also forward-looking statements. However, these are not the exclusive means of identifying forward-looking statements.

All forward-looking statements are subject to risks, uncertainties and assumptions about us that could cause actual results to differ materially from those contemplated by the relevant forward-looking statement. Forward-looking statements reflect our current views with respect to future events and are not a guarantee of future performance. These statements are based on our management's beliefs and assumptions, which in turn are based on currently available information. Although we believe the assumptions upon which these forward-looking statements are based are reasonable, any of these assumptions could prove to be inaccurate, and the forward-looking statements based on these assumptions could be incorrect. Important factors that could cause actual results to differ materially from our expectations include but are not limited to:

Sr No	Type of Risk	Description
1.	Financial Risk	Our revenue and profit after tax have grown rapidly in the recent past but there can be no assurance that our growth will continue to sustain. If we are unable to implement or sustain our growth strategy it could adversely affect our business, results of operations, cash flows and financial conditions.
2.	Financial Risk	Our business involves significant working capital requirements, primarily on account of procurement of raw materials, receivables and project execution. Any inability to meet our working capital requirements or to arrange necessary financing in a timely and cost-effective manner, including in a scenario of tightening credit markets or rising interest rates, could adversely affect our operations, financial condition and profitability.
3.	Business Risk	Our top 10 customers contributed 97.29%, 92.27%, 96.04% and 97.84% of our revenue from operations in for the period ended September 30, 2026, the financial year 2026, 2025 and 2024, respectively. A significant portion of our revenues is derived from repeat business or contracts awarded by these customers. Any loss, reduction or delay in orders, deterioration in their financial health, or adverse change in our relationships with such customers may materially affect our revenues, cash flows and results of operations. In addition, a concentration of receivables from these customers may expose us to collection risks.
4.	Legal and Regulatory Risk	There have been certain instances of delays in relation to certain statutory filings made or required to be filed by our Company with the RoC under applicable law and certain other non-compliances under Indian company law.
5.	Legal and Regulatory Risk	There are certain discrepancies and non-compliances noticed in filing of returns and deposit of statutory dues with the taxation and other statutory authorities in the past. Any delay in payment of statutory dues by our Company in future, may result in the imposition of penalties, which could adversely impact our financials.
6.	Business Risk	Several of our key raw materials and components are sourced from a limited number of suppliers, which exposes us to supplier concentration risks. Any restriction in supply or defects in quality could cause delays in project construction or implementation and impair our ability to provide our services to clients at a price that is profitable to us, which could have a material adverse effect on our business, financial condition and results of operations.
7.	Business Risk	We derive majority of our revenue from our EPC business verticals i.e. Combined Oil and Gas stations works. Any reduction in the demand of such services could have an adverse effect on our business, results of operations and financial conditions.
8.	Legal and Regulatory Risk	Our revenues are highly dependent on our operations in the geographical region of the State of Gujarat and Maharashtra, which accounted for 87.92%, 71.52%, 89.72% and 92.59% of our revenue from operations in for the period ended September 30, 2026 and financial years 2026, 2025 and 2024, respectively. Any adverse development affecting our operations in this region could have an adverse impact on our business, financial condition and results of operations.

Sr No	Type of Risk	Description
9.	Legal and Regulatory Risk	Our business is operating under various laws which require us to obtain approvals from the concerned statutory/regulatory authorities in the ordinary course of business, and if we are unable to obtain these approvals and the renewals, our business operations could be adversely affected thereby impacting our revenues and profitability.
10.	Legal and Regulatory Risk	We have certain outstanding litigation against our Company, an adverse outcome of which may adversely affect our business, reputation and results of operations.

For further discussion of factors that could cause our actual results to differ, see the Section titled "*Risk Factors*", "*Business Overview*" *and* "*Management's Discussion and Analysis of Financial Condition and Results of Operations*" beginning on pages 19, 161 and 251, respectively, of this Prospectus. By their nature, certain market risk disclosures are only estimates and could be materially different from what actually occurs in the future. As a result, actual future gains or losses could materially differ from those that have been estimated.

There can be no assurance to investors that the expectations reflected in these forward-looking statements will prove to be correct. Given these uncertainties, investors are cautioned not to place undue reliance on such forward-looking statements and not to regard such statements to be a guarantee of our future performance.

Neither our Company, our Promoters, our Directors, the Promoter Selling Shareholders, the Syndicate, the Book Running Lead Manager, nor any of their respective affiliates have any obligation to update or otherwise revise any statements reflecting circumstances arising after the date hereof or to reflect the occurrence of underlying events, even if the underlying assumptions do not come to fruition. In accordance with the requirements of SEBI and as prescribed under the applicable law, each of the Promoter Selling Shareholders will, severally and not jointly, ensure (through our Company and the BRLM) that investors are informed of material developments in relation to the statements and undertakings specifically undertaken or confirmed by it in the Red Herring Prospectus until the receipt of final listing and trading approvals for the Equity Shares pursuant to the Offer. Only statements and undertakings which are specifically confirmed or undertaken by each of the Selling Shareholders to the extent of information pertaining to it and/or its respective portion of the Offered Shares, as the case may be, in this Prospectus shall be deemed to be statements and undertakings made by such Selling Shareholder.

SECTION II – RISK FACTORS

An investment in Equity Shares involves a high degree of risk. Potential investors should carefully consider all the information in this Prospectus, including the risks and uncertainties described below, before making an investment in the Equity Shares. The risks described below are not the only ones relevant to us or our Equity Shares, the industry in which we operate. Additional risks and uncertainties, not currently known to us or that we currently do not deem material may also adversely affect our business, results of operations, cash flows and financial condition.

If any of the following risks, or other risks that are not currently known or are not currently deemed material, actually occur, our business, results of operations, cash flows and financial condition could be adversely affected, the price of our Equity Shares could decline and investors may lose all or part of their investment. In order to obtain a complete understanding of our Company and our business, prospective investors should read this section in conjunction with "Business Overview", "Industry Overview", "Management's Discussion and Analysis of Financial Condition and Results of Operations", "Restated Financial Information", "Objects of the Offer", "Capital Structure", "Our Management" and "Our Promoters and Promoter Group" on pages 161, 111, 251, 217, 84, 71, 195 and 211 respectively as well as the other financial and statistical information contained in this Prospectus. In making an investment decision, prospective investors must rely on their own examination of us and our business and the terms of the Offer including the merits and risks involved.

Prospective investors should consult their tax, financial and legal advisors about the particular consequences of investing in the Offer. Unless specified or quantified in the relevant risk factors below, we are unable to quantify the financial or other impact of any of the risks described in this section. Prospective investors should pay particular attention to the fact that our Company is incorporated under the laws of India and is subject to a legal and regulatory environment, which may differ in certain respects from that of other countries.

The risk factors set forth below are not exhaustive and do not purport to be complete or comprehensive in terms of all the risk factors that may arise in connection with our business or any decision to purchase, own or dispose of the Equity Shares. This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. Any of the following risks, individually or together, could adversely affect our business, financial condition, results of operations or prospects, which could result in a decline in the value of our Equity Shares and the loss of all or part of your investment in our Equity Shares. While we have described the risks and uncertainties that our management believes are material, these risks and uncertainties may not be the only risks and uncertainties we face. Additional risks and uncertainties, including those we currently are not aware of or deem immaterial, may also have an adverse effect on our business, results of operations, financial condition and prospects.

This Prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Prospectus. The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors below. However, there are risk factors the potential effects of which are not quantifiable and therefore no quantification has been provided with respect to such risk factors. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of the Offer, including the merits and the risks involved.

Materiality

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality:

1. *Some events may have material impact quantitatively;*

2. *Some events may not be material individually but may be found material collectively;*

3. *Some events may have material impact qualitatively instead of quantitatively;*

4. *Some events may not be material at present but may have a material impact in the future.*

INTERNAL RISK FACTORS

1. ***Our revenue and profit after tax have grown substantially in the recent past but there can be no assurance that our growth will continue to sustain. If we are unable to implement or sustain our growth strategy successfully it could adversely affect our business, results of operations, cash flows and financial conditions.***

Our revenue increased from ₹ 5,431.89 lakhs in the Financial Year ended March 31, 2024 to ₹ 11,980.20 lakhs in the Financial Year ended March 31, 2026 at a CAGR of 48.51%, while our net profit for the year increased from ₹ 581.19 lakhs in FY 2024 to ₹ 1,543.27 lakhs in FY 2026 at an outstanding CAGR of 62.95%, which we may not be able to continue in future. If we are unable to implement or sustain our growth strategy succesfully it could adversely affect our business, results of operations, cash flows and financial condition.

(₹ in lakhs)

Particulars	For the Period/financial year ended			
	September 30, 2026	March 31, 2026	March 31, 2025	March 31, 2024
Revenue from operations	7,193.86	11,980.20	8,048.03	5,431.89
Profit after tax	910.25	1,543.27	1,016.77	581.19

Increase in revenue from operations is due to increasing order book of the company along with company's technical abilities. Our order book has expanded leading to better absorption of fixed costs and succesfull resource utilization. Our growth in financial performance in recent years is largely attributable to careful identification of our projects and cost optimization. Through this approach, we aim to ensure that our projects are optimally priced and minimize unanticipated cost overruns.

Our business model enables us to drive operational efficiency and strengthen profitability. At the pre-bidding stage, we adopt a structured approach that includes conducting technical surveys, feasibility assessments, and evaluating design parameters along with associated costs. This disciplined process allows us to submit competitive bids and enhances our chances of securing projects. Post-award, our emphasis shifts to maintaining construction quality during execution, which in turn minimizes future maintenance and repair requirements.

If we are unable to manage such growth it could disrupt our business prospects, impact our financial condition and adversely affect our results of operations, cash flows and financial condition. Our rapid growth has placed and will continue to place significant demands on our operational, financial and other internal risk controls, including:

- developing and improving our products and delivery channels;
- recruiting, training and retaining sufficient skilled personnel;
- growth of geographical presence; and
- maintaining high levels of customer satisfaction.

If we are not successful in implementing or executing these operational measures and risk controls, we may not be able to expand our business as we have in the past, and our growth rate may decline. We may not be able to manage our operations effectively or efficiently, which would mean that our operations would suffer, and our performance and financial results as a whole would be materially and adversely affected.

2. Our business involves significant working capital requirements, primarily on account of procurement of raw materials, receivables and project execution. Any inability to meet our working capital requirements or to arrange necessary financing in a timely and cost-effective manner, including in a scenario of tightening credit markets or rising interest rates, could adversely affect our operations, financial condition and profitability.

Typically, projects in the Engineering Procurement & Construction (EPC) for Oil & Gas industry which we undertake are working capital intensive in nature and require us to obtain financing through various means. The successful operation of our business heavily relies on significant working capital, which is essential for various aspects, including financing project operations, inventory management and the purchase of materials and may continue to be so in future also. We typically rely on internal accruals as well as credit facilities from banks and vendor financing to provide for our working capital arrangements. As on September 30, 2026, our total short-term borrowings stood at ₹ 2,648.38 lakhs. The table below sets forth details of certain parameters as of the dates indicated:

Particulars	For the period/financial year ended			
	September 30, 2026	March 31, 2026	March 31, 2025	March 31, 2024
Inventory Turnover Ratio[(1)]	1.02	3.10	5.53	14.40
Trade receivables Turnover Ratio[(2)]	3.65	5.96	5.77	7.01
Trade payables Turnover Ratio[(3)]	3.33	4.34	4.05	9.58

Notes:

(1) Inventory turnover ratio is calculated as cost of goods sold divided by average inventory, where cost of goods sold is computed by combining the values of cost of material & service consumed and changes in inventories of finished goods and raw materials as disclosed in the Restated Financial Statements.

(2) Trade receivables turnover ratio is calculated as revenue from operations divided by average trade receivables as disclosed in the Restated Financial Statements.

(3) Trade payables turnover ratio is calculated as total purchases divided by average trade payables as disclosed in the Restated Financial Statements.

Under our contracts, we typically provide certain performance guarantees that require us to complete the project in accordance with a specified timeline and to be responsible for the project maintaining a specified plant performance ratio for a specified time period, generally for up to 5 years after commissioning of the project. Any failure to maintain these performance guarantees may subject us to penalties under our contracts, such as requiring us to perform remediation work to meet the guarantees, pay liquidated damages or allowing the counterparty to terminate the contract. As a result, we may face losses under a particular project, may not be able to achieve our expected margins and may record an overall loss in the relevant financial period. We may also fail to complete our projects by the specified timeline due to construction delays as a result of various factors, including unanticipated changes in engineering design; increase in the cost of equipment, materials or manpower; shortages of skilled labour; supply shortages or delays in the delivery of equipment and materials to the project site; unforeseen conditions or occurrences, including the inability of the customer to obtain the requisite environmental and other approvals, resulting in delays and increased costs; adverse local weather conditions; suppliers' failure to perform; disputes, delay or failure in obtaining required cash inflow from our clients; or delays caused by us or due to factors outside our control.

3. Our top 10 customers contributed 97.29%, 92.27%, 96.04% and 97.84% of our revenue from operations in the six -months period ended September 30, 2026 and the financial year 2026, 2025 and 2024, respectively. A significant portion of our revenues is derived from repeat business or contracts awarded by these customers. Any loss, reduction or delay in orders, deterioration in their financial health, or adverse change in our relationships with such customers may materially affect our revenues, cash flows and results of operations. In addition, a concentration of receivables from these customers may expose us to collection risks.

Our business focuses on the Engineering, Procurement and Construction ("**EPC**") services with a focus oil and gas industry. We generate a significant portion of our revenues from, and are therefore dependent on, certain customers which includes public sector undertakings ("**PSUs**") for a substantial portion of our business. The table below sets forth our revenue from our top customers, our largest customer, top 5 customers and top 10 customers, including as a percentage of our revenue from operations for the previous three financial year indicated.

Customer concentration	For the six-months period ended September 30, 2026		For the Financial Year ended March 31, 2026		For the Financial Year ended March 31, 2025		For the Financial Year ended March 31, 2024	
	Amount (₹ in lakh)	% of revenue from operation	Amount (₹ in lakh)	% of revenue from operation	Amount (₹ in lakh)	% of revenue from operation	Amount (₹ in lakh)	% of revenue from operation
Top 1	1,718.01	23.88	2,865.65	23.92	3,857.04	47.93	3,276.99	60.33
Top 5	6,257.75	86.99	8,969.45	74.87	6,872.29	85.39	5,076.85	93.46
Top 10	6,998.57	97.29	11,054.25	92.27	7,729.60	96.04	5,314.33	97.84

Notes:

1. The Largest, top five and top ten customers are in terms of revenue for each of the respective years and may not necessarily be the same customers.

2. Our Top 10 Customers include M/s. Vectras (Partnership firm of our Promoters), Bharat Petroleum Corporation Limited, AGP City Gas Private Limited, Mahanagar Gas Limited and AGP CGD India Private Limited. The name of rest of the customers has not been disclosed due to non-receipient of their consent.

Our business operations are highly dependent on our customers and the loss of any of our customers may adversely affect our business, cash flows and results of operations. During Fiscal 2026, one of our top 10 customer was M/s. Vectras (Partnership Firm of our Promoters), with which we have entered into non-compete agreement dated September 25, 2025. Pursuant to this agreement, contracts already awarded and to be awarded to the partnership firm has to be sub-contracted to our company.

We do not have any long-term agreements with our customers and the success of our business is accordingly significantly dependent on us maintaining good relationships with our customers. The actual sales by our Company may differ from the estimates of our management due to the absence of long-term agreements.

The loss of one or more of these significant or key customers or a reduction in the amount of business we obtain from them

could have an adverse effect on our business, results of operations, financial condition and cash flows. We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future. Any decline in our quality of services, growing competition and any change in the demand, may adversely affect our ability to retain them. We cannot assure that we shall generate the same quantum of business, or any business at all, and the loss of business from one or more of them may adversely affect our revenues and results of operations.

However, the composition and revenue generated from these customers might change, as we continue to add new customers in the normal course of business. Though we believe that we will not face substantial challenges in maintaining our business relationship with them or finding new customers, there can be no assurance that we will be able to maintain long term relationships with such clients or find new customers in time.

4. There have been certain instances of delays in relation to certain statutory filings made or required to be filed by our Company with the RoC under applicable law and certain other non-compliances under Indian company law.

Our company has missed to comply with certain statutory provisions in the past within due dates including but not limited to the details as mentioned in this risk factor There are few discrepancies noticed in some of our corporate records relating to e-forms filed with the Registrar of Companies, which includes following:

Sr No	Particulars	Due date	Filling dated	No of Days Delayed	Reasons for Delay in Filing

Although, no show cause notice in respect of the above stated non-compliance has been received by the Company till date, any penalty imposed for such non-compliance in future by the any regulatory authority could affect our financial conditions to that extent.

5. There are certain discrepancies and non-compliances noticed in filing of returns and deposit of statutory dues with the taxation and other statutory authorities in the past. Any delay in payment of statutory dues by our Company in future, may result in the imposition of penalties, which could adversely impact our financials.

Our Company is required to pay certain statutory dues including provident fund contributions and employee state insurance contributions etc. as indicated in the tables below. The table below sets forth the details of the statutory dues paid by our Company during the last three financial years:

If we are unable to pay our statutory dues on time, we could we subject to penalties which could impact our financial condition and results of operations.

6. Several of our key raw materials and components are sourced from a limited number of suppliers, which exposes us to supplier concentration risks. Any restriction in supply or defects in quality could cause delays in project construction or implementation and impair our ability to provide our services to clients at a price that is profitable to us, which could have a material adverse effect on our business, financial condition and results of operations.

Our failure to obtain raw materials and components that meet our quality, quantity and cost requirements in a timely manner could interrupt or impair our ability to provide our products and services or increase our operating costs. We depend on a limited number of suppliers for our key raw materials and components. During the six-momths period ended September 30, 2026 and Financial year ended March 31, 2026, 2025 and 2024 our largest supplier, top 5 suppliers and top 10 suppliers as a percentage of total purchases were constituted as follows:

Supplier concentration	For the six-months period ended September 30, 2026		For the Financial Year ended March 31, 2026		For the Financial Year ended March 31, 2025		For the Financial Year ended March 31, 2024	
	Amount (₹ in lakh)	% of Purchase	Amount (₹ in lakh)	% of Purchase	Amount (₹ in lakh)	% of Purchase	Amount (₹ in lakh)	% of Purchase
Top 1	139.88	8.12	1,178.92	34.67	452.08	19.29	694.27	29.88
Top 5	540.20	31.37	1,954.01	57.46	934.17	39.86	1,211.87	52.15
Top 10	778.69	45.23	2,334.50	68.64	1,445.53	61.67	1,693.36	72.87

Notes:

1. *The largest, top five and top ten suppliers are in terms of purchase for each of the respective years and may not necessarily be the same supplier.*
2. *Our Top 10 Suppliers include M/s. Vectras (Partnership firm of our Promoters), Jotun India Private Limited, Steel House and Bhagyalaxmi Enprocon Private Limited. The name of rest of the suppliers has not been disclosed due to non-receipient of their consent*

As a result, any failure of any of our suppliers to perform or provide supplies could disrupt our supply chain and materially and adversely affect our operations. In addition, we engage with local suppliers for raw materials for our projects and any adverse regulations for engaging local suppliers, import restrictions, transportation and related infrastructure failures could increase supply costs which could have a material adverse effect on our operations and financial condition.

Further, for the purpose of quality materials to be used in our EPC projects, we may restrict our choice of suppliers, resulting in increased supply costs for our projects, materially and adversely affecting our profitability, financial condition and results of our operations.

If our suppliers are unable to provide us the quantity of components that we require, we may have to source components from other suppliers and may have to incur additional expenses and experience delays in our timelines. Further, some of our suppliers are small companies that may be unable to supply our increasing demand for raw materials and components as we expand our business. We may be unable to identify suppliers in new markets or qualify their products for use in our business in a timely manner and on commercially reasonable terms. In addition, reductions in our order volume may put pressure on our company and could result in increased material and component costs, materially and adversely affecting our business, financial condition and results of operations.

We do not enter into long-term agreements with our suppliers and typically source the components that we require through purchase orders. Our suppliers may not perform their obligations in a timely manner or at all, resulting in delays in commencement of our projects. While there has been no instance during the last three financial years where the non-performance of obligations by our suppliers had an adverse impact on our results of operations, we cannot assure that such instances will not arise in the future.

7. We derive majority of our revenue from our EPC business verticals i.e. Combined Oil and Gas stations works. Any reduction in the demand of such services could have an adverse effect on our business, results of operations and financial conditions.

Our revenue from operations is substantially concentrated in our EPC business verticals: Combined Oil and Gas stations works. We may face reduction in revenue of Combined Oil and Gas stations works under EPC segment, owing to factors such as reduced demand for our services, increased competition, loss of market share, macro-economic conditions in our key markets or the markets of our key end-customers and changes in government policies and regulations. Any of these factors may have an adverse effect on our business prospects. The table below sets forth the contribution of Combined Oil

and Gas stations works to our revenue from operations in the relevant periods, as per the Restated Financial Information:

Revenue from operations by service type	For the six-months period ended September 30, 2026		For the Financial Year ended March 31, 2026		For the Financial Year ended March 31, 2025		For the Financial Year ended March 31, 2024	
	Amount (₹ in lakhs)	% of revenue from operation	Amount (₹ in lakhs)	% of revenue from operation	Amount (₹ in lakhs)	% of revenue from operation	Amount (₹ in lakhs)	% of revenue from operation
Combined Station work	3,281.37	45.61	4,563.67	38.09	5,135.62	63.82	4,649.63	85.59

Any slowdown in broader economic conditions, industrial investments, changes in energy procurement strategies or delays in project execution may affect our project pipeline and ultimately affecting our business, results of operations and financial conditions.

Further Our company has ventured into pipeline work for Oil and Gas Industry in Midstream and Downstream segment during the financial year ended March 31, 2025. Our Midstream and downstream pipeline services contributing 50.66% of our revenue from operations in financial year ended March 31, 2026 which has reduced our dependability on the combined station work verticals.

Our success in securing contracts and executing high-volume projects under these verticals depends heavily on our ability to consistently qualify for and win competitive tenders. Such tenders involves stringent eligibility requirements related to technical capabilities, execution experience, financial thresholds and regulatory compliances. Any adverse changes in such qualification criteria or our failure to meet them may limit our ability to bid or secure future contracts. Additionally, execution of such projects requires adherence to prescribed timelines, documentation requirements, quality standards and post-commissioning compliances. Delays in execution or procedural inefficiencies from our end could result in financial penalties, cancellation of work orders or blacklisting from future participation. Further delay in tender issuance or reduction in budget allocations could have an adverse effect on our business, results of operations and financial conditions.

8. Our revenues are highly dependent on our operations in the geographical region of the State of Gujarat and Maharashtra, which accounted for 87.92%, 71.52%, 89.72% and 92.59% of our revenue from operations in the six-months period ended September 30, 2026, financial years 2026, 2025 and 2024, respectively. Any adverse development affecting our operations in this region could have an adverse impact on our business, financial condition and results of operations.

Though we undertake EPC projects in different States of India, but our revenue continues to be significantly dependent within Gujarat and Maharashtra. Our revenue from operations generated from these two States amounts to ₹ 6,324.62 lakhs, ₹ 8,568.54 lakhs, ₹ 7,220.83 lakhs and ₹ 5,029.43 lakhs, constituting 87.92%, 71.52%, 89.72% and 92.59% of the total revenue from operations for the six-months period ended September 30, 2026 and the financial year ended March 31, 2026, 2025 and 2024, respectively. The Geographical distribution of our revenue is set out below:

Particulars	For the six-months period ended September 30, 2026		For the Financial Year ended March 31, 2026		For the Financial Year ended March 31, 2025		For the Financial Year ended March 31, 2024	
	Amount (₹ in lakh)	% of revenue from operation	Amount (₹ in lakh)	% of revenue from operation	Amount (₹ in lakh)	% of revenue from operation	Amount (₹ in lakh)	% of revenue from operation

Jharkhand	-	-	110.81	0.92	298.40	3.71	65.50	1.21
Karnataka	42.64	0.59	71.78	0.60	182.62	2.27	97.87	1.80
Rajasthan	62.95	0.88	837.70	6.99	163.63	2.03	10.49	0.19
Bihar	251.44	3.50	353.40	2.95	-	-	-	-
Chhattisgarh	177.43	2.47	1,706.31	14.24	-	-	-	-
Other States and Union Territories	334.78	4.64	331.65	2.77	182.56	2.27	228.60	4.21
Total	**7,193.86**	**100.00**	**11,980.20**	**100.00**	**8,048.03**	**100.00**	**5,431.89**	**100.00**

Such high concentration of revenue in the State of Gujarat and Maharashtra may have an adverse effect. Any economic slowdown or change of laws or regulations, particularly in relation to EPC in oil and gas sector in these two states may have a significant adverse impact on our business, financial condition, cash flows and results of operations. Further, drastic changes in taxes and other levies imposed by the State Government of these states as well as other financial policies and regulations, political and deregulation policies, if changed, could harm the business and economic conditions. Although we have undertaken strategic initiatives to diversify our geographical footprint by securing and executing projects in states such as Rajasthan, Punjab, Tamilnadu, Jharkhand, Andhra Pradesh and Haryana etc during the previous three financial years, the contribution of these regions to our total revenue remains relatively limited.

Expansion into newer geographies also entails challenges, including navigating unfamiliar regulatory environments, establishing vendor networks, supply chain networks and limited brand recognition, which may restrict our ability to replicate the scale and efficiency of operations achieved in these two states. To the extent that we are unable to effectively manage the expansion of our domestic operations and risks, as we implement our strategy to enter into new markets as we improve our domestic presence, where we do not have local knowledge and resources, we may be unable to grow or maintain our sales and profitability, or we may be subject to additional unanticipated costs or legal or regulatory action. While there have been no such instances where we had to face any unanticipated costs or any legal or regulatory actions on account of our expansion in the last three financial years, we cannot assure you that such instances will not arise in the future. As a consequence, our business, financial condition, results of operations and prospects may be adversely affected. For further details related to same, refer to heading titled "*Business Strategies*" in the chapter titled "*Business Overview*" beginning from page 161 of this Prospectus.

9. Our business is operating under various laws which require us to obtain approvals from the concerned statutory/regulatory authorities in the ordinary course of business, and if we are unable to obtain these approvals and the renewals, our business operations could be adversely affected thereby impacting our revenues and profitability.

We are governed by various laws and regulations for our business and operations. We are required, and will continue to be required, to obtain and hold relevant licenses, approvals and permits at government levels to operate our business. Though we believe that we have obtained those permits and licenses that are adequate for is to run our business, we cannot assure that there are no other statutory /regulatory requirements that we are required to comply with. Further, some of these approvals are granted for fixed periods and need renewal from time to time. We are required to renew such permits, licenses, and approvals. While we have not faced any such instances of being unable to renew, maintain or obtain any licenses, permits or approvals that have materially and adversely affected our results of operations for the past three financial years, any inability to renew, maintain or obtain any licenses, permits or approvals in the future may result in the interruption of our operations and have an adverse effect on our business, results of operations, financial condition and cash flows. The approvals, licenses, registrations and permits obtained by us may contain conditions, some of which could be onerous. For details regarding pending approvals, please refer to section titled "*Government and Other Approvals*" beginning on 280 of the Red Herring Prospectus.

Moreover, the Approvals are subject to numerous conditions and there can be no assurance that these Approvals will not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Suspension or revocation of the Approvals by the relevant regulatory authority, either on account of non-compliance or otherwise, could impair our Company's operations and, consequently, have an adverse effect on our business, cash flows and financial condition. Our Company may also be liable to monetary penalties and concerned officers in default may be subject to imprisonment.

Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future. Further, if we are affected, directly or indirectly, by the application or interpretation of any provision of such laws and regulations or any related proceedings, or are required to bear any costs in order to comply with such provisions or to defend such proceedings, our business and financial performance may be adversely affected.

10. We rely on third-party service providers for providing labour at site and drilling & excavation activities, any delay or deficiency in their services may adversely affect our project timelines, cost efficiency and customer satisfaction which could have an adverse effect on our business, financial condition, cash flows and results of operations.

Our business model for executing EPC projects depend on the timely and efficient services of third-party service providers for providing labour at site and drilling & excavation activities. While we maintain oversight and quality checks, we also

have an in-house operations department comprising a team of more than 900 personnel who are responsible for project execution, however, despite this internal oversight, our company remains exposed to risks from the operational performance of our third-party service providers. Any delay, non-compliance, labour shortage or substandard execution by such third-party service providers may lead to operational delays, inconsistent workmanship, cost overruns, imposition of penalties under projects or cancellation of work orders - particularly in projects where strict timelines and specifications are contractually binding. Consequently, any inability to effectively manage or scale our third-party execution capabilities in line with our growth strategy could materially and adversely affect our customer relationships, business, financial condition, cash flows and results of operations.

Further, we do not have any contractual arrangements or exclusivity agreements with such third-party vendors. The engagement with such service providers is typically project-specific, based on availability and commercial terms at the site & time of execution. Although the EPC subcontracting ecosystem in India is fragmented, allowing access to a broad vendor base, our ability to ensure timely project execution in line with client specifications and quality expectations remains inherently dependent on the availability and performance of such third-party service providers. While we have historically been able to mobilize such third-party service providers based on project requirements, any rapid scale-up of operations particularly in new or unfamiliar geographies may constrain our ability to source and deploy adequately third-party service providers within the required timelines.

Set forth below are the installation expenses of our Company for the stub period and previous three financial years:

Project Related Expense	For the six-months period ended September 30, 2026		For the Financial Year ended March 31, 2026		For the Financial Year ended March 31, 2025		For the Financial Year ended March 31, 2024	
	Amount (₹ in lakhs)	% of revenue from operation	Amount (₹ in lakhs)	% of revenue from operation	Amount (₹ in lakhs)	% of revenue from operation	Amount (₹ in lakhs)	% of revenue from operation

Drilling and Excavation Expense	752.76	10.46	2,335.18	19.49	1,641.92	20.40	178.13	3.28
Total	**2,792.77**	**38.82**	**5,510.07**	**45.99**	**3,351.26**	**41.64**	**1,293.23**	**23.81**

11. Increase in costs or a shortfall in availability of the materials we purchase could have a material adverse effect on our Company's financial performance, profitability and results of operations.

Our Company is dependent on third party suppliers for procuring the materials which we use in executing our projects. We are exposed to fluctuations in the prices of these materials as well as its unavailability, particularly as we do not enter into any long-term supply agreements with our suppliers and our major requirement is met in the spot market. The cost and availability of such materials are subject to a variety of factors and any increase in their cost and their availability at a reasonable price or at all, could adversely affect our margins, sales and results of operations. There can be no assurance that strong demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply of materials. If we were to experience a significant or prolonged shortage of such materials from any of our suppliers, and we cannot procure the products from other sources, we would be unable to meet our execution schedules and to deliver such products to our customers in timely fashion, which would adversely affect our sales, margins and customer relations. We cannot assure you that a particular supplier will continue to supply the required materials to us in the future. Any change in the supplying pattern of our products can adversely affect our business and profits. Our inability to obtain high quality materials in a timely and cost-effective manner would cause delays in our execution cycles and delivery schedules, which may result in the loss of our profitability and revenues.

12. We may be unable to accurately estimate project costs under our EPC contracts, which may lead to cost overruns, reduced margins, delays in project execution and adversely affect our financial condition, results of operations and cash flows.

Our Company undertakes Engineering, Procurement and Construction (EPC) contracts for oil and gas industry. These projects are typically executed on a schedule of rates contract model. Accordingly, at the time of bidding or contract execution, we are required to estimate various cost elements including procurement of raw materials and components, civil and electrical work, labour deployment, logistics, commissioning, project management costs, machineries and employee cost. These cost estimates are typically prepared based on preliminary project specifications, initial surveys, prevailing input costs and past execution experience.

In certain cases, especially under projects awarded through competitive tendering route, we may not have finalised back-to-back purchase orders with suppliers at the time of bid submission. As a result, any deviation from our estimates, unforeseen increase in material or labour costs, changes in site conditions, engineering design, statutory requirements, or delays due to force majeure, customer-side issues, or vendor underperformance, may cause actual project costs to exceed our estimates.

Inaccurate cost estimation, if not adequately mitigated, may lead to erosion of project margins, higher working capital requirement, or in some cases, project-level losses. Moreover, failure to deliver projects within agreed timelines or maintain contractual performance standards may expose us to liquidated damages or even termination of contracts, among others. While our Company has not experienced material time or cost overruns in the past three financial years, there can be no assurance that we will not face such challenges in the future. Any material deviation from expected project cost parameters or delays in execution may adversely effect on our financial condition, cash flow and results from operations.

13. Orders in our order book may be delayed, modified or cancelled, and letters of intent may be withdrawn or may not translate to confirmed orders, which may have a material adverse effect on our business, results of operations and financial condition.

As of September 30, 2026, our Unexecuted Order Book comprises 34 projects amounting to ₹ 18,327.88 lakhs, providing strong visibility for future growth.

Order book projects only represent business that is considered 'firm', although cancellations or unanticipated variations or scope or schedule adjustments may occur. Due to changes in project scope and schedule, we cannot predict with certainty when, or if the projects in our order book will be performed. In addition, when a project proceeds as scheduled, it is possible that our clients may default and fail to pay amounts due. We cannot guarantee that the income anticipated in our order book will be realized on time, or at all. Any project cancellations or scope adjustments, which may occur from time to time, could reduce the amount of our order book and the income and profits that we ultimately earn from the contracts. Any delay, cancellation or payment default could have a material adverse effect on our business, results of operations and financial condition.

For some of the contracts in our order book, our clients are obliged to perform or take certain actions, such as acquiring land, securing rights of way, clearing forests, supplying owner-supplied material, securing required licenses, authorizations or permits, making advance payments or procuring financing, approving designs, approving supply chain vendors and shifting existing utilities. If clients do not perform these and other actions in a timely manner or at all, and the possibility of such failure is not provided for in the EPC contract, our projects could be delayed, modified or cancelled and as a result, our business, results of operations and financial condition could be materially and adversely affected.

Before entering into a binding contract with us, our clients generally issue letters of intent which they can withdraw at any time before entering into an EPC contract, which could impact our operations and financial condition. There have been no such instances during the last three financial years where letters of intent have been withdrawn. However, we cannot guarantee that clients will enter into a definitive contract with us after issuing a letter of intent and as a result, could have a material adverse effect on our business, results of operations and financial condition.

Though, the order book information included in this Prospectus is certified by our Statutory auditor, Shah Sanghvi & Associates, it does not necessarily indicate our future earnings. Our order book should not be considered in isolation or as a substitute for performance measures. Our order book and the new projects that we have and will continue to bid for in the future will have an effect on the revenues we will earn in the future. In addition, our project implementation schedule may vary due to various factors that may be beyond our control, including, among others, the availability of raw materials, timely delivery and execution of the order. These depend on various factors such as the value of the project, the timeline for completion and payments to be made as per the agreed timelines.

Apart from above, though our business is not seasonal in nature, we may be affected during monsoon season for the execution of projects. We may face various challenges which may result in Project delays, reduced efficiency and operational challenges. Such challenges may result in delayed execution of our order book, ultimately affecting our revenue from operations and financial conditions.

14. Our failure to perform in accordance with the standards prescribed in work order of our clients could result in loss of business or payment of liquidated damages.

We have received various work orders from our clients. Certain of these work order may require us to comply with the

code of conduct and rules and regulations prescribed by our clients, which may increase our compliance costs. We may be unable to effectively address service constraints or accurately predict service requirements, as a result of which our clients may experience service shortfalls. Any disruptions to our businesses, including as a result of actions outside of our control, could significantly impact the continued performance of our obligations to meet the quality or performance standards set out in our client contracts which may in-turn harm and cause clients to terminate their contracts with us, impair our ability to obtain renewal of our contracts from existing clients and impair our ability to grow our client base, any of which could affect our business, financial condition and results of operations. In the event that we are unable to meet the prescribed obligations, we may also be required to pay compensation or liquidated damages to our clients on the terms set out in our contracts. In certain instances, we may also be required to bear consequential liability. Certain work order may also require us to provide indemnities to our clients with respect of any negligent act or omission by or misconduct of our employees. In the event there is an increase in claims against us for which we are not insured, our business, financial condition and results of operations may be affected.

While there have been no such instances during the last three financial years where there was a failure to perform in accordance with the prescribed standards of work order, we cannot guarantee that such instances will not occur in future and as a result, could have a material adverse effect on our business, results of operations and financial condition.

15. We may experience delays in the execution of our projects or may be unable to effectively manage project execution, which could expose us to contractual liabilities, cost overruns, reputational harm and adversely affect our business, financial condition, cash flows and results of operations.

Our business model is substantially dependent on the timely and cost-effective execution of Oil and Gas EPC projects, for both private and public sector clients. The timely delivery of these projects is subject to various execution-related challenges, including site readiness, engineering complexities, supply chain delays, availability of manpower, third-party service provider performance and any other unforeseen events or conditions beyond our control. Any failure to manage these factors efficiently could result in delays in completion, cost escalations or project execution inconsistencies.

Several of our EPC contracts, contain performance milestones and liquidated damage clauses that impose penalties in case of delays, substandard quality or failure to meet performance guarantees. In certain cases, clients are contractually entitled to terminate the contract, levy penalties or encash performance bank guarantees, among other actions. Additionally, a portion of the contract value is often withheld as retention money, which is only released upon satisfactory completion of the Defect Liability Period. Delays or performance disputes may result in non-release or withholding of these payments.

Although we have internal systems and maintain an in-house operations team, our ability to coordinate site activities, manage third-party service providers and mitigate delays depends on various operational and logistical factors. We also rely on third-party service providers for some for the activities, in the event of performance shortfalls or financial distress on their part, our ability to meet project timelines may be compromised. While we have not experienced any material execution failures or contract terminations during last three financial years, there can be no assurance that we will not face such situations in the future. Any inability to effectively manage project execution may lead to cost overruns, delays in revenue recognition, deterioration in client relationships and may materially and adversely affect our business, financial condition, cash flows and results of operations.

16. Our Company has experienced negative cash flows in the past and any negative cash flows in the future would adversely affect our cash flow requirements, which may adversely affect our ability to operate our business and implement our growth plans, thereby affecting our financial condition.

Our Company has experienced negative cash flows in the past and may continue to do so in the future, which could materially adversely affect our business, prospects, financial condition, cash flows, and results of operations. The table below summarizes our cash flows based on Restated Financial Information, highlighting negative cash flow from operating, activities over the six-month period ended September 30, 2026 and past three financial years:

Particulars	For the period/financial year ended			
	September 30, 2026	**March 31, 2026**	**March 31, 2025**	**March 31, 2024**
Net Cash inflow/ (outflow) from Operating Activities (in ₹ lakhs)	(313.85)	(510.26)	(443.98)	(129.16)

Cash flow is a critical indicator of our ability to generate sufficient funds from operations to cover capital expenditures, pay dividends, repay loans, and make new investments without resorting to external financing. If we fail to generate adequate cash flows, it may negatively impact our business operations and hinder our growth prospects.

17. We must furnish bank and performance guarantees as part of our EPC contracts. Failure to secure these guarantees or their invocation could significantly hinder our ability to compete for new projects, potentially impacting our future revenue streams and business opportunities.

In the EPC services sector, it is standard practice for us to provide financial and performance bank guarantees to ensure fulfilment of our financial and performance commitments under the respective project contracts. Financial Guarantees (Tender EMD) are generally required for bidding on EPC contracts, remain valid until the contract is awarded, and must be submitted before the bid submission deadline. Performance Guarantees, on the other hand, must be furnished within a few days after signing an EPC contract and remain valid through the project execution period stipulated in the contract. Tender EMDs and Performance Guarantees can take the form of a Bank Guarantee, Demand Draft (DD), Retention Money or Fixed Deposit Receipt (FDR).

If any such guarantee is invoked during the contract period, we are typically expected to replace it with a new one. Additionally, in cases where performance ratios are not achieved by the project's commissioning date, we may need to extend existing guarantees until the defect is resolved. Although such instances have not occurred during last three financial years, they could arise in the future due to time overruns or failure to meet performance standards by the commissioning date.

There may also be challenges in securing new financial and performance bank guarantees in sufficient volumes to align with our business needs. Inadequate collateral for such guarantees could restrict our ability to enter into new contracts. Moreover, providing the security required for these guarantees adds to our working capital demands.

The availability of these guarantees is influenced by factors such as our capitalization, working capital, credit facilities, past performance, management expertise, reputation, and external factors like the overall capacity of the surety market. Surety providers and banks evaluate these criteria in light of our backlog and their evolving underwriting standards. Changes in the insurance, bonding, or banking markets could make obtaining financing more challenging or significantly more expensive. A failure to secure sufficient financial and performance bank guarantees could adversely affect our future revenues and business opportunities.

18. We have previously engaged in several related party transactions and may continue to do so in the future on an arm's length basis. However, there is no guarantee that we could not have secured more favorable terms had these transactions been conducted with independent parties.

In the ordinary course of business, we have previously engaged in transactions with related parties and may continue to do so in the future. We believe that all such transactions have been conducted on an arm's length basis in accordance with the Companies Act and other applicable regulations governing their evaluation and approval. Any related party transactions entered into post-listing will be subject to Board or Shareholder approval, as required under the Companies Act and the Listing Regulations, ensuring alignment with the Company's interests, minority Shareholders, and compliance obligations. However, we cannot guarantee that such future transactions, whether individually or collectively, will not negatively impact our business, financial condition, operational results, cash flows, or prospects.

While all related party transactions will comply with the SEBI Listing Regulations, they may still present potential conflicts of interest. There is no assurance that we will be able to fully mitigate such conflicts in the future.

For further details regarding the same, refer to the "*Annexure-VIII - Related Party Transactions*" under section titled "*Restated Financial Information*" beginning on page 217 of this Prospectus.

19. Fluctuations in interest rates on the company's borrowings can impact our cash flows, potentially affecting our ability to finance growth initiatives or efficiently manage existing debt.

All of our secured debt is subject to floating interest rates or periodic rate adjustments, exposing us to interest rate risk on contracts where we have not engaged in swap or hedging transactions though we may consider doing so in the future. Additionally, we may be unable to pass any rise in interest expenses onto our customers, which could materially impact

our business, financial condition, operational results, and cash flows.

If we choose to hedge our interest rate risk, there is no guarantee that we will secure commercially viable terms, that counterparties will fulfill their commitments, or that such agreements will offer complete protection against interest rate fluctuations.

20. Our ability to safeguard intellectual property rights might be insufficient, potentially impacting our competitive edge.

Our brand identity is a critical component of our market presence and differentiation. As on date of this Prospectus, we have secured registrations for device mark (logo) and Word mark under Class 37 bearing registration numbers 5250329 and 5059708, registered in the name of *Vectras Enprocon Private Limited* which are as follow:

Sr. No.	Brand Name/ Logo/ Trademark	Class	Trademark type and Certificate/ Application No.	Issuing Authority	Owner	Date of Registration/ Application	Current Status
1.		37	Device/ 5250329	Registrar of Trademarks, Trade Marks Registry Mumbai	Vectras Enprocon Private Limited	December 17, 2021	Registered
2.	VECTRAS ENPROCON	37	Word/ 5059708	Registrar of Trademarks, Trade Marks Registry Mumbai	Vectras Enprocon Private Limited	July 26,2021	Registered

We may face difficulties in enforcing our rights against third parties who may use similar or deceptively identical marks, leading to potential customer confusion, brand dilution, or reputational harm. Unauthorized usage by competitors or unrelated parties may impair our distinctiveness in the market, adversely impacting our market share and brand equity.

Failure to obtain and enforce adequate protection for our intellectual property rights could have a material adverse effect on our business, financial condition, results of operations, and reputation.

21. Industry information included in this Prospectus has been derived from an industry report prepared by Dun & Bradstreet exclusively commissioned and paid for by us for such purpose.

We have availed the services of an independent third-party research agency, Dun & Bradstreet, which is not or has not been engaged or interested in the formation or promotion or management of the Company and is not related in any manner to our Company, its Promoters, its Directors, SMP, KMP or the BRLM, and which has been appointed by our Company on August 09, 2025 and paid for by us, to prepare an industry report on September 09, 2026 (the "**D&B Report**") for purposes of inclusion of such information based on or derived from the D&B Report or its extracts in this Prospectus to understand the industry in which we operate. The D&B Report is subject to various limitations and is based upon certain assumptions that are subjective in nature. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Prospectus. The D&B Report uses certain methodologies for market sizing and forecasting. Further, D&B Report is not a recommendation to invest/disinvest in any entity covered in the D&B Report and no part of the D&B Report should be construed as an expert advice or investment advice or any form of investment banking within the meaning of any law or regulation. Accordingly, investors should read the industry related disclosure in this Prospectus in this context. A copy of the D&B Report was available on the website of our Company at www.vectrasgroup.com. See "*Industry Overview*" on page 111 in this Prospectus. For further details, including disclosures made by Dun & Bradstreet in connection with the preparation and presentation of their report, see "*Certain Conventions, Use of Financial Information, Market Data and Currency of Presentation*" on page 15 in this Prospectus.

22. Our insurance coverage may not be adequate to protect us against certain operating hazards and economic losses and this may have a material adverse effect on our business, financial condition and result of operations.

We constantly evaluate the risks involved in the business of our company, in an effort to be sufficiently covered for all known risks. Our Company has insurance coverage which we consider reasonably sufficient to cover all normal risks associated with our operations and which we believe is in accordance with the industry standards. While we maintain insurance coverage which we believe are commercially appropriate in respect of our movable property, stock etc which

provides appropriate coverage, we may not have sufficient insurance coverage to cover all possible economic losses. The Company has also taken Employee compensation policies for its employees wherever they are not covered under ESIC.

Accordingly, there can be no assurance that our insurance policies will be adequate to cover the losses that may be incurred as a result of any such interruption which is not so insured by us. If we suffer a large uninsured loss or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and result of operations may be affected materially and adversely. While we have not experienced any such instance during last three financial years, there can be no assurance that we will not face such situations in the future. Further, our insurance coverage expires from time to time. We apply for the renewal of our insurance coverage in the normal course of our business, but we cannot assure you that such renewals will be granted in a timely manner, at an acceptable cost or at all. To the extent that we suffer loss or damage for which we did not obtain or maintain insurance, and which is not covered by insurance or exceeds our insurance coverage or where our insurance claims are rejected, the loss would have to be borne by us and our results of operations, cash flows and financial condition may be adversely affected.

23. Any delay or default in receipt of payments from customers could adversely affect our business, results of operations, financial condition and cash flows.

Our Company is exposed to counterparty credit risk in the usual course of our business dealings with our customers who may delay or fail to make payments or perform their other contractual obligations. As on September 30, 2026, there were outstanding trade receivables of ₹ 1,827.58 lakhs, out of which ₹ 1,827.58 lakhs, represent dues considered good. Though our Company has taken necessary steps to resolve the issue including but not limited to, enforcing payment terms as per the agreement with the customers, background check of new customers and streamline the credit policy of the Company. However, we cannot assure that such instances will not occur in future.

The financial condition of our customers may be affected by the performance of their business which may be impacted by several factors including general economic conditions. We cannot assure you of the continued viability of our customers or that we will accurately assess their creditworthiness. We also cannot assure you that we will be able to collect the whole or any part of any overdue payments. Any material non-payment or non-performance by our customers, could adversely affect our financial condition, results of operations and cash flows.

24. The success of our business depends substantially on our management team including our directors, other key

managerial personnel and Senior Managerial Personnel. Our inability to attract or retain such manpower or any loss of members of our Senior Managerial Personnel or Key Managerial Personnel could significantly delay or prevent the achievement of our business objectives, and could adversely affect our business and operations.

Our business and financial performance depends largely on the efforts and abilities of our Directors, Senior Managerial Personnel and Key Managerial Personnel. Our success and growth depend upon consistent and continued performance of our employees with direction and leadership from our Directors, Senior Managerial Personnel and Key Managerial Personnel. Our success also depends on our ability to recruit, develop and retain qualified and skilled personnel.

There may be changes in our management team or other key managerial personnel or senior managerial personnel to enhance the skills of our teams or as a result of attrition, from time to time. We cannot assure you that we will continue to retain any or all of the key managerial personnel or senior managerial personnel of our management. Further, we cannot assure you that if one or more key managerial personnel or senior managerial personnel of our management are unable or unwilling to continue in their present positions, that we would be able to replace such member(s) in a timely and cost-effective manner.

As of September 30, 2026, we had 990 employees. The table sets forth below attrition rate of our employees the last three financial years:

Particulars	**As at and During the six-months period ended September 30, 2026**	**As at and During the Financial year ended March 31, 2026**	**As at and During the Financial year ended March 31, 2025**	**As at and During the Financial year ended March 31, 2024**
Number of Employees at the beginning (A)	499	221	113	93
Number of Employees at the end (B)	990	499	221	113
Average Number of Employees in a particular financial year/ period (C= (A+B)/2)	745	360	167	103
Number of Employees left (D)	286	187	54	20
Attrition Rate (D/C)	**38.39%**	**51.94%**	**32.34%**	**19.42%**

While we adhere to all employee statutory provident fund requirements and have undertaken initiatives (such as providing bonuses to our employees) to reduce attrition of our employees, the attrition rate for our employees is high. This is primarily due to the nature of our business which often involves entry-level positions with relatively low wages. This leads to a higher employee turnover as compared to other industries with a higher wage structure and a minimum professional qualification requirement for employees.

If we fail to identify, recruit and integrate strategic personnel, our business could be adversely affected. Any loss of members of our Senior Managerial Personnel or Key Managerial Personnel could significantly delay or prevent the achievement of our business objectives, affect our succession planning and could harm our business. We may need to invest significant amounts of cash and equity to attract and retain new employees, and we may never realize returns on these investments. If we are not able to retain and motivate our current personnel or effectively integrate and retain employees, our ability to achieve our strategic objectives, and our business and operations could be adversely affected.

25. There are potential conflicts of interest as our Promoters, Promoter Group entity, are involved in same business activities that compete with or are in the same line of activity as our business operations.

Our both the Promoters are 50% partners each of a partnership firm named "Vectras", which is engaged in the same line of business as that of the Company. Details of the brief financials of the said partnership firm are as under:

Particulars	**For the period six-months ended September 30, 2026**	**For the Financial Year ended March 31, 2026**	**For the Financial Year ended March 31, 2025**	**For the Financial Year ended March 31, 2024**
Revenue from operations *(₹ In lakhs)*	581.28	2,828.31	827.55	1059.18
Net Profit *(₹ In lakhs)*	10.20	28.50	90.00	21.82

Further note that the promoters are also receiving the remunerations from this partnership firm in addition to the interest on their capital and share in the profit of the firm.

Any conflict of interest which could occur between our business and any other similar business activities pursued by our Directors, Promoters and Promoter Group entity including that of "Vectras", could have a material adverse effect on our business and results of operations.

Though, the company has entered into Non-Compete Agreement on September 25, 2025 with the said firm "Vectras" and the promoters to address such conflict situations, there can be no assurance that such measures will be entirely effective in eliminating all potential conflicts of interest. Any such conflict, if not managed effectively, could adversely impact our business operations, financial condition, and prospects. Investors should carefully consider this risk before making an investment in our company.

26. Our operations involve risks that may result in injury to individuals or damage to property, potentially leading to significant disruptions in our business, legal and regulatory challenges, financial liabilities, and adverse effects on our business, financial condition, and operational results.

Due to the nature of our work, employees and other workers often operate in potentially risky environments. This includes risks such as mechanical and electrical failures caused by improper installation of components and power cables, accidents or malfunctions at project sites, equipment corrosion and structural integrity concerns related to weather or other factors post-commissioning. Operating machinery and equipment carries inherent dangers, which could result in serious injuries to personnel, extensive property damage, equipment destruction, or environmental contamination.

While we have not experienced any such instance during last three financial years, there can be no assurance that we will not face such situations in the future. These occurrences could disrupt our operations, subject us to legal and regulatory scrutiny, and impose additional costs and liabilities, all of which could significantly and negatively impact our business, financial condition, and operating results.

27. Our lenders have charge over our movable and immovable properties in respect of finance availed by us.

We have secured outstanding debt of ₹ 2,299.37 lakhs as on September 30, 2026 and we have secured our lenders by creating charge over our movable and immovable properties. In the event we default in repayment of the loans availed by us and any interest thereof, our properties may be forfeited by lenders. It may have a material adverse effect on the business, cash flows and financial condition of our company. For further information on the financing and loan agreements along with the total amounts outstanding, refer to section titled "*Financial Indebtedness*" and "*Restated Financial Information*" on page 273 and 217, respectively, of this Prospectus.

28. We are required to obtain prior consent from our lenders under some of our financing agreements before undertaking certain actions. Our inability to meet our obligations, conditions and restrictions imposed by our financing agreements could materially and adversely affect our ability to conduct our business and operations.

As on September 30, 2026, our aggregate outstanding borrowings was ₹ 3,136.12 lakhs. The documentation in relation to working capital facilities availed by us contains, and documents governing our future indebtedness may contain, numerous financial and operating covenants that may limit the discretion of management with respect to certain business matters. These covenants place restrictions on, among other things, effect any change in our capital structure or share holding pattern or effect any change in the management set up (including resignation of promoter directors) or ownership interest structure where the shareholding by the existing promoter(s) or capital control or ownership interest of the partners including managing partner (as the case may be), directly or indirectly, legally or beneficially, gets diluted below the present level in any manner whatsoever; repay monies brought in by the Promoters/ Directors/ Principal Shareholders and their friends and relatives by way of deposits /loans and advances; invest by way of share capital in any other manner in any other person, entity or concern or lend or advance funds to or place deposits with any other concern (including group companies) or issue guarantee or stand surety for any person; the borrower shall not approach the capital market for mobilizing additional resources either in the form of debt or equity; create or permit to subsist any encumbrance, mortgage or charge or voluntarily or involuntarily sell, transfer, grant, lease or otherwise dispose of or deal with all or any of the present or future properties, assets. While we have obtained "No Objection Certificate" from our lenders as required under some of our financing agreements, our future business, results from operations and cash flows could be adversely affected due to such obligations, conditions and restrictions imposed by our financing agreements.

Our ability to comply with these and other provisions of the existing or future debt agreements is dependent on our future performance, which will be subject to many factors, some of which are beyond our control. The breach of any covenants

applicable to us or non-compliance with any of financial ratios and tests applicable to us could result in an event of default under the existing debt agreements, which, if not cured or waived, could result in acceleration of the related debt and the acceleration of debt under other debt instruments that may contain cross-acceleration or cross-default provisions. Further, variable rate indebtedness subjects us to the risk of higher interest rates, which could cause our future debt service obligations to increase significantly and may impair our ability to raise future debt or impede business operations.

29. We have availed ourselves of certain borrowings which may be recalled by our lenders at any time. Any such recall of borrowings may have a material adverse effect on our business, cash flow, financial condition and results of operations.

We have utilized certain financing facilities outstanding (including secured cash credit facilities and unsecured working capital loans), which may be recalled by the lenders at any time during the tenor of such facilities with or without the existence of an event of default. In the event that a lender or a combination of lenders, seeks a repayment of such facilities, we would have to explore alternative sources of financing, which may not be immediately available on commercially reasonable terms, or at all. If we are unable to avail such financing, we may not be able to meet our working capital requirements. As a result, any such recall of our borrowings may materially and adversely affect our business, cash flow, financial condition and results of operations.

30. We operate in a competitive industry and any failure to compete effectively may result in a decline in our market share, which may have an adverse impact on our business, results of operations, prospects and financial condition.

The EPC industry in India exhibits a highly fragmented structure, comprising over 180 participants and wide range of stakeholders. This sector includes a substantial number of small and medium sized players as well as a few large conglomerates that dominate the construction of complex projects such as roads, power plant, ports, airports, industrial plants and railways. Some of the players across our business verticals include Pratham EPC Projects Limited, Desco Infratech Limited and Likhitha Infrastructure Limited. (*Source: D&B Report).*

Our competitors may have greater technical, operational or financial resources, more effective or established local business presence with specific regional advantages or a greater willingness or ability to operate with little or no operating margins for sustained periods of time in the geographies in which we operate or into which we intend to expand our operations. Any increase in competition during the bidding process we participate or any reduction in our competitive capabilities could have a material adverse effect on our market share and on the margins we generate.

Furthermore, some of our competitors may also be vertically integrated, from turnkey solutions of Oil & Gas EPC through more sophisticated and automated systems. The competitors' size in some cases provides them with a competitive advantage with respect to various components of costs due to their economies of scale and ability to purchase raw materials at lower prices or obtain them at time of shortages. Our competitors may also be able to respond more quickly to evolving industry standards and changes in market conditions than us. Furthermore, it is possible that new competitors or alliances by existing competitors could emerge and rapidly acquire significant market share, which could adversely affect our market share.

31. Any future issuance of Equity Shares may dilute your shareholdings, and sale of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.

Any future equity issuances by our Company may lead to the dilution of investors' shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Offer, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

32. Failure to successfully implement our business strategies may materially and adversely affect our business, prospects, financial condition and results of operations.

We have identified several business strategies intended to drive future growth, operational efficiency, and revenue stability. These includes:

- Continuing client relationship development;
- Strengthening project execution capabilities; and

- Optimal use of resources.

Successful implementation of these strategies may be subject to verious risks and uncertainties, some of which are beyond our control. There can be no assurance that we will be able to execute our business strategies on time and within the estimated costs, or that we will meet the expectations of our clients. In order to manage growth effectively, we must implement and improve operational systems, procedures and controls on a timely basis, which, as we grow and diversify, we may not be able to implement, manage or execute efficiently and in a timely manner or at all, which could result in delays, increased costs and diminished quality and may adversely affect our results of operations and our reputation. Any failure or delay in the implementation of any of these strategies may have a material adverse effect on our business, prospects, financial condition and results of operations.

33. For our business, we rely heavily on our Promoters namely, Naynesh Kanubhai Patel and Maheshkumar Gopalbhai Patel, who are the Whole Time Director & Chairman and Managing Director, respectively. Our business performance may have an adverse effect by their departure or by our failure to recruit or keep them.

Our Promoters namely Naynesh Kanubhai Patel and Maheshkumar Gopalbhai Patel, who are the Whole Time Director & Chairman and Managing Director, respectively, are in charge of our day-to-day operations, strategy, and business development and operations. They are also responsible for the execution of our business plan. It may be challenging to find a suitable replacement for one or more of these Promoters in a timely and economical manner if they are unable to continue in their current roles.

They possess over 30 years of combine experience in the EPC in oil and gas industry, which has contributed significantly to our Company's growth. For further details, see "*Our Management*" on page 195 of this Prospectus.

Our ability to keep these Promoters on board cannot be guaranteed. Given their experience and critical role in our Company, finding suitable replacements for one or more of these Promoters, should the need arise, may be challenging and time-consuming. Our ability to grow, execute our strategy, build brand awareness, raise capital, make strategic decisions, and oversee the day-to-day operations of our business could be hampered by the loss of these Promoters or our inability to find suitable replacements. Further, there could be a materially negative effect on our operations, financial position, cash flows, and business.

34. Our Promoters & Promoter Group will continue to hold a significant equity stake in our Company after the Offer and their interests may differ from those of the other shareholders.

As on the date of this Prospectus, our Promoters & Promoter Group, holds 100.00 % of the paid-up equity share capital of our Company. For further information on their shareholding pre-Offer and post-Offer, see "*Capital Structure*" on page 71 of this Prospectus. After the completion of the Offer, our Promoters & Promoter Group will continue to collectively hold majority of the shareholding in our Company and will continue to exercise significant influence over our business policies and affairs and all matters requiring Shareholders' approval, including the composition of our Board, the adoption of amendments to our constitutional documents, the approval of mergers, strategic acquisitions or joint ventures or the sales of substantially all of our assets, and the policies for dividends, lending, investments and capital expenditure or any other matter requiring special resolution. This concentration of ownership also may delay, defer or even prevent a change in control of our Company and may make some transactions more difficult or impossible without the support of these stockholders. The interests of the Promoters & Promoter Group as our controlling shareholders could conflict with our interests or the interests of our other shareholders. We cannot assure you that the Promoters & Promoter Group will act to resolve any conflicts of interest in our favour and any such conflict may adversely affect our ability to execute our business strategy or to operate our business. For further information in relation to the interests of our Promoters in our Company, refer "*Our Management*" and "*Our Promoters and Promoter Group*" on pages 195 and 211, respectively.

35. Our Promoters, Directors, Key Managerial Personnel (KMP) and Senior Managerial Personnel (SMP) may have interest in our Company other than normal remuneration or benefits and reimbursement of expenses incurred.

Our Promoters, Directors, Key Managerial Personnel (KMPs), and Senior Managerial Personnel (SMPs) may be deemed to be interested in our Company, in addition to normal remuneration or benefits and reimbursements of expenses, to the extent of Equity Shares, held by them and their relatives (if any) and their dividend or bonus entitlement, and other benefits arising from their shareholding in our Company.

36. The average cost of acquisition of Equity Shares by our Promoters may be less than the Offer Price.

The average cost of acquisition of Equity Shares by our Promoters may be less than the Offer Price. The details of the average cost of acquisition of Equity Shares held by Naynesh Kanubhai Patel and Maheshkumar Gopalbhai Patel are set out below:

Sr. No.	Name of Promoters	No. of Equity Shares held	Average Cost of Acquisition per equity share (in ₹)^*
1.	Naynesh Kanubhai Patel	74,99,880	4.00
2.	Maheshkumar Gopalbhai Patel	74,99,820	4.00

^The average cost of acquisition has been calculated based solely on the consideration paid for the shares acquired (whether through allotment or transfer) divided by the total number of equity shares obtained through such transactions.
**As certified by Shah Sanghvi & Associates, Chartered Accountants vide their certificate dated November 03, 2026.*

37. We have not ever declared any dividends in the past and we cannot assure you that we will be able to pay dividends on our Equity Shares in the future.

We have not declared dividends on our Equity Shares for the period since incorporation till date. Our ability to pay dividends in the future will depend upon our future results of operations, financial condition, cash flows, sufficient profitability, working capital requirements and capital expenditure requirements and other factors considered relevant by our directors and shareholders. Our ability to pay dividends may also be restricted under certain financing arrangements that we may enter into. We cannot assure you that we will be able to pay dividends on the Equity Shares at any point in the future. For further details information, see "*Dividend Policy*" on page 216 of this Prospectus.

38. We have not identified any alternate source of raising the funds required for the object of the Offer and the deployment of funds is entirely at our discretion and as per the details mentioned in the section titled "Objects of the Offer".

Our Company has not identified any alternate source of funding for our objects of the Offer and hence any failure or delay on our part to mobilize the required resources, or any shortfall in the Net proceeds, could adversely affect our growth plan and profitability. The delay/ shortfall in receiving these proceeds may result in inadequacy of funds or may result in borrowing funds on unfavourable terms, both of which scenarios may affect the business operation and financial performance of the company. Further the deployment of the funds raised in the Offer will be entirely at the discretion of the management as per the details mentioned in the section titled "*Objects of the Offer*" and any revision in the estimates may require us to reschedule our projected expenditure and may have a bearing on our expected revenues and earnings. For further details of refer chapter titled "*Objects for the Offer*" beginning on page 84 of this Prospectus.

39. Our financial results may be subject to seasonal variations. Any obstruction in our operations due to rain, or any other seasonal factor may impact our operations, which may lead to delay/loss of our revenue from operations, profitability etc.

Our revenues and results may be affected by seasonal factors. As we are majorly into providing infrastructure services and gas distribution, our operations are affected by rain, water logging, weather conditions and site conditions. Our operations may also be adversely affected by difficult working conditions during monsoon season. During periods of curtailed activity due to adverse weather conditions, we may continue to incur operating expenses, but our revenues from operations may be delayed or reduced. Various state authorities have also issued guidelines restricting digging operations during monsoon season. In Fiscal 2026, 71.52% of our Revenue from Operations was generated from Gujarat and Maharashtra, regions where the monsoon season typically occurs between June and September. While there have been no instances of any material impact on our business due to rains during the six-months period ended September 30, 2026, Fiscal 2026, Fiscal 2025, and Fiscal 2024, there can be no assurance that such events will not adversely affect our operations in the future.

40. Pursuant to listing of the Equity Shares, we may be subject to pre-emptive surveillance measures like Additional Surveillance Measure (ASM) and Graded Surveillance Measures (GSM) by the Stock Exchanges in order to enhance market integrity and safeguard the interest of investors.

SEBI and the Stock Exchange have introduced various pre-emptive surveillance measuresin order to enhance market integrity and safeguard the interests of investors, including ASM and GSM. ASM and GSM are imposed on securities of companies based on various objective criteria such as significant variations in price and volume, concentration of certain client accounts as a percentage of combined trading volume, average delivery, securities which witness abnormal price rise not commensurate with financial health and fundamentals such as earnings, book value, fixed assets, net worth, price / earnings multiple and market capitalization.

Upon listing, the trading of our Equity Shares would be subject to differing market conditions as well as other factors which

may result in high volatility in price, low trading volumes, and a large concentration of client accounts as a percentage of combined trading volume of our Equity Shares. The occurrence of any of the abovementioned factors or other circumstances may trigger any of the parameters prescribed by SEBI and the Stock Exchange for placing our securities under the GSM and/or ASM framework or any other surveillance measures, which could result in significant restrictions on trading of our Equity Shares being imposed by SEBI and the Stock Exchange. These restrictions may include requiring higher margin requirements, requirement of settlement on a trade for trade basis without netting off, limiting trading frequency, reduction of applicable price band, requirement of settlement on gross basis or freezing of price on upper side of trading, as well as mentioning of our Equity Shares on the surveillance dashboards of the Stock Exchange. The imposition of these restrictions and curbs on trading may have an adverse effect on market price, trading and liquidity of our Equity Shares and on the reputation and conditions of our Company.

For further details in relation to the ASM and GSM Surveillance Measures, including criteria for shortlisting and review of listed securities, exemptions from shortlisting and frequently asked questions, among other details, refer to the websites of the BSE.

41. Any changes to the utilization of the Net Proceeds, as outlined in this Prospectus, must comply with specific requirements, including obtaining prior approval from our Company's shareholders.

We intend to use the Net Proceeds for our repayment / prepayment of certain outstanding borrowings availed by our company, company's working capital needs and general corporate purposes. For more details on the proposed objectives of the Offer, refer to the section titled "*Objects of the Offer*" on page 84 of this Prospectus. However, these objectives have not been assessed by any bank, financial institution, or independent agency.

As per the Companies Act, 2013, and the SEBI ICDR Regulations, any change in the disclosed utilization of the Net Proceeds requires the approval of our Company's shareholders through a special resolution. If such a scenario arises, we may face challenges in obtaining shareholder approval promptly, or possibly at all. Any delays or difficulties in securing such approval could negatively impact our operations or business.

Moreover, our Promoters are obligated to offer an exit opportunity to shareholders who disagree with changes to the objects of the Offer, in accordance with Companies Act read with SEBI ICDR regulations. This requirement might discourage our Promoters from agreeing to changes, even if they benefit our Company. Additionally, we cannot guarantee that our Promoters will always have sufficient resources to provide such exit opportunities. Consequently, we may find it challenging to redirect any unused proceeds towards different objectives, even when it benefits the Company. This limitation could restrict our ability to adapt to changes in our business or financial conditions, potentially harming our operations and results.

42. Third party statistical and financial data in this Prospectus may be incomplete or unreliable

None of the Company, the BRLM or any other person connected with the Offer has independently verified the third party statistical and financial data in this Prospectus which has been sourced from various public and private publications. Industry sources and publications generally state that the information contained therein has been obtained from sources believed to be reliable, but their accuracy, completeness and underlying assumptions are not guaranteed, and their reliability cannot be assured. Industry sources and publications fare also prepared based on information as of specific dates. There is no assurance that such information obtained from third party sources and publications will be current or reflect current trends. Further, such industry sources and publications may also base their information on estimates, projections, forecasts and assumptions that may prove to be incorrect.

43. We are dependent on tenders from Private Sector entities, which accounts for approximately, 92.35%, 93.81%, 99.08% and 98.94% of our revenue from operations for the six-months period ended September 30, 2026 and Fiscal 2026, 2025 and 2024, respectively. However, delays or a lack of tenders from private sector entities, could materially impact our business through contract foreclosures, terminations, restructurings, or renegotiations, affecting our operations and financial performance.

We derive a substantial portion of our business from private sector entities engaged in Oil and Gas sector. For the six-months period ended September 30, 2026, Fiscals 2026, 2025 and 2024, our revenue from operations derived from private sector entities accounted for 92.35%, 93.81%, 99.08% and 98.94%, respectively. As of September 30, 2026, our Unexecuted Order Book comprises 34 projects amounting to ₹ 18,327.88 lakhs, out of which 82.20% comprised projects with private sector entities. Any reduction in orders or adverse change in procurement policies of such entities, or our inability to win future bids with these entities, could materially and adversely affect our business, financial condition, cash flows, results of operations and growth prospects. In the event any one or more these customers cease to release tenders, our business may be adversely affected. The table below sets out details of the contribution to our revenue from operations by our customer category, as of the dates mentioned.

Category of customers	For the six-months period ended September 30, 2026		For the Financial Year ended March 31, 2026		For the Financial Year ended March 31, 2025		For the Financial Year ended March 31, 2024	
	Amount (₹ in lakhs)	% of Revenue from Operation	Amount (₹ in lakhs)	% of Revenue from Operation	Amount (₹ in lakhs)	% of Revenue from Operation	Amount (₹ in lakhs)	% of Revenue from Operation
Private sector	6,643.58	92.35	11,238.55	93.81	7,973.99	99.08	5,374.41	98.94
Public sector undertakings	550.28	7.65	741.65	6.19	74.03	0.92	57.49	1.06
Total	**7,193.86**	**100.00**	**11,980.20**	**100.00**	**8,048.02**	**100.00**	**5,431.89**	**100.00**

The award of projects through the tendering process is highly competitive and depends on multiple factors, including the capital expenditure plans and investment cycles of private sector entities, macroeconomic conditions, availability of financing, and their internal project priorities. Any delay in floating new tenders, reduction in project sizes, postponement, or cancellation of projects by these entities could adversely impact our order book, revenue visibility, and operational performance.

Further, our reliance on private sector clients exposes us to concentration risk and counterparty risk. Any deterioration in the financial health of such clients, changes in their procurement strategies, or delays in project execution or payment cycles may adversely affect our cash flows and profitability. In certain cases, projects may also be subject to termination, renegotiation, or restructuring due to changes in technical specifications, scope of work, or contractual terms, which may result in cost overruns, delays in revenue recognition, or loss of margins.

While we continuously seek to expand our client base and diversify our revenue streams, there can be no assurance that we will be able to reduce our dependence on tenders from private sector entities or that such tenders will continue to be available in sufficient volume or value in the future. Any inability to secure new projects, delay in receiving tender awards, or discontinuation of existing relationships with private sector clients could materially and adversely affect our business, financial condition, results of operations, and future prospects.

EXTERNAL RISK FACTORS

44. Instability in financial markets could materially and adversely affect our results of operations and financial condition.

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

45. Our business and financial performance may be adversely affected by unfavourable changes in economic conditions, political or regulatory developments, or geopolitical instability in India or globally.

A decline in economic growth, political instability, or changes in the Government of India could have specific adverse effects on businesses operating EPC sector in oil and gas industry. Economic slowdowns can reduce investment in such projects, as both government budgets and private funding may shrink. Reduced economic growth might also weaken consumer purchasing power, limiting demand for EPC sector in oil and gas industry.

Political instability, such as changes in government leadership or policy, can introduce uncertainty that affects long-term planning in the EPC sector in oil and gas industry. Abrupt policy shifts could disrupt the industry's supply chain and profitability.

46. A slowdown in economic growth in India may adversely affect our business, financial condition, cash flows, results of operations and prospects.

A slowdown in economic growth in India could have significant negative impacts on businesses and their financial stability. Reduced economic growth often translates to weakened consumer confidence and purchasing power, leading to decreased demand for products and services across sectors. This decline in demand could directly affect revenues and profitability, particularly for businesses reliant on discretionary spending. Additionally, slower economic growth might result in tighter credit markets, making it more difficult for companies to secure funding for operations, expansion, or new projects.

Inflationary pressures typically accompany periods of slow growth, raising costs for raw materials, transportation, and operations. These increased costs could compress profit margins, creating challenges in maintaining financial health. For companies dependent on exports or trade, a sluggish domestic economy might also lead to unfavorable currency movements, increasing the cost of imports and foreign debt servicing.

Increased unemployment and reduced income levels during such periods could affect industries that rely on mass consumption, while sectors tied to infrastructure or investment projects might face delays or cancellations due to tighter government budgets or decreased private sector investment.

Overall, a slowdown in India's economic growth introduces financial uncertainties that adversely affect a company's business performance, cash flows, results of operations, and future prospects. Businesses must adopt adaptive strategies such as cost optimization, diversification, and risk management to mitigate these risks effectively.

47. Natural disasters, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect our business.

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID-19, man-made disasters, including acts of war, terrorist attacks, environmental issues and other events, many of which are beyond our control, may lead to economic instability, including in India or globally, which may in turn materially and adversely affect our business, financial condition, cash flows and results of operations.

Our operations may be adversely affected by fires, natural disasters and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity and may require us to evacuate personnel and suspend operations. Any terrorist attacks or civil unrest as well as other adverse social, economic and political events in India could have a negative effect on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the Equity Shares.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

48. Any changes in the regulatory framework could adversely affect our operations and growth prospects.

Our Company is subject to various regulations and policies. For details see section titled "*Key Industrial Regulations*" beginning on page 182 of this Prospectus. Our business and prospects could be materially adversely affected by changes in any of these regulations, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse effect on our business, financial condition and results of operations.

49. Any downgrading of India's debt rating by a domestic or international rating agency could adversely affect our Company's business.

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our Company's ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could harm our Company's business and financial performance and ability to obtain financing for capital expenditures.

50. Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse impact on our business, financial condition and results of

operations.

Taxes and other levies imposed by the Central or State Governments in India that impact our industry include goods and service tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. There can be no assurance that these tax rates/slab will continue in the future. Further, with the Introduction of the Goods and Services Tax Act, tax rates and its implication may have material impact on our products. Any changes in these tax rates/slabs could adversely affect our financial condition and results of operations.

51. Our Equity Shares have never been publicly traded, and after the Offer, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the Offer Price may not be indicative of the market price of the Equity Shares after the Offer.

Prior to the Offer, there has been no public market for the Equity Shares, and there can be no assurance that an active trading market for our Equity Shares on the Stock Exchanges will develop or be sustained after the Offer. Although our Equity Shares will be listed and quoted on the Stock Exchanges, such listing does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares will be sustained. The Offer Price of the Equity Shares was determined through a book-building process and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors. Consequently, the price of our Equity Shares may be volatile, and you may be unable to resell your Equity Shares at or above the Offer Price, or at all.

Additionally, there has been significant volatility in the Indian stock markets in the recent past, and our Equity Share price could fluctuate significantly because of market volatility. A decrease in the market price of our Equity Shares could cause investors to lose some or all of their investment.

52. The determination of the Price Band is based on various factors and assumptions and the Offer Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Offer. Further, the current market price of some securities listed pursuant to certain previous issues managed by the BRLM is below their respective Offer prices.

The determination of the Price Band is based on various factors and assumptions and will be determined by our Company in consultation with the BRLM. Furthermore, the Offer Price of the Equity Shares will be determined by our Company in consultation with the BRLM through the Book Building Process. These will be based on numerous factors, including factors as described under "*Basis for Offer Price*" beginning on page 97 and may not be indicative of the market price for the Equity Shares after the Offer.

In addition to the above, the current market price of securities listed pursuant to certain previous initial public offerings managed by the BRLM is below their respective Offer price. For further details, see "*Other Regulatory and Statutory Disclosures – Price information and the track record of the past issues handled by the BRLM*" on page 290. The factors that could affect the market price of the Equity Shares include, among others, broad market trends, financial performance and results of our Company post-listing, and other factors beyond our control. We cannot assure you that an active market will develop, or sustained trading will take place in the Equity Shares or provide any assurance regarding the price at which the Equity Shares will be traded after listing.

53. None of Bidders are permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid.

Pursuant to the SEBI ICDR Regulations, all category of Bidders are required to pay the Bid Amount on submission of the Bid and are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. While our Company is required to complete all necessary formalities for listing and commencement of trading of the Equity Shares on all Stock Exchanges where such Equity Shares are proposed to be listed including Allotment pursuant to the Offer within six Working Days from the Bid/Offer Closing Date, events affecting the Bidders' decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operation, cash flows or financial condition may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the Bidders' ability to sell the Equity Shares Allotted pursuant to

the Offer or cause the trading price of the Equity Shares to decline on listing.

54. The requirements of being a listed company may strain our resources.

We are not a listed company and have historically not been subjected to the compliance requirements and increased scrutiny of our affairs by shareholders, regulators, stock exchange and the public at large associated with being a listed company. Upon listing, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the Listing Regulations which will require us to file audited annual and unaudited Quarterly/ Half Yearly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations or cash flows as promptly as other listed companies.

55. The sale of Equity Shares by our Promoters in future may adversely affect the market price of the Equity Shares.

After the completion of the Offer, our Promoters will still own a significant percentage of our issued Equity Shares. The sale of a large number of the Equity Shares by our Promoters in future could adversely affect the market price of the Equity Shares. Similarly, the perception that any such primary or secondary sale may occur, could adversely affect the market price of the Equity Shares. No assurance may be given that our Promoters will not dispose of, pledge or encumber their Equity Shares in the future. Any such actions could result in a decline in the market price or increased volatility of our Equity Shares.

56. The Offer price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Offer and the market price of our Equity Shares may decline below the Offer price and you may not be able to sell your Equity Shares at or above the Offer Price.

The Offer price of the equity shares will be determined based on many factors and may not be indicative of the market price of our Equity Shares after the Offer. For further information, refer the section titled "*Basis for Offer Price*" beginning on page 84 of this Prospectus. The market price of our Equity Shares could be subject to significant fluctuations after the Offer, and may decline below the Offer Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Offer Price.

Further, as a listed company, we will be required to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, our management's attention may be diverted from our business concerns, which may adversely affect our business, prospects, financial condition, results of operations and cash flows. In addition, we may need to hire additional legal and accounting staff with appropriate experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely and efficient manner.

57. Holders of Equity Shares may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby may suffer future dilution of their ownership position.

Under the Companies Act, a company having share capital and incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of equity shares to maintain their existing ownership percentages before the issuance of any new equity shares, unless the pre-emptive rights have been waived by adoption of a special resolution. However, if the laws of the jurisdiction where the investors are located in, do not permit them to exercise their pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such jurisdiction, the investors will be unable to exercise their pre-emptive rights unless we make such a filing. If we elect not to file a registration statement, the new securities may be issued to a custodian, who may sell the securities for the investor's benefit. The value the custodian receives on the sale of such securities and the related transaction costs cannot be predicted. In addition, to the extent that the investors are unable to exercise pre-emptive rights granted in respect of the Equity Shares held by them, their proportional interest in our company would be reduced.

58. Any future issuance of Equity Shares or convertible securities or other equity linked securities by our Company may dilute your shareholding and any sale of the Equity Shares by our Promoters or Promoter Group may adversely affect the trading price of the Equity Shares.

Any future equity issuances by us, including a primary offering, may lead to the dilution of investors' shareholdings in us. Any disposal of Equity Shares by our Promoters or Promoter Group or the perception that such issuance or sales may occur,

including to comply with the minimum public shareholding norms applicable to listed companies in India may adversely affect the trading price of the Equity Shares, which may lead to other adverse consequences including difficulty in raising capital through offering of the Equity Shares or incurring additional debt. There can be no assurance that we will not issue further Equity Shares or that the Promoters or Promoter Group will not dispose of the Equity Shares. Any future issuances or sale of Equity Shares could also dilute the value of your investment in the Equity Shares. In addition, any perception by investors that such issuances or sales might occur may also affect the market price of the Equity Shares.

59. Foreign investors are subject to foreign investment restrictions under Indian laws that may limit our ability to attract foreign investors, which may have a material adverse impact on the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non- residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. For further details, see "*Restrictions on Foreign Ownership of Indian Securities*" on page 350. If the transfer of shares is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020, issued by the DPIIT, Government of India, investments where the beneficial owner of the Equity Shares is situated in or is a citizen of a country which shares land border with India, can only be made through the Government approval route, as prescribed in FDI Policy. These investment restrictions shall also apply to subscribers of offshore derivative instruments. We cannot assure you that any required approval from the RBI or any other governmental agency can be obtained on any particular terms or at all.

60. Rights of shareholders of companies under Indian law may be more limited than under the laws of other jurisdictions.

Our Articles of Association, composition of our Board, Indian laws governing our corporate affairs, the validity of corporate procedures, directors' fiduciary duties, responsibilities and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights under Indian law may not be as extensive and widespread as shareholders' rights under the laws of other countries or jurisdictions. Investors may face challenges in asserting their rights as shareholder in an Indian company than as a shareholder of an entity in another jurisdiction.

61. Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realised on the sale of listed equity shares on a stock exchange held for more than 12 months will be subject to long term capital gains in India at the specified rates depending on certain factors, such as whether the sale is undertaken on or off the stock exchanges, the quantum of gains and any available treaty exemption. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of Securities Transaction Tax ("**STT**"), on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India.

Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares. Additionally, pursuant to the Finance Act, 2020, dividend distribution tax ("**DDT**") is not required to be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, such dividends would not be exempt in the hands of the shareholders, both resident as well as non-resident.

Similarly, any business income realized from the transfer of Equity Shares held as trading assets is taxable at the applicable tax rates subject to any treaty relief, if applicable, to a non-resident seller. Additionally, capital gains arising from the sale of our Equity Shares are generally taxable in India. Any gain realised on the sale of our Equity Shares on a stock exchange held for more than 12 months is subject to long term capital gains tax in India. Such long-term capital gains exceeding ₹ 125,000 arising from the sale of listed equity shares on a stock exchange are subject to tax at the rate of 12.5% (plus applicable surcharge and cess). The stamp duty for transfer of certain securities, other than debentures, on a delivery basis is currently specified at 0.015% and on a non-delivery basis is specified at 0.003% of the consideration amount.

Investors are advised to consult their own tax advisors and to carefully consider the potential tax consequences of owning

Equity Shares. Unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals.

62. A third party could be prevented from acquiring control of our Company because of anti-takeover provisions under Indian law.

There are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company, even if a change in control would result in the purchase of your Equity Shares at a premium to the market price or would otherwise be beneficial to you. Such provisions may discourage or prevent certain types of transactions involving actual or threatened change in control of our Company. Under the Takeover Regulations, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to its stakeholders, it is possible that such a takeover would not be attempted or consummated because of the SEBI Takeover Regulations.

63. There can be no assurance that the Equity Shares offered through this Offer will be listed on the Stock Exchanges within the time frame specified or at all.

Our company has made application to the SME Platform of BSE Limited for listing of its Equity Shares by filing of Draft Red Herring Prospectus dated September 30, 2025. Pursuant to our application, BSE Limited has granted In-principle approval dated November 07, 2025 to list equity shares of our company on the BSE SME platform and to use the name of the Exchange in the offer document.

However, the Exchange reserves the right to withdraw this In-principle approval at any stage if the information submitted to the Exchange is found to be incomplete/ incorrect/ misleading/ false or if it contravenes any Rule, Bye-laws, Regulations of the Exchange, Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, Companies Act, 2013 and guidelines / regulations issued by any statutory authorities etc. Hence, there can be no assurance that the Equity Shares offered through this Offer will be listed on the Stock Exchanges within the time frame specified or at all.

(1) The Offer was made in terms of Chapter IX of the SEBI (ICDR) Regulations, 2018, as amended from time to time. This Offer was made by our company in terms of Regulation of 229 (2) and Regulation 253 (1) of SEBI ICDR Regulations read with Rule 19(2)(b)(i) of SCRR wherein not less than 25% of the post – offer paid up equity share capital of our company are being offered to the public for subscription.

(2) Our Board has authorised the Offer pursuant to its resolution dated September 16, 2025. Our Shareholders have authorised the Offer pursuant to its special resolution dated September 17, 2025.

(3) Our Board has taken on record the consent by the Promoter Selling Shareholders to participate in the Offer for Sale pursuant to its resolution dated September 16, 2025. Each of the Promoter Selling Shareholders have, severally and not jointly, authorized the inclusion of their respective portion of the Offered Shares in the Offer for Sale. The details of such authorisation and consent are provided below:

Sr No	Name of Selling Shareholders	Date of consent letter	Maximum number of Offered Shares
1.	Naynesh Kanubhai Patel	September 16, 2025	4,98,000 Equity Shares of face value of ₹ 10 each
2.	Maheshkumar Gopalbhai Patel	September 16, 2025	4,98,000 Equity Shares of face value of ₹ 10 each

For further details, see "The Offer" and "Other Regulatory and Statutory Disclosures" on pages 48 and 290 respectively.

(4) The SEBI (ICDR) Regulations permit the issue of securities to the public through the Book Building Process, which states that, not less than 15% of the Net Offer was available for allocation on a proportionate basis to NIIs of which (a) one-third of the Non-Institutional Investor Category was available for allocation to Individual Investor with an application size of more than 2 (two) lots and up to such lots equivalent to not more than ₹ 10,00,000 and (b) two-thirds of the Non-Institutional Investor Category was available for allocation to Individual Investors with an application size of more than ₹ 10,00,000, provided that the unsubscribed portion in either of such sub-categories may be allocated to other sub-category of Non-Institutional Investor and the remaining shares, if any, was allotted on a proportionate basis in accordance with the conditions specified in this regards in Schedule XIII of SEBI ICDR Regulations and not less than 35% of the Net Offer was available for allocation on a proportionate basis to Individual Investor who applies for minimum application size of two lots and not more than 50% of the Net Offer was allotted on a proportionate basis to QIBs, subject to valid Bids being received at or above the Offer Price.

(5) Our Company may, in consultation with the BRLM, allocated up to 60% of the QIB Portion to Anchor Investors on a discretionary basis. The QIB Portion was accordingly reduced for the Equity Shares allocated to Anchor Investors. 40% of the Anchor Investor Portion was reserved in the following manner: (i) 33.33% of the Anchor Investor Portion was reserved for domestic Mutual Funds, and (ii) 6.67% of the Anchor Investor Portion was reserved for Life Insurance Companies and Pension Funds, subject to valid Bids being received from domestic Mutual Funds, Life Insurance Companies and Pension Funds at or above the Anchor Investor Allocation Price, in accordance with the SEBI ICDR Regulations. The SEBI ICDR Regulations have permitted the Offer of securities to the public through the Book Building Process, wherein allocation to the public was made as per Regulation 253 of the SEBI ICDR Regulations.

The Offer was made through the Book Building Process wherein 50% of the Net Offer was available for allocation on a proportionate basis to QIBs provided that our Company in consultation with the BRLM allocated upto 60% of the QIB Portion to Anchor Investors on a discretionary basis in accordance with the SEBI ICDR Regulations **(**the "**Anchor Investor Portion**"**),** out of which one third was reserved for domestic Mutual Funds, subject to valid Bids being received from domestic Mutual Funds at or above the Anchor Investor Offer Price. 5% of the Net QIB Portion was available for allocation on a proportionate basis to Mutual Funds only, and the remainder of the Net QIB Portion was available for allocation on a proportionate basis to all QIB Bidders, including Mutual Funds, subject to valid Bids being received at or above the Offer Price.

Further, not less than 15% of the Net Offer was available for allocation on a proportionate basis to Non-Institutional Bidders in the following manner a) one third of the portion available to non-institutional investors was reserved for applicants with application size of more than two lots and up to such lots equivalent to not more than ₹ 10.00 lakhs b) two third of the portion available to non-institutional investors was reserved for applicants with application size of more than ₹ 10.00 lakhs and unsubscribed portion in either of the sub-categories specified in clauses a) or b), was allocated to applicants in the other sub-category of non-institutional investors, and not less than 35 % of the Net Offer was available for allocation to Individual Bidders, who applies for minimum application size in accordance with the SEBI Regulations, subject to valid Bids being received at or above the Offer Price.

All potential Bidders, other than Anchor Investors only participated in the Offer through an ASBA process by providing details of their respective bank account which was blocked by the SCSBs or, in the case of UPI Bidders, by using the UPI Mechanism. All Bidders were mandatorily required to utilize the ASBA process to participate in the Offer. Under-subscription if any, in any category, except in the QIB Category, was allowed to be met with spill over from any other category or a combination of categories at the discretion of our Company in consultation with the BRLM and the Designated Stock Exchange.

All Bidders, were mandatorily required to use the ASBA process for participating in the Offer in accordance with the SEBI ICDR Regulations, all bidders were not allowed to withdraw or lower the size of their Bids (in terms of the quantity of the Equity Shares or the Bid Amount) at any stage. Further, Anchor Investors could not withdraw their Bids after submission of bids. Allocation to the Anchor Investors was on a discretionary basis. Downward Modification and cancellation were not be applicable to any of the category of bidding.

Subject to valid Bids being received at or above the Offer Price, allocation to all categories in the Net Offer, was made on a proportionate basis, except for Individual Investor Portion where allotment to each Individual Bidders was not less than the minimum bid lot, subject to availability of Equity Shares in Individual Investor Portion, and the remaining available Equity Shares, if any, was allotted on a proportionate basis. Under - subscription, if any, in any category, was allowed to be met with spill - over from any other category or a combination of categories at the discretion of our Company in consultation with the Book Running Lead Manager and the Stock Exchange. However, under - subscription, if any, in the QIB Portion was not allowed to be met with spill over from other categories or a combination of categories.

In terms of SEBI Circular No. CIR/CFD/POLICYCELL/11/2015 dated November 10, 2015 and the SEBI (Issue of Capital and Disclosure Requirements) Regulations, 2018, all the investors ((except Anchor Investors) applying in a public offer used only Application Supported by Blocked Amount (ASBA) process for application providing details of the bank account which was blocked by the Self Certified Syndicate Banks (SCSBs) for the same. Further, pursuant to SEBI Circular No. SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 01, 2018, Individual Investors applying in public Offer used either Application Supported by Blocked Amount (ASBA) facility for making application or also used UPI as a payment mechanism with Application Supported by Blocked Amount for making application. For details in this regards, specific attention is invited to the chapter titled "*Offer Procedure*" beginning on page 318 of this Prospectus.

The process of Book Building under the SEBI ICDR Regulations is subject to change from time to time and the investors are advised to make their own judgment about investment through this process prior to making a Bid or application in the Offer. For further details on the method and procedure for Bidding, refer section entitled "*Terms of the Offer*", "*Offer Structure*" and "*Offer Procedure*" on page 304, 314 and 318 respectively, of this Prospectus.

Notwithstanding the foregoing, the Offer is subject to obtaining (i) the final listing and trading approvals of the Stock Exchange with respect to the Equity Shares Offered through the Red Herring Prospectus and this Prospectus, which our Company will apply for only after Allotment; and (ii) filing of this Prospectus with Registrar of Companies.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Offer. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, offer size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer/Selling Shareholders is able to Issue/Offer the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer in consultation with the BRLM, may finalise the Offer Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Offer Price are valid Bids and are considered for allocation in the respective categories.

Steps to be taken by the Bidders for Bidding:

- Check eligibility for making a Bid (see section titled "*Offer Procedure*" on page 318 of this Prospectus);

- Ensure that you have a demat account and the demat account details are correctly mentioned in the Bid cum Application Form;

- Ensure correctness of your PAN, DP ID and Client ID mentioned in the Bid cum Application Form. Based on these parameters, the Registrar to the Offer will obtain the Demographic Details of the Bidders from the Depositories.

- Except for Bids on behalf of the Central or State Government officials, residents of Sikkim and the officials appointed by the courts, who may be exempt from specifying their PAN for transacting in the securities market, for Bids of all values ensure that you have mentioned your PAN allotted under the Income Tax Act in the Bid cum Application Form. The exemption for Central or State Governments and officials appointed by the courts and for investors residing in Sikkim is subject to the Depositary Participant's verification of the veracity of such claims of the investors by collecting sufficient documentary evidence in support of their claims.

- Ensure that the Bid cum Application Form is duly completed as per instructions given in this Prospectus and in the Bid cum Application Form;

Details of the Market Making Arrangement for this Offer

Our Company and the Book Running Lead Manager have entered into an agreement dated September 14, 2026, with the following Market Maker to fulfil the obligations of Market Making:

Name:	Spread X Securities Private Limited
Correspondence Address:	Shilp Corporate Park, B Block, 13th Floor, B-1309, Near Rajpath Club, Rajpath Rangoli Road, S.G. Highway, Ahmadabad City Gujarat 380054 India
Tel No.:	079-69072020
E-mail:	info@spreadx.in
Website:	www.spreadx.in
Contact Person:	Mrs. Khushbu Shah
SEBI Registration No.:	INZ000310930

The Market Maker shall comply with the applicable obligations and conditions as specified in the SEBI (ICDR) Regulations, 2018 and the circulars issued by the BSE and SEBI in this regard from time to time.

In accordance with Regulation 261 of the SEBI (ICDR) Regulations, we will enter into an agreement with the Book Running Lead Manager and the Market Maker (duly registered with BSE to fulfil the obligations of Market Making) dated September 14, 2026, to ensure compulsory Market Making for a minimum period of three years from the date of listing of equity shares issued in this Offer.

Spread X Securities Private Limited, registered with SME Platform of BSE "SME Platform" will act as the Market Maker and has agreed to receive or deliver of the specified securities in the market making process for a period of three years from the date of listing of our Equity Shares or for a period as may be notified by any amendment to SEBI (ICDR) Regulations. The Market Maker shall fulfil the applicable obligations and conditions as specified in the SEBI ICDR Regulations, as amended from time to time and the circulars issued by SME Platform of BSE Limited and SEBI in this matter from time to time.

Following is a summary of the key details pertaining to the proposed Market Making arrangement:

1) The Market Maker(s) (individually or jointly) shall be required to provide a 2-way quote for 75% of the time in a day. The same shall be monitored by the stock exchange. Further, the Market Maker(s) shall inform the exchange in advance for each and every black out period when the quotes are not being issued by the Market Maker(s).

2) The minimum depth of the quote shall be ₹ 1,00,000. However, the investors with holdings of value less than ₹ 1,00,000 shall be allowed to Issue their holding to the Market Maker(s) (individually or jointly) in that scrip provided that he/she sells his/her entire holding in that scrip in one lot along with a declaration to the effect to the selling broker.

3) Execution of the order at the quoted price and quantity must be guaranteed by the Market Maker(s), for the quotes given by him.

4) After a period of three (3) months from the market making period, the market maker would be exempted to provide quote if the Shares of market maker in our Company reaches to 20% of Offer Size (Including the 2,53,200 Equity Shares sought to be allotted under this Offer). Any Equity Shares allotted to Market Maker under this Offer over and above 2,53,200 Equity Shares would not be taken in to consideration of computing the threshold of 20% of Offer Size. As soon as the Shares of market maker in our Company reduce to 19% of Offer Size, the market maker will resume providing 2-way quotes.

5) There shall be no exemption/threshold on downside. However, in the event the Market Maker exhausts his inventory through market making process, BSE may intimate the same to SEBI after due verification.

6) There would not be more than five Market Makers for a script at any point of time and the Market Makers may compete with other Market Makers for better quotes to the investors.

7) On the first day of the listing, there will be pre-opening session (call auction) and there after the trading will happen as per the equity market hours. The circuits will apply from the first day of the listing on the discovered price during the pre-open call auction. In case equilibrium price is not discovered the price band in the normal trading session shall be based on Offer price.

8) The Marker Maker may also be present in the opening call auction, but there is no obligation on him to do so.

9) There will be special circumstances under which the Market Maker may be allowed to withdraw temporarily/fully from the market – for instance due to system problems, any other problems. All controllable reasons require prior approval from the Exchange, while *force-majeure* will be applicable for non-controllable reasons. The decision of the Exchange for deciding controllable and non-controllable reasons would be final.

10) The Market Maker(s) shall have the right to terminate said arrangement by giving a One month notice or on mutually acceptable terms to the Merchant Banker, who shall then be responsible to appoint a replacement Market Maker(s).

11) In case of termination of the Market Making agreement prior to the completion of the compulsory Market Making period, it shall be the responsibility of the Book Running Lead Manager to arrange for another Market Maker in replacement during the term of the notice period being served by the Market Maker but prior to the date of releasing the existing Market Maker from its duties in order to ensure compliance with the requirements of regulation 261 of the SEBI (ICDR) Regulations, 2018 as amended. Further our Company and the Book Running Lead Manager reserve the right to appoint other Market Makers either as a replacement of the current Market Maker or as an additional Market Maker subject to the total number of Designated Market Makers does not exceed five or as specified by the relevant laws and regulations applicable at that particular point of time. The Market Making Agreement is available for inspection at our registered office from 11.00 a.m. to 5.00 p.m. on working days.

12) **Risk containment measures and monitoring for Market Makers:** SME Platform of BSE will have all margins which are applicable on the Main Board viz., Mark-to-Market, Value-At-Risk (VAR) Margin, Extreme Loss Margin, Special Margins and Base Minimum Capital etc. BSE can impose any other margins as deemed necessary from time-to-time.

13) **Punitive Action in case of default by Market Makers:** SME Platform of BSE Limited will monitor the obligations on a real time basis and punitive action will be initiated for any exceptions and/or non-compliances. Penalties / fines may be imposed by the SME Platform of BSE Limited on the Market Maker, in case he is not able to provide the desired liquidity in a particular security as per the specified guidelines. These penalties / fines will be set by the SME Platform of BSE Limited from time to time. SME Platform of BSE Limited will impose a penalty on the

Market Maker in case he is not present in the market maker issuing two-way quotes) for at least 75% of the time. The nature of the penalty will be monetary as well as suspension in market making activities / trading membership.

14) The Department of Surveillance and Supervision of the Exchange would decide and publish the penalties / fines / suspension for any type of misconduct/ manipulation/ other irregularities by the Market Maker from time to time.

15) **Price Band and Spreads:** SEBI Circular bearing reference no: CIR/MRD/DP/ 02/2012 dated January 20, 2012, has laid down that for Offer size up to ₹ 250 crores, the applicable price bands for the first day shall be:

i) In case equilibrium price is discovered in the Call Auction, the price band in the normal trading session shall be 5% of the equilibrium price.

ii) In case equilibrium price is not discovered in the Call Auction, the price band in the normal trading session shall be 5% of the Offer price.

Additionally, the trading shall take place in TFT segment for first 10 days from commencement of trading. The following spread will be applicable on the SME Platform.

Sr. No.	Market Price Slab (In ₹)	Proposed spread (in % to sale price)
1.	Up to 50	9
2.	50 to 75	8
3.	75 to 100	6
4.	Above 100	5

The Book Running Lead Manager may be represented on the board of director of the Issuer Company in compliance with Regulation 261(8) of SEBI ICDR Regulations.

The Market Maker shall not be responsible to maintain the price of the Equity Shares of the Issuer Company at any particular level and is purely supposed to facilitate liquidity on the counter of our Company via its 2-way quotes. The price of the Equity Shares shall be determined and be subject to market forces.

Risk containment measures and monitoring for Market Maker: The SME platform of BSE Limited will have all margins which are applicable on the BSE Main Board viz., Mark-to-Market, Value-At-Risk (VAR) Margin, Extreme Loss Margin, Special Margins and Base Minimum Capital etc. BSE may impose other margins as deemed necessary from time-to-time.

Pursuant to SEBI Circular number CIR/MRD/DSA/31/2012 dated November 27, 2012, limits on the upper side for market makers during market making process has been made applicable, based on the Offer size and as follows:

Offer Size	Buy quote exemption threshold (including mandatory initial inventory of 5% of the Offer Size)	Re-Entry threshold for buy quote (including mandatory initial inventory of 5% of the Offer Size)
Up to ₹ 20 Crore	25%	24%
₹ 20 Crore To ₹ 50 Crore	20%	19%
₹ 50 Crore To ₹ 80 Crore	15%	14%
Above ₹80 Crore	12%	11%

The Market Making arrangement, trading and other related aspects including all those specified above shall be subject to the applicable provisions of law and / or norms issued by SEBI / BSE from time to time.

All the above-mentioned conditions and systems regarding the Market Making Arrangement are subject to change based on changes or additional regulations and guidelines from SEBI and Stock Exchange from time to time.

Withdrawal of the Offer

If our Company withdraw the Offer any time after the Bid/ Offer Opening Date but before the allotment of Equity Shares, a public notice within 2 (two) working days of the Bid/ Offer Closing Date, providing reasons for not proceeding with the Offer shall be issued by our Company. Fresh Issue

Our Company proposes to utilize the Net Proceeds towards funding of the following objects:

1. Pre-payment/ re-payment, in part or full, of certain outstanding borrowings availed by our Company;

2. Funding long-term working capital requirement of our Company; and

3. General Corporate Purposes

(Collectively referred as the "**Objects**")

In addition to the above Objects, we expect to receive the benefits of listing of the Equity Shares on the SME platform of BSE, which include enhancement of our Company's visibility and brand image and creation of a public market for our Equity Shares in India, among others.

The main objects and objects incidental and ancillary to the main objects set out in our Memorandum of Association enable us to undertake: (i) our existing business activities and other activities set out therein; and (ii) the activities proposed to be funded from the Net Proceeds. We confirm that the activities which we have been carrying out till date are in accordance with the objects clause of our Memorandum of Association.

Net proceeds

After deducting the Offer related expenses from the Gross Proceeds of the Fresh Issue, we estimate the Net Proceeds to be ₹ 3,843.80 lakhs. The details of the Net Proceeds of the Offer are summarized in the table below:

Particulars	Amount (in ₹ lakhs)
Gross Proceeds of the Fresh Issue	4,258.80
Less: Public Offer Related Expenses in relation to the Fresh Issue	415.00[(1)]
Net Proceeds	**3,843.80**

(1) For details of the expenses related to the Offer, see "Offer Expenses" on page 91.

Utilization of Net Proceeds

The Net Proceeds will be utilized for following purpose:

Sr. No.	Particulars	Amount (in ₹ lakhs)	% of Net Proceeds
1.	Repayment / prepayment, in full or part, of certain outstanding borrowings availed by our Company	1,400.00	36.42
2.	Funding long-term working capital requirement of our Company	2,000.00	52.03
3.	General Corporate Purpose[(1)]	443.80	11.55
Net Proceeds		**3,843.80**	**100.00**

(1) The amount utilized for general corporate purposes shall not exceed 15% of the gross amount raised by our Company or ₹ 1,000 lakhs, whichever is less through this Offer.

Means of Finance

The fund requirements for the Objects are proposed to be met entirely from the Net Proceeds and in case of a shortfall in the Net Proceeds or any increase in the actual utilization of funds earmarked for the Objects, our Company shall utilize its internal accruals, therefore, there is no requirement to make firm arrangements of finance through verifiable means towards at least 75% of the stated means of finance, excluding the amount to be raised through the Fresh Issue or the existing identifiable accruals, as required under Regulation 230(1)(e) the SEBI ICDR Regulations.

The fund requirement and deployment are based on internal management estimates and have not been appraised by any bank or financial institution. These are based on current conditions and are subject to change in the light of changes in Internal / external circumstances or costs or other financial conditions and other factors. In case of any increase in the actual utilization of funds earmarked for the Objects, such additional funds for a particular activity will be met by way of means available to our Company, including from internal accruals. If the actual utilization towards any of the Objects is lower than the proposed deployment such balance will be used for future growth opportunities including funding existing objects, if required subject to applicable Rules and Regulations. In case of delays in raising funds from the Offer, our Company may deploy certain amounts towards any of the above-mentioned Objects through a combination of Internal Accruals. However, we confirm that no bridge financing has been availed as on date, which is subject to being repaid from the Offer Proceeds.

We further confirm that no part of the proceeds of the Offer shall be utilized for repayment of any Part of unsecured loan outstanding as on date of this Prospectus. As we operate in a competitive environment, our Company may have to revise its business plan from time to time and consequently our fund requirements may also change. Our Company's historical expenditure may not be reflective of our future expenditure plans. Our Company may have to revise its estimated costs, fund allocation and fund requirements owing to various factors such as economic and business conditions, increased competition and other external factors which may not be within the control of our management. This may entail rescheduling or revising the planned expenditure and funding requirements, including the expenditure for a particular purpose at the discretion of the Company's management.

For further details on the risks involved in our business plans and executing our business strategies, refer the Section titled "*Risk Factors*" beginning on page no. 19 of this Prospectus.

Schedule of Implementation and Deployment of funds

We propose to utilize and deploy the Net Proceeds towards the Objects in accordance with the estimated schedule of implementation and deployment of funds set forth in the table below:

(in ₹ lakhs)

Sr. No.	Particulars	Amount to be funded from the Net Proceeds	Estimated Utilization of Net Proceeds (Financial year 2026-27)*	Estimated Utilization of Net Proceeds (Financial year 2027-28)*
1.	Repayment / prepayment, in full or part, of certain outstanding borrowings availed by our Company	1,400.00	1,400.00	-

Sr. No.	Particulars	Amount to be funded from the Net Proceeds	Estimated Utilization of Net Proceeds (Financial year 2026-27)*	Estimated Utilization of Net Proceeds (Financial year 2027-28)*
2.	Funding long-term working capital requirement of our Company	2,000.00	800.00	1,200.00
3.	General Corporate Purpose	443.80	443.80	-
Total		**3,843.80**	**2,643.80**	**1,200.00**

** To the extent our Company is unable to utilize any portion of the Net Proceeds towards the Object, as per the estimated schedule of deployment specified above; our Company shall deploy the Net Proceeds in the subsequent financial years towards the object. Due to general business exigencies, the use of offer proceeds may be interchangeable.*

In the event the Net Proceeds are not completely utilized for the Objects during the respective periods mentioned in "Schedule of implementation" above, due to factors such as (i) economic and business conditions; (ii) timely completion of the Offer; (iii) market conditions outside the control of our Company; and (iv) any other commercial considerations, the remaining Net Proceeds shall be utilized (in part or full) in subsequent periods as may be determined by our Company, in accordance with applicable laws.

The deployment of funds indicated above is based on management estimates, current circumstances of our business, other commercial and technical factors, prevailing market conditions, which are subject to change. We may have to revise our funding requirements and deployment of the Net Proceeds from time to time on account of various factors, such as financial and market conditions, business and strategy and other external factors, which may not be within the control of our management. This may entail changing the allocation of funds from its planned allocation at the discretion of our management, subject to compliance with applicable law. See "*Risk Factors*" beginning on page no. 19 of this Prospectus.

Subject to applicable laws, in the event of any increase in the actual requirement of funds earmarked for the purposes set forth below, such additional fund requirement will be met by way of any means available to us, including from internal accruals. However, the use of offer proceeds for General Corporate Purposes shall not exceed 15% of the offer size or 10 crore whichever is less at any point of time.

Details of Use of Offer Proceeds

1. Repayment / prepayment, in full or part, of certain outstanding borrowings availed by our Company:

Our Company has entered into certain financing arrangements with banks and financial institutions for term loans and working capital facilities to fund its expansion activities and operational requirements. As of September 30, 2026, our Company's total outstanding fund-based borrowings amounted to ₹ 3,136.12 lakhs. We intend to utilize an amount of ₹ 1,400.00 lakhs from the Net Proceeds in order to repay/ prepay, in full or in part, certain or all of the borrowings availed by our Company. For details of our financing arrangements, see "*Financial Indebtedness*" on page 273.

Our Company proposes to utilise an estimated amount of up to ₹ 1,400.00 lakhs from the Net Proceeds towards prepayment and/or repayment of all or a portion of certain working capital facilities availed by our Company. Given the nature of these borrowing and the terms of prepayment and/or repayment, the aggregate outstanding amounts under these borrowing may vary from time to time and we may, in accordance with the relevant repayment schedule, repay or refinance some of the borrowing set out below, prior to Allotment or avail of additional credit facilities. If at the time of Allotment, any of the below mentioned loans are repaid or refinanced or if any additional credit facilities are availed or drawn down or further disbursements under the existing facilities are availed by us, then our Company may utilise the Net Proceeds for prepayment and/or repayment of any such refinanced facilities or any additional facilities / disbursements obtained by our Company. In the event our Board deems appropriate, the amount allocated for estimated schedule of deployment of Net Proceeds in a particular fiscal may be repaid / pre-paid by our Company in the subsequent Fiscal. Our Company may choose to repay/ prepay certain borrowing availed by our Company, other than those identified in the table below, which may include additional borrowings availed after the filing of this Prospectus.

The borrowing proposed to be prepaid or repaid amongst our borrowing arrangements availed is based on various factors, including (i) cost of the borrowing, including applicable interest rates, (ii) any conditions attached to the borrowing restricting our ability to prepay / repay the borrowing and time taken to fulfil, or obtain waivers for fulfilment of such conditions, (iii) terms and conditions of consents and waivers, (iv) levy of any prepayment penalties and the quantum thereof, (v) provisions of any laws, rules and regulations governing such borrowings, and (vi) other commercial considerations including, among others, the amount of the loan outstanding and the remaining tenor of the loan. The

amounts proposed to be prepaid and/or repaid against each borrowing facility below is indicative and our Company may utilize the Net Proceeds to prepay and/or repay the facilities disclosed below in accordance with commercial considerations, including amounts outstanding at the time of prepayment and/or repayment. For further details, see "*Financial Indebtedness*" on page 273. Pursuant to the terms of the borrowing arrangements, prepayment of certain indebtedness may attract prepayment charges as prescribed by the lender. Such pre-payment will help reduce the existing borrowings of our Company and assist us in maintaining a favourable debt-equity ratio and enable utilisation of our internal accruals for further investment in business growth and expansion. We confirm that no repayment obligations or charges including pre-payment penalty, will be borne from the proceeds of the IPO, including the GCP amount. Any such amount will be borne from internal accruals of the company. The following table sets forth details of certain borrowing availed by our Company, which are outstanding as on September 30, 2026, out of which our Company may repay/prepay, all or a portion of, any or all of the borrowing, from the Net Proceeds:

Name of the Lender	Sanction date	Nature of borrowing	Purpose	Amount sanctioned as on September 30, 2026 (₹ in lakhs)	Principal amount outstanding as on September 30, 2026 (₹ in lakhs)	Repayment date/ Schedule/ Tenor	Interest Rate (% p.a.)[(1)]	Pre-payment conditions/ penalty
HDFC Bank Limited	May 06, 2026	Cash credit	To fund Working capital	1,900.00	1,590.98	Repayable on Demand	8.50%	4.00% of overall facility limit

Note:
[(1)] The rate of interest mentioned above, is the current rate of interest and is subject to changes as per the sanction letters/loan agreements issued by the respective lenders.

In accordance with Clause 9(A)(2)(b) of Part A of Schedule VI of the SEBI ICDR Regulations, our statutory auditors by way of their certificate dated October 26, 2026, have confirmed that the borrowings specified above has been utilized for the purposes availed, as per the sanction letters/loan agreements issued by the respective banks.

2. Funding long-term working capital requirement of our Company:

We are Gujarat based Engineering, Procurement and Construction ("**EPC**") company operating in the Midstream and Downstream segment of Oil & Gas Industry. We are an Oil & Gas infrastructure service provider having presence in multiple states, focused on laying pipeline networks and combined station works along with construction of associated facilities. We provide integrated solutions to the Oil & Gas sector, which includes (i) Combined station works (ii) Midstream and downstream pipeline projects and related facilities, and (iii) Other allied services. Under the leadership of our experienced and first-generation promoters, we have established a strong track record in delivering comprehensive EPC services in Oil & Gas industry such as design, engineering, procurement, construction, testing and commissioning of Oil & Gas stations and cross-country pipelines, spur pipelines, city gas stations and related civil and mechanical works.

Net working capital requirement of our company for the six-months period ended September 30, 2026 on rested basis ₹ 7,119.42 lakhs, the financial year ended March 31, 2026 on restated basis was ₹ 5,558.35 lakhs as compared ₹ 2,872.89 lakhs in the financial year ended March 31, 2025 and ₹ 1,290.63 lakhs the financial year ended March 31, 2024.

The net working capital requirements on standalone basis is projected to be ₹ 7,979.38 Lakhs as on March 31, 2027 and ₹ 10,993.19 lakhs as on March 31, 2028. The company will meet the requirement to the extent of ₹ 2,000.00 lakhs from the net proceeds of the offer and balance from internal accruals at an appropriate time as per the requirement.

Rationale for raising additional working capital

Long EPC project cycle:

Oil and Gas EPC projects, in Midstream and Downstream segment are inherently complex and long-cycle in nature, often-spanning 6 months to 36 months or more from initial engineering through procurement and site execution. Contracts entered by us with our clients are usually standard and have contractual terms not favorable to us. Additionally, 5–10% of the contract value is tied to the final billing milestone linked to submission and approval of as-built documentation and drawings, which is realized only after a considerably longer period, even post project completion and handover.

Furthermore, our contracts generally stipulate a Defect Liability Period (DLP) of 8-12 months after project handover,

extending the timeline for closure of final payments and retention amounts.

Bank Guarantee Requirements:

Pre-Contract / Bid Stage:

Given the nature of our business, tender participation is the primary driver of order inflow and revenue from operation of the company. Our tendering team regularly monitors various tender websites of authorities and other leads generated, based on which management of the company evaluate tenders to participate. As of September 30, 2026, we had submitted bids for a total of 4 projects, with an aggregate bid value of ₹ 29,781.65 lakhs. Participation in such tenders generally requires furnishing Earnest Money Deposits ("**EMD**") in the form of bank guarantees, typically around 1% of the bid value. These amounts remain blocked with the client until the L1 bidder is declared and, in some cases, may be retained for a longer period if there is a risk that the L1 bidder cannot execute the project. Generally, such EMD amount is lien-marked for a duration of 6 to 8 months. Since we are required to participate in several tenders concurrently while also executing ongoing projects, this places considerable strain on our available non-fund-based banking limits.

In current fiscal, we are enjoying the benefit of start-up due to which we are not required to submit EMD in most of the PSU's contracts. However, considering the growth of our company, we will be required to submit EMD for all projects as such exemption will not be available to us. Hence, our working capital requirement will increase in next fiscal, due to which we have earmarked majority of amount to be funded from Net proceed for next fiscal as well.

Contract Award and Execution:

(1) Contractual Performance Bank Guarantees (CPBGs):

In the normal course of our business, we are required to furnish Contractual Performance Bank Guarantees ("**CPBGs**") to our clients as a condition for securing and executing projects. These guarantees serve as an assurance of our ability to perform contractual obligations within the agreed timelines and quality standards. Typically, such CPBGs ranges from 2.5–5.00 % of the total contract value and are required to be submitted within fifteen days to one month from letter of award. Such submitted CPBGs can be claimed after completion of project. Currently, the average project execution period ranges from over 12 months up to 36 months, which, along with the post-completion release period, results in the blockage of funds for a duration ranging between approximately 15 to 40 months.

(2) Performance Bank Guarantees (PBGs):

Apart from CPBG, we are also required to provide Performance Bank Guarantee ("**PBG**") as per the contract terms. Such PBGs are typically ranges from 5% to 10% of the total contract value. The purpose of such PBGs is to provide surety to client regarding execution of the project in the normal course of business apart from CPBG. Our company can claim PBG along with CPBG after completion of contract. Hence, our company is required additional funds for PBGs along with CPBGs at the commencement of project.

(3) Retention Money (Receivable):

In line with industry practice, our clients typically retain a portion of the contract value, referred to as Retention Money, which is withheld from payments due to us until the successful completion of the project and, in certain cases, until the expiry of the defect liability period. Retention Money generally ranges from 5% to 10% of the contract value and is intended to safeguard the client against any deficiencies in performance, workmanship, or delays in project execution.

Such Retention Money is generally released after the completion of contractual obligations or against submission of bank guarantees in lieu thereof, as may be permitted by the client. Until such release, the amounts remain locked, thereby increasing our working capital requirements.

We fund our working capital requirements in the ordinary course of business from internal accruals and financing from various banks and financial institutions. As on September 30, 2026, our Company had sanctioned facilities aggregating ₹ 5,609.06 lakhs comprising ₹ 3,259.06 lakhs of fund-based limits and ₹ 2,350.00 lakhs of non-fund-based limits. The following table provides utilization of fund and non-fund-based credit limits for working capital requirement:

Justification for Holding Period levels

The incremental working capital requirement of our company is primarily driven by increase in the trade receivables and Inventories guided by the increase in the revenue from operations. Further, with the fund infusion from the net proceeds, we will also be in position to provide timely payment to our suppliers and get better terms and conditions resulting into reduction in trade payables.

The justifications for the holding levels mentioned in the table above are provided below:

Particulars	Details
Trade Receivables	The receivables for the financial year ended March 31, 2024, 2025, 2026 and for the six-months period September 30, 2026 were 51 days, 62 days, 60 days and 49 days of the revenue from operations, respectively. Generally, we extend credit up to 30–45 days to customers, with payments subject to clearance post third-party audits, which generally require 20-50 days. As a result, our trade receivables typically range between 50–90 days. For the financial year ended March 31, 2027 and 2028 we expect the trade receivable period to be in the same range of 59 days and 57 days in respective fiscals.
Inventories	The holding levels for inventories for Fiscal 2024, 2025, 2026 and six-months period ended September 30, 2026 were 25 days, 65 days, 116 days and 177 days of the cost of goods sold, respectively. Inventories of the Company mainly consists of material includes material inventories of various products and components required in the EPC projects and work in progress. Typically, the execution period of our EPC projects ranges from 6 to 36 months or more. Since a significant portion of our raw materials comprises high-value, customised and long-lead items, we generally place orders for such materials well in advance and maintain inventory for approximately 60 to 75 days to ensure timely availability and avoid any delays in the erection and commissioning of equipment. In addition to raw materials, WIP relating to EPC projects under execution is also included in inventory as at the end of the respective Fiscal. Accordingly, the inventory holding period at the year-end may be higher and generally ranges between 60 and 120 days. During Fiscal 2026, our inventory days were approximately 116 days, primarily due to the raw materials and WIP pertaining to a particular EPC contract under execution. The higher inventory days were attributable to the inventory held for the execution of the said project, including materials procured in advance and WIP recognised as at the end of Fiscal 2026. During the Fiscal 2027 and 2028, inventories are expected to be in the range of 112 days and 97 days, as we feel that similar inventory for ongoing projects will be required.
Fixed Deposit lien marked for fund based and non – fund based limits	The Company used to create certain fixed deposits of maturity 3 month to 12 months and beyond 12 months period. Accordingly, the Company had fixed deposits with maturity 3 month to 12 months and beyond 12 months amounting to ₹60.28 lakhs, ₹125.44 lakhs, ₹165.14 lakhs and ₹439.95 lakhs as at the end of Fiscals 2024, 2025, 2026 and six-months period ended September 30, 2026 respectively. Historically, we were not required to maintain high fixed deposits as the existing requirements were being fulfilled by the collaterals given by our Company.

Particulars	Details
	Based on the current order book and expected order to win by the Company, the requirement of fixed deposit as margin non-fund-based limits like performance bank guarantees, Contractual performance guarantees and Earnest money deposit is estimated to increase, we expect that all such new deposits shall be created for a period of 3 month to 12 months and more than one year. We expect such deposits to increase to ₹ 832.37 lakhs as at March 31, 2028.
Retention Receivable (Other Current & Non-Current Asset)	As per the contractual terms, our Company is generally required either to furnish Bank Guarantees or allow customers to retain a specified portion of each invoice. The applicable percentage and duration vary across customers; however, retention typically ranges between 5.00% and 10.00% of the invoice value. Accordingly, the Company's retention receivables from its existing order book stood at ₹189.04 lakhs, ₹440.53 lakhs, ₹853.05 lakhs and ₹1,211.49 lakhs as at the financial ended on March 31, 2024, 2025, 2026 and six-months period ended September 30, 2026, respectively. Based on the current order book, retention receivables are estimated at ₹1,292.61 lakhs and ₹2,268.05 lakhs for the financial year ended March 31, 2027 and 2028, respectively. The Company's retention receivables represented 7 days, 14 days, 19 days and 26 days of revenue from operations for the financial year ended March 31, 2024, 2025, 2026 and six-months period ended September 30, 2026, respectively, primarily on account of the initial stage of operations and execution of lower-value contracts. Over time, with the execution of larger and longer-tenure contracts, the retention period has gradually increased from 7 days to 19 days. Based on the current order book, the Company expects retention receivables to further rise to 23 days and 27 days of revenue from operations for the financial year ended March 31, 2027 and 2028, respectively.
Trade Payables	Due to our long-standing relationship with our suppliers, we have been enjoying good credit terms for the financial year ended March 31, 2024, 2025, 2026 and six-months period ended September 30, 2026 but the suppliers themselves have limited financial bandwidth to support our business growth estimated in near future. The same is also evident from the fact that while our revenue has grown from ₹ 5,431.89 lakhs as at March 31, 2024 to ₹ 11,980.20 lakhs as at March 31, 2026, our trade payables have remained in the range of ₹ 198.59 lakhs to ₹ 959.33 lakhs during the period. In terms of Trade Payables to Cost of Goods Sold, our Trade Payable days have increased from 18 days as at March 31, 2024 to 60 days as at March 31, 2025, further it's decreased from 60 days as at March 31, 2025 to 28 days as at March 31, 2026. Going forward as at March 31, 2027 and March 31, 2028, we expect our Trade Payables to be in range of 17-20 days as our business would be expanding, we would be required to onboard new suppliers for our existing projects and new project. Our new suppliers might not be comfortable in giving us long credit lines hence we would be required to make either advance payments towards procurement of raw material or the payment tenure post receipt of the raw material might decrease from the existing holding days, hence we expect the days to decrease from 28 days as at March 31, 2026 to 20 days to 17 days as at March 31, 2027 and March 31, 2028 respectively.

Apart from above there are other working capital requirements such as Cash and Bank Balance, Other Current assets, other financial liability, short term provisions, current tax liability and other current liabilities. Details of which are given below.

Cash and Bank Balance	Cash and Cash Equivalents include cash in hand and balance in current account. Cash and Cash Equivalents balance is estimated based on amount required for day-to-day Business operation and for expected Business requirement of company.

Short-term provisions	Short-term provisions mainly include provision for gratuity, provision for auditor remuneration, provision for other expense. Short-term provisions are estimated based on previous year's outstanding amount and for expected Business requirement of company.
Other Current Assets	Other Current assets mainly include advance to suppliers, security deposit, retention receivable, prepaid expenses.
Other Current Liabilities	Other current liability majorly includes Statutory dues, Provision for tax and other expenses. Other current liability is estimated based on previous year's outstanding amount and for expected Business requirement of company.

Appraisal Report

None of the objects for which the Offer Proceeds will be utilized, have been appraised by any financial institutions or any

banks or other independent agency.

Bridge Financing

We have not entered into any bridge finance arrangements that will be repaid from the Net Proceeds. However, we may draw down such amounts, as may be required to finance our business until the completion of the Offer. Any amount that is drawn down during this period to finance our business will be repaid from the Net Proceeds.

Interim Use of Funds

Pending utilization of the Offer Proceeds for the Objects of the Offer described above, our Company shall deposit the funds only in Scheduled Commercial Banks included in the Second Schedule of Reserve Bank of India Act, 1934.

In accordance with Section 27 of the Companies Act, 2013, our Company confirms that, pending utilization of the proceeds of the Offer as described above, it shall not use the funds from the Offer Proceeds for any investment in equity and/or real estate products and/or equity linked and/or real estate linked products.

Monitoring Utilization of Funds

In accordance with Regulation 262 of the SEBI ICDR Regulations, our Company has appointed CARE Ratings Limited as the monitoring agency ("**Monitoring Agency**") to monitor the utilization of the Net Proceeds. Our Company undertakes to place the Net Proceeds in a separate bank account which shall be monitored by the Monitoring Agency for utilization of the Net Proceeds.

Our Company undertakes to place the report(s) of the Monitoring Agency on receipt before the Audit Committee without any delay and in accordance with the applicable laws. Our Company will disclose the utilization of the Net Proceeds, including interim use under a separate head in its balance sheet for such financial year/periods as required under the SEBI ICDR Regulations, the SEBI Listing Regulations and any other applicable laws or regulations, specifying the purposes for which the Net Proceeds have been utilized. Our Company will also, in its balance sheet for the applicable financial year, provide details, if any, in relation to all such Net Proceeds that have not been utilized, if any, of such currently unutilized Net Proceeds. Further in compliance with regulation 262(6), since working capital is one of the objects of our issue and the amount raised for the said object exceeds five crore rupees, we shall submit a certificate of the statutory auditor to SME exchange(s) while filing the half yearly/quarterly financial results, for use of funds as working capital in the same format as disclosed in the offer document, till the proceeds raised for the said object are fully utilized. Pursuant to Regulation 32(3) of the SEBI Listing Regulations, our Company shall, on a half yearly basis, disclose to the Audit Committee the uses and applications of the Net Proceeds. On an annual basis, our Company shall prepare a statement of funds utilized for purposes other than those stated in the Prospectus and place it before the Audit Committee and make other disclosures as may be required until such time as the Net Proceeds remain unutilized. Such disclosure shall be made only until such time that all the Net Proceeds have been utilized in full. The statutory auditor of our Company will also provide report/ certificate on the utilization of the Net Proceeds to the monitoring agency.

Furthermore, in accordance with Regulation 32(1) of the SEBI Listing Regulations, our Company shall furnish to the Stock Exchanges on a half yearly, a statement indicating (i) deviations, if any, in the actual utilization of the proceeds of the Fresh Issue from the Objects; and (ii) details of category wise variations in the actual utilization of the proceeds of the Fresh Issue from the objects of the Fresh Issue as stated above. This information will also be published in newspapers simultaneously with the interim or annual financial results and explanation for such variation (if any) will be included in our directors 'report, after placing the same before the Audit Committee.

Variation in Objects

In accordance with Section 13(8) and Section 27 of the Companies Act, 2013 and applicable rules, our Company shall not vary the objects of the Offer without our Company being authorized to do so by the Shareholders by way of a special resolution through postal ballot. In addition, the notice issued to the Shareholders in relation to the passing of such special resolution (the "Postal Ballot Notice") shall specify the prescribed details as required under the Companies Act and applicable rules. The Postal Ballot Notice shall simultaneously be published in the newspapers, one in English and one in the vernacular language of the jurisdiction where the Registered Office is situated. Our Promoters or controlling Shareholders shall provide an exit offer to dissenting Shareholders who do not agree to the proposal to vary the objects, at such price, conditions and in such manner, as may be provided in Schedule XX of SEBI ICDR Regulations.

Other Confirmations

No part of the proceeds of the Offer will be paid by us to the Promoters and Promoter Group, the Directors, Associates, Key Managerial Personnel, Senior Managerial Personnel or Group Companies except in the normal course of business and in compliance with the applicable law.

BASIS FOR THE OFFER PRICE

The Price Band and the Offer Price was determined by our Company, in consultation with the BRLM, on the basis of assessment of market demand for the Equity Shares issued through the Book Building Process and on the basis of quantitative and qualitative factors as described below. The face value of the Equity Shares is ₹ 10 each and the Offer Price is 10.50 times of the face value of the Equity Shares, and the Floor Price is 9.90 times of the face value of the Equity Shares and the Cap Price is 10.50 times of the face value of the Equity Shares. Bidders should also see "*Risk Factors*", "*Our Business*", "*Summary of Restated Financial Information*", "*Restated Financial Information*", and "*Management's Discussion and Analysis of Financial Condition and Results of Operations*" on pages 19, 161, 50, 217 and 251, respectively, to have an informed view before making an investment decision.

Qualitative Factors

We believe that some of the qualitative factors and our strengths which form the basis for the Offer Price are:

- Track record of timely completion of complex projects
- Strong Order Book for existing project portfolio and geography
- Strong Execution Capabilities
- Track Record of Growth in Financial Performance
- Experienced management team with significant industry experience

For details, see "*Business Overview—Our Strengths*" on page 161.

Quantitative Factors

Some of the information presented below relating to our Company is derived from the Restated Financial Information. For further details, see "*Restated Financial Information*" and "*Other Financial Information*" on pages 217 and 250, respectively.

Some of the quantitative factors which may form the basis for computing the Offer Price are as follows:

1. *Basic and diluted earnings per Equity Share ("EPS") of face value of ₹ 10 each, as adjusted for changes in capital:*

Particulars	Basic EPS (in ₹)	Diluted EPS (in ₹)	Weightage
For the financial year ended March 31, 2026	10.29	10.29	3
For the financial year ended March 31, 2025	6.78	6.78	2
For the financial year ended March 31, 2024	4.17	4.17	1
Weighted average for the above three financial years	**8.10**	**8.10**	
Simple Average for the above three financial years	**7.08**	**7.08**	
Six months period ended September 30, 2026*	6.07	6.07	

**Not annualised*

Notes:

i) Weighted average = Aggregate of year-wise weighted average EPS divided by the aggregate of weights i.e. (EPS x Weight) for each year/Total of weights

ii) Simple average = Aggregate of year-wise EPS divided by the number of years included.

iii) Basic Earnings per Equity Share (₹) = Restated profit after tax for the year divided by Weighted average number of equity shares outstanding at the end of the year.

iv) Diluted Earnings per Equity Share (₹) = Restated profit after tax for the year divided by Weighted average number of diluted equity shares outstanding at the end of the year, as adjusted for the effects of all dilutive potential Equity Shares.

v) Basic and diluted earnings per Share calculations are in accordance with the notified Accounting Standard 20 'Earnings per share'.

vi) The figures disclosed above are based on the Restated Financial Information.

vii) Number of equity shares are adjusted by Increase in Capital through issue of 1,25,00,000 Bonus shares on September 20, 2025.

2. *Price Earning ("P/E") ratio in relation to the Price Band of ₹ 99 to ₹ 105 per Equity Share and Offer Price of ₹ 105 per Equity Share of face value of ₹ 10 each*

Particulars	P/E ratio at Floor Price (no. of times)	P/E ratio at Cap Price (no. of times)	P/E ratio at the Offer Price (no. of times)
Based on Basic EPS as per the Restated Financial Information for the financial year ended March 31, 2026	9.62	10.20	10.20
Based on Diluted EPS as per the Restated Financial Information for the financial year ended March 31, 2026	9.62	10.20	10.20

3. *Industry Peer Group P/E ratio*

Based on the peer group information (excluding our Company), details of the highest, lowest and industry average P/E ratio are set forth below:

Particulars	P/E ratio	Name of the Peer Company	Face Value of Equity Shares (₹)
Highest	34.47	Pratham EPC Projects Limited	10.00
Lowest	8.35	Desco Infratech Limited	10.00
Average	21.75		

Source: (i) The industry high and low has been considered from the industry peer set provided later in this chapter. The industry average has been calculated as the arithmetic average P/E of the industry peer set disclosed in this section.
(ii) The industry P/E Ratio has been computed based on the closing market price of equity shares on NSE/BSE on October 09, 2026, divided by the Diluted EPS for the financial year ended March 31, 2026.
(iii) All the financial information for listed industry peers mentioned above is sourced from the audited financial statements of the relevant companies for Financial Year ended March 31, 2026, as available on the websites of the Stock Exchanges.

4. *Return on Net Worth ("RoNW")*

As derived from the Restated Financial Information of our Company:

Particulars	RoNW (%)	Weightage
For the financial year ended March 31, 2026	51.39	3
For the financial year ended March 31, 2025	59.00	2
For the financial year ended March 31, 2024	93.02	1
Weighted average for the above three financial years	**60.86**	
Six months period ended September 30, 2026*	21.52	

**Not annualised*
Notes:
1. Return on Net Worth (RoNW) (%) = Restated Profit after tax for the year divided by the restated average Net Worth at the beginning and end of the year.
2. For the purposes of the above, "net worth" means the aggregate value of the paid-up share capital and all reserves created out of the profits and securities premium account and debit or credit balance of profit and loss account, after deducting the aggregate value of the accumulated losses, deferred expenditure and miscellaneous expenditure not written off, but does not include reserves created out of revaluation of assets, write-back of depreciation and amalgamation each as applicable for the Company on restated basis.
3. The weighted average RoNW is a product of RoNW for Fiscals 2026, 2025 and 2024 and the respective assigned weight, dividing the resultant by total aggregate weight.

5. *Net Asset Value ("NAV") per Equity Share of face value of ₹ 10 each*

As derived from the Restated Financial Information of our Company:

Particulars	NAV (in ₹)
As of period ended September 30, 2026*	31.23
As of financial year ended March 31, 2026	25.17
After Completion of Offer	
• At the Floor Price	45.66
• At the Cap Price	46.94
Offer Price*	46.94

**Not annualised*
Notes:
1. Net asset value per equity share means total equity divided by closing number of equity shares outstanding at the end of the financial year.
2. Number of equity shares are adjusted by Increase in Capital through issue of 1,25,00,000 Bonus shares on September 20, 2025.

Description on the historic use of the KPIs by our Company to analyse, track or monitor the operational and/or financial performance of our Company

In evaluating our business, we consider and use certain KPIs, as presented above, as a supplemental measure to review and assess our financial and operating performance. The presentation of these KPIs is not intended to be considered in isolation or as a substitute for the Restated Financial Summary Statements. Some of these KPIs are not defined under Accounting Standards and are not presented in accordance with Accounting Standards. These KPIs have limitations as analytical tools. Further, these KPIs may differ from the similar information used by other companies, including peer companies, and hence their comparability may be limited. Therefore, these metrics should not be considered in isolation or construed as an alternative to Accounting Standards measures or as an indicator of our operating performance, liquidity, profitability or results of operation. Although these KPIs are not a measure of performance calculated in accordance with applicable accounting standards, our Company's management believes that it provides an additional tool for investors to use in evaluating our operating results and trends and in comparing our financial results with other companies in our industry because it provides consistency and comparability with past financial performance, when taken collectively with financial measures prepared in accordance with Accounting Standards.

For details of our other operating metrics disclosed elsewhere in this Prospectus, see sections titled "*Business Overview*" and "*Management's Discussion and Analysis of Financial Condition and Results of Operations*" starting on pages 161 and 251, respectively. We have described and defined the KPIs, as applicable, in "*Definitions and Abbreviations – Industry related terms/Abbreviations*" on page 1. Bidders are encouraged to review the Accounting Standards financial measures and not to rely on any single financial or operational metric to evaluate our business.

11. Justification for Basis of Offer Price

(a) The following provides an explanation to the Offer Price/ Cap Price being 7.88 times of weighted average cost of acquisition of Equity Shares that were issued by our Company or acquired or sold by our Promoters, the members of our Promoter Group by way of primary and secondary transactions in the last eighteen months preceding the date of this Prospectus compared to our Company's KPIs and financial ratios for the six-months period ended September 30, 2026 and for the Financial Year ended March 31, 2026, 2025 and 2024.

1. The Company has a track record of timely completion of complex projects and has developed execution capabilities across Oil & Gas terminal and station construction and Oil & Gas pipeline projects. As of September 30, 2026, the Company had an unexecuted order book comprising 34 projects amounting to ₹18,327.88 lakhs, providing visibility for future business growth.

2. The Company has demonstrated growth in its financial performance, supported by the expansion and execution of its order book. Revenue from operations increased from ₹5,431.89 lakhs in FY 2023-24 to ₹8,048.03 lakhs in FY 2024-25 and further to ₹11,980.20 lakhs in FY 2025-26, representing a CAGR of approximately 48.51% over FY 2023-24 to FY 2025-26. Profit after tax increased from ₹581.19 lakhs in FY 2023-24 to ₹1,016.77 lakhs in FY 2024-25 and further to ₹1,543.27 lakhs in FY 2025-26.

3. Our PAT Margin on Restated Basis has improved consistently from 10.70% in FY 2023-24 to 12.63% in FY 2024-25 and 12.88% in FY 2025-26, reflecting an improvement in the Company's profitability. Further, PAT increased at a CAGR of approximately 62.95% during FY 2023-24 to FY 2025-26.

4. Our EBITDA Margin on Restated Basis has also improved consistently from 15.96% in FY 2023-24 to 18.70% in FY 2024-25 and 20.04% in FY 2025-26, while EBITDA increased from ₹867.17 lakhs in FY 2023-24 to

₹1,504.88 lakhs in FY 2024-25 and ₹2,401.29 lakhs in FY 2025-26, demonstrating improvement in the Company's operating profitability and execution efficiency.

12. The Offer price is 10.50 times of the face value of the Equity Shares

The Offer Price of ₹ 105 was determined by our Company, in consultation with the Book Running Lead Manager, on the basis of assessment of market demand from investors for Equity Shares through the Book Building Process and is justified in view of the above qualitative and quantitative parameters.

Investors should read the above-mentioned information along with "*Risk Factors*", "*Our Business*", "*Restated Financial Information*" and "*Management's Discussion and Analysis of Financial Condition and Results of Operations*" beginning on pages 19, 161, 217 and 251, respectively, to have a more informed view. The trading price of the Equity Shares could decline due to the factors mentioned in the "*Risk Factors*" on page 19 and you may lose all or part of your investments.

SECTION IV – ABOUT THE COMPANY

INDUSTRY OVERVIEW

Global Economic Overview

The global economy continues to demonstrate resilience despite ongoing geopolitical uncertainties, supply chain disruptions and evolving monetary policy conditions across major economies. According to the International Monetary Fund ("**IMF**"), global economic growth grew at 3.5% in CY2025. The global economy is navigating a period characterized by the interplay of geopolitical uncertainty and accelerating technological transformation. While ongoing geopolitical tensions continue to create challenges for global trade, energy markets, and supply chains, rapid advancements in artificial intelligence (AI), automation, cloud computing, advanced manufacturing, and digital infrastructure are supporting productivity gains and investment activity across major economies.

Despite the economic disruptions arising from regional conflicts, the impact on global growth has thus far been more contained than initially anticipated. Inflation expectations, financial conditions, and commodity markets have remained relatively resilient, allowing economic activity to continue expanding. Looking ahead, technological innovation, digitalization, and evolving supply-chain strategies are expected to remain key structural drivers shaping medium-term global growth prospects.

Regional GDP Growth

The chart highlights significant divergence in economic growth trajectories across major regions during CY2022-CY2028P. While Emerging & Developing Asia continues to lead global growth, regions such as the Middle East & Central Asia exhibit higher volatility due to geopolitical and commodity-related factors. Meanwhile, North America, Latin America, and Sub-Saharan Africa are expected to display relatively stable growth patterns over the forecast period.

Note: Data till CY2027 are sourced from the IMF's July 2026 World Economic Outlook (WEO) Update. The CY2028 data are sourced from the IMF World Economic Outlook Database.

North America- Stable and Mature Growth Profile:

North America is expected to maintain a steady growth trajectory, with GDP growth moderating from 2.5% in CY2022 to around 2.1-2.3% during CY2024-CY2028 P. The region benefits from resilient consumer spending, strong labor markets, and ongoing investments in technology and digital infrastructure. Although growth is lower than emerging markets, the consistency reflects the maturity and resilience of its economic structure.

Latin America & Caribbean- Gradual Stabilization:

Growth in Latin America & the Caribbean is projected to normalize after a strong 4.2% expansion in CY2022, settling between 2.4% and 2.9% through CY2028P. The moderation reflects tighter monetary conditions and slower global demand; however, improving domestic consumption, easing inflationary pressures, and commodity sector support are expected to sustain moderate economic expansion across the region.

Middle East & Central Asia- Sharp Volatility Followed by Recovery:

The Middle East & Central Asia region displays the most pronounced fluctuations among all regions. Growth rises from 2.4% in CY2023 to 3.7% in CY2025, before plunging to 0.7% in CY2026F, reflecting geopolitical disruptions, energy market uncertainty, and trade route constraints. A strong rebound is expected thereafter, with growth surging to 6.5% in CY2027 before normalizing to 4.0% in CY2028P, supported by recovery in energy production, infrastructure investments, and normalization of regional trade.

Emerging & Developing Asia- Global Growth Engine

Emerging & Developing Asia continues to outperform all major regions, maintaining growth above 4.5% throughout the period. After peaking at 6.1% in CY2023, growth is projected to stabilize between 4.8% and 5.6% during CY2024-CY2028P. Strong domestic demand, expanding manufacturing capabilities, infrastructure investments, digital transformation initiatives, and favorable demographics continue to position the region as the primary contributor to global economic growth. India and Southeast Asian economies are expected to remain key growth drivers.

Sub-Saharan Africa-Consistent Growth Momentum:

Sub-Saharan Africa demonstrates a relatively stable growth outlook, improving from 3.6% in CY2023 to around 4.3-4.5% during CY2026-CY2028P. Economic activity is supported by urbanization, demographic growth, infrastructure development, and recovery in commodity-related sectors. Despite external risks and fiscal challenges in certain economies, the region is expected to maintain steady medium-term growth momentum.

Emerging & Developing Europe- Recovery After Sharp Slowdown:

Emerging & Developing Europe experienced a significant slowdown from 3.8% in CY2023 to just 0.5% in CY2022, reflecting the lingering impact of geopolitical tensions and energy market disruptions. Growth subsequently recovered to 3.6% in CY2023, before moderating and stabilizing around 2.0-2.3% during CY2025-CY2028P. Continued geopolitical uncertainty and energy dependency are expected to constrain growth, although improved trade activity and fiscal support measures provide some stabilization.

Trade and Commodity Market Trends

Commodity markets continue to operate in a high-price environment. Energy prices remain significantly above pre-conflict levels, with the IMF projecting average crude oil prices of approximately US 89 per barrel in CY2026, representing a year-on-year increase of around 32%, while natural gas prices are forecast to rise by roughly 22%. Elevated energy costs are also expected to push fertilizer prices up by approximately 26% and food prices by about 8%, reflecting higher transportation and production costs.

Global trade activity is expected to moderate in the near term, with world trade volume growth projected to decline from 5.0% in CY2025 to 3.5% in CY2026, before recovering to 4.3% in CY2027 as supply-chain conditions improve and demand stabilizes.

Global Economic Outlook

According to the IMF, global GDP growth is projected at 3.0% in CY2026 and 3.4% in CY2027, compared with an average growth rate of approximately 3.5% during CY2024-CY2025. Growth in advanced economies is projected at 1.7% in 2026 and 1.8% in 2027, with the overall impact of the Middle East conflict remaining relatively contained compared with emerging market and developing economies. Net energy exporters are partly cushioned by favorable terms-of-trade effects, while net energy importers face greater pressure from higher energy prices. In the United States, growth is projected at 2.3% in 2026 and 2.2% in 2027, supported by fiscal policy, accommodative financial conditions, continued technology-related investment and productivity strength. The impact of the Middle East conflict is expected to remain limited given the United States' position as a net energy exporter. In the euro area, growth is projected at 0.9% in 2026 and 1.2% in 2027, with higher energy prices, weak consumer confidence and soft underlying momentum weighing on activity.

In emerging market and developing economies, growth is projected to slow to 3.8% in 2026 before recovering to 4.5% in 2027. The outlook varies across economies, reflecting differences in commodity dependence, geographic exposure, remittances and tourism receipts, sensitivity to financial conditions, and positioning within the global technology value chain. China's growth is projected at 4.6% in 2026, as higher global oil prices, prolonged uncertainty and structural headwinds are expected to weigh on activity. India remains among the fastest-growing major economies, with growth projected at 6.4% in 2026, supported by strong momentum in private consumption and services activity. Malaysia's economy is projected to grow by 4.7% in 2026, benefiting from data center activity and an upturn in the global technology cycle. Thailand's growth forecast has been revised upward by 0.4 percentage point to 1.9%, supported by emergency fiscal measures, robust technology-related exports and investment. Vietnam's 2026 growth projection has also been revised upward by 0.4 percentage point to 7.5%, driven by stronger-than-expected technology exports and robust domestic demand. By contrast, small island developing states are expected to experience slower growth due to higher energy costs, weaker tourism and lower remittance inflows.

In the Middle East and Central Asia, growth is projected to drop sharply to 0.7% in 2026 before rebounding to 6.5% in 2027, representing a downward revision of 1.2 percentage points for 2026 and an upward revision of 1.9 percentage points for 2027. The outlook reflects a longer closure of the Strait of Hormuz than previously assumed and the resulting larger rebound. Iraq, Kuwait and Qatar, among the commodity producers most affected by disruptions to energy output and transportation, are projected to experience sharp economic contractions in 2026, followed by double-digit expansions in 2027. Saudi Arabia is expected to be relatively less affected due to its more diversified export routes, with growth projected at 1.7% in 2026 and 5.5% in 2027. Iran's 2026 growth forecast has been revised upward by 0.7 percentage point to –5.4%, reflecting stronger-than-expected oil exports and some relaxation of export restrictions, while its 2027 forecast has been revised downward by 0.3 percentage point. Commodity importers in the Middle East and North Africa are expected to remain relatively resilient despite higher energy and food prices, while economies in the Caucasus and Central Asia continue to benefit from favorable economic conditions and growth prospects.

In Emerging and Developing Europe, growth is expected to remain restrained at around 2.0%, reflecting subdued economic activity and continued geopolitical and energy-related pressures. Russia's growth is projected at 1.1%, with stronger export revenues, partly driven by higher commodity prices, providing some support to the economy. However, the outlook remains challenging for energy-intensive economies and countries dependent on fossil fuel imports, as higher energy prices continue to weigh on economic activity. These pressures are partly offset by the positive impact of increased defense spending, which is supporting economic activity across parts of the region.

Key factors impacting Global Macroeconomic landscape

Geopolitical tensions remain one of the most significant sources of macroeconomic uncertainty. Ongoing conflicts continue to influence commodity prices, transportation networks, and trade flows, contributing to elevated energy costs and inflationary pressures. While baseline projections assume a gradual normalization of global energy and logistics conditions, further disruptions remain a key downside risk.

Trade fragmentation and supply-chain diversification are becoming increasingly important. Higher tariffs, geopolitical tensions and policy uncertainty are encouraging companies to diversify sourcing, regionalize production networks and strengthen supply-chain resilience. The resulting shift toward nearshoring, friend-shoring and multi-sourcing is increasing the strategic importance of supply-chain redundancy, even where this involves higher operating costs.

In Global Trade and Commodity Markets, Commodity prices remain elevated, with energy prices around 25% above pre-war levels. The IMF projects the average petroleum spot price index at USD 89 per barrel in 2026 and natural gas prices at USD 15, corresponding to increases of 32% for crude oil and 22% for natural gas compared with 2025. Fertilizer prices are projected to rise by 26%, while food prices are expected to increase by 8%, reflecting higher energy, fertilizer and transportation costs. World trade volume growth is projected to slow from 5.0% in 2025 to 3.5% in 2026, before recovering

to 4.3% in 2027.

Technology adoption and sustainability are becoming core strategic priorities. Rapid advances in artificial intelligence, cloud computing, automation, data centres and digital infrastructure are supporting technology-related investment and productivity growth. At the same time, rising electricity demand from digital infrastructure is increasing the importance of energy efficiency, advanced cooling systems, grid reliability and renewable-energy integration. The IMF identifies continued technology-related business investment and productivity strength as an important support to US growth, while the IEA highlights the growing role of rare-earth-dependent technologies such as AI data centres, electric vehicles, wind turbines and advanced industrial equipment.

Critical-mineral supply concentration is becoming a strategic economic risk. Rare-earth supply chains remain highly concentrated, particularly for magnet rare earths used in electric vehicles, wind turbines, industrial motors, AI data centres and defence applications. According to the IEA's latest 2026 assessment, China continues to dominate the global rare earth supply chain, accounting for around 60% of global mined production of magnet rare earths, more than 90% of refined output, and almost 95% of permanent magnet production.

India Macroeconomic Analysis

Against the backdrop of a moderating global growth environment, India continues to be one of the fastest-growing major economies globally. Supported by strong domestic demand, increasing investments, rising consumption expenditure and sustained policy reforms, the Indian economy has demonstrated robust growth momentum relative to most large economies. According to the IMF, India's GDP is projected to grow at 6.4% in CY2026 and 6.7% in CY2027, significantly higher than several advanced and emerging economies.

The data presented till CY 2027P are taken from the IMF's July 2026 World Economic Outlook (WEO) and the CY2028 data are sourced from the IMF World Economic Outlook Database.

Growth across major economies is expected to remain mixed. The United States is projected to grow by 2.3% in CY 2026 and 2.2% in CY 2027, while China is expected to expand by 4.6% in CY 2026 and 4.1% in CY 2027. Among other major economies, Germany is projected to grow by 0.7% in CY 2026 and 1.0% in CY 2027, while Japan is expected to expand by 0.6% and 0.7%, respectively. The United Kingdom is projected to grow by 1.0% in CY 2026 and 1.3% in CY 2027, while Russia is forecast to grow by 1.1% in both years. Against this backdrop, India continues to stand out as one of the fastest-growing major economies globally. The IMF projects India's growth at 7.7% in CY 2025, 6.4% in CY 2026, 6.7% in CY 2027 and 6.5% in CY 2028.

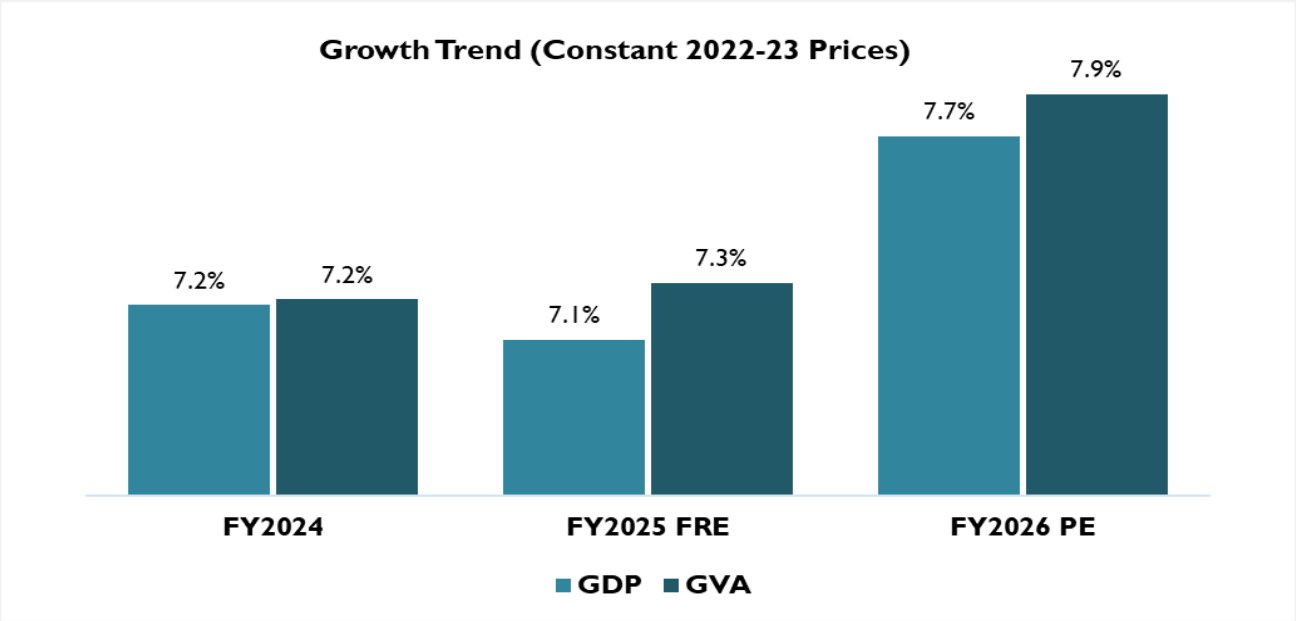

India's growth trajectory is underpinned by a broad-based expansion across key sectors of the economy. The country's large domestic market, favourable demographics, increasing urbanization, growing middle-income population and expanding industrial base continue to support economic activity. In addition, structural reforms, infrastructure development initiatives and efforts to strengthen domestic manufacturing capabilities have contributed to enhancing India's long-term growth potential.

Historical GDP and GVA Growth trend

As per MOSPI's Provisional Estimates, India Real GDP (GDP at constant prices) for FY 2026 is estimated to reach INR 323.12 lakh crore, compared to the First Revised Estimate (FRE) of INR 299.89 lakh crore for FY 2025. This represents a growth rate of 7.7% in 2026, higher than the 7.1% growth recorded in 2025.

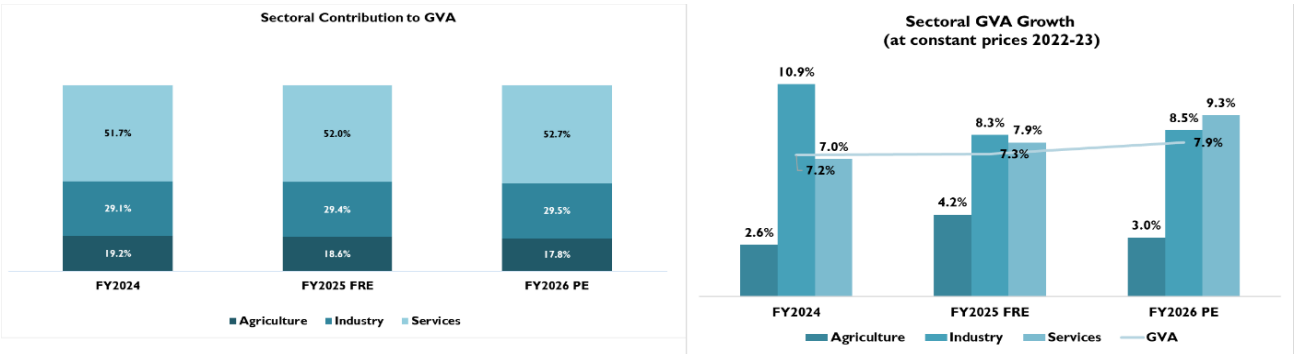

Similarly, Real GVA for FY 2026 is estimated to reach INR 294.91 lakh crore, up from INR 273.36 lakh crore in FY 2025.

This indicates a growth rate of 7.9%, compared with the 7.3% growth achieved in the previous year.

Sectoral analysis of GVA reveals that the industrial sector experienced steady growth momentum in FY 2026, recording a 7.9% y-o-y growth against 7.3% year-on-year growth in FY 2025. Within the industrial sector, growth moderated across sub-sectors with mining, and construction activities growing by 5.15%, and 7.36%, respectively in FY 2026, compared to 11.69%, and 7.30% in FY 2025. Growth in the utilities sector too moderated to 1.74% in FY 2026 from 2.87% in the previous year. The industrial sector's contribution to GVA increased marginally from 29.4% in FY 2025 to 29.5% in FY 2026.

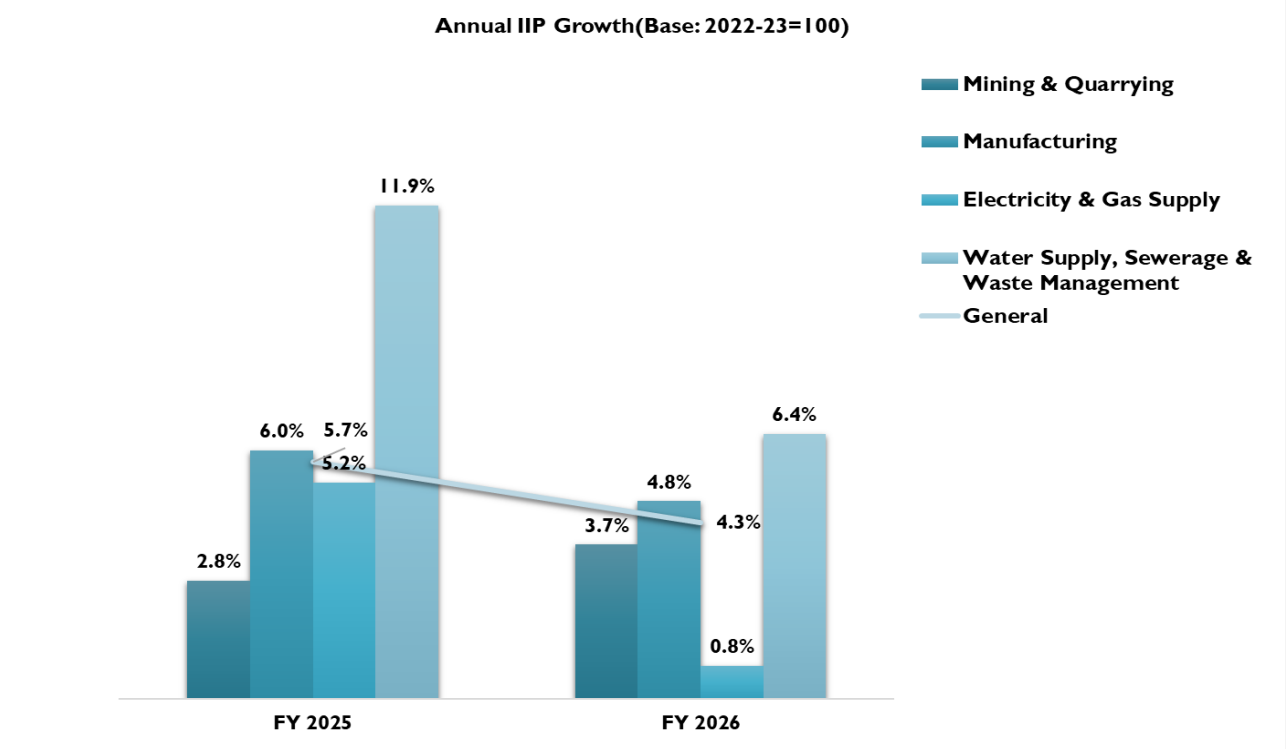

The services sector continued to be the main driver of economic growth. It expanded by 9.3% in FY 2026 from 7.9% in FY 2025. The services sector retained its position as the largest contributor to GVA, rising from 51.7% in FY 2024 to 52.0% in FY 2025, with a further increase to 52.7% in FY 2026.

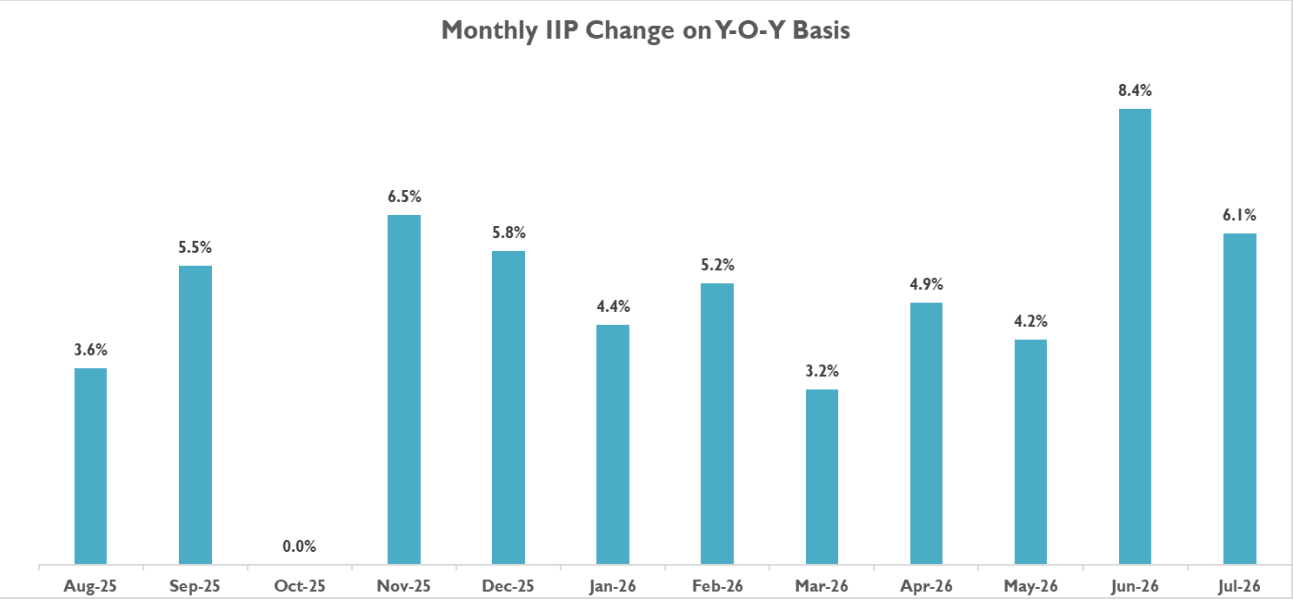

The agriculture sector saw an acceleration in growth, increasing from 2.66% in FY 2024 to 4.18% in FY 2025, before moderating to 3.0% in FY 2026. However, its contribution to GVA declined marginally from 19.2% in FY 2024 to 17.8% in FY 2026. Overall, Gross Value Added (GVA) growth rose to 7.9% in FY 2026 from 7.3% in FY 2025.

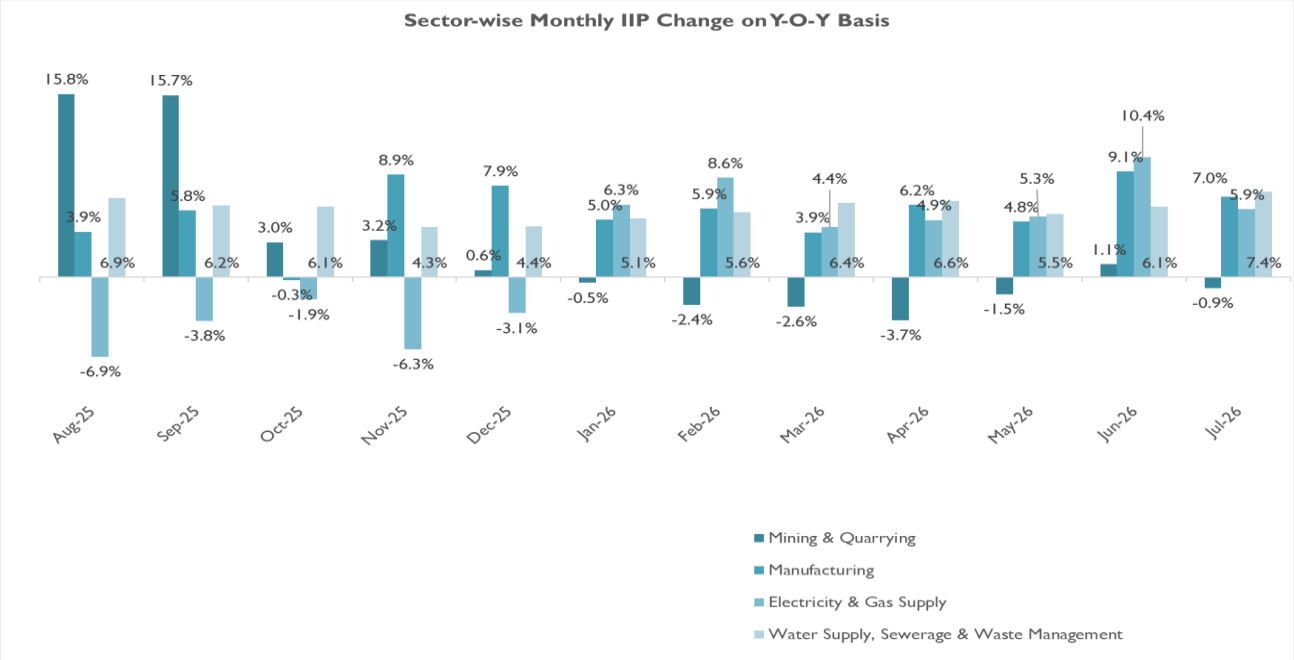

Annual & Monthly IIP Growth

Industrial sector performance, as measured by the IIP, moderated in FY 2026, recording 4.3% y-o-y growth compared with 5.2% in FY 2025. The manufacturing sector grew by 4.8% in FY 2026, compared with 6.0% in FY 2025. The Electricity

& Gas Supply sector recorded growth of 0.8%, compared with 5.7% in the previous year. Water Supply, Sewerage & Waste Management grew by 6.4% in FY 2026, compared with 11.9% in FY 2025. In contrast, Mining & Quarrying growth improved to 3.7% in FY 2026 from 2.8% in FY 2025.

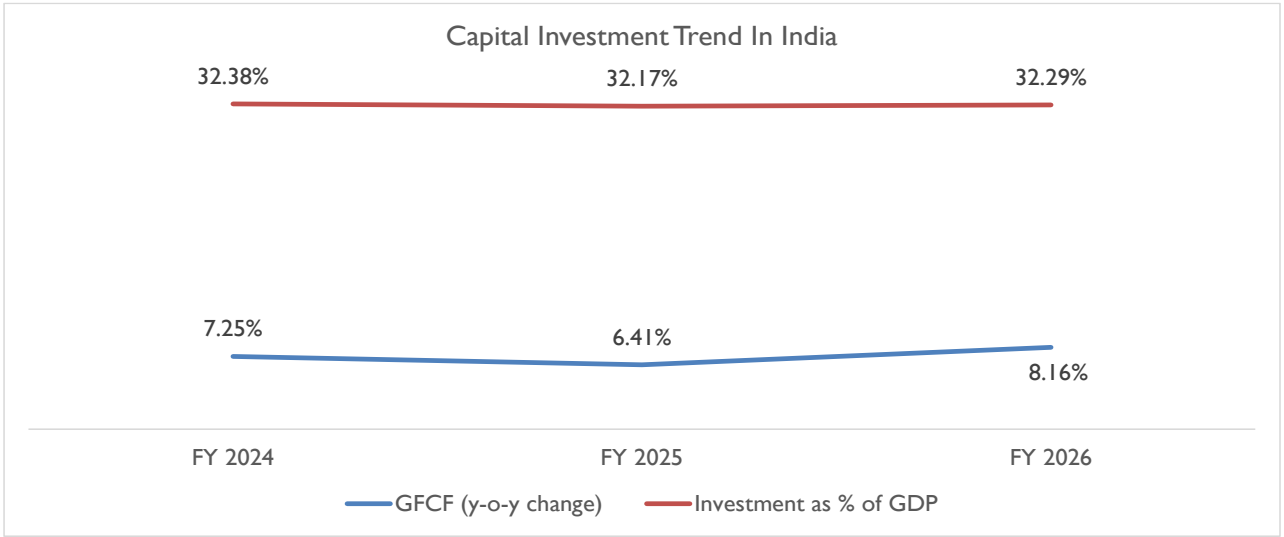

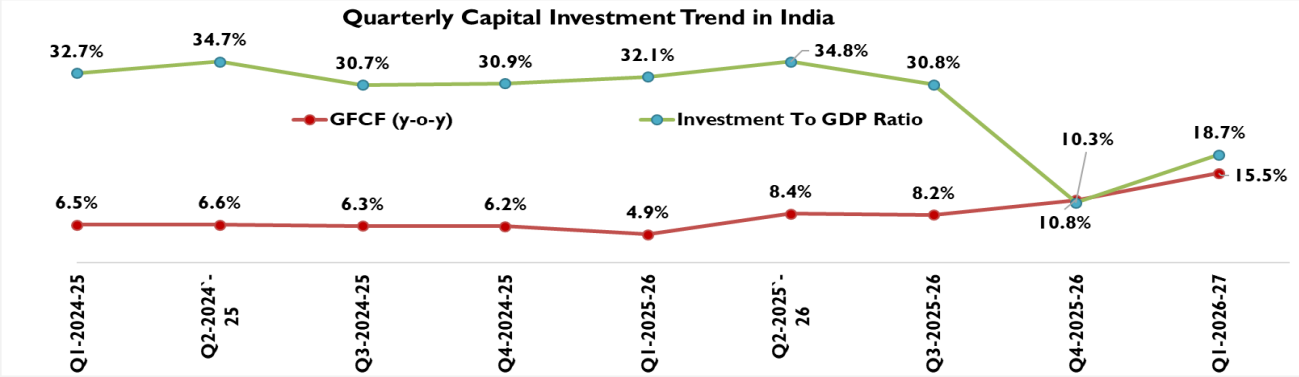

Source: Ministry of Statistics & Programme Implementation (MOSPI)

In the latest month shown, July 2026, IIP growth stood at 6.1% y-o-y, compared with 4.2% in May and 8.4% in June 2026. Sector-wise, Mining & Quarrying declined by 0.9%, while Manufacturing grew by 7.0%, Electricity & Gas Supply by 5.9%, and Water Supply, Sewerage & Waste Management by 7.4% in July 2026.

Annual and Quarterly: Investment & Consumption Scenario

Other major indicators, such as Gross Fixed Capital Formation (GFCF), a measure of investment, increased during FY 2026, registering 8.16% year-on-year growth compared with 6.41% in FY 2025, bringing the GFCF-to-GDP ratio to 32.29%.

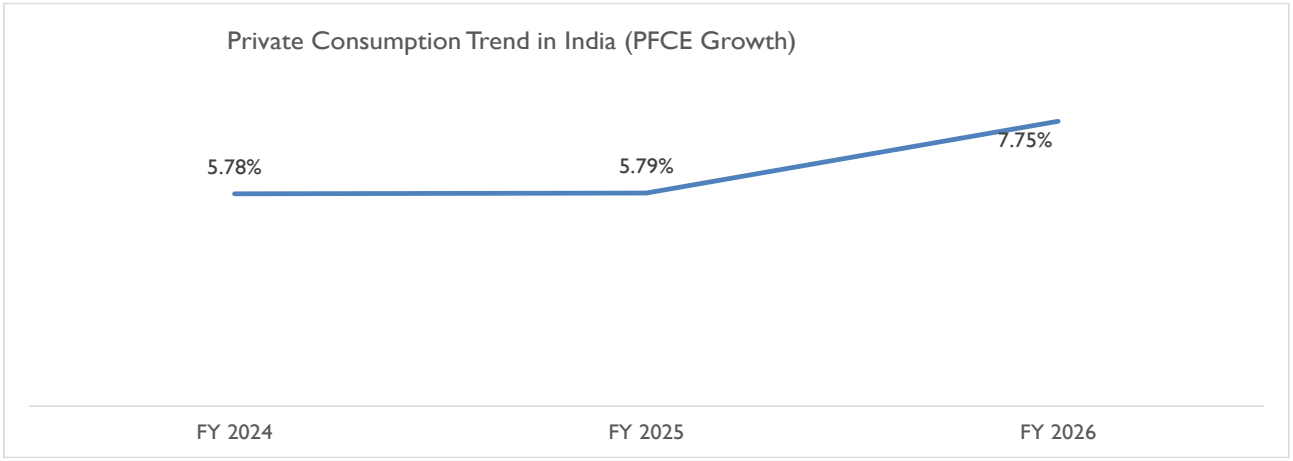

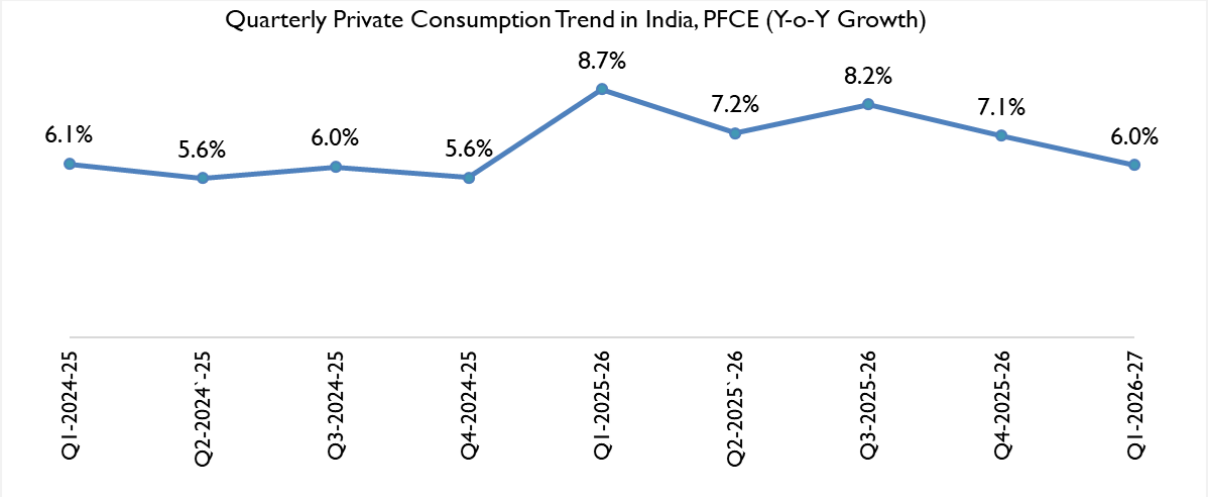

Source: Ministry of Statistics & Programme Implementation (MOSPI). CMIE Economics Outlook

India's capital investment activity remained broadly resilient during the period under review, with the Investment-to-GDP ratio consistently remaining above 30% across most quarters. After peaking at 34.8% in Q2 FY 2025-26, the ratio moderated sharply to 10.3% in Q4 FY 2025-26, before recovering to 18.7% in Q1 FY 2026-27, indicating a temporary slowdown followed by an improvement in investment activity. The overall trend reflects continued emphasis on capital formation and infrastructure development as key drivers of economic growth.

Meanwhile, Gross Fixed Capital Formation (GFCF) growth exhibited a strong upward trajectory after a brief moderation in early FY 2025-26. GFCF growth increased from 4.9% in Q1 FY 2025-26 to 10.8% in Q4 FY 2025-26, further accelerating to 15.5% in Q1 FY 2026-27, the highest level during the period. The sustained improvement in GFCF growth highlights strengthening fixed asset creation, supported by higher public and private sector investments, reinforcing a positive outlook for India's infrastructure and industrial development landscape.

Private Consumption Scenario

Sources: MOSPI

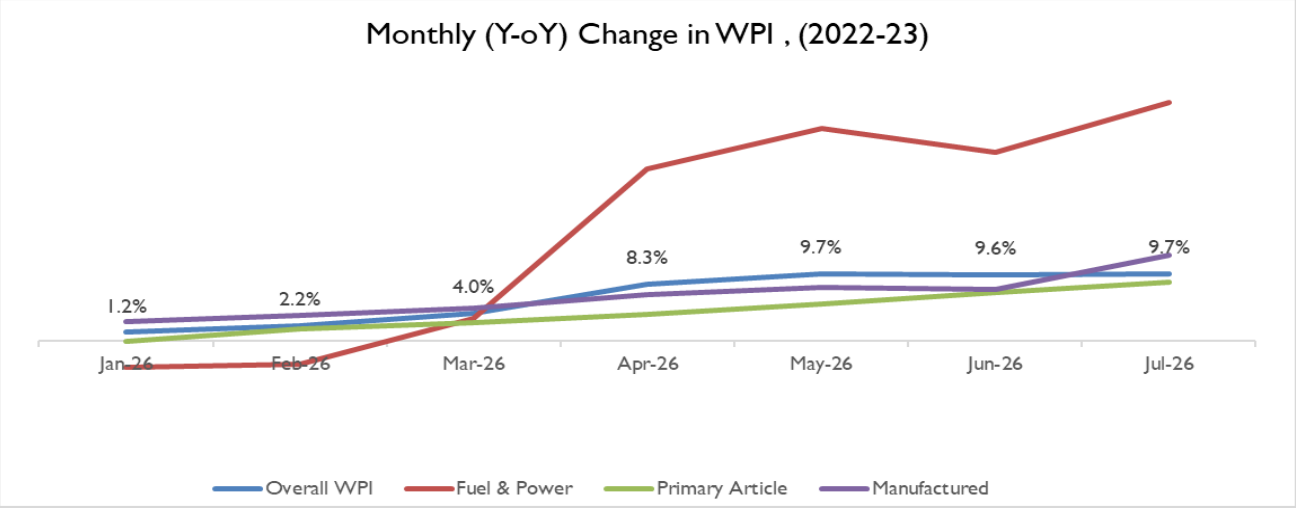

Private Final Consumption Expenditure (PFCE), a key indicator of household consumption and domestic demand, maintained healthy year-on-year growth throughout the period, although momentum moderated in the latest quarter. PFCE growth stood at 6.1% in Q1 FY 2024-25, before moderating slightly to 5.6% in Q2, rising to 6.0% in Q3 and easing again to 5.6% in Q4. In FY 2025-26, consumption growth strengthened significantly to 8.7% in Q1, before moderating to 7.2% in Q2 and recovering to 8.2% in Q3. Growth then eased to 7.1% in Q4 FY 2025-26 and further moderated to 6.0% in Q1 FY 2026-27.

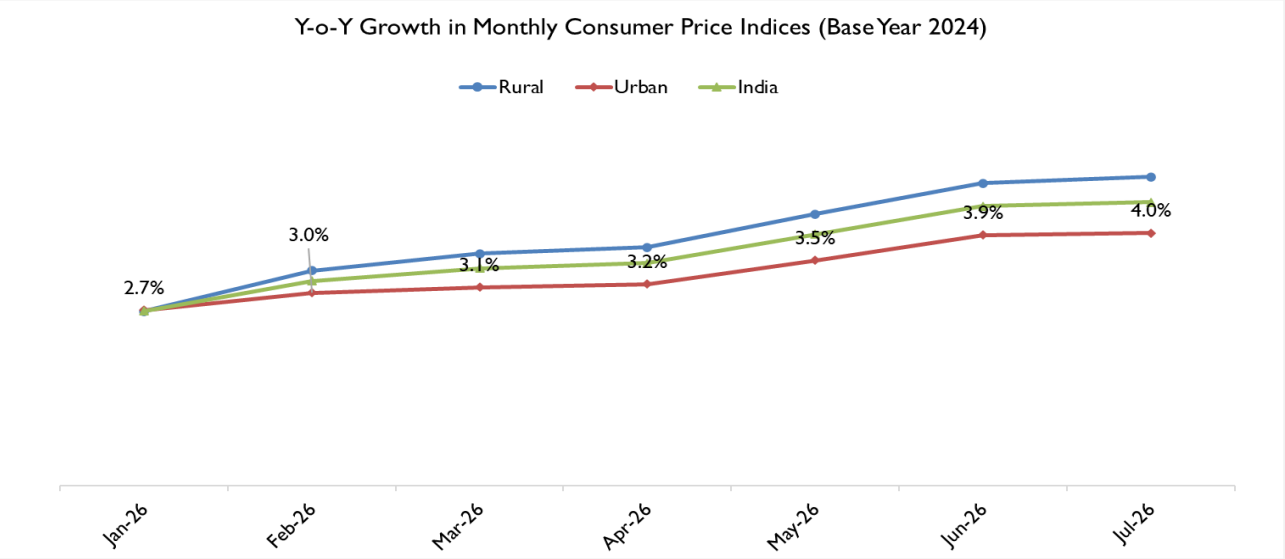

Overall, the data indicates that private consumption remained a key driver of domestic economic activity, with PFCE growth consistently above 5% and recording particularly strong momentum during FY 2025-26. However, the moderation to 6.0% in Q1 FY 2026-27 suggests some easing in household consumption momentum compared with the stronger growth recorded during the preceding quarters.

Inflation Scenario

All India Wholesale Price Index (WPI) inflation for July 2026 is 9.7 per cent on a year-on-year (YoY) basis, compared to 9.6 per cent in June 2026. The index for All Commodities for July 2026 stands at 109.7, whereas it was 109.6 in June 2026. Across Groups, 'Mineral Oils (containing Petroleum Products)', 'Crude Petroleum and Natural Gas', 'Manufacture of Chemicals and Chemical Products', and 'Manufacture of Basic Metals' continued to be major drivers of WPI inflation in June and July 2026.

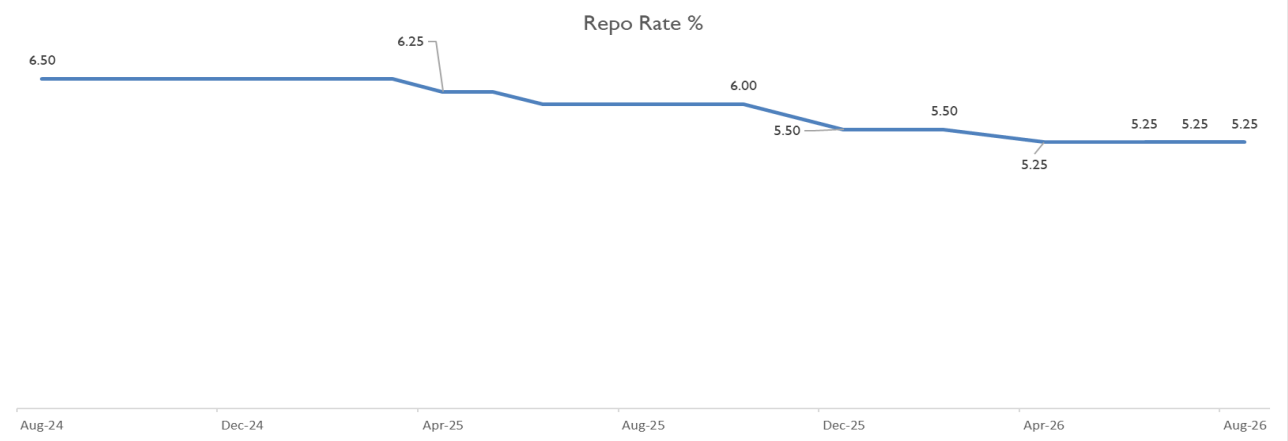

Across the regions, YoY inflation for Rural, Urban, and India stood at 1.03 per cent, 0.71 per cent, and 0.94 per cent, respectively, in July 2026, compared with 7.24 per cent, 6.69 per cent, and 7.00 per cent, respectively, in June 2026. The indices for Rural, Urban, and India were 108.34, 107.45, and 107.94, respectively, in July 2026, compared with 107.24, 106.69, and 107.00, respectively, in June 2026.

With effect from January 2026, the National Statistics Office (NSO) introduced a revised Consumer Price Index (CPI) series with base year 2024=100, incorporating revised item weights based on the Household Consumption Expenditure Survey (HCES) 2023-24. Under the revised series, All India CPI inflation increased gradually from 2.7% in January 2026 to 4.0% in July 2026. Inflation rose from 3.0% in February to 3.1% in March and 3.2% in April, before accelerating to 3.5% in May, 3.9% in June and 4.0% in July. The trend indicates a steady pick-up in retail inflation during the first half of 2026, following relatively subdued price pressures at the beginning of the year. Rural inflation remained higher than urban inflation during the period, with the gap widening toward the latest months, indicating relatively stronger price pressures in rural areas.

On the monetary policy front, the RBI had cumulatively raised the repo rate by 250 basis points between May 2022 and February 2023, bringing it to 6.50%, where it was maintained through January 2025 to anchor inflationary expectations. With inflationary pressures moderating and the need to support economic activity, the RBI's Monetary Policy Committee (MPC) initiated an easing cycle in February 2025, delivering a cumulative 125 basis points of rate cuts through four reductions — 25 basis points each in February and April 2025, 50 basis points in June 2025, and 25 basis points in December 2025. The MPC subsequently maintained the repo rate at 5.25% through August 2026, reflecting a balanced approach between supporting growth and maintaining price stability. The policy repo rate currently stands at 5.25% as of August 2026.

Growth Outlook

The Union Budget 2026–27 sets out a quantitatively strong push to build resilient supply chains and develop next-generation industrial capacity. The INR 12.2 lakh crore public capital expenditure outlay is aimed at strengthening infrastructure, connectivity and economic competitiveness. The Budget proposes seven high-speed rail corridors, a new Dedicated Freight Corridor connecting Dankuni to Surat, and the operationalisation of 20 new National Waterways over

the next five years. Employment and economic activity are also expected to be supported through infrastructure development, with a focus on Tier-2 and Tier-3 cities through the proposed City Economic Regions.

Employment measures extend across both urban and rural India in one sweep. In cities and large towns, capital expenditure is channelled into growth connectors such as the seven proposed high-speed rail corridors and improved infrastructure in Tier-2 and Tier-3 cities, supporting construction, logistics and related economic activity. In smaller towns and villages, employment generation is expected to be supported through initiatives covering textiles, khadi, handloom and handicrafts, as well as tourism-linked skilling. The Budget also proposes Samarth 2.0 to strengthen the textile skilling ecosystem and build employment-oriented capabilities.

This domestic push is complemented by targeted measures to strengthen strategic supply chains. Dedicated Rare Earth Corridors in Odisha, Kerala, Andhra Pradesh and Tamil Nadu; customs-duty exemptions for capital goods required for processing critical minerals and manufacturing lithium-ion cells for batteries; and India Semiconductor Mission 2.0 aim to deepen domestic capabilities in critical minerals, advanced materials, semiconductor equipment and electronics. The Government has also increased the proposed outlay for the Electronics Components Manufacturing Scheme to INR 40,000 crore. These measures are intended to strengthen domestic manufacturing capabilities, develop strategic industrial ecosystems and reduce import dependence in critical supply chains.

Alongside these domestic measures, India is also seeking to strengthen its external trade architecture through major trade agreements. The conclusion of the India–EU FTA negotiations in January 2026 marks a major strategic milestone, providing preferential access across 97% of EU tariff lines covering 99.5% of trade value. Around 90.7% of India's exports are covered by immediate duty elimination, particularly benefiting labour-intensive sectors such as textiles, leather and footwear, tea, coffee, spices, sports goods, toys, gems and jewellery and selected marine products. The agreement remains subject to the necessary subsequent processes before implementation and is therefore not yet an operational FTA.

In a similar vein, the India–Oman Comprehensive Economic Partnership Agreement (CEPA) has moved from negotiation to implementation, having entered into force on 1 June 2026. Bilateral trade between India and Oman reached USD 11.18 billion in FY 2025–26, compared with USD 10.61 billion in FY 2024–25. Under the CEPA, Oman provides duty-free access covering 98.08% of its tariff lines and 99.38% of India's exports by value, strengthening market access for Indian products across engineering goods, pharmaceuticals, agriculture and processed food, electronics, textiles, plastics, gems and jewellery and other sectors.

At the same time, India has adopted a calibrated liberalisation approach by offering tariff liberalisation on 77.79% of its tariff lines, covering 94.81% of imports from Oman by value, while retaining exclusions and safeguards for sensitive domestic sectors. The agreement also provides gains in services, with Oman undertaking commitments across 127 services subsectors and improving provisions for professional mobility. The ceiling for Intra-Corporate Transferees has been increased from 20% to 50%, supporting greater deployment of managerial and specialist personnel by Indian companies.

However, these gains remain exposed to external geopolitical risks. The escalation of the West Asia crisis represents an external shock for India, transmitted primarily through energy markets, logistics and trade-linked business exposure. Heightened security concerns around the Strait of Hormuz have resulted in vessel diversions, longer sailing routes, congestion at transshipment hubs and higher freight, insurance and war-risk costs, creating operational uncertainty for export consignments moving to or through the region.

The early trade response following implementation has also been positive. The number of tariff lines exported to Oman increased from 2,879 in May 2026 to 3,371 in June 2026, while exports across these tariff lines increased to USD 622.8 million in June 2026 from USD 402.7 million in May 2026. These developments indicate an initial expansion in export diversification and utilisation of the preferential market-access framework, although the longer-term impact of the CEPA will depend on sustained exporter participation and trade flows.

At the same time, perishable agricultural exporters and other import- and export-dependent businesses remain exposed to shipping delays and logistics disruptions. Diversions and longer sailing routes can increase transit times and logistics costs, while disruptions to maritime trade can create working-capital and delivery pressures for exporters. For import-dependent industries, delays in critical inputs can increase the risk of production disruptions, while sustained increases in freight, insurance and energy-related costs can place pressure on manufacturing and services margins. The Government's response, including RELIEF and measures to facilitate alternate routing and cargo movement, is intended to mitigate these extraordinary logistics and insurance pressures.

Overview Of EPC Industry

Construction sector is one of the major segments that drives an economy. Growth in the number of construction projects creates the demand for a myriad range of products and services. These include project management services, EPC/EPCM services and architecture consulting services, to name a few.

Engineering, Procurement, and Construction (EPC)

EPC is a prominent form of contracting agreement in the construction industry. Companies that deliver EPC Projects are commonly referred to as EPC Contractors. Today, EPC contracting is the most sought method of executing projects globally. EPC is a contract under which the project is executed under a single point responsibility of a contractor. EPC contracts are pivotal agreements in the construction industry, designed to streamline project execution by transferring substantial project risks from the owner to the contractor. These contracts encompass the full scope of project responsibilities, including design, procurement, and construction, ensuring a single point of accountability for the project's completion. The primary appeal of EPC contracts lies in their ability to provide cost certainty, making them particularly attractive to developers who lack the financial or technical resources to manage unexpected expenses and project intricacies. By transferring risks associated with workplace accidents, labour and material shortages, and critical schedule milestones, developers can mitigate potential disruptions and focus on other strategic priorities.

One of the significant advantages of EPC contracts is the reduced level of engagement required from developers. This hands-off approach allows developers to save on time, labour, and resources, relying on the contractor to meet project deadlines and specifications. Establishing clear design and construction standards before entering an EPC contract can further enhance project outcomes by ensuring consistency and quality while minimizing the need for developer intervention. However, the transfer of all project risks to the contractor can come at a premium cost. Contractors must account for all known and unknown contingencies, which can significantly inflate the contract price. To strike a balance, developers may negotiate shared responsibilities for unforeseen circumstances, such as fluctuating material costs, thereby achieving better financial terms and fostering a more cooperative relationship with the contractor.

Third-party reviews of EPC designs are highly recommended for developers lacking in-house expertise or bandwidth. Engaging an independent engineering firm to assess the contractor's designs can safeguard the developer's interests and ensure that the final project aligns with the specified requirements. These reviews are particularly crucial when millions of dollars are at stake, offering an additional layer of oversight and assurance. It is important to note that EPC contracts can alter the dynamics between developers and contractors. The contractual focus on financial transactions and risk management can strain relationships, particularly if there were pre-existing collaborative ties. Developers must be mindful of this potential shift and consider limiting the use of EPC contracts to specific project types where the benefits outweigh the relational costs. In addition to traditional EPC contracts, developers might explore alternative models such as Cost-Plus contracts and Hybrid EPC contracts. Cost-Plus contracts allow developers to maintain greater involvement and oversight, reimbursing contractors for project costs plus a percentage for overhead and profit. Hybrid EPC contracts offer a blend of flexibility and fixed pricing, with the initial stages of the project managed on a time-and-material basis before transitioning to a fixed-price arrangement.

TYPES OF EPC CONTRACTS

Lump Sum EPC Contract: In this model, the contractor commits to completing the project for a fixed price. This contract type is typically employed for projects with well-defined scopes and timelines, facilitating straightforward cost and budget management. For instance, a residential complex construction project might use a lump sum contract to ensure cost certainty for the developer.

Unit Price EPC Contract: This arrangement involves pricing based on the actual units of work completed. It is particularly suited for projects where the scope is uncertain, offering flexibility in pricing and resource allocation. Road construction projects are a common example of unit price contracts, as the quantity of materials required can vary depending on site conditions.

Cost-Plus EPC Contract: Under this contract, the contractor is reimbursed for actual costs incurred plus an agreed-upon fee. This model is advantageous for projects with undefined requirements, providing a safety net for contractors. It is especially useful in research and development projects where project specifications may evolve over time.

Design and Build EPC Contract: In this model, the contractor oversees both the design and construction phases of the project. This integrated approach can expedite project completion and enhance coordination between design and construction. Large-scale infrastructure projects, such as airports, often utilize this contract type to ensure seamless integration and timely delivery.

Turnkey EPC Contract: This comprehensive contract requires the contractor to deliver a fully operational facility to the client upon project completion. Common in sectors such as energy and water supply, the turnkey model ensures that the end product meets specific operational standards from the outset, providing a complete solution to the client.

Additional Types with EPC

Engineering, Procurement, and Construction Management (EPCM): In an EPCM contract, the contractor provides oversight and management services instead of performing the construction work directly. This model grants the client greater control over the project, as the contractor coordinates with various subcontractors and manages the overall execution of the project. This approach is often favoured when clients wish to retain significant involvement in the project's execution while relying on the contractor for management expertise.

Engineering, Procurement, Construction, and Installation (EPCI): EPCI contracts are typically employed in offshore construction projects and cover the full spectrum of design, procurement, construction, transportation, and installation. In this model, the contractor assumes substantial risk regarding timely completion and cost management. This comprehensive contract ensures that all aspects of the project, from initial design to final installation, are integrated and managed by the contractor.

Engineering, Procurement, Construction and Commissioning (EPCC): EPCC contracts include an additional phase of commissioning beyond the standard design, procurement, and construction services. This type of contract is specifically designed to ensure that the project meets the required performance levels upon delivery, with the contractor responsible for ensuring that the facility operates according to its intended specifications.

Engineering and Procurement (EP): This simplified contract focuses exclusively on engineering and procurement services. It is often used in scenarios where the construction risk is too high for the contractor or when the client plans to manage the construction phase independently. This contract type allows clients to engage specialized engineering and procurement services while retaining control over the construction process.

ATTRIBUTES AND FEATURES OF EPC CONTRACTS

Single Point of Responsibility

EPC contracts provide a unified management approach where the contractor assumes full responsibility for engineering, procurement, and construction. This simplifies project oversight for the client by consolidating accountability and streamlining the management process.

Fixed Price and Cost Certainty

These contracts often involve a fixed price or lump sum, offering cost certainty and predictable financial commitments. This arrangement reduces financial risk for the client, making it easier to secure financing and manage budgets without unexpected cost overruns.

Risk Transfer

The contractor assumes significant risks associated with design, procurement, and construction. This risk transfer protects the client from unforeseen costs and potential project delays, ensuring greater financial stability and predictability.

Detailed Specifications:

EPC contracts typically outline detailed project specifications and scope at the outset. This clarity minimizes changes during construction and helps prevent potential cost overruns by defining project parameters from the beginning.

Integrated Project Management:

The contractor manages all aspects of the project, including coordination with subcontractors and suppliers. This integrated approach enhances project efficiency and communication, ensuring smoother execution and coordination.

Change Orders

Changes to the project scope or design are managed through formal change orders. This structured method for handling

modifications includes associated cost adjustments, providing a clear process for addressing alterations while managing financial impacts.

Turnkey Delivery

EPC contracts are often described as “turnkey” agreements, meaning the contractor delivers a fully operational facility upon completion. This allows the client to immediately commence operations without additional modifications or inputs, streamlining the transition to operational use.

Fixed Completion Date

A fixed completion date is typically specified in EPC contracts. Failure to meet this deadline usually entitles the owner to claim damages for delays, providing an incentive for the contractor to adhere to the project’s timeline.

Performance Guarantees

Performance guarantees are commonly included to assure the client that the completed project will meet specified performance standards. These guarantees protect against subpar work or defects, ensuring that the project operates as intended.

Caps on Liability

EPC contracts often include caps on liability for the contractor, limiting financial exposure in cases of non-compliance or adverse outcomes. This feature balances accountability and risk management, providing a clear limit to the contractor's financial responsibility.

Defined Risk Allocation

A key characteristic of EPC contracts is the clear allocation of risk between the contractor and the owner. By transferring most design and construction risks to the contractor, these contracts help the owner manage potential uncertainties throughout the project.

KEY SEGMENTS OF EPC CONTRACTS

Engineering

The engineering segment encompasses the detailed design and planning of the project. The EPC contractor is tasked with creating comprehensive engineering drawings, specifications, and plans that adhere to project requirements and industry standards.

Procurement

During the procurement phase, the contractor is responsible for sourcing and acquiring all necessary materials, equipment, and services. This involves managing the supply chain and ensuring timely delivery of components to prevent construction delays.

Construction

This segment covers the actual construction and installation activities. The EPC contractor oversees all construction processes, ensuring that the work aligns with the design specifications and is completed within the agreed timeline.

Commissioning

Following construction, the commissioning phase is critical for verifying that all systems and components function correctly. The contractor conducts thorough testing to ensure the facility meets performance guarantees before transferring it to the client.

Handover

The handover phase involves transferring the completed project to the client. The contractor provides essential

documentation, training, and support to enable the client to operate the facility effectively.

Performance Guarantees

EPC contracts frequently include performance guarantees, where the contractor commits to meeting specific performance criteria. These guarantees are crucial for securing project financing and mitigating operational risks.

Risk Allocation

Effective risk allocation is a key aspect of EPC contracts. The contractor typically assumes the majority of risks related to design, procurement, construction, and performance, protecting the project owner from unforeseen issues.

Liquidated Damages

This segment outlines predetermined penalties for the contractor in the event of delays or failure to meet performance standards. Liquidated damages act as a financial incentive for timely and high-quality project delivery.

Security Mechanisms

EPC contracts often include security measures, such as bank guarantees or retention clauses, to safeguard the project owner against potential contractor defaults or failures to meet obligations.

Scope of EPC Services

The scope of EPC service varies according to the sub segment within the industry. The type of services required by an infrastructure developer would be entirely different from a residential real estate developer or industrial construction developer. EPC is a major service sought by infrastructure developer while real estate developers would look for support in building finishing (cladding & glazing), and mechanical, electrical & plumbing works.

In industrial segment, with rising number of projects and complexities in the scope of work, the responsibility of successful project execution has shifted from project owner/developer to EPC and EPCM contractors. For industrial plants spanning across chemical, fertilizer, oil & gas, and petroleum sector, amongst other, prominent turnkey solution and services provided by EPC companies include Site Investigation Service, Project Management, Procurement & Supply, Design & Detail Engineering, Manufacturing & Erection of Equipment, Installation and Mechanical Completion, Piping, Instrumentation, Commissioning, Performance Guarantee Test Run, amongst others.

EPC Service scope in Oil & Gas, and power generation

The Engineering, Procurement, and Construction (EPC) model is a critical part of infrastructure development in sectors like oil & gas, and power generation in India. Here's how EPC works in each of these segments:

Oil & Gas Sector

- **Scope of Work:** EPC contractors in the oil & gas sector are responsible for the complete lifecycle of a project, from the design phase to the construction and commissioning of facilities. This includes refineries, pipelines, storage tanks, and processing plants.

- **Engineering:** Detailed engineering design is created based on the client's specifications. This involves designing process flows, equipment, and layouts for the efficient operation of oil & gas facilities.

- **Procurement:** Contractors handle the sourcing of all necessary materials, equipment, and technology required for the project. They manage supplier relationships, logistics, and quality control to ensure timely delivery and compliance with industry standards.

- **Construction:** The construction phase involves the physical building of the project, which includes the installation of machinery, laying pipelines, and constructing structures. This phase requires strict adherence to safety and environmental regulations.

- **Commissioning:** Once construction is completed, the EPC contractor is responsible for testing and commissioning the facilities, ensuring they operate as intended before handing them over to the client.

- **Challenges:** The sector faces challenges such as volatile oil prices, regulatory hurdles, and the need for advanced technology and skilled labor. Additionally, EPC projects in oil & gas are capital-intensive and often involve complex logistical considerations.

Power Generation Sector

- **Scope of Work:** EPC contractors in the power generation sector are responsible for the complete lifecycle of power projects, including thermal, hydro, nuclear, solar, and wind power plants. Their scope covers feasibility studies, design, procurement, construction, and commissioning of generation facilities and associated infrastructure like substations and transmission lines.

- **Engineering:** Detailed engineering design is developed based on client and regulatory specifications. This includes designing plant layouts, electrical systems, turbines, boilers, control systems, and grid integration mechanisms to ensure efficient and safe power generation.

- **Procurement:** Contractors manage the sourcing of critical equipment such as generators, transformers, turbines, solar panels, and control systems. They oversee vendor selection, logistics, and quality assurance to ensure timely delivery and compliance with technical and environmental standards.

- **Construction:** This phase involves site preparation, civil works, and installation of mechanical and electrical systems. It includes erecting power generation units, substations, and transmission infrastructure. Strict adherence to safety, environmental, and labor regulations is essential during execution.

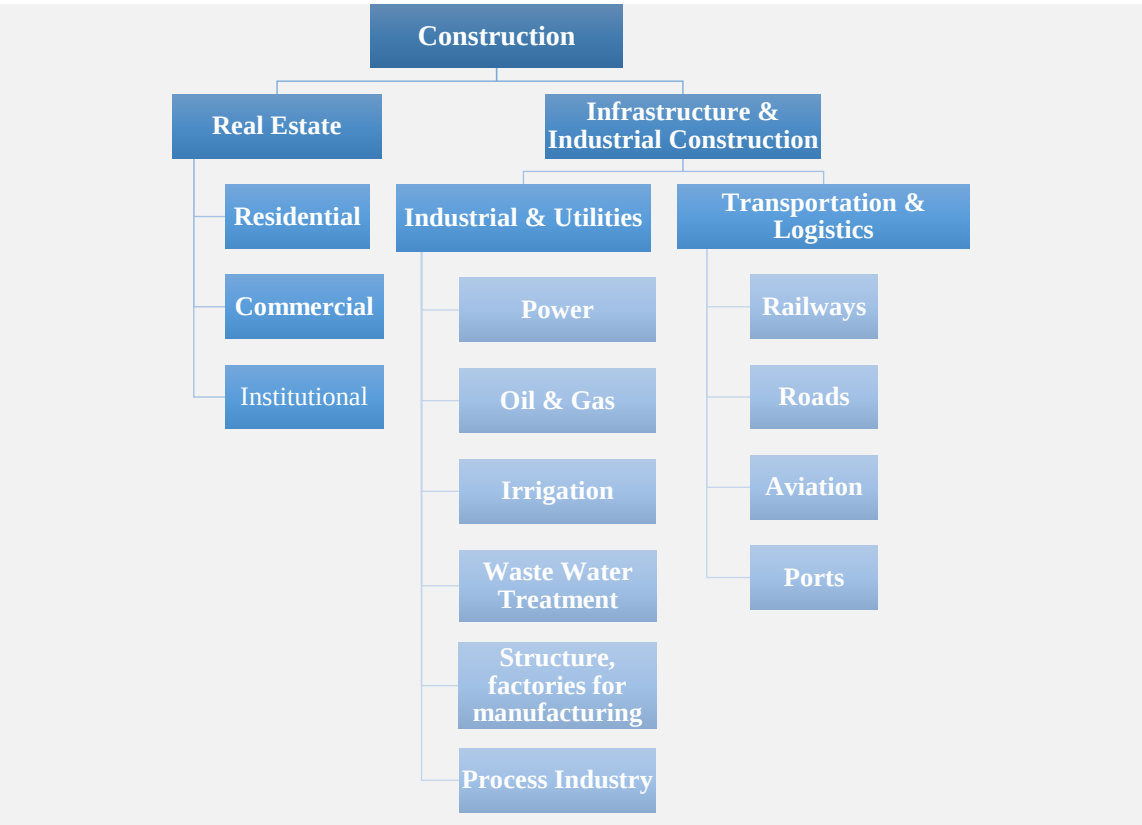

- **Commissioning:** After construction, EPC contractors conduct testing and commissioning of the plant. This includes performance validation under various load conditions, synchronization with the grid, and ensuring operational readiness before handing over to the client.

- **Challenges:** The sector faces challenges such as regulatory delays, land acquisition issues, integration of renewable energy sources, high capital investment, and the need for skilled labor and advanced technology. EPC contractors must also manage risks related to cost overruns, procurement bottlenecks, and performance guarantee disputes.

Construction industry in India

Overview

Construction sector includes a broad spectrum of activities including planning & design to actual construction. The sector is broadly divided into two: real estate construction and Industrial & infrastructure construction.

Growth in the number of construction projects creates the demand for a myriad range of products and services. These include project management services, EPC services and architecture consulting services, to name a few.

Key Segments of the Industrial Construction

Power Plants: The growing demand for energy necessitates the construction of new power plants across various technologies, including thermal, renewable, and nuclear. Expertise in specialized construction techniques and safety protocols is crucial in this segment.

Logistics Infrastructure: Warehousing facilities, cold storage units, and inland container terminals are in high demand as India's logistics sector booms. Optimizing space utilization and integrating automation solutions are key considerations.
Chemical & Pharmaceutical Plants: Stringent safety regulations and specialized construction materials characterize this segment. Expertise in handling hazardous materials and adhering to environmental norms is essential.

Refineries: Construction of facilities for processing crude oil into usable products like gasoline, diesel, and petrochemicals. High safety standards due to the flammable nature of materials, robust containment systems to prevent leaks, and adherence to environmental regulations.

Factory Buildings: This segment forms the backbone, catering to diverse industries with customized production spaces. Prefabricated structures and green building technologies are gaining traction for their efficiency and sustainability.

While significant progress has been made, challenges like inadequate infrastructure quality, skill gaps in the workforce, and limited access to financing remain concerns. The increasing integration of technologies like Building Information Modeling (BIM) and robotics is enhancing efficiency and reducing project timelines. Environmental considerations are gaining prominence, with green building practices and renewable energy solutions being incorporated into industrial construction projects.

Current Market Scenario

The construction sector is a key component of the Indian economy with linkages across more than 200+ sub sectors. Construction, the second largest economic activity in India (after agriculture) contributes around ~9.1% to the national GDP. Further, India is poised to become the third largest construction market in the next 2-3 years on the back of stable

economic growth as the real estate sector has emerged to be a critical engine in the country's growth story. As per a Knight Frank report, the construction sector, along with the output generated from real estate services and ownership of dwellings, contributes nearly 18% to the economy's total output.

It is the second largest employment generator in India with nearly 71 million workforce which is expected to cross 100 million by 2030. High employability of the sector is due to chain of backward and forward linkages that the sector has with other sectors of the economy. It provides impetus to other manufacturing sectors like cement, bitumen, iron and steel, chemicals, bricks, paints, tiles among others. A unit increase in expenditure in construction sector has a multiplier effect on other sectors with a capacity to generate income as high as five times in other sectors.

India's construction industry is on a phenomenal growth trajectory, projected to reach a staggering USD 1.4 trillion by 2025, accounting for 8%-10% of India's GDP. This represents a significant leap from its current size of approximately USD 820 billion, showcasing the dynamism and potential of this sector. Cities are a major driver for the construction industry as more than 40% of the population is expected to live in urban India (compared to the current 33%), leading to a demand for 25 million additional mid-end and affordable units by 2030. Further, the Smart Cities Mission targeted at 100 cities is aimed at improving the quality of life through modernized/ technology driven urban planning.

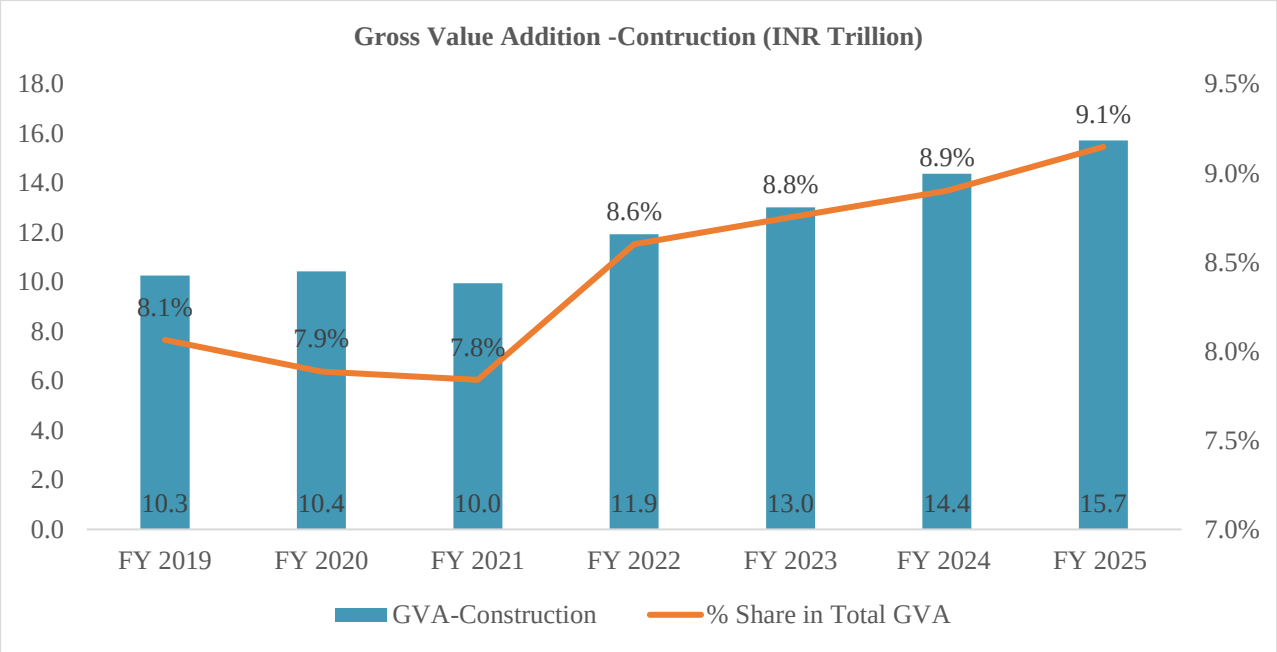

The Indian government's ambitious Gati Shakti National Master Plan plays a pivotal role in propelling the construction industry forward. This comprehensive roadmap aims to seamlessly integrate infrastructure development across various sectors, creating a national logistics network that will boost efficiency and reduce costs.

The Bharatmala Pariyojana initiative complements Gati Shakti by focusing specifically on developing a world-class highway network spanning over 83,000 kilometers. This ambitious project comprises several expressways, ring roads, and economic corridors, aiming to improve connectivity, boost regional development, and facilitate trade. The booming construction industry is a significant job creator, directly employing millions of workers across various disciplines like engineering, construction, architecture, and skilled labor. Additionally, the sector indirectly supports numerous job opportunities in associated industries like manufacturing, transportation, and logistics.

Historical growth trend in construction industry

Contribution to national economy by the construction sector has steady improved over the years, and by FY 2025 it is estimated to account for nearly 9.1% of national Gross Value Added (GVA). In actual terms, the GVA by construction sector reached approximately INR 15.6 trillion in FY 2025.

This positive development is based on increased government spending on infrastructure as well as faster than expected demand growth in the real estate sector. The housing sector especially is seeing stable demand, on the back of low loan rates, deductions in stamp duty announced by several state Governments as well as drop in property price volatility.

The government has identified infrastructure as a priority sector to bolster GDP growth. Various reforms have been introduced from time to time to attract investment in infrastructure. Infrastructure sector was opened to private participation post-liberalization in 1991 and currently up to 100% FDI under automatic route is allowed in most sectors/activities.

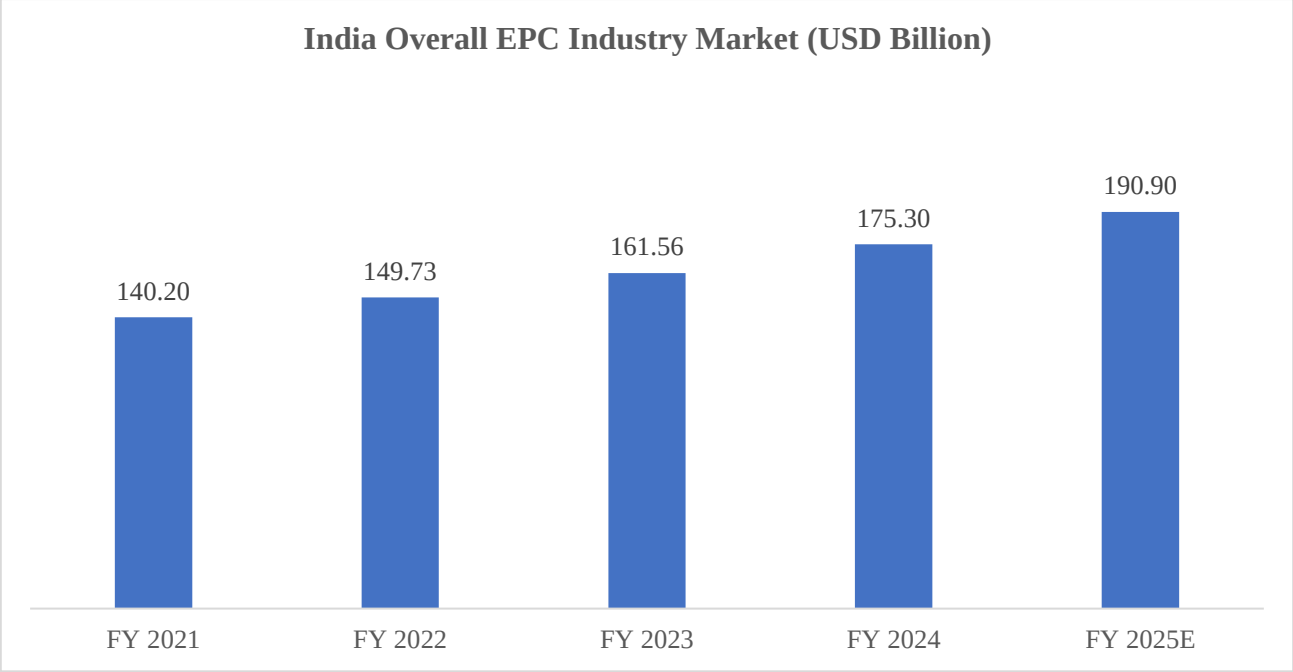

Also, 100% FDI under automatic route is allowed in construction-development projects which would include development of townships, construction of residential/commercial premises, roads or bridges, hotels, resorts, hospitals, educational institutions, recreational facilities, city and regional level infrastructure, townships. India has steadily emerged as a safe and attractive destination for foreign investment over the past decade. The construction development segment comprising townships, housing, built-up infrastructure, and other construction-development projects has become a significant contributor, ranking as the seventh-largest recipient of FDI.

The construction sector, specifically infrastructure activities, has shown a notable growth trajectory in foreign direct investment (FDI) inflows. In FY 2023, the construction (infrastructure) activities sector attracted approximately INR 13,588 crore, which increased significantly to INR 35,076 crore in FY 2024. For FY 2025 (up to March), the sector continued to see inflows of approximately INR 18,962 crore. Cumulatively, from April 2000 to March 2025, the sector has attracted a substantial equity inflow of INR 2,58,516 crore, representing 5% of the total FDI equity inflow.

Similarly, the construction development sector, which includes townships, housing, built-up infrastructure, and other construction-development projects, also recorded strong FDI inflows. This sector saw an inflow of approximately INR 1,196 crore in FY 2023, which grew to approximately INR 2,113 crore in FY 2024. For FY 2025 (up to March), this sector attracted approximately INR 4,503 crore. Over the cumulative period from April 2000 to March 2025, the construction development sector has received a significant equity inflow of INR 1,35,824 crore, making up 4% of the total FDI equity inflow.

The Indian government's ambitious National Infrastructure Pipeline and PM Gati Shakti program two of the flagship government programs that would herald the next phase of growth in infrastructure development in India. Both the flagship policies outline ambitious programs that entails investments of billons of dollar, and construction projects of the scale that has never been attempted before. Apart from the mega projects, the focus on improving coordination between implementing agencies and steps to remove project delays are also noteworthy. Together, these two flagship policies provide favorable demand scenario for the EPC services in India. The Indian EPC industry has seen steady growth over the years, with a market size increasing from USD140.20 billion in 2021 to USD175.30 billion in 2024, reflecting a CAGR of 7.7%. Going ahead, the over EPC Industry is expected to touch USD 190.9 billion in FY 2025.

Key Demand Drivers

Economic Factors

Rising Domestic Consumption: The growth of India's middle class, which is expected to reach 580 million by 2025, is significantly driving domestic consumption. With rising disposable incomes, there is an increasing demand for a variety of consumer goods, compelling manufacturers to enhance their production capabilities. As a result, businesses are investing heavily in new factories and industrial facilities to meet this demand. This trend is not only boosting domestic manufacturing but also necessitating substantial industrial construction projects across the country to accommodate increased production needs.

Export Potential: India's youthful demographic, with over 65% of its population under the age of 35, provides a distinct advantage in the global market. This demographic is increasingly skilled and cost-competitive, attracting foreign manufacturers looking to diversify their supply chains. The surge in foreign direct investment (FDI) has been notable, with inflows rising from USD 45.15 billion in FY 2015 to a record high of USD 81.042 billion in FY 2025. This influx drives the establishment of new production facilities and logistics hubs, creating a growing demand for industrial construction as companies seek to tap into both domestic and international markets.

Globalization and Trade Agreements: India's involvement in 13 free trade agreements (FTAs) and ongoing negotiations with countries like the U.K., Canada, and the European Union underscores its commitment to enhancing trade opportunities. These agreements facilitate smoother access to global markets, prompting local manufacturers to increase production capabilities. As companies scale their operations to leverage these trade opportunities, the demand for robust industrial infrastructure including manufacturing plants and logistics facilities grows significantly, further stimulating industrial construction activity.

Technological Advancements: The integration of advanced technologies, including automation and Industry 4.0 initiatives, is revolutionizing India's manufacturing landscape. As companies increasingly adopt these technologies to enhance production efficiency, there is a pressing need for modern production facilities that can support sophisticated processes. This shift necessitates substantial investments in upgrading existing infrastructure and developing new industrial spaces, thereby driving demand for specialized industrial construction projects that cater to the needs of high-tech manufacturing operations.

Government Initiatives

Make in India: The "Make in India" initiative aims to transform India into a global manufacturing hub by promoting domestic production across 25 key sectors, including textiles, chemicals, and electronics. By providing incentives such as tax breaks and streamlined regulatory processes, the program has attracted significant investment and increased manufacturing output. This initiative has created substantial demand for industrial infrastructure, as companies seek to establish or expand manufacturing units to take advantage of these benefits, thus fueling industrial construction projects nationwide.

Production Linked Incentive Scheme (PLI): The Production Linked Incentive Scheme represents a strategic commitment by the Indian government, with an outlay of INR 1.97 trillion3 (over USD 26 billion) announced in the Union Budget FY 2026 for 14 key manufacturing sectors. This financial support incentivizes companies to increase production levels, particularly in sectors like electronics, pharmaceuticals, and automobiles. By attracting global players and stimulating domestic production, the PLI scheme significantly drives the demand for industrial construction, as businesses invest in building or upgrading manufacturing facilities to qualify for these incentives.

Infrastructure Development: The Indian government's massive investments in infrastructure, including highways, ports, railways, and power grids, create an enabling environment for industrial growth. Improved logistics and connectivity enhance the operational efficiency of industrial zones, making them more attractive to businesses. As these infrastructure developments progress, they lead to increased demand for new manufacturing units and warehouses, driving a corresponding rise in industrial construction activities that support these enhanced capabilities.

Skill Development Programs: Initiatives like "Skill India" and "Make in India Skill Development Centers" are crucial for addressing skill gaps in the workforce. These programs aim to train millions of individuals in various technical skills necessary for modern manufacturing processes. By ensuring a steady supply of skilled labor, these initiatives facilitate the establishment of new industrial units, which, in turn, generates increased demand for industrial construction to accommodate the growth of these facilities and ensure they are staffed with qualified personnel.

Business-Friendly Reforms: The Indian government has implemented numerous reforms since 2014 aimed at simplifying regulations and reducing bureaucratic hurdles, making it easier for companies to establish and operate in India. The ease of doing business has improved significantly, as evidenced by India's rise in the World Bank's Ease of Doing Business rankings. This pro-business environment attracts both domestic and international investments, leading to an increase in industrial infrastructure projects as firms seek to capitalize on favorable conditions for growth.

Access to Free Trade Agreements: India's strategic engagement in free trade agreements (FTAs) not only enhances its trade opportunities but also positions the country as an attractive destination for global manufacturers. The signing of 13 FTAs and ongoing negotiations signal a commitment to improving market access for businesses. As companies look to establish production bases in India to leverage these trade benefits, the demand for industrial construction rises to create the necessary facilities for manufacturing and logistics. This trend aligns with India's broader economic goals of boosting manufacturing capabilities and increasing exports, making industrial construction a vital component of its economic strategy.

Regulatory Landscape

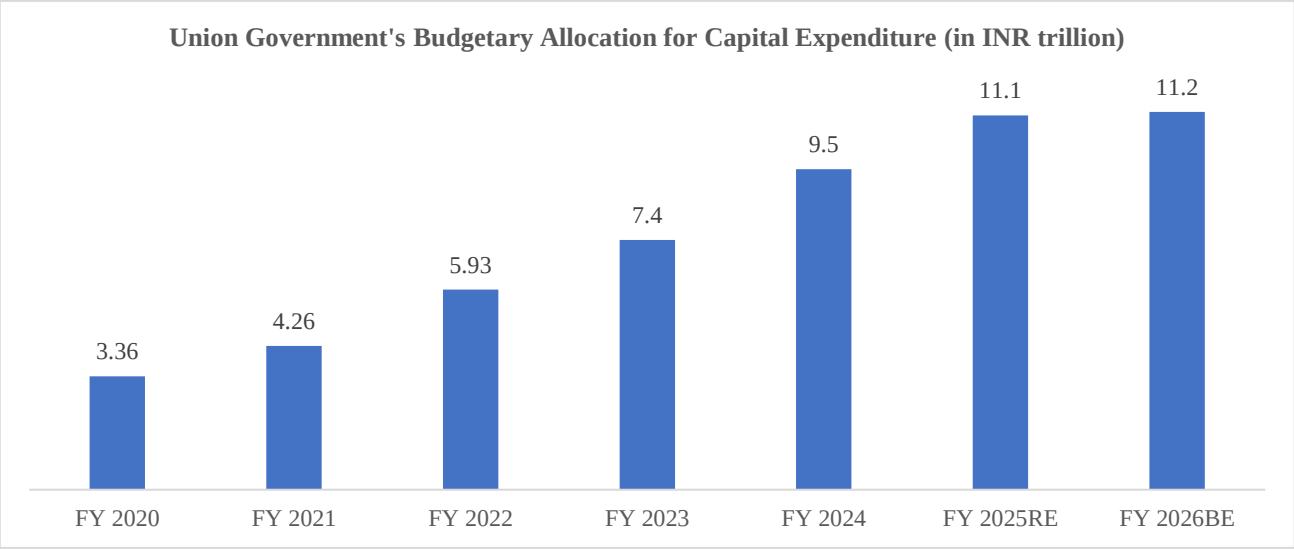

The government has identified infrastructure as a priority sector to bolster GDP growth. Various reforms have been introduced from time to time to attract investment in infrastructure. Infrastructure sector was opened to private participation post-liberalization in 1991 and currently up to 100% FDI under automatic route is allowed in most sectors/activities. Under this route, no permission from the Central Government is required for FDI inflow, but the same is subject to applicable laws/regulations, security and other conditions. However, participation was low due to high upfront capital investment, long gestation period, and uncertain returns in investment. Public Private Partnership (PPP) project mode was introduced

to circumvent this hurdle. The government continued thrust on infrastructure expansion is evident from rising budgetary allocation towards infrastructure.

Government Budgetary Allocation to Infrastructure Sector

Growing infrastructure spending is vital for overall infrastructure development as it has a multiplier effect on overall economic growth. By allocating substantial funds to the development of roads, railways, airports, and urban infrastructure, the government stimulates economic growth and improves public facilities. This investment not only enhances connectivity and logistics but also creates a ripple effect, driving demand for EPC services.

Large-scale projects such as highway expansions, and smart city initiatives necessitate the expertise of EPC companies, fostering innovation and efficiency in project execution. Consequently, the government's focus on capex not only accelerates infrastructure development but also opens a plethora of opportunities for the EPC sector, contributing to job creation, technological advancements, and overall economic development. Consequently, the government with stepped up public spending over the last few years has been providing support to the sector.

Union Budget, Government of India

Multiple flagship scheme focussing the development of infrastructure construction creates immense opportunities for EPC segments. These are discussed below:

National Infrastructure Pipeline (NIP)

If India is to become a USD 5 Trillion economy by 2028, as well as continue it strong economic growth, the country will have to spend close to USD 4.5 trillion on infrastructure construction by 2030. National Infrastructure Pipeline is the consolidated platform that captures the multiple infrastructure investment projects planned by the Government to propel Indian economy to USD 5 trillion mark.

In Union Budget 2019-20, the government announced to invest INR 100 trillion in infrastructure over the next five years. The National Infrastructure Pipeline aims to improve the ease of living for its citizen. National Infrastructure Pipeline will include projects in various sectors such as housing, safe drinking water, access to clean and affordable energy, world-class educational institutes, healthcare for all, modern railway stations, airports, bus terminals, metro and railway transportation, logistics and warehousing, irrigation projects, etc. These projects are classified as per their size and stage of development. The National Infrastructure Pipeline (NIP) was launched with 6835 projects envisaging investment worth INR 103 trillion in December 2019. The project pipeline has now comprised of nearly 9,736 projects which is together worth nearly USD 1.82 billion covering 56 diverse industry segments. Of this nearly 2,014 projects are under various stages of development. With NIP spanning FY 2019 – 25 period, the remaining projects are expected to be developed in the next couple of years. This points to a flurry of infrastructure construction activity in the country, which in turn would create numerous opportunities for the EPC segment.

PM Gati Shakti

PM Gati Shakti plan – National Master Plant for Multi Modal Connectivity – launched in October 2021 is a digital platform that is aimed at improving the coordination among multiple ministries and departments involved in infrastructure development in the country. The program covers all the infrastructure initiatives outlined under Bharatmala & Sagarmala initiatives, port development, dedicated freight corridor program of railways as well as development of special economic zones.

India Infrastructure Project Development Fund Scheme (IIPDF Scheme)

The Department of Economic Affairs (DEA) introduced the India Infrastructure Project Development Fund (IIPDF) Scheme on November 3, 2022, to enhance infrastructure development through Public-Private Partnerships (PPPs). This scheme aims to improve the quality and speed of infrastructure projects by encouraging private sector participation. The DEA focuses on creating a conducive policy framework for private investment in infrastructure.

The IIPDF Scheme provides financial support to Project Sponsoring Authorities (PSAs) at both Central and State Government levels, covering expenses for transaction advisors and consultants in PPP project development. This funding ensures the development of viable and bankable PPP projects, promoting modern infrastructure across the country. Complementing the IIPDF Scheme is the Viability Gap Funding (VGF) Scheme, which supports economically justified but commercially unviable PPP projects. Together, these schemes facilitate the development of quality infrastructure projects, enhancing efficiency and private capital infusion.

The DEA's initiatives streamline the procurement of advisory services, addressing delays and suboptimal structuring of PPP projects. By providing necessary funding and technical support, these schemes boost the EPC sector, fostering innovation, efficiency, and sustainable infrastructure growth in India.

National Infrastructure Pipeline and PM Gati Shatkti program two of the flagship government programs that would herald the next phase of growth in infrastructure development in India. Both the flagship policies outline ambitious programs that entails investments of billons of dollar, and construction projects of the scale that has never been attempted before. Apart from the mega projects, the focus on improving coordination between implementing agencies and steps to remove project delays are also noteworthy. Together these two flagship policies provide favourable demand scenario for the stainless-steel consumption in infrastructure construction segment.

Oil & Gas Pipeline

Talking about oil & gas industry, India is currently the 3rd largest energy and oil consumer in the world, after China and US. According to IEA's report under the stated policy scenario, India's oil consumption is projected to rise significantly by 50% by 2030, compared to a global demand increase of only 7%. India's oil consumption is expected to grow from 4.8 million barrels per day (mbd) in 2019 to 6.7 mbd in 2030. For natural gas, the country's consumption is projected to double from 64 billion cubic meters (BCM) in 2019 to 115 BCM in 2030. India's oil consumption grew to 5.4 mbd while natural gas consumption stood at 60 BCM at the end of 2023.

As of April 2025, India holds the position of the fourth-largest refining capacity globally, following the United States, China, and Russia. The country's total refining capacity stands at 258 million metric tons per annum (MMTPA), with a daily refining capacity of 5 million barrels. Indian Oil Corporation (IOC), a leading Indian refiner, has indicated that the country needs to add 2 million barrels per day to its refining capacity by 2030 to support its economic expansion.

Particulars	Crude Oil Average price (India basket) USD/bbl.	Total Imports (MMT)	Domestic Production (MMT)	Total	% share of Imports	% share of Domestic Production
2019-20	60.47	226.95	32.2	259.15	87.57%	12.43%
2020-21	44.82	196.46	30.5	226.96	86.56%	13.44%
2021-22	79.18	212.38	29.7	242.08	87.73%	12.27%
2022-23	93.15	232.70	29.2	261.90	88.85%	11.15%
2023-24	82.58	234.26	29.4	263.66	88.85%	11.15%

Source: Petroleum Planning & Analysis Cell

In April 2025, India's crude oil imports reached 243.2 million metric tonnes, driven by rising domestic demand and export opportunities. This represented a 3.8% year-over-year increase. The total import bill for crude oil and petroleum products

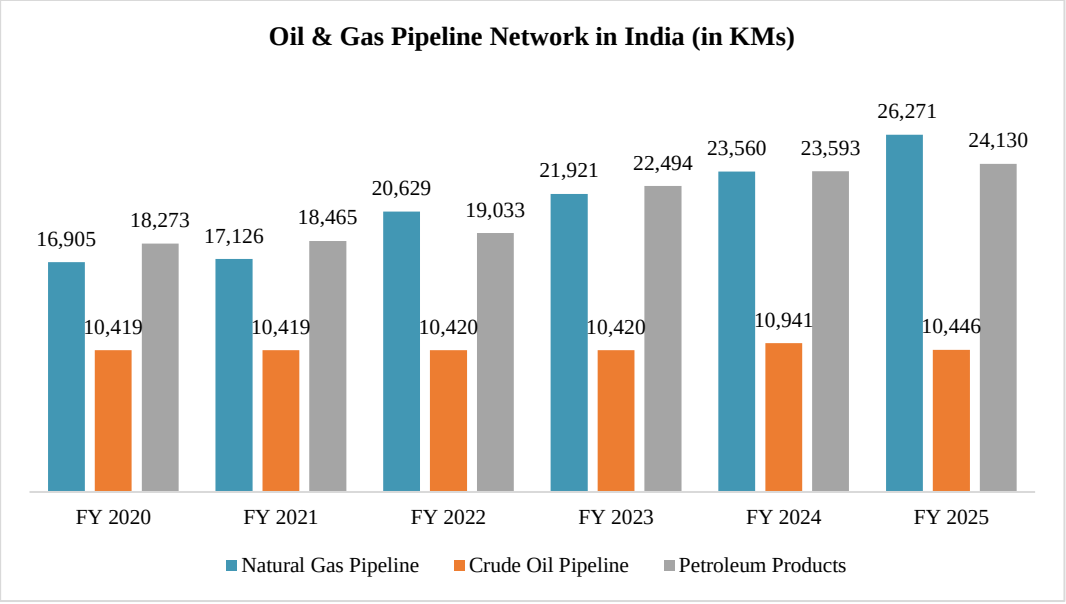

in FY25 rose to USD 161 billion, up from USD 156.3 billion in FY24. As per sources, Indian refiners, including major players like Reliance Industries and Nayara Energy (backed by Rosneft), are expected to boost their imports of Russian crude oil by 10–20% starting in August. This means an increase of around 150,000 to 300,000 barrels per day.

Such high import dependency renders the country's economy vulnerable to international crude oil market dynamics. Consequently, to insulate the domestic economy from external shocks and conserve forex reserves, the government is working towards increasing domestic E&P (Exploration & Production), to reduce import gradually. The government envisages to cut India's oil import dependence by 50% by 2030.

Oil & Gas pipeline network in India

Pipelines are essential for transporting oil, gas, and water across India, offering safe, reliable, and cost-effective transport compared to road and rail. They ensure a continuous supply of resources to refineries, industries, and power plants, aiding in uninterrupted production and electricity generation. Pipelines have lower maintenance needs and energy consumption, leading to reduced transportation costs and economic benefits. Environmentally, pipelines cause less pollution and land use compared to other transport modes, supporting India's sustainability goals. They can transport large volumes of resources efficiently, crucial for meeting industrial and consumer demands, and help conserve resources by minimizing leakages and ensuring timely supply. Expanding and modernizing the pipeline network can enhance these benefits, making it a critical part of India's infrastructure.

Pipelines play a crucial role in maintaining the supply chain for crude oil, petroleum products, and gas in the country. Onshore cross-country pipelines are buried underground at a depth of approximately 1.5 meters within a corridor spanning about 18 meters, operating at elevated pressures. As of March 31, 2025, the total length of the crude oil pipeline network in India is 10,446 kilometers, boasting a capacity of 153.1 million metric tons per annum (MMTPA). During FY 2024- 25, the utilization of crude oil pipelines stands at 66.5%. Product pipelines, inclusive of LPG, form a comprehensive network spanning 24130 kilometers with a capacity of 145.8 MMTPA. During FY 2024-25, the utilization of product pipelines reached 71.1%, an increase from 68.9% in FY 2023-24.

The Indian government has undertaken key projects to expand this network, including the Pradhan Mantri Urja Ganga Project, which aims to develop the natural gas infrastructure in eastern India, and the North-East Gas Grid, which seeks to integrate the northeastern states with the national gas grid. The broader National Gas Grid initiative aims to create a unified pipeline network, enhancing the availability of natural gas nationwide and promoting cleaner energy usage.

Despite their advantages, India's pipeline networks face challenges. Frequent leakages due to old, corroded pipelines lead to significant resource loss and environmental damage. Delays in pipeline expansion projects, caused by land acquisition issues, regulatory hurdles, and technical difficulties, result in under-utilization and unmet infrastructure needs. Security threats, including pipeline theft, sabotage, and vandalism, disrupt supplies and increase operational costs. Safety measures are often inadequate, lacking advanced leak detection systems and emergency response infrastructure, which heightens the risk of incidents. Addressing these challenges is crucial to maximizing the effectiveness and reliability of India's pipeline

network.

The oil & gas pipeline network players reveal a concentrated market structure in India's oil and gas pipeline sectors. In crude oil pipelines, Indian Oil Corporation Limited (IOCL) dominates with over half the market share, while companies like Oil and Natural Gas Corporation (ONGC) and Oil India Limited (OIL) hold significant stakes. The natural gas pipeline network is heavily controlled by Gas Authority of India Limited (GAIL), which holds about two-thirds of the market share. Other players like Gujarat State Petronet Limited (GSPL) and Petronet LNG Limited (PIL) have smaller but notable presences. This concentration suggests a mature industry with established infrastructure, though some diversity among operators remains in both sectors.

Prospects for India's oil and gas pipeline network are promising, driven by increasing energy demand, supportive government policies, and the push for cleaner energy sources. The expansion of this network is expected to improve energy security, reduce transportation costs, and support the country's transition to a more sustainable energy mix. Continuous investments and technological advancements will further enhance the efficiency and reliability of India's oil and gas transportation infrastructure, contributing significantly to the nation's energy sector growth and development.

Demand drivers

Growing Demand

The projected increase in India's oil demand from 5.4 million barrels per day (bpd) in 2023 to 6.7 million bpd by 2030, driven by a rise in road transport fuel demand (with diesel increasing by 520,000 bpd and gasoline by 270,000 bpd), economic and industrial growth, and the expansion of refining capacity by one million bpd, necessitates the expansion of the oil and gas pipeline infrastructure. Despite an increase in domestic refining capacity to 6.8 million bpd, India’s import needs are expected to rise to 5.6 million bpd by 2030. This increased demand for oil underscores the need for a robust pipeline network to ensure efficient transportation, distribution, and strategic energy security.

Government Initiatives and Policies

The Indian government has implemented several policies and initiatives aimed at boosting the oil and gas pipeline infrastructure. Programs like the National Gas Grid and the Pradhan Mantri Urja Ganga Project aim to create a comprehensive network of pipelines across the country. These initiatives are designed to improve energy access, reduce regional disparities, and promote the use of cleaner energy sources. The government has also permitted 100% FDI under the automatic route for oil and gas PSUs and is implementing policy support and pricing reforms to attract investments in the upstream and midstream gas sectors. Additionally, regulatory reforms are being introduced to ensure fair and transparent access to pipeline infrastructure.

Economic Growth and Industrialization

India's rapid economic growth and ongoing industrialization have significantly increased the demand for energy. Industries, power plants, and residential consumers are driving the need for a robust pipeline infrastructure to ensure a consistent and efficient supply of oil and natural gas. This growth necessitates expanding the pipeline network to meet rising energy demands.

Shift Towards Cleaner Energy

As part of its commitment to reducing carbon emissions and combating climate change, India is transitioning towards cleaner energy sources. Natural gas, being a cleaner alternative to coal and oil, is becoming increasingly important in the country's energy mix. Expanding the natural gas pipeline infrastructure is crucial to facilitate this shift and provide a reliable supply of cleaner fuel.

Technological Advancements

Advancements in pipeline technology have made it more feasible to construct and operate extensive pipeline networks. Improvements in materials, construction techniques, and monitoring systems have enhanced the safety, efficiency, and cost-effectiveness of pipelines. These technological developments are driving the expansion of the pipeline infrastructure in India.

Strategic Importance and Energy Security

Enhancing energy security is a key priority for India. Diversifying supply sources and routes through an extensive pipeline network reduces dependency on road and rail transport, which is less efficient and more susceptible to disruptions. A well-developed pipeline network ensures a stable and secure supply of energy, crucial for the country's economic stability and growth.

Environmental Regulations and Sustainability Goals

Stringent environmental regulations and sustainability goals are pushing India towards the adoption of cleaner energy practices. Expanding the natural gas pipeline network helps reduce the carbon footprint associated with energy consumption. This expansion supports the country's environmental objectives and aligns with global sustainability trends.

Investment and Public-Private Partnerships

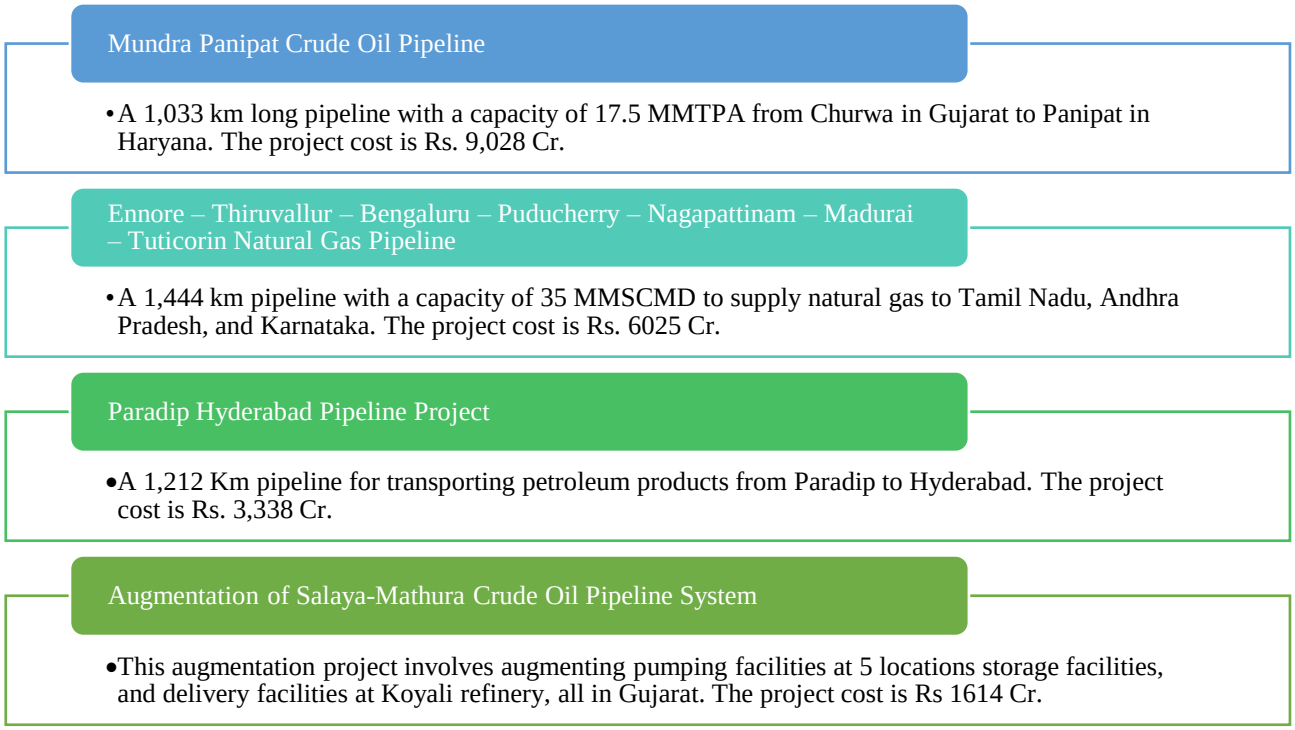

Increased investment from both the public and private sectors is fueling the growth of pipeline infrastructure. Public-private partnerships (PPPs) are playing a significant role in financing and executing large-scale pipeline projects. These collaborations bring in the necessary capital, expertise, and technology to expand the pipeline network efficiently.

Urbanization and Residential Demand

Urbanization in India is leading to higher residential demand for natural gas, particularly for cooking and heating purposes. Expanding the pipeline network to urban and peri-urban areas ensures that households have access to a consistent and reliable supply of natural gas, improving living standards and reducing reliance on traditional fuels like LPG and kerosene.

Expansion of Pipeline Network

Several pipeline projects are under construction to enhance transportation infrastructure. These include:

Increase in Petroleum Product Consumption4

The rise in petroleum product consumption from 232,561 units in FY 2024 to 238,954 units in FY 2025 highlights a growing demand for oil and gas resources. This increase underscores the need for expanding India's pipeline network to efficiently handle the higher volume of petroleum products. Expanding the pipeline infrastructure will ensure a stable and reliable supply, support economic growth, and enhance resource distribution across the country.

Fuelling Expansion

India’s robust economic growth has significantly driven up transportation demand, with road transport being a major contributor. Road vehicles, crucial for personal mobility and freight movement, account for approximately 90% and 70% of these activities, respectively. This strong dependence on road fuels, particularly diesel, is expected to continue as the economy expands. Although car ownership in India has increased eightfold since 2000, it remains relatively low compared to global standards, such as in China. With around 58 million cars on the road in 2023 and projections indicating more than 40% growth in the car fleet by 2030, there is substantial potential for increased oil demand, further fuelling the growth of the oil and gas pipeline network.

EPC Services in Oil & Gas

Engineering, Procurement, and Construction (EPC) services play a crucial role in the development and maintenance of oil and gas pipeline infrastructure. These services encompass the entire lifecycle of pipeline projects, from initial planning and design through procurement and construction to final commissioning. The key services in oil & gas pipeline domain include:

Engineering

- Design and Planning: EPC contractors design the pipeline infrastructure, including route selection, pipeline specifications, and integration with existing systems. This involves detailed engineering studies, feasibility assessments, and environmental impact analyses.

- Technical Specifications: Development of technical specifications and design criteria for pipelines, including material selection, stress analysis, and safety standards.

- Project Management: Comprehensive project management services to oversee the planning, execution, and completion of pipeline projects. This includes scheduling, budgeting, and coordination among various stakeholders.

Procurement

- Material Sourcing: Procurement of materials and equipment required for pipeline construction, including pipes, valves, fittings, and construction machinery. EPC firms manage supplier relationships and ensure timely delivery of high-quality materials.

- Contract Management: Handling contracts with suppliers and subcontractors, ensuring that terms and conditions are met and that materials are sourced cost-effectively.

Construction

- Pipeline Installation: On-site construction services, including excavation, trenching, welding, and laying of pipelines. This phase also involves the installation of associated infrastructure such as pump stations, compressor stations, and control systems.

- Testing and Commissioning: Conducting tests to ensure the integrity and safety of the pipeline system, including pressure testing, leak detection, and system calibration. Commissioning involves bringing the pipeline into operation and ensuring it meets all operational requirements.

Maintenance and Upgrades

- Ongoing Maintenance: Providing maintenance services to ensure the continuous and efficient operation of pipelines. This includes regular inspections, repairs, and replacements of worn or damaged components.

- Upgrades and Enhancements: Implementing upgrades to improve pipeline performance, incorporate new technologies, and meet evolving industry standards and regulatory requirements.

EPC services are crucial for the effective development and operation of oil and gas pipelines, ensuring projects are completed on schedule, within budget, and meet quality and safety standards. By utilizing their expertise in engineering, procurement, and construction, EPC firms optimize pipeline infrastructure, improve operational efficiency, and support sector growth. Key industry trends include the integration of advanced technologies such as digital twins, automated welding, and smart sensors to enhance project efficiency and safety, a focus on sustainable practices and regulatory compliance to reduce environmental impact, and innovative procurement and construction techniques aimed at cost reduction and improved project economics. Overall, EPC services are fundamental for maintaining and advancing the efficiency, safety, and reliability of oil and gas pipeline infrastructure.

Capacity Addition in Oil & Gas

India, holding the global rank of the fourth-largest crude oil refiner, is on track to significantly enhance its refining capacity by an additional one million barrels per day (mb/d) over the next five years. According to the International Energy Agency, there would be a substantial increase in India's refining capability from 5.2 mb/d in 2022 to an expected 6.2 mb/d by the year 2028. The Petroleum Planning and Analysis Cell (PPAC) reports that India processed a cumulative 4.85 mb/d of crude oil in the fiscal year 2022, and this figure rose to 5.02 mb/d in the fiscal year 2023. Remarkably, the crude oil processing during the initial two months of fiscal year 2024 reached 5.31 mb/d.

The medium-term growth outlook is notably influenced by Indian expansions, totalling one mb/d. This anticipated surge in capacity is primarily attributed to expansions at existing refining sites, with the notable exception being the Barmer greenfield project, which is expected to come online with a capacity of 180,000 barrels per day. These expansion projects would collectively contribute to India's strategic efforts to boost its refining capabilities, aligning with the nation's position as a major player in the global crude oil refining landscape.

Regulatory Landscape

Regulatory Framework

India's oil and gas sector is governed by a comprehensive regulatory framework comprising several key laws and regulations:

Oilfields (Regulation and Development) Act, 1948: This act regulates the upstream oil and gas sector, granting the government authority to lease and license petroleum mines, formulate rules for mineral development, and control mining methods. It also empowers the government to appoint officers for mine inspections, examination of personnel in control of mines, and requisition of pertinent documents.

Petroleum and Natural Gas Rules, 1959: Enacted under the Oilfields Act, these rules detail the procedures for granting licenses and leases for onshore and offshore exploration and production.

Mines Act, 1952: Along with the Oil Mines Regulations, 2017, this act provides regulations concerning the health, safety, and welfare of workers in oil mines.

Petroleum and Natural Gas Regulatory Board (PNGRB) Act, 2006: This act established the Petroleum and Natural Gas Regulatory Board (PNGRB), which oversees the refining, processing, storage, transportation, distribution, marketing, and sale of petroleum, petroleum products, and natural gas. The PNGRB is also responsible for addressing complaints and inquiries related to technical standards and regulations within the sector.

The Petroleum and Minerals Pipelines (Acquisition of Right of User in Land) Act, 1962: This act provides for the acquisition of the right of user in land for laying pipelines for the transportation of petroleum and minerals.

The Petroleum Pipelines (Acquisition of Right of User in Land) Act, 2011: This act provides for more stringent punishment to curb incidents of pilferage from and sabotage of pipelines and serves as a deterrent to the emerging security threat to pipeline installations.

Guidelines for Laying Petroleum Product Pipelines, 2002: Notified by the Ministry of Petroleum and Natural Gas (MoPNG), these guidelines lay down the policy for laying pipelines in the country on a common carrier principle.

Initiatives to Expand oil & Gas Pipeline Infrastructure

The government has adopted several measures to expand the oil and gas pipeline infrastructure in India, aimed at ensuring energy security and promoting investment:

- **Investor-Friendly and Liberalized Policies**: The government has gradually moved towards investor-friendly and liberalized policies and reforms to push EPC demand in the oil and gas sector.

- **Foreign Direct Investment (FDI)**: Up to 100% FDI is allowed through the automatic route in exploration and production (E&P). The New Exploration Licensing Policy (NELP) allows domestic and foreign private investors to participate under similar fiscal and contract terms.

- **New Exploration Licensing Policy (NELP)**: Opening up the oil sector for private and foreign investment, resulting in 145 hydrocarbon discoveries (53 crude oil and 92 natural gas) under the NELP regime in 48 blocks.

- **Hydrocarbon Exploration Licensing Policy (HELP)**: Approved in March 2016 to double India's oil production and reduce import dependency by 10% by 2022, HELP features a uniform license for conventional and unconventional oil and gas resources, including the Open Acreage Licensing Policy (OALP), revenue sharing model, graded royalty rates, and marketing freedom.

- **Open Acreage Licensing Policy (OALP)**: This policy allows companies to select exploration blocks without waiting for formal bid rounds, ensuring oil and gas acreages are available year-round.

- **Revenue Sharing Model**: Replacing the profit-sharing model, the revenue-sharing model minimizes government interference by focusing on gross revenue from the sale of oil, gas, etc., rather than scrutinizing cost details of private companies.

- **Marketing Freedom**: The policy provides marketing and pricing freedom for new gas production from Deepwater, Ultra Deepwater, and High-Pressure High Temperature Areas, promoting minimal government interference in operations of companies.

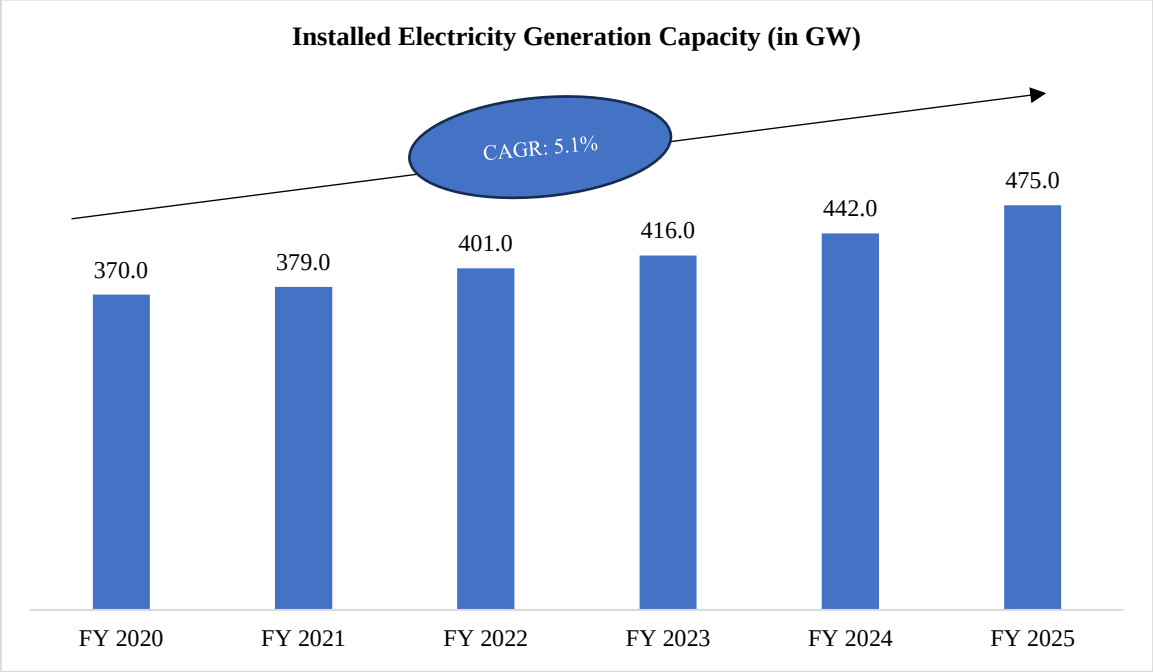

- **Northeast Vision 2030**: Envisaging an investment of INR 1,300 billion by 2030 in the hydrocarbon sector in Northeast India, the vision focuses on exploration and production, pipelines, and expanding marketing networks.

Power Generation Scenario in India

India's installed electricity generation capacity has shown consistent growth over the past five years, increasing from 370 GW in FY 2020 to m GW in FY 2025. This expansion represents a Compound Annual Growth Rate (CAGR) of 5.1%, underscoring the country's sustained efforts to enhance its power infrastructure in response to rising energy demand. Year-on-year additions have been steady, with capacity rising to 379 GW in FY 2021, 401 GW in FY 2022, and further to 416 GW in FY 2023. This upward trend reflects India's proactive approach to ensuring energy availability for industrial, commercial, and residential sectors.

The acceleration in capacity addition is driven by significant investments in both conventional and renewable energy sources. From 416 GW in FY 2023, the installed capacity reached 442 GW in FY 2024 and further climbed to 475 GW in FY 2025, indicating a strong push toward energy diversification and sustainability. As of June 2025, the total installed generation capacity reached 478 GW. This growth not only supports India's economic expansion but also aligns with national objectives of improving energy access, reducing dependence on imports, and transitioning to a cleaner, more resilient energy system.

The power sector is witnessing a strong shift toward **renewable energy**, with India targeting **500 GW of non-fossil fuel capacity by 2030**. While **coal continues to dominate** electricity generation, contributing nearly **50% of total power output**, the government is focusing on cleaner and more efficient coal-based technologies. Meanwhile, **solar and wind power** are expanding rapidly, backed by policy incentives and private sector investments. The growing adoption of **energy storage solutions, smart grids, and digital infrastructure** is further strengthening the power sector, ensuring grid stability amid rising renewable energy integration.

Generation capacity by sources (thermal / renewable / hydro / others)

India's electricity generation capacity is built on a diverse mix of energy sources, structured to balance energy security, affordability, and environmental sustainability. Thermal power, primarily coal-based, has historically dominated the installed capacity due to its reliability in providing continuous baseload power. Natural gas and lignite contribute smaller portions within the thermal category. Over time, the country has significantly expanded its non-fossil fuel capacity, particularly in the renewable energy space, driven by supportive policy frameworks, technological advances, and international climate commitments.

Renewables, including solar, wind, small hydro, and biomass, now form a key pillar of India's installed capacity strategy,

with solar and wind showing strong year-on-year growth. Large hydroelectric projects, while technically renewable, are often tracked separately and continue to play a critical role in peak power and grid balancing. Other sources like nuclear energy provide clean baseload power, though their share remains modest due to long development timelines and regulatory complexities. Overall, India's capacity mix is shifting steadily toward cleaner sources, with a growing emphasis on grid flexibility, energy storage, and hybrid systems to support the integration of variable renewable energy.

Thermal power continues to dominate the energy landscape, accounting for 52% of the total installed capacity, or 246.94 GW. This includes coal, lignite, gas, and diesel-based generation. Despite growing environmental concerns, thermal power remains the backbone of India's electricity supply due to its ability to provide consistent base-load power and support grid stability, particularly in regions with high demand and limited renewable penetration.

Renewable Energy Sources (RES), comprising solar, wind, biomass, and small hydro, make up 36% of the installed capacity, totalling 172.36 GW. This significant share reflects India's strong commitment to clean energy, driven by ambitious government targets, favourable policy frameworks, and increased private sector participation. Solar and wind energy, in particular, have seen rapid growth due to falling technology costs and large-scale project implementation under national missions.

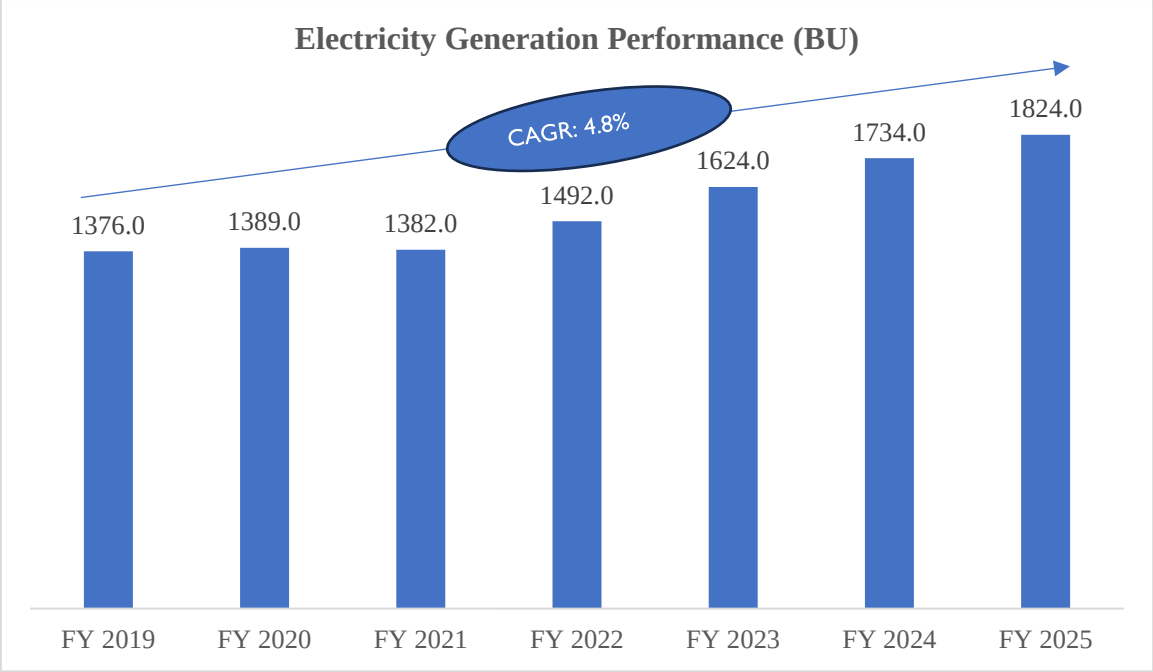

Hydropower contributes 10% of the capacity (47.72 GW), reinforcing its role as a flexible and dispatchable renewable source. Hydropower not only aids in peak load management but also supports grid balancing, especially with the growing share of intermittent renewables like solar and wind. Meanwhile, nuclear energy, with a capacity of 8.18 GW (or 2%), provides a stable, low-emission base-load alternative and continues to play a supporting role in India's clean energy ambitions.

This distribution of capacity in FY 2025 reflects India's multi-pronged approach to energy planning, maintaining reliable conventional generation while accelerating the shift toward greener and more sustainable energy solutions.

Electricity generation scenario in India: current scenario & historical growth trend in generation

India's electricity generation landscape is marked by a diversified energy mix and a strong emphasis on capacity expansion to meet rising demand. The country relies on thermal power primarily coal as its dominant source, but there is a growing shift toward renewable energy, including solar, wind, and hydro power, in line with climate commitments and sustainability goals. The government has implemented numerous policy initiatives to promote clean energy, enhance grid integration, and ensure reliable supply. With a focus on self-reliance and energy security, India is also investing in nuclear power and emerging technologies like green hydrogen and battery storage. The sector is undergoing a transformation with increasing private participation, digitalization of power assets, and enhanced efficiency through modern generation techniques and environmental compliance.

India's electricity generation performance has demonstrated a steady and growth trend over recent fiscal years, reflecting an expanding capacity and increasing demand for electricity. The generation performance, measured in billion units (BU), shows a clear upward trajectory from FY 2019 to FY 2025, with an overall Compound Annual Growth Rate (CAGR) of 4.8%. In FY 2019, the total electricity generation was 1,376 BU. This figure experienced a modest increase to 1,389 BU in FY 2020 and then slightly rose to 1,382 BU in FY 2021. A more significant rise was observed in FY 2022, where generation reached 1,492 BU. The growth continued into FY 2023, with generation reaching 1,624 BU, and the latest data for FY 2025 shows a further increase to 1,824 BU.

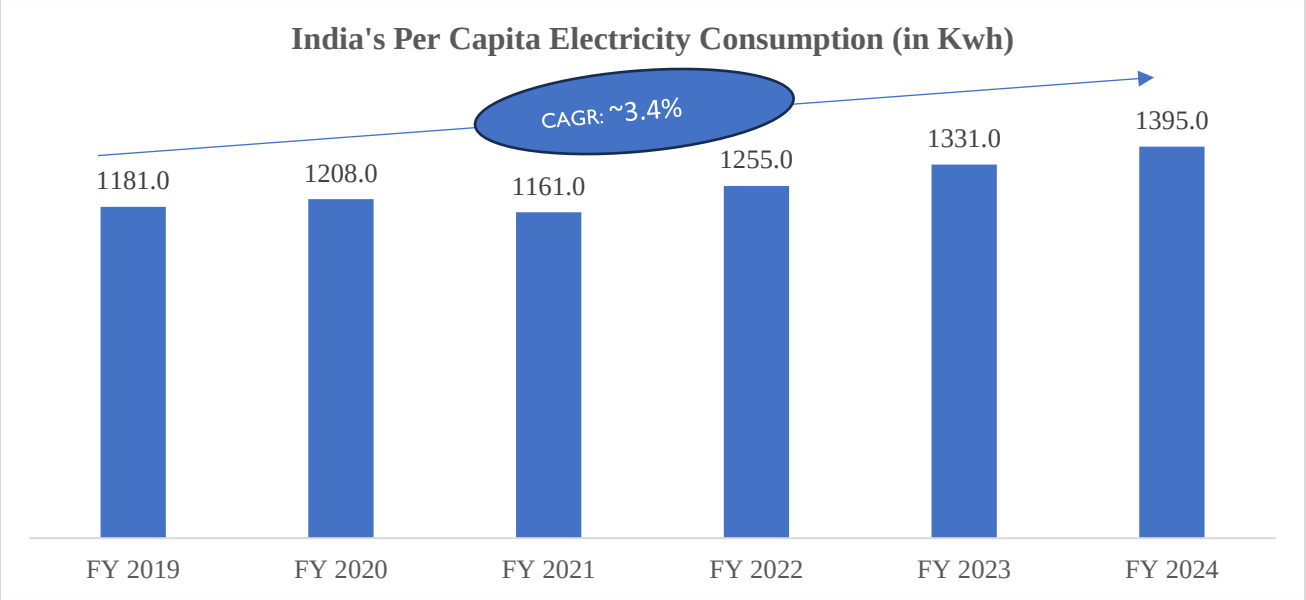

Source: Ministry of Power

This projection suggests a sustained growth in electricity generation, driven by increasing energy needs and expanding generation capacities. The CAGR of 4.8% highlights a robust and consistent growth rate in electricity generation. This growth can be attributed to various factors, including improvements in power generation infrastructure, higher utilization of existing capacity, and the addition of new generation projects. It also reflects the country's ongoing efforts to meet the rising electricity demand driven by population growth, urbanization, and economic development.

The steady increase in electricity generation performance underscores the effectiveness of India's energy policies and investment in the power sector. As the generation figures rise, they also indicate a positive impact on the country's energy security and economic development. Continued investments in both conventional and renewable energy sources are likely to support this growth trend and further enhance the electricity generation capacity. The electricity generation performance reveals a strong and positive trend, reflecting India's expanding power sector and its ability to meet growing electricity demand. The consistent growth in generation capacity is indicative of a well-functioning energy sector poised to support the country's future development needs.

Tracking the per capita electricity consumption growth in India

India's per capita electricity consumption has been steadily increasing over the years, reflecting its rapid industrialization, urbanization, and efforts to electrify rural areas. Despite this growth, India's consumption remains lower than the global average, reflecting the vast population and ongoing energy access challenges. Electricity consumption growth in India includes extensive rural electrification efforts through initiatives such as Saubhagya and the Deen Dayal Upadhyaya Gram Jyoti Yojana, which have provided electricity access to millions of rural households. Additionally, the expansion of industries, particularly in manufacturing, cement, steel, and textiles, has significantly fuelled industrial demand. India's per capita electricity consumption remains considerably lower than that of many developed nations, largely due to its vast population and diverse socio-economic conditions.

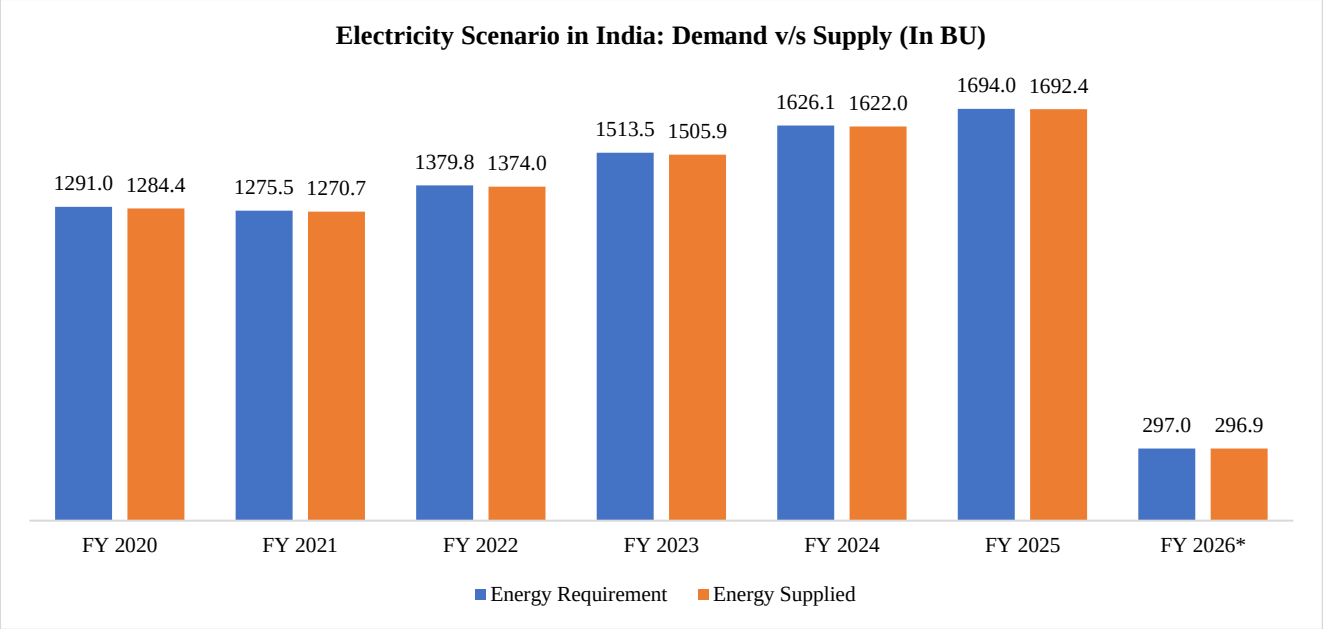

Source: Central Electricity Authority

India has demonstrated a notable upward trend in per capita electricity consumption over recent fiscal years, reflecting a broader expansion in energy use among its population. The per capita consumption, measured in kilowatt-hours kWh, exhibited a consistent increase from FY 2019 to FY 2024, with an overall CAGR of approx. 3.4%. This growth trajectory signifies an ongoing rise in electricity demand, likely driven by economic development, increased industrial activity, and improving access to electricity across various regions.

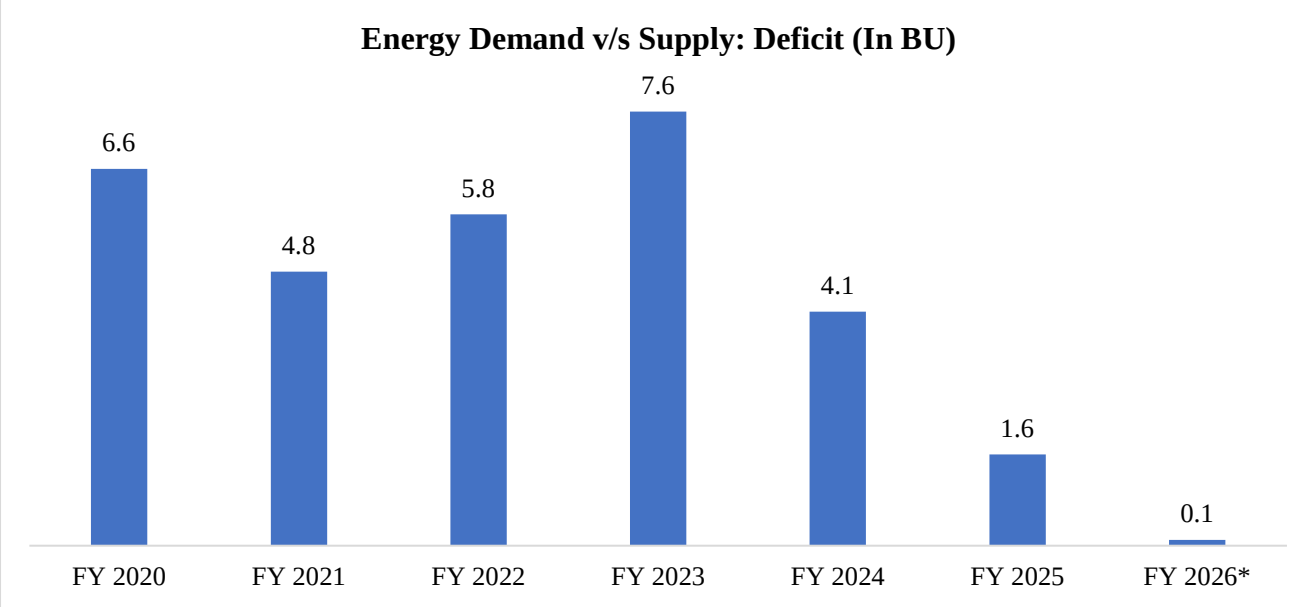

In FY 2019, the per capita consumption stood at 1,181 kWh. This figure saw a modest increase to 1,208 kWh in FY 2020. Despite a slight dip to 1,161 kWh in FY 2021, the consumption rebounded to 1,255 kWh in FY 2022. This upward trend continued into FY 2023, with per capita consumption reaching 1,331 kWh. The latest data for FY 2024 indicates a further rise to 1,395 kWh. This steady increase in per capita consumption underscores India's expanding energy needs. The CAGR of 3.4% suggests a sustained growth in electricity consumption, which can be attributed to several factors.

Electricity demand v/s supply scenario in India

India’s electricity demand has grown steadily over recent years, reflecting increased industrial activity, urbanization, and rural electrification. Between FY 2020 and FY 2025, the total energy requirement rose from 1,291 BU to 1,694 BU, registering a Compound Annual Growth Rate (CAGR) of 5.6%. This consistent rise highlights the expanding energy needs of the country’s growing economy. In parallel, electricity supply has kept pace, improving significantly in both volume and reliability. For instance, while the supply in FY 2020 was 1,284.4 BU, it increased to 1,692.4 BU by FY 2025, resulting in a sharp decline in the power deficit from 6.6 BU to just 1.6 BU over the same period.

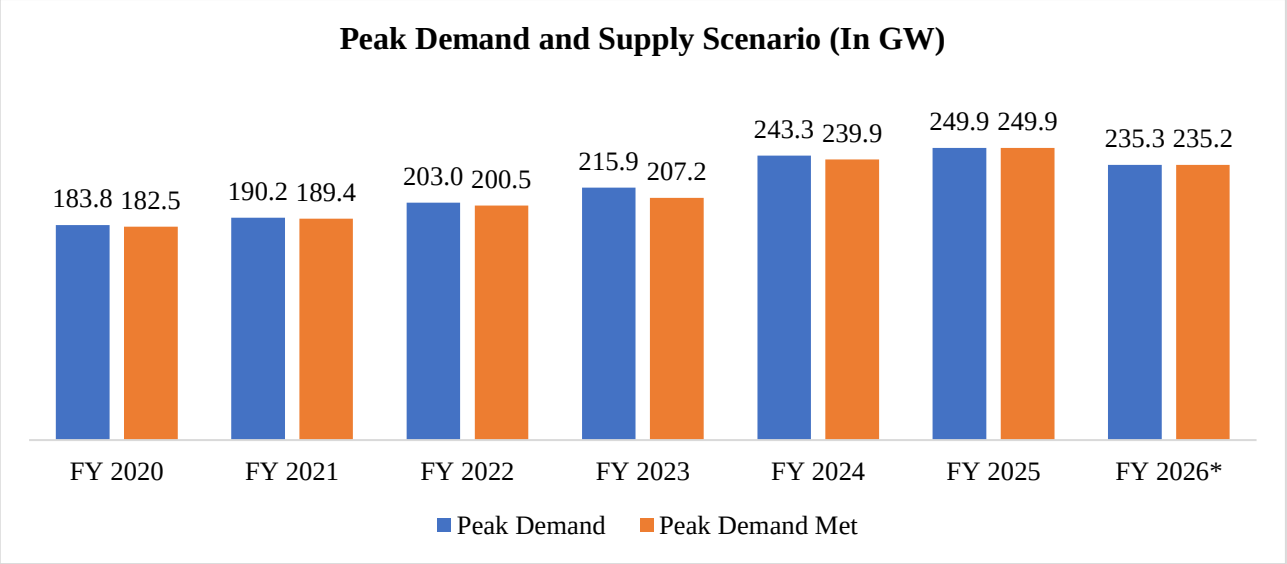

Source: Central Electricity Authority, Ministry of Power

Source: Central Electricity Authority, Ministry of Power
**Note: For FY 2026, the figures are up to May 2025*

The narrowing gap between demand and supply over these years indicates improvements in generation capacity, grid infrastructure, and operational efficiency. Even as demand surged year after year, the shortfall remained marginal and continued to shrink. Notably, in **FY 2026 (up to May)**, the deficit stood at just **0.1 BU**, pointing to a near-balanced power scenario. This performance underscores India's progress toward achieving energy adequacy, ensuring uninterrupted supply, and reducing regional and seasonal shortages. It reflects the success of sustained investments in power generation, particularly in renewables, along with better demand forecasting and grid management.

India's peak electricity demand has seen a steady upward trajectory in recent years, driven by rising consumption across residential, industrial, and commercial sectors. From 183.8 GW in FY 2020, the country's peak demand increased to 249.9 GW in FY 2025, reflecting a Compound Annual Growth Rate (CAGR) of 6.3% over the five-year period. This robust growth mirrors the country's broader economic expansion, increased electrification, and higher appliance and cooling loads, especially during summer months.

Source: Central Electricity Authority, Ministry of Power
**Note: For FY 2026, the figures are up to May 2025*

Alongside rising demand, the country has significantly improved its ability to meet peak load requirements. While in earlier years there were minor gaps, such as a shortfall of 1.3 GW in FY 2020 and 8.7 GW in FY 2023, India achieved full demand met in FY 2025, with supply matching peak demand at 249.9 GW. This milestone highlights improvements in power system reliability, better grid resilience, and enhanced coordination between generation and transmission infrastructure.

For FY 2026, provisional figures up to May 2025 indicate a peak demand of 235.3 GW, with a marginal shortfall of 0.1 GW. While these values may increase as the year progresses, especially during peak summer, early data suggests continued strength in India's ability to handle peak load situations. Overall, the trend points to a power sector that is becoming more responsive and resilient, capable of keeping pace with rising demand while maintaining grid stability and supply adequacy.

Regulatory Scenario

The Central Electricity Regulatory Commission (CERC) and the State Electricity Regulatory Commission (SERC) are the two main regulatory bodies governing the power sector.

FDI Policy

India's Foreign Direct Investment (FDI) policy in the power sector continues to permit 100% FDI under the automatic route for projects involving power generation (excluding atomic energy), transmission, distribution, and trading. Specifically, in the renewable energy sector, this policy has attracted substantial investments, with the sector receiving $6.1 billion in FDI equity between April 2020 and September 2023. Regarding power exchanges, the Government of India allows foreign investment up to 49% under the automatic route, subject to certain conditions, as per the existing policy framework. While the core FDI policy in the power sector has remained consistent, there have been significant developments in related areas. Notably, in February 2025, India proposed amendments to its nuclear liability laws to encourage private and foreign investment in the nuclear energy sector. These changes aim to facilitate the development of nuclear power projects by addressing previous constraints related to stringent liability provisions.

The Electricity (Amendment) Bill, 2021:

The latest Bill pertaining to electricity has been the Electricity (Amendment) Bill, 2021 which was introduced in the monsoon session of 2021. The Central Government's vision to make available "power for all" has helped in fastening of power generation, having more focus on renewable energy, which as of date is having an installed capacity of approximately 160 GW and has a target to increase the renewables capacity to 500 GW by 2030 and reducing cumulative emissions by one billion tonnes by 2030. Some of the major affairs discussed in the Bill are de – licensing of distribution of electricity so that the consumers on their own have the option to choose a distribution company in their area, reducing the power costs by way of indigenization, particularly for industrial and manufacturers consumers amongst others.

UDAY 2.0 Scheme:

The Indian Government launched 'UDAY 2.0' scheme under the Union Budget 2020-21.

The key objectives of the scheme being:

- Ensuring short term accessibility of Coal
- Getting smart prepaid meters installed in majority of the households
- Regular and prompt payments by DISCOMs
- Regenerating gas-based plants.

Liquidity Infusion Scheme

The Government of India announced the Liquidity Infusion Scheme on May 13, 2020 as part of the 'Aatmnirbhar Bharat Abhiyan'. This scheme was launched to support the power distribution companies owing to the fact that amidst the lockdown imposed nationwide, people were unable to pay their respective electricity bills as a consequence of which the revenues of these power distribution companies took a dip. As of Mar 2021, total loans of worth INR 1.35 Lakh Crore have been sanctioned to several DISCOMS and As of December 2021, INR 1,03,387 Crore have been disbursed to several power distribution utilities or DISCOMs functioning in the country.

Scheme for Central Financial Assistance

The Union Cabinet, in its meeting on August 28, 2024, approved a scheme to provide Central Financial Assistance (CFA) for equity participation by State Governments in the North Eastern Region (NER) for the development of Hydro Electric Projects (HEPs). Under this initiative, the State Government's equity share—capped at 24% of the total project equity, will receive financial support, with a maximum limit of ₹750 crore per project. The scheme, aimed at boosting hydroelectric capacity in the region, will be implemented from FY 2024-25 to FY 2031-32, with a total financial outlay of ₹4,136 crore.

Tariff Regulation 2024

In 2024, the Central Electricity Regulatory Commission (CERC) introduced revised tariff regulations, effective from April 1, 2024, to March 31, 2029, aimed at enhancing transparency, investment, and economic efficiency in India's power sector. The updated framework establishes clear guidelines for tariff determination for central sector generating companies and inter-state transmission licensees. One of the key changes is the revision of the Return on Equity (RoE), with hydroelectric projects now receiving an RoE of 16.5%, while new hydro projects with pondage units are eligible for an additional 0.5%, bringing their total RoE to 17%. Meanwhile, new transmission assets have a slightly lower RoE of 15%. The depreciation period for new projects has been set at 15 years, enabling faster cost recovery and improving cash flows for developers. Interest on loans will now be determined based on the company's overall financial standing, promoting sound financial management. Additionally, detailed norms for Operation and Maintenance (O&M) expenses have been introduced to encourage efficiency and cost optimization. These regulatory adjustments are designed to strike a balance between consumer interests and industry profitability, ensuring a more sustainable, competitive, and economically efficient electricity sector in India.

Demand landscape:

India's electricity demand has grown steadily over the last decade, driven by industrial expansion, rapid urbanization, and rural electrification. As the country advances on its developmental path, energy-intensive sectors and rising per capita consumption are creating sustained pressure on the power value chain from generation to last-mile distribution. Concurrently, agricultural mechanization and the growing penetration of irrigation systems are increasing power consumption in rural areas.

The government's proactive policy push through electrification schemes, infrastructure-focused programs like the National Infrastructure Pipeline (NIP), and support for renewable energy integration is further catalysing the need for robust power infrastructure. Additionally, rising household incomes, proliferation of electric appliances, and the digitalization of services are driving per capita electricity consumption higher. Together, these factors are generating strong and sustained demand across the electricity value chain from generation and transmission to last-mile distribution offering significant growth opportunities for EPC players engaged in developing and upgrading power infrastructure across the country.

Growth in Economic Activity & Industrialization: India's power demand is being significantly propelled by sustained economic growth and industrial expansion. In FY 2025, India's real GDP grew by 6.5% while nominal GDP rose by 9.8%, supported by robust sectors like construction and manufacturing. The construction sector alone grew around 9.4%, reflecting heightened infrastructure activity that drives demand for reliable electricity.
Meanwhile, the Central Electricity Authority's 20th Electric Power Survey forecasts India's peak demand to reach approximately 366 GW by FY 2031 32, and energy requirement to grow to about 2,473 BU a significant increase from nearly 1,852 BU projected for FY 2026 27. These projections underscore accelerating demand from industrial corridors, manufacturing zones, commercial complexes, and urban agglomerations. The policy emphasis on infrastructure and industrialization such as the development of industrial clusters, economic zones, and capacity expansion in manufacturing further amplifies electricity requirements.

Agricultural Power Demand: India's power demand is significantly influenced by its agrarian economy, where irrigation pump sets and rural mechanization contribute heavily to electricity consumption, thereby creating targeted opportunities for EPC firms in rural power systems and solar infrastructure. According to the Central Electricity Authority, agriculture accounted for approximately 16.9% of total electricity consumption in FY 2022-23. To reduce diesel dependency, enhance water and energy security and supplement farmers' income, the government rolled out the PM-KUSUM scheme under the Ministry of New & Renewable Energy.

Approved in March 2019 and extended to March 2026, this flagship program aims to deploy 34,800 MW of solar capacity across three components: decentralized solar plants (Component A), standalone solar pumps (Component B), and grid-connected pump solarization (Component C). These electrification and solarization efforts are expanding decentralized energy access in rural areas, while simultaneously boosting EPC demand particularly for off-grid solar projects, rural substations, and feeder-level distribution upgrades integrated with agricultural electrification.

Urbanization and Population Growth Driving Electricity Demand: Rapid urbanization and demographic growth are significantly elevating electricity demand in India's urban and peri-urban regions. According to the Government of India's Handbook of Urban Statistics , With India's urban population projected to reach 600 million by 2036 (≈40% of the total population), cities are becoming epicentres of electricity consumption. These urban centres expected to contribute nearly 75% of India's GDP are placing increasing demands on power distribution networks, substations, and monitoring systems, necessitating large-scale infrastructure upgrades.
Urban growth is intensifying electricity consumption across residential complexes, commercial centres, transportation nodes, and civic amenities. To meet this surge in demand, government programs such as the Smart Cities Mission and urban electrification policies are scaling investments into advanced power infrastructure such as underground cabling, automated substations, real-time monitoring systems, and SCADA networks creating a steady demand pipeline for EPC projects in urban power modernization.

Government Electrification Initiatives and Flagship Policies: India's mission to ensure 24×7 electricity access for all is built on a series of sequential electrification programs. These flagship government schemes have progressively expanded the reach and quality of power infrastructure across rural and urban India:

- Deendayal Upadhyaya Gram Jyoti Yojana (DDUGJY) – Launched prior to 2017, this scheme focused on rural electrification through the strengthening of sub-transmission and distribution infrastructure. Over 18,374 villages were electrified under this program.

- Saubhagya (Pradhan Mantri Sahaj Bijli Har Ghar Yojana) – Introduced in 2017, it targeted household-level electrification. By March 2022, it enabled power connections to over 2.86 crore rural and urban households, delivering last-mile grid connectivity and meter installations.

- Revamped Distribution Sector Scheme (RDSS) – Approved in 2021, this ongoing program has a total outlay of INR 3.03 lakh crore, including INR 97,631 crore in budgetary support. RDSS focuses on smart metering, feeder separation, distribution network strengthening, and grid reliability improvements continuing the electrification momentum while addressing AT&C losses.

This phased and layered approach to electrification has not only expanded power access but also created sustained opportunities for EPC players across grid extension, substation development, and smart metering rollouts.

Growth in Renewable Energy Capacity: India has reached a major milestone in its clean energy transition, with non-fossil fuel sources now accounting for over 50% of the country's total installed electricity capacity a target achieved five years ahead of the 2030 deadline, as confirmed by the Government of India in July 2025. As of June 30, 2025, total installed capacity stood at 484.82 GW, of which 242.78 GW (50.08%) came from non-fossil sources, including renewables (184.62

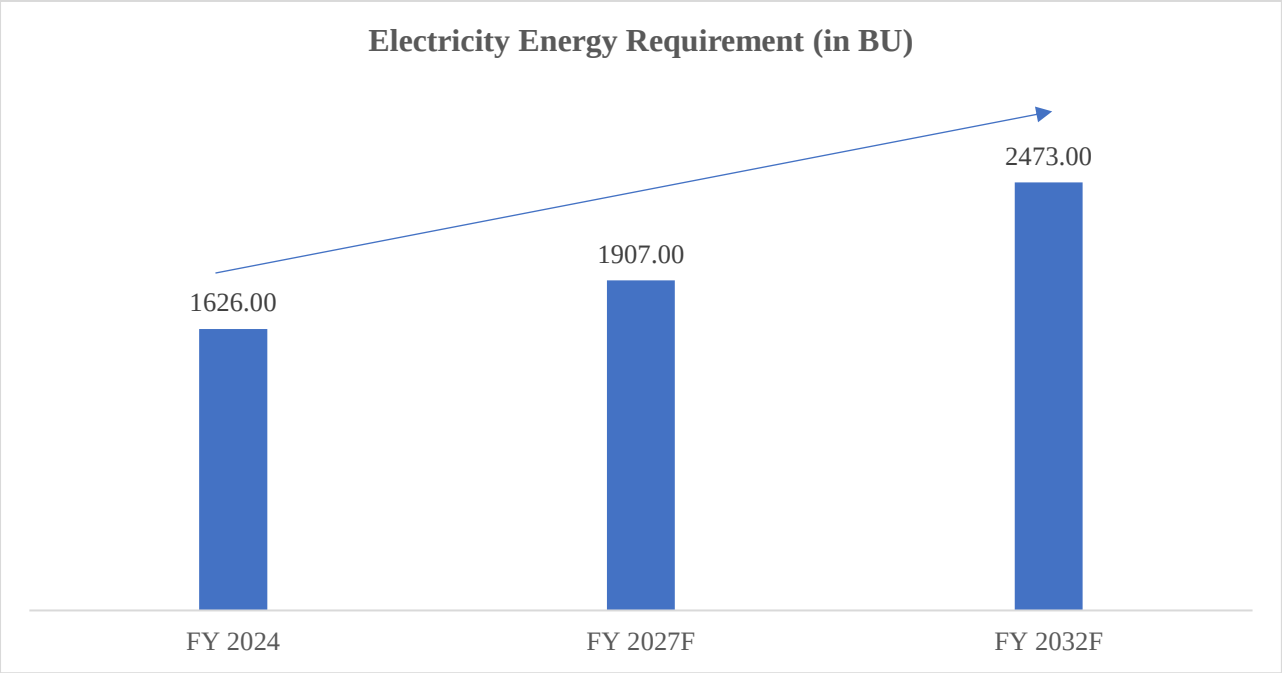

GW), large hydro (49.38 GW) and nuclear (8.78 GW). This landmark achievement underscores the impact of flagship programs such as PM-KUSUM, solar parks, and the National Wind-Solar Hybrid Policy, which have driven exponential growth in solar, wind, and bioenergy segments.

During FY 2025 alone, India added a record 29.52 GW of renewable energy capacity, led by solar (23.83 GW) and wind (4.15 GW). The clean energy project pipeline remains robust, with 169.40 GW under implementation and 65.06 GW tendered, including hybrid, RTC, and peaking projects. These developments are generating sustained EPC demand across generation, transmission, and storage infrastructure as India moves confidently toward its 500 GW non-fossil target for 2030.

Growth Forecast

Expected growth in electricity demand in India

India has been experiencing a significant and steady increase in the demand for power and electricity, driven by rapid urban development, industrial growth, and the increasing use of electricity across sectors such as transport, housing, and manufacturing. Government-led initiatives promoting household electrification, electric mobility, and renewable energy integration are further accelerating this demand. Schemes supporting rooftop solar adoption and clean energy use are contributing to greater consumption at the grassroots level, while emerging areas like green hydrogen are beginning to shape future electricity needs. This rising demand reflects a broader transformation in India's energy consumption patterns as the country modernizes and urbanizes.

Sources: CEA, (Electric Power Survey, 2022)

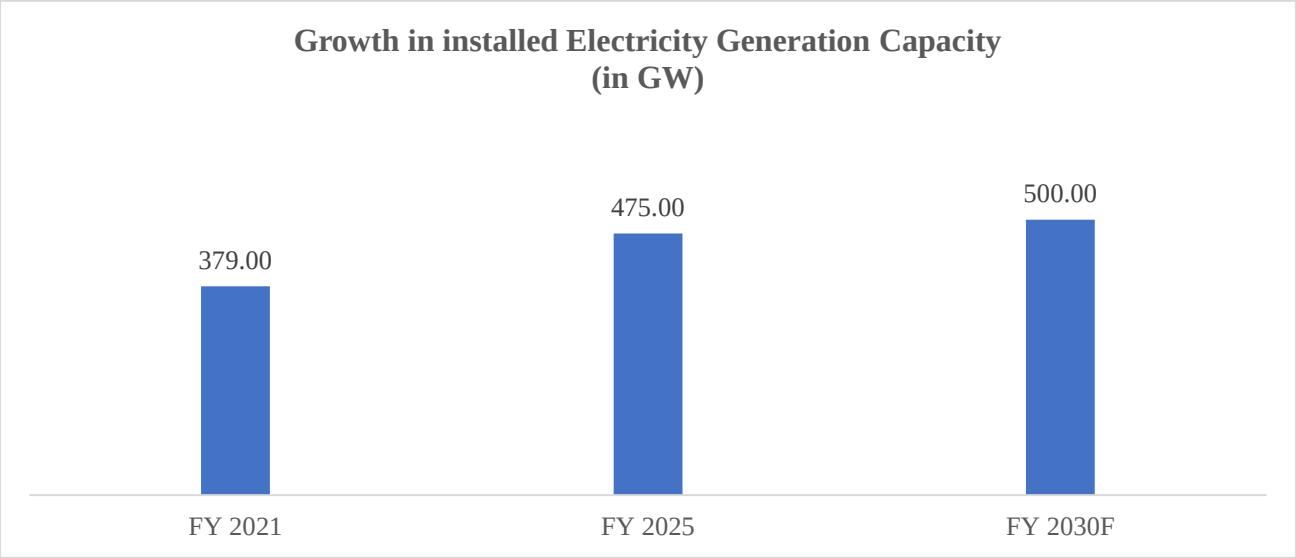

The graph highlights a steadily increasing trend in India's electricity energy requirement, indicating the country's growing power needs over the next decade. Starting from 1,626 Billion Units (BU) in FY 2024, the requirement is projected to rise to 1,907 BU by FY 2027 and further to 2,473 BU by FY 2032. This progression reflects the rising demand driven by factors such as industrial growth, urbanization, increased household electrification, and the uptake of new electricity-intensive sectors like electric mobility and green hydrogen. Over this period, the CAGR from FY 2024 to FY 2032 is ~ 5.4%, signifying a healthy and sustained pace of growth in energy consumption.

Expected growth in installed electricity generation capacity in India

India's installed electricity generation capacity is expected to grow steadily in the coming years, driven by rising power demand, electrification of rural and urban sectors, and the country's commitment to energy security and economic development. The government's focus on '24x7 Power for All' and the expansion of industries, transport electrification, and digital infrastructure are pushing utilities and private players to ramp up capacity addition across conventional and

renewable sources. The Central Electricity Authority (CEA), through its National Electricity Plan (NEP), outlines an integrated roadmap that balances coal-based generation while accelerating renewable energy, particularly solar and wind.

Renewable energy is poised to play a central role in India's future capacity additions, supported by favorable policies, international partnerships, and technological advancements. Solar parks, green hydrogen initiatives, and offshore wind developments are expected to supplement traditional capacity sources like coal and hydropower. Grid modernization, flexible generation technologies, and robust inter-state transmission networks are being developed in tandem. Overall, India's strategy involves not just adding more gigawatts but building a cleaner, smarter, and more resilient power generation infrastructure to meet long-term national goals.

Source: Central Electricity Authority, Ministry of Power

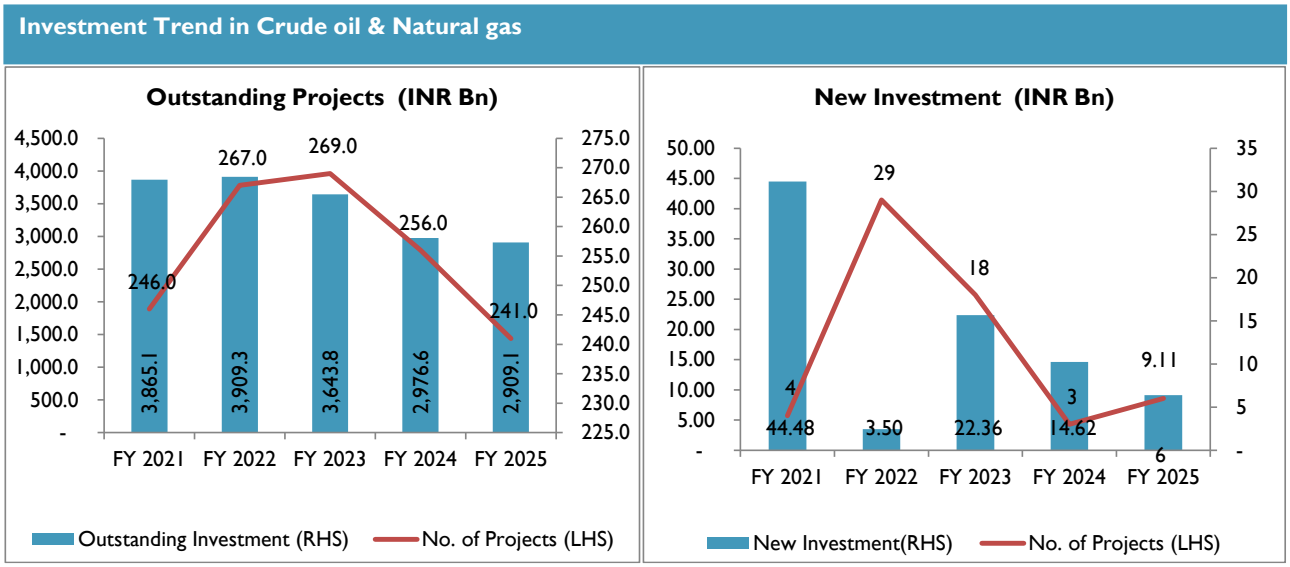

The graph illustrates the projected growth in India's installed electricity generation capacity from FY 2021 to FY 2030. In FY 2021, the installed capacity stood at approximately 379 GW, and is expected to increase significantly to 475 GW by FY 2025. This sharp increase reflects India's push to meet the rising electricity demand driven by expanding industrial activity, urbanization, and household electrification. The period up to FY 2025 is characterized by rapid additions, primarily fuelled by renewable energy expansion, especially in solar and wind segments, as part of India's clean energy transition.

From FY 2025 to FY 2030, the growth trajectory shows a relatively moderate rise, with capacity projected to reach 500 GW. This signals a maturing phase where the focus is likely to shift toward enhancing efficiency, grid stability, and renewable integration rather than merely adding capacity. The slower pace could also reflect the stabilization of base demand growth and a more strategic deployment of flexible generation and energy storage systems. Overall, the graph captures India's dual strategy of meeting demand while transitioning toward a more sustainable and resilient power system.

Capacity Expansion

Crude Oil & Natural Gas Infrastructure.

India is making significant strides in developing its oil and gas pipeline infrastructure. GAIL (India) Ltd. is set to invest ₹844 crore to expand the capacity of its Dahej-Uran-Dabhol-Panvel (DUPL-DPPL) gas pipeline network. The upgrade will increase the pipeline's capacity from 19.9 million standard cubic metres per day (MMSCMD) to 22.5 MMSCMD over the next three years, aiming to meet growing energy demand.

The investment trends in India's crude oil and natural gas sector from FY 2021 to FY 2025 reveal a significant downturn in both ongoing and new project investments. The data indicates a consistent decline in outstanding projects, with their total value falling from INR 3,865.1 Bn in FY 2021 to INR 2,909.1 Bn in FY 2025. The number of outstanding projects also dropped, peaking at 269 in FY 2023 before sharply decreasing to 241 in FY 2025. New investments in the sector have exhibited a volatile pattern. In FY 2022 there was a spike in the number of new projects, with 29 initiatives, the investment value was notably lower at INR 3.50 Bn. By FY 2025, new investments had plummeted, with 6 project worth INR 9.11 Bn being initiated. Bakrol Oil and Gas Block Expansion Project' is a capex project costing Rs.9.1 billion by Selan Exploration Technology Ltd. The project is intended to extract crude oil & natural gas at Bakrol in Anand, Gujarat.

Capacity Expansion Plans in Refinery Sector

India's refinery sector is witnessing significant expansion to meet rising domestic fuel demand and enhance export capacity. With the government's target of achieving 450 million metric tonnes per annum (MTPA) refining capacity by 2040, major public sector (CPSEs) and private refiners have announced expansion plans, focusing on capacity enhancement, petrochemical integration, and green energy solutions.

Detailed information about an expansion in refining capacity for each refinery is given below:

1. Indian Oil Corporation Limited (IOCL):

    - Panipat Refinery (Haryana): IOCL plans to expand the Panipat refinery's capacity from 15 million metric tonnes per annum (MMTPA) to 25 MMTPA by June 2026.

    - Barauni Refinery (Bihar): The expansion aims to increase capacity from 6 MMTPA to 9 MMTPA, with completion targeted by December 2025.

    - Gujarat Refinery: Plans are underway to expand capacity from 13.7 MMTPA to 18 MMTPA, integrating lube and petrochemical production units, expected to be completed by December 2025.

2. Bharat Petroleum Corporation Limited (BPCL):

    - Bina Refinery (Madhya Pradesh): BPCL is expanding the Bina refinery's capacity from 7.8 MMTPA to 11 MMTPA, primarily to cater to the feed requirements of new petrochemical plants.

    - New Refinery and Petrochemical Complex (Andhra Pradesh): BPCL plans to invest USD 11 billion in a new refinery and petrochemical complex in Andhra Pradesh, featuring a 9 MMTPA refinery integrated with an ethylene cracker unit, aiming for 35% petrochemical intensity.

3. Hindustan Petroleum Corporation Limited (HPCL):

- Visakhapatnam Refinery (Andhra Pradesh): HPCL is enhancing its refining margins by utilizing more Russian oil and upgrading production facilities at the Vizag refinery.

4. Numaligarh Refinery Limited (NRL):

   - Numaligarh Refinery (Assam): NRL plans to expand its refining capacity from 3 MMTPA to 9 MMTPA by March 2027. This includes laying a crude oil pipeline connecting the refinery to Paradip Port in Odisha, expected to be completed by December 2025.

5. Mangalore Refinery and Petrochemicals Limited (MRPL):

   - Mangalore Refinery (Karnataka): MRPL is planning a phased expansion to increase its capacity from 15 MMTPA to 18 MMTPA, with investments in petrochemical production and advanced refining technologies.

6. Chennai Petroleum Corporation Limited (CPCL):

   - Nagapattinam Refinery (Tamil Nadu): CPCL is expanding the Nagapattinam refinery's capacity from 1.0 MMTPA to 9.0 MMTPA, aiming to make it a major refining hub in southern India.

7. Private Sector Initiatives:

   - Reliance Industries Limited (RIL): While not expanding crude refining capacity, RIL is focusing on advanced petrochemicals, biofuels, and hydrogen production, investing in renewable energy-driven refining processes.

   - Nayara Energy (Vadinar Refinery): Nayara Energy is investing in a Petrochemical Expansion Project to diversify its product mix beyond fuels and plans for a Green Hydrogen Initiative to support sustainability goals.

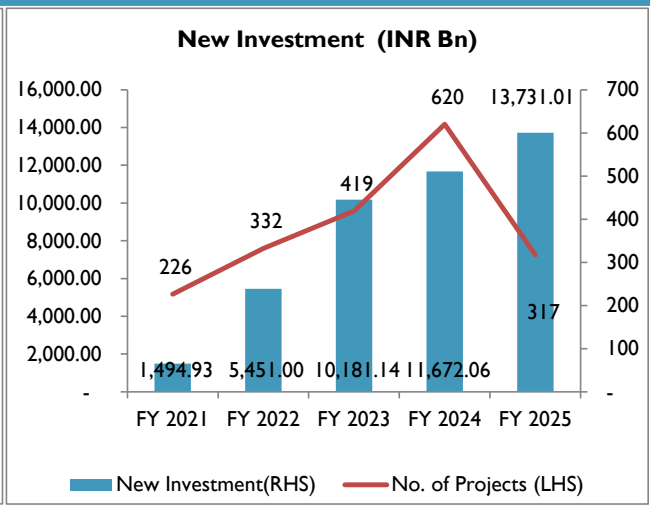

India's refining sector is on a strong growth trajectory, with significant capacity expansions planned by 2027. Public sector refineries, led by IOCL, BPCL, HPCL, and MRPL, are at the forefront of this expansion, increasing their refining capacities to meet the rising domestic demand for petroleum products. Meanwhile, private refiners like Reliance Industries and Nayara Energy are shifting their focus towards high-value petrochemicals, biofuels, and green hydrogen production, rather than expanding crude refining capacity.

The industry is also undergoing a transformation with greater emphasis on green energy, integrating low-carbon technologies, renewable energy solutions, and sustainable refining processes. These developments align with India's broader goal of achieving fuel self-sufficiency, reducing dependence on crude oil imports, and strengthening energy security, positioning the country as a global refining and petrochemical hub in the coming years.

Power Industry

Investment Trend in Power Industry

Source: CMIE Capex

The Indian power sector is witnessing a surge in capital expenditure, driven by the country's growing energy demands and its commitment to sustainable energy solutions. Investments are flowing into various segments, including renewable energy generation, grid modernization, and transmission infrastructure. This capex push is fuelled by government initiatives, private sector participation, and international collaborations, aiming to enhance power generation capacity, improve grid stability, and integrate renewable energy sources.

As on FY 2025, the outstanding investment in the education sector stood at INR 70,820.1billion spread across 2,432 projects while 317 new projects envisaging worth INR 13,731 billion was earmarked announced during FY 2025. These announcements, spearheaded by the Central Government and State governments, underscore a concerted effort to enhance the infrastructure of the power sector.

Competitive Landscape

The Engineering, Procurement, and Construction (EPC) industry in India exhibits a highly fragmented structure, comprising over 180 participants and a wide range of stakeholders. This sector includes a substantial number of small and medium-sized players as well as a few large conglomerates that dominate the construction of complex projects such as roads, power plants, ports, airports, industrial plants, and railways. The competitive dynamics within the EPC industry are primarily shaped by substantial upfront capital investments and stringent technical norms established by contract awarding authorities, which restrict smaller players from entering large-scale projects. Consequently, smaller firms predominantly focus on less complex projects like urban and rural road construction, where entry barriers and investment requirements are relatively lower. This section offers a detailed analysis of the competitive landscape within the Indian EPC sector, emphasizing the key factors influencing competition, the strategic positioning of major players, and the significant entry barriers that new entrants encounter. Understanding these dynamics is crucial for stakeholders to navigate the complexities of the EPC market and identify potential opportunities for growth and collaboration.

Key Factors Shaping Competition in EPC Segment

Market Fragmentation and Player Segmentation: The Indian EPC market is highly fragmented, with a significant number of small and medium-sized players and a few large conglomerates. Large players typically handle high-capital and technically demanding projects, leveraging their extensive experience and financial strength. In contrast, smaller firms focus on less complex projects, such as urban and rural road construction, due to lower entry barriers and investment requirements.

Technological Advancements: Advancements in construction technologies and project management tools are pivotal in shaping competition. Companies investing in cutting-edge technology and innovative construction techniques gain a competitive edge by improving efficiency, reducing costs, and ensuring timely project completion.

Government Policies and Regulations: Government initiatives, such as the National Infrastructure Pipeline (NIP) and various public-private partnership (PPP) models, significantly impact the competitive landscape. These policies create opportunities for EPC players to participate in large-scale infrastructure projects, while regulatory norms ensure adherence to quality and safety standards, thus influencing competitive dynamics.

Financial Strength and Capital Requirements: High upfront capital investments and longer break-even periods are crucial factors. Large players with robust financial backing can undertake extensive projects, whereas smaller firms often face challenges in securing necessary funding. The ability to manage finances effectively and maintain liquidity is a critical competitive factor.

Contract Awarding Criteria: EPC contracts are awarded based on a fine balance of technical capability and cost efficiency. Firms that can demonstrate superior technical expertise while offering competitive pricing are more likely to win contracts. This necessitates continuous improvement in technical skills and cost management strategies.

Sector Focus and Diversification: EPC companies often build their reputations based on sector focus. Some firms specialize in specific sectors like power transmission or urban infrastructure, while others diversify their operations across multiple sectors to mitigate risks and enhance market presence. Diversification strategies help companies to leverage opportunities across various segments, thereby shaping the competitive environment.

Key Entry Barriers

High Capital Investment: Entering the EPC market, particularly for large and complex projects, requires substantial capital investment. This includes costs related to acquiring advanced machinery, hiring skilled labour, and securing raw materials.

High capital requirements deter many small players from entering the market, ensuring that large, well-established firms dominate.

Stringent Technical and Operational Norms: Contract awarding authorities impose rigorous technical and operational standards that companies must meet to qualify for project bids. These include criteria related to past project experience, technical expertise, and financial stability. Meeting these stringent requirements can be challenging for new entrants, thereby acting as a significant entry barrier.

Experience and Reputation: A proven track record and established reputation are crucial in the EPC sector. Clients prefer to engage firms with a history of successfully completed projects, reliable performance, and adherence to timelines. New entrants often struggle to compete with established players who have built strong reputations over time.

Regulatory Compliance: Compliance with numerous regulatory requirements, including environmental regulations, safety standards, and quality certifications, is mandatory for EPC companies. Navigating these regulatory frameworks demands substantial expertise and resources, posing a challenge for new entrants unfamiliar with the complex regulatory environment.

Market Competition and Price Sensitivity: The intense competition within the EPC sector, combined with the price-sensitive nature of contracts, creates a challenging environment for new players. Established companies with efficient cost structures and economies of scale can offer competitive pricing, making it difficult for new entrants to compete on price without compromising on quality or profitability.

Access to Skilled Labor and Technology: The availability of skilled labour and access to advanced construction technologies are critical for success in the EPC industry. New entrants may find it difficult to attract and retain skilled professionals or invest in the latest technologies, further inhibiting their ability to compete effectively.

Established Relationships: Existing players often have long-standing relationships with suppliers, subcontractors, and clients. These connections can provide them with better pricing, preferential treatment, and access to projects, creating a barrier for new entrants trying to establish similar networks.

Brand Reputation: Trust and reliability are crucial in the EPC industry. Established companies benefit from their reputation, which can take years to build. New entrants may struggle to convince clients of their capabilities without a solid track record.

Peer Profile

Pratham EPC Projects Limited

Company Overview

Pratham EPC Projects Limited, headquartered in Ahmedabad, Gujarat, was incorporated in 2014 as an integrated engineering, procurement, construction, and commissioning (EPC) services provider. The company works across oil & gas, city gas distribution (CGD), and water infrastructure sectors. Its activities cover the entire pipeline lifecycle, including designing, laying, welding, hydro testing, commissioning, and post-project maintenance. In 2023, it was converted into a public limited company, and in 2024 it launched its IPO to strengthen operations and expand market reach.

Products & Services

- Pipeline Projects (Gas & Oil): EPC services for gas and oil pipelines including laying, welding, hydro testing, tie-ins, and commissioning.
- City Gas Distribution (CGD): Development of pipeline networks and associated infrastructure for domestic, commercial, and industrial gas supply.
- Water Infrastructure: Design, supply, laying, jointing, and testing of water pipelines, including turnkey projects for water distribution.
- Turnkey EPC Projects: Delivery of end-to-end EPC solutions involving civil, mechanical, electrical, and instrumentation works.

- Operations & Maintenance (O&M): Post-commissioning services for pipelines and related infrastructure.

Key Strengths

- Pipeline Infrastructure Expertise: Experience in executing oil, gas, and water pipeline projects from construction to maintenance.

- Integrated EPC Capabilities: Ability to manage engineering, procurement, construction, and commissioning across multiple disciplines.

- Client Relationships & Project Execution: Track record of executing projects for established players in oil & gas, CGD, and water sectors.

- Strategic Growth & Public Listing: Conversion into a public limited company and IPO launch in 2024 to support operational and financial expansion.

- Sector Diversification: Presence across oil & gas and water infrastructure provides multiple revenue streams and market stability.

Desco Infratech Limited

Desco Infratech Limited was incorporated on January 19, 2011, and is headquartered in Surat, Gujarat. The company operates in the infrastructure and maintenance services sector, with a portfolio spanning city gas distribution (CGD), water infrastructure, power/energy, and renewable energy segments. Its operations cover project execution including pipeline laying, installation, testing, erection, commissioning, and operations & maintenance (O&M) services. Desco has established presence in over 55 cities across 14 Indian states.

Products & Services

- City Gas Distribution (CGD) & PNG Networks: Pipeline laying, installation, testing, leak detection, commissioning, and maintenance (for both underground and above-ground pipelines, including MDPE and carbon steel).

- Power Infrastructure Services: Installation and commissioning of low-tension (LT) / high-tension (HT) power cables, associated infrastructure, and power connectivity works.

- Water Infrastructure & Utilities: Design, supply, laying, and commissioning of water distribution networks, overhead tanks, open wells, and related pipeline works (HDPE, ductile iron pipes).

- Renewable Energy Infrastructure: Foundational works, structural installation, and solar module mounting for solar/clean energy projects.

- O&M & Maintenance Services: Ongoing operations, maintenance, leak testing, pressure testing, and emergency response for energy, gas, and pipeline assets.

Key Strengths

- Broad Sector Diversification: The company operates across gas, water, power, and renewables, reducing dependency on a single vertical.

- End-to-End Capability: It handles the full project life cycle from engineering and installation to commissioning and post-commissioning maintenance.

- Experienced Promoters & Management: Leadership includes promoters with domain experience in gas and infrastructure sectors.

- Track Record in CGD & Pipeline Projects: The company has laid over 4,000 km of MDPE pipelines and delivered more than 200,000 piped natural gas (PNG) connections.

Likhitha Infrastructure Limited

Likhitha Infrastructure Limited, based in Hyderabad, incorporated in 1998,It is a specialized infrastructure firm focused on pipeline and allied gas network works across India. It is engaged in laying, erection, testing, and commissioning of oil and gas pipelines, as well as developing city gas distribution networks, irrigation pipelines, and related civil/structural works. The company operates across multiple states and handles associated services like bridge construction over canals, maintenance of pipeline assets, and repairs.

Product / Service

- Pipeline Laying & Infrastructure Works: Likhitha executes the installation of oil, gas, and irrigation pipelines, handling civil works like trenching, alignment, welding, and backfilling.

- Erection, Testing & Commissioning: After pipeline laying, the company performs structural erection, pressure testing, leak detection, instrumentation, and commissioning for operational readiness.

- City Gas Distribution (CGD) Projects: It builds gas distribution networks in urban/municipal settings, including pipelines, metering stations, distribution nodes, and connections to end consumers (residential, commercial, industrial, transport).

- Operations & Maintenance (O&M) Services: The company provides maintenance, repair, overhauls, shutdown management, and modernization of existing pipeline and gas network assets.

- Irrigation & Canal-related Civil Works: Apart from energy pipelines, Likhitha also undertakes irrigation canal construction and related civil works ncluding bridges over canals and maintenance of such structures.

Strengths

- Specialization in Pipeline & Gas Infrastructure: Likhitha has domain expertise in executing complex pipeline systems including cross-country pipelines, city gas distribution networks, and associated installation and commissioning works.

- Integrated Service Offering: The company handles multiple phases of pipeline projects from laying, erection, testing, commissioning to operations & maintenance. This allows it to bid for projects with end-to-end scope.

- Listed Entity / Financial Transparency: Being a publicly listed company, Likhitha publishes audited annual reports, corporate governance disclosures, and financial statements which supports investor scrutiny.

- Experience & Track Record: Operating since 1998 gives it longevity in the sector.

- Its track record in multiple pipeline projects supports its credentials in bidding and execution.

- Diversification across Project Types: It bids across cross-country pipelines, CGD networks, and operations & maintenance, thereby balancing exposure across related sub-segments.

- Order Execution Capabilities: The company's ability to execute "erection, testing, commissioning" suggests technical and execution strength, which is a required capability for pipeline infrastructure.

Desco Infratech Limited demonstrated the strongest growth momentum over FY 2024 to FY 2026, with total income increasing at a CAGR of approximately 101%, rising from INR 2,949.48 lakh in FY 2024 to INR 11,878.86 lakh in FY 2026. The company also reported substantial growth in profitability, with PAT increasing nearly five-fold to INR 1,634.68 lakh in FY 2026. While PAT margin moderated to 13.78% in FY 2026 from 15.24% in FY 2025, profitability remained healthy and above that of Pratham EPC Projects Limited. EBITDA increased significantly to INR 2,354.10 lakh, reflecting improved scale and operational execution. However, the rapid expansion has resulted in elevated working capital requirements, as reflected in the continued deterioration of operating cash flows, which remained negative at INR (1,903.17) lakh in FY 2026. Despite this, Desco maintains a strong financial position with a low debt-to-equity ratio of 0.22x and a robust current ratio of 5.08x, indicating adequate liquidity and conservative leverage. Return indicators remained strong with RoE and RoCE of 25.21% and 29.73%, respectively, the highest among the peer group in FY 2026. Pratham EPC Projects Limited recorded steady growth in business scale, with total income increasing from INR 7,193.57 lakh in FY 2024 to INR 14,330.34 lakh in FY 2026. However, the company's earnings profile weakened materially during the period. PAT declined to INR 615.52 lakh in FY 2026 from INR 1,370.66 lakh in FY 2025, resulting in a sharp contraction in PAT margin to 4.39%. Similarly, EBITDA margin declined from 20.40% in FY 2024 to 8.14% in FY 2026, indicating significant margin pressure. The company also reported persistent negative operating cash flows, which widened to INR (1,774.62) lakh in FY 2026, suggesting higher working capital absorption during project execution. Leverage increased considerably, with the debt-to-equity ratio rising from 0.07x in FY 2024 to 0.51x in FY 2026, the highest among the peer set. Consequently, return ratios moderated substantially, with RoE and RoCE declining to 7.44% and 7.67%, respectively, reflecting reduced earnings efficiency despite revenue growth.

Likhitha Infrastructure Limited remains the largest company among the selected peers by revenue scale, reporting total income of INR 46,109.34 lakh in FY 2026, significantly higher than both Desco Infratech Limited and Pratham EPC Projects Limited. However, the company experienced a moderation in financial performance during FY 2026, with revenue declining by 12.2% over FY 2025 levels. PAT decreased from INR 6,942.77 lakh in FY 2025 to INR 3,854.91 lakh in FY 2026, while PAT margin declined to 8.44% from 15.47% in FY 2024. EBITDA margin similarly reduced to 12.40% in FY 2026, indicating pressure on operational profitability. Operating cash flows turned negative at INR (479.09) lakh in FY 2026 after remaining positive in the preceding two years. Nevertheless, Likhitha continues to maintain a highly conservative balance sheet with no debt, providing significant financial flexibility. Its liquidity profile remains exceptionally strong, supported by a current ratio of 8.69x, the highest among the peer group. Although RoE and RoCE moderated to 9.82% and 12.68%, respectively, the company continues to benefit from strong capitalization and a debt-free operating model.

Key Challenges & Risks with EPC business in India.

Engineering, procurement, and construction (EPC) procurement is essential for large-scale construction projects, involving the sourcing and management of materials, equipment, human resources, and services. The complexity and global nature of EPC projects introduce numerous risks, including long lead times, global supply chain challenges, and significant financial risks. Effective risk management strategies are crucial for project success.

Long Lead Times:

- Procurement Delays: Poor planning and scheduling in EPC projects can result in significant delays, cost overruns, and resource allocation issues. Unforeseen changes or scope creep can further complicate project timelines. Additionally, the procurement of large, specialized equipment and materials, which often takes months or even years to produce and deliver, can cause substantial delays if not managed properly. These delays in procurement can have a considerable impact on the overall project schedule.

- Impact on Project Schedules: Poor planning and scheduling can lead to delays, cost overruns, and resource allocation issues. Unforeseen changes or scope creep can further complicate project timelines. The extended lead times can disrupt project schedules, leading to cascading delays in subsequent project phases such as construction and commissioning.

- Budget Overruns: EPC projects are susceptible to cost overruns due to inaccurate estimates, fluctuating material prices, and unforeseen expenses. Prolonged procurement timelines can result in increased costs due to inflation, storage costs for early arrivals, and expedited shipping charges for delayed items.

Global Supply Chain Complexities:

- Regulatory Compliance: Managing the supply chain is critical to ensure timely delivery of materials, which affects the overall project schedule. Sourcing materials and equipment globally require navigating a myriad of regulatory frameworks, including import/export regulations, customs duties, and local environmental laws.

- Logistical Challenges: Coordinating the transport of materials across multiple countries involves dealing with various logistical hurdles, including transportation delays, port congestions, and varying standards of infrastructure.

- Cultural and Legal Considerations: Understanding and managing different cultural expectations and legal requirements can complicate supplier relationships and contractual agreements.

Financial Risks:

- Capital Expenditures: EPC projects typically involve large capital outlays, making them highly susceptible to financial risks. Any increase in costs can have a significant impact on the overall project budget.

- Cost Overruns: Unanticipated costs, such as those arising from design changes, scope creep, or unexpected site conditions, can lead to budget overruns.

- Payment Delays: Delays in payments from clients, particularly in public sector projects, can strain the financial resources of EPC firms, impacting their ability to meet ongoing project expenses.

Supplier and Subcontractor Risks:

- Supplier Reliability: The reliability and performance of suppliers are critical. Issues such as poor quality, delayed deliveries, or supplier insolvency can disrupt the project.

- Subcontractor Performance: Managing subcontractors effectively is essential. Poor performance, lack of adherence to schedules, or substandard workmanship can lead to rework and delays.

- Supplier Relationships: Maintaining good relationships with suppliers and subcontractors is crucial for ensuring cooperation and timely delivery.

Project Management and Coordination Risks:

- Coordination Challenges: Multiple teams, including engineers, procurement specialists, and construction crews, often work across various locations, leading to potential miscommunication and misalignment of project goals. EPC projects require meticulous coordination among various stakeholders, including project managers, engineers, suppliers, and contractors. Miscommunication or lack of coordination can lead to errors and delays.

- Resource Management: Efficient management of resources, including labour, equipment, and materials, is essential. Any disruption can impact project timelines and costs.

- Quality Control: Ensuring consistent quality across all phases of an EPC project can be challenging, especially when multiple vendors and subcontractors are involved. Ensuring consistent quality and adherence to standards is critical to avoid rework and penalties. Implementing robust quality control measures is necessary.

External Risks:

- Political and Economic Instability: Political changes or economic instability in the countries involved can affect project approvals, funding, and the availability of materials.

- Natural Disasters: Natural calamities such as floods, earthquakes, and cyclones can disrupt project execution and cause damage to infrastructure and materials.
- Geopolitical Tensions: International trade issues and geopolitical tensions can impact the availability and cost of materials, as well as the smooth flow of goods across borders.

Company Profile

Vectras Enprocon Limited (VEL), established in 2021 as part of the Vectras Group (incorporated in 2015), is a rapidly emerging Engineering, Procurement, and Construction (EPC) company recognized for delivering technologically advanced

and high-quality solutions. With a proven legacy of execution excellence across India, VEL has built a strong reputation for innovation, reliability, and client satisfaction in the Oil & Gas, Energy, Power, and Infrastructure sectors. At the core of VEL's operations is an unwavering commitment to quality, safety, and on-time project execution. The company is backed by global certifications ISO 9001, ISO 14001, ISO 27001, and ISO 45001 that reflect its dedication to excellence, sustainability, data security, and occupational safety. This strong framework ensures every project is delivered to the highest international standards, reinforcing client trust and industry credibility.

Services Offered

- Combined Oil and Gas station works
- Midstream and Downstream pipeline projects and related facilities
- Other allied services
- Civil and infrastructure project in Oil and Gas Industry
- Electrical, Instrumentation and Cathodic protection projects
- Inspection, Testing and Safety Auditing services in Oil and Gas Industry

VEL specializes in robust civil infrastructure works for terminals, combined stations, cross-country pipelines, city gas stations, and associated facilities. With a strong focus on precision engineering and timely delivery, its civil and infrastructure capabilities form the backbone of large-scale EPC projects, ensuring operational reliability and long-term asset performance. This expertise positions VEL as a trusted partner for executing highly complex and mission-critical projects. The company's rapid growth journey reflects its strong execution track record and strategic achievements. Starting with a revenue of INR 3.82 Crores in FY 2021–22, VEL secured major projects in subsequent years, including an INR 45 Crores IOCL CSW project at Vadinar in FY 2022–23 and an INR 120 Crores IOCL CSW order through Zetwerk Manufacturing Businesses Private Limited in FY 2023–24. By FY 2024–25, revenues had grown to INR 80.48 Crores, supported by an order book exceeding INR 206 Crores and a team of over 300 skilled professionals, underlining the company's hyper-growth trajectory and strong booking on hand.

VEL's prestigious client base includes industry leaders and PSUs such as IOCL, HPCL, Gujarat Gas, Central Railway, Reliance, Adani, and others. These partnerships demonstrate the company's technical competence, strong execution capabilities, and ability to consistently deliver projects of national importance with the highest quality and within committed timelines.

Overview

We are Gujarat based Engineering, Procurement and Construction (**"EPC"**) company operating in the Midstream and Downstream segment of Oil & Gas Industry. We are an Oil & Gas infrastructure service provider having presence in multiple states, focused on laying pipeline networks and combined station works along with construction of associated facilities. We provide integrated solutions to the Oil & Gas sector, which includes (i) Combined station works (ii) Midstream and downstream pipeline projects and related facilities, and (iii) Other allied services. Under the leadership of our experienced and first-generation promoters, we have established a strong track record in delivering comprehensive EPC services in Oil & Gas industry such as design, engineering, procurement, construction, testing and commissioning of Oil & Gas stations and cross-country pipelines, spur pipelines, city gas stations and related civil and mechanical works.

Pipelines are essential for transporting Oil & Gas, offering safe, reliable, and cost-effective transport compared to road and rail. They ensure a continuous supply of resources to refineries, industries, and power plants, aiding in uninterrupted production and electricity generation. Pipelines have lower maintenance needs and energy consumption, leading to reduced transportation costs and economic benefits. *(Source: Dun & Bradstreet Report)*

Our Company was incorporated in May 2021 and since inception, we have established ourself as an EPC Company in the midstream and downstream Oil & Gas pipeline network and related infrastructure space. Over the years, we have successfully executed projects for public sector undertakings and private sector companies, contributing to the development of Oil & Gas infrastructure across various states of India. Our Company actively participates in public sector and private sector tenders across India for laying of midstream and downstream Oil & Gas pipelines and setting up Oil & Gas terminals and stations, and have successfully secured orders of more than 45,000 lakhs from such tenders till September 30, 2026.

We have developed execution capabilities in building piping infrastructure in combined station with varying diameters upto 48 inches and laying cross country pipelines of upto 30 inches and we remain focused on further strengthening these capabilities. Since Incorporation, we have completed 521,772 inch dia piping, 1,430.43 inch kilometres pipeline and 4 Combine Station Works. As of September 30, 2026, our Unexecuted Order Book comprises 34 projects amounting to ₹

18,327.88 lakhs, providing strong visibility for future growth.

India is currently the 3rd largest energy and oil consumer in the world, after China and US. India's oil consumption is projected to rise significantly by 50% by 2030, compared to a global demand increase of only 7%. For natural gas, the country's consumption is projected to double from 64 billion cubic meters (BCM) in 2019 to 115 BCM in 2030. *(Source: Dun & Bradstreet Report)*

As of March 31, 2025, the total length of the crude oil pipeline network in India is 10,446 kilometers, boasting a capacity of 153.1 million metric tons per annum (MMTPA). During FY 2024- 25, the utilization of crude oil pipelines stands at 66.5%. Product pipelines, inclusive of LPG, form a comprehensive network spanning 24,130 kilometers with a capacity of 145.8 MMTPA. During FY 2024-25, the utilization of product pipelines reached 71.1%, an increase from 68.9% in FY 2023-24. *(Source: Dun & Bradstreet Report)*

Our Company cater to a diverse client base comprising oil and gas companies including, public sector and private sector companies. Our execution track record, growing revenues, and increasing order inflows highlight our ability to scale and deliver on technically challenging projects. Our revenue increased from ₹ 5,431.89 lakhs in the Financial Year ended March 31, 2024 to ₹ 11,980.20 lakhs in the Financial Year ended March 31, 2026 at a CAGR of 48.51%, while our net profit for the similar period increased from ₹ 581.19 lakhs to ₹ 1,543.27 lakhs at a CAGR of 62.95%. Our EBITDA Margins were 20.04%, 18.70% and 15.96% respectively for the financial year ended March 31, 2026, 2025 and 2024. For the same period, our net profit margins were 12.88%, 12.63% and 10.70%, respectively.

We are committed to adhering to the highest standards of quality, safety, and sustainability. Our operations comply with ISO 9001:2015 (Quality Management), ISO 45001:2018 (Occupational Health & Safety), and ISO 14001:2015 (Environmental Management), ISO 27001:2022 (Information Security Management System) certifications. Our Company has grown significantly during the past, under the leadership and guidance of our promoters, Naynesh Kanubhai Patel and Maheshkumar Gopalbhai Patel, who are having combined experience of more than 30 years of EPC in oil and gas sector. Our company is further supported by dedicated management team. Their vision, combined with our technical capabilities, positions us to capitalize on the growing demand for oil and gas infrastructure in India.

Our Business Verticals:

1. Combined Oil and Gas station works:

We undertake integrated Combined Station work including piping and associated works. Our scope of work in such projects comprises of mechanical, electrical and civil work in Refineries, Petrochemical Complex, Gas Processing Units, Oil & Gas Terminals and Petroleum Depots. These facilities supporting the storage and transportation of Oil & Gas and safe operation of Oil & Gas pipeline networks. These stations are strategically located along cross-country and spur pipelines to facilitate storage, transportation and refining of Oil and Gas. With experience in executing technically complex projects, we deliver integrated infrastructure that ensures compliance with industry standards, safety protocols, and client specifications. As of September 30, 2026, our Unexecuted Order book for Oil & Gas stations work stands at ₹ 11,629.03 lakhs. Our Company is currently executing combined station work for Crude Oil Terminal located at Vadinar, Jamnagar and Mundra, Kutchh. The table below sets forth the revenue from Oil & Gas Terminals and stations work during the six-months period ended September 30, 2026 and financial year ended March 31, 2026, March 31, 2025, March 31, 2024:

Revenue from operations by service type	For the six-months period ended September 30, 2026		For the Financial Year ended March 31, 2026		For the Financial Year ended March 31, 2025		For the Financial Year ended March 31, 2024	
	Amount (₹ in lakhs)	% of revenue from operation	Amount (₹ in lakhs)	% of revenue from operation	Amount (₹ in lakhs)	% of revenue from operation	Amount (₹ in lakhs)	% of revenue from operation

For Combined Station works, our raw materials are pipes and other components, which are primarily sourced based on project requirements and quality standard. Based on the scope of work provided by client, either we procure the raw material from client approved vendors/manufacturers and directly supplied at project site or the client sourced the same material to the project site for our execution. Various materials are used in our business operation which includes Pipes, Valves, Warning Mat, Coating Sleeve, Electrode, Cement, TMT Bars, Sand, Structure Steel and other fittings. This

approach allows us to maintain flexibility in procurement, adhere to project specifications, and ensure consistent quality across all projects.

2. Midstream and Downstream pipeline projects and related facilities –

Oil and Gas Industry primarily operates under following three segments:

- **Upstream Segment:** This segment primarily involves Oil and Gas Exploration including offshore and onshore drilling and production.

- **Midstream Segment:** Midstream companies are responsible for transporting crude oil and natural gas from production sites to refineries or processing plants. Pipelines are the most common mode for long-distance transportation due to their efficiency and cost-effectiveness. Further, Midstream operations include the construction and management of storage facilities such as tanks and terminals.

- **Downstream Segment:** This segment include key activities such as refining crude oil into various products, transporting them to storage and retail outlets, and finally, marketing these products to consumers through diverse channels.

(Source: Dun & Bradstreet Report)

Our Midstream and downstream pipeline services contributing 50.66% of our revenue from operations in financial year ended March 31, 2026. Through our execution capabilities in cross-country pipeline services, we facilitate the movement of crude oil, natural gas, and refined products over long distances, ensuring connectivity in oil & gas terminals, refineries and city gas distribution stations. In the downstream space, we execute distribution pipelines and associated facilities that directly cater to industrial hubs and city gas distribution networks. Our scope of services includes the complete EPC cycle encompassing design, engineering, procurement, construction, testing, and commissioning. Our capabilities to deliver complex projects within agreed timelines with clients gives us a competitive advantage in capturing upcoming opportunities.

As of September 30, 2026, our order book for Oil & Gas Pipeline work stands at ₹ 5,945.72 lakhs. The table below sets forth the revenue from Oil & Gas Pipeline work during the six-months period ended September 30, 2026 and financial year ended March 31, 2026, March 31, 2025, March 31, 2024:

Revenue from operations by service type	For the six-months period ended September 30, 2026		For the Financial Year ended March 31, 2026		For the Financial Year ended March 31, 2025		For the Financial Year ended March 31, 2024

Our company has recently ventured into Pipeline work for Oil and Gas Industry in Midstream and Downstream segment. Previously, our company was engaged in the Combined Station work, which also includes internal piping work. Based on such experience, our company ventured into Midstream and Downstream segment Pipeline work for our client.

3. Other allied services:

Civil and infrastructure project in Oil and Gas Industry:

Apart from the EPC projects, we also provide comprehensive civil infrastructure solutions for the Oil & Gas industry which includes site development, grading, road and pavement construction, foundations, drainage systems, boundary walls, and utility buildings, tailored to meet the requirement of clients. We specialize in delivering civil infrastructure works for terminals, combined stations, cross-country pipelines, city gas stations, and other associated facilities. Our civil and infrastructure capabilities form the backbone of complex EPC projects, ensuring operational reliability and long-term asset performance. In last three financial years, we have completed total 11 projects in relation to civil infrastructure amounting to ₹ 1,377.08 lakhs.

Electrical, Instrumentation:

We provide Electrical, Instrumentation, and Cathodic Protection (CP) solutions for the Oil & Gas sector, ensuring safe, efficient, and reliable operations across oil and gas pipelines & piping, terminals, and station facilities. Our electrical services include power cabling works, while our instrumentation services cover process instruments, security surveillance and monitoring devices, and safety automation. In addition, we execute Cathodic Protection projects to safeguard pipelines and associated infrastructure from corrosion, enhancing asset life and integrity.

Inspection, Testing and Safety Auditing services in Oil and Gas Industry:

We provide Inspection, Testing, and Safety Auditing Services to ensure reliability, compliance, and safe operations in the Oil & Gas industry. Our offerings cover non-destructive testing (NDT), pressure testing and certification of pipelines & piping in Oil and Gas Industry. Through safety audits we evaluate adherence to statutory norms, operational practices, and environmental standards, helping clients mitigate risks and enhance performance.

1. *Total Income means the Total Income as appearing in the Restated Financial Information.*
2. *Revenue from Operations means the Revenue from Operations as appearing in the Restated Financial Information.*
3. *Profit after tax (PAT) means profit after tax for the year as appearing in the Restated Financial Information.*
4. *PAT Margin (%) = PAT / Revenue from Operations.*
5. *Net Operating Cash Flows means Net Cash Inflow / (Outflow) from operating activities as appearing in the Restated Financial Information.*
6. *EBITDA = Restated profit/(Loss) before tax and exceptional items + finance costs + depreciation and amortization expense - other income.*
7. *EBITDA Margin (%) = EBITDA / Revenue from Operations.*
8. *Return on Equity is calculated as profit after tax for the year divided by average total equity.*
9. *Return on Capital Employed (%) is calculated as earning before interest and tax (EBIT) / Average Capital Employed. EBIT is calculated as "Profit before tax + finance cost - other income" and Capital Employed is calculated as "Total Equity + Non-Current Borrowings + Current Borrowing+ Deferred Tax (Asset)/Liability - Intangible Assets".*
10. *Debt to Equity ratio is calculated as Total of non-current borrowings and current borrowings/ Total Equity.*
11. *Current ratio is calculated as total current assets divided total current liabilities excluding short term borrowings.*

Our Strengths:

We have the following competitive strengths:

Track record of timely completion of complex projects

We are Gujarat based Engineering, Procurement and Construction ("**EPC**") company operating in the Midstream and Downstream segment of Oil & Gas Industry. We are an Oil & Gas infrastructure service provider having presence in multiple states in India, focused on laying pipeline networks and combined station works along with construction of associated facilities. We provide integrated solutions to the Oil & Gas sector, which includes (i) Midstream and downstream pipeline projects and related facilities, (ii) Combined station works and (iii) Other allied services.

The table below provides an illustrative list of projects in last three financial years that were completed earlier than the scheduled project completion dates:

Project	Business Vertical	Estimated Date of Completion as per Letter of Award (A)	Actual Date of Completion (B)	Completed earlier than Scheduled (A-B) (in Number of Days)
Public Sector Customer	Combined Oil and Gas station works	September 07, 2023	March 31, 2023	160 Days
Private Sector Customer	Combined Oil and Gas station works	May 31, 2024	March 30, 2024	62 Days

Our track record showcases our ability to capitalize on our design, engineering capabilities and management capabilities, and robust internal systems. Our workforce, complemented by our ability to leverage our experience in executing projects in timely manner provides us with a significant advantage as compared to other players in industry.

Our ability to achieve successful and timely delivery of projects is a result of several factors including standardized processes, immediate mobilisation, efficient allocation of resources improving productivity and pursuit of continuous improvement in project design and execution. In cross country pipeline projects, we maintain our inventory and machineries on strategic location near project sites to ensure better utilisation of resources.

Strong Order Book for existing project portfolio and geography

In the Industry which we operate, order book is the considered an indicator of future performance since it represents a committed portion of anticipated future revenue. As of September 30, 2026, projects awarded by our largest customer contributed 28.74% to our order book. Our Order Book and our Book to Bill ratio, as on six-months ended September 30, 2026 and financial year ended March 31, 2026, March 31, 2025, March 31, 2024, is as below:

Particulars	For the period ended September 30, 2026	For the year ended March 31, 2026	For the year ended March 31, 2025	For the year ended March 31, 2024

Book to Bill Ratio (In Times)	2.55	1.94	1.17	1.91

As of September 30, 2026, our Unexecuted Order Book comprises 34 projects amounting to ₹ 18,327.88 lakhs, providing strong visibility for future growth. The significant growth of our business in terms of our Order Book, in the last three Fiscals, has contributed significantly to our financial strength. Till Financial year 2025, our company has executed its project primarily in the State of Gujarat. However, we have also diversified our geographical portfolio by executing projects in various other states including Maharashtra, Punjab, Bihar and Odisha. Diversifying our skill set and Order Book across different business and geographical regions, enables us to pursue a broader range of project tenders and therefore maximize our business volume and profit margins.

The consistent growth in our Order Book is a result of our past experience, our focus on maintaining quality standards in our project execution skills. Our order book is diversified across business verticals. Oil & Gas Terminal and station construction projects forms the largest part of our order book, followed by Oil & Gas pipe lying projects. The tables below set out details of our Unexecuted Order Book by business verticals for the six months ended September 30, 2026, and for the year ended March 31, 2026, 2025 and 2024:

Strong Execution Capabilities

We have built in-house capabilities through our teams across design, operations, finance, and human resources. These teams work in close collaboration, enabling us to deliver projects with efficiency, quality, and speed. Our senior management, provides strategic direction in assessing opportunities, planning, and executing projects—both ongoing and under bidding. This integrated approach allows us to manage complex projects seamlessly while

maintaining operational ease. As of September 30, 2026, we had more than 900 permanent employees across multiple divisions, forming a strong talent base that supports our growth and long-term scalability.

Our Company is committed to executing each project in line with the scope of work defined in customer contracts while maintaining the quality and standards. While projects from public sector typically come with predefined specifications, a significant portion of our business is derived from private customers, where we work closely with them to align design and execution with their requirements. We maintain an in-house design and operation team that focuses on addressing geographical, technical, and critical project aspects, while highly complex and specialized designs are outsourced to third-party designers to ensure precision and efficiency. At the pre-bid stage, our sales team conducts detailed site visits and shares insights with the design team, enabling realistic and practical project planning. The design team studies customer requirements or tender documents and prepares design options, supported by detailed Bills of Quantities (BoQ). These proposals are then submitted to our tender department for further processing and execution planning.

Track Record of Growth in Financial Performance

Our growth in financial performance in recent years is largely attributable to careful identification of our projects and cost optimization. We try to ensure that our pricing for projects is not only competitive but also reflective of the true value we provide. Before we bid for a project, our tendering department prepares cost estimates for the entire project, including direct costs (such as costs relating to construction materials and equipment), indirect costs (such as employees' salaries) and finance costs (such as insurance and bank guarantee costs). After arriving at the total cost for the project, the entire costing exercise is reviewed by the head of the relevant business vertical, who then discusses and finalizes the final price with top management and key management team. Through this approach, we aim to ensure that our projects are optimally priced and minimize unanticipated cost overruns.

Our business model enables us to drive operational efficiency and strengthen profitability. At the pre-bidding stage, we adopt a structured approach that includes conducting technical surveys, feasibility assessments, and evaluating design parameters along with associated costs. This disciplined process allows us to submit competitive bids and enhances our chances of securing projects. Post-award, our emphasis shifts to maintaining construction quality during execution, which in turn minimizes future maintenance and repair requirements.

On account of efficient utilisation of resources, effective control over operational expenses, low emphasis on fixed assets, our Company has been able to generate RoCE of 48.37% and RoE of 51.39% for the last financial year ended March 31, 2026.

Our company endeavors to build and maintain relationships with customers and stakeholders facilitating smooth communication and collaboration throughout the project lifecycle. Additionally, our tendering team's experience in price analysis allows them to conduct thorough market assessments, ensuring that our pricing strategies are competitive and aligned with industry standards.

Experienced management team with significant industry experience

Our Promoters and senior management team possess significant experience in the Oil & Gas EPC sector. Our Promoters, Naynesh Kanubhai Patel and Maheshkumar Gopalbhai Patel, bring with them over 17 years and 16 years of industry experience respectively, and continue to provide strategic guidance that drives our growth and helps us capture new opportunities. Supporting them is a team of Key Managerial Personnel and senior executives with diverse experience across finance, compliance, project management, and engineering.

The collective knowledge and execution capabilities of our leadership team enable us to effectively assess opportunities, anticipate industry trends, and align our project execution with evolving customer needs. Their combined experience has been instrumental in building our reputation, strengthening customer relationships, and ensuring efficient operations. We aim to continue leveraging the experience and market understanding of our Promoters and senior management to expand our presence in existing markets and strategically target new opportunities.

Business Strategies

Continuing client relationship development:

To drive sustained growth, we remain focused on strengthening long-term client relationships while expanding

our customer base. Our strategy emphasizes consistent delivery, responsiveness to evolving requirements, and a commitment to value-driven solutions. We believe that trust, reliability, and tailored execution form the foundation of enduring partnerships. By leveraging these strengths, we aim to attract new clients, enhance our market presence, and reinforce our position in the pipeline infrastructure and allied services. Our customer-centric approach, is designed to deliver sustainable growth and long-term value creation.

Strengthening project execution capabilities

We have established a reputation for successfully delivering complex projects within defined timelines and quality parameters. Our strategy is to continue strengthening our execution capabilities with a focus on timely delivery, operational efficiency, and client satisfaction. By leveraging our experience project management, and cost-efficient operating base in India, we aim to optimize resources, control overheads, and improve profitability. With a track record of successfully completing various assignments, we believe that consistent focus on performance and execution will remain central to sustaining growth and enhancing margins.

Optimal use of resources

We remain committed to improving operational efficiency through prudent utilization of our resources. Our approach emphasizes disciplined planning, effective management practices, and continuous monitoring of operations to identify and resolve bottlenecks. We intend to further strengthen our systems and processes to ensure better control, streamlined execution, and enhanced productivity. By aligning resources with business priorities, we aim to maximize efficiency, and achieve sustainable value creation.

Business Processes

1. Project Identification & Bidding: We participate in public sector and private tenders as well. We identify our bids through various means including e-mail inquiry, identifying the tenders directly from public sector companies websites, leads generated from our sales and tendering team. We also receive request from the client for bid participation in their upcoming tenders. This initial stage involves identifying and defining the project requirements and objectives. At this stage, we analyse feasibility, study market conditions, and evaluate potential sites. The purpose is to confirm that the project is realistic and aligned with the company's strategic priorities. After completion of all the above activities, our team submits the bid, as per the prescribed mode provided within prescribed timeline. The client typically evaluates the technical bid or Pre-qualification application first, so as to ensure that further bids from only technically qualified bidders should be considered for further processing or financial evaluation.

2. Proposal and Contracting: After identifying the project, a detailed plan is prepared. This proposal sets out the scope of work, estimated budget, timelines, and expected deliverables. Once approved, the contracting stage follows, where agreements are finalized with clients, contractors, and suppliers to clearly establish roles, responsibilities and scope of work. Our contracts are majorly finalized on item rate basis. However, we also take contract on lump-sum basis as per the requirement of client and our feasibility. Under item rate contracts, we are required to quote rates for individual items of work on the basis of a schedule of quantities furnished by our client. Item rate contracts typically contain price variation or escalation clauses that provide for either reimbursement by the client in the event of a variation in the prices of key materials or a formula that splits the contract into pre-defined components for materials, labour and fuel and links the escalation in amounts payable by the client.

3. Design & Engineering: The next step is to translate project requirements into technical designs. This includes architectural layouts, structural frameworks, electrical networks, and other engineering aspects. The goal is to create accurate plans that serve as the foundation for execution. Our design and engineering team applies various tools and industry standards to deliver safe and sustainable solutions. Our in-house designing team prepares the designs according to the scope and requirement of contract awarded. However, in complex and high-value projects, we avail services of third-party designers to ensure precision and efficiency.

4. Procurement Services: Our major raw materials, such as Pipes, Valves, Warning Mat, Coating Sleeve, Electrode, Cement, TMT Bars, Sand, Structure Steel and other fittings, are sourced based on project requirements. In certain projects, the clients supply the materials directly, while in other cases, we procure them from approved and empanelled vendors to ensure quality and timely availability. This approach allows us to maintain flexibility in procurement, adhere to project specifications, and ensure consistent quality across all projects.

5. Construction & Installation: This is the phase where plans are put into action. We ensure quick mobilisation

after receipt of letter of award. We prepare procurement, execution, man-power, plant & machinery planning in advance to ensure completion of the project before its due date and compliance with relevant Health, Safety and Environment regulations. After the mobilization and deployment of resources, we closely monitor all the activities with the scheduled planning and also analyse the gaps in planning and execution, if any and reasoning for such gaps. We also schedule periodic meetings with our clients to discuss the current progress of the project and further planning to be followed in the near future.

6. Quality Assurance & Control: Quality remains a continuous focus throughout execution. Regular checks, inspections, and testing are undertaken to ensure compliance with prescribed standards and regulations. Any issues identified are promptly addressed to uphold the integrity of the project. Materials supplied by our company through third-party accredited vendors are subject to stringent quality checks. We also inform the client before procurement of core material and also test the quality of materials from accredited agencies.

7. Testing & Commissioning: After completion of the entire work as per the scope of work agreed between client and us, we start to prepare for the testing stage of the project. Such phase involves hydro-testing, pneumatic testing and equipment testing. The final step involves verifying readiness for operations. Commissioning ensures that the project meets its performance requirements and is fit for intended use. After final testing and commissioning, the entire projects handed over to client's team for their perusal. Our Defect Liability Period (DLP) remains for generally 12 months for which we are liable to repair and replace any damaged or non-functioning part of the project under our scope of work.

Human Resources

We consider our employees and personnel as one of our most important assets, who are critical to maintaining our competitive position, we also place importance on developing our employees and human resources. Our employees are key contributors to our business success. These employees are employed in various categories and cadres at projects sites, and our registered office. As on September 30, 2026, our Company had 990 permanent employees including our Directors, Key Managerial Personnel who look after our business operations, secretarial and legal compliances and accounting functions and Senior Managerial Personnel, who look after our core operational functions in accordance with their respective designated goals. Following is a department wise employee break-up as on September 30, 2026:

Sr. No.	Department Name	Number of employees

We engage independent contractors through whom we engage contract labour for our project site operations. Such contract laborers provided by the independent contractors, carry our variety of functions at our project sites, such as excavation, loading and unloading of supply material, back filling and levelling. Our employees on a regular basis, typically carry out supervisory functions in relation to the work carried out by the contract laborers, at our project sites.

Sales and Marketing

Our business development is primarily driven through participation in tenders floated by public sector and private sector companies in the Oil and Gas industry. We actively monitor opportunities in the market, evaluate tenders, and prepare competitive bids that leverage our technical expertise, execution track record, and cost-efficient operating model. Given the tender-based nature of the business, our focus remains on strengthening pre-qualification credentials, maintaining strong industry relationships, and ensuring compliance with regulatory and technical requirements. We believe this approach enables us to secure projects on a consistent basis and expand our presence across both public sector and private sector clients.

The following table provides our bid winning ratio for the six-months period ended September 30, 2026 and financial year ended March 31, 2026, 2025 and 2024:

Collaborations, any Performance Guarantee or Assistance in Marketing by the Collaborators

Our Company has not entered into any collaboration, or performance guarantee or assistance for marketing with any Company.

End Users

Our clients primarily include oil refineries, petrochemical complexes, city gas distribution companies, crude oil terminals, and petroleum storage companies. We provide pipeline projects, combined station works, and allied infrastructure services critical to their operations. Serving end users directly enables us to understand their specific requirements and build long-term relationships. This approach helps ensure timely execution, operational reliability, and customer satisfaction. It also strengthens our presence across multiple segments of the Oil and Gas industry.

Export & Export Obligation

Currently, we do not have any outstanding export obligations.

Capacity and Capacity Utilisation

Our company is engaged in the service sector therefore capacity and capacity utilisation data are not applicable to us.

Corporate Social Responsibility

The provisions of sec 135 of the Companies Act, 2013 relating to Corporate Social Responsibility are applicable to us from financial year 2024-25 as net profit of the company exceeded Rs.5 Crore during the financial year ended march 31, 2024. However, we are exempted from constituting a Corporate Social Responsibility Committee in terms of sec 135(9) of the Companies Act as the amount to be spend doesn't exceed Rs. 50 lakh and functions of CSR committee are being discharged by the Board of the Directors of the Company. We have adopted and implemented a CSR policy pursuant to which we carry out CSR activities. In terms of our CSR policy, our CSR expenditure may be towards, amongst others, eradicating hunger, poverty and malnutrition, promoting health care and sanitisation, gender equality and empowerment of women, etc. For Fiscal 2026, our total CSR obligation is ₹ 14.57 lakh, against which we have spent ₹ 11.24 lakh and remaining amount is yet to be spent before the due date. During the six-month period ended September 30, 2026, the Company spent the remaining amount of ₹3.33 lakh towards its CSR obligation for Fiscal 2026. Further, the Company has made a provision of ₹14.08 lakh towards CSR expenditure for Fiscal 2027, which will be incurred within the prescribed due date.

Utilities and Infrastructure

a) Power – For our project operations, power requirements are met through a combination of sources. In certain projects, electricity is supplied directly by the client through their connections, while in other cases, we rely on diesel generator (DG) sets to ensure uninterrupted power supply. This flexible approach allows us to maintain continuous operations, adhere to project timelines, and manage energy requirements efficiently across different project sites.

b) Water – In our business water uses are mainly in hydro-test, construction and human consumption. Water is sourced from client's existing storage facilities and water tankers. This sourcing approach ensures that our operations remain uninterrupted, supports timely project execution, and allows us to meet the specific water requirements of each site efficiently.

c) Transportation – Transportation within our operations is managed through a combination of client support and company-arranged logistics. A significant portion of materials is supplied directly by clients to our designated warehouses, ensuring timely availability and reducing additional handling. For movement of materials from warehouses to project sites, the Company arranges rental commercial vehicles, enabling flexibility and cost efficiency. Additionally, certain materials are procured directly by the Company from nearby vendors, and in such cases, local transportation facilities are utilized to ensure prompt delivery to the working sites. This blended transportation model helps us maintain reliability, optimize resources, and meet project timelines effectively.

Insurance

We maintain insurance policies with independent insurers in respect of Stock, Vehicles and machineries Employees Compensation Insurance and Group Mediclaim Policy. With respect to insurance for our operations, we obtain insurance policy with respect to projects directly awarded to us. While, for the projects sub-contracted to us, the responsibility of the insurance is on principal employer itself. However, our company ensures that the principal employer has obtained sufficient insurance. While we believe that we maintain insurance coverage in adequate amounts consistent with size of our business, however, our insurance policies may not be sufficient to cover our economic loss. See "*Risk Factors— Our insurance coverage may not be adequate to protect us against certain operating hazards and economic losses and this may have a material adverse effect on our business, financial condition and result of operations.*"

It forms various rules and regulations for the regulation of listed entities, transactions of securities, exchange plat forms, securities market and intermediaries thereto. Apart from the SEBI Act, 1992, SCRA 1956, SCRR 1957 and other rules and regulations, listed entities are mainly regulated by SEBI (Issue of Capital and Disclosure Requirements) Regulations, 2018 and SEBI (Listing Obligations and Disclosure Requirement) Regulations, 2015, SEBI (Substantial Acquisition of Shares and Take over) Regulations, 2011 and SEBI (Prohibition of Insider Trading) Regulations, 2015.

TAX RELATED REGULATIONS

Income Tax Act, 2025 and the Income Tax Rules, 2026, as amended by the Finance Act in respective years

The Income Tax Act, 2025 (the "**Income Tax Act**") is applicable to every company, whether domestic or foreign, whose income is taxable under the provisions of the Income Tax Act or rules made thereunder depending upon its "Residential Status" and "Type of Income" involved. The Income Tax Act provides for the taxation of persons resident in India on global income and persons not resident in India on income received, accruing or arising in India or deemed to have been received, accrued or arising in India. Every company required to pay income tax under the Income Tax Act is required to comply with the provisions thereof, including those relating to tax deduction at source, advance tax, minimum alternative tax, etc. With effect from April 01, 2026, the Government enacted the Income-tax Act, 2025, pursuant to which a comprehensive and simplified framework for taxation has been introduced, including streamlined provisions relating to computation of income, classification of income, and compliance requirements.

Goods and Service Tax Act, 2017

The Central Goods and Services Tax Act, 2017isan Act to make a provision for levy and collection of tax on intra-State supply of goods or services or both by the Central Government and for matters connected there with or incidental thereto. In line with CGST Act, each state Governments has enacted State Goods and Service Tax Act for respective states.

Goods and Services Tax (GST) is a comprehensive indirect tax on manufacture, sale and consumption of goods and services throughout India to replace taxes levied by the central and state governments on goods as services. This method allows GST-registered businesses to claim tax credit to the value of GST they paid on purchase of goods or services or both as part of their normal commercial activity. The mechanism provides for two level taxation of interstate and intra state transactions. When the supply of goods or services happens within a state called as intra-state transactions, then both the CGST and SGST will be collected. Where as if the supply of goods or services happens between the states called as inter-state transactions and IGST will be collected. Exports are considered as zero-rated supply and imports are levied the same taxes as domestic goods and services adhering to

the destination-based taxation principle in addition to the Customs Duty which has not been subsumed in the GST.

State Tax on Profession, Trades, Callings and Employment Rules, 1975

The professional tax slabs in India are applicable to those citizens of India who are either involved in any profession or trade. The State Government of each State is empowered with the responsibility of structuring as well as formulating the respective professional tax criteria and is also required to collect funds through professional tax. The professional taxes are charged on the incomes of individuals, profits of business or gains in vocations. The professional tax is charged as per the List II of the Constitution. The professional tax is classified under various tax slabs in India. The tax payable under the State Acts by any person earning a salary or wage shall be deducted by his employer from the salary or wages payable to such person before such salary or wages is paid to him, and such employer shall, irrespective of whether such deduction has been made or not when the salary and wage is paid to such persons, be liable to pay tax on behalf of such person and employer has to obtain the registration from the assessing authority in the prescribed manner.

BUSINESS/ TRADE RELATED LAWS/ REGULATIONS:

Policy for development of Natural Gas Pipe lines and City or Local Natural Gas Distribution Networks (the "Pipeline Policy")

The Pipeline Policy was notified on December 20, 2006. The Pipeline Policy provides that it may be read in conjunction with the provisions of the PNGRB Act and the rules and regulations framed thereunder. The objective of the Pipeline Policy is to facilitate open access for all players to the pipeline network on a non-discriminatory basis and promote competition among entities thereby avoiding any abuse of the dominant position by any entity. The Pipeline Policy applies to non- dedicated pipelines and not to dedicated pipelines. The latter have been defined as pipelines laid to supply gas to specific consumers originating from regulated pipelines provided the same are for their own use and not for resale. No non- dedicated gas pipeline or city or local gas distribution network may be laid, built, operated or expanded without authorization by the PNG Regulatory Board. If a company's pipelines come within the definition of dedicated pipelines, it is required to furnish certain details to the PNG Regulatory Board every six months. In case any such pipeline ceases to be a dedicated pipeline in future, the same may be brought to the notice of the PNG Regulatory Board and will require authorization to be granted by the PNG Regulatory Board under the provisions of the PNGRB Act. The Pipeline Policy envisages constitution of a Gas Advisory Body for giving advice to the Central Government and promotes and develops the gas pipeline.

Accommodation of Public and Industrial Utility Services along and across National Highways- Policy regarding guidelines

The policy regarding Accommodation of Public and Industrial Utility along and across National Highway was introduced for the purpose of laying utilities service along and/or across the Right of Way ("RoW"). Utility Services along the National Highways should be laid in utility corridor located at appropriate location preferably as close to the extreme edge of RoW. The policy provides that the pipelines for utilities shall cross the National Highways only through structures or conduits built specially for this purpose. The utility service shall cross the National highway preferably on a line normal to it or as nearly so as applicable. The casing /conduit pipe should, as minimum, extend from drain to drain in cuts and toe of slope to toe of slopes in the fills and shall be designed in accordance with the provision of Indian Road Congress and executed following the specifications of the Ministry.

LAWS RELATED TO ENVIRONMENTAL LAWS

National Environmental Policy, 2006

The dominant theme of this policy is that while conservation of environmental resources is necessary to secure livelihoods and well-being of all, the most secure basis for conservation is to ensure that people dependent on particular resources obtain better livelihoods from the fact of conservation, than from degradation of the resource.

Environment (Protection) Act, 1986 as amended ("EPA")

The EPA has been enacted for the protection and improvement of the environment. It stipulates that no person carrying on any industry, operation or process shall discharge or emit or permit to be discharged or emitted any environmental pollutant in excess of such standards as may be prescribed. Further, no person shall handle or cause to be handled any hazardous substance except in accordance with such procedure and after complying with such safeguards as may be prescribed. EPA empowers the Central Government to take all measures necessary to protect and improve the environment such as laying down standards for emission or discharge of pollutants, providing for restrictions regarding areas where industries may operate and generally to curb environmental pollution. Pollution control boards have been constituted in all states in India to exercise the powers and perform the functions provided for under these statutes for the purpose of preventing and controlling pollution. Companies are required to obtain consents of the relevant state pollution control boards for emissions and discharge of effluents into the environment.

Water (Prevention and Control of Pollution) Act, 1974 (the "Water Act")

The Water Act provides for one Central Pollution Control Board, as well as state pollution control boards, to be formed to implement its provisions, including enforcement of standards for factories discharging pollutants into water bodies. The Water Act prohibits the use of any stream or well for the disposal of polluting matter, in violation of the standards set down by the State PCB. The Water Act also provides that the consent of the State PCB must be obtained prior to opening of any new outlets or discharges, which are likely to discharge sewage effluent. The Water Act prescribes specific amounts of fine and terms of imprisonment for various contraventions.

Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 (the "Hazardous Waste Rules")

The Hazardous Waste Rules regulate the management, treatment, storage and disposal of hazardous waste. Under the Hazardous Waste Rules, "hazardous waste" inter alia means any waste which by reason of characteristics such as physical, chemical, biological, reactive, toxic, flammable, explosive or corrosive, causes danger or is likely to caused anger to health or environment, whether alone or in contact with other wastes or substances. Every occupier and operator of a facility generating hazardous waste must obtain authorization from the relevant state pollution control board. Further, the occupier, importer or exporter is liable for damages caused to the environment or third party resulting from the improper handling and management and disposal of hazardous waste and must pay any financial penalty that maybe levied by the respective state pollution control board.

The Public Liability Insurance Act, 1991 (the "PLI Act") and the Public Liability Insurance Rules, 1991(the "PLI Rules")

The PLI Act imposes liability on the owner or controller of hazardous substances for any damage arising out of an accident involving such hazardous substances. A list of hazardous substances covered by the legislation has been enumerated by the government by way of a notification. Under the PLI Act, the owner or handler is also required to take out an insurance policy insuring against liability. The PLI Act also provides for the establishment of the Environmental Relief Fund, which shall be utilized towards payment of relief granted under the Public Liability Act. The PLI Rules mandate the employer to contribute a sum equal to the premium paid on the insurance policies towards the Environmental Relief Fund.

LAWS RELATING TO INTELLECTUAL PROPERTY

Trademarks Act, 1999

Under the Trademarks Act, 1999 ("Trademarks Act"), a trademark is a mark capable of being represented graphically and which is capable of distinguishing the goods or services of one person from those of others used in relation to goods and services to indicate a connection in the course of trade between the goods and some person having the right as proprietor to use the mark. A 'mark' may consist of a device, brand, heading, label, ticket, name signature, word, letter, numeral, shape of goods, packaging or combination of colours or any combination thereof.

Designs Act, 2000

The Designs Act, 2000 along with the Design Rules, 2001 ("Design Laws") govern design protection in India. The Design Laws were enacted to protect new or original designs from getting misappropriated. A design can only be registered under one specific class. The registered proprietor of the design shall have a copyright in the design for ten years which is extendable for another five years. The Design Laws permit the proprietor to file a suit for recovery of damage and as well as an injunction in the event of piracy of a registered design.

LAWS RELATED TO EMPLOYMENT OF MANPOWER:

The Employee's Compensation Act, 1923:

The Act provides a legal mandate obligating employer to provide financial support to employees who suffer injury, disability, or death due to workplace accidents or occupational diseases. Accordingly employee compensation policy, also known as workmen's compensation insurance in India has been devised. The policy covers medical expenses and lost wages, ensuring employees and their families receive financial assistance for work-related incidents for employees not covered under Employees State Insurance Act, 1948. The policy can also cover contract workers and temporary employees, ensuring they are not excluded from benefits if a work-related accident occurs.

Employees Provident Fund and Miscellaneous Provisions Act, 1952

Under the Employees' Provident Funds and Miscellaneous Provisions Act, 1952 (EPF Act), compulsory provident fund, family pension fund and deposit linked insurance are payable to employees in factories and other establishments. The legislation provides that an establishment employing more than 20 (twenty) persons, either directly or indirectly, in any capacity whatsoever, is either required to constitute its own provident fund or subscribe to the statutory employee's provident fund. The employer of such establishment is required to make a monthly contribution to the provident fund equivalent to the amount of the employee's contribution to the

provident fund. There is also a requirement to maintain prescribed records and registers and filing of forms with the concerned authorities. The EPF Act also prescribes penalties for avoiding payments required to be made under the abovementioned schemes.

Employees State Insurance Act, 1948, as amended (the "ESIC Act")

The ESI Act, provides for certain benefits to employees in case of sickness, maternity and employment injury. All employees in establishments covered by the ESI Act are required to be insured, with an obligation imposed on the employer to make certain contributions in relation thereto. In addition, the employer is also required to register itself under the ESI Act and maintain prescribed records and registers.

Employees Deposit Linked Insurance Scheme (EDLI)

The Employees Deposit Linked Insurance Scheme or EDLI is an insurance cover provided by the EPFO (Employees Provident Fund Organisation) for private sector salaried employees who are members of EPFO. The EDLI scheme was launched in 1976. The registered nominee receives a lump-sum payment in the event of the death of the person insured (employee) during the period of the service

Payment of Gratuity Act, 1972, as amended (the "Gratuity Act")

The Gratuity Act establishes a scheme for the payment of gratuity to employees engaged in every factory, mine, oil field, plantation, port and railway company, every shop or establishment in which ten or more persons are employed or were employed on any day of the preceding twelve months and in such other establishments in which ten or more employees are employed or were employed on any day of the preceding twelve months, as notified by the Central Government from time to time. Penalties are prescribed for non-compliance with statutory provisions.

Under the Gratuity Act, an employee who has been in continuous service for a period of five years will be eligible for gratuity upon his retirement, resignation, superannuation, death or disablement due to accident or disease. However, the entitlement to gratuity in the event of death or disablement will not be contingent upon an employee having completed five years of continuous service. The maximum amount of gratuity payable may not exceed 1 million.

Certain other laws and regulations that may be applicable to our Company in India include the following:

- Minimum Wages Act, 1948 and rules made thereunder.
- Industrial (Development and Regulation) Act, 1951 ("IDRA")
- Industrial Disputes Act, 1947 ("ID Act")
- Payment of Bonus Act, 1965 ("POB Act")
- Child Labour (Prohibition and Regulation) Act, 1986
- Inter-State Migrant Workers (Regulation of Employment and Conditions of Service) Act, 1979
- Sexual Harassment of Women at Workplace (Prevention, Prohibition and Redressal) Act, 2013 ("SHWW Act")
- Equal Remuneration Act, 1976 ("ER Act")
- Contract Labour (Regulation and Abolition) Act, 1970 (CLRA) and Contract Labour (Regulation and Abolition) Central Rules, 1971 (Contract Labour Rules)
- Maternity Benefit Act, 1961 ("Maternity Act")
- Industrial Employment Standing Orders Act, 1946
- Apprentices Act, 1961

To rationalize and reform labour laws in India, the Government has enacted the following codes:

Code on Wages, 2019, which regulates and amalgamates wage and bonus payments and subsumes four existing laws namely – the Payment of Wages Act, 1936, the Minimum Wages Act, 1948, the Payment of Bonus Act, 1965, and the Equal Remuneration Act, 1976. It regulates, inter alia, the minimum wages payable to employees, the manner of payment and calculation of wages and the payment of bonus to employees.

Industrial Relations Code, 2020, which consolidates and amends laws relating to trade unions, the conditions of employment in industrial establishments and undertakings, and the investigation and settlement of industrial disputes. It subsumes and simplifies the Trade Unions Act, 1926, the Industrial Employment (Standing Orders) Act, 1946 and the Industrial Disputes Act, 1947.

Code on Social Security, 2020, which amends and consolidates laws relating to social security, and subsumes various social security related legislations, inter alia including the Employee's State Insurance Act, 1948, the Employees' Provident Funds and Miscellaneous Provisions Act, 1952, the Maternity Benefit Act ,1961 and the Payment of Gratuity Act, 1972. It governs the constitution and functioning of social security organisations such as the employee's provident fund and the employee's state insurance corporation, regulates the payment of gratuity, the provision of maternity benefits and compensation in the event of accidents that employees suffer, among others.

Occupational Safety, Health and Working Conditions Code, 2020, which amends and consolidates laws regarding the occupational safety, health and working conditions of persons employed in an establishment. It subsumes various enactments including, among others, the Factories Act, 1948 and the Contract Labour (Regulation and Abolition) Act, 1970.

While certain portions of the Code on Wages, 2019, have now been enforced by the Ministry of Labour and Employment, the remainder of these codes shall become effective on the day that the Government shall notify for this purpose.

OTHER GENERAL REGULATIONS:

The Competition Act, 2002

The Competition Act, 2002 is a law in India that aims to: Promote competition in markets, protect consumer interests, ensure freedom of trade, prevent practices that harm competition, and promote economic development. The act was passed by Parliament in 2002 and took effect on September 1, 2009. It replaced the Monopolies and Restrictive Trade Practices Act, 1969 (MRTP Act). The act prohibits: Anti-competitive agreements; Abuse of dominant position by enterprises; Combinations (mergers, amalgamations, and acquisitions) that could have an adverse effect on competition. The act also established the: Competition Commission of India and Competition Appellate Tribunal.

State Laws

We operate in various states. Accordingly, legislations passed by the state governments are applicable to us in those states. These include legislations relating to, among others, Shops and Establishment Act, classification of fire prevention and safety measures and other local licensing. Further, we require several approvals from local authorities such as municipal bodies. The approvals required may vary depending on the state and the local area.

Municipality Laws

Pursuant to the Constitution (Seventy-Fourth Amendment) Act, 1992, the respective state legislatures in India have power to endow the municipalities with power to implement schemes and perform functions in relation to matters listed in the Twelfth Schedule to the Constitution of India. The respective states of India have enacted laws empowering the municipalities to issue trade license for operating eating outlet sand implementation of regulations relating to such license along with prescribing penalties for non-compliance.

Approvals from Local Authorities

Setting up of a factory or manufacturing / housing unit entails the requisite planning approvals to be obtained from the relevant Local Panchayat(s) outside the city limits and appropriate Metropolitan Development Authority within the city limits. Consents are also required from the state pollution control board(s), the relevant state electricity board(s), the state excise authorities, sales tax, among others, are required to be obtained before commencing the building of a factory or the start of manufacturing operations.

Vectras Enprocon Limited
(Formerly Known as "Vectras Enprocon Private Limited")

1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND NOTES TO ACCOUNTS

A. Background of the Company:

"Vectras Enprocon Private Limited" was originally incorporated on 18th May, 2021 under the provisions of the Companies Act, 2013 as a private limited Company with the Registrar of Companies, Ahmedabad, Gujarat. Subsequently, Company was converted into a Public Limited Company pursuant to shareholders resolution passed at Extra-ordinary General Meeting of Company held on 3rd March, 2025 and the name of Company was changed to "Vectras Enprocon Limited". A fresh Certificate of Incorporation consequent upon Conversion from Private Limited Company to Public Limited Company dated 3rd April, 2025 was issued by the Registrar of Companies, Ahmedabad, Gujarat. The Corporate Identification Number of Company is U45309GJ2021PLC122680.

The Company is engaged in the business of engineering, procurement, and construction (EPC) services—mainly in the oil & gas and power sectors. The Company also provides end to end infrastructure, pipeline and technical service.

B. Significant Accounting Policies:

1.1 Basis of Accounting:

These financial statements have been prepared in accordance with generally accepted accounting principles ('GAAP') in India under the historical cost convention on the accrual basis of accounting. These financial statements have been prepared to comply in all material aspects with the accounting standards specified under section 133 of the Companies Act, 2013 read with Rule 7 of the Companies (Accounts) Rules, 2014 and other relevant provisions of the Companies Act, 2013 (hereinafter together referred to as 'the Act') and Schedule III of the Act.

These Restated Financial Statements of Vectras Enprocon Limited comprise the recast Balance Sheet as at September 30, 2026, March 31, 2026, March 31, 2025 and March 31, 2024, the Restated Statement of Profit and Loss and the Restated Cash Flow Statement for the period/year ended September 30, 2026, March 31, 2026, March 31, 2025 and March 31, 2024, together with the significant accounting policies and explanatory notes (together, the "Restated Financial Statements").

The Restated Financial Statements have been prepared by the management for the purpose of inclusion in the offer document and are derived from the audited financial statements of the Company for the respective period/years, which were prepared in accordance with the Generally Accepted Accounting Principles in India ("Indian GAAP"), comprising the accounting standards notified under Section 133 of the Companies Act, 2013, read with Rule 7 of the Companies (Accounts) Rules, 2014, and the relevant provisions of the Companies Act, 2013.

The Restated Financial Statements have been prepared under the historical cost convention on an accrual basis, except where stated otherwise, and on a going concern basis. The accounting policies have been applied consistently across all periods presented.

1.2 Use of Estimates:

The preparation of financial statements in conformity with the generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities as at the date of the financial statements and reported amounts of revenues and expenses during the reported period. Actual results could differ from these estimates. Any revision to accounting estimates is recognized prospectively in current and future periods.

1.3 Revenue Recognition:

i) Revenue From Operations:
The revenues are recognized to the extent it is probable that the amount can be measured reliably and that it is probable of inflow of resources. The revenue has been booked based on the work certified. The revenues are booked on completion of stages and accordingly, on achieving of the milestone, the revenues has been booked. The progress / work certified is measured on the basis of the certificate issued by the Chartered Engineer/Surveyor. Cost incurred towards future contract activity is classified as project work in progress.

ii) Other Income:
Interest income is recognised on accrual basis on a time proportion basis taking into account the amount outstanding and the applicable interest rate. Other income includes miscellaneous incomes and is recognised when due, where the Company is reasonably certain of ultimate collection.

1.4 Property, Plant & Equipment:

Property, Plant & Equipment are stated at cost, less accumulated depreciation and impairment, if any. Direct costs are capitalized until such assets are ready for use. Where an item of property, plant and equipment comprises major components having different useful lives, these components are accounted for as separate items. Borrowing costs incurred during the period of construction is capitalized as part of cost of qualifying asset. The residual values, useful lives and method of depreciation of property, plant and equipment is reviewed at each financial year end and adjusted prospectively, if appropriate.

1.5 Depreciation:

Depreciation on each part of an item of Property, Plant and Equipment is provided using the Written down Value (WDV) Method based on the useful life of the asset.

Useful life and residual value prescribed in Schedule II of the Companies Act, 2013 are considered except in the following cases where useful life is supported by the technical evaluation considering business specific usage, the consumption pattern of the assets and the past performance of similar assets:

a) In the Block of Plant & Machinery few Plant & Machinery Useful life is considered as 2 to 10 years.
b) In the Block of Furniture & Fixtures few Furniture & Fixtures Useful life is considered as 3 to 10 years.
c) In the Block of Vehicles few Vehicles Useful life is considered as 8 years.

Vectras Enprocon Limited
(Formerly Known as "Vectras Enprocon Private Limited")

1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND NOTES TO ACCOUNTS

1.6 Impairment of Asset:

At each Balance Sheet date, the management reviews the carrying amounts of Property, Plant & Equipment to determine whether there is any indication that these assets suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of impairment loss and necessary provisions are made against such impairment. The recoverable amount is the greater of the asset's net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value at the weighted average cost of capital. Reversal of impairment loss is recognized as income in Statement of Profit & Loss to the extent of impairment loss previously recognized.

1.7 Employee Retirement Benefits:

i) Short Term:

Short Term employee benefits are recognized as an expense at the undiscounted amount expected to be paid over the period of services rendered by the employees to the Company.

ii) Long Term:

Defined Benefits Plan:

For defined benefit retirement schemes, the cost of providing benefits is determined using the Projected Unit Credit Method, with actuarial valuation being carried out at period/year end balance sheet date. Re-measurement gains and losses of the net defined benefit liability/(asset) are recognized immediately in the profit and loss account. The service cost and net interest on the net defined benefit liability/(asset) are recognized as an expense within employee costs. The Company has not made any investment to meet the liability of gratuity payments till the period ended September 30, 2026. The retirement benefit obligations recognized in the balance sheet represents the present value of the defined benefit obligations arrived at based on the report of actuary.

iii) Defined Contribution Plans:

Contributions under defined contribution plans like Provident Fund, Employee State Insurance Scheme are recognized as expense for the period in which the employee has rendered service. Payments made to state managed retirement benefit schemes are dealt with as payments to defined contribution schemes where the Company's obligations under the schemes are equivalent to those arising in a defined contribution retirement benefit scheme.

1.8 Borrowing Cost:

Interest and other costs in connection with the borrowing of the funds to the extent related/attributed to the acquisition/construction of qualifying fixed assets are capitalized as a part of the cost of such asset up to the date when such assets are ready for its intended use and other borrowing costs are charged to Statement of Profit & Loss.

1.9 Inventories:

a. Construction Materials:

Construction materials are valued at lower of cost or net realizable value, on the basis of weighted average method after providing for obsolescence and other losses, where considered necessary. Cost of inventory comprises all costs of purchase, duties, taxes (other than those subsequently recoverable from tax authorities) and all other costs incurred in bringing the inventory to their present location and condition.

b. Work-in-Progress:

The recognition of expenses in the Statement of Profit and Loss on the basis of Percentage of Completion Method under which the contract cost incurred in reaching the stage of completion is matched with the percentage of work completed on the basis of the work certified by the surveyor/engineer. The cost incurred towards future contract activity and for the portion of work uncertified is classified under Project Work-in-Progress. Work-in-Progress represents cost incurred directly in respect of construction activity and indirect construction cost to the extent to which the expenditure is related to the future contract activity or incidental thereto and is valued at cost.

ANNEXURE - IV

Vectras Enprocon Limited
(Formerly Known as "Vectras Enprocon Private Limited")

1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND NOTES TO ACCOUNTS

1.10 Provision for Current and Deferred Tax:

Income tax expense is accounted for in accordance with AS 22- "Accounting for Taxes on Income" prescribed under the Companies (Accounting Standards) Rules, 2021 which includes current tax and deferred taxes.

Current tax expense is recognised in accordance with the provisions of the Income-tax Act, 1961, and the Income-tax Act, 2025, as applicable, based on the taxable income and the tax rates enacted or substantively enacted as at the reporting date.

Deferred taxes reflect the impact of Current year timing differences between taxable income and accounting income for the year and reversal of timing differences of earlier years if any. Deferred tax assets are recognized only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax asset will be recognized. Deferred tax assets are reviewed for their appropriateness of their respective carrying values at each reporting date. Deferred tax assets and Deferred tax liabilities have been offset wherever the Company has legally enforceable right to set off current tax assets against current tax liabilities and where deferred tax assets and deferred tax liabilities relate to income taxes levied by the same taxation authority.

1.11 Leases:

Operating Lease:
Lease arrangements where substantially all the risks and rewards of ownership are not transferred to the Company are classified as operating leases. Lease payments under an operating lease are recognized as an expense in the Statement of Profit and Loss on a straight-line basis over the lease term, unless another systematic basis is more representative of the time pattern of the user's benefit.

1.12 Cash and Cash Equivalents:

Cash and Bank Balances consist of:

a. Cash and Cash Equivalent which includes cash on hand, deposits held at call with banks and other short-term deposits which are readily convertible into known amounts of cash, are subject to an insignificant risk of change in value and have original maturities of less than one year. These balances with banks are unrestricted for withdrawal and usage.

b. Other Bank Balances which includes balances and deposits with Banks that are restricted for withdrawal and usage.

1.13 Provisions, Contingent Liabilities and Contingent Assets:

A provision is recognized if, as a result of a past event, the Company has a present legal obligation that can be reasonably estimated, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by the best estimate of the outflow of economic benefits required to settle the obligation at the reporting date. Where no reliable estimate can be made, a disclosure is made as contingent liability. A disclosure for contingent liability is also made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made. Contingent assets are neither recognized nor disclosed.

1.14 Foreign currency transactions

Transactions in foreign currencies are initially recorded in the reporting currency (Indian Rupees) by applying to the foreign currency amount the exchange rate prevailing on the date of the transaction. Foreign currency monetary items are retranslated using the exchange rate prevailing at the reporting date. Non-monetary items, which are measured in terms of historical cost denominated in a foreign currency, are reported using the exchange rate at the date of the transaction. Non-monetary items, which are measured at fair value or other similar valuation denominated in a foreign currency, are translated using the exchange rate at the date when such value was determined. Exchange differences arising on the settlement of monetary items or on reporting such items at rates different from those at which they were initially recorded are recognised in the Statement of Profit and Loss in the period in which they arise. In the case of foreign currency transactions related to exports and imports, revenue or expense is recognised at the exchange rate prevailing on the date of the transaction. Outstanding receivables or payables at the year-end are restated at the closing exchange rate, and any exchange gain or loss is recognised in the Statement of Profit and Loss.

1.15 Government Grants

Grants receivable as compensation for expenses or losses already incurred, or for the purpose of giving immediate financial support with no future related costs, are recognised in the Statement of Profit and Loss in the period in which they become receivable.

1.16 IPO / Share Issue Expenses

Expenses incurred in connection with the proposed Initial Public Offer (IPO) of equity shares of the Company are recognised as "Other Current Assets" pending completion of the IPO. Upon successful completion of the IPO, such expenses will be adjusted against the securities premium account, as permitted under Section 52 of the Companies Act, 2013, to the extent of the balance available therein, and/or set off against the proceeds of the IPO. In the event the proposed IPO does not materialise, such expenses will be charged to the Statement of Profit and Loss in the year in which it is determined that the IPO will not proceed.

1.17 Earnings Per Share:

Basic and Diluted Earnings Per Share are computed in accordance with Accounting Standard-20. Basic Earnings Per Share is calculated by dividing the net profit or loss after tax for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year. Diluted Earnings Per Equity Share are computed using the weighted average number of equity shares and dilutive potential equity shares outstanding during the year, except where the results are anti-dilutive.

1.1 Reasons (If variance is more than 25% in FY- 2025-26 vs FY-2024-25)

Note-1 The improvement in the Current Ratio is primarily attributable to an increase in current assets, particularly inventory, during the year.

Note-2 The increase in the Debt Service Coverage Ratio is primarily attributable to an improvement in earnings available for debt servicing during the year, coupled with a reduction in the overall debt servicing obligations. The improvement in earnings reflects the enhanced operating performance of the Company, while the lower debt servicing requirements have resulted in improved debt servicing capacity during the year.

Note-3 The decrease in the Inventory Turnover Ratio is primarily attributable to an increase in the average inventory held during the year, which was relatively higher than the corresponding increase in the Cost of Goods Sold.

Note-4 The decrease in the net capital turnover ratio is primarily attributable to a significant increase in net working capital during the year, which was higher than the corresponding growth in revenue from operations. The increase in working capital is primarily driven by higher funds being deployed towards working capital requirements to support the increased scale of business operations.

1.2 Reasons (If variance is more than 25% in FY- 2024-25 vs FY-2023-24)

Note-1 A significant increase in cash credit has led to a rise in the debt-equity ratio.

Note-2 Although the closing balance of borrowings has increased, both borrowings and repayments during the year were significantly lower compared to the previous year. Along with higher profit before tax, this resulted in a sharp improvement in the debt coverage ratio.

Note-3 The decrease is mainly attributable to a substantial increase in the shareholders' funds on account of capital infusion and retained earnings. Although the net profit has increased, the proportionate increase in shareholders' funds is higher, resulting in a lower Return on Equity ratio.

Note-4 The decline in the inventory turnover ratio is attributable to an increase in inventory levels relative to sales. While cost efficiency improved during the year, the higher build-up of stock indicates slower inventory movement, reflecting either anticipation of future demand, extended holding periods, or a change in procurement and production strategy.

Note-5 Trade payables have increased at a faster pace than purchases compared to the previous year, leading to a decline in the payables turnover ratio.

Note-6 This decline is mainly attributable to a significant increase in the capital employed. Although the EBIT has increased, the increase in operating profit is proportionately lower compared to the increase in capital employed, resulting in a reduction in the ROCE ratio.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This Prospectus may include forward-looking statements that involve risks and uncertainties, and our actual financial performance may materially vary from the conditions contemplated in such forward-looking statements as a result of various factors, including those described below and elsewhere in this Prospectus. For further information, see "*Forward-Looking Statements*" on page 17. Also read "*Risk Factors*" and *"– Significant Factors Affecting our Results of Operations and financial condition*" on pages 19 and 254 respectively, for a discussion of certain factors that may affect our business, financial condition or results of operations.

You should read the following discussion in conjunction with our Restated Financial Information included herein as of and for the six-months period ended September 30, 2026 and financial year ending March 31, 2026, 2025 and 2024, including the related notes, schedules and annexures. Our Restated Financial Information have been prepared in accordance with Generally Accepted Accounting Standards and restated in accordance with the requirements of Section 26 of the Companies Act, 2013, the SEBI ICDR Regulations and the Guidance Note. Accounting Standards differs in certain material respects from IFRS and US GAAP.

Our Financial Year commences on April 1 and ends on March 31 of each year, and all references to a particular Financial Year are to the 12 months ended March 31 of that year. Unless otherwise stated, or the context otherwise requires, the financial information used in this section is derived from section titled "*Restated Financial Information*" beginning on page 217.

We have exclusively commissioned and paid for the services of independent third party research agency, Dun & Bradstreet ("**D&B**") for the purposes of confirming our understanding of the industry in connection with the Offer, and have relied on the report titled "*Report on EPC Industry (Focus on the Oil & gas transportation, distribution & refining as well as thermal power)*" dated September 09, 2026 (the "**D&B Report**"), for industry related data in this Prospectus, including in the sections "*Industry Overview*", "*Our Business*" and "*Management's Discussion and Analysis of Financial Condition and Results of Operations*" on pages 111, 161 and 251, respectively. We officially engaged D&B in connection with the preparation of the D&B Report pursuant to an engagement letter dated August 09, 2025. The D&B Report is available on the website of our Company at www.vectrasgroup.com till the Bid/Offer Closing Date and has also been included in "*Material Contracts and Documents for Inspection – Material Documents*" on page 400. The data included herein includes excerpts from the D&B Report and may have been re-ordered by us for the purposes of presentation. There are no parts, data or information (which may be relevant for the proposed Issue), that has been left out or changed in any manner. Unless otherwise indicated, all financial, operational, industry and other related information derived from the D&B Report and included herein with respect to any particular year, refers to such information for the relevant financial year.

Overview

We are Gujarat based Engineering, Procurement and Construction (**"EPC"**) company operating in the Midstream and Downstream segment of Oil & Gas Industry. We are an Oil & Gas infrastructure service provider having presence in multiple states, focused on laying pipeline networks and combined station works along with construction of associated facilities. We provide integrated solutions to the Oil & Gas sector, which includes (i) Combined station works (ii) Midstream and downstream pipeline projects and related facilities, and (iii) Other allied services. Under the leadership of our experienced and first-generation promoters, we have established a strong track record in delivering comprehensive EPC services in Oil & Gas industry such as design, engineering, procurement, construction, testing and commissioning of Oil & Gas stations and cross-country pipelines, spur pipelines, city gas stations and related civil and mechanical works.

Pipelines are essential for transporting Oil & Gas, offering safe, reliable, and cost-effective transport compared to road and rail. They ensure a continuous supply of resources to refineries, industries, and power plants, aiding in uninterrupted production and electricity generation. Pipelines have lower maintenance needs and energy consumption, leading to reduced transportation costs and economic benefits.

Key Performance Indicators and Non-GAAP Financial Measures

We use certain supplemental Non-GAAP Measures and certain operational performance indicators such as PAT Margin, EBITDA, EBITDA Margin, Return on Equity (RoE), Return on Capital Employed, Debt to Equity Ratio, Current Ratio to review and analyse our financial and operating performance from period to period, to evaluate our business, and for forecasting purposes.

Although these Non-GAAP Measures, financial and operational performance indicators and other industry measures are not a measure of performance calculated in accordance with applicable accounting standards, our management believes that they are useful to an investor in evaluating us because they are widely used measures to evaluate a company's operating and financial performance. Further, our management believes that when taken collectively with financial measures prepared in accordance with Generally Accepted Accounting Standards, these Non-GAAP Measures, financial and operational performance indicators and other industry measures may be helpful to investors because they provide an additional tool for investors to use in evaluating our ongoing results and trends. Presentation of these Non-GAAP Measures, financial and operational performance indicators and other industry measures should not be considered in isolation from, or as a substitute for, analysis of our historical financial performance, as reported and presented in our Restated Financial Information set out in this Prospectus.

These Non-GAAP Measures, financial and operational performance indicators and other industry measures are not defined under, or presented in accordance with, Generally Accepted Accounting Standards and have limitations as analytical tools which indicate, among other things, that they do not reflect our cash expenditures or future requirements for capital expenditure or contractual commitments; changes in, or cash requirements for, our working capital needs; and the finance cost, or cash requirements. Although depreciation and amortization are non-cash charges, the assets being depreciated and amortised will often have to be replaced in the future, and these measures do not reflect any cash requirements for such replacements.

These Non-GAAP Measures, financial and operational performance indicators and other industry measures may differ from similar titled information used by other companies, who may calculate such information differently and hence their comparability with those used by us may be limited. Therefore, these Non-GAAP Measures,

financial and operational performance indicators and other industry measures should not be viewed as substitutes for performance or profitability measures under Ind AS or as indicators of our operating performance, financial condition, cash flows, liquidity or profitability. Set out below are definitions of, and reconciliation to GAAP measures pertaining to, certain key Non-GAAP Measures presented in this Prospectus, along with a brief explanation of their calculation.

Significant Factors affecting our results of operations and financial condition

Our results of operations and financial condition are affected by a number of important factors including:

Competition and pricing pressure

We operate in a highly competitive environment. The industry is fragmented, with a diverse range of competitors, both large multinational companies and smaller regional players. The success of our operations is heavily reliant on our ability to effectively compete, particularly by leveraging our unique capabilities.

Some of our competitors possess greater financial resources and larger capacities in terms of execution of high order value and complex projects. Certain competitors may also benefit from cost advantages in their operations or have expertise in erection and commissioning of complex projects and have access to certain technologies due to their collaboration/tie-ups with other multidisciplinary EPC companies. As a result, they may offer a broader scope of service, larger sales teams, and more extensive intellectual property resources, enabling them to appeal to a wider range of customers across various sectors. Our ability to remain competitive and achieve desired margins is influenced by both domestic and international competition. However, we believe our focus on optimizing our service portfolio and continuing to distinguish our capabilities will help us maintain a competitive edge in this dynamic market environment.

Trends in the Indian Oil and Gas EPC Industry

India is currently the 3rd largest energy and oil consumer in the world, after China and US. India's oil consumption is projected to rise significantly by 50% by 2030, compared to a global demand increase of only 7%. For natural gas, the country's consumption is projected to double from 64 billion cubic meters (BCM) in 2019 to 115 BCM in 2030. As of March 31, 2025, the total length of the crude oil pipeline network in India is 10,446 kilometers, boasting a capacity of 153.1 million metric tons per annum (MMTPA). During FY 2024- 25, the utilization of crude oil pipelines stands at 66.5%. Product pipelines, inclusive of LPG, form a comprehensive network spanning 24130 kilometers with a capacity of 145.8 MMTPA. During FY 2024-25, the utilization of product pipelines reached 71.1%, an increase from 68.9% in FY 2023-24. (*Source: Dun & Bradstreet Report)*

According to Dun & Bradstreet, the Major Demand Drivers for Indian oil and gas EPC Industry includes:

- *Rising Domestic Consumption:* The growth of India's middle class, which is expected to reach 580 million by 2025, is significantly driving domestic consumption. With rising disposable incomes, there is an increasing demand for a variety of consumer goods, compelling manufacturers to enhance their production capabilities. As a result, businesses are investing heavily in new factories and industrial facilities to meet this demand. This trend is not only boosting domestic manufacturing but also necessitating substantial industrial construction projects across the country to accommodate increased production needs.

- *Export Potential:* India's youthful demographic, with over 65% of its population under the age of 35, provides a distinct advantage in the global market. This demographic is increasingly skilled and cost-competitive, attracting foreign manufacturers looking to diversify their supply chains. The surge in foreign direct investment (FDI) has been notable, with inflows rising from USD 45.15 billion in FY 2015 to a record high of USD 81.04 billion in FY 2025. This influx drives the establishment of new production facilities and logistics hubs, creating a growing demand for industrial construction as companies seek to tap into both domestic and international markets.

- *Globalization and Trade Agreements:* India's involvement in 13 free trade agreements (FTAs) and ongoing negotiations with countries like the U.K., Canada, and the European Union underscores its commitment to enhancing trade opportunities. These agreements facilitate smoother access to global markets, prompting local manufacturers to increase production capabilities. As companies scale their operations to leverage these trade opportunities, the demand for robust industrial infrastructure including manufacturing plants and logistics facilities grows significantly, further stimulating industrial construction activity.

- *Technological Advancements:* The integration of advanced technologies, including automation and Industry 4.0 initiatives, is revolutionizing India's manufacturing landscape. As companies increasingly adopt these technologies to enhance production efficiency, there is a pressing need for modern production facilities that can support sophisticated processes. This shift necessitates substantial investments in upgrading existing infrastructure and developing new industrial spaces, thereby driving demand for specialized industrial construction projects that cater to the needs of high-tech manufacturing operations.

The abovementioned trends and growth drivers in the Indian Oil and Gas industry could have a significant impact on our revenue from operations.

Our Cash Operating Expenses

We have witnessed significant growth in our business and operations over the past few years. For the last three financial years, on a restated basis, our revenue from operations, EBITDA and PAT from continuing operations grew at a CAGR of 48.51%, 66.41% and 62.95%, respectively. As we continue to expand our operations, optimizing our cash operating expenses will be critical to maintaining our competitiveness and profitability. Generally, increases in Cash Operating Expenses have been offset through increases in operations.

Our company enters into Item Rate Contracts with the respective customers. Under item rate contracts, we are required to quote rates for individual items of work on the basis of a schedule of quantities furnished by our client. The design and drawings are provided by the client or our internal design team prepares the same as per decided scope. Typically, our risk is lower in item rate contracts as, other than escalation in the rates of items quoted by us to the client, we are paid according to the actual amount of work on the basis of the per-unit price quoted. Item rate contracts typically contain price variation or escalation clauses that provide for either reimbursement by the client in the event of a variation in the prices of key materials or a formula that splits the contract into pre-defined components for materials, labour and fuel and links the escalation in amounts payable by the client. However, any increase in cash operating expenses that we are unable to pass on to our customers or increase in cash operating expenses due to change in our operations could adversely affect our result of operations.

Set forth below is a table which provides details of our Cash Operating Expenses, for the periods indicated, as well as such expenses as a percentage of our revenue from operations.

Our Project Related Expenses is a significant component of our operational expenses, contributing 58.66%, 66.29%, 68.10% and 46.08% for the six-months period ended September 30, 2026 and Financial Year ended March 31, 2026, 2025 and 2024.

Employee benefit expenses comprise Salaries, Wages and Bonus, Director remuneration, contribution to provident and other funds, gratuity and other staff welfare payments. These expenses have continued to increase as a result of annual wage increments as well as an increase in the headcount of our employees, which reflects the effects of expansion of our business. Our total employees benefit expenses increased by 132.07% and 55.52% in Financial Year 2025-26 and Financial Year 2024-25, respectively. Our employees and operational workers are key to the success of our business.

Our other expenses primarily include Legal & Professional Expenses, Transportation Expenses, Provision for CSR. We have successfully managed to optimize our other expenses in comparison with growth in our revenue from operations. Other expenses in comparison with total income amounts to 4.00%, 3.41%, 3.20% and 3.61%, for the six-months period ended September 30, 2026 and financial year ended March 31, 2026, 2025 and 2024.

Execution capabilities

Our ability to complete our projects within the expected completion dates or at all is subject to a number of risks and unforeseen events, including, without limitation collaboration with third parties, changes in applicable regulations, availability of adequate financing arrangements on commercially viable terms, as well as an inability or delay in securing necessary statutory or regulatory approvals for such projects. Our EPC projects are required to achieve commercial operation no later than the scheduled commercial operation dates specified under the relevant EPC contracts, or by the end of the extension period, if any is granted by our clients. We provide our clients with performance guarantees for the completion of the construction of our projects within a specified time frame. The client may also be entitled to terminate the EPC contract in the event of delay in completion of the work if the delay is not on account of any of the agreed exceptions. In addition to the risk of termination by the client, delays in completion of development may result in cost overruns, lower or no returns on capital and reduced revenue for the client thus impacting the project's performance, as well as failure to meet scheduled debt service payment dates and increased interest costs from our financing agreements for the projects. Delay in completion of projects have major repercussions on our business including but not limited to fines and penalties payable to the vendor as per the agreed terms and conditions, partial forfeiture of our earnest money and we may be subject to disputes brought by the vendors or suppliers, etc.

Principal Components of statement of Profit and Loss

Total Income

Our total income comprises (i) revenue from operations; and (ii) other income.

Revenue from operations

Our revenue from operations comprises revenue from sale of product and sale of Works Contract service. Our sale of products comprises of sale of materials supplied by us as a part of contract under civil infrastructure portion. While, our sale of Works Contract service comprises of our integrated services in relation to (i) Midstream and downstream pipeline projects and related facilities, (ii) Combined station works and (iii) Other allied services such as electrical & instrumentation and cathodic protection and Safety Assurance services in relation to Oil and Gas industry.

Other income

Our other income consists of (i) Interest Income; (ii) Interest on Income Tax Refund; (iii) Insurance Claim Received; and (iv) Miscellaneous Income.

Comparison of FY 2025-26 to FY 2024-25

Total Income

Our total income increased by 48.88% to ₹ 11,990.09 lakhs in Financial Year 2025-26 from ₹ 8,053.29 lakhs in Financial Year 2024-25, the primary reason for which are disclosed below:

Revenue from Operations

Our revenue from operations increased by 48.86% from ₹ 8,048.03 lakhs in Financial Year 2024-25 (representing 99.93% of our total income in that year) to ₹ 11,980.20 lakhs in Financial Year 2025-26 (representing 99.92% of our total income in that year). The increase in revenue from operations was primarily attributable to the higher utilisation of the order book during the period. The Company executed and converted a greater portion of its outstanding orders into revenue, supported by the increased execution of projects during the period. Our order book has expanded leading to better absorption of fixed costs and higher resource utilization.

The detailed bifurcation of our revenue from operations for FY2025-26 and FY2024-25 is provided below:

Particular	For the Financial Year ended March 31, 2026		For the Financial Year ended March 31, 2025

Note: - Project Work Revenue includes (i) Combined station works (ii) Midstream and downstream pipeline projects and related facilities, Other allied services includes Electrical Work Revenue and Technical Service Revenue.

Other income

Our other income increased by 87.84% to ₹ 9.89 lakhs in FY2025-26 (representing 0.08% of our total income in that year) from ₹ 5.26 lakhs in FY2024-25 (representing 0.07% of our total income in that year), primarily due to increase in interest income and miscellaneous income.

Expenses

Our total expenses increased by 47.91% to ₹ 9,906.30 lakhs in FY2025-26 (representing 82.63% of our total income in that year) from ₹ 6,697.46 lakhs in FY2024-25 (representing 83.17% of our total income in that year). The total expenses increase by 47.91% with increase in our revenue from operations. The primary reasons for this increase are discussed below:

Cost of Materials Consumed

Our cost of materials consumed increased by 17.95% to ₹ 2,966.13 lakhs in FY2025-26 (representing 24.74% of our total income in that year) from FY2024-25 (representing 31.23% of our total income in that year). Our cost of materials consumed constitutes of difference of opening and closing stock of materials and Amount of Material purchased and consumed during the year. Increase in material consumed is due to revenue increased. The detailed bifurcation of our cost of services for FY2025-26 and FY2024-25 is provided below:

Particular	For the Financial Year ended March 31, 2026		For the Financial Year ended March 31, 2025

Cost of Materials Consumed	**2,966.13**	**24.74**	**2,514.80**	**31.23**

Project Related Expenses

Our project related expenses increased by 42.51% to ₹ 6,350.09 lakhs in FY2025-26 (representing 52.96% of our total income in that year) from ₹ 4,455.83 lakhs in FY2024-25 (representing 55.33% of our total income in that year). Increase in project related expenses is due to revenue and orderbook execution.

Employee Benefit Expenses

Our employee benefit expenses increased by 132.07% to ₹ 1,323.23 lakhs in FY2025-26 (representing 11.04% of our total income in that year) from ₹ 570.19 lakhs in FY2024-25 (representing 7.08% of our total income in that year). The increase in employee expenses was due to annual wage increments as well as an increase in the headcount of our employees from 221 employees as on March 31, 2025 to 499 employees as on March 31, 2026, which reflects the effects of expansion of our business.

Finance Cost

Our finance cost increased 146.05% to ₹ 189.89 lakhs in FY2025-26 (representing 1.58% of our total income in that year) from ₹ 77.17 lakhs in FY2024-25 (representing 0.96% of our total income in that year). The primary reason for increase in finance cost is due to increase in total borrowing from ₹ 1,187.49 lakhs in FY2024-25 to ₹ 2,221.10 lakhs in FY2025-26.

Depreciation and amortization expenses

Our Depreciation and amortization expenses increased by 78.27% to ₹ 137.50 lakhs in FY2025-26 (representing 1.15% of total income in that year) from ₹ 77.13 lakhs in FY2024-25 (representing 0.96% of total income in that year). The increase in Depreciation and amortization expenses is primarily due to increase in Net Block of Property, Plant and Equipment of the company from ₹ 368.58 lakhs in FY2024-25 to ₹ 595.30 lakhs in FY2025-26.

Other Expenses

Our other expenses increased by 58.37% to ₹ 408.51 lakhs in FY2025-26 (representing 3.41% of our total income in that year) from ₹ 257.95 lakhs in FY2024-25 (representing 3.20% of our total income in that year). The increase in other expenses is primarily due to:

- 52.47% increase in Electricity Expense from ₹ 3.78 lakhs in FY2024-25 to ₹ 5.76 lakhs in FY2025-26.
- 40.03% increase in Rental expenses for the building taken on rental basis from ₹ 36.69 lakhs in FY2024-25 to ₹ 51.38 lakhs in FY2025-26.
- 32.44% increase in Legal & Professional Fees Expense from ₹ 89.77 lakhs in FY2024-25 to ₹ 118.89 lakhs in FY2025-26.

Profit before tax

As a result of the factors outlined above, our profit before tax increased by 53.69% to ₹ 2,083.79 lakhs in FY2025-26 from ₹ 1,355.83 lakhs in FY2024-25 which, as a percentage of our total income, represented approximately 17.38% and 16.84%, respectively.

Tax expense

Our total tax expense increased by 59.42% to ₹ 540.52 lakhs in FY2025-26 (representing 4.51% of our total income in that period) from ₹ 339.06 lakhs in FY2024-25 (representing 4.21% of our total income in that period). This increase was primarily due to an increase in current tax expenses for the current year to ₹ 562.98 lakhs in FY2025-26 from ₹ 406.29 lakhs in FY2024-25.

Profit for the year

As a result of the factors outlined above, our profit for the year increased by 51.78% to ₹ 1,543.27 lakhs in FY2025-26 from ₹ 1,016.77 lakhs in FY2024-25. Further, our order book has expanded leading to better absorption of fixed costs and higher resource utilization.

Comparison of FY 2024-25 to FY 2023-24

Total Income

Our total income increased by 48.13% to ₹ 8,053.29 lakhs in Financial Year 2024-25 from ₹ 5,436.77 lakhs in Financial Year 2023-24, the primary reason for which are disclosed below:

Revenue from Operations

Our revenue from operations increased by 48.16% from ₹ 5,431.89 lakhs in Financial Year 2023-24 (representing 99.91% of our total income in that year) to ₹ 8,048.03 lakhs in Financial Year 2024-25 (representing 99.93% of our total income in that year). The increase in revenue from operations was primarily attributable to the higher utilisation of the order book during the period. The Company executed and converted a greater portion of its outstanding orders into revenue, supported by the increased execution of projects during the period. Our order book has expanded leading to better absorption of fixed costs and higher resource utilization.

The detailed bifurcation of our revenue from operations for FY2024-25 and FY2023-24 is provided below:

Other income

Our other income increased by 7.95% to ₹ 5.26 lakhs in FY2024-25 (representing 0.07% of our total income in that year) from ₹ 4.88 lakhs in FY2023-24 (representing 0.09% of our total income in that year), primarily due to increase in interest income and miscellaneous income.

Expenses

Our total expenses increased by 44.80% to ₹ 6,697.46 lakhs in FY2024-25 (representing 83.17% of our total income in that year) from ₹ 4,625.23 lakhs in FY2023-24 (representing 85.08% of our total income in that year). The total expenses increase by 44.80% with increase in our revenue from operations. The primary reasons for this increase are discussed below:

Cost of Materials Consumed

Our cost of materials consumed increased by 18.61% to ₹ 2,514.80 lakhs in FY2024-25 (representing 31.23% of our total income in that year) from ₹ 2,120.23 lakhs in FY2023-24 (representing 39.00% of our total income in that year). Our cost of materials consumed constitutes of difference of opening and closing stock of materials and Amount of Material purchased and consumed during the year. Increase in material consumed is due to revenue increased. The detailed bifurcation of our cost of services for FY2024-25 and FY2023-24 is provided below:

Cost of Materials Consumed	**2,514.80**	**31.23**	**2,120.23**	**39.00**

Project Related Expenses

Our project related expenses increased by 111.83% to ₹ 4455.83 lakhs in FY2024-25 (representing 55.33% of our total income in that year) from ₹ 2,103.49 lakhs in FY2023-24 (representing 38.69% of our total income in that year). Increase in project related expenses is due to increase in revenue and orderbook execution.

Employee Benefit Expenses

Our employee benefit expenses increased by 55.52% to ₹ 570.19 lakhs in FY2024-25 (representing 7.08% of our total income in that year) from ₹ 366.63 lakhs in FY2023-24 (representing 6.74% of our total income in that year). The increase in employee expenses was due to annual wage increments as well as an increase in the headcount of our employees from 113 employees as on March 31, 2024 to 221 employees as on March 31, 2025, which reflects the effects of expansion of our business.

Finance Cost

Our finance cost increased by 249.87% to ₹ 77.17 lakhs in FY2024-25 (representing 0.96% of our total income in that year) from ₹ 22.06 lakhs in FY2023-24 (representing 0.41% of our total income in that year). The primary reason for increase in finance cost is due to increase in total borrowing from ₹ 415.77 lakhs in FY2023-24 to ₹ 1,187.49 lakhs in FY2024-25.

Depreciation and amortization expenses

Our Depreciation and amortization expenses increased by 100.59% to ₹ 77.13 lakhs in FY2024-25 (representing 0.96% of total income in that year) from ₹ 38.46 lakhs in FY2023-24 (representing 0.71% of total income in that year). The increase in Depreciation and amortization expenses is primarily due to increase in Net Block of Property, Plant and Equipment of the company from ₹ 177.64 lakhs in FY2023-24 to ₹ 368.58 lakhs in FY2024-25.

Other Expenses

Our other expenses increased by 31.33% to ₹ 257.95 lakhs in FY2024-25 (representing 3.20% of our total income in that year) from ₹ 196.41 lakhs in FY2023-24 (representing 3.61% of our total income in that year). The increase in other expenses is primarily due to:

- 89.80% increase in Electricity Expense from ₹ 1.99 lakhs in FY2023-24 to ₹ 3.78 lakhs in FY2024-25.
- 347.95% increase in Rental expenses for the building taken on rental basis from ₹ 8.19 lakhs in FY2023-24 to ₹ 36.69 lakhs in FY2024-25.
- 20.96% increase in Legal & Professional Fees Expense from ₹ 74.21 lakhs in FY2023-24 to ₹ 89.77 lakhs in FY2024-25.

Profit before tax

As a result of the factors outlined above, our profit before tax increased by 67.07% to ₹ 1,355.83 lakhs in FY2024-25 from ₹ 811.54 lakhs in FY2023-24 which, as a percentage of our total income, represented approximately 16.84% and 14.93%, respectively.

Tax expense

Our total tax expense increased by 47.19% to ₹ 339.06 lakhs in FY2024-25 (representing 4.21% of our total income in that period) from ₹ 230.35 lakhs in FY2023-24 (representing 4.24% of our total income in that period). This increase was primarily due to an increase in current tax expenses for the current year to ₹ 406.29 lakhs in FY2024-25 from ₹ 169.33 lakhs in FY2023-24.

Profit for the year

As a result of the factors outlined above, our profit for the year increased by 74.95% to ₹ 1,016.77 lakhs in FY2024-25 from ₹ 581.19 lakhs in FY2023-24. Further, Our order book has expanded leading to better absorption of fixed costs and higher resource utilization.

Other Quantitative and Qualitative Disclosures

Off-balance sheet arrangements

We do not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that we believe are material to investors. We do not enter into derivative instruments or other relationships with other entities that would have been established for the purpose of facilitating off-balance sheet arrangements.

Related party transactions

We have entered into various transactions with related parties. For further information, see "*Restated Financial Statement – Annexure- VIII - Related Party Disclosures*" on page 239 of this Prospectus

Unusual or infrequent events or transactions

There have been no other events or transactions that, to our knowledge, may be described as "unusual" or "infrequent". For details of the risks applicable to us, see "*Risk Factors*" on page 19.

Known trends or uncertainties

Our business has been affected and we expect will continue to be affected by the trends identified "*—Significant factors affecting our results of operations and financial condition*" and the uncertainties described in "*Risk Factors*" on page 19. To our knowledge, except as described or anticipated in this Prospectus, there are no known trends or uncertainties which we expect will have a material adverse impact on our revenues or income from continuing operations.

Future relationship between cost and income

Other than as described above and in "*Risk Factors*" and "*Our Business*" beginning on pages 19 and 161, respectively, to our knowledge there are no known factors that may adversely affect our business prospects, results of operations and financial condition.

New products or business segments

Other than as described elsewhere in this Prospectus, there are no new products or business segments that have or are expected to have a material impact on our business prospects, results of operations or financial condition.

Seasonality of business

Our business operations may be adversely affected by severe weather, which may require us to evacuate personnel or curtail services, may result in damage to a portion of our fleet of equipment or facilities resulting in the suspension of operations, and may prevent us from delivering materials to our project sites in accordance with contract schedules or generally reduce our productivity. Our operations may also be adversely affected by difficult working conditions and extremely high temperatures during summer months and during the monsoon season, each of which may restrict our ability to carry on our activities and fully utilize our resources. In addition, since we record revenues using the percentage of completion method and revenues are not recognized until there is reasonable progress on a contract, revenues recorded in the first half of our financial year between April and September are traditionally less compared to revenues recorded during the second half of our financial year. As a result, our revenues and profits may vary significantly during different financial periods, and certain periods are not indicative of our financial position for the year.

Significant economic changes

Government policies governing the sector in which we operate as well as the overall growth of the Indian economy has a significant bearing on our operations. Major changes in these factors can significantly impact income from continuing operations. Other than as described in the sections "*Risk Factors*" and "*Our Business*", there are no specific economic changes that may impact our operations or are likely to affect income from continuing operations.

Statutory auditors' qualifications or adverse observations

The auditor's report to the audited financial statements of our company forming part of basis for preparation of Restatement Financial Information does not include any qualifications or adverse observations.

Supplier or Customer Concentration

We are dependent on our customers and suppliers for our business. We have strong customer base of our existing customers. For further details on the main provision of our Company's Articles of Association dealing with voting rights, dividend, forfeiture and lien, transfer and transmission and/or consolidation/splitting, etc., refer to Section titled, "*Description of Equity Shares and Terms of the Articles of Association*", beginning on page no. 352 of this Prospectus.

Minimum Application Value, Market Lot and Trading Lot

In accordance with Regulation 267 (2) of the SEBI ICDR Regulations, our Company ensured that the minimum application size shall not be less than two lots per application, provided that the minimum application shall not be less than Rs 2,00,000 (Rupees Two lakhs only) per application.

Pursuant to Section 29 of the Companies Act, the Equity Shares shall be Allotted only in dematerialised form. As per SEBI ICDR Regulations, the trading of the Equity Shares shall only be in dematerialised form. In this context, two agreements have been signed by our Company with the respective Depositories and the Registrar to the Offer before filing this Prospectus:

- Tripartite agreement among the NSDL, our Company and Registrar to the Offer dated March 13, 2025.

- Tripartite agreement among the CDSL, our Company and Registrar to the Offer dated December 30, 2024.

As per the provisions of the Depositories Act, 1996 & regulations made there under and Section 29 (1) of the Companies Act, 2013, the equity shares of an offeror shall be in dematerialized form i.e. not in the form of physical certificates, but be fungible and be represented by the statement Offerd through electronic mode. The trading of the Equity Shares will happen in the minimum contract size of 1,200 Equity Shares and the same may be modified by the BSE Limited from time to time by giving prior notice to investors at large. Allocation and allotment of Equity Shares through this Offer will be done in multiples of 1,200 Equity Shares subject to a minimum allotment of 2,400 Equity Shares to the successful Applicants in terms of the SEBI circular No. CIR/MRD/DSA/06/2012 dated February 21, 2012.

Minimum Number of Allottees

Further in accordance with the Regulation 268(1) of SEBI (ICDR) Regulations, the minimum number of allottees in this Offer shall be 200 shareholders. In case the minimum number of prospective allottees is less than 200, no allotment will be made pursuant to this Offer and all the monies blocked by SCSBs shall be unblocked within two (2) working days of closure of Offer.

Joint Holders

Where 2 (two) or more persons are registered as the holders of any Equity Shares, they will be deemed to hold such Equity Shares as joint holders with benefits of survivorship.

Jurisdiction

Exclusive Jurisdiction for the purpose of this Offer is with the competent courts/authorities in Ahmedabad, Gujarat.

The Equity Share have not been and will not be registered under the U.S. Securities Act or any state securities laws in the United States and may not be Offerd or sold within the United States or to, or for the account or benefit of, ―U.S. persons‖ (as defined in Regulation S), except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable U.S. state securities laws. Accordingly, the Equity Shares are being Offered and sold only outside the United States in offshore transactions in reliance on Regulation S under the U.S. Securities Act and the applicable laws of the jurisdiction where those Offers and sales occur.

The Equity Shares have not been and will not be registered, listed or otherwise qualified in any other jurisdiction outside India and may not be Offered or sold, and applications may not be made by persons in any such jurisdiction, except in compliance with the applicable laws of such jurisdiction.

Nomination Facility to the Investor

In accordance with Section 72 of the Companies Act, 2013, read with Companies (Share Capital and Debentures) Rules, 2014, the sole Applicant, or the first Applicant along with other joint Applicants, may nominate any one person in whom, in the event of the death of sole Applicant or in case of joint Applicants, death of all the Applicants, as the case may be, the Equity Shares Allotted, if any, shall vest. A person, being a nominee, entitled to the Equity Shares by reason of the death of the original holder(s), shall be entitled to the same advantages to which he or she would be entitled if he or she were the registered holder of the Equity Share(s). Where the nominee is a minor, the holder(s) may make a nomination to appoint, in the prescribed manner, any person to become entitled to equity share(s) in the event of his or her death during the minority. A nomination shall stand rescinded upon a sale of Equity Share(s) by the person nominating. A buyer will be titled to make afresh nomination in the manner prescribed. Fresh nomination can be made only on the prescribed form available on request at our Registered Office of our Company or to the registrar and transfer agents of our Company.

Any person who becomes a nominee by virtue of the provisions of Section 72 of the Companies Act, 2013, shall upon production of such evidence, as may be required by the Board, elect either:

1. To register himself or herself as the holder of the equity shares; or

2. To make such transfer of the equity shares, as the deceased holder could have made.

Further, the Board may at any time give notice requiring any nominee to choose either to be registered himself or herself or to transfer the equity shares, and if the notice is not complied with within a period of ninety (90) days, the Board may thereafter withhold payment of all dividends, bonuses or other monies payable in respect of the equity shares, until the requirements of the notice have been complied with.

Since the Allotment of Equity Shares in the Offer will be made only in dematerialized form, there is no need to make a separate nomination with our Company. Nominations registered with the respective depository participant of the applicant would prevail. If the Investors require changing of their nomination, they are requested to inform their respective depository participant.

Withdrawal of the Offer

If our Company withdraw the Offer any time after the Bid/ Offer Opening Date but before the allotment of Equity Shares, a public notice within 2 (two) working days of the Bid/ Offer Closing Date, providing reasons for not proceeding with the Offer shall be Offered by our Company. The notice of withdrawal will be Offered in the same newspapers where the pre-Offer and price band advertisements have appeared and the Stock Exchange will also be informed promptly. The BRLM, through the Registrar to the Offer, will instruct the SCSBs to unblock the ASBA Accounts within 1 (one) working Day from the day of receipt of such instruction.

If our Company withdraw the Offer after the Bid/Offer Closing Date and subsequently decides to proceed with an Offer of the Equity Shares, our Company will have to file a fresh Red Herring Prospectus with the stock exchange where the Equity Shares may be proposed to be listed.

Notwithstanding the foregoing, the Offer is subject to obtaining (i) the final listing and trading approvals of the Stock Exchange with respect to the Equity Shares Offerd through the Red Herring Prospectus and this Prospectus, which our Company will apply for only after Allotment; and (ii) filing of Prospectus with Registrar of Companies.

SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 1, 2018 read with its circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/50 dated April 3, 2019, had introduced an alternate payment mechanism using Unified Payments Interface **("UPI")** and consequent reduction in timelines for listing in a phased manner. From January 1, 2019, the UPI Mechanism for Individual bidders who applies for minimum application size applying through Designated Intermediaries was made effective along with the existing process and existing timeline of T+6 days. **("UPI Phase I")**. The UPI Phase I was effective till June 30, 2019.

Subsequently, for applications by Individual bidders (who applied for minimum application size) through Designated Intermediaries, the process of physical movement of forms from Designated Intermediaries to SCSBs for blocking of funds has been discontinued and only the UPI Mechanism with existing timeline of T+6 days is applicable for a period of three months or launch of five main board public Offers, whichever is later ("UPI Phase II"), with effect from July 1, 2019, by SEBI circular (SEBI/HO/CFD/DIL2/CIR/P/2019/76) dated June 28, 2019, read with circular (SEBI/HO/CFD/DIL2/CIR/P/2019/85) dated July 26, 2019. Further, as per the SEBI circular (SEBI/HO/CFD/DCR2/CIR/P/2019/133) dated November 8, 2019, the UPI Phase II had been extended until March 31, 2020. However, due to the outbreak of COVID-19 pandemic, UPI Phase II has been further extended by SEBI until further notice, by its circular (SEBI/HO/CFD/DIL2/CIR/P/2020/50) dated March 30, 2020. Thereafter, the final reduced timeline of T+3 days may be made effective using the UPI Mechanism for applications byIndividual Investor (who applies for minimum application size) ("UPI Phase III"), as may be prescribed by SEBI. Further, SEBI, vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021, and circular no. SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021, has introduced certain additional measures for streamlining the process of initial public offers and redressing investor grievances. This circular is effective for initial public offers opening on/or after May 1, 2021, except as amended pursuant to SEBI circular SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021, and SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022, and the provisions of this circular are deemed to form part of this Prospectus. Furthermore, pursuant to SEBI circular no. SEBI/HO/CFD/DIL2/P/CIR/P/2022/45 dated April 5, 2022, all individual Investors in initial public offerings (opening on or after May 1, 2022) whose application sizes are up to ₹ 500,000 shall use the UPI Mechanism.

Furthermore, SEBI vide press release bearing number 12/2023 has approved the proposal for reducing the time period for listing of shares in public Offer from existing 6 working days to 3 working days from the date of the closure of the Offer. The revised timeline of T+3 days shall be made applicable in two phases i.e. voluntary for all public Offers opening on or after September 1, 2023 and mandatory on or after December 1, 2023. Further, SEBI has vide its circular no. SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 reduced the time taken for listing of specified securities after the closure of a public Offer to three Working Days. Accordingly, the Offer will be made under UPI Phase III on a mandatory basis, subject to any circulars, clarification or notification Offerd by the SEBI from time to time.

Phased implementation of Unified Payments Interface

SEBI has Offerd UPI Circulars in relation to streamlining the process of public Offer of equity shares and convertibles. Pursuant to the UPI Circulars, UPI has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by Individual Investor (who applies for minimum application size) through intermediaries with the objective to reduce the time duration from public Offer closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circulars proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

a) Phase I: This phase was applicable from January 01, 2019 and lasted till June 30, 2019. Under this phase, a Retail Individual Bidder, besides the modes of Bidding available prior to the UPI Circulars, also had the option to submit the Bid cum Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public Offer closure to listing continued to be six Working Days.

b) Phase II: This phase has commenced with effect from July 01, 2019 and will continue for a period of three months or floating of five main board public Offers, whichever is later. Under this phase, submission of the Bid cum Application Form by a Retail Individual Investor through intermediaries to SCSBs for blocking of funds has been discontinued and has been replaced by the UPI Mechanism. However, the time duration from public Offer closure to listing continues to be six Working Days during this phase. SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II till further notice.

c) Phase III: This phase has become applicable on a voluntary basis for all Offers opening on or after September 1, 2023 and on a mandatory basis for all Offers opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("**T+3 Notification**"). In this phase, the time duration from public Offer closure to listing has been reduced to three Working Days. The Offer shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification Offerd by the SEBI from time to time, including any circular, clarification or notification which may be Offerd by SEBI.

Pursuant to the UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints in this regard, the relevant SCSB as well as the post – Offer BRLM will be required to compensate the concerned investor.

All SCSBs offering the facility of making applications in public Offers shall also provide the facility to make application using UPI. The Company will be required to appoint one of the SCSBs as a Sponsor Bank to act as a conduit between the Stock Exchange and NPCI in order to facilitate collection of requests and/ or payment instructions of the Individual Bidders using the UPI.

The processing fees for applications made by Individual Bidders (who applies for minimum application size) using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Circular No: SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021.

The list of Banks that have been notified by SEBI as Offerr Banks for UPI are provided on https://www.sebi.gov.in/sebiweb/other/OtherAction.do?doRecognisedFpi=yes&intmId=40.

Designated Intermediaries (other than SCSBs) after accepting Bid Cum Application Form submitted by IIs (without using UPI for payment), NIIs and QIBs captured and upload the relevant details in the electronic bidding system of stock exchange and submitted/delivered the Bid Cum Application Forms to respective SCSBs where the Bidders has a bank account and was not submitted it to any non-SCSB Bank.

Further, for applications submitted to designated intermediaries (other than SCSBs), with use of UPI for payment, after accepting the Bid Cum Application Form, respective intermediary captured and upload the relevant application details, including UPI ID, in the electronic bidding system of stock exchange.

Bidders used only the specified Bid Cum Application Form for making an Application in terms of the Red Herring Prospectus.

The Bid Cum Application Form contained information about the Bidder and the price and the number of Equity Shares that the Bidders wish to apply for. Bid Cum Application Forms downloaded and printed from the websites of the Stock Exchange bear a system generated unique application number. Bidders were required to ensure that the ASBA Account has sufficient credit balance as an amount equivalent to the full Application Amount can be blocked by the SCSB or Sponsor Bank at the time of submitting the Application.

An Investor, intending to subscribe to this Offer, submitted a completed Bid Cum Application Form to any of the following intermediaries (Collectively called – Designated Intermediaries")

Sr. No.	Designated Intermediaries
1.	An SCSB, with whom the bank account to be blocked, is maintained
2.	A syndicate member (or sub-syndicate member)
3.	A stock broker registered with a recognized stock exchange (and whose name is mentioned on the website of the stock exchange as eligible for this activity) ('broker')
4.	A depository participant ('DP') (whose name is mentioned on the website of the stock exchange as eligible for this activity)
5.	A registrar to an Offer and share transfer agent ('RTA') (whose name is mentioned on the website of the stock exchange as eligible for this activity)

Individual investors submitting application with any of the entities at (ii) to (v) above (hereinafter referred as "Intermediaries"), and intending to use UPI, also entered their UPI ID in the Bid Cum Application Form.
The aforesaid intermediary, at the time of receipt of application, gave an acknowledgement to investor, by giving the counter foil or specifying the application number to the investor, as a proof of having accepted the Bid Cum Application Form, in physical or electronic mode, respectively.

The upload of the details in the electronic bidding system of stock exchange was done by:

For Applications submitted by Investors to SCSB:	After accepting the form, SCSB captured and upload the relevant details in the electronic bidding system as specified by the stock exchange and began blocking funds available in the bank account specified in the form, to the extent of the application money specified.
For applications submitted by investors to intermediaries other than SCSBs:	After accepting the Bid Cum Application Form, respective Intermediary captured and upload the relevant details in the electronic bidding system of the stock exchange. Post uploading, they forwarded a schedule as per prescribed format along with the Bid Cum Application Forms to designated branches of the respective SCSBs for blocking of funds within one day of closure of Offer.
For applications submitted by investors to intermediaries other than SCSBs with use of UPI for payment:	After accepting the Bid Cum Application Form, respective intermediary captured and upload the relevant application details, including UPI ID, in the electronic bidding system of stock exchange. Stock exchange shared application details including the UPI ID with sponsor bank on a continuous basis, to enable sponsor bank to initiate mandate request on investors for blocking of funds. Sponsor bank initiated request for blocking of funds through NPCI to investor. Investor accepted mandate request for blocking of funds, on his/her mobile application, associated with UPI ID linked bank account.

Stock exchange validated the electronic bid details with depository's records for DP ID/Client ID and PAN, on a real-time basis and bring the inconsistencies to the notice of intermediaries concerned, for rectification and re-submission within the time specified by stock exchange.

Stock exchange allowed modification of selected fields viz. DP ID/Client ID or Pan ID (Either DP ID/Client ID or Pan ID can be modified but not BOTH), Bank code and Location code, in the bid details already uploaded.

Upon completion and submission of the Bid Cum Application Form to Application Collecting intermediaries, the Bidders were deemed to have authorized our Company to make the necessary changes in the Red Herring Prospectus, without prior or subsequent notice of such changes to the Bidders.

For Individual Bidders (who applies for minimum application size) using UPI Mechanism, the Stock Exchange shared the Bid details (including UPI ID) with the Sponsor Bank on a continuous basis to enable the Sponsor Bank to initiate UPI Mandate Request to RIBs for blocking of funds. The Sponsor Bank initiated request for blocking of funds through NPCI to Individual Bidders (who applies for minimum application size), who accepted the UPI Mandate Request for blocking of funds on their respective mobile applications associated with UPI ID linked bank account. For all pending UPI Mandate Requests, the Sponsor Bank initiated requests for blocking of funds in the ASBA Accounts of relevant Bidders with a

confirmation cut-off time of 12:00 pm on the first Working Day after the Bid/ Offer Closing Date ("Cut-Off Time"). Accordingly, IIBs accepted UPI Mandate Requests for blocking off funds prior to the Cut- Off Time and all pending UPI Mandate Requests at the Cut-Off Time was lapsed. The NPCI maintained an audit trail for every bid entered in the Stock Exchange bidding platform, and the liability to compensate IIBs (using the UPI Mechanism) in case of failed transactions shall be with the concerned entity (i.e. the Sponsor Bank, NPCI or the bankers to an Offer) at whose end the lifecycle of the transaction has come to a halt. The NPCI shall share the audit trail of all disputed transactions/ investor complaints to the Sponsor Banks and the Banker to the Offer. The BRLM shall also be required to obtain the audit trail from the Sponsor Banks and the Banker to the Offer for analysing the same and fixing liability.

(DIR Series) Circular No. 44, dated December 8, 2003 that OCBs which are incorporated and are not under the adverse notice of the RBI are permitted to undertake fresh investments as 138 incorporated non-resident entities in terms of Regulation 5(1) of RBI Notification No.20/2000-RB dated May 3, 2000 under FDI Scheme with the prior approval of Government if the investment is through Government Route and with the prior approval of RBI if the investment is through Automatic Route on case by case basis. OCBs may invest in this Offer provided it obtains a prior approval from the RBI. On submission of such approval along with the Bid Cum Application Form, the OCB shall be eligible to be considered for share allocation.

Maximum and Minimum Application Size

1. For Individual Bidders (who applies for minimum application size)

Minimum Bid Size: Two lots of Equity Shares so that the Bid Amount exceeds ₹ 2,00,000.

In case of revision of Applications, the Individual Bidders have to ensure that the Application Price exceeds ₹ 2,00,000.

2. For Non-Institutional Bidders:

Minimum Bid Size: Three lots of Equity Shares so that the Bid Amount exceeds ₹ 2,00,000

Maximum Bid Size: Such number of Equity Shares in multiples of 1,200 Equity Shares not exceeding the size of the Net Offer (excluding the QIB portion), subject to limits as applicable to the Bidder.

In case of revision in Applications, the Non-Institutional Bidders, who are individuals, have to ensure that the Application Amount is greater than two lots as well as ₹ 2,00,000 for being considered for allocation in the Non-Institutional Portion.

3. QIB:

Minimum Bid Size: Three lots of Equity Shares so that the Bid Amount exceeds ₹ 2,00,000

Maximum Bid Size: Such number of Equity Shares in multiples of 1,200 Equity Shares not exceeding the size of the Net Offer (excluding the Anchor Investor Portion), subject to applicable limits.

Under existing SEBI Regulations, a QIB Bidder cannot withdraw its Application after the Offer Closing Date and is required to pay 100% QIB Margin upon submission of Application.

Bidders were advised to ensure that any single Application from them does not exceed the investment limits or maximum number of Equity Shares that can be held by them under applicable law or regulation or as specified in the Red Herring Prospectus.

The above information is given for the benefit of the Bidders. The Company and the BRLM are not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of this Prospectus. Bidders are advised to make their independent investigations and ensure that the number of Equity Shares applied for do not exceed the applicable limits under laws or regulations.

Method of Bidding Process

Our Company, in consultation with the BRLM decided the Price Band and the minimum Bid lot size for the Offer and the same was advertised in all edition of Financial Express (A widely circulated English national daily newspaper) and all edition of Jansatta (A widely circulated Hindi national daily newspaper) and Ahmedabad edition of Financial Express (A widely circulated Gujarati daily newspaper, Gujarati being the regional language of Gujarat where our registered office is Located) at least two Working Days prior to the Bid / Offer Opening Date. The BRLM and the SCSBs accepted Bids from the Bidders during the Bid / Offer Period.

a) The Bid / Offer Period was for a minimum of three Working Days and did not exceeded 10 Working Days.

b) Each Bid cum Application Form gave the Bidder the choice to Bid for up to three optional prices (for details refer to the paragraph titled "Bids at Different Price Levels and Revision of Bids" below) within the Price Band and specify the demand (i.e., the number of Equity Shares Bid for) in each option. The price and demand options submitted by the Bidder in the Bid cum Application Form was treated as optional demands from the Bidder and was not cumulated. After determination of the Offer Price, the maximum number of Equity Shares Bid for by a Bidder/Applicant at or above the Offer Price was considered for allocation/Allotment and the rest of the Bid(s), irrespective of the Bid Amount, was become automatically invalid.

c) The Bidder / Applicant cannot Bid through another Bid cum Application Form after Bids through one Bid cum Application Form have been submitted to a BRLM or the SCSBs. Submission of a second Bid cum Application Form to either the same or to another BRLM or SCSB was treated as multiple Bid and was liable to be rejected either before entering the Bid into the electronic bidding system, or at any point of time prior to the allocation or Allotment of Equity Shares in this Offer. However, the Bidder could revise the Bid through the Revision Form, the procedure for which is detailed under the paragraph "Build up of the Book and Revision of Bids".

d) Except in relation to the Bids received from the Anchor Investors, the BRLM/the SCSBs entered each Bid option into the electronic bidding system as a separate Bid and generated a Transaction Registration Slip, ("TRS"), for each price and demand option and give the same to the Bidder. Therefore, a Bidder received up to three TRSs for each Bid cum Application Form.

e) The BRLM accepted the Bids from the Anchor Investors during the Anchor Investor Bid/ Offer Period i.e. one working day prior to the Bid/ Offer Opening Date. Bids by QIBs under the Anchor Investor Portion and the QIB Portion was not considered as multiple Bids.

f) Along with the Bid cum Application Form, Anchor Investors made payment in the manner described in "Payment into Escrow Account for Anchor Investors" in the section "*Offer Procedure*" beginning on page 318 of this Prospectus

g) Upon receipt of the Bid cum Application Form, submitted whether in physical or electronic mode, the Designated Branch of the SCSB verified if sufficient funds equal to the Bid Amount were available in the ASBA Account, as mentioned in the Bid cum Application Form, prior to uploading such Bids with the Stock Exchange.

h) If sufficient funds were not available in the ASBA Account, the Designated Branch of the SCSB rejected such Bids and such Bids was not uploaded with the Stock Exchange.

i) If sufficient funds were available in the ASBA Account, the SCSB blocked an amount equivalent to the Bid Amount mentioned in the Bid cum Application Form and entered each Bid option into the electronic bidding system as a separate Bid and generated a TRS for each price and demand option. The TRS was furnished to the ASBA Bidder on request.

j) The Bid Amount shall remain blocked in the aforesaid ASBA Account until finalization of the Basis of Allotment and consequent transfer of the Bid Amount against the Allotted Equity Shares to the Public Offer Account, or until withdrawal/failure of the Offer or until withdrawal/rejection of the Bid cum Application Form, as the case may be. Once the Basis of Allotment is finalized, the Registrar to the Offer shall send an appropriate request to the SCSB for unblocking the relevant ASBA Accounts and for transferring the amount allocable to the successful Bidders to the Public Offer Account. In case of withdrawal/failure of the Offer, the blocked amount shall be unblocked on receipt of such information from the Registrar to the Offer.

Participation by Associates /Affiliates of BRLM and the Syndicate Members

The BRLM and the Syndicate Members, if any, was not allowed to purchase in this Offer in any manner, except towards fulfilling their underwriting obligations. However, the associates and affiliates of the BRLM and the Syndicate Members, if any, may subscribe the Equity Shares in the Offer, either in the QIB Category or in the Non-Institutional Category as may be applicable to such Bidders, where the allocation is on a proportionate basis and such subscription may be on their own account or on behalf of their clients.Neither the BRLM nor any persons related to the BRLM (other than Mutual Funds sponsored by entities related to the BRLM), Promoters and Promoter Group can apply in the Offer under the Anchor Investor Portion.

Option to Subscribe in the Offer

Bids by FPIs

In terms of the SEBI FPI Regulations, the Offer of Equity Shares to a single FPI or an investor group (which means the same multiple entities having common ownership directly or indirectly of more than 50% or common control) must be below 10% of our post-Offer Equity Share capital. Further, in terms of the FEMA NDI Rules, with effect from April 1, 2020, the aggregate FPI investment limit is up to 24 % of paid-up equity capital on fully diluted basis or paid-up value of each series of debentures or preference shares or share warrants. However, this limit of 24 % may be increased upto sectoral cap/statutory ceiling, as applicable, by the Indian company concerned by passing a resolution by its Board of Directors followed by passing of a special resolution to that effect by its general body.

Under the current FDI Policy of 2020, FDI in companies engaged in sectors/ activities which are not listed in the FDI Policy is permitted up to 100% of the paid up share capital of such company under the automatic route, subject to compliance with certain prescribed conditions. Accordingly, at present 100 % foreign direct investment through automatic route is permitted in the sector in which our Company operates.

Further. Foreign Portfolio Investment in our Company up to aggregate foreign investment level of 49% or sectoral/statutory cap, whichever is lower, will not be subject to either Government approval or compliance of sectoral conditions, if such investment does not result in transfer of ownership and control of Indian entities from resident Indian citizens or transfer of ownership or control to persons resident outside India. Other investments by a person resident outside India shall be subject to conditions of Government approval and compliance of sectoral conditions as laid down in Schedule I of Foreign Exchange Management (Non-Debt Instruments) Rules, 2019 ("NDI Rules"). The total foreign investment, direct and indirect, in the issuing entity will not exceed the sectoral/statutory cap.

FPIs are permitted to participate in the Offer subject to compliance with conditions and restrictions which may be specified by the Government from time to time. In case of Bids made by FPIs, a certified copy of the certificate of registration issued under the SEBI FPI Regulations is required to be attached to the Bid cum Application Form, failing which our Company reserves the right to reject any Bid without assigning any reason. FPIs who wish to participate in the Offer are advised to use the Bid cum Application Form for Non-Residents.

In terms of the FEMA, for calculating the aggregate holding of FPIs in a company, holding of all registered FPIs shall be included.

The FEMA NDI Rules were enacted on October 17, 2019 in supersession of the Foreign Exchange Management (Transfer or Offer of Security by a Person Resident outside India) Regulations, 2017, except as respects things done or omitted to be done before such supersession. FPIs are permitted to participate in the Offer subject to compliance with conditions and restrictions which may be specified by the Government from time to time.

Subject to compliance with all applicable Indian laws, rules, regulations, guidelines and approvals in terms of Regulation 21 of the SEBI FPI Regulations, an FPI, may Offer, subscribe to or otherwise deal in offshore derivative instruments(as defined under the SEBI FPI Regulations as any instrument, by whatever name called, which is issued overseas by a FPI against securities held by it in India, as its underlying) directly or indirectly, only in the event (i) such offshore derivative instruments are issued only by persons registered as Category I FPIs; (ii) such offshore derivative instruments are issued only to persons eligible for registration as Category I FPIs; (iii) such offshore derivative instruments are issued after compliance with 'know your client' norms; and (iv) such other conditions as may be specified by SEBI from time to time. An FPI issuing off-shore derivate instruments is also required to ensure that any transfer of off-shore derivative instruments issued by, or on behalf of it subject to, inter alia, the following conditions:

(i). Such offshore derivative instruments are transferred to person subject to fulfilment of SEBI FPI Regulations; and

(ii). Prior consent of the FPI is obtained for such transfer, except when the persons to whom the offshore derivative instruments are to be transferred are pre-approved by the FPI.

Bids by FPIs which utilise the multi-investment manager structure in accordance with the Operational Guidelines for Foreign Portfolio Investors and Designated Depository Participants issued to facilitate implementation of the SEBI FPI Regulations ("Operational FPI Guidelines"), submitted with the same PAN but with different beneficiary account numbers,

Client IDs and DP IDs shall not be treated as multiple Bids ("MIM Bids"). It is hereby clarified that FPIs bearing the same PAN may be treated as multiple Bids by a Bidder and may be rejected, except for Bids from FPIs that utilise the multi-investment manager structure in accordance with the Operational FPI Guidelines (such structure referred to as "MIM Structure"). In order to ensure valid Bids, FPIs making MIM Bids using the same PAN and with different beneficiary account numbers, Client IDs and DP IDs, are required to submit a confirmation that their Bids are under the MIM Structure and indicate the name of their investment managers in such confirmation which shall be submitted along with each of their Bid cum Application Forms. In the absence of such confirmation from the relevant FPIs, such MIM Bids shall be rejected.

Bids by SEBI-registered AIFs, VCFs and FVCIs

The SEBI FVCI Regulations, SEBI VCF Regulations and the SEBI AIF Regulations prescribe, inter alia, the investment restrictions on the FVCIs, VCFs and AIFs registered with SEBI respectively. FVCIs can invest only up to applicable limited of the investible funds by way of subscription to an initial public offering. Category I AIF and Category II AIF cannot invest more than 25% of the investible funds in one Investee Company directly or through investment in the units of other AIFs. A Category III AIF cannot invest more than 10% of the investible funds in one Investee Company directly or through investment in the units of other AIFs. AIFs which are authorized under the fund documents to invest in units of AIFs are prohibited from offering their units for subscription to other AIFs. A VCF registered as a Category I AIF, as defined in the SEBI AIF Regulations, cannot invest more than 1/3rd of its investible funds by way of subscription to an initial public offering of a venture capital undertaking. Additionally, a VCF that has not re-registered as an AIF under the SEBI AIF Regulations shall continue to be regulated by the SEBI VCF Regulations (and accordingly shall not be allowed to participate in the Offer) until the existing fund or scheme managed by the fund is wound up and such funds shall not launch any new scheme after the notification of the SEBI AIF Regulations.

There is no reservation for Eligible NRIs, FPIs and FVCIs and all Bidders will be treated on the same basis with other categories for the purpose of allocation.

Further, the shareholding of VCFs, category I AIFs or category II AIFs and FVCIs holding Equity Shares prior to Offer, shall be locked-in for a period of at least one year from the date of purchase of such Equity Shares.

All non-resident investors should note that refunds, dividends and other distributions, if any, will be payable in Indian Rupees only and net of bank charges and commission.

The Company or the BRLM will not be responsible for loss, if any, incurred by the Bidder on account of conversion of foreign currency.

However, a banking company would be permitted to invest in excess of 10% but not exceeding 30% of the paid-up share capital of such investee company, subject to prior approval of the RBI if (i) the investee company is engaged in non-financial activities permitted for banking companies in terms of Section 6(1) of the Banking Regulation Act; or (ii) the additional acquisition is through restructuring of debt, or to protect the banking company's interest on loans/investments made to a company. The bank is required to submit a time bound action plan to the RBI for the disposal of such shares within a specified period. The aggregate investment by a banking company along with its subsidiaries, associates or joint ventures or entities directly or indirectly controlled by the bank; and mutual funds managed by asset management

companies controlled by the bank, more than 20% of the investee company's paid-up share capital engaged in non-financial services. However, this cap doesn't apply to the cases mentioned in (i) and (ii) above. The aggregate equity investments made by a banking company in all subsidiaries and other entities engaged in financial services and non-financial services, including overseas investments shall not exceed 20% of the bank's paid-up share capital and reserves.

In terms of the Master Circular on Basel III Capital Regulations dated July 1, 2014, as amended (i) a bank's investment in the capital instruments Offerd by banking, financial and insurance entities should not exceed 10% of its capital funds; (ii) banks should not acquire any fresh stake in a bank's equity shares, if by such acquisition, the investing bank's holding exceeds 5% of the investee bank's equity capital; (iii) equity investment by a bank in a subsidiary company, financial services company, financial institution, stock and other exchanges should not exceed 10% of the bank's paid-up share capital and reserves; (iv) equity investment by a bank in companies engaged in non-financial services activities would be subject to a limit of 10% of the investee company's paid- up share capital or 10% of the bank's paid-up share capital and reserves, whichever is less; and (v) a banking company is restricted from holding shares in any company, whether as pledgee, mortgagee or absolute owner, of an amount exceeding 30% of the paid-up share capital of that company or 30% of its own paid-up share capital and reserves, whichever is less. For details in relation to the investment limits under Master Direction – Ownership in Private Sector Banks, Directions, 2016, see *"Key Industry Regulation"* beginning on page 182.

Bids By SCSBs

SCSBs participating in the Offer are required to comply with the terms of the circulars Offerd by the SEBI dated September 13, 2012 and January 2, 2013. Such SCSBs are required to ensure that for making applications on their own account using ASBA, they should have a separate account in their own name with any other SEBI registered SCSBs. Further, such account shall be used solely for the purpose of making application in public Offers and clear demarcated funds should be available in such account for such applications.

Bids by Systemically Important NBFCs

In case of Bids made by Systemically Important NBFCs registered with RBI, certified copies of: (i) the certificate of registration Offerd by RBI, (ii) the last audited financial statements on a standalone basis, (iii) a net worth certificate from its statutory auditors, and (iv) such other approval as may be required by the Systemically Important NBFCs are required to be attached to the Bid cum Application Form. Failing this, our Company, in consultation with the BRLM, reserves the right to reject any Bid without assigning any reason thereof.

Systemically Important NBFCs participating in the Offer shall comply with all applicable regulations, directions, guidelines and circulars Offerd by the RBI from time to time.

The investment limit for Systemically Important NBFCs shall be as prescribed by RBI from time to time.

Bids by Insurance Companies

In case of Bids made by insurance companies registered with the IRDAI, a certified copy of certificate of registration Offerd by IRDAI must be attached to the Bid cum Application Form. Failing this, our Company, in consultation with the BRLM, reserves the right to reject any Bid without assigning any reason thereof.

The exposure norms for insurers are prescribed under the IRDAI Investment Regulations, based on investments in equity shares of the investee company, the entire group of the investee company and the industry sector in which the investee company operates. Insurance companies participating in the Offer are advised to refer to the IRDAI Investment Regulations 2016, as amended, which are broadly set forth below:

a) equity shares of a company: the lower of 10%* of the outstanding equity shares (face value) or 10% of the respective fund in case of life insurer or 10% of investment assets in case of general insurer or reinsurer;

b) the entire group of the investee company: not more than 15% of the respective fund in case of a life insurer or 15% of investment assets in case of a general insurer or reinsurer or 15% of the investment assets in all companies belonging to the group, whichever is lower; and

c) the industry sector in which the investee company operates: not more than 15% of the fund of a life insurer or a general insurer or a reinsurer or 15% of the investment asset, whichever is lower.

The maximum exposure limit, in the case of an investment in equity shares, cannot exceed the lower of an amount of 10% of the investment assets of a life insurer or general insurer and the amount calculated under (a), (b) and (c) above, as the case may be.

**The above limit of 10% shall stand substituted as 15% of outstanding equity shares (face value) for insurance companies with investment assets of ₹ 25,000,000 lakhs or more and 12% of outstanding equity shares (face value) for insurers with investment assets of ₹ 5,000,000 lakhs or more but less than ₹ 25,000,000 lakhs.*

Insurance companies participating in this Offer shall comply with all applicable regulations, guidelines and circulars Offerd by IRDAI from time to time.

Offer Procedure for Application Supported by Blocked Account (ASBA) Bidders

In accordance with the SEBI Circular No. CIR/CFD/POLICYCELL/11/2015 dated November 10, 2015 all the Bidders have to compulsorily apply through the ASBA Process. Our Company and the Book Running Lead Manager are not liable for any amendments, modifications, or changes in applicable laws or regulations, which may occur after the date of this Prospectus. ASBA Bidders are advised to make their independent investigations and to ensure that the ASBA Bid Cum Application Form is correctly filled up, as described in this section.

The lists of banks that have been notified by SEBI to act as SCSB (Self Certified Syndicate Banks) for the ASBA Process are provided on https://www.sebi.gov.in/sebiweb/other/OtherAction.do?doRecognised=yes. For details on designated branches of SCSB collecting the Bid Cum Application Form, please refer the above-mentioned SEBI link.

Terms of payment

The entire Offer price of ₹ 105 per share is payable on application. In case of allotment of lesser number of Equity Shares than the number applied, the Registrar shall instruct the SCSBs to unblock the excess amount paid on Application to the Bidders.

SCSBs will transfer the amount as per the instruction of the Registrar to the Public Offer Account, the balance amount after transfer will be unblocked by the SCSBs.

The Bidders should note that the arrangement with Banker to the Offer or the Registrar is not prescribed by SEBI and has been established as an arrangement between our Company, Banker to the Offer and the Registrar to the Offer to facilitate collections from the Bidders.

Payment mechanism

The Bidders shall specify the bank account number in their Bid Cum Application Form and the SCSBs shall block an amount equivalent to the Application Amount in the bank account specified in the Bid Cum Application Form. The SCSB shall keep the Application Amount in the relevant bank account blocked until withdrawal/ rejection of the Application or receipt of instructions from the Registrar to unblock the Application Amount. However, all Biddersshall neither withdraw nor lower the size of their applications at any stage. In the event of withdrawal or rejection of the Bid Cum Application Form or for unsuccessful Bid Cum Application Forms, the Registrar to the Offer shall give instructions to the SCSBs to unblock the application money in the relevant bank account within one day of receipt of such instruction. The Application Amount shall remain blocked in the ASBA Account until finalization of the Basis of Allotment in the Offer and consequent transfer of the Application Amount to the Public Offer Account, or until withdrawal/ failure of the Offer or until rejection of the Application by the ASBA Bidder, as the case may be.

Please note that, in terms of SEBI Circular No. CIR/CFD/POLICYCELL/11/2015 dated November 10, 2015 and the SEBI (Offer of Capital and Disclosure Requirements) Regulations, 2018, all the investors applying in a public Offer shall use only Application Supported by Blocked Amount (ASBA) process for application providing details of the bank account which will be blocked by the Self-Certified Syndicate Banks (SCSBs) for the same. Further, pursuant to SEBI Circular No. SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 01, 2018, Individual Investors applying in public Offer have to use UPI as a payment mechanism with Application Supported by Blocked Amount for making application.

Payment into Escrow Account for Anchor Investors

All the investors other than Anchor Investors are required to bid through ASBA Mode. Anchor Investors are requested to note the following:

Our Company in consultation with the Book Running Lead Manager, in its absolute discretion, will decide the list of Anchor Investors to whom the CAN will be sent, pursuant to which the details of the Equity Shares allocated to them in their respective names will be notified to such Anchor Investors. For Anchor Investors, the payment instruments for payment into the Escrow Account should be drawn in favour of:

a. In case of Resident Anchor Investors: ― VECTRAS ENPROCON LIMITED ANCHOR ACCOUNT R

b. In case of Non-Resident Anchor Investors: ― VECTRAS ENPROCON LIMITED-ANCHOR ACCOUNT NR

Anchor Investor should note that the escrow mechanism is not prescribed by SEBI and has been established as an arrangement between our Company, the Syndicate, the Escrow Collection Bank and the Registrar to the Offer to facilitate collections from the Anchor Investors.

Build of the Book

a) Bids received from various Bidders through the Designated Intermediaries may be electronically uploaded on the Bidding Platform of the Stock Exchange on a regular basis. The book gets built up at various price levels. This information may be available with the BRLM at the end of the Bid/ Offer Period.

b) Based on the aggregate demand and price for Bids registered on the Stock Exchange Platform, a graphical representation of consolidated demand and price as available on the websites of the Stock Exchange may be made available at the Bidding centres during the Bid/ Offer Period.

Withdrawal and Cancellation of Bids

Withdrawal and cancellation shall not be permissible for all category of Investors. Once a bid has been submitted by an Investor in the prescribed manner, it shall be considered final and binding. Further the Investors will not have the option to revise the bid amount downwards their bids after submission.

Price Discovery and Allocation

a) Based on the demand generated at various price levels, our Company in consultation with the BRLM, shall finalize the Offer Price and the Anchor Investor Offer Price.

b) The SEBI ICDR Regulations, 2018 specify the allocation or Allotment that may be made to various categories of Bidders in an Offer depending on compliance with the eligibility conditions. Certain details pertaining to the percentage of Offer size available for allocation to each category is disclosed overleaf of the Bid cum Application Form and in the RHP. For details in relation to allocation, the Bidder may refer to the RHP.

c) Under-subscription in any category (except QIB Category) is allowed to be met with spill over from any other category or combination of categories at the discretion of the Offerr and the in consultation with the BRLM and the Designated Stock Exchange and in accordance with the SEBI ICDR Regulations. Unsubscribed portion in QIB Category is not available for subscription to other categories.

d) In case of under subscription in the Offer, spill-over to the extent of such under-subscription may be permitted from the Reserved Portion to the Offer. For allocation in the event of an undersubscription applicable to the Offerr, Bidders may refer to the RHP.

e) In case if the Individual Investor (who applies for minimum application size) category is entitled to more than the allocated portion on proportionate basis, the category shall be allotted that higher percentage.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Offer; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Offer size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Offerr at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Offerr is able to Offer the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Offerr, in consultation with the BRLM, may finalise the Offer Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Offer Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

General Instructions

Flow of Events from the closure of bidding period (T DAY) Till Allotment:

- On T Day, RTA to validate the electronic bid details with the depository records and also reconcile the final certificates received from the Sponsor Bank for UPI process and the SCSBs for ASBA and Syndicate ASBA process with the electronic bid details.

- RTA identifies cases with mismatch of account number as per bid file / Final Certificate and as per applicant's bank account linked to depository demat account and seek clarification from SCSB to identify the applications with third party account for rejection.

- Third party confirmation of applications to be completed by SCSBs on T+1 day.

- RTA prepares the list of final rejections and circulate the rejections list with BRLM/ Company for their review/ comments.

- Post rejection, the RTA submits the basis of allotment with the Designated Stock Exchange (DSE).

- The Designated Stock Exchange (DSE), post verification approves the basis and generates drawal of lots wherever applicable, through a random number generation software.

- The RTA uploads the drawal numbers in their system and generates the final list of allotees as per process mentioned below:

Process for generating list of allotees: -

- Instruction is given by RTA in their Software System to reverse category wise all the application numbers in the ascending order and generate the bucket /batch as per the allotment ratio. For example, if the application number is 78654321 then system reverses it to 12345687 and if the ratio of allottees to applicants in a category is 2:7 then the

system will create lots of 7. If the drawal of lots provided by Designated Stock Exchange (DSE) is 3 and 5 then the system will pick every 3rd and 5th application in each of the lot of the category and these applications will be allotted the shares in that category.

- In categories where there is proportionate allotment, the Registrar will prepare the proportionate working based on the oversubscription times.

- In categories where there is undersubscription, the Registrar will do full allotment for all valid applications.

- On the basis of the above, the RTA will work out the allotees, partial allotees and non- allottees, prepare the fund transfer letters and advice the SCSBs to debit or unblock the respective accounts.

Basis of Allotment

a. For Individual Bidders (who applies for minimum application size)

Bids received from the Individual Bidders (who applies for minimum application size) at or above the Offer Price shall be grouped together to determine the total demand under this category. The Allotment to all the successful Individual Bidders (who applies for minimum application size) will be made at the Offer Price.

The Offer size less Allotment to Non-Institutional and QIB Bidders shall be available for allotment to Individual Bidders (who applies for minimum application size) who have Bid in the Offer at a price that is equal to or greater than the Offer Price. If the aggregate demand in this category is less than or equal to 16,80,000 Equity Shares at or above the Offer Price, full Allotment shall be made to the Individual Bidders (who applies for minimum application size) to the extent of their valid Bids.

If the aggregate demand in this category is greater than 16,80,000 Equity Shares at or above the Offer Price, the Allotment shall be made on a proportionate basis up to 2,400 Equity Shares i.e two lots of Equity Shares. For the method of proportionate Basis of Allotment, refer below.

b. For Non-Institutional Bidders

Bids received from Non-Institutional Bidders at or above the Offer Price shall be grouped together to determine the total demand under this category. The Allotment to all successful Non- Institutional Bidders will be made at the Offer Price.

The Offer size less Allotment to QIBs and Individual Bidders (who applies for minimum application size) shall be available for allotment to Non- Institutional Bidders who have Bid in the Offer at a price that is equal to or greater than the Offer Price. If the aggregate demand in this category is less than or equal to 7,20,000 Equity Shares at or above the Offer Price, full allotment shall be made to Non-Institutional Bidders to the extent of their demand.

In case the aggregate demand in this category is greater than 7,20,000 Equity Shares at or above the Offer Price, Allotment shall be made on a proportionate basis with a minimum allotment of three lots of Equity Shares and in multiples of 1,200 Equity Shares thereafter. For the method of proportionate Basis of Allotment refer below.

c. For QIBs

For the Basis of Allotment to Anchor Investors, Bidders/Applicants may refer to the SEBI ICDR Regulations or RHP / Prospectus. Bids received from QIBs Bidding in the QIB Category (net of Anchor Portion) at or above the Offer Price may be grouped together to determine the total demand under this category. The QIB Category may be available for Allotment to QIBs who have Bid at a price that is equal to or greater than the Offer Price. Allotment may be undertaken in the following manner: Allotment shall be undertaken in the following manner:

a) In the first instance allocation to Mutual Funds for 5% of the QIB Portion shall be determined as follows:

- In the event that Bids by Mutual Fund exceeds 5% of the QIB Portion, allocation to Mutual Funds shall be done on a proportionate basis for 5.01% of the QIB Portion.

- In the event that the aggregate demand from Mutual Funds is less than 5% of the QIB Portion then all Mutual Funds shall get full Allotment to the extent of valid Bids received above the Offer Price.

- Equity Shares remaining unsubscribed, if any, not allocated to Mutual Funds shall be available for Allotment to all QIB Bidders as set out in (b) below;

b) In the second instance allotment to all QIBs shall be determined as follows:

- In the event of oversubscription in the QIB Portion, all QIB Bidders who have submitted Bids above the Offer Price shall be allotted Equity Shares on a proportionate basis, with a minimum allotment of three lots of Equity Shares and in multiples of 1,200 Equity Shares thereafter for 50% of the QIB Portion.

- Mutual Funds, who have received allocation as per (a) above, for less than the number of Equity Shares Bid for by them, are eligible to receive Equity Shares on a proportionate basis, up to a minimum of 2,400 Equity Shares and in multiples of 1,200 Equity Shares thereafter, along with other QIB Bidders.

- Under-subscription below 50% of the QIB Portion, if any, from Mutual Funds, would be included for allocation to the remaining QIB Bidders on a proportionate basis. The aggregate Allotment to QIB Bidders shall not be more than 48,000 Equity Shares.

d. Allotment to Anchor Investor

a) Allocation of Equity Shares to Anchor Investors at the Anchor Investor Allocation Price will be at the discretion of the Offerr, in consultation with the BRLM, subject to compliance with the following requirements:

i) not more than 60% of the QIB Portion will be allocated to Anchor Investors;

ii) one-third of the Anchor Investor Portion shall be reserved for domestic Mutual Funds, subject to valid Bids being received from domestic Mutual Funds at or above the price at which allocation was done to other Anchor Investors; and

iii) allocation to Anchor Investors shall be on a discretionary basis and subject to:

- a maximum number of two Anchor Investors for allocation up to ₹2 crores;

- a minimum number of two Anchor Investors and maximum number of 15 Anchor Investors for allocation of more than ₹ 2 crores and up to ₹ 25 crores subject to minimum allotment of ₹ 1 crore per such Anchor Investor; and

- In case of allocation above twenty-five crore rupees; a minimum of 5 such investors and a maximum of 15 such investors for allocation up to twenty-five crore rupees and an additional 10 such investors for every additional twenty-five crore rupees or part thereof, shall be permitted, subject to a minimum allotment of one crore rupees per such investor.

b) A physical book is prepared by the Registrar on the basis of the Anchor Investor Application Forms received from Anchor Investors. Based on the physical book and at the discretion of the Offerr, in consultation with the BRLM, selected Anchor Investors will be sent a CAN and if required, a revised CAN.

e. In the event that the Offer Price is higher than the Anchor Investor Allocation Price:

Anchor Investors will be sent a revised CAN within one day of the Pricing Date indicating the number of Equity Shares allocated to such Anchor Investor and the pay-in date for payment of the balance amount. Anchor Investors are then required to pay any additional amounts, being the difference between the Offer Price and the Anchor Investor Allocation Price, as indicated in the revised CAN within the pay-in date referred to in the revised CAN. Thereafter, the Allotment Advice will be Offerd to such Anchor Investors.

f. In the event the Offer Price is lower than the Anchor Investor Allocation Price:

Anchor Investors who have been Allotted Equity Shares will directly receive Allotment Advice.

g. Basis of Allotment for QIBs (other than Anchor Investors) and NIIs in case of Over Subscribed Offer:

In the event of the Offer being Over-Subscribed, the company may finalise the Basis of Allotment in consultation with the BSE Limited (The Designated Stock Exchange). The allocation may be made in marketable lots on proportionate basis as set forth hereunder:

a) The total number of Shares to be allocated to each category as a whole shall be arrived at on a proportionate basis i.e. the total number of Shares applied for in that category multiplied by the inverse of the oversubscription ratio (number of Bidders in the category multiplied by number of Shares applied for).

b) The number of Shares to be allocated to the successful Bidders will be arrived at on a proportionate basis in marketable lots (i.e. Total number of Shares applied for into the inverse of the over subscription ratio).

c) For Bids where the proportionate allotment works out to less than 3600 equity shares the allotment will be made as follows:

- Each successful Bidder shall be allotted a minimum allotment of three lots of Equity Shares; and

- The successful Bidder out of the total bidders for that category shall be determined by draw of lots in such a manner that the total number of Shares allotted in that category is equal to the number of Shares worked out as per (b) above.

a) If the proportionate allotment to a Bidder works out to a number that is not a multiple of 1,200 equity shares, the Bidder would be allotted Shares by rounding off to the nearest multiple of 1,200 equity shares subject to a minimum allotment of 3600 equity shares.

b) If the Shares allotted on a proportionate basis to any category is more than the Shares allotted to the Bidders in that category, the balance available Shares or allocation shall be first adjusted against any category, where the allotted Shares are not sufficient for proportionate allotment to the successful Bidder in that category, the balance Shares, if any, remaining after such adjustment will be added to the category comprising Bidder applying for the minimum number of shares. If as a result of the process of rounding off to the nearest multiple of 1,200 Equity Shares, results in the actual allotment being higher than the shares offered, the final allotment may be higher at the sole discretion of the Board of Directors, up to 110% of the size of the Offer specified under the Capital Structure mentioned in the RHP.

Individual Investor' means an investor who applies for two lots as well as shares of value of more than ₹ 2,00,000. Investors may note that in case of over subscription allotment shall be on proportionate basis and will be finalized in consultation with BSE Limited - the Designated Stock Exchange.

The Executive Director / Managing Director of BSE Limited - the Designated Stock Exchange in addition to Book Running Lead Manager and Registrar to the Offer shall be responsible to ensure that the basis of allotment is finalized in a fair and proper manner in accordance with the SEBI (ICDR) Regulations.

RESTRICTION ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 ("**FEMA**"). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy upto any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India ("**RBI**") and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India ("**DIPP**").

The Government of India, from time to time, has made policy pronouncements on Foreign Direct Investment ("**FDI**") through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India ("**DIPP**"), has Offerd consolidated FDI Policy Circular of 2020 ("**FDI Policy 2020**"), which with effect from October 15, 2020, consolidates and supersedes all previous press notes, press releases and clarifications on FDI Policy Offerd by the DIPP that were in force. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Policy 2020 will be valid until the DIPP Offers an updated circular. The RBI also Offers Master Circular on Foreign Investment in India every year. Presently, FDI in India is being governed by Master Circular on Foreign Investment as updated from time to time by RBI. In terms of the Master Circular, an Indian company may Offer fresh shares to people resident outside India (who is eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh Offer of shares shall be subject to inter-alia, the pricing guidelines prescribed under the Master Circular.

Under the current FDI Policy of 2020, FDI in companies engaged in sectors/ activities which are not listed in the FDI Policy is permitted up to 100% of the paid-up share capital of such company under the automatic route, subject to compliance with certain prescribed conditions. Accordingly, at present 100 % foreign direct investment through automatic route is permitted in the sector in which our Company operates.

In case of investment in sectors through Government Route approval from competent authority as mentioned in Chapter 4 of the FDI Policy 2020 has to be obtained by the Company. The transfer of shares between an Indian resident to a non-resident does not require the prior approval of the RBI, subject to fulfilment of certain conditions as specified by DIPP/RBI, from time to time. Such conditions include: (i) where the transfer of shares requires the prior approval of the Government as per the extant FDI policy provided that: a) the requisite approval of the Government has been obtained; and b) the transfer of shares adheres with the pricing guidelines and documentation requirements as specified by the Reserve Bank of India from time to time.; (ii) where the transfer of shares attract SEBI (SAST) Regulations subject to the adherence with the pricing guidelines and documentation requirements as specified by reserve Bank of India from time to time.; (iii) where the transfer of shares does not meet the pricing guidelines under the FEMA, 1999 provided that: a) The resultant FDI is in compliance with the extant FDI policy and FEMA regulations in terms of sectoral caps, conditionality's (such as minimum capitalization, etc.), reporting requirements, documentation etc.; b) The pricing for the transaction is compliant with the specific/explicit, extant and relevant SEBI regulations/guidelines (such as IPO, Book building, block deals, delisting, exit, open offer/substantial acquisition/SEBI SAST); and Chartered Accountants Certificate to the effect that compliance with the relevant SEBI regulations/guidelines as indicated above is attached to the form FC-TRS to be filed with the AD bank and iv) where the investee company is in the financial sector provided that: a) Any 'fit and proper/due diligence' requirements as regards the non-resident investor as stipulated by the respective financial sector regulator, from time to time, have been complied with; and b) The FDI policy and FEMA regulations in terms of sectoral caps, conditionality's (such as minimum capitalization, pricing, etc.), reporting requirements, documentation etc., are complied with. As per the existing policy of the Government of India, OCBs cannot participate in this Offer and in accordance with the extant FDI guidelines on sectoral caps, pricing guidelines etc. as amended by Reserve bank of India, from time to time. Investors are advised to confirm their eligibility under the relevant laws before investing and / or subsequent purchase or sale transaction in the Equity Shares of Our Company. Investors will not offer, sell, pledge or transfer the Equity Shares of our Company to any person who is not eligible under applicable laws, rules, regulations, guidelines. Our Company, the Underwriters and their respective directors, officers, agents, affiliates and representatives, as applicable, accept no responsibility or liability for advising any investor on whether such investor is eligible to acquire Equity Shares of our Company.

Investment conditions/restrictions for overseas entities

Under the current FDI Policy 2020, the maximum amount of Investment (sectoral cap) by foreign investor in an issuing entity is composite unless it is explicitly provided otherwise including all types of foreign investments, direct and indirect regardless of whether it has been made for FDI, FPI, NRI/OCI, LLPs, FVCI, Investment Vehicles and DRs under Schedule 1, 2, 3, 6, 7, 8, 9, and 11 of FEMA (Transfer or Offer of Security by Persons Resident outside India) Regulations, 2017.

Any equity holding by a person resident outside India resulting from conversion of any debt instrument under any arrangement shall be reckoned as foreign investment under the composite cap. Portfolio Investment upto aggregate foreign investment level of 49% or sectoral/statutory cap, whichever is lower, will not be subject to either Government approval or compliance of sectoral conditions, if such investment does not result in transfer of ownership and/or control of Indian entities from resident Indian citizens to non-resident entities. Other foreign investments will be subject to conditions of Government approval and compliance of sectoral conditions as per FDI Policy. The total foreign investment, direct and indirect, in the issuing entity will not exceed the sectoral/statutory cap.

i. Investment by FPIs under Portfolio Investment Scheme (PIS):

With regards to purchase/sale of capital instruments of an Indian company by an FPI under PIS the total holding by each FPI or an investor group as referred in SEBI (FPI) Regulations, 2014 shall not exceed 10 % of the total paid-up equity capital on a fully diluted basis or less than 10% of the paid-up value of each series of debentures or preference shares or share warrants Offerd by an Indian company and the total holdings of all FPIs put together shall not exceed 24 % of paid-up equity capital on fully diluted basis or paid-up value of each series of debentures or preference shares or share warrants. The said limit of 10 percent and 24 percent are called the individual and aggregate limit, respectively. However, this limit of 24 % may be increased upto sectoral cap/statutory ceiling, as applicable, by the Indian company concerned by passing a resolution by its Board of Directors followed by passing of a special resolution to that effect by its general body.

ii. Investment by NRI or OCI on repatriation basis:

The purchase/sale of equity shares, debentures, preference shares and share warrants Offerd by an Indian company (hereinafter referred to as "**Capital Instruments**") of a listed Indian company on a recognised stock exchange in India by Non-Resident Indian (NRI) or Overseas Citizen of India (OCI) on repatriation basis is allowed subject to certain conditions under Schedule 3 of the FEMA (Transfer or Offer of security by a person resident outside India) Regulations, 2017 i.e.: The total holding by any individual NRI or OCI shall not exceed 5 percent of the total paid-up equity capital on a fully diluted basis or should not exceed 5 percent of the paid-up value of each series of debentures or preference shares or share warrants Offerd by an Indian company and the total holdings of all NRIs and OCIs put together shall not exceed 10 percent of the total paid-up equity capital on a fully diluted basis or shall not exceed 10 percent of the paid-up value of each series of debentures or preference shares or share warrants; provided that the aggregate ceiling of 10 percent may be raised to 24 percent if a special resolution to that effect is passed by the general body of the Indian company.

iii. Investment by NRI or OCI on non-repatriation basis:

As per current FDI Policy 2020, schedule 4 of FEMA (Transfer or Offer of Security by Persons Resident outside India) Regulations – Purchase/ sale of Capital Instruments or convertible notes or units or contribution to the capital of an LLP by a NRI or OCI on non-repatriation basis, will be deemed to be domestic investment at par with the investment made by residents. This is further subject to remittance channel restrictions. The Equity Shares have not been and will not be registered under the U.S. Securities Act of 1933, as amended ("**US Securities Act**") or any other state securities laws in the United States of America and may not be sold or offered within the United States of America, or to, or for the account or benefit of "US Persons" as defined in Regulation S of the U.S. Securities Act, except pursuant to exemption from, or in a transaction not subject to, the registration requirements of US Securities Act and applicable state securities laws. Accordingly, the equity shares are being offered and sold only outside the United States of America in an offshore transaction in reliance upon Regulation S under the US Securities Act and the applicable laws of the jurisdiction where those offers and sale occur.

		Act, and subject to the following conditions namely: (a) Such further shares shall be offered to the persons who, at the dateof the offer, are holder of the equity shares of the Company in proportion, as nearly as circumstances admit, to the capital paid up on those shares at that date. (b) The offer aforesaid shall be made by notice specifying the number of shares offered and limiting a time not being less than twenty-one days, from the date of the offer within which the offer, if not accepted, will be deemed to have been declined. (c) The offer aforesaid shall be deemed to include a right exercisable by the person concerned to renounce the shares offered to him or any of them in favour of any other person and the notice referred to in clause (b) shall contain a statement of this right. (d) After the expiry of the time specified in the notice aforesaid, or in respect of earlier intimation from the person to whom such notice is given that he declines to accept the shares offered, the Board may dispose of them in such manner as it thinks most beneficial to the Company. I. The Directors may, with the sanction of the Company in General Meeting by means of a special resolution, offer and allot shares to any person at their discretion by following the provisions of section 62 of the Act and other applicable provisions, if any. II. Nothing in this Article shall apply to the increase in the subscribed capital of the Company which has been approved by: (a) A Special Resolution passed by the Company in General Meeting before the Offer of the debentures or the raising of the loans, and (b) The Central Government before the Offer of the debentures or raising of the loans or is in conformity with the rules, if any, made by that Government in this behalf.
	8.	(1) The rights attached to each class of shares (unless otherwise provided by the terms of the Offer of the shares of the class) may, subject to the provisions of Section 48 of the Act, be varied with the consent in writing of the holders of not less than three fourths of the Offerd shares of that class or with the sanction of a Special Resolution passed at a General Meeting of the holders of the shares of that class. (2) To every such separate General Meeting, the provisions of these Articles relating to General Meeting shall Mutatis Mutandis apply, but so that the necessary quorum shall be two persons at least holding or representing by proxy one- tenth of the Offerd shares of that class.
Offer of further shares with disproportionate rights	9.	Subject to the provisions of the Act, the rights conferred upon the holders of the shares of any class Offerd with preferred or other rights or not, unless otherwise expressly provided for by the terms of the Offer of shares of that class, be deemed to be varied by the creation of further shares ranking paripassu therewith.

Not to Offer shares with disproportionate rights	10.	The Company shall not Offer any shares (not being Preference Shares) which carry voting rights or rights in the Company as to dividend, capital or otherwise which are disproportionate to the rights attached to the holders of other shares not being Preference Shares.
Power to pay commission	11.	The Company may, at any time, pay a commission to any person for subscribing or agreeing to subscribe (whether absolutely or conditionally) for any share, debenture or debenture stock of the Company or procuring or agreeing to procure subscriptions (whether absolute or conditional) for shares, such commission in respect of shares shall be paid or payable out of the capital, the statutory conditions and requirements shall be observed and complied with and the amount or rate of commission shall not exceed five percent of the price at which the shares are Offerd and in the case of debentures, the rate of commission shall not exceed, two and half percent of the price at which the debentures are Offerd. The commission may be satisfied by the payment of cash or the allotment of fully or partly paid shares or partly in one way and partly in the other. The Company may also, on any Offer of shares, pay such brokerage as may be lawful.
Liability of joint holders of shares	12.	The joint holders of a share or shares shall be severally as well as jointly liable for the payment of all installments and calls due in respect of such share or shares.
Trust not recognised	13.	Save as otherwise provided by these Articles, the Company shall be entitled to treat the registered holder of any share as the absolute owner thereof and accordingly, the Company shall not, except as ordered by a Court of competent jurisdiction or as by a statute required, be bound to recognise any equitable, contingent, future or partial interest lien, pledge or charge in anyshare or (except only by these presents otherwise provided for) any other right in respect of any share except an absolute right to the entirety thereof in the registered holder.
Offer other than for cash	14.	(a) The Board may Offer and allot shares in the capital of the Company as payment or part payment for any property sold or goods transferred or machinery or appliances supplied or for services rendered or to be rendered to the Company in or about the formation or promotion of the Company or the acquisition and or conduct of its business and shares may be so allotted as fully paid-up shares, and if so Offerd, shall be deemed to be fully paid-up shares. (b) As regards all allotments, from time to time made, the Board shall duly comply with Section 39 of the Act.
Acceptance of shares	15.	An application signed by or on behalf of the applicant for shares in the Company, followed by an allotment of any share therein, shall be acceptance of the shares within the meaning of these Articles; and every person who thus or otherwise accepts any share and whose name is on the Register shall, for the purpose of these Articles, be a shareholder.
Member' right to share Certificates	16.	1. Every person whose name is entered as a member in the Register shall be entitled to receive without payment: a. One certificate for all his shares; or b. Share certificate shall be Offerd in marketable lots, where the share certificates are Offerd either for more or less than the marketable

		lots, sub-division/consolidation into marketable lots shall be donefree of charge. 2. The Company shall, within two months after the allotment and within fifteen days after application for registration of the transfer of any share or debenture, complete and have it ready for delivery; the share certificates for all the shares and debentures so allotted or transferred unless the conditions of Offer of the said shares otherwise provide. 3. Every certificate shall be under the seal and shall specify the shares to which it relates and the amount paid-up thereon. 4. The certificate of title to shares and duplicates thereof when necessary shall be Offerd under the seal of the Company and signed by two Directors and the Secretary or authorised official(s) of the Company.
One Certificate for joint holders	17.	In respect of any share or shares held jointly by several persons, the Company shall not be bound to Offer more than one certificate for the same share or shares and the delivery of a certificate for the share or shares to one of several joint holders shall be sufficient delivery to all such holders. Subject as aforesaid, where more than one share is so held, the joint holders shall be entitled to apply jointly for the Offer of several certificates in accordance with Article 20 below.
Renewal of Certificate	18.	If a certificate be worn out, defaced, destroyed, or lost or if there is no further space on the back thereof for endorsement of transfer, it shall, if requested, be replaced by a new certificate without any fee, provided however that such new certificate shall not be given except upon delivery of the worn out or defaced or used up certificate, for the purpose of cancellation, or upon proof of destruction or loss, on such terms as to evidence, advertisement and indemnity and the payment of out of pocket expenses as the Board may require in the case of the certificate having been destroyed or lost. Any renewed certificate shall be marked as such in accordance with the provisions of the act in force.
	19.	For every certificate Offerd under the last preceding Article, no fee shall be charged by the Company.
Splitting and consolidation of Share Certificate	20.	The shares of the Company will be split up/consolidated in the following circumstances: (i) At the request of the member/s for split up of shares in marketable lot. (ii) At the request of the member/s for consolidation of fraction shares into marketable lot.
Directors may Offer new Certificate(s)	21.	Where any share under the powers in that behalf herein contained are sold by the Directors and the certificate thereof has not been delivered up to the Company by the former holder of the said shares, the Directors may Offer a new certificate for such shares distinguishing it in such manner as they think fit from the certificate not so delivered up.
Person by whom installments are payable	22.	If, by the conditions of allotment of any share, the whole or part of the amount or Offer price thereof shall be payable by installments, every such installment, shall, when due, be paid to the Company by the person who for the time being and from time to time shall be the registered holder of the share or his legal representative or representatives, if any.

LIEN **Company's lien on shares**	23.	The Company shall have first and paramount lien upon all shares other than fully paid-up shares registered in the name of any member, either or jointly with any other person, and upon the proceeds or sale thereof for all moneys called or payable at a fixed time in respect of such shares and such lien shall extend to all dividends from time to time declared in respect of such shares. But the Directors, at any time, may declare any share to be exempt, wholly or partially from the provisions of this Article. Unless otherwise agreed, the registration of transfer of shares shall operate as a waiver of the Company's lien, if any, on such shares.
As to enforcing lien by sale	24.	For the purpose of enforcing such lien, the Board of Directors may sell the shares subject thereto in such manner as it thinks fit, but no sale shall be made until the expiration of 14 days after a notice in writing stating and demanding payment of suchamount in respect of which the lien exists has been given to the registered holders of the shares for the time being or to the person entitled to the shares by reason of the death of insolvency of the register holder.
Authority to transfer	25.	a. To give effect to such sale, the Board of Directors may authorise any person to transfer the shares sold to the purchaser thereof and the purchaser shall be registered as the holder of the shares comprised in any such transfer. b. The purchaser shall not be bound to see the application of the purchase money, nor shall his title to the shares be affected by any irregularity or invalidity in the proceedings relating to the sale.
Application of proceeds of sale	26.	The net proceeds of any such sale shall be applied in or towards satisfaction of the said moneys due from the member and the balance, if any, shall be paid to him or the person, if any, entitled by transmission to the shares on the date of sale.
CALLS ON SHARES **Calls**	27.	Subject to the provisions of Section 49 of the Act, the Board of Directors may, from time to time, make such calls as it thinks fit upon the members in respect of all moneys unpaid on the shares held by them respectively and not by the conditions of allotment thereof made payable at fixed times, and the member shall pay the amount of every call so made on him to the person and at the time and place appointed by the Board of Directors.
When call deemed to have been made	28.	A call shall be deemed to have been made at the time when the resolution of the Directors authorising such call was passed. The Board of Directors making a call may by resolution determine that the call shall be deemed to be made on a date subsequent to the date of the resolution, and in the absence of such a provision, a call shall be deemed to have been made on the same date as that of the resolution of the Board of Directors making such calls.
Length of Notice of call	29.	Not less than thirty day's notice of any call shall be given specifying the time and place of payment provided that before the time for payment of such call, the Directors may, by notice in writing to the members, extend the time for payment thereof.
Sum payable in fixed installments to be deemed	30.	If by the terms of Offer of any share or otherwise, any amount is made payable at any fixed times, or by installments at fixed time, whether on account of the share or by way of premium, every such amount or

Title of Articles	Article Number	Content
calls		installment shall be payable as if it were a call duly made by the Directors, on which due notice had been given, and all the provisions herein contained in respect of calls shall relate and apply to such amount or installment accordingly.
When interest on call or installment payable	31.	If the sum payable in respect of any call or, installment be not paid on or before the day appointed for payment thereof, the holder for the time being of the share in respect of which the call shall have been made or the installment shall fall due, shall pay interest for the same at the rate of 12 percent per annum, from the day appointed for the payment thereof to the time of the actual payment or at such lower rate as the Directors may determine. The Board of Directors shall also be at liberty to waive payment of that interest wholly or in part.
Sums payable at fixed times to be treated as calls	32.	The provisions of these Articles as to payment of interest shall apply in the case of non-payment of any such sum which by the terms of Offer of a share, become payable at a fixed time, whether on account of the amount of the share or by way of premium, as if the same had become payable by virtue of a call duly made and notified.
Payment of call in advance	33.	The Board of Directors, may, if it thinks fit, receive from any member willing to advance all of or any part of the moneys uncalled and unpaid upon any shares held by him and upon all or any part of the moneys so advance may (until the same would, but for such advance become presently payable) pay interest at such rate as the Board of Directors may decide but shall not in respect of such advances confer a right to the dividend or participate in profits.
Partial payment not to preclude forfeiture	34.	**Neither a judgment nor a decree in favour of the Company for calls or other moneys due in respect of any share nor any part payment or satisfaction thereunder, nor the receipt by the Company of a portion of any money which shall from, time to time, be due from any member in respect of any share, either by way of principal or interest nor any indulgency granted by the Company in respect of the payment of any such money shall preclude the Company from thereafter proceeding to enforce a forfeiture of such shares as herein after provided.**
FORFEITURE OF SHARES **If call or installment not paid, notice may be given**	35.	If a member fails to pay any call or installment of a call on the day appointed for the payment not paid thereof, the Board of Directors may during such time as any part of such call or installment remains unpaid serve a notice on him requiring payment of so much of the call or installment as is unpaid, together with any interest, which may have accrued. The Board may accept in the name and for the benefit of the Company and upon such terms and conditions as may be agreed upon, the surrender of any share liable to forfeiture and so far as the law permits of any other share.
Evidence action by Company against shareholders	36.	On the trial or hearing of any action or suit brought by the Company against any shareholder or his representative to recover any debt or money claimed to be due to the Company in respect of his share, it shall be sufficient to prove that the name of the defendant is or was, when the claim arose, on the Register of shareholders of the Company as a holder, or one of the holders ofthe number of shares in respect of which such claim is made, and that the amount claimed is not entered as paid in the books of the Company and it shall not be necessary to prove the appointment of the Directors who made any call nor that a quorum of Directors was present at the Board at which any call was made nor that the meeting at which any call was made

		was duly convened or constituted nor any other matter whatsoever; but the proof of the matters aforesaid shall be conclusive evidence of the debt.
Form of Notice	37.	The notice shall name a further day (not earlier than the expiration of fourteen days from the date of service of the notice), on or before which the payment required by the notice is to be made, and shall state that, in the event of non-payment on or before the day appointed, the shares in respect of which the call was made will be liable to be forfeited.
If notice not complied with, shares may be forfeited	38.	If the requirements of any such notice as, aforementioned are not complied with, any share in respect of which the notice has been given may at any time thereafter, before the payment required by the notice has been made, be forfeited by a resolution of the Board to that effect. Such forfeiture shall include all dividends declared in respect of the forfeited shares and not actually paid before the forfeiture.
Notice after forfeiture	39.	When any share shall have been so forfeited, notice of the resolution shall be given to the member in whose name it stood immediately prior to the forfeiture and an entry of the forfeiture shall not be in any manner invalidated by any omission or neglect to give such notice or to make such entry as aforesaid.
Boards' right to dispose of forfeited shares or cancellation of forfeiture	40.	A forfeited or surrendered share may be sold or otherwise disposed off on such terms and in such manner as the Board may think fit, and at any time before such a sale or disposal, the forfeiture may be cancelled on such terms as the Board may think fit.
Liability after forfeiture	41.	A person whose shares have been forfeited shall cease to be a member in respect of the forfeited shares but shall, notwithstanding such forfeiture, remain liable to pay and shall forthwith pay the Company all moneys, which at the date of forfeiture is payable by him to the Company in respect of the share, whether such claim be barred by limitation on the date of the forfeiture or not, but his liability shall cease if and when the Company received payment in full of all such moneys due in respect of the shares.
Effect of forfeiture	42.	The forfeiture of a share shall involve in the extinction of all interest in and also of all claims and demands against the Company in respect of the shares and all other rights incidental to the share, except only such of these rights as by these Articles are expressly saved.
Evidence of forfeiture	43.	A duly verified declaration in writing that the declarant is a Director of the Company and that a share in the Company has been duly forfeited on a date stated in the declaration, shall be conclusive evidence of the facts therein stated as against all persons claiming to be entitled to the share, and that declaration and the receipt of the Company for the consideration, if any, given for the shares on the sale or disposal thereof, shall constitute a good title to the share and the person to whom the share is sold or disposed of shall be registered as the holder of the share and shall not be bound to see to the application of the purchase money (if any) nor shall his title to the share be affected by any irregularity or invalidity in the proceedings in reference to the forfeiture, sale or disposal of the share.
Non-payment of sums payable at fixed times	44.	The provisions of these regulations as to forfeiture shall apply in the case of non-payment of any sum which by terms of Offer of a share, becomes payable at a fixed time, whether, on account of the amount of the share or by way of premium or otherwise as if the same had been payable by virtue

		of a call duly made and notified.
Validity of such sales	45.	Upon any sale after forfeiture or for enforcing a lien in purported exercise of the powers herein before given, the Directors may cause the purchaser's name to be entered in the register in respect of the shares sold and may Offer fresh certificate in the name of such a purchaser. The purchaser shall not be bound to see to the regularity of the proceedings, nor to the application of the purchase money and after his name has been entered in the register in respect of such shares, the validity of the sale shall not be impeached by any person and the remedy of any person aggrieved by the sale shall be in damages only and against the Company exclusively.
TRANSFER AND TRANSMISSION OF SHARES **Transfer**	46.	The instrument of transfer of any share in the Company shall be executed both by the transferor and the transferee and the transferor shall be deemed to remain holder of the shares until the name of the transferee is entered in the register of members in respect thereof. The Board shall not register any transfer of shares unless a proper instrument of transfer duly stamped and executed by the transferor and the transferee has been delivered to the Company along with the certificate and such other evidence as the Company may require to prove the title of the transferor or his right to transfer the shares. Provided that where it is proved to the satisfaction of the Board that an instrument of transfer signed by the transferor and the transferee has been lost, the Company may, if the Board thinks fit, on an application on such terms in writingmade by the transferee and bearing the stamp required for an instrument of transfer, register the transfer on such terms as to indemnity as the Board may think fit. An application for the registration of the transfer of any share or shares may be made either by the transferor or the transferee, provided that where such application is made by the transferor, no registration shall, in the case of partly paid shares, be effected unless the Company gives notice of the application to the transferee. The Company shall, unless objection is made by the transferee within two weeks from the date of receipt of the notice, enter in the register the name of the transferee in the same manner and subject to the same conditions as if the application for registration was made by the transferee. For the purpose of Sub-clause (c), notice to the transferee shall be deemed to have been duly given if dispatched by prepaid registered post to the transferee at the address given in the instrument of transfer and shall be delivered in the ordinary course of post. Nothing in Sub-clause (d) shall prejudice any power of the Board to register as a shareholder any person to whom the right to any share has been transmitted by operation of law.
Form of transfer	47.	Shares in the Company shall be transferred by an instrument in writing in such common form as specified in Section 56 of the Companies Act.
Board's right to refuse to register	48.	The Board, may, at its absolute discretion and without assigning any reason, decline to register

Title of Articles	Article Number	Content
		1. The transfer of any share, whether fully paid or not, to a person of whom it do not approve or 2. Any transfer or transmission of shares on which the Company has a lien a. Provided that registration of any transfer shall not be refused on the ground of the transferor being either alone or jointly with any other person or persons indebted to the Company on any account whatsoever except a lien on the shares. b. If the Board refuses to register any transfer or transmission of right, it shall, within fifteen days from the date of which the instrument or transfer of the intimation of such transmission was delivered to the Company, send notice of the refusal to the transferee and the transferor or to the person giving intimation of such transmission as the case may be. c. In case of such refusal by the Board, the decision of the Board shall be subject to the right of appeal conferred by Section 58. d. The provisions of this clause shall apply to transfers of stock also.
Further right of Board of Directors to refuse to register	49.	a. The Board may, at its discretion, decline to recognise or accept instrument of transfer of shares unless the instrument of transfer is in respect of only one class of shares. b. No fee shall be charged by the Company for registration of transfers or for effecting transmission on shares on the death of any member or for registering any letters of probate, letters of administration and similar other documents. c. Notwithstanding anything contained in Sub-articles (b) and (c) of Article 46, the Board may not accept applications for sub-division or consolidation of shares into denominations of less than hundred (100) except when such a sub-division or consolidation is required to be made to comply with a statutory order or an order of a competent Court of Law or a request from a member to convert his holding of odd lots, subject however, to verification by the Company. d. The Directors may not accept applications for transfer of less than 100 equity shares of the Company, provided however, that these restrictions shall not apply to: i. Transfer of equity shares made in pursuance of a statutory order or an order of competent court of law. ii. Transfer of the entire equity shares by an existing equity shareholder of the Company holding less than hundred (100) equity shares by a single transfer to joint names. iii. Transfer of more than hundred (100) equity shares in favour of the same transferee under one or more transfer deeds, one or more of them relating to transfer of less than hundred (100) equity shares. iv.
