3. ***Some of our services have only recently been introduced and, as a result, it may be difficult to evaluate their performance and prospects. Further, due to our limited experience in operations risk management services, some of our new initiatives may not commence on time or at all or may be discontinued.***

Some of our services relating to operations risk management have been introduced recently and are new to our portfolio of services. As a result, these services have a limited operating history and it may be difficult to evaluate their performance and prospects. Further, whilst we are already in the business of providing operations risk management services to our Clients, we propose to expand our business by undertaking KYP Services (Know Your People) services and make a foray into services relating to government sector by undertaking verification and due diligence work for various government departments across ministries. We have invested time and other resources and incurred expenses towards the introduction of these new services.

Our Company has in the recent past discontinued providing employee background screening, employee background verification, employee background checking related services. We had allocated substantial of our assets and resources to the said Background Check business. However, our Company has decided that in the interest of greater focus on specific lines of business only, it consciously will no longer remain in the Background Check business, and will exit this line of business and accordingly vide Memorandum of Understanding Agreement related to Software and Database Acquisition and Usage dated August 28, 2017 SecUR Credentials Limited has acquired Symphony 3.0 along with its Database from our Company which is a software application developed and maintained by the in-house software professional team of our Company. For further details please refer ‘History and Certain Corporate Matters - Material Agreements’ on page 101.

Introducing new initiatives require strategic planning and the efficient use of resources. We may lack sufficient expertise and experience in these activities and this may impose additional strain on our resources and consume additional time and attention of our senior management. Further, some of these initiatives may fail to commence or may have to be abruptly discontinued at a nascent stage due to regulatory, commercial or other reasons. We may fail to initiate or choose to discontinue new services if we do not attract significant number of clients for these services. We may stop or reduce operations of a new initiative or services due to various reasons, including and not restricted to unavailability of adequate infrastructure for operations or lack of expected clientele. Further, if any new services introduced by us are discontinued it may lead to loss of the investments made by us in developing these services and the resources utilized for their

development and marketing may not be recoverable. This may adversely affect our business, results of operations and revenues.

4. ***We rely on information technology systems, networks and infrastructure to operate our business. Any interruption or breakdown in such systems, networks or infrastructure or our technical systems could impair our ability to effectively provide our services.***

We are primarily in the business of providing services through technology-driven media, and we rely on information technology and telecommunications systems and networks and related infrastructure, some of which have been customized and developed internally. As such, our business operations, the quality of our service and our ability to attract and retain customers depend on the efficient and uninterrupted operation, reliability, speed and availability of such systems, networks and infrastructure, both internal and external.

Our systems are vulnerable to damage or interruption as a result of natural disasters, power loss, telecommunications failures, technical failures, undetected errors or viruses in our software, computer viruses, corruption or loss of electronically stored data, hardware damage, disruption in communications access or infrastructure, electronic intrusion attempts, hacking, defacement, physical or electronic break-ins, sabotage, vandalism and other similar events which could lead to accessing difficulties, service interruptions, delays, loss of our database content, inability to accept and/or fulfill user requests or inaccurate data being processed or displayed. There can be no assurance that we will be able to eliminate or alleviate the risks arising from such contingencies. We cannot assure you that our back-up and disaster recovery measures and business continuity planning would effectively eliminate or alleviate the risks arising from the above contingencies. Any damage to or failure of our systems could lead to loss of our database content or interruptions or delays, thereby impairing our ability to effectively provide our services, which could result in customer dissatisfaction.

Any of the above could disrupt our ability to operate our services or may materially affect the efficiency of the services provided by us, our reputation and financial condition.

5. ***Currently, substantial portion of our revenue is generated from business activity that is not reflected in the name of our Company.***

Currently, substantial portion of our revenue is generated from trading activities from veterinary division. Although, such business activity forms part of our main objects clause the same is not reflected in the name of our Company. For the four months period ended July 31, 2017 and for financial year ended March 31, 2017, 2016 and 2015 revenues from trading activities from veterinary division constituted 66.66%, 73.35%, 73.78% and 31.03% respectively of our total revenues. Going forward, our Company endeavors to increase the share of revenues generated by our Company from the business of providing operations risk management services to our Clients. However, we cannot be sure that we will be successful in such endeavour of ours in a timely manner, or at all. Such strategies require us to expand our operations in the operations risk management services. Our failure to respond successfully in increasing the revenue share from business activities in operations risk management services may significantly harm our results of operations and financial condition.

6. ***If we are not successful in managing our growth, our business may be disrupted and our profitability may be reduced.***

Our results of operations have historically varied from year to year due to various factors, and we expect that this trend will continue. You should not rely on our past financial results for any year as indicators of future performance. Our future growth is subject to risks arising from a rapid increase in order volume, and inability to retain and recruit skilled staff. Although, we plan to continue to expand our scale of operations through both organic as well as inorganic growth or investments in other entities, we may not grow at a rate comparable to our growth rate in the past, either in terms of income or profit.

Our future growth may place significant demands on our management and operations and require us to continuously evolve and improve our financial, operational and other internal controls. In particular, continued expansion may pose challenges in:

- maintaining high levels of client satisfaction;
- recruiting, training and retaining sufficient skilled management and trained personnel;
- developing and improving our internal administrative infrastructure, particularly our financial, operational, communications, internal control and other internal systems;
- making accurate assessments of the resources we will require;

- adhering to the standards of quality and process execution to meet clients' expectations;
- operating in business segments where we have limited experience;
- preserving a uniform culture, values and work environment;
- strengthening internal control and ensuring compliance with legal and contractual obligations; and
- managing relationships with clients, suppliers, investors, lenders and service providers;

If we are not successful in managing our growth, our business may be disrupted and profitability may be reduced. Our business, prospects, financial condition and results of operations may be adversely affected.

7. *Our inability to build and maintain our brand name will adversely affect our business, prospects, financial condition and results of operation*

Brand recognition is important to the success of our business. Establishing and maintaining our brand names for people relying on our services to look for desired results is critical to the success of the customer acquisition process of our business. Although we have expended, and expect to continue to expend, resources, financial and otherwise, on establishing and maintaining our brands, no assurance can be given that our brand name will be effective in attracting and growing user and customer base for our businesses or that such efforts will be cost-effective, which may negatively affect our business, prospects, financial condition and results of operations.

8. *If third parties, including our current or future competitors, or our employees are able to circumvent our protection measures which are put in place for the protection of our database or misappropriate confidential information, our business and reputation would be adversely affected.*

We depend on a combination of laws and confidentiality provisions and provisions that restrict the post-employment operations of our employees in their employment agreements to protect our logo, brand name, database and customized information technology. Even with such precautions, we cannot assure you that our database or proprietary technology will not be copied or obtained by third parties. Although, we are currently not involved, we may in the future need to resort to litigation or other proceedings to enforce, protect or determine the validity and scope of our intellectual property rights, including in relation to our database, and to defend against third party infringements, which may be expensive and resource-consuming and might create uncertainty as to the ownership of such rights while the case is being decided (which may take substantial amounts of time) and fail to result in a satisfactory remedy or recourse.

Our employees are required under their offer letters to keep confidential all information relating to our clients, working systems technical know-how, security arrangements and administrative or organization matters of our Company or clients during and after their employment with us. However, we may not have sufficient internal controls and processes to ensure that our employees comply with their obligations under their employment agreements and there can be no assurance that such provisions will adequately prevent the disclosure of confidential information.

If we fail to prevent third parties or our employees from circumventing our protection measures or if we fail to successfully prosecute third parties or our employees from using or copying our content or misappropriate confidential information, this could damage our reputation, cause interruptions in our operations, expose us to a risk of loss or litigation and possible liability, and could also cause customers and potential customers to lose confidence in our internal systems and processes, which would have a negative effect on the demand for our services.

The Information Technology Act, 2000 provides for civil and criminal liability including fines and imprisonment for various computer related offenses, which includes unauthorised disclosure of confidential information and failure to protect sensitive personal data. India has also implemented privacy laws, including the Information Technology (Reasonable Security Practices and Procedures and Sensitive Personal Data or Information) Rules, 2011, which impose limitations and restrictions on the collection, use, disclosure and transfer of personal information. For further details, please see the section "*Regulations and Policies in India*" on page 92. As part of our operations, we are required to comply with the Information Technology Act, 2000 and the rules thereof, failing which we may face claims and actions against us. We may also be restricted in our ability to collect information from our users under new data protection laws. Our failure to safeguard information or collect such information in the future may have a material adverse effect on our business, financial condition and results of operations. The introduction of IT legislations, including for protection of privacy, may require us to modify our existing systems, or invest in new technologies to ensure compliance with such applicable laws, which may require us to incur additional expenses and adversely affect our financial condition. Change in existing legislations or introduction of new legislations may require us to incur additional expenditure, to ensure compliance with such legislations, which may adversely affect our financial condition.

9. ***Our business and profitability could be adversely affected if we fail to keep pace with evolving industry standards and norms or fail to enhance existing services and develop and introduce new services in a timely manner.***

The markets for our services are characterized by rapidly evolving industry standards and norms and new service introductions. Adaptability is one of the key attributes for success in our industry. Our results of operations and financial condition depend on our ability to develop and introduce new services, as well as our ability to modify and upgrade our existing services. The process of developing new services or modifying existing services is complex and requires us to accurately predict and respond to customers' changing and diverse needs. The success of our new services will depend on several factors, including proper identification of market demands and the competitiveness of our services with the services introduced by our competitors.

Our failure to successfully adopt evolving industry standards and norms and new service introductions in a cost effective and a timely manner could increase our costs (in comparison to our competitors who are able to successfully implement them) and lead to us being less competitive in terms of our prices or quality of services we provide.

We cannot be sure that we will successfully identify new service opportunities, develop and introduce new services in a timely manner, price such new services at optimal levels, modify and upgrade existing services, achieve market acceptance of our services, or that services offered by our competitors will not render our services non-competitive or force us to reduce prices, thereby adversely affecting our margins. Our failure to respond successfully to any of these challenges will significantly harm our results of operations and financial condition.

10. ***Substantial portion of our revenues has been dependent upon a few clients. The loss of any one or more of our major clients would have a material adverse effect on our business operations and profitability.***

For the period ended July 31, 2017, financial year ended March 31, 2017 and March 31, 2016 our top five largest clients accounted for approximately 94.00%, 74.27% and 84.01%, respectively of our revenues from operations. The loss of a significant client or clients would have a material adverse effect on our financial results. We cannot assure you that we can maintain the historical levels of business from these clients or that we will be able to replace these clients in case we lose any of them.

Further, certain of our Client may be directed to discontinue our services as per the directions of a regulatory authority in case such regulatory authority is of the opinion that our Client cannot spend in excess of prescribed amounts on outsourcing activities. In the past one of our Clients had been asked to discontinue availing our services by the Insurance Regulatory and Development Authority on such grounds.

Furthermore, major events affecting our clients, such as bankruptcy, change of management, mergers and acquisitions could adversely impact our business. If any of our major clients becomes bankrupt or insolvent, we may lose some or all of our business from that client and our receivable from that client would increase and may have to be written off, adversely impacting our income and financial condition.

11. ***We have existing debt and may raise additional debt, which could adversely affect our financial health and our ability to obtain financing in the future and react to changes in our business and increase in interest rates of our borrowings may impact our results of operation.***

As of October 31, 2017, the amount of our total borrowings was ₹1,858.79 lakhs. For further details, please refer "Financial Indebtedness" on page 166. Our business requires a high amount of working capital to finance operational expenses before payments are received from clients. We may incur additional indebtedness in the future. Our ability to meet our debt service obligations and our ability to repay our outstanding borrowings will depend primarily upon the cash flow produced by our businesses. We cannot assure you that we will generate sufficient revenue from our businesses to service existing or proposed borrowings. If we fail to meet our debt service obligations, our lenders could declare us to be in default under the terms of our borrowings and may accelerate the maturity of our obligations. We cannot assure you that, in the event of any such acceleration, we would have sufficient resources to repay these borrowings. Accordingly, any such acceleration would have an adverse effect on our cash flows, business, financial condition and results of operation. In addition: (a) our ability to obtain additional financing for working capital, capital expenditures, acquisitions or general corporate purposes may be impaired in the future; (b) a substantial portion of our cash flow from operations may be dedicated to the payment of principal and interest on our indebtedness, thereby reducing the funds available to us for other purposes; (c) we will be exposed to the risk of increased interest rates; and (d) our flexibility to adjust to changing market conditions and ability to withstand competitive pressures could be limited,

and we may be more vulnerable to a downturn in general economic conditions in our business or be unable to carry out capital spending that is necessary or important to our growth strategy.

If our cash flow and capital resources are insufficient to fund our debt service obligations, we may be forced to reduce or delay capital expenditure, sell assets, seek additional equity capital, or restructure our debt. In the future, our cash flow and capital resources may not be sufficient for interest or principal payments on our indebtedness, and any remedial measures may not be successful and therefore may not permit us to meet our scheduled debt service obligations.

Our borrowings carry interest at floating rates or at a fixed rate that is subject to adjustment at specified intervals. We are exposed to interest rate risk as we do not currently enter into any swap or interest rate hedging transactions in connection with our loan agreements. Any such increase in interest expense may have an adverse effect on our business, prospects, financial condition and results of operation. Such instances could adversely affect our business operations, cash flows and financial condition.

12. *Our failure to accurately forecast and manage demand for our services could harm our business.*

We monitor the levels of business activity based on our own projections of future demand. Because of the length of time necessary to execute contracts we must make necessary arrangements before the execution period of the contract commences. An inaccurate forecast of execution period can result in excess deployment of our Company's resources, which may increase costs, negatively impact cash flow, erode margins substantially and ultimately adversely affect our financial performance. The possibility of converse cannot be also ruled out, where our Company's resources are not available in time to execute large contracts which may adversely affect our financial performance. Any of the aforesaid circumstances could have a material adverse effect on our business, results of operations and financial condition.

13. *We rely on third-party service providers in several areas integral to our operations and hence do not have full control over the services provided to us or our customers. Any misuse or contravention of laws or policies relating to data protection by third parties may adversely affect our reputation and expose us to potential liabilities.*

We rely on third parties in several areas of our operations on a regular basis. We have and we will be outsourcing a portion of our operations to third parties, in compliance with applicable regulations. If any of these third parties are to terminate their contractual relationships with us, or fail to provide services to us for any reason, whether as a result of a lack of robust business continuity planning processes on their part or otherwise, and we are unable to secure an adequate alternative, our business and results of operations can be materially disrupted and our financial condition can be materially affected. If we or our third-party service providers fail to operate in compliance with regulations or corporate standards, we may be held liable for professional negligence caused to our clients. In past, we have encountered such situations wherein a criminal complaint has been registered against our Company and Hitesh Asrani, our Promoter and Executive Director, Vide the said criminal complaint it is alleged, *inter alia*, that our Company instead of applying and obtaining genuine police verification certificates has forged the seal and signature of many police officers across the country and fabricated fake police verification certificates and has provided fake police verification certificates to several of its clients to avoid the payment of legal fees to the police department / government and to make undue profit. For further details in relation please refer "*Outstanding Litigation and Material Developments*" on page 170.

In addition, If we fail to prevent third parties from circumventing our protection measures or from using or copying our content or misappropriate confidential information, this could damage our reputation, cause interruptions in our operations, expose us to a risk of loss or litigation and possible liability, and could also cause customers and potential customers to lose confidence in our internal systems and processes, which would have a negative effect on the demand for our services.

14. *Any errors, defects or disruption in our service or inability to meet expected or agreed service standards may lead to claims, or adversely affect revenues or future business prospects.*

Any errors, defects, or disruptions in service or other performance issues, or inability to meet expected or agreed service standards under our contracts, may adversely affect our revenues from such contracts, or result in affecting client relationships leading to non-renewal of contracts, or delay or withholding of payments due to us. Further, our clients may bring claims against us, which could lead to provision for doubtful accounts, an increase in collection cycles for accounts receivable or litigation costs. All these factors could adversely affect our business and results of operations.

Although, we attempt to contractually limit our liability for damages, including consequential damages, we cannot assure you that the limitations on liability will be enforceable in such cases. Any such occurrence may also result in damage to our reputation and loss of existing and future clients, which could adversely affect our business prospects, results of operations and financial condition.

15. ***Our clients may delay or default in making payments for services rendered by us which could affect our profits, cash flows and liquidity.***

Cash collection trends and trade receivables have an impact on our cash receipts and, consequently, on our cash flows. Trade receivables constitute a significant portion of our total assets. Consequently, we face the risk of the uncertainty regarding the receipt of these outstanding amounts. An increase in bad debts or defaulting clients may lead to greater usage of our operating working capital and increased interest costs. Successful control of the service receivables process requires development of appropriate contracting, invoicing, credit, collection and financing policies. Our failure to maintain such policies could have an adverse effect on our business, financial condition and cash flows.

16. ***We may not be able to raise additional funds to implement our business strategy successfully in a timely and cost efficient manner, on commercially acceptable terms, or at all.***

We may need to raise additional funds to implement our business strategy successfully, such as expanding operations to increase productivity, undertaking marketing and brand-building initiatives, developing new technology, upgrading current network and infrastructure systems, and developing new and expand current services to generate demand. We cannot assure you that we would be able to raise funds in a timely and cost efficient manner, on commercially acceptable terms, or at all. Our inability to raise additional funds may impair our ability to effectively implement our business strategy. If we cannot obtain the required funds on acceptable terms or at all, we may be forced to curtail some or all of these expansion plans, which may impair our business growth and results of operations.

17. ***We face significant competition and if we fail to compete effectively, our business, prospects, financial condition and results of operations will be adversely affected.***

We compete with both Indian and international competitors in India. Some of our competitors may be larger than us, have stronger financial resources or a more experienced management team, or have stronger capabilities in rendering technically complex services. We also face competition from various regional players. We expect that the level of competition will remain high, which could directly impact the size of our workforce and therefore potentially limit our ability to maintain or increase our profitability. Our continued success depends on our ability to compete effectively against our existing and future competitors. With the potential influx of new competitors, our ability to retain our existing clients and to attract new clients is critical to our continued success.

Further, some of our competitors may also benefit from greater economies of scale and operating efficiencies and may have greater experience in risk assessment and risk mitigation, due diligence, etc. Further, the premium placed on having experience may cause some of the new entrants to accept lower margins in order to be awarded a contract. The nature of the process may cause us and our competitors to accept lower margins in order to be awarded the contract. We may also decide not to participate in some contracts as accepting such lower margins may not be financially viable and this may adversely affect our competitiveness to win future contracts. We cannot assure you that we can continue to compete effectively with our competitors in the future, and failure to compete effectively against our current or future competitors may have an adverse effect on our business, results of operations and financial condition.

As a result, there can be no assurance that we will not encounter increased competition in the future. Nor can there be any assurance that our Company will, in light of competitive pressures, be able to remain profitable or, if profitable, maintain its current profit margins.

18. ***Our debt financing agreements contain restrictive covenants or lenders' options that may affect our interest.***

Some debt financing agreements entered into by our Company contain restrictive covenants, and/or events of default that limits our ability to undertake certain types of transactions, which may adversely affect our business and financial condition. Our financing agreements also include various conditions and covenants that require us to obtain lender consents prior to carrying out certain activities or entering into certain transactions. Typically, restrictive covenants under our financing documents relate to obtaining prior consent of the lender for, among others: (a) change in the capital structure and shareholding pattern of our Company; (b) amendment of the Memorandum and Articles of Association of our Company; (c) take any action of merger, amalgamation or re-construction/re constitution; (d) dilute our Promoter's

shareholding in our Company; (e) effect any drastic changes in management set up; and (f) declare dividend for any year.

For further details of the restrictive covenants under our financing documents, please refer “*Financial Indebtedness*” on page 166. The personal guarantees provided by our Directors and corporate guarantee provided by entity forming part of Promoter Group in relation to certain facility agreements entered into by our Company with lenders stipulate that the lenders may without our concurrence alter or modify the terms and conditions of the facility, and particularly they are permitted to revise the payment terms and also increase the rates of interest. In addition, the lenders may, at their discretion, exercise their rights and powers pursuant to the guarantee against the guarantors jointly or severally.

If our lenders enforce these restrictive covenants or exercise their options under the relevant debt financing agreements, our operations and use of assets may be significantly hampered. A material breach of any of the above covenants or restrictions could also cause us to default under the applicable agreement, which would permit the applicable lenders to declare all amounts outstanding thereunder to be due and payable, together with accrued and unpaid interest and enforce the security provided for such loans. In such an event, we may be unable to incur additional borrowings and we may be unable to repay the amounts due. This may have a material and adverse effect on our financial condition and results of operation.

We cannot assure you that we have complied with all such restrictive covenants in a timely manner or at all or that we will be able to comply with all such restrictive covenants in the future. A failure to observe the restrictive covenants under our financing agreements or to obtain necessary consents required thereunder may lead to the termination of our credit facilities, levy of penal interest, acceleration of all amounts due under such facilities and the enforcement of any security provided. If the obligations under any of our financing agreements are accelerated, we may have to dedicate a substantial portion of our cash flow from operations to make payments under such financing documents, thereby reducing the availability of cash for our working capital requirements and other general corporate purposes. Further, during any period in which we are in default, we may be unable to raise, or face difficulties raising, further financing. In addition, other third parties may have concerns over our financial position and it may be difficult to market our services. Any of these circumstances could adversely affect our business, credit rating, prospects, results of operations and financial condition. Moreover, any such action initiated by our lenders could result in the price of the Equity Shares being adversely affected.

19. *Our Company have availed certain unsecured loans that are recallable by the lenders at any time.*

Our Company have availed certain unsecured loans that are recallable on demand by the lenders. In such cases, the lender is empowered to require repayment of the facility at any point in time during the tenor. In case the loan is recalled on demand by the lender and our Company is unable to repay the outstanding amounts under the facility at that point, it would constitute an event of default under the respective loan agreements. For further details, please refer “*Financial Indebtedness*” on page 166.

20. *Our Company in the financial year 2016-17 during the period November 11, 2016 to December 31, 2016 deposited cash in old high denomination notes in its bank accounts.*

The Reserve Bank of India and the Ministry of Finance of the GoI withdrew the legal tender status of ₹500 and ₹1,000 currency notes (old high denomination notes) pursuant to notification dated November 8, 2016. Our Company deposited an aggregate sum of ₹95.05 lakhs in the financial year 2016-17 during the period November 11 2016 to December 31, 2016 in old high denomination notes in its bank accounts. We cannot assure that going forward any statutory or regulatory authority will not inquire / inspect into such deposits made by our Company. Any adverse findings / observations by such statutory or regulatory authority in relation to such deposits made by our Company may subject our Company and/or its Directors to liabilities under the relevant provisions of the Income Tax Act, 1961 and other applicable rules and regulations which may have a material adverse effect our reputation and results of operations.

21. *Certain of our client contracts can be terminated by our clients without cause and with limited or no notice or penalty, which could negatively impact our revenue and profitability.*

Our clients typically retain us on a non-exclusive basis. Many of our client contracts can be terminated with or without cause by providing notice and without termination-related penalties. Additionally, most of our contracts with clients carry no commitment to a specific volume of business or future work. While we typically have carve-outs for force majeure events, many events, such as equipment failure and third-party vendors being unable to meet their underlying commitments to us, could impact our ability to meet our service level agreements. Our business is dependent on the decisions and actions of our clients, and there are a number of factors relating to our clients that are outside our control

that might result in the termination of an assignment or the loss of a client, including financial difficulties for a client; change in strategic priorities, resulting in a reduced level of spending on risk assessment and risk mitigation; a demand for price reductions; and a change in strategy by moving more work in-house or to our competitors. Therefore our business may be adversely affected if any of our contracts are terminated by our clients at short notice.

22. *Our success depends largely on our senior management and skilled professionals and our ability to attract and retain them.*

Our success depends on the continued services and performance of the members of our senior management team and other key personnel. Our continued success also depends upon our ability to attract and retain a large group of skilled professionals and staff who have specialized technical know-how. The loss of the services of our senior management or our inability to recruit, train or retain a sufficient number of skilled professionals could have a material adverse effect on our operations and profitability. Competition for senior management in our industry in which we operate is intense, and we may not be able to retain our existing senior management or attract and retain new senior management in the future. Moreover, we do not maintain “key man” life insurance policies for senior members of our management team or other key personnel. As a result of the recent growth in the operational risk management industry in India and the expected future growth, the demand for both skilled professionals and staff and unskilled workers has significantly increased in recent years. We may lose skilled employees to competing employers who pay higher salaries or be forced to increase the salaries to be paid to our employees. If we cannot hire or retain enough skilled professionals, our ability to apply for and execute new contracts or to continue to expand our business will be impaired and consequently, our revenues could decline. Any such loss of the services of our senior management personnel or skilled professionals could adversely affect our business, prospects, financial condition and results of operation.

23. *If we are unable to attract new clients or our existing clients do not renew their contract, the growth of our business and cash flows will be adversely affected.*

To increase our revenue and cash flows, we must regularly add new clients. If we are unable to generate sufficient leads through our marketing programs, or if our existing or new clients do not perceive our services to be of sufficiently high value and quality, we may not be able to increase sales and our operating results would be adversely affected. In addition, our existing clients have no obligation to renew their contracts, and renewal rates may decline or fluctuate due to a number of factors, including customers’ satisfaction with our services, our prices and the prices of competing service providers. If we fail to sell our services to new customers or if our existing customers do not renew their contracts, our operating results will suffer, and our revenue growth, cash flows and profitability may be materially and adversely affected.

24. *Our Promoter, Directors and Key Managerial Personnel of our Company may have interests in us other than reimbursement of expenses incurred or normal remuneration or benefits.*

Our Promoter is interested in us to the extent of any transactions entered into or his shareholding and dividend entitlement in us. Our Directors are also interested in us to the extent of remuneration paid to them for services rendered as our Directors and reimbursement of expenses payable to them. Our Directors, Hitesh Asrani and Mohammed Raza Sayyed have given personal guarantees for our borrowings to secure our loans. Our Directors may also be interested to the extent of any transaction entered into by us with any other company or firm in which they are directors or partners or in their individual capacity. For further details, please refer “Our Promoters and Promoter Group” and “Our Management” on page 114 and 102 respectively.

25. *Our Directors have provided personal guarantees for our borrowings to secure our loans. Our business, financial condition, results of operations, cash flows and prospects may be adversely affected by the revocation of all or any of the personal guarantees provided by our Directors in connection with our Company’s borrowings.*

Our Directors, Hitesh Asrani, Mohammed Raza Sayyed Raza (and his wife Shaista Raza) and Nisha Asrani have provided personal guarantees to secure our loans. In addition to the same, our Erstwhile Directors, Rahul Belwalkar (along with his wife Shibani Belwalkar) and one of the member of Promoter Group Apple Lifecare India Private Limited have mortgaged their respective properties and have provided personal / corporate guarantees to secure our loans. If any of these guarantees are revoked, our lenders may require alternative guarantees or collateral or cancellation of such facilities, entailing repayment of amounts outstanding under such facilities. If we are unable to procure alternative guarantees satisfactory to our lenders, we may need to seek alternative sources of capital, which may not be available to us at commercially reasonable terms or at all, or to agree to more onerous terms under our financing agreements, which

may limit our operational flexibility. Accordingly, our business, financial condition, results of operations, cash flows and prospects may be adversely affected by the revocation of all or any of the mortgages and/or personal / corporate guarantees provided for and on behalf of our Company in connection with our Company's borrowings.

26. Our corporate office is not owned by us.

Our Company has taken our corporate office on leave and license basis from one of our Group Companies, Apple Lifecare (India) Private Limited for a period of 36 (Thirty- six) months commencing from April 1, 2017 until March 31, 2020. There can be no assurance that our Company will be able to successfully renew the said leave and license agreement in a timely manner or at all. Further there can be no assurance that we will not face any disruption of our rights as a licensee and that such leave and license agreement will not be terminated prematurely by the licensor. Any such non-renewal or early termination or any disruption of our rights as licensee may require us to vacate the premises and relocate to a new premises on terms that may not be favourable to us thereby adversely affecting our business, financial conditions and results of operations. For further details on the properties of our Company, please refer to the section titled "Immovable Properties" appearing under "Our Business" on page 83.

27. We have issued Equity Shares during the last one year from the date of filing of the Prospectus at a price that is below the Issue Price.

During the last one year from the date of filing of the Prospectus we have issued Equity Shares at a price that is lower than the Issue Price as detailed in the following table:

28. We face foreign exchange risks that could adversely affect our results of operations and cash flows.

We are exposed to fluctuations in exchange rates between the US Dollar and the Indian Rupee. Our exchange rate risk primarily arises from our foreign currency revenues, receivables, payables etc. We have revenues in foreign currencies especially US\$. The foreign exchange fluctuation affects the revenues in absolute terms when converted into Indian rupees. To this extent, the revenues will be higher or lower depending on the depreciation or appreciation of Indian Rupee in foreign currency terms. Foreign Exchange revenues for the four months period ended July 31, 2017, financial year ended March 31, 2017 and March 31, 2016 were NIL, ₹328.69 lakhs and ₹557.23 lakhs, respectively, constituting Nil, 4.00% and 7.46%, respectively of the total revenues.

Although, we closely follow our exposure to foreign currencies we have not entered into any hedging transactions in an attempt to reduce the risks of currency fluctuations, these activities are not always sufficient to protect us against incurring potential losses if currencies fluctuate significantly. In addition, the policies of the Reserve Bank of India ("RBI") may also change from time to time, which may limit our ability to effectively hedge our foreign currency exposures and may have an adverse effect on our results of operations and cash flows.

Any such losses on account of foreign exchange fluctuations may adversely affect our results of operations and cash flows.

29. We have in the past entered into related party transactions and may continue to do so in the future, which may

potentially involve conflicts of interest with the equity shareholders.

We have entered into related party transactions with our Promoter, Promoter Group, Group Entities and Directors. For details of these transactions, please refer "Related Party Transactions" on page 124.

We cannot assure you that we will be able to maintain the terms of such transactions or in the event that we enter future transactions with related parties, that the terms of the transactions will be favourable to us. Additionally, while it is our belief that all our related party transactions have been conducted on an arm's-length basis, we cannot provide assurance that we could have achieved more favourable terms had such transactions been entered with third parties. We may also enter related party transactions in the future, which could involve conflicts of interest, although going forward, all related party transactions that we may enter will be subject to audit committee or board or shareholder approval, as applicable, as under the Companies Act, 2013 and the SEBI (LODR) Regulations. As such, we can provide no assurance that these transactions will not adversely affect our business, results of operation, cash flows and financial condition.

30. ***We have significant employee benefit expenses, such as staff welfare expenses and contribution to provident and other funds. An increase in employee costs in India may prevent us from maintaining our competitive advantage and may reduce our profitability.***

We incur various employee benefit expenses, including staff welfare expenses and contribution to provident and other funds. Our profit margins may get adversely impacted, if we are unable to pass on such costs and cost increases to our clients on a concurrent basis. Unless we are able to continue to increase the efficiency and productivity of our employees, increase in proportion employees with lower experience, or source talent from other low cost sources, employee costs increases in the long term may reduce our profit margins.

31. ***Our Company will not receive any proceeds of the Offer for Sale.***

Shibani Belwalkar (Non Promoter Shareholder) has agreed to offer up to 11,36,000 Equity Shares held by her in the Offer for Sale. The proceeds from the Offer for Sale will be remitted to Shibani Belwalkar, Selling Shareholder and our Company will not benefit from such proceeds.

32. ***Our funding requirements and deployment of the issue proceeds are based on management estimates and have not been independently appraised by any bank or financial institution.***

Our funding requirements and the deployment of the proceeds of the Issue are based on management estimates and our current business plan. The fund requirements and intended use of proceeds have not been appraised by bank or financial institution and are based on our estimates. In view of the competitive and dynamic nature of our business, we may have to revise our expenditure and fund requirements as a result of variations including in the cost structure, changes in estimates and other external factors, which may not be within the control of our management. This may entail rescheduling, revising or cancelling the planned expenditure and fund requirement and increasing or decreasing the expenditure for a particular purpose from its planned expenditure at the discretion of our Board. In addition, schedule of implementation as described herein are based on management's current expectations and are subject to change due to various factors some of which may not be in our control.

33. ***Our Company's management will have flexibility in utilizing the Net Proceeds. There is no monitoring agency appointed by our Company and the deployment of funds is at the discretion of our Management and our Board of Directors, though it shall be monitored by our Audit Committee.***

The deployment of the funds towards the objects of the issue is entirely at the discretion of the Board of Directors and is not subject to monitoring by external independent agency. As per SEBI (ICDR) Regulations, 2009, as amended, appointment of monitoring agency is required only for Issue size above ₹10,000.00 lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Net Issue Proceeds to BSE Limited and shall also simultaneously make the material deviations / adverse comments of the audit committee public. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

34. ***Any variation in the utilization of the Net Proceeds as disclosed in this Prospectus shall be subject to certain compliance requirements, including prior Shareholders' approval.***

The deployment of the funds towards the objects of the issue is entirely at the discretion of the Board of Directors and is not subject to monitoring by external independent agency. We propose to utilize the Net Proceeds towards prepayment or repayment of a portion of loan facilities availed by our Company, purchase of computer hardware and office equipment, meeting additional working capital requirements, additional infrastructure at our registered office and corporate office at Mumbai, marketing and brand building and general corporate purposes. For further details of the proposed objects of the Issue, please refer “*Objects of the Issue*” on page 63.

In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Prospectus without obtaining the shareholders’ approval through a special resolution. In the event of any such circumstances that requires us to undertake variation in the disclosed utilisation of the Net Proceeds, we may not be able to obtain the Shareholders’ approval in a timely manner, or at all. Any delay or inability in obtaining such Shareholders’ approval may adversely affect our business or operations. Further, our Promoter or controlling shareholders would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to modify the objects of the Issue as prescribed in the SEBI (ICDR) Regulations. If our shareholders exercise such exit option, our business and financial condition could be adversely affected. Therefore, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company, which may restrict our ability to respond to any change in our business or financial condition, and may adversely affect our business and results of operations.

35. *Our Company have not yet placed orders for computer hardware and office equipment aggregating ₹ 88.54 lakhs required by us for the proposed operations. Any delay in placing the orders / or supply of equipment may result in time and cost overruns, and may affect our profitability.*

Our Company proposes to acquire computer hardware and office equipment aggregating ₹ 88.54 lakhs for our proposed operations which is 6.19% of the Net Issue Proceeds. Our Company have not yet placed orders for equipment aggregating ₹88.54 lakhs required by us which constitutes 100% of the total equipment to be acquired. Our Company is further subject to risks on account of inflation in the price of such equipment.

Our Company has received quotations for these computer hardware and office equipment, and negotiations with the vendors have commenced. The details of quotations received appear in paragraph titled ‘*Purchase of Computer Hardware and Office Equipment*’ under the section titled ‘*Objects of the Issue*’ on page 63. Since the funding for the purchase of equipment is solely from the IPO proceeds, any delay in access to IPO proceeds would eventually delay the process of placing the orders. The purchase of equipment would require us to consider factors including but not limited to pricing, delivery schedule and after-sales maintenance. There may also be a possibility of delay at the suppliers’ end in providing timely delivery of these equipment, which in turn may delay the implementation of our project.

36. *Certain of our Group Companies have incurred losses and our Group Company Ozean Futura Private Limited had negative networth in last three financial years.*

Following of our Group Companies have incurred losses in the last three financial years:

(₹ in lakhs)

Name of Group Company	FY-2017	FY-2016	FY-2015
CRP Beaumont Research (India) Private Limited	(0.08)	0.14	(0.60)
Apple Lifecare (India) Private Limited	(5.37)	11.93	4.01
Ozean Futura Private Limited	10.74	(58.49)	(102.73)

Further, our Group Company, Ozean Futura Private Limited had negative networth of ₹188.62, ₹199.37 lakhs and ₹140.87 lakhs respectively. For further details please refer “*Our Group Entities*” on page 117. There is no assurance that our Group Companies will not incur losses in future periods or that there will not be an adverse effect on our Company’s reputation or business as a result of such losses.

37. *Our Promoter and Promoter Group will continue to exercise control post completion of the Issue and will have considerable influence over the outcome of matters.*

Upon completion of this Issue, our Promoter and Promoter Group will continue to own a majority of our Equity Shares. As a result, our Promoter will have the ability to exercise significant influence over all matters requiring shareholders’ approval. Our Promoter will also be in a position to influence any shareholder action or approval requiring a majority vote, except where they may be required by applicable law to abstain from voting. This control could also delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination

involving our Company, or discourage a potential acquirer from obtaining control of our Company even if it is in the best interests of our Company. The interests of our Promoter could conflict with the interests of our other equity shareholders, and the Promoter could make decisions that materially and adversely affect your investment in the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by our Promoter, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. Except as disclosed in “*Capital Structure*” on page 51, we cannot assure you that our Promoter will not dispose of, pledge or encumber their Equity Shares in the future.

38. *We have experienced negative cash flows in the past. Our inability to generate and sustain adequate cash flows in the future may adversely affect our business, results of operations and financial condition.*

We have experienced negative cash flows in the recent periods, the details of which, as per our restated financial statements, are as follows:

(₹ in lakhs)

Particulars	For the four months period ended July 31, 2017	For the financial year ended March 31		
		2017	2016	2015
Net Cash from Investing Activities	(0.70)	(200.42)	34.72	(232.44)
Net Cash from Financing Activities	(125.43)	(883.04)	(713.09)	(295.40)

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet its capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. Our inability to generate and sustain adequate cash flows in the future could adversely affect our results of operations and financial condition. For further details, please refer “*Financial Statements*” and “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” on pages 126 and 156 respectively.

39. *We have not made any dividend payments in the previous five financial years and our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements, capital expenditures and restrictive covenants in our financing arrangements.*

In the previous five financial years, we have not made dividend payments to the shareholders of our Company. The amount of our future dividend payments, if any, will depend upon various factors including our future earnings, financial condition, cash flows and requirement to fund operations and expansion of the business. There can be no assurance that we will be able to declare dividends. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors. For further details, please refer “*Dividend Policy*” on page 125.

40. *We have not obtained the registration of our trademarks used in our businesses and our inability to obtain or maintain these registrations may adversely affect our competitive business position.*

Our Corporate logo “

The registration of any trademark is a time-consuming process, and there can be no assurance that any such registration will be granted as and when applied. In the absence of such registration, competitors or other companies may challenge the validity or scope of our intellectual property. Our trademark is integral to our business, and the loss of intellectual property rights could have a material adverse effect on our business.

There can be no assurance that we will be able to obtain the registration of our trademark in a timely manner, or at all. If our unregistered trademark is registered in favour of a third party, we may not be able to claim registered ownership of such trademarks and consequently, we may be unable to seek remedies for infringement of trademark by third parties other than relief against passing off by other entities. If our application is objected to, we will not have the right to use this trademark or prevent others from using this trademark or its variations. Our inability to obtain or maintain this trademark in our business thus could adversely affect our reputation, goodwill, business, prospectus and results of operations.

41. *We require certain registrations, licenses, approvals and permissions from government and regulatory authorities in the ordinary course of our business and any delay or failure to obtain them may adversely affect*

***our operations.***

We require certain statutory and regulatory approvals, licenses, registrations and permissions, and applications need to be made at the appropriate stages for our business to operate. There can be no assurance that the relevant authorities will issue these approvals or licenses, or renewals thereof in a timely manner, or at all. An inability to obtain or maintain approvals or licenses required for our operations may adversely affect our operations. Government approvals, licenses, clearances and consents are often also subject to numerous conditions, some of which are onerous and may require significant expenditure. Furthermore, approvals, licenses, clearances, and consents covering the same subject matter are often required at both the Central Government and State Government levels. If we fail to comply, or a regulator claims that we have not complied, with these conditions, we may not be able to continue with work or operate these activities. For further information on various approvals or licenses required in connection with our operations, please refer “*Government and Other Approvals*” on page 176.

42. *Our insurance coverage may not be sufficient or may not adequately protect us against any or all hazards, which may adversely affect our business, results of operations and financial condition.*

While we believe that the insurance coverage which we maintain is in keeping with industry standards and would be reasonably adequate to cover the normal risks associated with the operation of our businesses, we cannot assure you that any claim under the insurance policies maintained by us will be honoured fully, in part or on time, or that we have taken out sufficient insurance to cover all our losses.

In addition, our insurance coverage expires from time to time. We apply for the renewal of our insurance coverage in the normal course of our business, but we cannot assure you that such renewals will be granted in a timely manner, at acceptable cost or at all. To the extent that we suffer loss or damage, or successful assertion of one or more large claims against us for events for which we are not insured, or for which we did not obtain or maintain insurance, or which is not covered by insurance, exceeds our insurance coverage or where our insurance claims are rejected, the loss would have to be borne by us and our results of operations, financial performance and cash flows could be adversely affected. For further details on our insurance arrangements, please refer “*Our Business – Insurance*” on page 90.

43. *Some of our old corporate records in connection with the transfer of shares are not available.*

Our Company is unable to trace certain corporate records like a few transfer deeds and so we have relied upon the other documents and certificates as provided by the management. These documents pertain to the transfer of 19 Equity Shares dated April 4, 2008 and 30 Equity Shares dated May 2, 2011 by our promoter and also transfer of 16 Equity Shares dated June 27, 2009 and 3 Equity Shares dated December 23, 2009 to our promoter i.e. Hitesh Asrani. Despite having conducted an extensive search in the records of our Company as well as the Registrar and Share transfer agent, we have not been able to retrieve the aforementioned documents, and accordingly, have relied on other documents, such as our statutory registers to verify the details of transfer of Share during this period. Hence, we will not be able to provide them too any person or the authorities. In such a scenario, notices maybe issued upon our Company and fines or penalties may also be imposed upon our Company, which may adversely affect our business and operations from compliance perspective.

44. *The requirements of being a listed company may strain our resources.*

We have no experience as a listed company and have not been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the SEBI (LODR) Regulations, which require us to file audited / unaudited reports periodically with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as timely as other listed companies.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, for which significant resources and management overview will be required. As a result, management’s attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. Further, we may need to hire additional legal and accounting staff with appropriate and relevant experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner or at all.

EXTERNAL RISKS

45. ***Political, economic or other factors that are beyond our control may have an adverse effect on our business and results of operations.***

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Although, economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

Our performance, growth and market price of our Equity Shares are and will be dependent on the health of the Indian economy. There have been periods of slowdown in the economic growth of India. Demand for our services may be adversely affected by an economic downturn in domestic, regional and global economies. India's economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports (oil and oil products), global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production. Consequently, any future slowdown in the Indian economy could harm our business, results of operations, cash flows and financial condition. Also, a change in the Government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

46. ***Changing laws, rules and regulations and legal uncertainties in India, including adverse application of corporate and tax laws, may adversely affect our business and financial results.***

Our business and financial performance could be adversely affected by any change in laws or interpretations of existing laws, or the promulgation of new laws, rules and regulations applicable to us and our business including those relating to the industry in which we operate. There can be no assurance that the Government of India or state governments will not introduce new laws, regulations and policies which will require us to obtain additional approvals and licenses or impose onerous requirements on our business.

For example, the new Companies Act, 2013 contains significant changes to Indian company law, including in relation to the issue of capital by companies, disclosures in offer documents, related party transactions, corporate governance, audit matters, internal controls, shareholder class actions, restrictions on the number of layers of subsidiaries, prohibitions on loans to directors, insider trading and restrictions on directors and key management personnel from engaging in forward dealing. Moreover, effective April 1, 2014, companies exceeding certain net worth, revenue or profit thresholds are required to spend at least 2% of average net profits from the immediately preceding three financial years on corporate social responsibility projects, failing which an explanation is required to be provided in such companies' annual reports.

The Ministry of Finance has issued a notification dated March 31, 2015 notifying ICDS which creates a new framework for the computation of taxable income. Subsequently, the Ministry of Finance, through a press release dated July 6, 2016, deferred the applicability of ICDS from April 1, 2015 to April 1, 2016 and is applicable from FY 2017 onwards and will have impact on computation of taxable income for FY 2017 onwards. ICDS deviates in several respects from concepts that are followed under general accounting standards, including Indian GAAP and Ind AS. Such specific standards for computation of income taxes in India are relatively new, and the impact of the ICDS on our results of operations and financial condition is uncertain. There can be no assurance that the adoption of ICDS will not adversely affect our business, results of operations and financial condition going forward.

The Government of India has recently approved the adoption of a comprehensive national goods and services tax ("GST") regime that will combine taxes and levies by the Central and State Governments into a unified rate structure, with effect from July 1, 2017. Given the limited availability of information in the public domain concerning the GST, we cannot provide any assurance as to this or any other aspect of the tax regime following implementation of the GST. The implementation of this rationalized tax structure may be affected by any disagreement between certain state governments, which may create uncertainty. Any future increases or amendments may affect the overall tax efficiency of companies

operating in India and may result in significant additional taxes becoming payable. If, as a result of a particular tax risk materializing, the tax costs associated with certain transactions are greater than anticipated, it could affect the profitability of such transactions.

We have not determined the effect of such legislations on our business. In addition, unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

47. *Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares.*

Under foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions), if they comply with the valuation and reporting requirements specified by the RBI. If a transfer of shares is not in compliance with such requirements and does not fall under any of the exceptions specified by the RBI, then the RBI's or central government's prior approval is required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no objection or a tax clearance certificate from the Indian income tax authorities. We cannot assure you that any required approval from the RBI or any other governmental agency can be obtained on any particular terms or at all.

48. *Significant differences exist between Indian GAAP and other accounting principles, such as US GAAP and IFRS, which may be material to an investor's assessment of our Company's financial condition.*

As stated in the reports of our Company's statutory auditors included in the Prospectus, our Restated Financial Information is prepared and presented in accordance with the Companies Act and restated in accordance with the SEBI (ICDR) Regulations, consistently applied during the periods stated, except as provided in such reports, and no attempt has been made to reconcile any of the information given in the Prospectus to any other principles or to base it on any other standards such as US GAAP or IFRS. Each of US GAAP and IFRS differs in significant respects from Indian GAAP. Accordingly, the degree to which the Restated Financial Information included in this Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Prospectus should accordingly be limited.

49. *Investors may have difficulty enforcing foreign judgments against us or our management.*

We are a limited liability company incorporated under the laws of India. All our directors and executive officers are residents of India and all of our assets and such persons are located in India. As a result, it may not be possible for investors to effect service of process upon us or such persons outside of India, or to enforce judgments obtained against such parties outside of India.

Recognition and enforcement of foreign judgments is provided for under Section 13 of the Code of Civil Procedure, 1908 ("CPC") on a statutory basis. Section 13 of the CPC provides that foreign judgments shall be conclusive regarding any matter directly adjudicated upon, except: (i) where the judgment has not been pronounced by a court of competent jurisdiction; (ii) where the judgment has not been given on the merits of the case; (iii) where it appears on the face of the proceedings that the judgment is founded on an incorrect view of international law or a refusal to recognise the law of India in cases to which such law is applicable; (iv) where the proceedings in which the judgment was obtained were opposed to natural justice; (v) where the judgment has been obtained by fraud; and (vi) where the judgment sustains a claim founded on a breach of any law then in force in India. Under the CPC, a court in India shall, upon the production of any document purporting to be a certified copy of a foreign judgment, presume that the judgment was pronounced by a court of competent jurisdiction, unless the contrary appears on record.

However, under the CPC, such presumption may be displaced by proving that the court did not have jurisdiction. India is

not a party to any international treaty in relation to the recognition or enforcement of foreign judgments. Section 44A of the CPC provides that where a foreign judgment has been rendered by a superior court, within the meaning of that Section, in any country or territory outside of India which the Central Government has by notification declared to be in a reciprocating territory, it may be enforced in India by proceedings in execution as if the judgment had been rendered by the relevant court in India. However, Section 44A of the CPC is applicable only to monetary decrees not being of the same nature as amounts payable in respect of taxes, other charges of a like nature or of a fine or other penalties.

The United States and India do not currently have a treaty providing for reciprocal recognition and enforcement of judgments, other than arbitration awards, in civil and commercial matters. Therefore, a final judgment for the payment of money rendered by any federal or state court in the United States on civil liability, whether or not predicated solely upon the federal securities laws of the United States, would not be enforceable in India. However, the party in whose favour such final judgment is rendered may bring a new suit in a competent court in India based on a final judgment that has been obtained in the United States. The suit must be brought in India within three years from the date of the judgment in the same manner as any other suit filed to enforce a civil liability in India.

It is unlikely that a court in India would award damages on the same basis as a foreign court if an action was brought in India. Furthermore, it is unlikely that an Indian court would enforce a foreign judgment if that court were of the view that the amount of damages awarded was excessive or inconsistent with public policy or Indian practice. It is uncertain as to whether an Indian court would enforce foreign judgments that would contravene or violate Indian law. However, a party seeking to enforce a foreign judgment in India is required to obtain approval from the RBI under the FEMA to execute such a judgment or to repatriate any amount recovered.

50. ***The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.***

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the SME Platform of BSE may not develop or be sustained after the Issue. Our Company and the Lead Manager have appointed Beeline Broking Limited as a Designated Market Maker for the Equity Shares of our Company. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in the SME Platform of BSE, securities markets in other jurisdictions, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

51. ***Any future issuance of Equity Shares, or convertible securities or other equity linked securities by us and any sale of Equity Shares by our significant shareholders may dilute your shareholding and adversely affect the trading price of the Equity Shares.***

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by us may dilute your shareholding in the Company, adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. No assurance may be given that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our significant shareholders, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that we will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

52. ***You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.***

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if STT has been paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the equity shares are sold. It is pertinent to note that pursuant to the Finance Bill, 2017, it has been proposed, that with effect from April 1, 2017, this exemption would only be available if the original acquisition of equity shares was chargeable to STT. The Central Government is expected to, however notify the transactions which would be exempt from the application of this new amendment. Any

gain realized on the sale of equity shares held for more than 12 months, which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to applicable short term capital gains tax in India. Capital gains arising from the sale of the equity shares will be exempt from taxation in India in cases where the exemption is provided under a treaty between India and the country of which the seller is resident, subject to the availability of certain documents. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

53. Natural calamities could have a negative effect on the Indian economy and cause our business to suffer.

India has experienced natural calamities such as earthquakes, a tsunami, floods and drought in the past few years. The extent and severity of these natural disasters determines their effect on the Indian economy. Further prolonged spells of below normal rainfall or other natural calamities in the future could have a negative effect on the Indian economy, adversely affecting our business and the price of our Equity Shares.

SECTION III – INTRODUCTION SUMMARY OF INDUSTRY

RISK MANAGEMENT

Source: https://en.wikipedia.org/wiki/Risk_management

Risk management is the identification, assessment, and prioritization of risks (defined in ISO 31000 as the effect of uncertainty on objectives) followed by coordinated and economical application of resources to minimize, monitor, and control the probability or impact of unfortunate events or to maximize the realization of opportunities. Risk management's objective is to assure uncertainty does not deflect the endeavor from the business goals.

Risks can come from various sources including uncertainty in financial markets, threats from project failures (at any phase in design, development, production, or sustainment life-cycles), legal liabilities, credit risk, accidents, natural causes and disasters, deliberate attack from an adversary, or events of uncertain or unpredictable root-cause. There are two types of events i.e. negative events can be classified as risks while positive events are classified as opportunities. Several risk management standards have been developed including the Project Management Institute, the National Institute of Standards and Technology, actuarial societies, and ISO standards. Methods, definitions and goals vary widely according to whether the risk management method is in the context of project management, security, engineering, industrial processes, financial portfolios, actuarial assessments, or public health and safety.

Strategies to manage threats (uncertainties with negative consequences) typically include avoiding the threat, reducing the negative effect or probability of the threat, transferring all or part of the threat to another party, and even retaining some or all of the potential or actual consequences of a particular threat, and the opposites for opportunities (uncertain future states with benefits).

VERIFICATION

In the globalised and liberalised business environment of the last few years, we face a drastically increasing volume of frauds. This is especially in the financial sectors in India.

The Indian financial services sector has witnessed exponential growth in the last decade—a growth that has not been without its pitfalls, as incidents of fraud have also been on the rise. Fraud results in significant losses to the public exchequer, adversely affecting service delivery. Financial fraud is big business, contributing to an estimated 20 billion USD in direct losses annually. Industry experts suspect that this figure is actually much higher, as firms cannot accurately identify and measure losses due to fraud. The worst effect of financial frauds is on FDI inflows into India. The time has come for financial services organisations to pursue a more strategic approach to fraud management within. To overcome this challenge, they need strict and focussed steps. There needs to be transparency at all levels in organisations to reduce frauds.

Importance of Verification

Decisions are taken based on data and facts - if the facts are false, it is more likely that your decisions will be wrong and thereby the results will not be favorable. This is true across ministries, industries and departments- for every step of governance, be it in a corporate or a government, follows the same fundamentals: problem definition; solution identification & implementation; result measurement.

An independent verification at each step ensure the right results!

According to the RBI, the number of fraud cases has declined from 24,791 cases in 2009–10 to 13,293 cases in 2012–13 — i.e. a 46% drop—the amount involved has increased substantially from 2037.81 crore INR to 8,646.00 crore INR—i.e. an increase of 324%.¹⁴

Latest reported facts and figures: In India, frauds worth 11,022 crore INR were unearthed in public sector banks between April–December 2014; 2,100 cases of fraud were reported to the RBI.

Looking at the y-o-y growth of GNPAs there has been a significant rise across public, private and foreign sector banks in FY16. Our Company proposes to utilize an estimated amount of ₹ 175.00 lakhs from the Net Proceeds towards prepayment or repayment of a portion of loan facilities availed by the Company, the details of which are listed out in the table below. 5. Marketing and Brand Building

Branding is a set of marketing and communication methods that help to distinguish a company or products from competitors, aiming to create a lasting impression in the minds of customers. The key components that form a brand's toolbox include a brand's identity, brand communication (such as by logos and trademarks), brand awareness, brand

loyalty, and various branding (brand management) strategies. In order for a company to exude a strong sense of brand identity, it must have an in-depth understanding of its target market, competitors and the surrounding business environment.

We believe branding goes much beyond just a memorable logo, good branding increases the value of a company, provides employees with direction and motivation, and makes acquiring new customers easier. Brands are a means of differentiating an entity's products and services from those of its competitors. A strong brand will help us to make our products distinct from competition. It will also increase awareness about the products and services of our company. A brand represents the sum of people's perception of a company's customer service, reputation, advertising, and logo. When all of these parts of the business are working well, the overall brand tends to be healthy. In line with our Company's expansion plans, we propose to establish a recognized brand for our Company.

We believe that Advertising and Branding will give following benefits:

1. Improves Recognition
2. Create Trust
3. Build Financial Value
4. Inspire Employees

RISK MANAGEMENT

Source: https://en.wikipedia.org/wiki/Risk_management

Risk management is the identification, assessment, and prioritization of risks (defined in ISO 31000 as the effect of uncertainty on objectives) followed by coordinated and economical application of resources to minimize, monitor, and control the probability or impact of unfortunate events or to maximize the realization of opportunities. Risk management's objective is to assure uncertainty does not deflect the endeavor from the business goals.

Risks can come from various sources including uncertainty in financial markets, threats from project failures (at any phase in design, development, production, or sustainment life-cycles), legal liabilities, credit risk, accidents, natural causes and disasters, deliberate attack from an adversary, or events of uncertain or unpredictable root-cause. There are two types of events i.e. negative events can be classified as risks while positive events are classified as opportunities. Several risk management standards have been developed including the Project Management Institute, the National Institute of Standards and Technology, actuarial societies, and ISO standards. Methods, definitions and goals vary widely according to whether the risk management method is in the context of project management, security, engineering, industrial processes, financial portfolios, actuarial assessments, or public health and safety.

Strategies to manage threats (uncertainties with negative consequences) typically include avoiding the threat, reducing the negative effect or probability of the threat, transferring all or part of the threat to another party, and even retaining some or all of the potential or actual consequences of a particular threat, and the opposites for opportunities (uncertain future states with benefits).

Certain aspects of many of the risk management standards have come under criticism for having no measurable improvement on risk; whereas the confidence in estimates and decisions seem to increase.

In ideal risk management, a prioritization process is followed whereby the risks with the greatest loss (or impact) and the greatest probability of occurring are handled first, and risks with lower probability of occurrence and lower loss are handled in descending order. In practice the process of assessing overall risk can be difficult, and balancing resources used to mitigate between risks with a high probability of occurrence but lower loss versus a risk with high loss but lower probability of occurrence can often be mishandled.

Intangible risk management identifies a new type of a risk that has a 100% probability of occurring but is ignored by the organization due to a lack of identification ability. For example, when deficient knowledge is applied to a situation, a knowledge risk materializes. Relationship risk appears when ineffective collaboration occurs. Process-engagement risk may be an issue when ineffective operational procedures are applied. These risks directly reduce the productivity of knowledge workers, decrease cost-effectiveness, profitability, service, quality, reputation, brand value, and earnings

quality. Intangible risk management allows risk management to create immediate value from the identification and reduction of risks that reduce productivity.

Risk management also faces difficulties in allocating resources. This is the idea of opportunity cost. Resources spent on risk management could have been spent on more profitable activities. Again, ideal risk management minimizes spending (or manpower or other resources) and also minimizes the negative effects of risks.

According to the definition to the risk, the risk is the possibility that an event will occur and adversely affect the achievement of an objective. Therefore, risk itself has the uncertainty. Risk management such as COSO ERM, can help managers have a good control for their risk. Each company may have different internal control components, which leads to different outcomes. For example, the framework for ERM components includes Internal Environment, Objective Setting, Event Identification, Risk Assessment, Risk Response, Control Activities, Information and Communication, and Monitoring.

Method

For the most part, these methods consist of the following elements, performed, more or less, in the following order.

1. identify, characterize threats
2. assess the vulnerability of critical assets to specific threats
3. determine the risk (i.e. the expected likelihood and consequences of specific types of attacks on specific assets)
4. identify ways to reduce those risks
5. prioritize risk reduction measures

Principles of risk management

The International Organization for Standardization (ISO) identifies the following principles of risk management: Risk management should:

- create value – resources expended to mitigate risk should be less than the consequence of inaction
- be an integral part of organizational processes
- be part of decision making process
- explicitly address uncertainty and assumptions
- be a systematic and structured process
- be based on the best available information
- be tailorable
- take human factors into account
- be transparent and inclusive
- be dynamic, iterative and responsive to change
- be capable of continual improvement and enhancement
- be continually or periodically re-assessed

VERIFICATION

In the globalised and liberalised business environment of the last few years, we face a drastically increasing volume of frauds. This is especially in the financial sectors in India.

The Indian financial services sector has witnessed exponential growth in the last decade—a growth that has not been without its pitfalls, as incidents of fraud have also been on the rise. Fraud results in significant losses to the public exchequer, adversely affecting service delivery. Financial fraud is big business, contributing to an estimated 20 billion USD in direct losses annually. Industry experts suspect that this figure is actually much higher, as firms cannot accurately identify and measure losses due to fraud. The worst effect of financial frauds is on FDI inflows into India. The time has come for financial services organisations to pursue a more strategic approach to fraud management within. To overcome this challenge, they need strict and focussed steps. There needs to be transparency at all levels in organisations to reduce frauds.

Importance of Verification

Decisions are taken based on data and facts - if the facts are false, it is more likely that your decisions will be wrong and thereby the results will not be favorable. This is true across ministries, industries and departments- for every step of governance, be it in a corporate or a government, follows the same fundamentals: problem definition; solution identification & implementation; result measurement.

An independent verification at each step ensure the right results!

According to the RBI, the number of fraud cases has declined from 24,791 cases in 2009–10 to 13,293 cases in 2012–13 — i.e. a 46% drop—the amount involved has increased substantially from 2037.81 crore INR to 8646.00 crore INR—i.e. an increase of 324%.¹⁴

Latest reported facts and figures: In India, frauds worth 11,022 crore INR were unearthed in public sector banks between April–December 2014; 2,100 cases of fraud were reported to the RBI.

Verification – Global Scenario

Since the global financial crisis of 2008, the world's economy continued to remain fragile amidst real growth slowdown in the work trade and uncertainties in the financial market. The sluggishness in the global economy has also resulted in declining capital flows to emerging markets and developing economies. The global growth is projected to stand at 2.9% for 2016 and 3.2% for 2017 as per the work economic Situation & Prospects 2016. Developing economics are expected to continue to OutSpace developed economies with a growth of 4.3% in 2016 as compared to a projected growth of 2.2% for developed economies in 2016

NPAs show weaker performance for most of the Emerging & Developing Markets (EDMs). With the economy bouncing back after the crisis, the asset quality of advanced economies like the US and the UK have been responding well to the

policies and reforms undertaken, thereby reporting improvement over the past four years. Largely driven by weak economic developments and mounting corporate debt, Greece continues to show deterioration in their asset quality.

Emerging and developing economies including Brazil, China, India and Russia are facing tremendous pressures on the growing stock of non-performing assets (NPAs) leading to an increase in their NPA ratio.

Financial institutions are enhancing their processes, controls and fraud risk management frameworks to minimise the opportunities for fraud as well as reduce the time taken in their detection. Funding for fraud control initiatives, however, continues to compete with other business initiatives and is mostly challenged on a cost–benefit basis.

Many financial institutions are thus implementing their fraud control and reporting frameworks to generate information in a way that the level of fraud identified, prevented and actual losses incurred are identified. This approach has enabled the benefits of skilled resources and automated tools to be quantified more precisely.

Asset quality of all SCBs Continued to Deteriorate in FY16

The gross non-performing advances (GNPAs) of public sector banks continued to display the highest level of stressed advances ratio at 14.5 %, compared to private and foreign sector banks that recorded stressed advances ratio at 4.5 %. The GNPAs of all SCBs sharply increased to 7.6% as of March 2016 compared to 4.6% in FY15. The restructured standard advances ratio declined considerably to 3.9% as compared to 6.4% in FY15 for all SCBs. GNPAs largely contributed to the increase in the overall stressed advance ratio to 11.5% for FY16 from 10.9 in FY15. Looking at the y-o-y growth of GNPAs there has been a significant rise across public, private and foreign sector banks in FY16. This is reflected in the sharp 79.7% increase in GNPAs of SCBs during FY16.

WHY DO WE NEED VERIFICATION TO CONTROL FRAUD?

Fraudulent documentation: -

Fraudulent documentation involves altering, changing or modifying a document to deceive another person. It can also involve approving incorrect information provided in documents knowingly. Deposit accounts in banks with lax KYC drills/ inoperative accounts are vulnerable to fraudulent documentation. Some examples: A person takes a loan using a fictitious name and there is a lack of a strong framework pertaining to spot verifications of address, due diligence of directors/promoters, pre-sanction surveys and identification of faulty/incomplete applications and negative/criminal records in client history.

Identity theft

Fraudsters are devising new ways to exploit loopholes in technology systems and processes. In case of frauds involving lower amounts, they employ hostile software programs or malware attacks, phishing, SMSishing and whaling (phishing targeting high net worth individuals) apart from stealing confidential data. In February 2013, the RBI advised banks to introduce certain minimum checks and balances such as the introduction of two factor authentication in case of 'card not present' transactions.

Lost/stolen card: It refers to the use of a card lost by a legitimate account holder for unauthorised/illegal purposes.

Internet banking and related frauds

Around 65% of the total fraud cases reported by banks were technology-related frauds (covering frauds committed through/ at an internet banking channel, ATMs and other payment channels like credit/debit/prepaid cards), whereas advance-related fraud accounted for a major proportion (64%) of the total amount involved in fraud.

False pretences: Someone with the intent to steal corporate information can get a job with a cleaning company or other vendor specifically to gain legitimate access to the office building.

Incorrect sanctioning or external vendor-induced fraud

External fraudsters are still the main perpetrators of Economic Crime for the majority of financial service organisations (57% in 2014 and 60% in 2011). Financial institutions are prime targets for external frauds, given the amount of money fraudsters can potentially obtain as well as the sensitivity of data held by these organisations (credit card and personal identity details, for example). The financial services sector also tends to be more strictly regulated and as a result, many business processes and functions have corporate controls in place. This makes it more difficult for frauds to be internally

perpetrated without discovery. The absence of a proactive and robust monitoring framework, however, does not allow the entity to identify conflict of interest issues such as employees or agents having a close relationship with other entities.

Falsified Valuations: External consultants advising loan borrowers to fabricate their valuation report and inflate the amount of funds that can be borrowed

Overvaluation or absence of collaterals

Absence of stringent guidelines on the due diligence of professionals assisting borrowers at the time of disbursement of loans may result in valuation agencies or advocates facilitating the perpetration of frauds by colluding with the borrowers to inflate security valuation reports.

Concealing liabilities: Borrowers concealing obligations such as mortgage loans on other properties or newly acquired credit card debts in order to reduce the amount of monthly debt declared on the loan application

Mobile banking: Risks

There are two types of mobile financial services that are currently offered in the Indian market—mobile banking and mobile wallets. Being an easy and convenient mode of transacting, there has been 55 times rise in value usage of mobile banking and 5.5 times rise in the volume of transactions between FY12 and FY15.

After the recent changes to RBI policy, customers of semi-closed pre-paid instruments (PPIs) can now do the following:

- Load up to 1,00,000 INR in wallets
- Transfer money from their wallet to any bank account

This move, on one hand, enhances the convenience and adoptability of a mobile wallet but on the other, makes it more susceptible to fraud risks.

Fraud risks: Insurance companies

Large accumulations of liquid assets make insurance companies attractive for loot schemes. These companies are under great pressure to maximise the returns on investment of the reserve funds, making them vulnerable to high-yielding high-risk investment schemes.

The insurance industry has witnessed an increase in the number of fraud cases over the last couple of years. A growing number of organisations are realising that frauds are driving up the overall costs of insurers and premiums for policyholders, which may threaten their viability and also have a bearing on their profitability. To keep these risks under check, a detailed framework for insurance fraud monitoring has been laid down with effect from 2013–14 and is applicable to all insurers and reinsurers.

Misrepresentation: Misrepresenting critical information relating to a profile (incorrect income, educational qualification, occupation, etc)

Example: The proposal form mentioned that the client had a shop in the market, whereas investigations revealed that the client was a small-time vendor sitting on a footpath.

Forgery or tampering documents: Forging the customer's signature in any document, proposal or any supporting document

Example: The client (staying in one city) and working as a surgeon was required to countersign the application form for some corrections. The form came back and it was found that the signatures were forged by the advisor, who was the client's brother.

Bogus business: Proposal forms submitted for non-existent customers

Example: A sales manager or broker logs in the proposal of a non-existing client

Cash defalcation: Agent collecting the premium but not remitting the cheque to the insurance company, owing to which the insured has no coverage

Example: The advisor had collected the premiums from the customer and had not deposited the same for almost a month; it came to the insurer's notice when the customer was sent the lapsed letter.

Pre-signed forms: Obtaining pre-signed blank forms and filling the address change request (ACR)/contact number change (CCR) without actually physically seeing the client or satisfying oneself about the client

Example: While the proposal form mentioned that the customers were working in an electronic agency, in reality they were working in some other business.

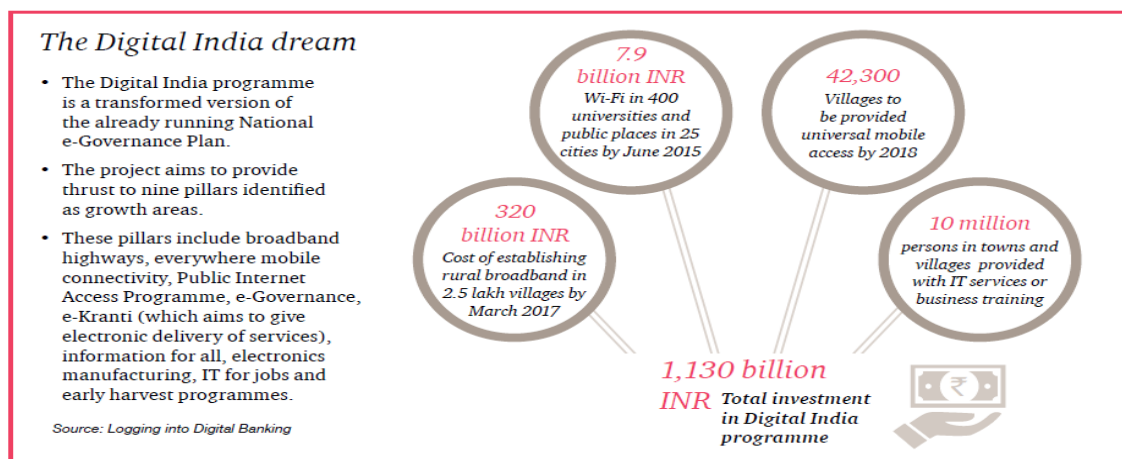

Doctor’s nexus: Doctor being involved with the perpetrators in committing life insurance fraud

Example: A doctor gave clean medical reports when the fraudster exerted influence

KEY FUTURE GROWTH OPPURTUNITIES.

The growth in NPA & current fraud trends in BFSI sector has seen a 100% rise in the last 5 years. Additionally, the government of India has announced “The Digital India Dream”.

The government of India announced a planned investment of 1,330 billion INR in the Digital India project that aims to provide universal mobile phone access, broadband access in 250,000 villages and Wi-Fi hotspots in every city with a population of 1 million plus by the year 2020.

Government Sectors Vendor Due Diligence: Awarding tenders to contractors is no longer based on the decision taken by the politician based on their nexus or company floated by kith & kin. Today media is playing a prominent role in following the live status of projects meant for people. This has also changed the way government looks upon the tender awarded non-adherence of timelines or low quality of work is a reputation risk for their government

Aadhar Authenticity: Government of India has pushed the integration of every scheme with Aadhar numbers. Programmes such as IT Returns, Issuance of death certification, Identifying Benami Properties, Subsidy on LPG gas are some of the schemes that are being integrated with Aadhar. Recently there has been news on Aadhar data leakage which has made all the schemes attached to Aadhar card vulnerable.

Need for Verification in the retail sector: Crimes by our domestic support staff are on rise. In 75% cases, the crime could have been prevented had the employer got a KYC check done on the support staff. One cannot do much once the crime is committed and the employer realizes there is lack of any background information on the suspect.

According to the NCRB [National Crime Research Bureau] report-

- Mumbai tops the list with 8,904 cases registered under IPC sections 379 to 382.
- Even tier two and three cities have a significant number of such cases: Bhopal 1,091, Indore 1,054, Lucknow 1,325, Jaipur 1,538 and Patna 230”.

Employers verifying the financial history of the prospective employee: - Industry trends show that employee fraud is one of the frauds which is on rise. Every employer demands the financial history of previous loans & existing loans, any default in the past, Verification of documents as ITR / Form 16 to verifying the genuine-ness of the documents.

Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

Use of Estimate

The preparation of financial statements requires the group of management to make estimates and assumptions that affect the reported balances of assets and liabilities and disclosures relating to the contingent liabilities as at the date of the financial statements and reported amounts of income and expenses during the year. Example of such estimates include provision for doubtful debts, employee benefits, provision for income taxes, accounting for contract costs expected to be incurred, the useful lives of depreciable fixed assets and provisions for impairment.

All other expenses on existing fixed assets. Including day to day repair and maintenance expenditure and cost of replacing parts, are charged to the statement of profit and loss for the period during which such expenses are incurred.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated primarily through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are FIPB and the RBI.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The DIPP, issued the consolidated FDI Policy by way of circular no. D/o IPP F. No. 5(1)/2017-FC-1 dated August 28, 2017 (“**FDI Policy**”), which with effect from August 28, 2017, consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on August 28, 2017. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the foreign direct investment (“**FDI**”) Policy and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.

As per the existing policy of the Government of India, OCBs cannot participate in the Issue.
