As per our business model, if we receive any bulk orders from any customers, we may supply our products to our customers without taking any advance payment or security deposit against the orders placed by them. Such delays in payments may require our Company to make a working capital investment. We cannot assure you that payments from all or any of our customers will be received in a timely manner or to that extent will be received at all. If a customer defaults in making its payments on an order on which our Company has supplied resources, or if an order in which our Company has invested and supplied resources is delayed, cancelled or does not proceed to completion, it could have a material adverse effect on our Company's results of operations and financial condition. Any default or failure by us to repay the loans in a timely manner, or at all could trigger repayment obligations of our guarantors in respect of such loans, which in turn, could have an impact on their ability to effectively service their obligations as Promoter of our Company, thereby having an effect on our business, results of operation and financial condition. For further information, see '*Restated Financial Information*' on page 147 of this Prospectus.

Furthermore, in the event that these individuals withdraw or terminate their guarantees, our lenders for such facilities may ask for alternate guarantees, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows.

Our competitors may have significantly greater financial, technical and marketing resources and might be generating greater revenues. Our Company cannot assure its investors that it will be able to retain its clients or attract new clients while competing successfully against such competitors. Moreover, the Company's ability to compete also depends on a number of factors beyond its control, including the ability of its competitors to attract, train, motivate and retain highly skilled technical people, the price at which the competitors offer comparable services and the extent of competitors' responsiveness to client needs. Its failure to remain competitive would have a material adverse effect on its business, financial condition and results of operations of our company on a consolidated basis, and could cause the price of the Equity Shares to decline.

In accordance with the Companies Act and the ICDR Regulations, we cannot undertake any variation in the utilization of the Net Proceeds from the Offer as disclosed in this Prospectus without obtaining the Shareholders' approval through a special resolution. Our Promoters would also be required to provide an exit opportunity to the shareholders who do not agree with our proposal to change the objects of the Offer or vary the terms of such contracts, at a price and manner as prescribed by SEBI. In the event of any such circumstances that require us to undertake variation in the disclosed utilization of the Net Proceeds, we may not be able to obtain the Shareholders' approval in a timely manner, or at all. Any delay or inability in obtaining such Shareholders' approval may adversely affect our business or operations.

In light of these factors, we may not be able to undertake variation of objects of the Offer to use any unutilized proceeds of the Offer, if any, even if such variation is in the interest of our Company. This may restrict our Company's ability to respond to any change in our business or financial condition by re-deploying the unutilized portion of Offer proceeds, if any, which may adversely affect our business and results of operations.

33. *We have in this Prospectus included certain non-GAAP financial measures and certain other industry measures related to our operations and financial performance. These non-GAAP measures and industry measures may vary from any standard methodology that is applicable across the industry in which we operate, and therefore may not be comparable with financial or industry related statistical information of similar nomenclature computed and presented by other companies.*

Certain non-GAAP financial measures and certain other industry measures relating to our operations and financial performance have been included in this Prospectus. We compute and disclose such non-GAAP financial measures and such other industry related statistical information relating to our operations and financial performance as we consider such information to be useful measures of our business and financial performance, and because such measures are frequently used by securities analysts, investors and others to evaluate the operational performance of insurance companies, many of which provide such non-GAAP financial measures and other industry related statistical and operational information. For more details, see '*Certain Conventions, Presentation of Financial, Industry and Market Data – Non-Generally Accepted Accounting Principles Financial Measures*' on page 16 of this Prospectus. Such supplemental financial and operational information is therefore of limited utility as an analytical tool, and investors are cautioned against considering such information either in isolation or as a substitute for an analysis of our audited financial statements as reported under applicable accounting standards disclosed elsewhere in this Prospectus.

These non-GAAP financial measures and such other industry related statistical and other information relating to our operations and financial performance may not be computed on the basis of any standard methodology that is applicable across the industry and therefore may not be comparable to financial measures and industry related statistical information of similar nomenclature that may be computed and presented by other companies. For further information, see '*Management's Discussion and Analysis of Financial Condition and Results of Operations – Key Performance Indicators*' on page 180 of this Prospectus.

34. *Our funding requirements and the proposed deployment of Net Proceeds have not been appraised and our Company has broad discretion over the use of the Net Proceeds and may use them in ways with which you do not agree and in ways that may not enhance our operating results or the price of our Equity Shares.*

We intend to utilize the Net Proceeds to augment our capital base to support solvency levels. Our proposed deployment of the Net Proceeds has not been appraised and it is based on management estimates. As stipulated in Regulation 41 of the ICDR Regulations, we are not required to appoint a monitoring agency for the use of the Net Proceeds and we do not intend to do so. Accordingly, the deployment of the Fresh Issue proceeds will be entirely at our discretion which is especially relevant since we have proposed broad utilization of the Net Proceeds. Our board of directors and management will therefore have broad discretion over the application of the Net Proceeds. We may spend or invest these proceeds in ways with which you disagree or that do not yield a favorable or any return. Our actual use of the Net Proceeds may differ substantially from our current plans. Failure by our management to apply these funds effectively could harm our business and financial condition and cause the market price of our Equity Shares to decline. Various risks and uncertainties, including those set forth in this section, may limit or delay our efforts to use of the Net Proceeds to achieve profitable growth in our business. Pending their use, we may invest the Net Proceeds in a manner that does not produce income or that loses value.

35. *The Promoters and members of the Promoter Group will continue jointly to retain majority control over the Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.*

Post the Issue as well, Promoter and Promoter Group will collectively own the majority of the Equity Share capital. As a result, they will continue to exercise a significant degree of influence over Company and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to Board, in accordance with the Companies Act, and its Articles of Association.

Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of the Company. In addition, Promoters will continue to have the ability to cause to take actions that are not in, or may conflict with, the interests or the interests of some or all of the creditors or other shareholders, and the Company cannot assure that such actions will not have an adverse effect on its future financial performance or the price of Equity Shares.

36. *We may not be successful in implementing our business strategies.*

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

37. *The future funds' requirements of the company, in the form of fresh issue of capital or securities and/or loans, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.*

The Company might require additional capital from time to time depending upon the requirements of the business. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase the interest burden and decrease cash flows, thus prejudicially affecting profitability and a liability to pay dividends to its shareholders.

38. *In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects / schedule of implementation of this Issue which would in turn affect our revenues and results of operations.*

The funds that we receive would be utilized for the Objects of the Issue as has been stated '*Objects of the Issue*' beginning on page 77 of this Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management's estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, we may have to revise our business and development plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and results of operations.

39. *We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.*

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

40. *There is no monitoring agency appointed by Our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by our Audit Committee.*

The issue proceeds is entirely at the discretion of the issuer/management. As per SEBI (ICDR) Regulations, appointment of monitoring agency is required only if Issue size exceeds Rs. 10,000 Lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, as per the Section 177 of the companies Act, 2013, the Audit Committee of our Company would be monitoring the utilization of the Issue Proceeds.

41. *Investors other than Retail (including non-institutional investors and Corporate Bodies) are not permitted to withdraw or lower their Application (in terms of quantity of Equity Shares or the Amount) at any stage after submitting an application.*

According to the ICDR Regulations, Investors other than retail (including non-institutional investors and Corporate Bodies) are not permitted to withdraw or lower their application (in terms of quantity of Equity Shares or the Amount) at any stage after applying. While the company is required to complete allotment according to the issue within 6 Working Days from the Issue Closing Date, events affecting the Applicants decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, business, results of operation or financial condition, may arise between the date of submission of the Application and Allotment. The company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the applicant's ability to sell the Equity Shares Allotted according to the issue or cause the trading price of the Equity Shares to decline on the listing.

42. *Currency exchange rate fluctuations may affect the value of the Equity Shares.*

The exchange rate between the Rupee and other foreign currencies, including the Hong Kong Dollar has changed substantially in recent years and may fluctuate substantially in the future. Fluctuations in the exchange rate between the foreign currencies with which an investor may have purchased Rupees may affect the value of the investment in the Company's Equity Shares. Specifically, if there is a change in relative value of the Rupee to a foreign currency, each of the following values will also be affected:

- the foreign currency equivalent of the Rupee trading price of the Company's Equity Shares in India;
- the foreign currency equivalent of the proceeds that you would receive upon the sale in India of any of the Company's Equity Shares; and
- the foreign currency equivalent of cash dividends, if any, on the Company's Equity Shares, which will be paid only in Rupees.

You may be unable to convert Rupee proceeds into a foreign currency of your choice, or the rate at which any such conversion could occur could fluctuate. In addition, the Company's market valuation could be seriously harmed by a devaluation of the Rupee if investors in jurisdictions outside India analyse its value based on the relevant foreign currency equivalent of the Company's results of operations and financial condition.

43. *Industry information included in this prospectus has been derived from industry reports. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.*

We have relied on the reports of certain independent third party for purposes of inclusion of such information in this Prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Prospectus.

External Risk Factors

Risks Relating to India

44. *Recent global economic and political conditions have been challenging and continue to affect the Indian market, which may adversely affect our business, financial condition, results of operations and prospects.*

In the event of adverse macroeconomic conditions in India or globally, which may be characterized by higher unemployment, lower household income, lower corporate earnings, lower business investment, higher inflation and lower consumer spending, the demand for insurance products could be adversely affected. Our policyholders may opt to defer or discontinue paying insurance premiums or choose to forgo or not renew their insurance coverage. We may also experience an increase in incidence of claims and non-renewal of policies. The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investors' reactions to developments in one country may have adverse effects on the market price of securities of companies located in other countries, including India. For instance, the economic downturn in the U.S. and several European countries during a part of Fiscal 2008 and 2009 adversely affected market prices in the global securities markets, including India. Negative economic developments, such as rising fiscal or trade deficits, or a default on national debt, in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general. Concerns related to a trade war between large economies may lead to increased risk aversion and volatility in global capital markets and consequently have an impact on the Indian economy. Any worldwide financial instability could also have a negative impact on the Indian economy, including the movement of exchange rates and interest rates in India and could then adversely affect our business, financial performance and the price of our Equity Shares. However, the overall long-term effect of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have the intended stabilizing effects. Demand for our products may be adversely affected by an economic downturn in domestic, regional and global economies. Economic growth in the countries in which we operate is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates and outbreak of an infectious disease, such as the COVID-19 pandemic.

Any other global economic developments or the perception that any of them could occur may continue to have an adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global market liquidity and restrict the ability of key market participants to operate in certain financial markets. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our equity shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

45. *Changing laws, rules or regulations and legal uncertainties including taxation laws, or their interpretation, such changes may significantly affect our financial statements.*

The regulatory environment in which we operate is evolving and is subject to change. The GoI may implement new laws or other regulations that could affect the component industry, which could lead to new compliance requirements. New compliance requirements could increase our costs or otherwise adversely affect our business, financial condition and results of operations. Further, the manner in which new requirements will be enforced or interpreted can lead to uncertainty in our operations and could adversely affect our operations. For further information on the laws applicable to us, see '**Key Regulations and Policies**' on page 116 of this Prospectus.

The Income Tax Act, 1961 was amended to provide domestic companies an option to pay corporate income tax at the effective rate of approximately 25.17% (inclusive of applicable surcharge and health and education cess), as compared to effective rate of 34.94% (inclusive of applicable surcharge and health and education cess), provided such companies do not claim certain specified deductions or exemptions. Further, where a company has opted to pay the reduced corporate tax rate, the minimum alternate tax provisions would not be applicable. Any such future amendments may affect our ability to claim exemptions that we have historically benefited from, and such exemptions may no longer be available to us. Any adverse order passed by the appellate authorities/ tribunals/ courts would have an effect on our profitability. Due to the COVID -19 pandemic, the Government of India had also passed the Taxation and Other Laws (Relaxation of Certain Provisions) Act, 2020, implementing relaxations from certain requirements under, amongst others, the Central Goods and Services Tax Act, 2017 and Customs Tariff Act, 1975.

Further, as GST is implemented, there can be no assurance that we will not be required to comply with additional procedures or obtain additional approvals and licenses from the government and other regulatory bodies or that they will

not impose onerous requirements and conditions on our operations. With the implementation of GST, we are obligated to pass on any benefits accruing to us as result of the transition to GST to the consumer thereby limiting our benefits. In order for us to utilise input credit under GST, the entire value chain has to be GST compliant, including us. While we are and will continue to adhere to the GST rules and regulations, there can be no assurance that our suppliers and dealers will do so. Any such failure may result in increased cost on account of non-compliance with the GST and may adversely affect our business and results of operations.

Earlier, distribution of dividends by a domestic company was subject to Dividend Distribution Tax ('DDT'), in the hands of the company at an effective rate of 20.56% (inclusive of applicable surcharge and health and education cess). Such dividends were generally exempt from tax in the hands of the shareholders. However, the Government of India has amended the IT Act to abolish the DDT regime. Accordingly, any dividend distributed by a domestic company is subject to tax in the hands of the investor at the applicable rate. Additionally, the Company is required to withhold tax on such dividends distributed at the applicable rate.

Further, the Government of India has notified the Finance Act, 2022 ('Finance Act'), which has introduced various amendments to the IT Act. As such, there is no certainty on the impact that the Finance Act may have on our business and operations or on the industry in which we operate. In addition, unfavorable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations including foreign investment laws governing our business, operations, and group structure could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals. We may incur increased costs relating to compliance with such new requirements, which may also require management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent, may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future. For instance, the Supreme Court of India has in a decision clarified the components of basic wages which need to be considered by companies while making provident fund payments, which resulted in an increase in the provident fund payments to be made by companies. Any such decisions in future or any further changes in interpretation of laws may have an impact on our results of operations.

Changes in other laws may impose additional requirements, resulting in additional expenditure and time cost. For instance, the GoI has announced four labour codes which are yet to come into force as on the date of this Prospectus, namely, (i) the Code on Wages, 2019, (ii) the Industrial Relations Code, 2020; (iii) the Code on Social Security, 2020; and (iv) the Occupational Safety, Health and Working Conditions Code, 2020. Such codes will replace the existing legal framework governing rights of workers and labour relations. While the rules for implementation under these codes have not been announced, we are unable to determine the impact of all or some such laws on our business and operations which may restrict our ability to grow our business in the future. For example, the Social Security Code aims to provide uniformity in providing social security benefits to employees which were previously segregated under different acts and had different applicability and coverage. The Social Security Code has introduced the concept of workers outside traditional employer-employee work-arrangements, such as 'gig workers' and 'platform workers' and provides for the mandatory registration of such workers in order to enable these workers to avail themselves of various employment benefits, such as life and disability cover, health and maternity benefits and old age protection, under schemes framed under the Social Security Code from time to time. Any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

46. *Financial instability in other countries may cause increased volatility in Indian financial markets.*

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe and certain emerging economies in Asia. Financial turmoil in Asia, United States, United Kingdom, Russia and elsewhere in the world in recent years has adversely affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby negatively affect the Indian economy. Financial disruptions could materially and adversely affect our business, prospects, financial condition, results of operations and cash flows. Further, economic developments globally can have a significant impact on our principal markets.

In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term effect of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have the intended stabilizing effects. Any significant financial disruption could have a material adverse effect on our business, financial condition and results of operation. These developments, or the perception that any of them could occur, have had and may continue to have a material adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global market liquidity, restrict the ability of key market participants to operate in certain financial markets or restrict our access to capital. This could have a material adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares.

47. *Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which investors may be more familiar with and may consider material to their assessment of our financial condition.*

Our Restated Financial Information for Fiscal 2022, 2023 and 2024, and the three-months ended June 30, 2024, have been prepared and presented in conformity with IndAS. No attempt has been made to reconcile any of the information given in this Prospectus to U.S. GAAP, IFRS or any other principles or to base it on any other standard. Indian GAAP differs in certain significant respects from IFRS, U.S. GAAP and other accounting principles with which prospective investors may be familiar in other countries. If our financial statements were to be prepared in accordance with such other accounting principles, our results of operations, cash flows and financial position may be substantially different. Prospective investors should review the accounting policies applied in the preparation of our financial statements and consult their own professional advisers for an understanding of the differences between these accounting principles and those with which they may be more familiar. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Prospectus should be limited accordingly.

Risks relating to the Equity Shares and this Offer

48. *Substantially all of our business and operations are located in India, where we are subject to regulatory, economic, social and political uncertainties.*

We are incorporated in and our operations are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. Substantially all of our business, employees and investments are located in India, and we intend to continue to develop and expand our business in India. Consequently, our financial performance, the performance of our investments and the market price of our Equity Shares will be affected by changes in exchange rates and controls, interest rates, volatility in and actual or perceived trends in trading activity on India's principal stock exchanges, prevailing economic conditions, inflation, changes in government policies, including taxation policies and foreign investment policies, social and civil unrest and other political, social and economic developments in or affecting India.

While the Indian economy has experienced significant growth over the past decades, growth has been uneven, both geographically and among various sectors of the economy.

The Government of India has exercised and continues to exercise significant influence over many aspects of the Indian economy. Specific laws and policies affecting insurance companies, e-commerce, data, foreign investments, currency exchange rates and other matters affecting investments in India could change as well or be subject to unfavorable changes or interpretations or uncertainty.

Other factors that may adversely affect the Indian economy, and hence our results of operations and cash flows, may include:

- any scarcity of credit or other financing in India, resulting in an adverse effect on economic conditions in India and scarcity of financing for our expansions;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- occurrence of natural or man-made disasters;
- prevailing regional or global economic conditions, including in India's principal export markets;
- other significant regulatory or economic developments in or affecting India or its consumption sector;

- international business practices that may conflict with other customs or legal requirements to which we are subject, including anti-bribery and anti-corruption laws;
- protectionist and other adverse public policies, including local content requirements, import/export tariffs, increased regulations or capital investment requirements; and
- subject to the jurisdiction of foreign courts, including uncertainty of judicial processes and difficulty enforcing contractual agreements or judgments in foreign legal systems or incurring additional costs to do so.

Any further slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely affect our business, results of operations, cash flows and financial condition and the price of the Equity Shares.

49. *Investors may not be able to enforce a judgment of a foreign court against us, our Directors, the Lead Manager or any of their directors and executive officers in India respectively, except by way of a law suit in India.*

Our Company is a company incorporated under the laws of India and all of our Directors are located and/or resident in India. All of our assets, our Key Managerial Personnel and officers are also located in India. As a result, it may not be possible for investors to effect service of process upon our Company or such persons in jurisdictions outside India, or to enforce judgments obtained against such parties outside India. Furthermore, it is unlikely that an Indian court would enforce foreign judgments if that court was of the view that the amount of damages awarded was excessive or inconsistent with public policy, or if judgments are in breach or contrary to Indian law.

Recognition and enforcement of foreign judgments is provided for under Sections 13, 14, and Section 44A of the Code of Civil Procedure, 1908. India is not party to any international treaty in relation to the recognition or enforcement of foreign judgments. India has reciprocal recognition and enforcement of judgments in civil and commercial matters with only a limited number of jurisdictions, such as the United Kingdom, United Arab Emirates, Singapore and Hong Kong. In order to be enforceable, a judgment from a jurisdiction with reciprocity must meet certain requirements established in the Indian Code of Civil Procedure, 1908. The Code of Civil Procedure, 1908, only permits the enforcement and execution of monetary decrees in the reciprocating jurisdiction, not being in the nature of any amounts payable in respect of taxes, other charges, fines or penalties and does not apply to arbitration awards (even if such awards are enforceable as a decree or judgment). Judgments or decrees from jurisdictions which do not have reciprocal recognition with India, including the United States, cannot be enforced by proceedings in execution in India. Therefore, a final judgment for the payment of money rendered by any court in a non-reciprocating territory for civil liability, whether or not predicated solely upon the general laws of the non-reciprocating territory, would not be directly enforceable in India. The party in whose favor a final foreign judgment in a non-reciprocating territory is rendered may bring a fresh suit in a competent court in India based on the final judgment within three years of obtaining such final judgment in the same manner as any other suit filed to enforce a civil liability in India.

However, it is unlikely that a court in India would award damages on the same basis as a foreign court if an action were brought in India or that an Indian court would enforce foreign judgments if it viewed the amount of damages as excessive or inconsistent with the public policy in India. Further, there is no assurance that a suit brought in an Indian court in relation to a foreign judgment will be disposed of in a timely manner. In addition, any person seeking to enforce a foreign judgment in India is required to obtain the prior approval of the RBI to repatriate any amount recovered, and we cannot assure that such approval will be forthcoming within a reasonable period of time, or at all, or that conditions of such approval would be acceptable. Such amount may also be subject to income tax in accordance with applicable law.

50. *The trading volume and market price of the Equity Shares may be volatile following the Issue.*

The market price of the Equity Shares may fluctuate as a result of, among other things, the following factors, some of which are beyond our control:

- quarterly variations in our results of operations;
- results of operations that vary from the expectations of securities analysts and investors;
- results of operations that vary from those of our competitors;
- changes in expectations as to our future financial performance, including financial estimates by research analysts and investors;

- announcements by us or our competitors of significant acquisitions, strategic alliances, joint operations or capital commitments;
- announcements by third parties or governmental entities of significant claims or proceedings against us;
- new laws and governmental regulations applicable to our industry;
- additions or departures of key management personnel;
- changes in exchange rates;
- fluctuations in stock market prices and volume;
- general economic and stock market conditions; and
- Changes in relation to any of the factors listed above could adversely affect the price of the Equity Shares.

51. *Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may have an adverse effect on the value of our Equity Shares, independent of our operating results.*

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchange. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time taken for such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating the proceeds from a sale of Equity Shares outside India, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by Shareholders. For example, the exchange rate between the Indian Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may have an adverse effect on the returns on our Equity Shares, independent of our operating results.

52. *Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. A securities transaction tax ('STT') is levied on and collected by an Indian stock exchange on which equity shares are sold. Any gain realized on the sale of listed equity shares held for more than 12 months immediately preceding the date of transfer may be subject to long-term capital gains tax in India at the specified rates depending on certain factors, such as STT paid, the quantum of gains and any available treaty exemptions. Accordingly, investors may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months immediately preceding the date of transfer. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realized on the sale of our Equity Shares held for a period of 12 months or less immediately preceding the date of transfer will also be subject to short-term capital gains tax in India. While non-residents may claim tax treaty benefits in relation to such capital gains income, generally, Indian tax treaties do not limit India's right to impose a tax on capital gains arising from the sale of shares of an Indian company.

No dividend distribution tax is required to be paid in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020 and, accordingly, such dividends would not be exempt in the hands of the Shareholders, both for residents as well as non-residents. Our Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident Shareholder for the purposes of deducting tax at source pursuant to any corporate action, including dividends.

Similarly, any business income realised from the transfer of equity shares held as trading assets is taxable at the applicable tax rates subject to any treaty relief, if applicable, to a non-resident seller. Additionally, in terms of the Finance Act, 2018, which has been notified on March 29, 2018 with effect from April 1, 2018, taxes payable by an assessee on the capital gains arising from transfer of long-term capital assets (introduced as Section 112A of the Income-Tax Act, 1961) shall be calculated on such long-term capital gains at the rate of 10%, where the long-term capital gains exceed Rs1 Lakh, subject to certain exceptions in case of resident individuals and Hindu Undivided Families.

The Indian Stamp Act, 1899 was amended to provide that the sale, transfer and issue of certain securities through exchanges, depositories, or otherwise shall be charged with stamp duty. In the absence of a specific provision under an agreement, the liability to pay stamp duty in case of sale of certain securities through stock exchanges is on the buyer, while in other cases of transfer for consideration through a depository, the onus is on the transferor. The stamp duty for

transfer of certain securities, other than debentures, on a delivery basis is currently specified at 0.015% and on a non-delivery basis is specified at 0.003% of the consideration amount.

The Government of India announced the union budget for Fiscal 2023, following which the Finance Bill, 2022 ('**Finance Bill**') was introduced in the Lok Sabha on February 1, 2022. Subsequently, the Finance Bill received the assent from the President of India on March 30, 2022, and became the Finance Act, 2022 ('**Finance Act**'). There is no certainty on the impact of Finance Act on tax laws or other regulations, which may adversely affect the Company's business, financial condition, results of operations or on the industry in which we operate. Investors are advised to consult their own tax advisors and to carefully consider the potential tax consequences of owning Equity Shares.

53. *There is no guarantee that our Equity Shares will be listed on the stock exchanges in a timely manner or at all.*

The Equity Shares will be listed on the Stock Exchange. Pursuant to applicable Indian laws, certain actions must be completed before the Equity Shares can be listed and trading in the Equity Shares may commence. Investors' book entry, or 'demat' accounts with depository participants in India, are expected to be credited within one working day of the date on which the Basis of Allotment is approved by the Stock Exchange. The Allotment of Equity Shares in the Issue and the credit of such Equity Shares to the applicant's demat account with depository participant could take approximately 5 Working Days from the Issue Closing Date and trading in the Equity Shares upon receipt of final listing and trading approvals from the Stock Exchange is expected to commence within 6 Working Days of the Issue Closing Date. There could be a failure or delay in listing of the Equity Shares on the Stock Exchange. Any failure or delay in obtaining the approval or otherwise commence trading in the Equity Shares would restrict investors' ability to dispose of their Equity Shares. There can be no assurance that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this risk factor. We could also be required to pay interest at the applicable rates if allotment is not made, refund orders are not dispatched or demat credits are not made to investors within the prescribed time periods.

54. *The Equity Shares have never been publicly traded and the Issue may not result in an active or liquid market for the Equity Shares.*

Prior to the Offer, there has been no public market for the Equity Shares, and an active trading market on the Indian Stock Exchanges may not develop or be sustained after the Offer. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. Further, the price of the Equity Shares may be volatile, and the investors may be unable to resell the Equity Shares at or above the Issue Price, or at all. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results, market conditions specific to the industry we operate in, developments relating to India and volatility in the Stock Exchange and securities markets elsewhere in the world.

55. *Investors will not be able to sell immediately on an Indian stock exchange any of the Equity Shares they purchase in the Issue.*

The Equity Shares will be listed on the Stock Exchange. Pursuant to applicable Indian laws, certain actions must be completed before the Equity Shares can be listed and trading in the Equity Shares may commence. Investors' book entry, or 'demat' accounts with depository participants in India, are expected to be credited within 1 working day of the date on which the Basis of Allotment is approved by the Stock Exchange. The Allotment of Equity Shares in the Offer and the credit of such Equity Shares to the applicant's demat account with depository participant could take approximately 5 Working Days from the Issue Closing Date and trading in the Equity Shares upon receipt of final listing and trading approvals from the Stock Exchange is expected to commence within 6 Working Days of the Issue Closing Date. There could be a failure or delay in listing of the Equity Shares on the Stock Exchanges. Any failure or delay in obtaining the approval or otherwise commence trading in the Equity Shares would restrict investors' ability to dispose of their Equity Shares. There can be no assurance that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this risk factor. We could also be required to pay interest at the applicable rates if allotment is not made, refund orders are not dispatched or demat credits are not made to investors within the prescribed time periods.

56. *Any downgrading of India's sovereign debt rating by an international rating agency could have a negative impact on our business and results of operations.*

Any adverse revisions to India's credit ratings by international rating agencies may adversely affect our ratings, our ability to raise additional financing and the interest rates and other commercial terms at which such financing is available, including raising any overseas additional financing. A downgrading of India's credit ratings may occur, for example, upon a change of government tax or fiscal policy, which are outside our control. This could have an adverse effect on our ability

to fund our growth on favorable terms or at all, and consequently adversely affect our business, cash flows and financial performance and the price of the Equity Shares.

57. ***Any future issuance of Equity Shares, or convertible securities or other equity linked instruments by us may dilute your shareholding and sale of Equity Shares by shareholders with significant shareholding may adversely affect the trading price of the Equity Shares.***

We may be required to finance our growth through future equity offerings. Any future equity issuances by us, including a primary offering of Equity Shares, convertible securities or securities linked to Equity Shares including through exercise of employee stock options, may lead to the dilution of investors' shareholdings in our Company. Any future equity issuances by us, including to comply with minimum public shareholding norms applicable to listed companies in India or sales of our Equity Shares by our shareholders may adversely affect the trading price of the Equity Shares, which may lead to other adverse consequences including difficulty in raising capital through offering of our Equity Shares or incurring additional debt. In addition, any perception by investors that such issuances or sales might occur may also affect the market price of our Equity Shares. Additionally, the disposal, pledge or encumbrance of the Equity Shares (in accordance with applicable law including procuring regulatory approvals, as required) by any of our significant shareholders, or the perception that such transactions may occur, may affect the trading price of the Equity Shares. There can be no assurance that we will not issue Equity Shares, convertible securities or securities linked to Equity Shares or that our Shareholders will not dispose of, pledge or encumber their Equity Shares (in accordance with applicable law including procuring regulatory approvals, as required) in the future.

58. ***Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares.***

Under foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain restrictions), if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then a prior regulatory approval will be required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities. Further, this conversion is subject to the shares being held on a repatriation basis and, either the security having been sold in compliance with the pricing guidelines or relevant regulatory approval having been obtained for sale of shares and the corresponding remittance of sale proceeds.

In addition, pursuant to the Press Note No. 3 (2020 Series), dated April 17, 2020, issued by the DPIIT, which has been incorporated as the proviso to Rule 6(a) of the FEMA Non-debt Rules, all investments under the foreign direct investment route by entities of a country which shares land border with India or where the beneficial owner of the Equity Shares is situated in or is a citizen of any such country, can only be made through the Government approval route, as prescribed in the Consolidated FDI Policy dated October 15, 2020 and the FEMA Rules. These investment restrictions shall also apply to subscribers of offshore derivative instruments. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/purview, such subsequent change in the beneficial ownership will also require approval of the Government of India.

For further information, see '***Restrictions on Foreign Ownership of Indian Securities***' on page 280 of this Prospectus.

59. ***The determination of the Issue Price is based on various factors and assumptions and the Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Offer.***

The determination of the Issue Price is based on various factors and assumptions and will be determined by our Company in consultation with the Lead Manager. These will be based on numerous factors, including factors as described under '***Basis for the Issue price***' on page 84 of this Prospectus and may not be indicative of the market price for the Equity Shares after the Issue. The factors that could affect the market price of the Equity Shares include, among others, broad market trends, financial performance and results of our Company post-listing, and other factors beyond our control. We cannot assure investors that an active market will develop, or sustained trading will take place in the Equity Shares or provide any assurance regarding the price at which the Equity Shares will be traded after listing.

60. ***Holders of Equity Shares may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby may suffer future dilution of their ownership position.***

Under the Companies Act, a company having share capital and incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of equity shares to maintain their existing ownership

percentages before the issuance of any new equity shares, unless the pre-emptive rights have been waived by adoption of a special resolution. However, if the laws of the jurisdiction the investors are located in does not permit them to exercise their pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such jurisdiction, the investors will be unable to exercise their pre-emptive rights unless we make such a filing. If we elect not to file a registration statement, the new securities may be issued to a custodian, who may sell the securities for the investor's benefit. The value the custodian receives on the sale of such securities and the related transaction costs cannot be predicted. In addition, to the extent that the investors are unable to exercise pre-emption rights granted in respect of the Equity Shares held by them, their proportional interest in us would be reduced.

61. *A third-party could be prevented from acquiring control of us post this Offer, because of anti-takeover provisions under Indian law.*

As a listed Indian entity, there are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company. Under the Takeover Regulations, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company subsequent to completion of the Offer. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to our shareholders, such a takeover may not be attempted or consummated because of Takeover Regulations.

62. *Rights of shareholders of companies under Indian law may be more limited than under the laws of other jurisdictions.*

Our Articles of Association, composition of our Board, Indian laws governing our corporate affairs, the validity of corporate procedures, directors' fiduciary duties, responsibilities and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights under Indian law may not be as extensive and widespread as shareholders' rights under the laws of other countries or jurisdictions. Investors may face challenges in asserting their rights as shareholder of our Company than as a shareholder of an entity in another jurisdiction.

Global Economic Overview

Introduction

Global activity is forecast to expand 4 percent in 2021, below previous expectations amid a sharp resurgence of new COVID-19 cases. Global growth is expected to strengthen over the forecast horizon as pandemic-related disruptions fade and as vaccination continues. In emerging market and developing economies (EMDEs), the recovery will be uneven, with a strong rebound in China and softer-than-expected growth across most other economies as the pandemic's lingering effects continue to weigh on consumption and investment. The recovery could be even weaker than envisioned if downside risks materialize, which could exacerbate the losses in per capita income and increase in poverty. Policy makers can raise the likelihood of better outcomes while warding off worse ones through effective pandemic control and structural reforms that boost both productivity and environmental sustainability.

Global activity: Slower-than-expected recovery amid sharp resurgence of virus. Following a collapse last year caused by the COVID-19 pandemic, global activity is forecast to expand 4 percent in 2021. The global recovery, however, has been dampened in the near term by a resurgence of new COVID-19 cases, and the majority of country forecasts have been downgraded in the last six months. Global economic activity is expected to firm over the forecast horizon as confidence, consumption, and trade gradually improve, supported by ongoing vaccination. The materialization of a number of downside risks—including a worsening of the virus, delays in vaccine procurement and distribution, and financial stress amid high debt levels—could derail the projected global recovery. Even if the recovery proceeds as envisioned in the baseline scenario, global output is expected to remain 4.4 percent below pre-pandemic projections by 2022.

EMDE growth: Uneven near-term recovery, subdued outlook. Although aggregate EMDE growth is envisioned to firm to 5 percent in 2021 and to moderate to 4.2 percent in 2022, the improvement largely reflects China's expected rebound. Absent China, the recovery across EMDEs is anticipated to be far more muted, averaging 3.5 percent in 2021-22, as the pandemic's lingering effects continue to weigh on consumption and investment. The pandemic has also caused per capita incomes to fall in more than 90 percent of EMDEs, tipping millions back into poverty. For more than a quarter of EMDEs, the pandemic is expected to erase at least 10 years of per capita income gains—and, in about two-thirds of EMDEs, per capita incomes are projected to be lower in 2022 than they were in 2019. The pandemic has impeded future prospects for poverty reduction by adversely affecting longer-term productivity growth—the deterioration in confidence has dampened investment, and the loss in learning-adjusted school years and prolonged spells of unemployment have eroded earlier gains in human capital.

Indian Economy Overview

Introduction

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP or GDP at Current Prices in the year 2023-24 is estimated at Rs. 293.90 lakh crores (US\$ 3.52 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 269.50 lakh crores (US\$ 3.23 trillion). The growth in nominal GDP during 2023-24 is estimated at 9.1% as compared to 14.2% in 2022-23. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the first half of FY24. During the period January-March 2024, India's exports stood at US\$ 119.10 billion, with Engineering Goods (25.01%), Petroleum Products (17.88%) and Organic and Inorganic Chemicals (7.65%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable because of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

Market size

Real GDP or GDP at Constant (2011-12) Prices in the year 2023-24 is estimated at Rs. 172.90 lakh crores (US\$ 2.07 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 160.71 lakh crores (US\$ 1.92 trillion). The growth in real GDP during 2023-24 is estimated at 7.6% as compared to 7.0% in 2022-23. There are 113 unicorn startups in India, with a combined valuation of over US\$ 350 billion. As many as 14 tech startups are expected to list in 2024 Fintech sector poised to generate the largest number of future unicorns in India. With India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Pancharjit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time period. India's current account deficit (CAD) narrowed to 1.2% of GDP in the October-December quarter. The CAD stood at US\$ 10.5 billion for the third quarter of 2023-24 compared to US\$ 11.4 billion or 1.3% of GDP in the preceding quarter. This was largely due to higher service exports.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. Road Ahead

In the second quarter of FY24, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2023. India's comparatively strong position in the external sector reflects the country's positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in 2023-24, stood 37.4% higher than the same period last year. In the budget of 2023-24, capital expenditure took lead by steeply increasing the capital expenditure outlay by 37.4 % in BE 2023-24 to Rs.10 lakh crore (US\$ 120.12 billion) over Rs. 7.28 lakh crore (US\$ 87.45 billion) in RE 2022-23. The ratio of revenue expenditure to capital outlay increased by 1.2% in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels. In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at Rs. 47,65,768 crores (US\$ 571.64 billion) of which total capital expenditure is Rs. 11,11,111 crores (US\$ 133.27 billion).

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

Note: Conversion rate used for June 2024 is Rs.1 = US\$ 0.012

Overview of Chemical Industry in India

Introduction

Covering more than 80,000 commercial products, India's chemical industry is extremely diversified and can be broadly classified into bulk chemicals, specialty chemicals, agrochemicals, petrochemicals, polymers, and fertilisers. India is the 6th largest producer of chemicals in the world and 3rd in Asia, contributing 7% to India's GDP. India's chemical sector, which was estimated to be worth US\$ 220 billion in 2022, is anticipated to grow to US\$ 300 billion by 2025 and US\$ 1 trillion by 2040.

Globally, India is the fourth-largest producer of agrochemicals after the United States, Japan and China. India accounts for 16-18% of the world's production of dyestuffs and dye intermediates. India's agrochemicals export was estimated to be at US\$ 3.12 billion from April 2023 to December 2023. Indian colourants industry has emerged as a key player with a global market share of ~15%. The country's chemicals industry is de-licensed, except for a few hazardous chemicals. India has traditionally been a world leader in generics and biosimilars and a major Indian vaccine manufacturer, contributing more than 50% of the global vaccine supply. India holds a strong position in exports and imports of chemicals at a global level and ranks 14th in exports and 8th in imports at the global level (excluding pharmaceuticals). From April 2023 to December 2023, India's dye exports (Dyes and Dye Intermediates) totalled US\$ 1.69 billion.

India's proximity to the Middle East, the world's source of petrochemicals feedstock, enables it to benefit on economies of scale.

Market Size

India's chemical sector, which was estimated to be worth US\$ 220 billion in 2022, is anticipated to grow to US\$ 300 billion by 2025 and US\$ 1 trillion by 2040. The demand for chemicals is expected to expand by 9% per annum by 2025. The chemical industry is expected to contribute US\$ 383 billion to India's GDP by 2030.

India has traditionally been a world leader in generics and biosimilars and major Indian vaccine manufacturers, contributing more than 50% of the global vaccine supply. Chemicals and petrochemicals demand in India is expected to nearly triple and reach US\$ 1 trillion by 2040.

An investment of Rs. 8 lakh crore (US\$ 107.38 billion) is estimated in the Indian chemicals and petrochemicals sector by 2025. Specialty chemicals account for 20% of the global chemicals industry's US\$ 4 trillion, with India's market expected to increase at a CAGR of 12% to US\$ 64 billion by 2025. This gain would be driven by a healthy demand growth (CAGR of 10-20%) in the export/end-user industries.

The Department of Chemicals & Petrochemicals intends to bring PLI in the chemical & petrochemical sector and will redraft the Petroleum, Chemicals and Petrochemicals Investment Region (PCPIR) guidelines. The Indian chemical industry is expected to further grow with a CAGR of 11-12% by 2027, increasing India's share in the global specialty chemicals market to 4% from 3%. Additional support, in terms of fiscal incentives, such as tax breaks and special incentives through PCPIRs or SEZs to encourage downstream units will enhance production and development of the industry. The dedicated integrated manufacturing hubs under the Petroleum, Chemicals and Petrochemicals Investment Regions (PCPIR) policy to attract an investment of Rs. 20 lakh crore (US\$ 276.46 billion) by 2035.

To bring about structural changes in the working of the domestic chemical industry, future investments should not only focus on the transportation of fuels such as petrol and diesel but also on crude-to-chemicals complexes or refineries set up to cater to the production of chemicals.

- **Lack of knowledge of Employees:** A notable weakness is the lack of industry-specific knowledge and expertise among employees in the chemical industry. This gap can lead to inefficiencies in operations, lower productivity, and an increased risk of errors in handling complex processes or regulatory requirements.
- **Family Business:** A potential weakness of operating as a family business is the risk of limited professional management experience and potential challenges in decision-making processes. Family dynamics can sometimes lead to conflicts of interest or difficulties in separating personal relationships from business decisions, which may affect overall governance and strategic planning. Additionally, succession planning and leadership transitions can pose risks if not managed carefully, potentially impacting the long-term stability and growth of the company. Addressing these issues requires implementing clear policies and practices to ensure professional management and effective governance.
- **Heavy dependence on the suppliers:** A significant weakness is the heavy dependence on suppliers within the chemical industry. Relying extensively on a limited number of suppliers for key raw materials can expose the company to supply chain disruptions, price volatility, and potential shortages. This dependency may also limit negotiating power and affect overall cost efficiency. To mitigate this risk, it is essential to develop a diversified supplier base and establish contingency plans to ensure a stable and resilient supply chain.

Opportunity

- **Develop new composition of Products:** An important opportunity in the chemical industry is the development of new product compositions. By investing in research and development to create innovative formulations, the company can address emerging market needs and differentiate itself from competitors. This strategic focus on product innovation can open up new market segments, enhance the company's competitive edge, and drive revenue growth.
- **Operational efficiency:** An opportunity in the chemical industry lies in enhancing operational efficiency. By adopting advanced technologies and streamlining supply chain management, the company can reduce costs, improve productivity, and minimize waste. Implementing efficient practices not only boosts overall performance but also supports sustainability goals and enhances profitability.

Threats

- **Tough competition:** Intense competition in the chemical industry presents a significant threat. With numerous players vying for market share, companies must navigate pricing pressures, innovation demands, and the constant need for differentiation. This competitive landscape can impact profit margins and require continuous investment in research and development to stay ahead. Additionally, aggressive competition may lead to rapid changes in market dynamics, making it challenging to maintain a stable position and secure long-term growth. Strategically addressing these challenges is crucial for sustaining a competitive edge.
- **Low margin business:** A threat in the chemical industry is the low-margin nature of the business. The highly competitive market often leads to price pressure, reducing profit margins and making it challenging to achieve sustainable profitability. Companies must navigate tight financial constraints while managing production costs and operational efficiencies. This environment can impact overall financial stability and limit the ability to invest in growth initiatives or innovations. Addressing this threat requires careful cost management, strategic pricing, and continual efforts to enhance operational efficiency.

(B) Basis of Preparation of Financial Statement

The Restated Statement of Assets and Liabilities of the Company as on June 30, 2024, March 31, 2024, March 31, 2023 and March 31, 2022, and the Restated Statement of Profit and Loss and Restated Statements of Cash Flows for the financial year / period ended on June 30, 2024, March 31, 2024, March 31, 2023 and March 31, 2022 and the annexure thereto (collectively, the “Restated Financial Statements”) have been compiled by the management from the Financial Statements of the Company for the financial year / period ended on June 30, 2024, March 31, 2024, March 31, 2023 and March 31, 2022.

These financial statements are prepared in accordance with Indian Generally Accepted Accounting Principles (GAAP) under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values. GAAP comprises mandatory accounting standards as prescribed under Section 133 of the Companies Act, 2013 (‘Act’) read with Rule 7 of the Companies (Accounts) Rules, 2014. Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

(C) Significant Accounting Policies

1) Use of Estimates:

The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported balances of assets and liabilities and disclosures relating to contingent liabilities as at the date of the financial statements and reported amounts of income and expenses during the period. Examples of such estimates include computation of percentage of completion which requires the Company to estimate the efforts or costs expended to date as a proportion of the total efforts or costs to be expended, provisions for doubtful debts, future obligations under employee retirement benefit plans, income taxes, post-sales customer support and the use-full lives of fixed tangible assets and intangible assets. Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made as the Management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the financial statements.

2) Fixed Assets & Depreciation:

Tangible Assets:

All items of fixed assets are stated at historical cost less accumulated depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items. Subsequent costs are included in the asset’s carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance expenses are charged to profit or loss during the reporting period in which they are incurred

Depreciation on fixed assets is provided on pro rata basis as per Written Down Value Method, as specified in Schedule II of the Companies Act, 2013.

Assets Acquired as Lease:

Leases under which the Entity assumes substantially all the risks and rewards of ownership are classified as finance leases. Such assets are capitalized at fair value of the asset or present value of the minimum lease payments at the inception of the lease, whichever is lower. Lease payments under operating leases are recognized as an expense in the Profit and Loss Account on a straight-line basis over the lease term.

The cost of leasehold land is amortized over the period of the lease. Leasehold improvements and assets acquired on finance lease are amortized over the lease term or useful life, whichever is lower.

Advances paid towards the acquisition of Property, Plant and Equipment

Advances paid towards the acquisition of Property, Plant and Equipment, outstanding at each balance sheet date are shown under capital advances. The cost of the Property, Plant and Equipment not ready for its intended use on such date, is disclosed under capital work-in- progress.

3) Impairment of Assets:

An asset is treated as impaired when the carrying cost of assets exceeds its recoverable value. Impairment loss is charged to the Statement of Profit and Loss in the year / period in which an asset is identified as impaired. The impairment loss recognized in prior accounting period is reversed if there has been a change in the estimate of recoverable amount.

4) Investments:

Investments, which are readily realizable and intended to be held for not more than 12 months from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments. On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties. Current investments are carried in the financial statements at lower of cost and fair value determined on an individual investment basis. Long-term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of the investments

5) Inventories: The inventories are valued on the following basis:

- a) Raw Materials: Valued at Cost Price or Net Realizable Value whichever is lower.
- b) Finished goods and traded goods: Valued at lower of Cost or Net Realizable Value.

6) Employee Benefits:

All short-term employee benefits are accounted on undiscounted basis during the accounting period based on services rendered by employees.

7) Revenue Recognition:

Revenue is recognised to the extent, that it is probable that the economic benefits will flow to the company and the revenue can be reliably measured.

Revenue from sale of goods

Revenue from sale of goods is recognised when the significant risks and rewards of ownership of the goods are transferred to the buyer and are recorded net of trade discounts, rebates, Goods and Service Tax.

Interest Income

Interest Income is recognised on a time proportion basis taking into account the amount outstanding and applicable interest rate.

Dividend Income

Dividend is recognised when the company's right to receive dividend is established.

8) Foreign Currency Transaction:

Monetary assets and liabilities related to foreign currency transactions remaining unsettled at the end of the year / period are translated at year / period end rates.

The difference in translation of monetary assets and liabilities and realized gains and losses on foreign transactions are recognized in the Statement of Profit and Loss.

The premium or discount on forward exchange contracts is recognized in the statement of profit and loss over the period of the contract.

9) Taxation

Tax expenses comprise current tax (amount of tax for the period determined in accordance with the Income Tax Regulations in India) and deferred tax charge or credit (reflecting the tax effects of timing differences between accounting income and taxable income for the period).

The deferred tax charge or credit and the corresponding deferred tax liabilities or assets are recognised using the tax rates that have been enacted or substantively enacted by the Balance Sheet date, Deferred tax assets are recognised only to the extent there is reasonable certainty that the assets can be realized in future; however, when there is unabsorbed depreciation or carry forward losses under taxation laws, deferred tax assets are recognised only if there is a virtual certainty of realization of such assets. Deferred tax assets are reviewed at each Balance Sheet date and written down or written up to reflect the amount that is reasonably / virtually certain, as the case may be, to be realized

Tax credit is recognised in respect of Minimum Alternate Tax (MAT) as per the provisions of Section 115JAA of the Income Tax Act, 1961 based on convincing evidence that the Company will pay normal income tax within the statutory time frame and is reviewed at each Balance Sheet date.

10) Borrowing Cost:

Borrowing Costs relating to the acquisition/construction of qualifying assets are capitalized until the time all substantial activities necessary to prepare the qualifying assets for their intended use are complete. A qualifying asset is one that necessarily takes substantial period of time to get ready for its intended use. All other borrowing costs are charge to revenue.

11) Earnings Per Share:

Basic earnings per share is calculated by dividing the net profit after tax for the year / period attributable to Equity Shareholders of the Company by the weighted average number of Equity Shares outstanding at the end of the year / period. Diluted earnings per Share is calculated by dividing net profit attributable to equity Shareholders (after adjustment for diluted earnings) by average number of weighted equity shares outstanding at the end of the year / period.

12) Provisions, Contingent Liabilities & Contingent Assets:

The company recognizes as provisions, the liability being present obligations arising from past events, the settlement of which is expected to result in outflow of resources and which can be measured only by using a substantial degree of estimation. Contingent liabilities are disclosed by way of a note to the financial statement after careful evaluation by the management of the facts and legal aspect of the matters involved. Contingent assets are being neither recognized nor disclosed.

13) Current Assets, Loans And Advances

The balance under items of Sundry Debtors, Loans and Advances and current liabilities are subject to confirmation and reconciliation and consequential adjustments, wherever applicable. However, in the opinion of the Management, the realisable value of the current assets, loans and advances in the ordinary course of business will not be less than the value at which they are stated in the Balance Sheet.

14) Cash Flow

Cash flows are reported using the indirect method, whereby profit before tax is adjusted for the effects of transactions of non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. Cash flows from operating, investing and financing activities of the Company are segregated, accordingly.

C. Proceeding Initiated by our Promoter and Director for Economic Offense

1. Police complaint has been filed against Mr. Asif Mohd. Umar Furniturewala, Mr. Afsal Mohammed Umar Furniturewala, Mrs. Parveen Asif Furniturewala and Mr. Abdullah Asif Furniturewala (hereinafter collectively referred as the 'Accused') in the Economic Offence Wing (EoW) on 09.03.2023 by one of our director Mr. Arif Esmail Merchant (hereinafter referred as 'Mr. Merchant') for cheating breach of trust U/s 403, 406, 409,420,422,465,467,468,471,120B and 34 of Indian Penal Code (IPC). The Accused has a friendly relationship with Mr. Merchant since 2018 as Mr. Merchant and his family were in possession of a flat owned by Mrs. Parveen Asif Furniturewala and Mr. Abdullah Asif Furniturewala under leave and license agreement. In December, 2019 Mrs. Parveen and Mr. Abdullah introduced Mr. Asif Furniturewala (husband of Mrs. Parveen and father of Mr. Abdullah) and he offered to sell two flats namely 1. Flat number 191, owned by Mrs. Parveen and Mr. Abdullah and 2. Flat number 262, owned by Mrs. Parveen and Mr. Asif. Total deal was finalized at Rs. 8,50,00,000 (Rupees Eight Crore Fifty Lakhs only) for each flat and a token amount of Rs. 11,00,000 (Rupees Eleven Lakhs only) was paid to Mrs. Parveen and Mr. Asif for flat number 191 and 262 respectively. Thereafter, in tranches a total sum of Rs. 4,24,00,000 (Rupees Four Crore Twenty-Four Lakhs only) and Rs. 11,00,000 (Rupees Eleven Lakhs only) was given to Mrs. Parveen and Mr. Asif respectively. After receiving almost 50% of the flat no 191, Mrs. Parveen and Mr. Abdulla ensured that the agreement will get executed by March 31, 2021. Upon asking to vacant flat no. 262, as Mr. Asif was already staying in, he took shadow of Covid situation and ensure to execute the deal as soon as possible and will move to new flat soon, being requested by Mr. Asif, Mr. Merchant believe him.

Meanwhile, after gaining the trust Mr. Asif introduced Mr. Afzal Umar Furniturewala to Mr. Merchant and informed that both brothers are running a company named Millionaire Reality and since Mr. Merchant was in chemical industries and raw material could be supplied to them. Mr. Merchant without knowing the mala fide intention and trusting on the words, supplied goods to them worth Rs. 34,48,11,688 (Rupees Thirty-Four Crore Forty-Eight Lakhs Eleven Thousand Six Hundred Eighty-Eight only) on which Rs. 21,33,07,232 (Rupees Twenty-One Crore Thirty-Three Lakhs Seven Thousand Two Hundred Thirty-Two only) is still unpaid. In the month of July 2021, the Accused informed and convinced Mr. Merchant to invest in the real estate companies owned and associated by the Accused and claimed to be gain on short term basis. Considering the trust and faith on the Accused, the Company invested a huge amount of Rs. 25,20,04,000 (Rupees Twenty-Five Crore Twenty Lakh Four Thousand only) on Umar Reality (PAN: AAGFU5856Q), Gauri Construction (PAN: AAMFG8848A), Sara Construction (PAN: ACJFS5311H) and Sana and Company (PAN: AEGFS9063R). After the huge amount, the behavior of the Accused has changed drastically, upon asking the return on the investment. They started acting in arrogant way and instead of profit or any compensation and /or allotment of any Property, land etc, It was clear that the Accused intention was not to return the said amount and to cheat the Company therefore the Accused and its associated entities are liable to pay the investment amount along with 24% of interest per annum. Later, the deal wrt the flats were cancelled by Mrs. Parveen and Mr. Abdullah, Mrs. Parveen returned the amount by keeping Rs. 99,00,000 (Rupees Ninety Lakhs only) agreed to pay 2% interest and amount will be adjusted against the monthly rent of the flat, from April 2022.

On 4.07.2022, Mr. Asif came to Mr. Merchant house and created nuisance and threatened to vacant the house by hook or by crook, to avoid any conflict Mr. Merchant lodge the NC no. 847 dated 4.07.2022 U/s 506 of IPC at Agripada Police station. In October, 2022, Mr. Merchant and his family was forcibly removed from the premises and possession has been taken without obtaining surrender letter from them also Electricity bill of Rs. 80,614 (Rupees Eighty Thousand Six Hundred Fourteen only) and Gas payment of Rs.2,601 (Rupees Two Thousand Six Hundred one only) was paid on 01.12.2022 by Mr. Merchant. The Accused is liable to pay the following along with the interest to Mr. Merchant and the Company:

Debtor	Amount (In Rupees)	Interest Amount (in Rupees)
Asif M Umar Furniturewala	11,00,000.00	8,58,000.00

Sana & Company	5,00,01,000.00	1,90,00,380.00
Total Principal and Interest		36,59,23,520.00

Also, on August 29, 2023, Mr. Merchant has lodged an FIR no. 172 against Mr. Asif Mohd. Umar Furniturewala, in the Pydhonie Police Station under section 409, 420, 120-B and 34 of IPC (Indian Penal Code) for cheating of Rs. 25,20,04,000 (Rupees Twenty-Five Crore Twenty Lakhs Four Thousand only) against the amount invested in Sarah Construction, Gauri Construction, Umar Reality and Sana & Co.

The matter is under investigation.

D. Other Litigation Matters

1. A Police Complaint has been filed by one of our director promoter Mr. Arif Esmail Merchant against Mr. Gautam Gopikrishan Makharia, Director of Shree Pushkar Chemicals & Fertilisers Limited, Mr. Piyush Kachaliya and Mr. Punit Gopikishan Makharia (hereinafter collectively referred the 'Accused') for cheating, breach of trust U/s 403,406,409,420,422,465,467,468,471 and 34 of Indian Penal Code (IPC) on 11.03.2023.

Mr. Hasim Merchant (hereinafter referred as the 'Complainant') knew Mr. Gautam who was also in the same business of Sale-Purchase of Chemicals and his father Mr. Gopikishan Makharia through broker Mr. Piyush Kachliya. Mr. Gautam requested the Complainant to give him loan of Rs.3.5 Crores for the business of chemical company/start a new Company. Mr. Gautam has agreed to pay interest @ 12% per month on the said amount and assured that he will return double amount within three years. Accordingly, the Complainant has paid the said amount to the Accused by way of transferring in the bank account of Mr. Gautam Makharia. However, Mr. Gautam has not paid the agreed interest amount, hence the Complainant demanded him to return the said amount. Therefore, on 10.11.2020, Mr. Gautam has deposited sum of Rs.28,77,260 (Rupees Twenty-Eight Lakhs Seventy-Seven Thousand Two Hundred Sixty only) in the bank account of the mother of the Complainant. Total sum of Rs.4,54,53,609/- inclusive of interest is due and outstanding from the Mr. Gautam.

On 27.01.2023, the Complainant has sent notice to Mr. Gautam and requested him to pay the above amount. On 21.04.2023, Mr. Gopikishan has sent Notice to the Complainant. In the said notice Mr. Gopikishan Makharia contended that the Complainant has entered into agreement to purchase the land of the Accused which is situated at Bhiwani, Jonpal Tahasil, Haryana for consideration of Rs.9 Crore. As per the said agreement, the amount of Rs.2,25,00,000 adjusted towards the earnest amount of the sale agreement of the land and therefore, sum of Rs.6,75,00,000 is due and payable by the Complainant to Mr. Gautam in view of the agreement to sell. As the Complainant has not complied the said agreement within time, the sum of Rs.2,25,00,000 has been seized in the said transaction.

However, the Complainant never entered into agreement to sell with the Mr. Gautam. It was Mr. Punit Makharia, Mr. Gopikishan Makharia and broker Mr. Piyush Kachliya who are in furtherance of their common intention cheated the Complainant, thus prepared forged notarized agreement by making forged signature of the Complainant. Later after receiving the said notice a FIR no. 78 of 2024 was lodged on 29.01.2024 against the Mr. Gautam.

On 18.01.2024 an Anticipatory Bail Application No. 100165 of 2024 was filed by Mr. Gautam at City Session Court, Mumbai, contended that the Complainant expressed his desire to purchase the property belongs to the Mr. Gautam, a Memorandum of Understanding (MOU) was entered between the Complainant and Mr. Gautam and said amount of Rs.2,25,00,000/- as advance towards the purchase of land. He further argued that the transaction is purely civil in nature and question of any criminality is not involved in the matter and that the Complainant is involved in several cheating cases and he filed this complaint to extort money, which was rejected by the Hon'ble Court stating that in the reply of Investigation Officer (IO) the alleged MOU is dated 29.12.2020 executed before the Notary. However, the register of the Notary is not traceable. Moreover, the original MOU is misplaced from Mr. Gopikishan Makharia. Thus, the original MOU is not available. According to IO, it seems that the signatures on the said MOU are forged. The said notarized document is forged and fabricated prepared by Mr. Gautam, Mr. Punit Makharia, Mr. Gopikishan Makharia, broker Mr. Piyush Kachliya and Advocate Mr. Tribhuvanath Gangaprasad Sharma. The IO has filed application before Deputy Commissioner of Police for permission to register crime and the said application is in process. As a huge amount is involved and signatures on alleged notarized documents yet to be verified. There is no registered agreement to sell. Considering the nature of offence and facts mentioned above, it seems that the interrogation with accused/applicant is necessary. Hence the bail stands rejected.

The investigation is in process.
