A. Business Related Risks

1. *Majorly our business is in Gujarat any adverse development affecting such a region may have an adverse effect on our business, prospects, financial condition, and results of operations*

Over the three fiscal years from 2021-22 to 2023-24, Gujarat has consistently dominated in terms of the amount and percentage of the total. In 2021-22, revenue in the state of Gujarat accounted for an amount of Rs. 2322.30 lakhs, representing 71.26% of the total revenue from operations. This increased significantly to Rs. 4980.74 lakhs (96%) in 2022-23, Rs. 6934.85 lakhs (97%) in 2023-24 and Rs. 4218.40 lakhs (100%) as on October 31, 2024.

Below is table indicating geographical distribution of revenue from operations of the Company for the 7 months period ended October 31, 2024 and three financial years:

Rs. In Lakhs

Area	October 31, 2024		2023-24		2022-23		2021-22	
	Amount	%	Amount	%	Amount	%	Amount	%
Gujarat	4218.40	100%	6934.85	97.99%	4980.74	96.00%	2322.30	71.26%
Maharashtra	0	0	142.20	2.01%	143.83	2.77%	779.58	23.92%
Delhi	0	0	0.00	0.00%	63.85	1.23%	156.83	4.81%
Total	4218.40	100%	7077.05	100.00%	5188.42	100.00%	3258.71	100.00%

Our business is highly vulnerable to regional conditions and economic downturns in the region. Any unforeseen events or circumstances that negatively affect these areas could materially adversely affect our sales and profitability. These factors include, among other things, changes in demographics, population and income levels. In addition, our business may also be susceptible to regional natural disasters and other catastrophes, such as telecommunications failures, cyberattacks, fires, riots, political unrest or terrorist attacks. Any materially adverse social, political or economic development, natural calamities, civil disruptions, or changes in the policies of the local governments in this region could adversely affect operations. Natural disasters such as earthquakes, extreme climatic or weather conditions such as floods, droughts, or diseases heightened or particular to the region, may adversely impact the supply of products, local transportation and operations at our office. Such disruption to supply would materially and adversely affect our business, profitability and reputation.

2. *Customer complaints, negative publicity, or concerns regarding the purity and quality of our gold/silver jewellery, or any lapses in our quality control processes could significantly impact our business, brand reputation, and financial performance.*

As per the provisions outlined in subsection (1) of section 14 of the Bureau of Indian Standard Act, 2016 the precious metal articles inter alia Gold Jewellery and Silver Jewellery are required to be marked with hallmarked and same shall be sold by registered jewellers through certified outlets, after fulfilling the terms and conditions of certificate of registration as specified in Bureau of Indian Standard (Hallmarking) Regulations, 2018. We diligently follow rigorous quality control procedures throughout our manufacturing process to ensure the delivery of high-quality jewellery to our customers. However, while our jewellery is consistently hallmarked in accordance with Bureau of Indian Standards (“BIS”) guidelines, and we provide the requisite documentation and certificates with our products, we cannot guarantee that our quality control measures will always be infallible or that our products will consistently meet the highest quality standards.

Although we have not yet encountered any complaints, actions, or queries concerning the purity and quality of our gold/jewellery, we cannot offer assurance that such issues will not arise in the future. Any negative feedback or dissatisfaction from customers could adversely affect our business operations, brand reputation, and financial stability.

3. *High inventory costs may adversely impact our business and financial conditions of Our Company.*

Due to the nature of our business, we maintain a substantial inventory. As of October 31, 2024, Our Company held inventory valued at Rs. 1374.43 Lakhs. Inventory represented 86.02%, 68.04%, 64.17%, and 56.05% of our total assets for the seven months period ended October 31, 2024 and for the fiscal years ending March 31, 2024, 2023, and 2022, respectively.

If any portion of this inventory remains unsold due to factors such as shifts in trends or consumer preferences, it could lead to an accumulation of stock. This increase in inventory could negatively affect our business, cash flow, financial condition, and operational results. Overstocking can also elevate our capital requirements and increase our financing costs, including loans and associated interest. Conversely, understocking can hinder our ability to meet customer demand and impair our operating performance.

Significant discrepancies between our projected and actual sales may result in either excess inventory or stock shortages, both of which could adversely impact our business, financial condition, and operational results.

4. *The non-availability or high cost of quality gold bullion may have an adverse effect on our business, results of operations and financial condition.*

Timely procurement of materials such as gold bullion, along with the quality and price at which they are procured, plays a crucial role in the successful operation of our business. We source gold primarily from bullion dealers and recycle gold purchased from customers. Occasionally, customers also sell us pure gold.

An increase in the price of gold can lead to higher income from sales, provided such increases do not negatively impact sales volumes. However, a significant rise in gold prices or a negative outlook on future prices could adversely affect our sales volumes in the short term. Therefore, our business is influenced by the availability, cost, and quality of raw materials. Gold prices and supply are subject to factors beyond our control, including general economic conditions, competition, production levels, and regulatory factors such as import duties.

Historically, increases in raw material prices have not raised our operational costs, as these costs are passed on to the customer. However, we cannot guarantee that we will always procure quality raw materials at competitive prices, or at all. Additionally, rising gold and silver prices may cause customers to delay their purchases, negatively impacting our business, operations, and financial condition.

Any disruption in supply from our current suppliers or failure to find adequate replacements could materially and adversely affect our business, financial condition, and operational results.

5. *We have experienced negative cash flows in prior years*

As per our Restated financial statements Our Company has experienced negative cash flow for 7 months period ended October 31, 2024 and the financial years ended on March 31, 2024, March 31, 2023 and March 31, 2022 details of which are specified as under:

<i>Rs.in Lakhs</i>				
Particulars	October 31, 2024	March 31, 2024	March 31, 2023	March 31, 2022
Net cash flow from Operating Activity	(329.09)	239.41	28.62	(501.57)
Net cash flow from Investing Activity	42.69	4.57	(50.60)	(1.41)
Net cash flow from Financing Activity	21.15	21.20	21.55	502.44
Net increase/(decrease) in cash and cash equivalent	(265.25)	265.18	(0.43)	(0.54)

In FY 2021-22 the Company had raised funds by way of issue of Equity Shares which were invested in working capital requirements of the Company as a result of which there was excess cash outflow in operating activity. The negative cash-flow from investment activities in the FY 2021-22 of Rs. 1.41 Lakhs is on account of investment in fixed assets.

In FY 2022-23, the Company made an advance for development of a new unit. This advance, being long-term in nature was considered as an investment for the purpose of cash flows. This resulted in a negative cash flow from investing activities in the FY 2022-23.

For the seven months period ended on October 31, 2024, Company has reinvested its resources to enhance its working capital to support business expansion leading to excess cash outflow from operating activities of Rs. 329.09 lakhs.

While negative cash flow from operating activities support business expansion, it causes temporary constraints on the liquidity. Sustained negative cash flow could negatively impact our growth and business.

6. *We may fail to protect our jewellery designs.*

We regularly update our jewellery designs but do not register them under the Design Act, 2000. As a result, it is challenging to enforce our intellectual property rights, and if competitors replicate our designs—particularly those showcased on our website or provided to third-party contractors—it could result in revenue loss and negatively impact our operations and financial condition. Our manufacturing is conducted through (i) a network of job workers, to whom we sometimes provide raw materials and designs, and (ii) our in-house manufacturing facility. Despite our control and supervision of the manufacturing process, contract manufacturers might produce similar jewellery for other parties, including competitors. If

our contract manufacturers create identical or similar jewellery for our competitors, customers might prefer their products over ours, thereby adversely affecting our business and financial performance. Additionally, there is a risk that our designs could inadvertently infringe on third-party intellectual property rights, potentially exposing us to legal proceedings. Litigation for intellectual property infringement could harm our reputation, operational results, and financial condition.

7. We may be subject to fraud, theft, employee negligence or similar incidents.

Our operations may be subject to incidents of theft or damage to inventory in transit, prior to or during manufacturing facility for stocking. Our industry typically encounters some inventory loss on account of employee theft, shoplifting, vendor fraud, credit card fraud and general administrative error. We maintain large amounts of inventory at our office or manufacturing facility at all times and had a total inventory of Rs. 1374.43, Rs. 1074.87 lakhs, 1000.62 lakhs, and 698.99 lakhs, for the 7 months period ended October 31, 2024 and for the fiscal years ending on March 31, 2024, 2023 and 2022 respectively. We have set up various security measures and have never in the past experienced such incidents, excluding certain minor instances of theft. There can be no assurance that we will not experience any fraud, theft, employee negligence, security lapse, loss in transit or similar incidents in the future, which could adversely affect our results of operations and financial condition.

8. Our insurance may be insufficient to cover all losses associated with our business operations.

Although our insurance policies currently provide coverage for our inventories secure rooms, and our employees against risks such as fire, burglary etc. it's important to note that we may not be fully insured against all abnormal business risks. While we maintain insurance coverage, there are numerous events that could significantly impact our operations or expose us to third-party liabilities for which we may not have adequate coverage. We cannot guarantee that any claim under our insurance policies will be fully honored, partially honored, or honored in a timely manner.

In the event that we experience loss or damage that is not covered by insurance or exceeds our insurance coverage limits, it could have an adverse effect on our business, financial condition, and results of operations. Therefore, it's crucial for us to regularly assess and potentially enhance our insurance coverage to mitigate risks effectively.

We cannot assure you that we will be able to renew our lease agreements or enter into new agreements in the future, on terms favorable to us, or at all. In the event that any lease agreements are not renewed, we will be required to expend time and financial resources to locate suitable land or building to set up our operations. Also, we may be unable to relocate to an appropriate location in a timely manner, or at all, and we cannot assure you that a relocated office will be as commercially viable. If any lease agreements are terminated, prior to its tenure or if it is not renewed, or if we are required to cease business operations at a property, for any reason whatsoever, our business, financial condition, and results of operations may be adversely affected. Further, if the vacated property is leased or sold to a competitor, we may also face increased competition in that geographic area, which could adversely affect our market share. Any termination of the lease in connection with these properties or our failure to renew the same, in a timely manner or at all could adversely affect our operations. For information in relation to our premises, see “Our Business – Properties” on page 97.

10. We have availed unsecured loans from Promoters, Promoter Group and other companies that are callable, at any time.

Our Company has availed interest free unsecured loans from Promoter and Promoter group aggregating to Rs. 98.85 lakhs as of October 31, 2024, that are repayable on demand, and which may be recalled by such lenders at any time.

Rs. in Lakhs

Total	98.85	77.70	56.50	34.95

In the event that such lender seeks repayment of any such unsecured loans, Our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms. As a result, any such demand may materially and adversely affect our business, cash flows, financial condition and results of operations. For further information on unsecured loans relating to our business and operations, see “Financial Indebtedness” on page 184.

11. Our inability to effectively market our products, or any deterioration in public perception of our brand, could affect consumer footfall and consequently adversely impact our business, financial condition, cash flows and results of operations.

We operate in a highly competitive market. Due to the competitive nature of the market, if we do not continue to develop our brands and differentiate our products from our competitors, we may fail to attract customers required to continue growing our business. Developing, promoting and positioning our brand will depend largely on the success of our marketing and merchandising efforts, the relationships we have with our customers and our ability to provide a consistent, high-quality experience for our customers. In particular, we may face brand dilution to the extent we fail to develop, promote and position our brands or sub-brands effectively and consistently with respect to new products or any new product categories.

12. Competition in the Indian jewellery industry is significant. We operate in highly competitive and fragmented markets, and competition in these markets is based primarily on market trends, pricing and customer preferences.

The jewellery sector in India is fiercely competitive, with both large and small players leveraging various strengths to gain market share. Larger competitors benefit from substantial resources, allowing for significant spending on advertising, better brand recognition, advanced technology, and extensive distribution networks. These advantages enable them to offer competitive pricing, innovative products, and extensive promotional offers, particularly during festivals. Smaller competitors and local jewellers, including those in the unorganized sector, often compete effectively through regional trust, price competitiveness, and flexibility. Additionally, the rise of e-commerce platforms has increased visibility and market reach for smaller entities, intensifying competition further. This environment necessitates a focus on customer acquisition and retention

through design, quality, pricing, and after-sales service. Failure to compete effectively in these areas could adversely affect our market share, revenue, and profitability.

13. Our income and sales are subject to seasonal fluctuations and lower income in a peak season may have a disproportionate effect on our results of operations.

Our sales have historically exhibited certain seasonal fluctuations, reflecting higher sales volumes and profit margins during festival periods and other occasions such as *Akshaya Tritiya, Navratri, Gurupushyamrut* and *Dhanteras and wedding season*. Apart from higher sales seen during festival season, we also promote sales on new year to increase our sales. While we stock certain inventory to account for this seasonality, our fixed costs such as lease rentals, employee salaries, store operating costs and logistics- expenses, which form a significant portion of our operating costs, are relatively constant throughout the year. Consequently, lower than expected sales during certain quarters of the fiscal year or more pronounced seasonal variations in sales in the future could have a disproportionate impact on our operating results for the fiscal year or could strain our resources and significantly impair our cash flows. Further, as a result of the above, our quarter-on-quarter financial results may not be comparable or a meaningful indicator of our futuristic performance. Any slowdown in demand for our jewellery during peak seasons or failure by us to accurately anticipate and prepare for such seasonal fluctuations could have an adverse effect on our business, financial condition and results of operations. While we have not faced any such slowdown in demand or failure to accurately anticipate for seasonal fluctuations, we cannot assure that we will not face this in the future.

14. Volatility in the market price of gold and silver has a bearing on the value of our inventory and may affect our income, profitability and scale of operations.

The jewellery industry generally is affected by fluctuations in the price and supply of gold, silver . Gold prices are susceptible to movement on account of various factors such as currency fluctuations, geopolitical events and inflation. Fluctuations in gold prices may affect consumer demand as well as operating costs of Our Company. An increase in the price of gold may result in an increase in our income from inventory held for sales assuming such increases do not adversely affect sales volumes. However, a significant increase in the price of gold or a negative outlook on future gold prices could, in the short term, adversely affect our sales volumes. Any such fluctuation in the price of gold, silver or other raw materials may materially and adversely affect our revenue from operations and profitability. In case of any adverse movement in the commodity prices we may be exposed financial loss which are accounted for as per Ind AS. We record the value of our inventory at the lower of net realisable value and cost. We endeavour to buy the same quantity of gold at the same price end of each period usually day/week to match the amount of gold sold during that period. Although this reduces our exposure to volatility in the price of gold, it does not eliminate the risk with respect to the inventory already held which has suffered losses. A prolonged decline in the price of commodities would have an adverse effect on the value of our inventory, which in turn would have an adverse effect on our results of operations and financial condition.

15. We, as well as our Directors and Promoters are involved in certain legal and regulatory proceedings that, if decided unfavourably, may adversely affect our business, results of operations and financial condition.

Litigation of director Mr. Nitinkumar Dalpatbhai Shah who is also the promoter of the Company is included in both litigation against promoter and litigation against director.

For details of certain material legal proceedings against Our Company, our Subsidiaries, our Promoters, our Directors and Group Companies, see “Outstanding Litigation and Material Developments” on page 192.

The amounts claimed in these legal proceedings have been disclosed to the extent ascertainable and include amounts claimed jointly and severally. If any new developments arise, such as a change in the applicable laws or rulings against us by appellate courts or tribunals, we may need to make provisions in our financial statements that could increase our expenses and current liabilities.

We cannot assure you that these legal proceedings will be decided in favour of Our Company, our Promoters or our Directors, as the case may be, or that no further liability will arise out of these proceedings. Further, such legal proceedings could divert management time and attention and consume financial resources. Any adverse outcome in any of these proceedings may adversely affect our profitability and reputation and may have an adverse effect on our results of operations and financial condition.

16. Our Promoters will retain a significant shareholding in Our Company after this Offer, enabling them to exert considerable influence over our operations.

As at the date of this Prospectus, our Promoters hold 89,99,500 Equity Shares, or 99.99% of our issued, subscribed and paid-up Equity Share capital on a fully diluted basis. Upon completion of the Offer, our Promoters along with the Promoter Group together will continue to hold majority of our post-Offer Equity Share capital. For details of our Equity Shares held by our Promoters and Promoter Group, see “Capital Structure — Notes to the Capital Structure — Shareholding of our Promoters and members of the Promoter Group” on page 58. Our Promoters will continue to exercise significant influence over our business policies and affairs and all matters submitted to our Board or Shareholders for approval, including the composition of our Board of Directors, the adoption of amendments to our charter documents, the approval of mergers, strategic acquisitions or joint ventures or the sales of substantially all of our assets, and the policies for dividends, lending, investments and capital expenditures. This concentration of ownership also may delay, defer or even prevent a change in control of Our Company and may make some transactions more difficult or impossible without the support of these shareholders. The trading price of our Equity Shares could be adversely affected if potential new investors are disinclined to invest in us because they perceive disadvantages to a large shareholding being concentrated in our Promoter. The interests of the Promoters as our controlling shareholders could conflict with our interests or the interests of our other shareholders.

17. We may be unable to expand our product offerings through online distribution channels.

We intend to expand our online sales platform to maximise customer reach and foster the potential for additional revenue opportunities. In expanding our online sales platform, we face the risk that our websites may not be stable or may not properly perform the functions which we intend them to perform, resulting in the loss of revenues and potential damage to our brand. Our websites and IT systems are subject to damage or interruption from power outages, computer and telecommunications failures, software errors, computer viruses, security breaches, natural disasters and the delayed or failed implementation of new computer systems. While we have not faced any such failure in the past, and while Our Company has taken certain steps such as implementation of a firewall, unified threat management systems at our offices and all our stores and end point protection, however, any damage or interruption to our websites and other information systems may require a significant investment to fix or replace, and we may suffer interruptions in our operations, leading to a material adverse effect on our business, results of operations and financial condition.

18. If we are unable to continue to develop innovative, fashionable and popular designs, demand for our jewellery may decrease, adversely affecting our revenues and financial condition.

The jewellery industry is subject to rapid and unpredictable changes in fashion trends and customer preferences. In this regard, we regularly interact with a team of designers for introducing new and innovative design for our jewellery. Accordingly, customers have a variety of options beyond traditional gold jewellery, reflecting the ethical and sustainable choices in the jewellery market. Our success depends on our ability to identify, originate and define product and market trends, both on a pan – India and local level, as well as to anticipate, gauge and react to rapidly changing consumer demands in a timely manner. Our products must also appeal to a broad range of customers whose preferences may vary significantly and cannot be predicted with certainty. We cannot assure you that the demand for our products with end-consumers will continue to grow or that we will be able to continue to develop appealing styles or meet rapidly changing consumer demands in the future, misjudging the market for our jewellery products or failing to anticipate a shift in the consumer preferences could adversely affect our brand image, our business and financial condition. We rely on handcrafted jewellery, if handcrafted jewellery is perceived out of fashion, a variety of our designs of handcrafted jewellery will be rendered obsolete. We therefore continue to develop innovative, trend-setting and stylish jewellery designs that are different from our competitors. Market acceptance of new designs and products is subject to uncertainty, and we cannot assure you that our efforts will be successful. Achieving market acceptance for new designs or new jewellery lines may also require substantial marketing efforts and expenditures to increase consumer demand, which could constrain our management, financial and operational resources. If new designs we introduce do not experience broad market acceptance, our revenues could decline. In addition, due to the competitive nature of the jewellery market in which we operate, the innovative designs remain the key differentiators, which normally possess short life span. The inability of new designs or new jewellery lines to gain market acceptance or our inability to cater changing customer preferences could adversely affect our brand image, our business and financial condition.

19. Jewellery buying is commonly seen as a luxury indulgence. Any factor that diminishes consumers' discretionary spending could harmfully influence our business, operational outcomes, financial state, and future outlook.

Jewellery purchases are dependent on consumers' discretionary spending power and disposable income. Various factors affect discretionary consumer spending in India, such as the cultural significance of purchasing jewellery during certain festivals (such as *Akshaya Tritiya*, *Navratri*, *Gurupushyamrut* and *Dhanteras and wedding season*), price of precious metals, disposable income, economic outlook, employment, inflation levels, interest rates and levels of taxation, among others. Moreover, we believe that while historically, gold jewellery has been purchased as an investment asset by consumers, there is a changing trend in consumers to invest such funds in other asset classes, which may adversely affect our business, financial condition and results of operations. Additionally, the prices of gold and silver at a particular time also affect the decision of our customers to purchase jewellery. Most of our customers are individuals who purchase jewellery for personal use and who are generally less financially resilient than corporate entities. Additionally, gold and silver jewellery are not perceived to be a necessity, which may result in a significant fall in demand in the case of adverse economic conditions as opposed to demand for those goods that are perceived as a necessity. Such adverse economic conditions include levels of employment, inflation or deflation, real disposable income, interest rates, taxation, currency exchange rates, stock market performance, the availability of consumer credit, levels of consumer debt, consumer confidence, consumer perception of economic conditions and consumer willingness to spend, all of which are beyond our control. An economic downturn or an otherwise uncertain economic outlook in our principal markets, in any other markets in which we may operate in the future, or on a global scale could adversely affect our consumer spending habits and traffic, which could have a material adverse effect on our business, results of operations and financial condition.

20. We require certain approvals, permits and licenses in the ordinary course of business, and any failure or delay to obtain or renew them or to comply with their conditions in the future may adversely affect our operations.

We are governed by various laws and regulations for our business and operations. We are required, and will continue to be required, to obtain and hold relevant licenses, approvals and permits at the local, state and central government levels for doing our business. Additionally, we may need to apply for renewal of certain approvals, licenses and permits, which expire or seek fresh approvals/licenses/permits, from time to time, as and when required in the ordinary course of our business. There can be no assurance that the relevant authorities will issue such licenses, permits or approvals in the timeframe anticipated by us or at all. There can be no guarantee that we will be able to obtain or renew all such approvals in a timely manner or at all. Our failure to renew, maintain or obtain the required licenses, permits or approvals within the requisite time may result in the interruption of our operations and may have a material adverse effect on our business, financial condition and results of operations. Our permits, licenses and approvals are subject to several conditions, some of which could be onerous and we cannot assure you that we shall be able to continuously meet such conditions or be able to prove compliance with such conditions to statutory authorities, which may lead to cancellation, revocation or suspension of relevant permits/licenses/approvals. The loss of approvals, licenses and permits may cause disruptions in our business operations and may cause us to undertake significant expenditure to rectify non-compliance or denial of approvals, including relocation of facilities and loss.

21. We are dependent on our Key Managerial Personnel, and the loss of, or our inability to hire, retain, train, and motivate qualified personnel could adversely affect our business, results of operations, and financial condition.

Our Promoter, management team, and key personnel have been instrumental in the growth and development of Our Company. Our management team comprises our Managing Director Nitin Shah, our Executive Director and Chief Financial Officer Nihar Shah. In particular, the active involvement of our management team and key personnel in our operations, including through strategy, direction, and relationships have been integral to our development and business. The loss of any of these persons would have a material adverse effect on our operations. Our businesses are dependent upon a core and senior management team which oversees the day-to-day operations, strategy and growth of our business. Our success is largely dependent on our management team which ensures the implementation of our strategy. If one or more members of our key management team were unable or unwilling to continue in their present positions, such persons would be difficult to replace and our business, results of operations, financial condition, cash flows and prospects could be adversely affected. Our future success, amongst other factors, will depend on our ability to continue to attract and retain qualified personnel, particularly persons with critical expertise, know-how and skills that are capable of helping us to strategize, and develop our business and various business vertical products. Our failure to successfully manage our personnel needs could materially and adversely affect our business, results of operations, financial condition and cash flows. Moreover, if any of our key professional employees were to join an existing competitor or form a competing company or otherwise leave, it could lead to setbacks in the implementation of our plans and strategy. Our failure to successfully manage our employees' needs could materially adversely affect our business, results of operations, financial condition, cash flows and prospects. If we are not able to address these risks, our business, results of operations, financial condition and cash flows could be adversely affected.

22. Our revenue streams heavily rely on the sale of gold bullion and gold jewellery. Any factors that negatively impact the procurement of gold or our sales of gold bullion and gold jewellery could have adverse effects on our business, financial condition, operational results, and future prospects.

Any adverse factors affecting the procurement of gold or impacting our ability to sell gold jewellery could have severe consequences on our business. Any factors adversely affecting our sales of gold jewellery may negatively impact our business, financial condition, results of operations and prospects. The following table sets sale of gold jewellery for the periods indicated:

Rs. In Lakhs

Product	October 31, 2024		2023-24		2022-23		2021-22	
	Amount	%	Amount	%	Amount	%	Amount	%
Gold	4123.16	97.74%	6689.83	94.53%	5185.54	99.94%	3126.94	95.96%

Any decrease in supply of gold or our inability to effectively procure gold at competitive rates, in time, or at all, may adversely impact our business, financial condition, results of operations and growth prospects. Fluctuations in gold prices, supply chain disruptions, changes in consumer preferences, or economic conditions can directly influence our revenue streams.

23. Failure to efficiently convert existing customers into repeat buyers or attract new customers could harm our business, financial health, and operational performance.

The growth trajectory of our business depends on our capability converting existing customers into repeat ones and acquire new ones. While we recognize that many customers come through word-of-mouth and other non-paid referrals, we intend to persist in allocating resources and running marketing campaigns to broaden our customer base, which may impact overall profitability. Failure to expand our customer base or retain existing customers could result in slower-than-anticipated or declining net sales. Moreover, our capacity to attract new customers and boost net sales from existing ones relies significantly on our ability to enhance current products, introduce appealing new offerings, and do so promptly. We also must be able to identify and originate trends, as well as anticipate and react to changing consumer demands in a timely manner. The success of new products and services depends on several factors, including their timely introduction and completion, sufficient demand, and cost effectiveness. While we expect introduction of new technologies to lead to improvements in the performance of our business and operations, including inventory prediction and customer footfall prediction and management, any flaws or failures of such technologies could cause interruptions or delays in our service, which may harm our business. Our number of customers may decline materially or fluctuate as a result of many factors, including, among other things like dissatisfaction with the quality, pricing of products, or changes we make to our products and service, the quality, consumer appeal and price of products and services offered by us, intense competition in the jewellery industry etc.

In addition, if we are unable to provide high-quality support to customers or help resolve issues in a timely and acceptable manner, our ability to attract and retain customers could be adversely affected. If our number of customers declines or fluctuates for any of these or other reasons, our business would suffer.

24. Our Company requires significant amount of working capital for continued growth. Our inability to meet our working capital requirements, on commercially acceptable terms, may have an adverse impact on our business, financial condition and results of operations

Our working capital requirements for 7 months period ended October 31, 2024 and financial years ending on March 31, 2024, March 31, 2023, March 31, 2022 are as under:

Our business requires a substantial amount of working capital, primarily to finance the purchase of raw materials i.e., gold, silver etc. In addition to the requirement of funds as provided in “Objects of the Issue” on page 69, in future we may need to obtain additional financing in the normal course of business from time to time as we expand our operations. We may not be successful in obtaining additional funds in a timely manner and/or on favourable terms including rate of interest, primary security cover, collateral security, terms of repayment, or at all. Moreover, certain of our loan documentations contain provisions that limit our ability to incur future debt. If we do not have access to additional capital, we may be required to

delay, scale back or abandon some or all of our plans or growth strategies or reduce capital expenditures and the size of our operations may get constrained.

25. Any variation in the utilisation of the Net Proceeds or in the terms of any contract as disclosed in the Prospectus would be subject to certain compliance requirements, including prior shareholders' approval.

We intend to use the Net Proceeds for (i) funding our working capital requirements, and (ii) general corporate purposes. The deployment of the Net Proceeds is based on management estimates, current circumstances of our business and prevailing market conditions and has not been appraised by any bank, financial institution or other independent institution. We may have to revise our funding requirements and deployment from time to time due to various factors, such as changes in costs, financial and market conditions, business and strategy considerations and interest and exchange rate fluctuations or other external factors, which may or may not be within the control of our management. This may entail rescheduling and revising planned expenditure and funding requirements and increasing or decreasing expenditures for a particular purpose from planned expenditures at the discretion of our management and subject to applicable law. Accordingly, investors in Equity Shares will be relying on the judgment of our management regarding the application of the Net Proceeds. The application of Net Proceeds in our business may not lead to an increase in the value of your investment. In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilization of the Net Proceeds or in the terms of any contract as disclosed in this Prospectus without obtaining the Shareholders' approval through a special resolution. In the event of any such circumstances that require us to undertake variation in the disclosed utilization of the Net Proceeds, we may not be able to obtain the Shareholders' approval in a timely manner, or at all. Any delay or inability in obtaining such Shareholders' approval may adversely affect our business or operations. Further, our Promoters would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to change the objects of the Issue or vary the terms of such contracts, at a price and manner as prescribed by SEBI. Additionally, the requirement on Promoters to provide an exit opportunity to such dissenting shareholders may deter the Promoters from agreeing to the variation of the proposed utilization of the Net Proceeds, even if such variation is in our interest. This may restrict our ability to respond to any change in our business or financial condition by re-deploying the unutilized portion of the Net Proceeds, if any, or varying the terms of any contract, which may adversely affect our business and results of operations. net Proceeds to achieve profitable growth in our business.

26. Failure to manage our inventory could have an adverse effect on our net sales, profitability, cash flow and liquidity.

As of October 31, 2024, we had total inventories amounting to Rs. 1374.43 lakhs. Our inventory turnover for the 7 months period ended October 31, 2024 and for the Fiscal 2024, Fiscal 2023 and Fiscal 2022 was 70 days, 55 days, 70 days and 78 days respectively. Our results of operations are dependent on our ability to effectively manage our inventory. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply situation and manufacture purchase additional inventory accordingly. If our management fails to anticipate expected customer demand it could adversely impact the results of operations by causing either a shortage of inventory leading to loss of revenue and profits or an accumulation of excess inventory. Further, if we fail to sell the inventory we manufacture or purchase, we may be required to recycle our inventory, which would lead to loss of material, additional manufacturing costs and subsequently, an adverse impact on our revenue, profit and cash flows. The price of gold fluctuates on the basis of demand and supply. If the price of gold decreases in future, we may not be able to recover the cost of material which could affect our profitability.

27. We have in the past entered into related party transactions and may continue to do so in the future.

We have entered into certain transactions with related parties, including with respect to the payment of remuneration of certain of our Directors and loans from related parties. While all the related party transactions done by Our Company in the past have been executed on arm's length price and Our Company is in compliance with the provisions of Companies Act, 2013 in these related party transactions entered into by us. Furthermore, it is likely that we may enter into related party transactions in the future. Although upon listing of our equity shares pursuant to the Issue, all related party transactions require Audit Committee and Shareholders' approval, there can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations or that we could not have achieved more favourable terms if such transactions had not been entered into with related parties. Additionally, any future transactions with our related parties could potentially involve conflicts of interest.

30. *We have not entered into any definitive arrangements to utilize certain portions of the Net Proceeds of the Issue. Our funding requirements and deployment of the Net Proceeds of the Issue are based on management estimates and have not been independently appraised*

We intend to use the Net Proceeds of the Issue for the purposes described in the section “*Objects of the Issue*” on page 69. The objects of the Issue and our funding requirement are based on management estimates and internal management estimates based on the terms of our current financing documents and have not been appraised by any bank or financial institution. These are based on current conditions and are subject to changes in external circumstances or costs, or in other financial condition, business or strategy, as discussed further below. Our management, in accordance with the policies established by our Board from time to time, will have flexibility in deploying the Net Proceeds of the Issue. Based on the competitive nature of our industry, there may be revisions to the management estimates from time to time, and consequently our funding requirements may also change. Our management estimates may differ from the value that would have been determined by third party appraisals, which may require us to reschedule or reallocate our expenditure, subject to applicable laws, and may have an adverse impact on our business, financial condition and results of operations. Accordingly, investors of our Equity Shares will be relying on the judgment of our management regarding the application of the Net Proceeds. The application of the Net Proceeds in our business may not lead to an increase in the value of your investment. Various risks and uncertainties, including those set forth in this section “*Risk Factors*”, may limit or delay our efforts to use the Net Proceeds to achieve profitable growth in our business.

31. *We do not maintain long-term contracts with our third-party suppliers, and our business may be adversely affected by a shortfall in supply, or increase in price of materials.*

Our Company is engaged into the business of trading and manufacturing gold and silver jewellery, for further details, see chapter “Our Business” page 97 of this Prospectus. We do not have any long-term supply contracts with any of our specific suppliers with respect to our material requirements and typically place orders with them in advance of our anticipated requirements. Due to absence of any long-term supply contracts we have to purchase the products at the prevailing pricing which may be affected by price rise of raw materials, labour costs, transportation costs and manufacturing expenses which are passed on to us by way of increased prices. Due to this our margins may be affected adversely. Any significant change in the cost structure or disruption in supply may affect the pricing and supply of products. This may adversely affect our business and financial performance.

32. *Our Company has not entered into any long-term contracts with our distributors/customers and we typically operate on the basis of orders received on hand. Inability to maintain regular order flow would adversely impact our revenues and profitability.*

We have not entered into any fixed contracts with our distributors/customers and we cater to them on an order-by-order basis. As a result, our distributors/customers can terminate their relationships with us without any prior notice and, without consequence, which could materially and adversely impact our business. Consequently, our revenue may be subject to variability because of fluctuations in demand for our products. Our Company’s distributors/customers have no obligation to place order with us and may either cancel, reduce or delay orders. The orders placed by Our Company’s distributors/customers are dependent on factors such as the customer satisfaction, quality consistency, fluctuation in demand for Our Company’s products and customer’s inventory management. Although we place a strong emphasis on quality, pricing and timely delivery of our products, personal interaction by the top management with the distributors/customers, etc., in the absence of contracts, any sudden change in the buying pattern of buyers could adversely affect the business and the profitability of Our Company.

33. *Major portion of our revenue is derived from a limited number of customers. Any failure to retain one or more of our customers or any disruption of sale of our product will have an adverse effect on our financial performance and results of operations.*

We are significantly dependent on certain key customers for a significant portion of our sales, the loss of any one of our key customers for any reason could have an adverse effect on our business, results of operations and financial condition. While we strive to maintain good relations with our key customers, there is no assurance that our key customers will continue to place similar orders with us in the future. In addition to these external factors, these key customers may also set off any payment obligations, require indemnification for themselves or their affiliates, replace us with our competitors,

or replace their existing products with alternative products which we do not supply. Therefore, there can be no assurance that we will not lose all or a portion of sales to these key customers, or that we will be able to offset any reduction of prices to these customers with reductions in our costs or by obtaining new customers. We may continue to remain dependent upon our key customers for a substantial portion of our revenues. Further, the deterioration of the financial condition or business prospects of these customers could reduce their requirement for our products and result in a significant decrease in the revenues we derive from these customers. In the event of our failure to retain one or more of our key customers, it will have an adverse effect on our financial performance and result of operations.

34. We are heavily dependent on certain suppliers and customers for procurement and sale of our goods. Any disruption in supply or offtake from such entities may affect our business operations.

Our business from customers is dependent on our continuing relationship with such customers, the quality of our products and our ability to deliver on their orders, and there can be no assurance that such customers will continue to do business with us in the future on commercially acceptable terms or at all. However, in case of any change in the buying pattern of our end users or disassociation of major customers can adversely affect our business or if our customers do not continue to purchase products from us, or reduce the volume of products purchased from us, our business prospects, results of operations and financial condition may be adversely affected. Further, loss of or interruption of work by, a significant customer or a number of significant customers or the inability to procure new orders on a regular basis or at all may have an adverse effect on our revenues, cash flows and operations. While we are constantly striving to increase our customer base and reduce dependence on any particular customer, there is no assurance that we will be able to broaden our customer base in any future periods or that our business or results of operations will not be adversely affected by a reduction in demand or cessation of our relationship with any of our major customers.

We have not entered into long term contracts with our suppliers and prices for goods are normally based on the quotes we receive from various suppliers. Inadequate and timely unavailability substandard quality of the goods, could have a material adverse effect on our business. Further, any discontinuation of supply of goods by these suppliers or a failure of these suppliers to adhere to the delivery schedule or the required quality and quantity could hamper our manufacturing schedule. There can be no assurance that strong demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply of goods to us. Further, we cannot assure you that our suppliers will continue to be associated with us on reasonable terms, or at all. Since our suppliers are not contractually bound to deal with us exclusively, we may face the risk of our competitors offering better terms to such suppliers, which may cause them to cater to our competitors alongside. In the event that we fail to secure sufficient quantities of such raw materials from our suppliers at acceptable quality and prices in a timely manner, our business, financial performance and cash flows may be adversely affected.

35. *Delays or defaults in client payments could affect our operations.*

We may be subject to working capital risks due to delays or defaults in payment by clients, which may restrict our ability to procure raw materials and make payments when due. In addition, any delay or failure on our part to supply the required quantity or quality of products, within the time stipulated by our agreements, to our customers may in turn cause delay in payment or refusal of payment by the customer. Such defaults/delays by our customers in meeting their payment obligations to us may have a material effect on our business, financial condition and results of operations.

36. *The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency.*

Since the Issue size is less than Rs. 100,00,00,000 (Rupees One Hundred Crores) there is no mandatory requirement of appointing an independent monitoring agency for overseeing the deployment of utilization of funds raised through this Issue. Hence, the deployment of these funds raised through this Issue will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials

B. Issue Related Risks

1. *In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects of this Issue which would in turn affect our revenues and results of operations.*

The funds that we receive would be utilized for the Objects of the Issue as has been stated in the Chapter “*Objects of the Issue*” on page 69 of this Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management’s estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, we may have to revise our business, development and working capital plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and results of operations.

2. *There is no guarantee that our Equity Shares will be listed on the SME Platform of BSE Limited in a timely manner or at all.*

In accordance with Indian law and practice, permission for listing and trading of our Equity Shares will not be granted until after certain actions have been completed in relation to this Issue and until Allotment of Equity Shares pursuant to this Issue. In accordance with current regulations and circulars issued of SEBI, our Equity Shares are required to be listed on the SME Platform of BSE Limited within prescribed time lines. However, we cannot assure you that the trading in our Equity Shares will commence in a timely manner or at all. Any failure or delay in obtaining final listing and trading approvals may restrict our ability to dispose of your Equity Shares.

3. *The Issue Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue.*

The Issue price is based on numerous factors and may not be indicative of the market price for our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. There can be no assurance that you will be able to resell your Shares at or above the Issue Price. Among the factors that could affect our Share price are: variations in the rate of growth of our financial indicators, such as earnings per share, net profit and income; changes in income or earnings estimates or publication of research reports by analysts; speculation in the press or investment community; general market conditions; and domestic and international economic, legal and regulatory factors unrelated to our performance.

4. *After this Issue, the price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not be sustained.*

Prior to this Issue, there has been no public market for our Equity Shares, and an active trading market may not develop or be sustained upon the completion of this Issue. The initial public offering price of the Equity Shares offered hereby was determined through our negotiations with the LM and may not be indicative of the market price of the Equity Shares after this Issue. The market price of our Equity Shares after this Issue will be subject to significant fluctuations in response to, among other factors:

- variations in our operating results and the performance of our business;
- regulatory developments in our target markets affecting us, our customers, or our competitors;
- changes in financial estimates by securities research analysts;
- addition or loss of executive officers or key employees;
- loss of one or more significant customers;
- the performance of the Indian and global economy;
- significant developments in India's economic liberalization and deregulation policies, and the fiscal regime;
- volatility in the Indian and global securities markets;
- performance of our competitors and perception in the Indian market about investment in our industry; and
- adverse media reports, if any, on Our Company, or the industry.

Many of these factors are beyond our control. There has been recent volatility in the Indian stock markets and our share price could fluctuate significantly as a result of such volatility in the future. There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Issue, or that the price at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Issue.

5. *The investors will not be able to sell immediately on an Indian stock exchange any of the Equity Shares they purchase in the Issue.*

We have applied to BSE Limited to use its name as the Stock Exchange in this offer document for listing our shares on the SME Platform of BSE Limited. In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Offer will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a delay in listing the Equity Shares on the SME Platform of BSE Limited. Any delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

6. *There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.*

Once listed, we would be subject to circuit breakers imposed by stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

7. *Any future issuance of Equity Shares may dilute the investors' shareholdings or sales of our Equity Shares by our Promoters or Promoter Group may adversely affect the trading price of our Equity Shares.*

Any future equity issuances by us or sales of our Equity Shares by our Promoters or Promoter Group may adversely affect the trading price of our Equity Shares and Our Company's ability to raise capital through an issue of securities. In addition, any perception by potential investors that such issuances or sales might occur could also affect the trading price of our Equity Shares. Additionally, the disposal, pledge or encumbrance of our Equity Shares by any of Our Company's major shareholders, or the perception that such transactions may occur may affect the trading price of our Equity Shares. No assurance may be given that Our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

8. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

We have no experience as a public listed company or with the increased scrutiny of its affairs by shareholders, regulators and the public at large that is associated with being a public listed company. As a public listed company, we will incur significant legal, accounting, corporate governance, and other expenses that we did not incur as an unlisted company. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange which require us to file unaudited financial results on a half-yearly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, our management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner.

9. *Our Company has not paid any dividends till now and there can be no assurance that we will pay dividends in future.*

Our ability to pay dividends in the future will depend upon a variety of factors such as future earnings, financial condition, cash flows, working capital requirements, and restrictive covenants in our financing arrangements. Our Company has not paid any dividends till now and there can be no assurance that we will pay dividends in future. Our ability to pay dividends in the future will depend on our earnings, financial condition and capital requirements. Dividends distributed by us will attract dividend distribution tax at rates applicable from time to time. There can be no assurance that we will generate sufficient income to cover our operating expenses and pay dividends to our shareholders, or at all. Our ability to pay dividends could also be restricted under the existing or certain financing arrangements that we may enter into.

10. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see **"Dividend Policy"** on page 147 of this Prospectus.

11. *You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.*

Under the current Indian Income Tax provisions, all transactions of purchase and sales of securities on Indian stock exchanges are subject to levy of securities transaction tax (STT) which will be collected by respective stock exchange on which the securities are transacted. Accordingly, the Indian Income Tax Act has special capital gains tax provisions for all transactions of purchase and sale of equity shares carried out on the Indian Stock Exchanges. Under the current Indian Income Tax provisions, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India.

12. *Foreign investors may be restricted in their ability to purchase or sell Equity Shares.*

Under foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing and reporting requirements specified by the RBI or in the alternate, the pricing is in compliance with the extant provisions of SEBI ICDR Regulations. If the transfer of shares is not in compliance with such pricing or reporting requirements and does not fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. We cannot assure that any required approval from the RBI or any other government agency can be obtained on any particular terms or at all.

13. *QIBs and Non-Institutional Bidders are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after the submission of their Bid, and Retail Individual Bidders are not permitted to withdraw their Bids after closure of the Bid/ Issue Closing Date*

Retail Individual Bidders can revise their Bids during the Bid/ Issue Period and withdraw their Bids until the Bid/ Issue Closing Date. While we are required to complete all necessary formalities for listing and commencement of trading of the Equity Shares on all Stock Exchanges where such Equity Shares are proposed to be listed, including Allotment, within six (6) Working Days from the Bid/ Issue Closing Date or such other period as may be prescribed under applicable law, events affecting the investors' decision to invest in the Equity Shares, including adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations, cash flows or financial condition may arise between the date of submission of the Bid and Allotment. We may complete the Allotment of the Equity Shares even if such events occur, and such events may limit the Investors' ability to sell the Equity Shares Allotted pursuant to the Issue or cause the trading price of the Equity Shares to decline on listing.

- 14. *The investors may be restricted in their ability to exercise pre-emptive rights under Indian law and may be adversely affected by future dilution of their ownership position.***

Under the Companies Act, 2013, a Company incorporated in India must offer its holders of shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages before the issuance of any new shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the shares which are voted on the resolution. However, if the law of the jurisdiction the investors are in does not permit them to exercise their pre-emptive rights without us filing an offering document or registration statement with the applicable authority in the jurisdiction they are in, they will not be able to exercise their pre-emptive rights unless we make such a filing. If we elect not to make such a filing, the new securities may be issued to a custodian, who may sell the securities for the investors' benefit. The value such custodian would receive upon the sale of such securities if any, and the related transaction costs cannot be predicted. To the extent that the investors' are unable to exercise pre-emptive rights granted in respect of the Equity Shares, their proportional interest in us would be reduced.

- 15. *Rights of shareholders under Indian law may be more limited than under the laws of other jurisdictions.***

The Companies Act and related regulations, the Articles of Association, and the Listing Agreements to be entered into with the Stock Exchange govern the corporate affairs of The Company. The Legal principles relating to these matters and the validity of corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as a shareholder than as a shareholder of a corporation in another jurisdiction.

- 16. *Our Equity Shares are quoted in Indian Rupees in India, and therefore investors may be subject to potential losses arising out of exchange rate risk on the Indian Rupee and risks associated with the conversion of Indian Rupee proceeds into foreign currency.***

Investors are subject to currency fluctuation risk and convertibility risk since the Equity Shares are quoted in Indian Rupees on the Indian stock exchanges on which they are listed. Dividends on the Equity Shares will also be paid in Indian Rupees. The volatility of the Indian Rupee against the U.S. dollar and other currencies subjects investors who convert funds into Indian Rupees to purchase our Equity Shares to currency fluctuation risks.

- 17. *Investors will not have the option of getting the allotment of Equity Shares in physical form***

In accordance with the SEBI ICDR Regulations, the Equity Shares shall be issued only in dematerialized form. Investors will not have the option of getting the allotment of Equity Shares in physical form. The Equity Shares Allotted to the Applicants who do not have demat accounts or who have not specified their demat details, will be kept in abeyance till receipt of the details of the demat account of such Applicants. For details, see "*Terms of the Issue*" beginning on page 210. This may impact the ability of our shareholders to receive the Equity Shares in the Issue

EXTERNAL RISK FACTORS

- 1. *The COVID-19 pandemic, or any future pandemic or widespread public health emergency, could materially and adversely impact our business, financial condition, cash flows and results of operations.***

In late 2019, COVID-19 emerged and by March 11, 2020 was declared a global pandemic by The World Health Organization. Governments and municipalities around the world instituted measures in an effort to control the spread of COVID-19, including quarantines, shelter-in-place orders, school closings, travel restrictions, lock down of cities and closure of non-essential businesses. By the end of March, the macroeconomic impacts became significant, exhibited by, among other things, a rise in unemployment and market volatility. The outbreak of COVID-19 in many countries, including India, the United Kingdom and the United States, has significantly and adversely impacted economic activity and has contributed to significant volatility and negative pressure in financial markets, and it is possible that the outbreak of COVID-19 will cause a prolonged global economic crisis, recession or depression, despite monetary and fiscal interventions by governments and central banks globally. On March 24, 2020, the Government of India ordered a national lockdown in response to the spread of COVID-19. Although some governments are beginning to ease or lift these restrictions, the impacts from the severe disruptions caused by the effective shutdown of large segments of the global economy remain unknown and no prediction can be made of when any of the restrictions currently in place will be relaxed or expire, or whether or when further restrictions will be announced.

The outbreak, or threatened outbreak, of any severe communicable disease (particularly COVID-19) could materially adversely affect overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The spread of any severe communicable disease may also adversely affect the operations of our clients and service providers, which could adversely affect our business, financial condition and results of operations. The outbreak of COVID-19 has resulted in authorities implementing several measures such as travel bans and restrictions, quarantines, shelter in place orders, and shutdowns. These measures have impacted and may further impact our workforce and operations, the operations of our clients, and those of our respective service providers. There is currently substantial medical uncertainty regarding COVID-19. A rapid increase in severe cases and deaths where measures taken by governments fail or are lifted prematurely, may cause significant economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe. If any of our employees were suspected of contracting COVID-19 or any other epidemic disease, this could require us to quarantine some or all of these employees or disinfect the facilities used for our operations. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general.

The outbreak has significantly increased economic uncertainty. It is likely that the current outbreak or continued spread of COVID-19 will cause an economic slowdown and it is possible that it could cause a global recession. The spread of COVID-19 has caused us to modify our business practices (including employee travel, employee work locations, and cancellation of physical participation in meetings, events and conferences), and we may take further actions as may be required by government authorities or that we determine are in the best interests of our employees, customers, partners, and suppliers. There is no certainty that such measures will be sufficient to mitigate the risks posed by the outbreak, and our ability to perform critical functions could be harmed. The extent to which the COVID-19 further impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including new information which may emerge concerning the severity of the coronavirus and the actions taken globally to contain the coronavirus or treat its impact, among others. Existing insurance coverage may not provide protection for all costs that may arise from all such possible events. The degree to which COVID-19 impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including, but not limited to, the duration and spread of the outbreak, its severity, the actions taken to contain the outbreak or treat its impact, and how quickly and to what extent normal economic and operating conditions can resume. The above risks can threaten the safe operation of our facilities and cause disruption of operational activities, environmental harm, loss of life, injuries and impact the wellbeing of our people.

Further in case the lockdown is extended, it could result in muted economic growth or give rise to a recessionary economic scenario, in India and globally, which could adversely affect the business, prospects, results of operations and financial condition of Our Company. The full extent to which the COVID-19 pandemic, or any future pandemic or widespread public health emergency impacts our business, operations and financial results will depend on numerous evolving factors that we may not be able to accurately predict, including: the scope, severity, and duration of the pandemic; actions taken by governments, business and individuals in response to the pandemic; the effect on customer demand for and ability to pay for our products; the impact on our capital expenditure; disruptions or restrictions on our employees' and suppliers' ability to work and travel; any extended period of remote work arrangements; and strain on our or our customers' business continuity plans, and resultant operational risk.

2. *A slowdown in economic growth in India could adversely affect our business, results of operations, financial condition and cash flows.*

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we

operate. There have been periods of slowdown in the economic growth of India. Demand for our products may be adversely affected by an economic downturn in domestic, regional and global economies. Economic growth in the country in which we operate is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports of materials, global economic uncertainty and liquidity crisis, volatility in exchange currency rates. Consequently, any future slowdown in the Indian economy could harm our business, results of operations, financial condition and cash flows.

3. *Political, economic or other factors that are beyond our control may have an adverse effect on our business and results of operations*

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in India as well as other countries. Investors' reactions to developments in one country may have adverse effects on the market price of securities of companies located elsewhere, including India. Adverse economic developments, such as rising fiscal or trade deficit, in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general. In addition to the above, Our Company is incorporated in India and its assets are located in India. Consequently, our performance and the market price of the Equity Shares may be affected by interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India. There have been periods of slowdown in the economic growth of India. Demand for our jewellery products may be adversely affected by an economic downturn in domestic, regional and global economies. Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins. Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- the macroeconomic climate, including any increase in Indian interest rates or inflation;
- any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- any scarcity of credit or other financing in India, resulting in an adverse effect on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian consumers and Indian corporations;
- epidemic, pandemic or any other public health in India or in countries in the region or globally, including in India's various neighbouring countries, such as the highly pathogenic H7N9, H5N1 and H1N1 strains of influenza in birds and swine and more recently, the COVID-19 pandemic and H3N2 influenza;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- occurrence of natural or man-made disasters (such as typhoons, flooding, earthquakes and fires) which may cause us to suspend our operations;
- prevailing regional or global economic conditions, including in India's principal export markets;
- other significant regulatory or economic developments in or affecting India or its consumption sector;
- international business practices that may conflict with other customs or legal requirements to which we are subject, including anti-bribery and anti-corruption laws;
- protectionist and other adverse public policies, including local content requirements, import/export tariffs, increased regulations or capital investment requirements;
- logistical and communications challenges;
- downgrading of India's sovereign debt rating by rating agencies;
- difficulty in developing any necessary partnerships with local businesses on commercially acceptable terms or on a timely basis; and
- being subject to the jurisdiction of foreign courts, including uncertainty of judicial processes and difficulty enforcing contractual agreements or judgments in foreign legal systems or incurring additional costs to do so. Any slowdown or perceived slowdown due to these factors could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

4. *We may be subject to fluctuations in prices or any unavailability of certain raw materials that we use in our products*

Our principal raw material is gold. Our purchase of gold represents the largest component of our expenses, and fluctuations in the price of gold can have an effect on our business, results of operations and financial condition. We also use raw materials gold, silver and other raw materials, including various alloys to create our jewellery, which are also subject to price fluctuations. Gold prices may be affected by domestic factors as well as global factors such as

industrial and jewellery demand, lending, sales and purchases of gold by government agencies, central banks, and other factors including multilateral institutions, mining, production, rate of inflation, global currency exchange rates, interest and lending rates, economic condition, political condition, change in law, etc that hold gold and other proprietary trading, and the sales of recycled gold, levels of gold production, production costs and disruptions in major gold-producing nations. Gold prices may also be affected by factors resulting from how the gold markets are structured, such as non-concurrent trading hours of gold markets and, at times, rapid short-term changes in supply and demand because of speculative trading activities. Other economic factors affecting the price of gold include the structure of, and confidence in, the global monetary system, expectations of the rate of inflation, the relative strength of, and confidence in, the U.S. dollar (the currency in which the price of gold is generally quoted), interest rates, gold borrowing and lending rates, and global or regional economic, political, regulatory, judicial or other events as well as wars and political and other upheavals. In our experience, volatility in the price of gold could have a negative effect on customer demand for gold jewellery in the short-term. While a significant percentage of our raw materials are commodities, attainable through a variety of sources, if the availability of, our access to, or the cost of purchasing certain quality raw materials that we require for our products is adversely affected (for example, due to a decrease in the number of suppliers of such materials, or a reduction in the overall availability of such materials, whether due to a lack of supply, the loss of a supply contract, increased demand from our competitors or fluctuations in world market prices), we may have to pay more for, or be unable to acquire, these raw materials. Furthermore, our arrangements with our suppliers of raw materials do not provide for minimum guarantees of supply. Any adverse changes in the supply of raw materials required for our products, may require us to increase prices or stop producing certain products and could materially adversely impact our business, results of operations and financial condition. At present we do not have any specific hedging policies for our gold inventory to protect us from price fluctuations and there can be no assurance that nonexistence of any hedging strategy will adequately protect our results of operations from the effects of fluctuations in the prices of gold either in the short or long-term. Unavailability of the raw materials we require or an increase in the prices of such raw materials together with an inability to transfer such increased costs to our end-consumers may have a material adverse effect on our business, results of operations and financial condition.

5. *Changing regulations in India could lead to new compliance requirements that are uncertain*

The regulatory environment in which we operate is evolving and is subject to change. The GoI may implement new laws or other regulations that could affect the jewellery industry, which could lead to new compliance requirements. New compliance requirements could increase our costs or otherwise adversely affect our business, financial condition and results of operations. Further, the manner in which new requirements will be enforced or interpreted can lead to uncertainty in our operations and could adversely affect our operations. For instance, the RBI has permitted nominated banks to import gold for purposes of extending gold metal loans to domestic jewellery manufacturers subject to certain conditions, including that the tenor of the gold loans (which can be decided by the nominated banks) does not exceed one hundred eighty (180) days from the date of procurement of gold and the interest charged to the borrowers is linked to the international gold rates. Accordingly, any adverse regulatory change in this regard could lead to fluctuation of prices of raw materials and thereby increase our operational cost. The Taxation Laws (Amendment) Act, 2019, also prescribes certain changes to the income tax rate applicable to companies in India. According to this Act, companies can henceforth voluntarily opt in favour of a concessional tax regime (subject to no other special benefits/exemptions being claimed), which would ultimately reduce the effective tax rate (on gross basis) for Indian companies from 34.94% to approximately 25.17%. Any such future amendments may affect our ability to claim exemptions that we have historically benefited from, and such exemptions may no longer be available to us. Any adverse order passed by the appellate authorities/ tribunals/ courts would have an effect on our profitability. Due to COVID -19 pandemic, the GoI had also passed the Taxation and Other Laws (Relaxation of Certain Provisions) Act, 2020, implementing relaxations from certain requirements under, amongst others, the Central Goods and Service Tax Act, 2017 and Customs Tariff Act, 1975. In addition, we are subject to tax related inquiries and claims. We may be particularly affected by claims from tax authorities on account of income tax assessment and GST that combines taxes and levies by the central and state governments into one unified rate of interest with effect from July 1, 2017. For example, as of July 1, 2017, a national GST, in India replaced taxes levied by central and state governments with a unified tax regime in respect of the supply of goods and services for all of India, which resulted in changes to India's jewellery industry. Currently, the GST rate for jewellery is 3%, but it could be subject to change going forward. Any such changes to the GST rate or rules and regulations surrounding GST and the related uncertainties with respect to the implementation of GST may have a material adverse effect on our business, financial condition and results of operations. Further, as GST is implemented, there can be no assurance that we will not be required to comply with additional procedures or obtain additional approvals and licenses from the government and other regulatory bodies or that they will not impose onerous requirements and conditions on our operations. With the implementation of GST, we are obligated to pass on any benefits accruing to us as result of the transition to GST to the consumer thereby limiting our benefits. In order for us to utilise input credit under GST, the entire value chain has to be GST compliant, including us. While we are and will continue to adhere to the GST rules and regulations, there can be no assurance that our suppliers and dealers will do so. Any such failure may result in increased cost on account of non-compliance with the GST and may adversely affect

our business and results of operations. We may incur increased costs relating to compliance with such new requirements, which may also require management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future. The GoI has passed new laws relating to social security, occupational safety, industrial relations and wages namely, the Code on Social Security, 2020, the Occupational Safety, Health and Working Conditions Code, 2020, the Industrial Relations Code, 2020 and the Code on Wages, 2019, respectively which were to take effect from April 1, 2021 (collectively, the “**Labour Codes**”). The GoI has deferred the effective date of the Labour Codes and they shall come into force from such date as may be notified by the Government. Further, the Code on Social Security, 2020 (“**Social Security Code**”) will impact overall employee expenses and, in turn, could impact the profitability of Our Company. Under the Social Security Code, a new concept of deemed remuneration has been introduced, such that where an employee receives more than half (or such other percentage as may be notified by the Central Government), of their total remuneration in the form of allowances and other amounts that are not included within the definition of wages under the Social Security Code, the excess amount received shall be deemed as remuneration and accordingly be added to wages for the purposes of the Social Security Code and the compulsory contribution to be made towards the employees’ provident fund. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

6. *A downgrade in ratings of India, may affect the trading price of the Equity Shares.*

Our borrowing costs and our access to the debt capital markets depend significantly on the credit ratings of India. Any further adverse revisions to India’s credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing and the interest rates and other commercial terms at which such financing is available, including raising any overseas additional financing. A downgrading of India’s credit ratings may occur, for example, upon a change of government tax or fiscal policy, which are outside our control. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of the Equity Shares.

7. *Financial difficulty and other problems in certain long-term lending institutions and investment institutions in India could have a negative impact on our business.*

We are exposed to the risks of the Indian financial system which may be affected by the financial difficulties faced by certain Indian financial institutions because the commercial soundness of many financial institutions may be closely related as a result of credit, trading, clearing or other relationships. This risk, which is referred to as “systemic risk,” may adversely affect financial intermediaries, such as clearing agencies, banks, securities firms and exchanges with whom we interact on a daily basis. Our transactions with these financial institutions expose us to credit risk in the event of default by the counter party, which can be exacerbated during periods of market illiquidity. As the Indian financial system operates within an emerging market, we face risks of a nature and extent not typically faced in more developed economies, including the risk of deposit runs notwithstanding the existence of a national deposit insurance scheme. The problems faced by individual Indian financial institutions and any instability in or difficulties faced by the Indian financial system generally could create adverse market perception about Indian financial institutions and banks. This in turn could adversely affect our business, financial condition, results of operations and cash flows.

8. *If inflation rises in India, increased costs may result in a decline in profits. Inflation rates in India have been volatile in recent years, and such volatility may continue.*

India has experienced high inflation in the recent past. Increasing inflation in India could cause a rise in the costs of rent, wages, raw materials and other expenses. High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to adequately pass on to our clients, whether entirely or in part, and may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase the price of our products to pass the increase in costs on to our clients. Additionally, if we are unable to increase our revenues sufficiently to offset our increased costs due to inflation, it could have an adverse effect on our business, prospects, financial condition, results of operations and cash flows. Further, the GoI has previously initiated economic measures to combat high inflation

rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

9. *Investors may have difficulty in enforcing foreign judgments against Our Company or our management*

Our Company is a company incorporated under the laws of India. All Directors on the Board of Directors of Our Company and our employees are residents of India and substantial portion of our assets and such persons are located in India. As a result, it may not be possible for prospective investors outside India to effect service of process upon Our Company or such persons in jurisdictions outside India, or to enforce judgments obtained against such parties outside India. Furthermore, it is unlikely that a court in India would award damages on the same basis as a foreign court if an action were brought in India or would enforce foreign judgments if that court was of the view that the number of damages awarded was excessive or inconsistent with public policy, or if judgments are in breach or contrary to Indian law. In addition, a party seeking to enforce a foreign judgment in India is required to obtain approval from the RBI to execute such a judgment or to repatriate outside India any amounts recovered. Further, any judgment or award denominated in a foreign currency would be converted into Indian Rupees on the date of such judgment or award and not on the date of payment. Recognition and enforcement of foreign judgments is provided for under Section 13 and Section 44A of the Code of Civil Procedure, 1908 (“CPC”). Section 13 of the Civil Procedure Code provides that a foreign judgment shall be conclusive regarding any matter directly adjudicated upon between the same parties or parties litigating under the same title, except (a) where the judgment has not been pronounced by a court of competent jurisdiction; (b) where the judgment has not been given on the merits of the case; (c) where it appears on the face of the proceedings that the judgment is founded on an incorrect view of international law or a refusal to recognize the law of India in cases in which such law is applicable; (d) where the proceedings in which the judgment was obtained were opposed to natural justice; (e) where the judgment has been obtained by fraud; and (f) where the judgment sustains a claim founded on a breach of any law then in force in India. Further, India has reciprocal recognition and enforcement of judgments in civil and commercial matters with only a limited number of jurisdictions, such as the United Kingdom, United Arab Emirates, Singapore and Hong Kong. In order to be enforceable, a judgment from a jurisdiction with reciprocity must meet certain requirements established in the CPC. The CPC only permits the enforcement and execution of monetary decrees in the reciprocating jurisdiction, not being in the nature of any amounts payable in respect of taxes, other charges, fines or penalties. Judgments or decrees from jurisdictions which do not have reciprocal recognition with India, including the United States, cannot be enforced by proceedings in execution in India. Therefore, a final judgment for the payment of money rendered by any court in a non-reciprocating territory for civil liability, whether or not predicated solely upon the general laws of the non-reciprocating territory, would not be directly enforceable in India. The party in whose favour a final foreign judgment in a non-reciprocating territory is rendered may bring a fresh suit in a competent court in India based on the final judgment within three years of obtaining such final judgment.

10. *Significant differences exist between Ind AS and other accounting principles, such as Indian GAAP, IFRS and U.S. GAAP, which may be material to investors’ assessment of our financial condition.*

The financial statements included in this Prospectus have been prepared in accordance with Ind AS, restated in accordance with the requirements of Section 26 of part I of the Companies Act, 2013, the SEBI ICDR Regulations and the Guidance Note on “Reports in Company Prospectus (Revised 2019)” issued by the ICAI. Ind AS differs from accounting principles with which prospective investors may be familiar, such as Indian GAAP, IFRS and U.S. GAAP. We have not attempted to quantify the impact of US GAAP or IFRS on the financial data included in this Prospectus, nor do we provide a reconciliation of our financial statements to those of US GAAP or IFRS. US GAAP and IFRS differ in significant respects from Ind AS. Accordingly, the degree to which the Ind AS financial statements, which are restated in accordance with the SEBI ICDR Regulations included in this Prospectus, will provide meaningful information is entirely dependent on the reader’s level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Prospectus should be limited accordingly.

11. *We have not prepared, and currently do not intend to prepare, our financial statements in accordance with the International Financial Reporting Standards (“IFRS”). Our transition to IFRS reporting could have a material adverse effect on our reported results of operations or financial condition.*

Public companies in India, including us, may be required to prepare annual and interim financial statements under IFRS in accordance with the roadmap for convergence with IFRS announced by the Ministry of Corporate Affairs, Government of India through a press note dated January 22, 2010 (the “IFRS Convergence Note”). The Ministry of Corporate Affairs by a press release dated February 25, 2011 has notified that 35 Indian Accounting Standards are to be converged with IFRS. The date of implementation of such converged Indian accounting standards has not yet been determined. Our financial condition, results of operations, cash flows or changes in shareholders’ equity may appear

materially different under IFRS than under Indian GAAP or our adoption of converged Indian Accounting Standards may adversely affect our reported results of operations or financial condition. This may have a material adverse effect on the amount of income recognized during that period and in the corresponding (restated) period in the comparative Fiscal/period.

12. *Statistical, industry and external financial data in this Prospectus may be incomplete or unreliable*

We have not independently verified data obtained from industry publications and other external industry sources referred to in this Prospectus and, therefore, while we believe them to be true, we cannot assure you that they are complete or reliable. Such data may also be produced on different bases from those used in the industry publications we have referenced. Discussions of matters, therefore, relating to India, its economy and the industries in which we currently operate, are subject to the caveat that the statistical and other data upon which such discussions are based may be incomplete or unreliable.

13. *Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares.*

Under foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain restrictions), if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then a prior regulatory approval will be required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities. In addition, pursuant to the Press Note No. 3 (2020 Series), dated April 17, 2020, issued by the DPIIT, which has been incorporated as the proviso to Rule 6(a) of the FEMA Rules, investments where the beneficial owner of the Equity Shares is situated in or is a citizen of a country which shares land border with India, can only be made through the Government approval route, as prescribed in the Consolidated FDI Policy dated October 15, 2020 and the FEMA Rules. We cannot assure you that any required approval from the RBI or any other governmental agency can be obtained with or without any particular terms or conditions or at all. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly resulting in the beneficial ownership falling within the aforesaid restriction/purview, such subsequent change in the beneficial ownership will also require approval of the Government of India. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India, has also made similar amendment to the FEMA Rules. While the term “beneficial owner” is defined under the Prevention-of Money - Laundering (Maintenance of Records) Rules, 2005 and the General Financial Rules, 2017, neither the foreign direct investment policy nor the FEMA Rules provide a definition of the term “beneficial owner”. The interpretation of “beneficial owner” and enforcement of this regulatory change involves certain uncertainties, which may have an adverse effect on our ability to raise foreign capital. We cannot assure investors that any required approval from the RBI or any other governmental agency can be obtained on any particular terms or at all. For further information, see “*Restrictions on Foreign Ownership of Indian Securities*” on page 235.

14. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India’s economy and our business. Incidents such as the Mumbai terrorist attacks and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect Our Company’s business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

INDIAN ECONOMY

INTRODUCTION

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP or GDP at Current Prices in the year 2023-24 is estimated at Rs. 293.90 lakh crores (US\$ 3.52 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 269.50 lakh crores (US\$ 3.23 trillion). The growth in nominal GDP during 2023-24 is estimated at 9.1% as compared to 14.2% in 2022-23. Strong domestic demand for consumption and investment, along with Government’s continued emphasis on capital expenditure are seen as among the key driver of the GDP in the first half of FY24. During the period January-March 2024, India’s exports stood at US\$ 119.10 billion, with Engineering Goods (25.01%), Petroleum Products (17.88%) and Organic and Inorganic Chemicals (7.65%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable because of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

MARKET SIZE

Real GDP or GDP at Constant (2011-12) Prices in the year 2023-24 is estimated at Rs. 172.90 lakh crores (US\$ 2.07 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 160.71 lakh crores (US\$ 1.92 trillion). The growth in real GDP during 2023-24 is estimated at 7.6% as compared to 7.0% in 2022 23. There are 113 unicorn startups in India, with a combined valuation of over US\$ 350 billion. As many as 14 tech startups are expected to list in 2024 Fintech sector poised to generate the largest number of future unicorns in India. With India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, ‘Panchamrit’. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at US\$ 1.3 billion, 0.2% of GDP in the fourth quarter of FY23.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

ROAD AHEAD

In the second quarter of FY24, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2023. India's comparatively strong position in the external sector reflects the country's positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in 2023-24, stood 37.4% higher than the same period last year. In the budget of 2023-24, capital expenditure took lead by steeply increasing the capital expenditure outlay by 37.4 % in BE 2023-24 to Rs.10 lakh crore (US\$ 120.12 billion) over Rs. 7.28 lakh crore (US\$ 87.45 billion) in RE 2022-23. The ratio of revenue expenditure to capital outlay increased by 1.2% in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels. In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at Rs. 47,65,768 crore (US\$ 571.64 billion) of which total capital expenditure is Rs. 11,11,111 crore (US\$ 133.27 billion).

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

The improvement in availability along with the reintroduction of low-cost gold metal loans and likely stabilisation of gold prices at lower levels is also expected to drive volume growth for jewellers over the short to medium term. Functions of BIS include, inter-alia, (a) recognizing as an Indian standard, any standard established for any article or process by any other institution in India or elsewhere; (b) specifying a standard mark which shall be of such design and contain such particulars as may be prescribed to represent a particular Indian standard; and (c) conducting such inspection and taking such samples of any material or substance as may be necessary to see whether any article or process in relation to which the standard mark has been used conforms to the Indian Standard or whether the standard mark has been improperly used in relation to any article or process with or without a license. BIS is also the licensing authority for quality standards.

The foreign investment in India is governed, among others, by the Foreign Exchange Management Act, 1999, the Foreign Exchange Management (Non-debt Instruments) Rules, 2019 (“**FEMA Rules**”) and the Consolidated FDI Policy (effective from October 15, 2020) issued by the DPIIT (earlier known as the Department of Industrial Policy and Promotion (“**Consolidated FDI Policy**”), each as amended. Further, the RBI has enacted the Foreign Exchange Management (Mode of Payment and Reporting of Non-Debt Instruments) Regulations, 2019 on October 17, 2019 which regulate mode of payment and remittance of sale proceeds, among others. 100% foreign investment under the automatic route, *i.e.*, without requiring prior governmental approval, is permitted in the manufacturing sector. The Consolidated FDI Policy and the FEMA Rules prescribe *inter alia* the method of calculation of total foreign investment (*i.e.*, direct foreign investment and indirect foreign investment) in an Indian company.

Foreign Trade (Development and Regulation) Act, 1992

The Foreign Trade (Regulation and Development) Act, 1992 (“FTA”) is the main legislation concerning foreign trade in India. FTA read along with Foreign Trade (Regulation) Rules, 1993, provides for the development and regulation of foreign trade by facilitating imports into, and augmenting exports from, India and for matters connected therewith or incidental thereto. The FTA seeks to increase foreign trade by regulating imports and exports to and from India. It authorizes the government to formulate as well as announce the export and import policy and to keep amending the same on a timely basis. The government has also been given a wide power to prohibit, restrict and regulate the exports and imports in general as well as specified cases of foreign trade.

Foreign Trade Policy 2023

The foreign trade policy 2023 issued by the Ministry of Commerce and Industry, GoI includes gems and jewellery within a separate scheme for exporters of gems and jewellery. For the gems and jewellery sector, the foreign trade policy 2023 provides for broadly four schemes in relation to exports of gems and jewellery (i) advance procurement / replenishment of precious metals from nominated agencies; (ii) replenishment authorisation for gems; (iii) replenishment authorisation for consumables; and (iv) advance authorisation for precious metals.

Certain agencies have been permitted to import diamonds to their laboratories without any import duty, for the purpose of certification or grading reports, with a condition that the same should be re-exported with the certification or grading reports, as per predetermined procedure. Additionally, nominated agencies and their associates, with approval of Department of Commerce and the GJEPC, may export gold, silver or platinum jewellery and articles thereof for exhibitions abroad. Personal carriage of gold, silver or platinum jewellery, precious, semi-precious stones, beads and articles and export of branded jewellery is also permitted, subject to prescribed conditions. Personal carriage of gems and jewellery export parcels by foreign bound passenger, and import parcels by an Indian importer or foreign national may be permitted as per prescribed procedures.

Export of gold jewellery, including partly processed jewellery, whether plain or studded, and articles, containing gold of 8 carats and above up to a maximum limit of 22 carats only shall be permitted by Export Oriented Units (“EOUs”). Gems and jewellery EOUs may source gold, silver or platinum through nominated agencies on loan or outright purchase basis. Units obtaining gold, silver or platinum from nominated agencies, either on loan basis or outright purchase basis shall export gold, silver or platinum within 90 days from the date of release of such metals by the nominated agencies.

The Foreign Trade Policy 2023 shall remain to be in operation unless otherwise specified or amended.

The FTA read with the Foreign Trade Policy 2023 prohibits anybody from undertaking any import or export except under an Importer-Exporter Code number (“IEC”) granted by Directorate General of Foreign Trade (“DGFT”). Hence, every entity in India engaged in any activity involving import or export is required to obtain an IEC unless specifically exempted from doing so. IEC shall be valid until it is cancelled by the issuing authority. IEC allotted to an applicant is valid for all its branches, divisions, units and factories. Failure to obtain IEC shall attract penalty under the FTA. DGFT may impose prohibition or restriction relating to the importations or exportations of gold or silver.

Trade Marks Act, 1999

The Trade Marks Act, 1999 (“**Trade Marks Act**”) governs the statutory protection of trademarks and prevention of the use of fraudulent marks in India. Indian law permits the registration of trademarks for both goods and services. As per the provisions of the Trade Marks Act, an application for trademark registration may be made with the relevant Trade Marks Registry by any person or persons claiming to be the proprietor of a trade mark, whether individually or as joint applicants, and can be made on the basis of either actual use or intention to use a trademark in the future. Once granted, a trademark registration is valid for 10 years unless cancelled, subsequent to which, it can be renewed. If not renewed, the mark lapses and the registration is required to be restored to gain protection under the provisions of the Trade Marks Act. The Trade Marks Act prohibits registration of deceptively similar trademarks and provides for penalties for infringement, falsifying and falsely applying trademarks among others. Further, pursuant to the notification of the Trade Marks (Amendment) Act, 2010, simultaneous protection of trademark in India and other countries has been made available to owners of Indian and foreign trademarks. It also seeks to simplify the law relating to the transfer of ownership of trademarks by assignment or transmission and to bring the law in line with international practices.

The Copyright Act, 1957

The Copyright Act, 1957, along with the Copyright Rules, 2013 (“**Copyright Laws**”) governs copyright protection in India. Even while copyright registration is not a prerequisite for acquiring or enforcing a copyright in an otherwise copyrightable work, registration under the Copyright Laws acts as prima facie evidence of the particulars entered therein and helps expedite infringement proceedings and reduce delay caused due to evidentiary considerations. Upon registration, the copyright protection for a work exists for a period of 60 years following the demise of the author. Reproduction of a copyrighted work for sale or hire and issuing of copies to the public, among others, without consent of the owner of the copyright are acts which expressly amount to an infringement of copyright. The Copyright Laws prescribe a fine, imprisonment or both for violations, with enhanced penalty on second or subsequent convictions.

The Design Act provides an exclusive right to apply a design to any article in any class in which the design is registered.

ENVIRONMENTAL LEGISLATIONS

Environment (Protection) Act, 1986 (the “EP Act”), Environment Protection Rules, 1986 (the “EP Rules”) and Environmental Impact Assessment Notification, 2006 (the “EIA Notification”)

The EP Act has been enacted for the protection and improvement of the environment. EP Act empowers the government to take all measures to protect and improve the quality of environment, such as by laying down standards for emission and discharge of pollutants, providing for restrictions regarding areas where industries may operate and laying down safeguards for handling hazardous substances, amongst others. It is in the form of an umbrella legislation designed to provide a framework for Central Government to coordinate the activities of various central and state authorities established under previous laws. It is also in the form of an enabling law, which delegates wide powers to the executive to enable bureaucrats to frame necessary rules and regulations. Further, the EP Rules specifies, among other things, the standards for emission or discharge of environmental pollutants, restrictions on the location of industries and restrictions on the handling of hazardous substances in different areas. For contravention of any of the provisions of the EP Act or the rules framed thereunder, the punishment includes either imprisonment or fine or both. Additionally, under the EIA Notification and its subsequent amendments, projects are required to mandatorily obtain environmental clearance from the concerned authorities depending on the potential impact on human health and resources.

Air (Prevention and Control of Pollution) Act, 1981

Not all provisions of the Air Act apply automatically to all parts of India, and the state pollution control board must notify an area as an “air pollution control area” before the restrictions under the Air Act apply. The Air Act stipulates that no person shall, without prior written consent of the relevant state pollution control board, establish or operate

any industrial plant which emits air pollutants in an air pollution control area, as notified by the state pollution control board. Further, such an industrial plant shall not be permitted to emit air pollutants in excess of the standards laid down by the state pollution control board.

Water (Prevention and Control of Pollution) Act, 1974

The Water (Prevention and Control of Pollution) Act, 1974 (the “**Water Act**”) was enacted to control and prevent water pollution and for maintaining or restoring of wholesomeness of water in the country. The objective of this legislation is to ensure that the domestic and industrial pollutants are not discharged into rivers and lakes without adequate treatment. The reason is that such a discharge renders the water unsuitable as a source of drinking water as well as for the purposes of irrigation and support of marine life. In order to achieve its objectives, the Pollution Control Boards at Central and State levels were created to establish and enforce standards for factories discharging pollutants into water bodies. Further, any person intending to establish any industry, operation or process or any treatment and disposal system which is likely to discharge sewage or other pollution into a water body is required to obtain prior consent of the relevant state pollution control board.

Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016

The Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 (the “**Hazardous Waste Rules**”), read with the EP Act, ensure resource recovery and disposal of hazardous waste in an environmentally sound manner. A categorical list of hazardous wastes has been provided in the schedules in the Hazardous Waste Rules. The term “hazardous waste” has been defined in the Hazardous Waste Rules and any person who has, control over the affairs of the factory or the premises or any person in possession of the hazardous waste has been defined as an “occupier”. Further, the occupier has been, inter alia, made responsible for safe and environmentally sound handling of hazardous wastes generated in his establishment and shall require authorisation for generation, processing, treatment, package, storage, transportation, use, collection, destruction, conversion, offering for sale, transfer or the like of the hazardous waste from the concerned state pollution control board. The occupier, importer or exporter is liable for damages caused to the environment resulting from the improper handling and disposal of hazardous waste and must pay any financial penalty that may be levied by the respective state pollution control board.

Energy Conservation Act, 2012

The Energy Conservation Act, 2012 (the “**Energy Conservation Act**”) enables the administration to indicate standards and principles of energy efficiency to be followed by various industries in their utilization of power. Standards and measures of energy efficiency and conservation are likewise to be set for apparatuses and hardware and the development of a building. The Energy Conservation Act enables state governments to authorize its different provisions. The Act enables the administration to indicate standards and principles of energy efficiency to be followed by various industries in their utilization of power. Standards and measures of energy efficiency and conservation are likewise to be set for apparatuses and hardware and the development of a building.

Public Liability Insurance Act, 1991

The Public Liability Insurance Act, 1991 (“**PLI Act**”) imposes liability on the owner or controller of hazardous substances for any damage arising out of an accident involving such hazardous substances. A list of hazardous substances covered by the PLI Act has been enumerated by the Government by way of a notification. The owner or handler is also required to take out an insurance policy insuring against liability under the PLI Act. The rules made under the PLI Act mandate that the employer has to contribute towards the environment relief fund, a sum equal to the premium paid on the insurance policies. The amount is payable to the insurer.

In addition to the above-mentioned environmental laws, there are other environmental laws which may be applicable to our Company as per the nature of the business activities carried-out by us.

Goods and Services Tax Act, 2017

The Government of India has introduced the GST regime with effect from July 1, 2017. As per Section 8 of the CGST Act, selling gold ornaments or jewellery to the common man is a composite supply of goods and services. The gold used is considered goods and making charges or value addition is towards job work. Since the principal supply is the sale of gold, the GST rate of 3% shall be levied instead of 5% on the total value of jewellery, whether or not making charges is shown separately. A GST exemption was announced at the 31st GST Council meeting on 22 December 2018. Accordingly, GST is not charged for the supply of gold made by the notified agency to GST registered gold jewellery exporters. The move has minimised the GST burden on Indian exporters of gold jewellery and probably made Indian gold exports more competitive on the world market. The jeweller or gold merchant can claim Input Tax Credit (ITC) paid on the raw materials used, i.e., gold and other job work charges incurred. Even when the gold merchant pays tax on a reverse charge basis for supply from an unregistered job worker, he can claim the ITC on such tax.

The Customs Act, 1962 and the Customs Tariff Act, 1975

The provisions of the Customs Act, 1962 and Rules made there under are applicable at the time of import of goods into India from a place outside India or at the time of export of goods out of India to a place outside India. Any company requiring to import or export any goods is required to get itself registered under this Act and obtain an Importer Exporter Code number. The Customs Tariff Act, 1975 provides the rates at which duties of customs will be levied under the Customs Act, 1962.

Professional Tax

The professional tax slabs in India are applicable to those citizens of India who are either involved in any profession or trade. The State Government of each State is empowered with the responsibility of structuring as well as formulating the respective professional tax criteria and is also required to collect funds through professional tax. The professional taxes are charged on the incomes of individuals, profits of business or gains in vocations. The professional tax is charged as per the List II of the Constitution. Every person liable to pay tax under these Acts (other than a person earning salary or wages, in respect of whom the tax is payable by the employer), shall obtain a certificate of enrolment from the assessing authority.

An Indian company is under an obligation to undertake several compliances mentioned under the Companies Act.

The Companies Act provides for, among other things, changes to the regulatory framework governing the issue of capital by companies, corporate governance, audit procedures, corporate social responsibility, remuneration of directors, meetings of directors and shareholders, declaration of dividend, the requirements for independent directors, director’s liability, class action suits, and the inclusion of women directors on the boards of companies. The Companies Act prescribes regulatory mechanism regarding all relevant aspects including organizational, financial, and managerial aspects of companies.

The Competition Act, 2002

The Competition Act, 2002 (“**Competition Act**”) is an act to prevent practices having adverse effect on competition, to promote and sustain competition in markets, to protect interest of consumer and to ensure freedom of trade in India. The Competition Act deals with prohibition of (i) certain agreements such as anti-competitive agreements; and (ii) abuse of dominant position and regulation of combinations. Further, any combinations, such as merger, amalgamation, acquisition or similar arrangement, which meet a certain asset/turnover threshold as prescribed in the

The Consumer Protection Act, 2019

The Ministry of Consumer Affairs notified certain sections of the Consumer Protection Act, 2019 (“**COPRA**”) by way of the notification dated July 15, 2020 (with effect from July 20, 2020), including sections regulating the formation and functioning of the Consumer Protection Council at the national, state and district levels, the formation and functioning of Consumer Dispute Redressal Commissions at the national, state and district levels, mediation of consumer disputes, product liability actions and punishment for manufacturing for sale or storing, selling or distributing or importing products containing adulterants and spurious goods.

The COPRA provides a mechanism for the consumer to file a complaint against a product manufacturer, seller or service provider in cases of unfair contract or trade practices, restrictive trade practices, defected goods, goods which are hazardous or likely to be hazardous to life being sold in contravention to safety standards, deficiency in services and price charged being unlawful. It also places product liability on a manufacturer or product service provider or product seller, to compensate for any harm caused by defective product or deficiency in services. It provides for a threeter consumer grievance redressal mechanism at the national, state and district levels. Noncompliance of the orders of the redressal commissions attracts criminal penalties. The COPRA has, inter alia, also introduced a Central Consumer Protection Authority to regulate matters relating to violation of rights of consumers, unfair trade practices and false or misleading advertisements, which are prejudicial to the interests of public and consumers and promote, protect and enforce the rights of consumers. The COPRA has also brought ecommerce entities and their customers under its purview including providers of technologies or processes for enabling product sellers to engage in advertising or selling goods or services to a consumer, online market places and online auction sites.

The Consumer Protection (E-Commerce) Rules, 2020

The Ministry of Consumer Affairs issued the Consumer Protection (E-Commerce) Rules, 2020 (“**E-Commerce Rules**”) under the COPRA on July 23, 2020 which govern the online sale of goods, services, digital products by entities which own, operate or manage digital or electronic facility or platform for electronic commerce (“**E171 commerce Entities**”), all models of e-commerce (including marketplace or inventory based), and all e-commerce sellers. 1.3 Property plant and equipment

All other items of property, plant and equipment are stated at historical cost, net of accumulated depreciation and accumulated impairment losses, if any. Such historical cost includes the cost of replacing part of the property, plant and equipment and borrowing costs if the recognition criteria are met. When significant parts of the property, plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in statement of profit or loss as incurred. No decommissioning liabilities are expected or be incurred on the assets of plant and equipment. Property Plant and Equipment (PPE) are stated at cost of acquisition or construction where cost includes amount added/deducted on revaluation less accumulated depreciation / amortization and impairment loss, if any. Capital work-in-progress for production, supply of administrative purposes is carried at cost less accumulated impairment loss, if any, until construction and installation are complete, and the asset is ready for its intended use.

1.4 Depreciation:

Depreciation is provided as per WDV over the useful lives of assets, which is as stated in and in the manner specified in the Schedule II of the Companies Act 2013. Depreciation and amortization methods, useful lives and residual values are reviewed at each reporting date.

1.5 Revenue Recognition:

Ind AS 115 Revenue from contracts with customers deals with revenue recognition and establishes principles for reporting useful information to users of consolidated financial statements about the nature, amount, timing and uncertainty of revenue and cash flows arising from an entity's contracts with customers. Revenue is recognised when a customer obtains control of a promised good or service and thus has the ability to direct the use and obtain the benefits from the good or service in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods and services.

A five-step process must be applied before revenue can be recognised:

- (i) identify contracts with customers
- (ii) identify the separate performance obligation
- (iii) determine the transaction price of the contract
- (iv) allocate the transaction price to each of the separate performance obligations, and
- (v) recognise the revenue as each performance obligation is satisfied.

Revenue from the contracts with customers is recognised when control of the goods is transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods. Sales, as disclosed, are inclusive of excise but are net of trade allowances, rebates, goods and service tax, vat and amounts collected on behalf of third parties. The Company considers the terms of the contract and its customary business practices to determine the transaction price. The transaction price is the amount of consideration to which the Company expects to be entitled in exchange for transferring promised goods or services to a customer, excluding amounts collected on behalf of third parties (for example, indirect taxes). In respect of contracts with customers that contain a financing component i.e. when payment by a customer occurs significantly before performance and the fair value of goods provided to the customer at the end of the contract term exceeds the advance payments received, interest expense is recognized on recognition of a contract liability over the contract period and is presented under the head finance costs in statement of profit and loss and total transaction price including financing component is recognized when control of the goods is transferred to the customer.

Interest

Revenue is recognized on a time proportion basis taking into account the amount outstanding and the rate applicable.

1.6 Taxes on Income:

Tax expense comprises of current and deferred tax. Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.

Deferred income taxes reflect the impact of timing differences between taxable income and accounting income originating during the current year and reversal of timing differences for the earlier years. Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted at the reporting date. Deferred tax liabilities are recognized for all taxable timing differences. Deferred tax assets are recognized for deductible timing differences only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. In situations where the Company has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognized only if there is virtual certainty supported by convincing evidence that they can be realized against future taxable profits. The carrying amount of deferred tax assets are reviewed at each reporting date. The company writes-down the carrying amount of a deferred tax asset to the extent that it is no longer reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which deferred tax asset can be realized. Any such write-down is reversed to the extent that it becomes reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available.

1.7 Earnings per Share:

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. Diluted earnings per share is calculated by dividing net profit attributable to equity Shareholders (after adjustment for diluted earnings) by average number of weighted equity shares outstanding during the year.

1.8 Provisions/Contingencies:

A provision is recognized when the company has a present obligation as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Provisions are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the reporting date. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. Contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably.

You should also see the section titled “Risk Factors” beginning on page 21 of this prospectus, which discusses a number of factors and contingencies that could impact our financial condition and results of operations. The following discussion relates to our Company, unless otherwise stated, is based on restated audited financial statements.

These financial statements have been prepared in accordance with Ind GAAP, the Companies Act and the SEBI (ICDR) Regulations and restated as described in the report of our auditors dated November 08, 2024 which is included in this Prospectus under the section titled “Financial Information as Restated” beginning on page 148 of this Prospectus. BUSINESS OVERVIEW

Our Company was originally incorporated as a private limited company in the name of “Kenrik Industries Private Limited” on 28th February, 2017 under the Companies Act, 2013 vide certificate of incorporation issued by the Deputy Registrar of Companies for and on behalf of the Jurisdictional Registrar of Companies, Registrar of Companies, Central Registration Centre and since then, commenced its business in manufacturing, wholesaling and supplying of plain and studded gold Jewellery and Ornaments. Our Company is mainly focused on traditional Indian jewellery. Our products include handmade gold jewellery studded with precious and semi-precious stones such as diamond, ruby, cubic zirconia etc. Our product portfolio includes rings, earrings, armband, pendants, nose rings, bracelets, chains, necklaces, bangles, watches, luxury items and other wedding jewellery. Our products cater to the customers across high-end, mid-market and value market segments. The jewellery are made as per the specific requirements by the customer and the same are manufactured on job work basis at our manufacturing unit situated in Ahmedabad, Gujarat.

Although Our Company has several regular suppliers with whom it frequently sources its raw material from, the Company does not have any fixed supplier contracts. The primary reason for not having any long term supply contracts is the volatility in pricing of the raw material which makes it impossible to have any long term arrangement. The raw material we require is essentially gold which is a very standardised product and is widely available from a number of suppliers. Availability of raw materials is generally not a big issue in the business. Our Company maintains full flexibility in sourcing, ensuring that the Company can take advantage of competitive pricing and better-quality materials from various suppliers in the market.

Our Company operates its business in a region that is well known for its dynamic bullion and jewellery market, where numerous buyers and sellers interact, providing the Company with ample opportunities to connect with a diverse range of suppliers. This enables us to pivot quickly and choose from a broad range of vendors depending on current market conditions.

Sales team of the Company plays a vital role in driving business by engaging in direct marketing and personally visiting potential clients within the jewellery industry to showcase the products and secure its orders. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by Retail Individual Investors through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase.

Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("T+3 Notification"). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Offer shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

The processing fees for applications made by UPI Applicants using the UPI Mechanism may be released to the SCSBs only after such banks provide a written confirmation, in compliance with the SEBI RTA Master Circular in a format as prescribed by SEBI, from time to time, and such payment of processing fees to the SCSBs shall be made in compliance with circulars prescribed by SEBI and applicable law. Accordingly, the Issue will be undertaken pursuant to the processes and procedures under UPI Phase III, subject to any circulars, clarification or notification issued by the SEBI pursuant to the T+3 Notification. RESTRICTIONS OF FOREIGN OWNERSHIP OF INDIAN SECURITIES

There are two routes through which foreign investors may invest in India. One is the “automatic route”, where no government approval is required under Indian foreign exchange laws to make an investment as long as it is within prescribed thresholds for the relevant sector. The other route is the “government route”, where an approval is required under foreign exchange laws from the relevant industry regulator, prior to the investment.

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991, of the Government of India and FEMA. While the Industrial Policy, 1991, of the Government of India, prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment (“FDI”) and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as the Department of Industrial Policy and Promotion) (“DPIIT”), Ministry of Finance, Department of Economic Affairs, FIPB section, through a memorandum dated June 5, 2017, has notified the specific ministries handling relevant sectors.

The Government has, from time to time, made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated FDI Policy Circular of 2020 (“FDI Policy”) by way of circular bearing number DPIIT file number 5(2)/2020-FDI Policy dated October 15, 2020, which with effect from October 15, 2020, consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020. The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendments to FEMA. In case of any conflict between FEMA and such policy pronouncements, FEMA prevails.

RBI has also issued Master Direction- Foreign Investment in India dated January 4, 2018. In terms of the Master Direction, an Indian company may issue fresh shares to persons resident outside India (who are eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh issue of shares shall be subject to inter-alia, the pricing guidelines prescribed under the Master Directions.

The RBI, in exercise of its power under the FEMA, has also notified the Foreign Exchange Management (Transfer or Issue of Security by a Person Resident outside India) Regulations, 2017 to prohibit, restrict or regulate, transfer by or issue security to a person resident outside India.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.

The Equity Shares have not been and will not be registered under the U.S. Securities Act of 1933, as amended (the “U.S. Securities Act”), or the securities laws of any state of the United States and may not be offered or sold within the United States, except pursuant to exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, the Equity Shares are being offered and sold only outside the United States in offshore transactions in reliance on Regulation S under the U.S. Securities Act and the applicable laws of the jurisdiction where those offers, and sale occur.
