INTERNAL RISK FACTORS

1. ***Dependence on international suppliers for raw bitumen and petroleum oils could lead to supply disruptions due to geopolitical issues, trade restrictions, or logistical challenges which may affect operational performance and financial condition.***

Our operations are significantly dependent on the procurement of raw bitumen from international suppliers. This reliance exposes us to various risks that could impact our ability to secure a stable supply of bitumen. Political instability, diplomatic conflicts, or changes in international relations can disrupt the supply chain, leading to delays or interruptions in receiving raw bitumen. Tariffs, export bans, or changes in trade policies imposed by exporting or importing countries could impact the availability and cost of raw bitumen. Also, transportation delays, shipping disruptions, or port congestion can affect the timely delivery of raw bitumen to our manufacturing facilities.

Such interruptions in supply of bitumen can lead to delays in production schedules and the inability to meet market demand, impacting revenue and customer satisfaction. This could lead to inefficiencies in inventory management, production planning, and

overall operational performance. Details of value of import of raw material for last three years based on Restated Financial Statements is as follows:

(Amount in Lakhs)

Particulars	December 31, 2024		March 31, 2024		March 31, 2023		March 31, 2022

Also, variations in the quality of raw bitumen can significantly impact our operations. Inconsistent quality may adversely affect the performance of the final product, potentially resulting in deviations from required specifications and reduced product durability. This could lead to customer dissatisfaction, increased returns, and a negative impact on our reputation and customer relationships. Furthermore, variations in quality can lead to increased costs due to additional quality control measures, reprocessing requirements, or the need to source alternative materials at a premium. Production delays may also occur as adjustments are made to accommodate the inconsistencies, disrupting manufacturing schedules and timely delivery.

For Further details, please refer to chapter titled “Business Overview” beginning on Page 130 of this Prospectus.

2. Majority of our revenue comes from trading of bitumen and allied products, which exposes us to price fluctuations and supply chain disruptions, which can affect profitability and financial stability.

The majority of our revenue is derived from trading of bitumen and fuel oils, which exposes us to several vulnerabilities. Unlike manufacturing, which offers greater control over production costs and quality, trading is inherently subject to fluctuations in market prices and supply chain dynamics. As a trader, we depend on purchasing bitumen from suppliers and selling it to customers, making us vulnerable to changes in global bitumen prices, supply disruptions, and shifts in demand.

Fluctuations in market prices can lead to lower profit margins, especially if we face increased procurement costs or if market prices fall suddenly. Additionally, our trading model exposes us to risks related to inventory management and cash flow. The timing of purchases and sales can significantly impact our financial performance, with potential delays or mismatches in market timing affecting our profitability.

Moreover, relying primarily on trading limits our ability to differentiate our product offerings and adds an element of uncertainty in terms of revenue stability. Market volatility, regulatory changes, and competition can further complicate our trading operations, leading to unpredictability in revenue streams.

3. If we fail to acquire new consumers or fail to do so in a cost-effective manner, we may not be able to increase revenue or maintain profitability.

Our revenue from operations has grown from ₹8,116.33 in Financial Year 2022 to ₹70,782.29 in Financial Year 2023 and ₹66,773.77 Lakhs in Financial Year 2024. For the period ended December 2024, our revenue from operation stood at ₹61,432.51. However, we cannot assure you that our historical growth rates will be sustainable or achieved at all in the future. If we fail to acquire new consumers, or fail to do so in a cost-effective manner, we may not be able to increase our review or maintain profitability.

Maintaining and improving our marketing strategies involve expenditures which may be disproportionate to the revenue generated and customer acquired., There is risk of increased cost of acquiring new consumers through marketing efforts due to heightened competition. If consumer conversion rates are not commensurate with our expenditure, our expenditure may be disproportionate to our returns on such marketing investments.

For more details, please refer to section titled “Financial Information of our Company” beginning on Page 191 of this Prospectus.

4. Our business is subject to seasonal fluctuations, particularly during the monsoon season. The primary risk associated with this period is a potential slowdown in road construction and other construction activities, which directly impacts the demand for bitumen products.

During the monsoon season, the frequency and scope of road construction and construction activities typically decrease. A slowdown in construction activities can result in decreased sales volumes and revenue and also affect the production schedules and inventory management. This reduction in activity leads to a lower demand for bitumen, as it is a key material used in road paving and construction. Reduced revenue during the monsoon season can strain cash flow, making it challenging to manage operational expenses, pay suppliers, and invest in growth opportunities which will impact the company’s financial performance and profitability.

5. *Significant changes in crude oil prices can substantially affect bitumen costs, as bitumen is a byproduct of crude oil refining, leading to increased volatility in pricing and profitability.*

The cost of bitumen is closely linked to the price of crude oil, as bitumen is a byproduct of the crude oil refining process. Consequently, fluctuations in crude oil prices can have a profound impact on bitumen costs. When crude oil prices rise, the production cost of bitumen increases correspondingly. This surge in cost can squeeze profit margins, especially if our company is unable to transfer these increased costs to customers through higher bitumen prices. This scenario can reduce profitability and affect overall financial stability.

Such volatility in crude oil prices introduces significant uncertainty into our budgeting, forecasting, and pricing strategies. It complicates financial planning and can disrupt our ability to maintain stable profit margins, posing an ongoing risk to our financial health and operational efficiency.

For more details, please refer to section titled “Financial Information of our Company” beginning on Page 191 of this Prospectus.

6. *Underutilization of installed capacity of the company may pose a significant risk to operational efficiency and financial performance.*

The Manufacturing Units have consistently shown underutilization of its installed capacity over the past three years, posing a significant risk to operational efficiency and financial performance. This trend indicates inefficiencies in operations or a reduction in market demand, lower demand and capacity utilization during monsoon, leading to higher per-unit production costs due to fixed costs being spread over a smaller production volume. Lower capacity utilization may translate to reduced revenue and profitability, potentially leading to financial strain as the plant struggles to cover fixed costs. Additionally, the reduced production figures suggest lower market demand for Bitumen, possibly influenced by competitive pressures or market shifts or lower demand and capacity utilization during monsoon. The underutilization may also implies inefficient resource allocation, resulting in wastage and suboptimal use of raw materials, labor, and capital. Addressing this issue requires a combination of market expansion, operational improvements, and strategic partnerships to enhance capacity utilization and drive profitability.

Although, the capacity utilization is lower, however, we build our capacities keeping in mind factors such as:

(i) Ability to serve peak demand:

The road construction industry operates under strict timelines, necessitating the availability of bitumen in bulk during peak demand periods. To address these critical needs, the Company has established production capacities not only to meet average demand but also to accommodate the peak requirements of large-scale projects. Our customers often require significant quantities of bitumen during peak periods. Considering the nature of the product, even after manufacturing, bitumen requires a certain temperature to be in good and usable quality, this involves a significant cost for storage and heating.

(ii) Optimized Capacity for Future Demand:

Our capacity is built based on anticipated peak demand, this approach allow us to be ready for future growth. While high utilization rates of lower capacity plants may seem efficient, they limit the ability to cater to large orders and timely deliveries, and may potentially lead to lower business.

(iii) Logistics Challenges:

The transportation and distribution of bituminous products are economically viable only within limited geographic areas due to factors like transportation time, the need for specialized heated tankers to maintain the required temperature, and the cost and complexity of logistics. Our Company has established manufacturing units at multiple locations, so as to serve regional markets effectively.

(iv) Positioning in the market:

Our capacity strengthens, our position as a reliable supplier to meet large quantities orders on time. The customers are likely to place orders with single supplier for entire road project, so as to maintain desired quality of the road, hence, they prefer suppliers who can serve large orders in desired time even for peak demands.

Breakdowns or malfunctions in any of these essential machines can significantly disrupt our production operations. Such equipment failures can lead to production delays, impacting our ability to meet delivery schedules and customer demands. Additionally, the need for unexpected repairs or replacements can result in increased maintenance costs and operational inefficiencies. Extended downtime or frequent malfunctions may not only affect our financial performance but also affect our reputation for reliability and consistency. These equipment failures not only disrupt production but also incur substantial costs. The cumulative effect of such disruptions includes not only direct financial costs but also potential damage to our market reputation for reliability and product quality.

12. We require certain approvals and licenses in the ordinary course of business and the failure to successfully obtain such registrations would adversely affect our operations, results of operations and financial condition.

We are governed by various laws and regulations for our business and operations. We are required, and will continue to be required, to obtain and hold relevant licenses, approvals and permits at state and central government levels for doing our business. The approvals, licenses, registrations and permits obtained by us may contain conditions. Further we will need to apply for renewal of certain approvals, licenses, registrations and permits, which expire or need to update pursuant to change in name and conversion of company to public Company.

While we have obtained a significant number of approvals, licenses, registrations and permits from the relevant authorities, there can be no assurance that the relevant authority will issue or renew expired approvals within the applicable time period or at all. Any delay in receipt or non-receipt of such approvals, licenses, registrations and permits could result in cost and time overrun or which could affect our related operations.

These laws and regulations governing us are increasingly becoming stringent and may in the future create substantial compliance or liabilities and costs. While we endeavor to comply with applicable regulatory requirements, it is possible that such compliance measures may restrict our business and operations, result in increased cost and onerous compliance measures, and an inability to comply with such regulatory requirements may attract penalty. For further details regarding the material approvals, licenses, registrations and permits, see “Government and Other Approvals” on page 216 of this Prospectus.

Furthermore, we cannot assure you that the approvals, licenses, registrations and permits issued to us will not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Any suspension or revocation of any of the approvals, licenses, registrations and permits that has been or may be issued to us may affect our business and results of operations.

13. We are Exposed to Risks from Labour Shortages, Strikes, and Wage Demands that Could Affect Our Cash Flows and Operational Performance

We are dependent on a stable and adequate workforce for our manpower-intensive operations. The availability of our permanent employees and a sufficient supply of labourers at our factories is crucial to maintaining smooth operations. Any disruptions such as labour shortages, strikes, work stoppages, increased wage demands, or changes in labour regulations could negatively impact our cash flows and operational results.

Our business is subject to various laws and regulations concerning employee welfare, including minimum wage requirements, working conditions, employee insurance, and other benefits. Changes in these regulations, such as increases in wage mandates by state governments or new requirements for working hours and facilities, could impose additional costs and affect our financial performance.

Additionally, disruptions due to labour disputes, strikes, or work stoppages could significantly impact our manufacturing processes. Such events may lead to interruptions in production, affecting both our cash flows and overall business performance.

For details regarding business refer the Section titled “Business Overview” beginning on page no. 130 of this Prospectus.

14. Failure in maintaining optimal temperatures in heating systems or storage tanks can lead to product quality issues or loss of material.

Maintaining optimal temperatures in our heating systems and storage tanks is crucial for ensuring the quality and integrity of the bitumen we produce. These systems are designed to keep bitumen at precise temperatures required for effective processing and storage. Any failure to regulate these temperatures correctly can lead to significant risks. For instance, if heating systems do not reach or maintain the required temperatures, bitumen may not melt properly, leading to inconsistent processing and potential product defects. Similarly, if storage tanks are unable to keep the bitumen at a stable, high temperature, the material can begin to solidify or degrade, which compromises its quality and usability.

Such temperature control failures can result in several adverse outcomes. Product quality issues may arise, leading to non-compliance with specifications and customer dissatisfaction. This can result in returns, reputational damage, and loss of business. Additionally, the loss of material due to improper temperature maintenance not only impacts production efficiency but also leads to financial losses from wasted or degraded product.

For details regarding business refer the Section titled “Business Overview” beginning on page no. 130 of this Prospectus

15. We are exposed to environmental risks in production which include emissions, waste management challenges, and potential contamination that can lead to regulatory penalties, environmental harm, and increased operational costs if not properly managed.

Bitumen emulsion production involves processes that can have significant environmental impacts, including emissions, waste management challenges, and potential contamination. The production generate various emissions, such as volatile organic compounds (VOCs) and particulate matter, which can contribute to air pollution and affect local air quality. Managing these emissions is critical to comply with environmental regulations and minimize adverse health effects on nearby communities. Additionally, the handling and disposal of waste products, including residual bitumen and chemical by-products, pose risks related to proper waste management. Improper disposal or accidental spills can lead to soil and water contamination, potentially harming local ecosystems and wildlife.

These environmental risks can result in regulatory scrutiny, potential fines, and increased operational costs associated with compliance and remediation efforts. Furthermore, failure to manage environmental impacts effectively can damage our reputation and lead to public relations challenges, affecting stakeholder trust and customer relationships.

This dynamic environment requires us to continuously innovate and improve our product offerings to retain our market position and ensure sustained growth. Moreover, the unorganized sector offers their products at highly competitive prices which may not be matched by us and consequently affect our volume of sales and growth prospects. Handling hot bitumen and chemicals involves substantial risks, which can have far-reaching consequences for both employees and the organization. The bitumen production process operates at high temperatures, significantly increasing the risk of burns and heat-related injuries. Employees working with hot bitumen are exposed to the potential for severe burns, heat stress, and other heat-related health issues, which can result in considerable medical treatment and recovery time. Similarly, the chemicals used in bitumen modification present their own set of hazards. These chemicals may cause chemical burns, respiratory problems, or long-term health issues such as chronic respiratory conditions or skin disorders from prolonged exposure. Our Company has not experienced any such accidents or injuries in the past. In addition, we have maintained group accident guard policy cover for our employees to secure any accidents and injuries.

The impact of these health risks extends beyond the immediate well-being of employees. If workplace safety standards are not strictly followed, the organization may face increased medical costs due to treating injuries and illnesses. Moreover, non-compliance with safety regulations can lead to legal liabilities, including fines and lawsuits, further compounding financial burdens. Given our high volume of transactions, errors may be repeated or compounded before they are discovered and rectified. Our management information systems and internal control procedures may not be able to identify non-compliance or suspicious transactions in a timely manner, or at all. Where internal control weaknesses are identified, our actions may not be sufficient to fully correct such weaknesses. 40. *Our business is substantially affected by prevailing economic, political and other prevailing conditions in India.*

Our Company is incorporated in India, and our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian consumers and Indian corporations; budgetary allocation by the Governments in infrastructure projects
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- occurrence of natural or man-made disasters
- prevailing regional or global economic conditions, including in India's principal export markets; and
- Other significant regulatory or economic developments in or affecting India or its petrochemical industry.

Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely impact our business, results of operations and financial condition and the price of the Equity Shares.

41. *The future operating results are difficult to predict and may fluctuate or adversely vary from the past performance.*

The company's operating results may fluctuate or adversely vary from past performances in the future due to a number of factors, many of which are beyond the company's control. The results of operations during any financial year or from period to period may differ from one another or from the expected results operation. Its business, results of operations and financial condition may be adversely affected by, inter alia, a decrease in the growth and demand for the products and services offered by the us or any

strategic alliances which may subsequently become a liability or non-profitable. Due to various reasons including the above, the future performance may fluctuate or adversely vary from our past performances and may not be predictable. For further details of our operating results, section titled “Financial Information of our Company” beginning on Page 191 of this Prospectus.

42. *We have not independently verified certain data in this Prospectus.*

We have not independently verified data from the Industry and related data contained in this Prospectus and although we believe the sources mentioned in the report to be reliable, we cannot assure you that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regards to other countries. Therefore, discussions of matters relating to India, its economy or the industries in which we operate that is included herein are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete, inaccurate or unreliable. Due to incorrect or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

43. *We are susceptible to risks relating to unionization of our workers employed by us.*

None of our workers are currently represented by a recognized collective bargaining agreement. We cannot assure you that our workers will not unionize, or attempt to unionize in the future, that they will not otherwise seek higher wages and enhanced employee benefits. We also cannot assure you that we will not experience disruptions in our work due to disputes or other problems with our workforce. If not resolved in a timely manner, these risks could limit our ability to provide our products to our clients, cause clients to limit their use of our products or result in an increase in our cost of employee benefits and other expenses. If any of these risks materialize, our business, results of operations and financial condition could be affected.

44. *Any Penalty or demand raise by statutory authorities in future will affect our financial position of the Company.*

Our company, operating in the petrochemical and bitumen industry, is subject to tax liabilities including Income Tax, Goods and Services Tax (GST), and other relevant statutory provisions. We have also received notices in the past related to these tax liabilities, although we have been consistently filing returns under these applicable acts. Further except as disclosed under tax litigation in chapter titled “Outstanding Litigations and Material Development” beginning on page 206, there is no other demand and penalty is raised by statutory authorities in past. But any future demands or penalties raised by the concerned authorities for previous or current years could adversely impact our financial position. Such tax-related issues may strain our financial resources and affect our overall business stability.

For detail, please refer “Outstanding Litigations and Material Development” beginning on page 206 of this Prospectus. Any such penalty arising in future may lead to financial loss to our Company.

45. *We have not identified any alternate source of raising the capital expenditure and working capital mentioned as our ‘Objects of the Issue’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

Our Company has not identified any alternate source of funding for capital expenditure and working capital requirement and for general corporate purposes and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds can adversely affect our growth plan and profitability. The delay/shortfall in receiving these proceeds could result in inadequacy of working capital or may require our Company to borrow funds on unfavorable terms, both of which scenarios may affect the business operation and financial performance of the Company.

For further details of our Object for the Issue, please refer chapter titled “Object for the Issue” beginning on Page 91 of this Prospectus.

46. *Any increase in or occurrence of our contingent liabilities and commitments may adversely affect our financial condition.*

As of December 31, 2024 our contingent liabilities as indicated in our restated statements are as follows:

Particulars	Amount (Rs. In Lakhs) as on December 31, 2024
Contingent Liabilities – Indirect tax Demands	20.71

Any increase in our contingent liabilities or occurrence of these liabilities may materially and adversely affect our financial position, results of operations and cash flows. For further details of our contingent liabilities, Please refer to section titled “Financial

Information of our Company” beginning on Page 191 of this Prospectus.

47. Portion of our Issue Proceeds are proposed to be utilized for general corporate purposes which constitute 12.85% of the Issue Proceed. As on date we have not identified the use of such funds.

Portion of our Issue Proceeds are proposed to be utilized for general corporate purposes which constitute 12.85% of the Issue Proceed. We have not identified the general corporate purposes for which these funds may be utilized. The deployment of such funds is entirely at the discretion of our management in accordance with policies established by our Board of Directors from time to time and subject to compliance with the necessary provisions of the Companies Act. For details please refer the chapter titled “Objects of the Issue” beginning on Page No. 91 of this Prospectus.

48. We have in the last 12 months issued Equity Shares at a price that may be at lower than the Issue Price.

In the last 12 months we may have issued fresh Equity Shares to the promoter and other shareholders of our Company which are as follows:-

- Bonus issue in the ratio of 1500:1 dated July 26, 2024 issuing 1,50,00,000 Equity shares face value ₹10/- per Equity Share for consideration other than cash.
- Private Placement of 16,43,500 Equity Shares of Face Value of Rs. 10/- each fully paid at an Issue price of Rs. 60/- per equity share dated August 09, 2024.

The Equity Shares allotted to investors pursuant to this Issue is being priced significantly higher due to various reasons including better performance by the Company, better economic conditions and passage of time.

For Further details of equity shares issued, please refer to the chapter titled “Capital Structure” beginning on page 71 of the Prospectus.

49. The average cost of acquisition of Equity Shares by our Promoter could be lower than the Issue Price.

Our Promoter average cost of acquisition of Equity Shares in our Company is lower than the Issue Price decided by the Company in consultation with the Book Running Lead Manager. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoter in our Company, please refer to the chapters “Capital Structure” beginning on page 71 of this Prospectus.

50. We will continue to be controlled by our Promoter and Promoter Group after the completion of the Issue, which will allow them to influence the outcome of matters submitted for approval of our shareholders.

As on the date of this Prospectus, our Promoter and Promoter Group hold 94.30% of the issued and outstanding paid-up share capital of our Company. Following the completion of the Issue, our Promoter and Promoter Group will continue to hold together 69.33% of our post-Issue Equity Share capital. As a result, they will have the ability to influence matters requiring shareholders’ approval, including the ability to appoint Directors to our Board and the right to approve significant actions at Board and at shareholders’ meetings, including the issue of Equity Shares and dividend payments, business plans, mergers and acquisitions, any consolidation or joint venture arrangements, any amendment to our Memorandum of Association and Articles of Association, and any other business decisions. We cannot assure you that our Promoters and Promoter Group will not have conflicts of interest with other shareholders or with our Company. Any such conflict may adversely affect our ability to execute our business strategy or to operate our business.

For further details regarding our shareholding, please refer to chapter titled “Capital Structure” beginning on Page 71 of this Prospectus.

51. Our Equity Shares have never been publicly traded and may experience price and volume fluctuations following the completion of the Issue, an active trading market for the Equity Shares may not develop, the price of our Equity Shares may be volatile and you may be unable to resell your Equity Shares at or above the Issue Price or at all.

Prior to the Issue, there has been no public market for our Equity Shares, and an active trading market may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for our Equity Shares will develop or, if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is determined considering various financials factors of the Company and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. There has been significant volatility in the Indian stock markets in the recent past, and the trading price of our Equity Shares after this Issue could fluctuate significantly as a result of market volatility or due to

various internal or external risks, including but not limited to those described in this Prospectus. A decrease in the market price of our Equity Shares could cause you to lose some or all of your investment.

52. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities may differ from those that would apply to a company in another jurisdiction. Investors may have more difficulty in asserting their rights as shareholders in an Indian company than as shareholder of a corporation in another jurisdiction. Shareholders' rights under Indian law may not be as extensive as shareholders' rights under the laws of other jurisdictions. Under the Companies Act, prior to issuance of any new equity shares, a public limited company incorporated under Indian law must offer its equity shareholders pre-emptive rights to subscribe to a proportionate number of equity shares to maintain existing ownership, unless such pre-emptive rights are waived by a special resolution by a three-fourths majority of the equity shareholders voting on such resolution. If you are a foreign investor and the law of the foreign jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such foreign jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. If we elect not to file an offering document or a registration statement, the new securities may be issued to a custodian, who may sell the securities for your benefit. The value such custodian receives on the sale of any such securities and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, your proportional interest in our Company would decline.

53. The Issue Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.

The Issue Price of our Equity Shares has been determined through the Book building process. This price is based on numerous factors. For further information, see "Basis for Issue Price" beginning on page 102 of this Prospectus and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price are:

- Quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

54. A third party could be prevented from acquiring control of our Company because of anti-takeover provisions under Indian law.

There are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company, even if a change in control would result in the purchase of your Equity Shares at a premium to the market price or would otherwise be beneficial to you. Such provisions may discourage or prevent certain types of transactions involving actual or threatened change in control of us. Under the takeover regulations in India, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to its stakeholders, it is possible that such a takeover would not be attempted or consummated because of the Indian takeover regulations.

55. The requirements of being a listed company may strain our resources and distract management.

We have no experience as a listed company and have not been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public that is associated with being a listed company. As a listed company, we will incur additional legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing agreements with the Stock Exchanges and compliances of SEBI Listing Regulation, 2015 which would require us to file audited annual and unaudited semi-annual and limited review reports with respect to our business and financial condition. If we delay making such filings, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as timely as other listed companies.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures, internal control over financial reporting and additional compliance requirements under the Companies Act, 2013. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management's attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner.

56. We may require further equity issuance, which will lead to dilution of equity and may affect the market price of our Equity Shares or additional funds through incurring debt to satisfy our capital needs, which we may not be able to procure and any future equity offerings by us.

Our growth is dependent on having a balance sheet to support our activities. In addition to the IPO Proceeds and our internally generated cash flow, we may need other sources of financing to meet our capital needs which may include entering into new debt facilities with lending institutions or raising additional equity in the capital markets. We may need to raise additional capital from time to time, dependent on business conditions. The factors that would require us to raise additional capital could be business growth beyond what the current balance sheet can sustain; additional capital requirements imposed due to changes in regulatory regime or significant depletion in our existing capital base due to unusual operating losses. Any fresh issue of shares or convertible securities would dilute existing holders, and such issuance may not be done at terms and conditions, which are favourable to the existing shareholders of our Company. If our Company decides to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. Such financings could cause our debt to equity ratio to increase or require us to create charges or liens on our assets in favour of lenders. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be affected if we are unable to implement our expansion strategy.

Any future issuance of Equity Shares by our Company may dilute shareholding of investors in our Company; and hence affect the trading price of our Company's Equity Shares and its ability to raise capital through an issue of its securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Company's Equity Shares. Additionally, the disposal, pledge or encumbrance of Equity Shares by any of our Company's major shareholders, or the perception that such transactions may occur may affect the trading price of the Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

57. Our insurance may not be adequate to protect us against all potential losses to which we may be subject.

We maintain comprehensive insurance coverage for the majority of our projects, including coverage for the stock of bitumen, oil, plant machinery, and other assets. This insurance extends to risks such as damage caused by severe weather conditions, floods, fires, earthquakes, burglary, and vehicle-related incidents, as well as third-party liabilities. However, not all risks we face are fully insurable, and the coverage we maintain, while customary for the petrochemical and bitumen industries, may not always be adequate to cover all potential losses. Our insurance policies are subject to limitations, deductibles, exclusions, and may not cover the full extent of losses incurred.

Further, we cannot guarantee that claims under our policies, such as those related to fire, marine, or accident coverage, will be settled in full or on time by the insurers. Any delay in claims settlement could affect our operations and financial stability. In the event of a loss exceeding our insured limits, or where a risk is not covered, we may face significant financial strain due to the loss of investment, increased working capital requirements, or project disruptions.

For further details on our insurance arrangements, please refer to the chapter titled "Business Overview – Insurance" beginning on page 130 Outstanding Litigations and Material Developments of this Prospectus.

EXTERNAL RISK FACTORS

58. *The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.*

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war in India or globally may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

59. *Our business and activities may be further regulated by the Competition Act and any adverse application or interpretation of the Competition Act could materially and adversely affect our business, financial condition and results of operations.*

The Competition Act seeks to prevent business practices that have or are likely to have an appreciable adverse effect on competition in India and has established the Competition Commission of India (the “CCI”). Under the Competition Act, any arrangement, understanding or action, whether formal or informal, which has or is likely to have an appreciable adverse effect on competition is void and attracts substantial penalties. Any agreement among competitors which, directly or indirectly, determines purchase or sale prices, results in bid rigging or collusive bidding, limits or controls the production, supply or distribution of goods and services, or shares the market or source of production or providing of services by way of allocation of geographical area or type of goods or services or number of customers in the relevant market or in any other similar way, is presumed to have an appreciable adverse effect on competition and shall be void.

Further, the Competition Act prohibits the abuse of a dominant position by any enterprise. If it is proven that a breach of the Competition Act committed by a company took place with the consent or connivance or is attributable to any neglect on the part of, any director, manager, secretary or other officer of such company, that person shall be guilty of the breach themselves and may be punished as an individual. If we, or any of our employees are penalized under the Competition Act, our business may be adversely affected. Further, the Competition Act also regulates combinations and requires approval of the CCI for effecting any acquisition of shares, voting rights, assets or control or mergers or amalgamations above the prescribed asset and turnover based thresholds.

On March 4, 2011, the Government of India notified and brought into force new provisions under the Competition Act in relation to combined entities (the “Combination Regulation Provisions”), which came into effect from June 1, 2011. The Combination Regulation Provisions require that any acquisition of shares, voting rights, assets or control or mergers or amalgamations, which cross the prescribed asset and turnover based thresholds, must be notified to and preapproved by the CCI. In addition, on May 11, 2011, the CCI issued the final Competition Commission of India (Procedure in regard to the transaction of business relating to combinations) Regulations, 2011 (as amended). These regulations, as amended, set out the mechanism for the implementation of the Combination Regulation Provisions under the Competition Act.

60. *The Indian tax regime is currently undergoing substantial changes which could adversely affect our business.*

The goods and service tax (“GST”) that has been implemented with effect from July 1, 2017 combines taxes and levies by the GoI and state governments into a unified rate structure, and replaces indirect taxes on goods and services such as central excise duty, service tax, customs duty, central sales tax, state VAT, cess and surcharge and excise that were being collected by the GoI and state governments.

As regards the General Anti-Avoidance Rules (“GAAR”), The general anti avoidance rules (“GAAR”) provisions have been made effective from assessment year 2018-19 onwards, i.e.; financial Year 2017-18. The GAAR provisions intend to declare an arrangement as an “impermissible avoidance arrangement”, if the main purpose or one of the main purposes of such arrangement is to obtain a tax benefit, and satisfies at least one of the following tests (i) creates rights, or obligations, which are not ordinarily created between persons dealing at arm’s length; (ii) results, directly or indirectly, in misuse, or abuse, of the provisions of the Income Tax Act, 1961; (iii) lacks commercial substance or is deemed to lack commercial substance, in whole or in part; or (iv) is entered into, or carried out, by means, or in a manner, that is not ordinarily engaged for bona fide purposes. If GAAR provisions are invoked, the tax authorities will have wider powers, including denial of tax benefit or a benefit under a tax treaty. In the absence of any precedents on the subject, the application of these provisions is uncertain. As the taxation regime in India is undergoing a

significant overhaul, its consequent effects on economy cannot be determined at present and there can be no assurance that such effects would not adversely affect our business, future financial performance and the trading price of the Equity Shares.

61. You may be restricted in your ability to exercise pre-emptive rights under Indian law and may be adversely affected by future dilution of your ownership position.

Under the Companies Act, a company incorporated in India must offer its shareholders pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages before the issuance of any new shares, unless the pre-emptive rights have been waived by adoption of a special resolution by holders of three-fourths of the shares who have voted on the resolution, or unless the company has obtained approval from the Government of India to issue without such special resolution, subject to votes being cast in favour of the proposal exceeding the votes cast against such proposal. However, if the law of the jurisdiction you are in does not permit you to exercise your pre-emptive rights without our Company filing an offering document or a registration statement with the applicable authority in the jurisdiction you are in, you will be unable to exercise your pre-emptive rights unless our Company makes such a filing. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interest in our Company would be reduced.

62. Political, economic or other factors that are beyond our control may have an adverse effect on our business, results of operations and cash flows.

We currently operate only in India and are dependent on domestic, regional and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent on the Textile & Apparel industry of the Indian economy. There have been periods of slowdown in the economic growth of India. For instance, the present situation of lock-down is prevailing in India due to pandemic Covid-19 spread in India and all other parts of world. If such condition prevail for longer time the Demand for our products & services may be adversely affected by an economic downturn in domestic, regional and global economies. India's economic growth is also affected by various other factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates. Consequently, any future slowdown in the Indian economy could harm our business, results of operations, cash flows and financial condition. Also, a change in the Government or a change in the economic and deregulation policies could affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

63. Companies in India are required to prepare financial statements under the new Indian Accounting Standards. In addition, all income-tax assessee in India will be required to follow the Income Computation and Disclosure Standards.

The Ministry of Corporate Affairs ("MCA"), Government of India, has through notification dated February 16, 2015 issued the Indian Accounting Standards Rules, 2015 ("Ind AS") which have come into effect from April 1, 2015 and are applicable to companies which fulfill certain conditions. Further, there can be no assurance that the adoption of Ind AS will not affect our reported results of operations or financial condition. Any of these factors relating to the use of Ind AS may adversely affect our financial condition and results of operations.

Further, the Ministry of Finance, Government of India has issued a notification dated September 29, 2016 notifying Income Computation and Disclosure Standards ("ICDS"), thereby creating a new framework for computation of taxable income. The ICDS shall apply from the assessment year 2017-2018 and subsequent years. The adoption of ICDS is expected to significantly alter the way companies compute their taxable income, as ICDS deviates from several concepts that are followed under general accounting standards, including Indian GAAP and Ind AS. In addition, ICDS shall be applicable for the computation of income for tax purposes but shall not be applicable for the computation of income for minimum alternate tax. There can be no assurance that the adoption of ICDS will not adversely affect our business, results of operations and financial condition.

64. Our business is substantially affected by prevailing economic, political and other prevailing conditions in India.

Our Company is incorporated in India, and the majority of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- the macroeconomic climate, including any increase in Indian interest rates or inflation;
- any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;

- Any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;
- Prevailing income conditions among Indian consumers and Indian corporations;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- occurrence of natural or man-made disasters;
- prevailing regional or global economic conditions, including in India's principal export markets;
- other significant regulatory or economic developments in or affecting India or its ER&D sector;

international business practices that may conflict with other customs or legal requirements to which we are subject, including anti-bribery and anti-corruption laws;

65. Financial instability, economic developments and volatility in securities markets in other countries may also cause the price of the Equity Shares to decline.

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging Asian market countries. Financial turmoil in Europe and elsewhere in the world in recent years has affected the Indian economy. In recent times, the Indian financial markets had been negatively affected by the volatility in global financial market, including on account of certain European nations' debt troubles and move to break away by the United Kingdom from the European Union. Although, economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. Currencies of a few Asian countries have in the past suffered depreciation against the U.S. Dollar owing to, amongst other, the announcements by the U.S. government that it may consider reducing its quantitative easing measures. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur and could harm our business, future financial performance and the prices of the Equity Shares.

The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections in recent years. Liquidity and credit concerns and volatility in the global credit and financial markets have increased significantly with the bankruptcy or acquisition of, and government assistance extended to, several major U.S. and European financial institutions. These and other related events, such as the European sovereign debt crisis, have had a significant impact on the global credit and financial markets as a whole, including reduced liquidity, greater volatility, widening of credit spreads and a lack of price transparency in global credit and financial markets. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets.

However, the overall impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have the intended stabilizing effects. In the event that the current difficult conditions in the global credit markets continue or if there is any significant financial disruption, such conditions could have an adverse effect on our business, future financial performance and the trading price of the Equity Shares.

66. A significant change in the Government of India's economic liberalization and deregulation policies could adversely affect our business and the price of our Equity Shares.

The Government of India has traditionally exercised, and continues to exercise, a dominant influence over many aspects of the economy. Unfavorable government policies including those relating to the internet and e-commerce, consumer protection and data-privacy, could adversely affect business and economic conditions in India, and could also affect our ability to implement our strategy and our future financial performance. Since 1991, successive governments, including coalition governments, have pursued policies of economic liberalization, including significantly relaxing restrictions on the private sector and encouraging the development of the Indian financial sector. However, the members of the Government of India and the composition of the coalition in power are subject to change. As a result, it is difficult to predict the economic policies that will be pursued by the Government of India. For example, there may be an increasing number of laws and regulations pertaining to the internet and e-commerce, which may relate to liability for information retrieved from or transmitted over the internet or mobile networks, user privacy, content

restrictions and the quality of services and products sold or provided through the internet. The rate of economic liberalization could change and specific laws and policies affecting the financial services industry, foreign investment, currency exchange and other matters affecting investment in our securities could change as well.

Any significant change in India's economic liberalization and deregulation policies could adversely affect business and economic conditions in India generally and our business in particular.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹22 in the above example. The Company in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹22. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

2. **Funding the capital expenditure for purchase of office space**

We propose to deploy issue proceeds amounting to Rs. 1474.58 Lakhs by acquiring commercial property which will be used in carrying out business operations in Ahmedabad. As of the date of this Prospectus the registered office as well as all other place of businesses as mentioned in Place of business under chapter title “Business Overview” at page number 130 are taken on lease by the company. This proposed expenditure will not only lead to creation of an asset for the company but will also add to the profitability of the company which will enhance our company's image, optimize operations, and support future growth.

The company currently operates from an office of approximately 2,600 sq. ft. Super Built up area (SBUA), rented from the promoters at a concessional rate of ₹50,000 per month. However, this space is highly congested and inadequate for operational requirements. To alleviate space constraints, the company is considering leasing an additional 1,080 sq. ft. unit within the same complex at ₹55,000 per month. Despite this expansion, the total available space would still be insufficient. The existing office lacks essential amenities such as a proper pantry or lunchroom for staff, as well as meeting and conference rooms, which are crucial for attracting talent and maintaining strong customer relationships.

Further expansion within the current location is not feasible, as acquiring a continuous space of 8,000–10,000 sq. ft. is also not possible in current location. Looking ahead to the next 3–5 years, and considering current operational needs, the company estimates a requirement of approximately 9,000–10,000 sq. ft. of office space. Renting such a facility in a prime Ahmedabad location would cost around ₹6–7.5 lakh per month, amounting to ₹70–90 lakh annually. Instead of incurring this substantial rental expense, the company plans to invest ₹1474.58 Lakhs in purchasing office space, which is a more financially sustainable decision in the long term.

Apart from above there are other working capital requirements such as Cash and Cash Equivalents, Other Current assets, loans and advances, short term provisions and other current liabilities. Details of which are given below.

Justifications:

Over FY23 & FY24, the net working capital has increased from ₹1,485.34 lakhs to ₹2,774.71 lakhs, reflecting the growth in inventories and trade receivables. By FY25, FY26 and FY27, net working capital is expected to further increase to ₹5,993.91 lakhs, 6,877.43 lakhs and ₹12,651.78 lakhs, respectively, driven by higher sales volumes and expected business and competitive landscape. Inventory days and trade receivable days are expected to slightly increase, while trade payable days will reduce as the company aims to leverage prompt payments for cash discounts, improving margins.

The company plans to utilize ₹2,500.00 lakhs in FY26 and ₹1,700.00 lakhs in FY27 from its IPO proceeds to support working capital requirements. This infusion will provide the necessary liquidity to manage higher inventory levels and receivables, ensuring smooth operations while maintaining a robust working capital cycle to fuel future growth.

Extended Credit Terms to Customers:

To maintain competitiveness, the Company needs to offer longer credit periods, especially given the nature of its customer base, which is predominantly in the construction and infrastructure sectors known for extended payment cycles. In response to market competition and trends, the Company anticipates a lengthening of the debtor realization period. Consequently, the debtor days are expected to increase from the current 40 days to 42 days in FY25 and 45 days in FY26, i.e. Debtors value at ₹ 8,536.54 Lakhs in FY25 and ₹ 10,439.58 Lakhs in FY26. While expanding sales, the Company focuses on timely collections and sustaining desired profitability, in a competitive landscape.

Higher Inventory Requirements:

With increased in sales projections, the Company expects an increase in inventory levels. In addition to this, to mitigate potential supply chain disruptions, the inventory holding period is projected to increase slightly, reaching 16 days in FY25 and 18 days by FY26.

Timely Payments to Creditors and Discounts:

Procurement of key raw materials like bitumen comes with shorter credit terms, and suppliers offer discounts for prompt payments. Historically, creditor days ranged from 43 in FY23 to 44 in FY24, with actual creditors at ₹ 8,155.89 Lakhs and ₹ 7,706.50 Lakhs, respectively. Moving forward, the Company plans to reduce creditor days to 35 days (value ₹ 6,949.71 Lakhs) in FY25 and further to 26 days (value ₹ 5,864.77 Lakhs) in FY26 by expediting payments to suppliers to avail cash discounts linked to earlier payments. The Company wishes to leverage cash discounts, thereby enhancing profitability margins and strengthening supplier relationships. With combined effect of the above-mentioned factors, the Company is estimating working capital gap at ₹ 5,525.99 Lakhs in FY25 and ₹ 9,689.63 Lakhs in FY26.

The Inventory levels for FY22 to FY24, inventory levels decreased from ₹3,959.79 Lakhs to ₹2,543.31 Lakhs. The Company has toned down it's inventory holding level considering global commodity pricing fluctuations due to geo-political tensions. During FY24 closing, the Company had projected slowness in Q4FY24 and Q1FY25 due to halts & slowness in the Government spending and projects on account of model code of conduct for general elections, hence it has kept the inventory holding at lower levels, which shall again come back to normal holding period in coming years.

We expect inventories to rise in alignment with increased demand and also partly due to supply chain issues, to mitigate potential supply chain disruptions, the inventory holding period is projected to increase slightly the inventory holding levels to be increased. Consequently, inventory days are projected to rise slightly, reaching 17 days by FY26 and then 18 days by FY27. Forces Shaping the Outlook

The global economy is holding steady, although the degree of grip varies widely across countries. *Global GDP growth* in the third quarter of 2024 was 0.1 percentage point below that predicted in the October 2024 WEO, after disappointing data releases in some Asian and European economies. Growth in China, at 4.7 percent in year-over-year terms, was below expectations. Faster-than-expected net export growth only partly offset a faster-than-expected slowdown in consumption amid delayed stabilization in the property market and persistently low consumer confidence. Growth in India also slowed more than expected, led by a sharper-than-expected deceleration in industrial activity. Growth continued to be subdued in the euro area (with Germany's performance lagging that of other euro area countries), largely reflecting continued weakness in manufacturing and goods exports even as consumption picked up in line with the recovery in real incomes. In Japan, output contracted mildly owing to temporary supply disruptions. By contrast, momentum in the United States remained robust, with the economy expanding at a rate of 2.7 percent in year-over-year terms in the third quarter, powered by strong consumption.

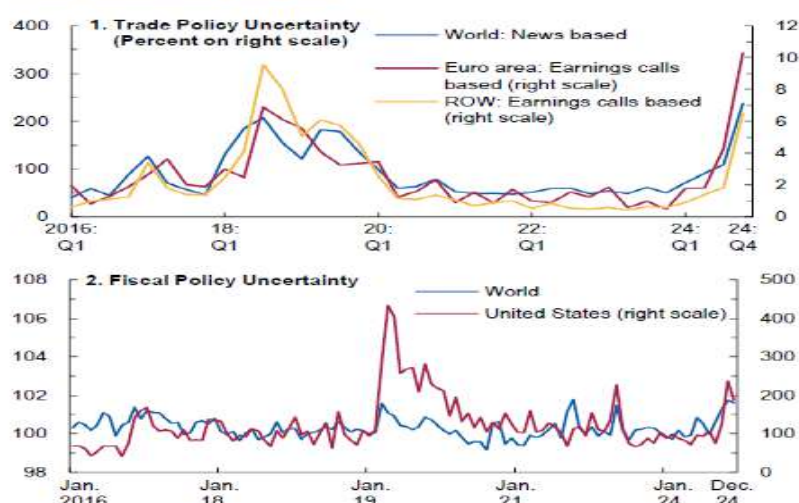

Global disinflation continues, but there are signs that progress is stalling in some countries and that elevated inflation is persistent in a few cases. The global median of sequential core inflation has been just slightly above 2 percent for the past few months. Nominal wage growth is showing signs of moderation, alongside indications of continuing normalization in labor markets. Although core goods price inflation has fallen back to or below trend, services price inflation is still running above pre-COVID-19 averages in many economies, most notably the United States and the euro area. Pockets of elevated inflation, reflecting a range of idiosyncratic factors, also persist in some emerging market and developing economies in Europe and Latin America.

Where inflation is proving more sticky, central banks are moving more cautiously in the easing cycle while keeping a close eye on activity and labor market indicators as well as exchange rate movements. A few central banks are raising rates, marking a point of divergence in monetary policy.

Global financial conditions remain largely accommodative, again with some differentiation across jurisdictions (see Box 1). Equities in advanced economies have rallied on expectations of more business-friendly policies in the United States. In emerging market and developing economies, equity valuations have been more subdued, and a broad-based strengthening of the US dollar, driven primarily by expectations of new tariffs and higher interest rates in the United States, has kept financial conditions tighter.

Economic policy uncertainty has increased sharply, especially on the trade and fiscal fronts, with some differentiation across countries (Figure 1). Expectations of policy shifts under newly elected governments in 2024 have shaped financial market pricing in recent months. Bouts of political instability in some Asian and European countries have rattled markets and injected additional uncertainty regarding stalled progress on fiscal and structural policies. Geopolitical tensions, including those in the Middle East, and global trade frictions remain elevated.

(Index, unless noted otherwise)

Note: The uncertainty measures are news-based indices that quantify media attention to news related to an issue, in which a value of 100 corresponds to 1 percent of news articles that reference the issue. In panel 1, the euro area and the rest of the world (ROW) are based on the earnings-calls-based indicators, representing the proportion of firms that mention trade policy uncertainty (TPU) in their earnings calls. This measure reflects companies' concerns regarding TPU, based on the dictionary developed by Caldara and others (2020, <https://doi.org/10.1016/j.jmoneco.2019.11.002>). The ROW encompasses 22 countries, including the US. In panel 2, US fiscal policy uncertainty is a subcomponent of the Economic Policy Uncertainty Index developed by Baker, Bloom, and Davis (2016, <https://doi.org/10.1093/qje/qjw024>), whereas the indicator for the world is based on Hong, Ke, and Nguyen (2024, <https://doi.org/10.5089/9798400288128.001>).

The Outlook

IMF staff projections assume current policies in place at the time of publication. They incorporate recent market developments and the impact of heightened trade policy uncertainty, which is assumed to be temporary, with the effects unwinding after about a year, but refrain from making any assumptions about potential policy changes that are currently under public debate. Energy commodity prices are expected to decline by 2.6 percent in 2025, more than assumed in October. This reflects a decline in oil prices driven by weak Chinese demand and strong supply from countries outside of OPEC+ (Organization of the Petroleum Exporting Countries plus selected nonmember countries, including Russia), partly offset by increases in gas prices as a result of colder-than-expected weather and supply disruptions, including the ongoing conflict in the Middle East and outages in gas fields. Nonfuel commodity prices are expected to increase by 2.5 percent in 2025, on account of upward revisions to food and beverage prices relative to the October 2024 WEO, driven by bad weather affecting large producers. Monetary policy rates of major central banks are expected to continue to decline, though at different paces, reflecting variations in growth and inflation outlooks. The fiscal policy stance is expected to tighten during 2025–26 in advanced economies including the United States and, to a lesser extent, in emerging market and developing economies.

Global growth is expected to remain stable, albeit lackluster. At 3.3 percent in both 2025 and 2026, the forecasts for growth are below the historical (2000–19) average of 3.7 percent and broadly unchanged from October (Table 1; see also Annex Table 1). The overall picture, however, hides divergent paths across economies and a precarious global growth profile (Figure 2).

Figure 2. Evolution of 2025 Growth Forecasts
(Percent)

Source: IMF staff calculations.

Note: The x-axis shows the months the *World Economic Outlook* is published. AEs = advanced economies; EMDEs = emerging market and developing economies.

Among *advanced economies*, growth forecast revisions go in different directions. In the *United States*, underlying demand remains robust, reflecting strong wealth effects, a less restrictive monetary policy stance, and supportive financial conditions. Growth is projected to be at 2.7 percent in 2025. This is 0.5 percentage point higher than the October forecast, in part reflecting carryover from 2024 as well as robust labor markets and accelerating investment, among other signs of strength. Growth is expected to taper to potential in 2026.

In the *euro area*, growth is expected to pick up but at a more gradual pace than anticipated in October, with geopolitical tensions continuing to weigh on sentiment. Weaker-than-expected momentum at the end of 2024, especially in manufacturing, and heightened political and policy uncertainty explain a downward revision of 0.2 percentage point to 1.0 percent in 2025. In 2026, growth is set to rise to 1.4 percent, helped by stronger domestic demand, as financial conditions loosen, confidence improves, and uncertainty recedes somewhat.

In *other advanced economies*, two offsetting forces keep growth forecasts relatively stable. On the one hand, recovering real incomes are expected to support the cyclical recovery in consumption. On the other hand, trade headwinds—including the sharp uptick in trade policy uncertainty—are expected to keep investment subdued.

In *emerging market and developing economies*, growth performance in 2025 and 2026 is expected to broadly match that in 2024. With respect to the projection in October, growth in 2025 for *China* is marginally revised upward by 0.1 percentage point to 4.6 percent. This revision reflects carryover from 2024 and the fiscal package announced in November largely offsetting the negative effect on investment from heightened trade policy uncertainty and property market drag. In 2026, growth is projected mostly to remain stable at 4.5 percent, as the effects of trade policy uncertainty dissipate and the retirement age increase slows down the decline in the labor supply. In *India*, growth is projected to be solid at 6.5 percent in 2025 and 2026, as projected in October and in line with potential.

In the *Middle East and Central Asia*, growth is projected to pick up, but less than expected in October. This mainly reflects a 1.3 percentage point downward revision to 2025 growth in *Saudi Arabia*, mostly driven by the extension of OPEC+ production cuts. In *Latin America and the Caribbean*, overall growth is projected to accelerate slightly in 2025 to 2.5 percent, despite an expected slowdown in the largest economies of the region. Growth in *sub-Saharan Africa* is expected to pick up in 2025, while it is forecast to slow down in *emerging and developing Europe*.

World trade volume estimates are revised downward slightly for 2025 and 2026. The revision owes to the sharp increase in trade policy uncertainty, which is likely to hurt investment disproportionately among trade-intensive firms. That said, in the baseline, the impact of heightened uncertainty is expected to be transitory. Furthermore, the front-loading of some trade flows in view of elevated trade policy uncertainty, and in anticipation of tighter trade restrictions, provides some offset in the near term.

Progress on *disinflation* is expected to continue. Deviations from the October 2024 WEO forecasts are minimal. The gradual cooling of labor markets is expected to keep demand pressures at bay. Combined with the expected decline in energy prices, headline inflation is projected to continue its descent toward central bank targets. That said, inflation is projected to be close to, but above, the 2 percent target in 2025 in the United States, whereas inflationary dynamics are expected to be more subdued in the euro area. Low inflation is projected to persist in China. Consequently, the gap between anticipated policy rates in the United States and other countries becomes wider.

INDIAN ECONOMY OVERVIEW

Introduction

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP or GDP at Current Prices in the year 2023-24 is estimated at Rs. 295.36 lakh crores (US\$ 3.54 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 269.50 lakh crores (US\$ 3.23 trillion). The growth in nominal GDP during 2023-24 is estimated at 9.6% as compared to 14.2% in 2022-23. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the second half of FY24. During the period April-June 2025, India's exports stood at US\$ 109.11 billion, with Engineering Goods (25.35%), Petroleum Products (18.33%) and electronic goods (7.73%) being the

top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable because of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

Market size

Real GDP for Q2 of FY25 is estimated at Rs. 44.10 lakh crores (US\$ 509.36 billion) with growth rate of 5.4%, compared to Rs. 41.86 lakh crore (US\$ 484.27 billion) for Q2 of 2023-24. The growth in real GDP during 2023-24 is estimated at 8.2% as compared to 7.0% in 2022-23. There are 113 unicorn startups in India, with a combined valuation of over US\$ 350 billion. As many as 14 tech startups are expected to list in 2024 Fintech sector poised to generate the largest number of future unicorns in India. With India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time periods. India's Current Account Deficit (CAD) narrowed to 0.7% of GDP in FY24. The CAD stood at Rs. 96,790 crore (US\$ 11.2 billion) for Q2 of FY25 from Rs. 97,655 crore (US\$ 11.3 billion) in Q2 of FY24 or 1.3% of GDP. This was largely due to decrease in merchandise trade deficit.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- According to HSBC Flash India PMI report, business activity surged in April to its highest level in about 14 years as well as sustained robust demand. The composite index reached 62.2, indicating continuous expansion since August 2021, alongside positive job growth and decreased input inflation, affirming India's status as the fastest-growing major economy.
- According to a report by the State Bank of India (SBI), domestic investment announcements in India have experienced a substantial increase, exceeding Rs. 37 lakh crore (US\$ 428.04 billion) in FY23 and FY24.
- According to data from the Directorate General of Civil Aviation (DGCA), India's domestic air passenger traffic increased by 6.12% in 2024, reaching a total of 161.3 million passengers. This growth follows a substantial YoY increase of 23.36% in 2023, attributed to the ongoing recovery from the pandemic.
- As of January 10, 2025, India's foreign exchange reserves stood at Rs. 53,80,402 crore (US\$ 625.871 billion).
- In 1H 2024, India saw a total of US\$ 31.5 billion in PE-VC investments.
- India secured 39th position out of 133 economies in the Global Innovation Index 2024. India rose from 81st position in 2015 to 39th position in 2024. India ranks 3rd position in the global number of scientific publications.
- The gross GST (Goods and Services Tax) revenue collection stood at Rs. 1.77 lakh crore (US\$ 20.45 billion) in December 2024.
- Between April 2000–September 2024, cumulative FDI equity inflows to India stood at Rs. 89.30 lakh crore (US\$ 1,033.40 billion).
- In November 2024, the overall IIP (Index of Industrial Production) stood at 148.4. The Indices of Industrial Production for the mining, manufacturing and electricity sectors stood at 133.8, 147.4 and 184.1, respectively.
- According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) – Combined inflation was 5.22% in December 2024 against 5.69% in December 2023.

- Foreign Institutional Investors (FII) inflows between April-July (2023-24) were close to Rs. 80,500 crore (US\$ 9.67 billion), while Domestic Institutional Investors (DII) sold Rs. 4,500 crore (US\$ 540.56 million) in the same period. As per depository data, Foreign Portfolio Investors (FPIs) invested (US\$ 13.89 billion) in India during January - (up to 15th July) 2024.
- The wheat procurement during Rabi Marketing Season (RMS) 2024-25 (till May) was estimated to be 266 lakh metric tonnes (LMT) and the rice procured in Kharif Marketing Season (KMS) 2024-25 was 400 LMT.

Government Initiatives

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, is aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:

- According to a report by Wood Mackenzie in January 2025, India, the United States, and West Asia are expected to collectively add 100 Gigawatts (GW) of solar capacity by 2025, while China is anticipated to continue its leadership in the solar industry.
- In July 2024, the Ministry of Finance held the Union Budget and announced that for 2024-25, the total receipts other than borrowings and the total expenditure are estimated at Rs. 32.07 lakh crore (US\$ 383.93 billion) and Rs. 48.21 lakh crore (US\$ 577.16 billion), respectively.

Road Ahead

In the second quarter of FY 24, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2023. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of FY24 highlighted the unwavering support the government gave to its capital expenditure, which, in FY24, stood 37.4% higher than the same period last year. In the Union Budget of 2024-25, capital expenditure took lead by steeply increasing the capital expenditure outlay by 17.1 % to Rs. 11 lakh crore (US\$ 133.51 billion) over Rs. 9.48 lakh crore (US\$ 113.91 billion) in 2023-24. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

India's is experiencing resilient growth despite the global pandemic. India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023.

PETROCHEMICAL MARKET

The Petrochemical Industry: A Comprehensive Overview

The petrochemical industry is a cornerstone of modern economies, transforming crude oil and natural gas into a vast array of products that touch nearly every aspect of our lives. Petrochemicals are the building blocks for countless materials, from plastics and synthetic fibers to detergents, pharmaceuticals, and agricultural chemicals.

Over the past few decades, the petrochemical industry has grown significantly due to urbanization, rising disposable incomes, and population growth. Asia has become a significant hub for both production and consumption, with China leading the way. Regional differences, however, are evident in the industry, with certain areas being highly dependent on imports of petrochemicals. Government regulations, the price of crude oil, and the availability of natural gas are all having an impact on production trends.

The petrochemical industry is a vast and broad field that generates a broad range of goods that are vital for modern living. Think of it as the building block factory. Here's a breakdown of some key segments:

- **Olefins (Ethylene & Propylene):** These are the foundation for plastics, synthetic rubber, and other crucial chemicals.
- **Aromatics (Benzene, Toluene, Xylene):** These form the backbone of plastics, fibers, solvents, and dyes.
- **Bitumen:** This viscous hydrocarbon, also derived from petroleum, finds its primary application in road construction, but also plays a role in roofing and waterproofing.
- **Rubber (Synthetic):** This is crucial for the tire industry and various rubber-based products.
- **Lubricating oils:** specific type of lubricant, typically liquid, derived from petroleum (mineral oils) or synthetically produced. They reduce friction, heat, and wear between moving parts in machinery.
- **Plastics (Polyethylene, Polypropylene, PVC, Polystyrene):** These versatile polymers are used in everything from packaging and construction to automotive parts and consumer goods.

To ensure long-term sustainability, the petrochemical landscape is undergoing a transformation, marked by a shift towards eco-friendly practices and innovative product development. While petrochemicals have been essential for progress, their production and consumption have also contributed to pollution, climate change, and resource depletion. The industry is now faced with the imperative to adopt sustainable practices, reduce its environmental footprint, and find innovative solutions to ensure long-term viability.

Bitumen: A Petrochemical Derivative

Bitumen, also known as concrete, is a petroleum-based viscous, sticky material. It is vital for the infrastructure and construction industries as a petrochemical derivative. It is primarily produced through the fractional distillation of crude oils. Bitumen is produced by processing the heavier fractions remaining after extracting gasoline, kerosene, and diesel fuel. The specific process varies depending on the crude oil composition and desired bitumen grade.

The global bitumen market is substantial and growing, owing to increased urbanization, infrastructure development, as well as an expanding transportation network. The Asia-Pacific region particularly China and India, are significant consumers as a result of rapid economic growth and massive infrastructure projects. While the Middle East is a major producer due to its abundant oil reserves, other regions, such as Europe and North America, contribute to global supplies.

Crude oil prices, government policies, technological advancements, and environmental regulations all have an impact on the bitumen market. Integrated oil companies and specialized bitumen producers are both major players in the global bitumen market. These firms concentrate on R&D to improve bitumen performance, develop sustainable alternatives, and broaden their market

reach.

Bitumen Market on the Rise: Driving Infrastructure Development

The global Bitumen Market is projected to reach USD 135.10 billion by 2030, growing at a rate of 3.49% annually from 2022 to 2030. This growth is driven by the increasing use of bitumen in various applications such as road construction, waterproofing, insulation, and adhesives. The rise in infrastructure projects, especially in rapidly urbanizing emerging markets, is expected to boost the market's revenue.

Global Bitumen Market

Bitumen: A Petrochemical Derivative Market Analysis

Increased Road Construction Drives Bitumen Demand

An increase in road construction activities fuels the demand for bitumen. Bitumen is processed into asphalt for road construction. Asphalt is a mixture of rock aggregates and bitumen. Bitumen serves as a binding agent and improves the stability of asphalt. Depending on the type of bitumen or composition of the mixture used, asphalt roads can be made suitable for regions with different climatic conditions or various levels of operational demands.

The COVID-19 pandemic initially hurt the market by reducing demand and disrupting supply chains. However, as economies recover, the petrochemical industry is bouncing back. More industrial activity, the restart of construction projects, and rising demand are helping the market recover and look positive for the future.

Paving-grade bitumen captured over two-thirds of the market share in 2022 and is expected to grow at a 3.3% annual rate (CAGR). Rapid urbanization and population growth, especially in emerging economies, have driven significant infrastructure development. Governments are investing in roads, highways, airports, and transportation networks, boosting demand for paving-grade bitumen, a key material in road construction.

The road construction segment accounted for over three-fourths of the market share and is expected to grow at a 3.7% annual rate (CAGR). Roads are vital for global transportation, with significant construction projects in emerging economies like China and India. These countries have heavily invested in infrastructure to support population growth and economic expansion. International institutions like the World Bank and Asian Development Bank also fund road projects in developing nations to enhance trade, connectivity, and socio-economic development.

Petrochemical Market Trends

Rising Demand for Advanced Bitumen Products Fuels Growth in Petrochemical Market

Positive trends are being observed in the petrochemical market, specifically for products like bitumen emulsion, PMB (polymer modified bitumen), and CRMB (crumb rubber modified bitumen). These products are particularly relevant in the context of road construction, waterproofing, and other construction applications.

The increasing global demand for infrastructure development is directly linked to the need for bitumen and its derivatives. Bitumen consumption in the road construction industry is significant due to the requirement for strong, weather-resistant pavements. Due to massive infrastructure projects, which includes roads and highways, Asia-Pacific, in particular nations like China and India, is leading the world in bitumen consumption. Significant investments in infrastructure projects, such as industrial corridors, are driving up demand for bitumen products in India.

Furthermore, improvements in bitumen technology, like the application of PMB and CRMB, extend the life and enhancing the quality of road surfaces, making them more resilient to heavy traffic and severe weather. Due to this, these products are especially well-liked in areas with severe weather or high traffic.

Based on recent data, the market for polymer modified bitumen (PMB) was projected to be worth USD 9.5 billion in 2016. It is expected to grow at a compound annual growth rate (CAGR) of over four percent until 2024, when it could be worth USD 14 billion.

The market is growing steadily and picking up speed. A few big companies dominate the market, while others are smaller and less influential. Factors like technology, material availability, and cost advantages play a role. In markets with a few large players, they can control prices and competition more easily.

Global Petrochemicals Market Share, By End-Use Industry, 2023

www.fortunebusinessinsights.com

In 2023, the petrochemicals market was led by the packaging industry due to high demand for lightweight, durable materials. The electronics sector also played a major role, driven by the need for resins and plastics in devices like smartphones and laptops. The construction industry used petrochemicals for pipes and insulation, and the automotive sector anticipated growth by using these materials to reduce vehicle weight and fuel consumption.

Bitumen Market Recovery Post-COVID-19

The COVID-19 pandemic significantly impacted the global petrochemical industry, including the bitumen market. Lockdowns, travel restrictions, and economic downturns led to a sharp decline in demand for bitumen. However it is now on a path to recovery, the gradual easing of restrictions and resumption of economic activities have spurred renewed growth. The deferral of infrastructure projects during the pandemic has created a backlog, leading to increased demand for bitumen as economies reopen.

Many governments have introduced stimulus packages to revive economies, with a focus on infrastructure development, boosting bitumen consumption. The construction industry has shown resilience, with projects gradually restarting and gaining momentum.

Key Regions for Petrochemical Market

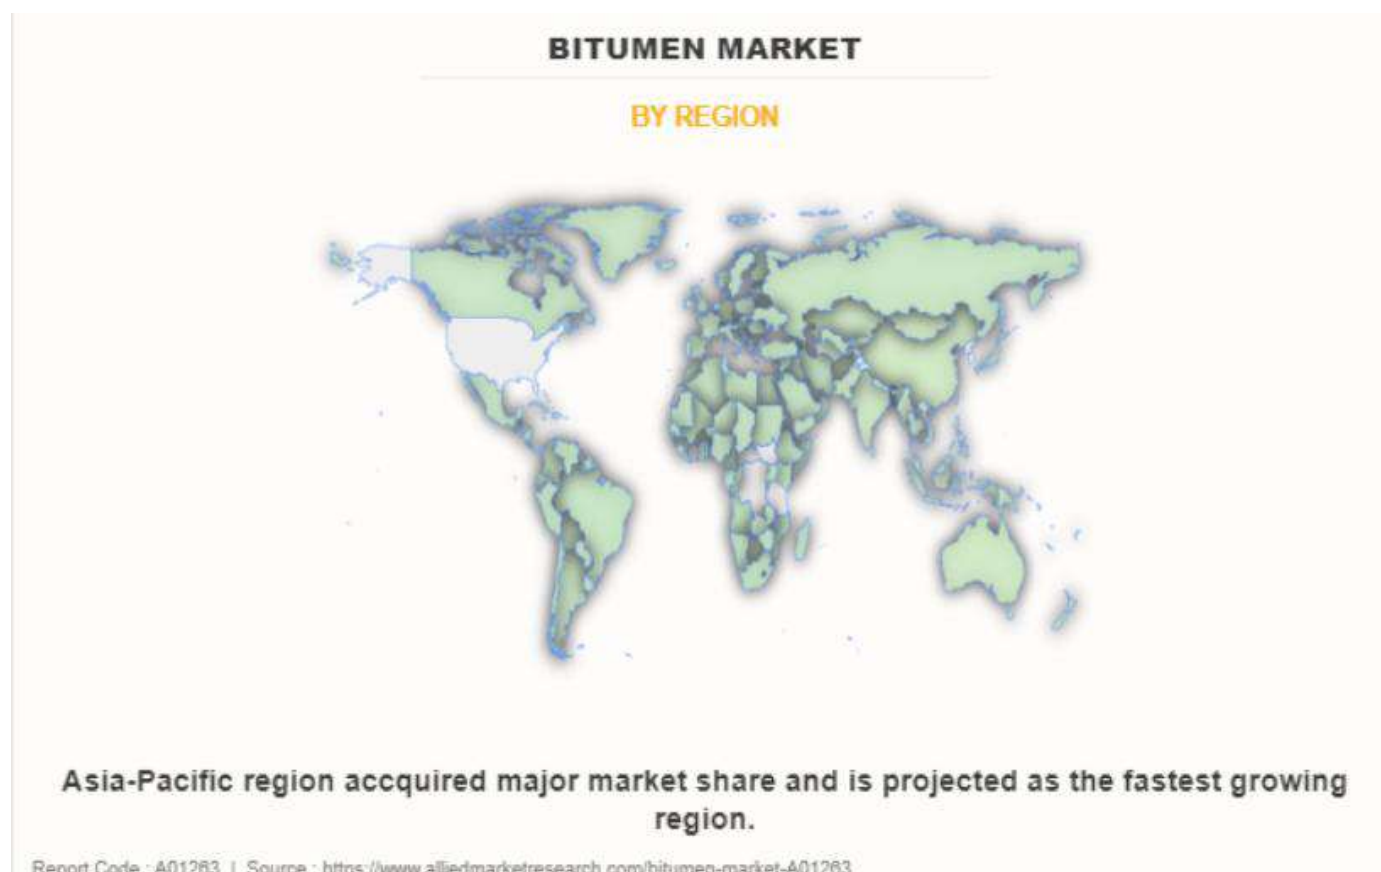

In 2023, the Asia Pacific region led the petrochemicals market, holding over 51.0% of the market share. This dominance is due to the region's booming chemicals industry and growing polymer consumption. Companies in Asia Pacific are increasingly turning to natural gas liquids and alternative non-oil feedstocks to meet rising demand, while also adopting cost-effective strategies to boost product sales.

In the U.S. and Canada, increased shale gas exploration is set to boost the petrochemicals industry. The growing production of shale gas offers a chance to use it as a replacement for traditional feedstocks in making petrochemicals. Significant capacity expansions in these countries are likely to drive industry growth in the coming years.

Key Regions For Bitumen Market

Asia-Pacific accounts for more than two-fifths of the market and will continue to grow at a CAGR of 3.7% over the forecast period. As China's rapid urbanization and industrialization processes continue, the demand for roads, highways, and modern infrastructure grows. Bitumen is a key component in road construction. China's rapid urbanization and infrastructure development have increased demand for bitumen. As the world's most populous country and second-largest economy, China's emphasis on building highways, airports, and urban roads demonstrates its commitment to improving intra and inter-city connectivity. Bitumen, with its primary application as a binder in road asphalt, is critical to this vision. China's Belt and Road Initiative (BRI), a massive infrastructure project that stretches across.

Asia-Pacific region is not only a major player but also expected to continue growing rapidly in the bitumen market, driven by the factors like urbanization, infrastructure development, and industrial growth, especially in countries like China and India.

Petrochemical Industry in India

The petrochemical industry in India has been one of the fastest growing industries in the country. Since the beginning, the Indian petrochemical industry has shown an enviable growth rate. This industry also contributes largely to the economy of the country and the growth and development of manufacturing industry as well. It provides the foundation for manufacturing industries like construction, packaging, pharmaceuticals, agriculture, textiles, etc. (*Vision 2024 – To establish India as a leading Manufacturer of Chemicals and Petrochemicals*)

India's petrochemical sector has witnessed substantial growth, driven by increasing industrialization, urbanization, and rising disposable incomes. The sector plays a crucial role in the nation's economic development, contributing significantly to GDP and employment. (*Petrochemicals India Association (PIA) Annual Report*)

Future of India and Petrochemical Industry

Indian chemicals industry ranks 6th in the world and 4th in Asia. India ranks 14th in the world export of chemicals and 10th in the world import of chemicals. The share of export and import of chemicals & petrochemicals is 11.2% and 10.6% in the total national exports and imports in 2017-18. India's GDP stood at US\$2.7 trillion during 2018. With annual envisaged growth rate 7%, India's GDP is assessed to reach US\$ 5 Trillion by 2025 and our economy is expected to be among the 5th largest amongst world's economies by 2025.

As India remains one of the most attractive investment regions for foreign companies with a consistent investment of more than USD 40 Billion over the years, the Government of India envisages the development of Global Scale Industrial Corridors in the

Petroleum, Chemical and Petrochemical sectors of the country in an integrated and environment friendly manner. In 2018 the size of the sector was US\$ 163 Billion, with import of US\$ 45 Billion. With high population base, there is enormous domestic demand of chemicals & petrochemicals in the country, which is served by domestic manufacturing units as well as by importing from overseas countries.

India Bitumen Market Outlook – 2032

India's bitumen market has witnessed substantial growth in recent years, driven by the government's ambitious infrastructure development plans. The country's extensive road network, coupled with rapid urbanization, has created a robust demand for bitumen.

The India bitumen market attained \$4.6 billion in 2022 and is projected to reach \$6.8 billion by 2032, growing at a CAGR of 4.0% from 2023 to 2032.

Bitumen is an oil-based substance and semi-solid hydrocarbon product produced by removing the lighter fractions (such as liquid petroleum gas, petrol, and diesel) from heavy crude oil during the refining process. Composition of bitumen includes carbon (87-92%), hydrogen (6-8%), sulfur (~5%), nitrogen (1%), and oxygen (1%). It possesses physical properties such as adhesion, water resistance, hardness, and viscosity.

Growth in the construction industry as a result of rapid urbanization and the implementation of government initiatives such as "Housing for All," which includes the construction of houses for the urban poor, is expected to drive the bitumen market across the country. The India bitumen market is segmented into type, end-use industry, and region. The types covered are paving grade

bitumen, oxidized bitumen, polymer modified bitumen, bitumen emulsions and others. By end-use industry, the market is classified into road construction, waterproofing, and others.

Paving Grade Bitumen is the most lucrative segment

In 2022, the paving grade bitumen segment generated the highest amount of revenue, and it is anticipated to grow at a CAGR of 3.7% over the forecast period. Rapid urbanization and population growth, especially in emerging economies, have resulted in significant infrastructure development. Governments are investing in the construction and expansion of roads, highways, airports, and other transportation networks to meet the increasing demand for efficient transportation. Paving grade bitumen is an essential component in road construction, and the surge in infrastructure projects has increased demand for bitumen.

Road Construction is projected as the most lucrative segment.

By end-use industry, the road construction segment dominated the global market in 2022 and is expected to grow at a CAGR of 4.2% over the forecast period. The Indian government sees infrastructure development as a critical driver of economic growth. The creation of an efficient and well-connected road network is critical for increasing connectivity, facilitating trade, and strengthening regional integration. The government's flagship programs, such as Bharatmala Pariyojana and Pradhan Mantri Gram Sadak Yojana, are aimed at expanding and improving road infrastructure across the country.

The Ministry of Road Transport and Highways (MoRTH) achieved significant progress in road construction during the 2023-24 period, having constructed 12,349 km of national highways. This achievement marks the second highest annual total ever recorded, surpassing the 10,331 km completed in the previous year, 2022-23. This development highlights a substantial increase in infrastructure development and reflects ongoing efforts to enhance national connectivity. (*Economic Times India*)

Government initiative

The Indian government has launched several initiatives to promote infrastructure development, which has had a significant impact on the bitumen market.

Key Government Initiatives:

- **National Highway Development Project (NHDP):** This flagship program aims to improve connectivity across the country through the expansion and upgrading of national highways.
- **Bharatmala Pariyojana:** A comprehensive road development program focused on economic growth, regional connectivity, and efficient logistics.
- **Sagarmala Project:** This initiative aims to promote port-led development and improve coastal connectivity, which indirectly boosts bitumen demand.
- **Smart Cities Mission:** The development of smart cities involves extensive road infrastructure and urban renewal projects, driving bitumen consumption.
- **Pradhan Mantri Gram Sadak Yojana (PMGSY):** This rural road connectivity program has expanded the bitumen market to rural areas.

These initiatives, coupled with increasing urbanization and industrialization, have created a robust demand for bitumen in India.

Effects of Covid-19 on the Indian Bitumen Industry

- **Reduced construction activity:** During the pandemic, many construction projects were put on hold or delayed due to lockdown measures and labor shortages. This resulted in reduced demand for bitumen, as it is a key component used in road construction and infrastructure projects.
- **Disruption in the supply chain:** Restrictions on movement and trade disruptions caused logistical challenges in transporting bitumen and related products. This led to delays in the supply chain and potential shortages, affecting the availability of bitumen in the market.

The Indian bitumen industry has begun to recover from the effects of COVID-19 due to increased government investment in infrastructure projects, which has boosted demand. Companies have adjusted supply chains and implemented new technologies to improve efficiency and production stability. Furthermore, supportive regulatory policies and an increase in construction activity have aided the industry's recovery and growth.

PROCUREMENT PROCESS FLOWCHART

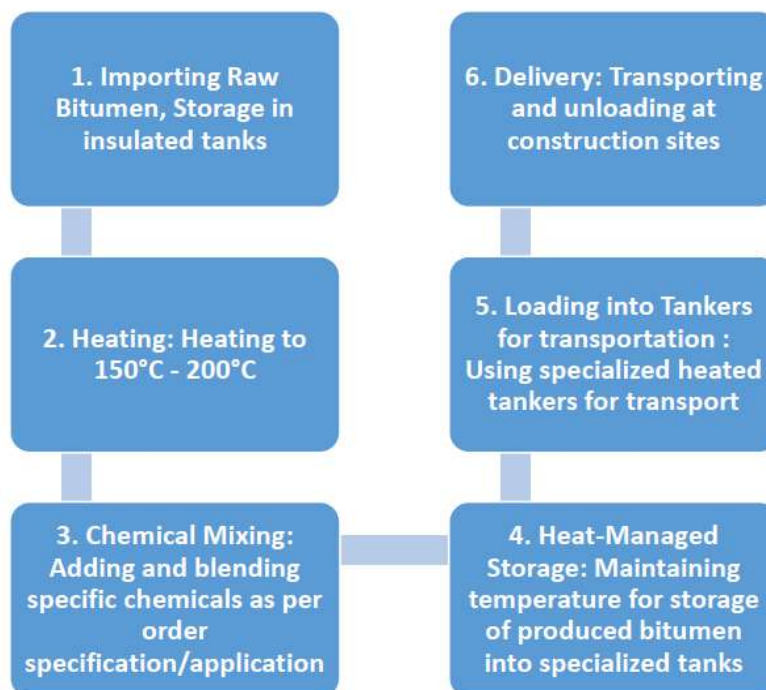

The procurement process is a structured approach designed to ensure the acquisition of high-quality raw materials and components

essential for their operations.

- The process begins when a specific requirement for raw materials is identified within the company. This requirement is communicated to the procurement department, which initiates the procurement cycle.
- Once the procurement department receives the requirement, the Purchase Manager takes charge of approaching pre-identified suppliers who are known to meet the company's standards.
- The Purchase Manager requests detailed quotations from these suppliers, ensuring that the quotations include the specified quality standards necessary for operations. After receiving the quotations, they are forwarded to the Technical Team.
- The Technical Team plays a crucial role in verifying that the quality standards quoted by the suppliers match the company's stringent internal requirements and benchmarks. This step ensures that only the highest quality materials are considered for procurement.
- Following the quality verification, the procurement team engages in discussions with the supplier to finalize the commercial terms. This involves negotiating the terms of the quotation to achieve favorable pricing and delivery schedules that align with company's operational needs.
- Once the negotiation is successful and the targeted rate is achieved, the procurement department places the order with the supplier.

This structured process not only ensures that our company procures high-quality materials but also maintains cost efficiency and reliability in their supply chain.

PROCESS FLOW CHART OF BITUMEN MANUFACTURING

1. Importing Raw Bitumen:

Raw bitumen of various grades is purchased from suppliers. The raw bitumen comes packaged into MS Drums, the same are stored in manufacturing facility. Upon arrival at the plant, each batch of bitumen undergoes a thorough quality check before unloading. This ensures that the bitumen meets the required specifications and standards. When bitumen is imported in drums, the risk of contamination or mixing is significantly minimized, ensuring a high-quality product.

2. Heating the Raw Bitumen:

The raw bitumen is pumped into Bitumen Decanter (Automated) or Manual Ovens, where the bitumen is heated with the temperature of the bitumen to a specific level, typically between 150°C to 200°C through thermic fluid oil, to ensure it becomes liquid and workable, and with the desired heat the heated bitumen gets stored within the tanks attached to the Decanter or Manual oven.

Bitumen Decanter: It is a specialized plant for heating and liquefying bitumen. This plant is equipped with hydraulic system for putting bitumen drums into the plant, heating chamber designed specifically to provide extreme heat of desired level, temporary storage for liquefied bitumen, and pumping system to efficiently melt and transfer bitumen to storage tanks. This process minimizes shortages, reduces labor costs, and maintains bitumen quality while ensuring safe handling.

Manual Oven: This plant is designed specifically to provide extreme heat of desired level, temporary storage for liquefied bitumen, and pumping system to efficiently melt and transfer bitumen to storage tanks. The heating in this plant is low and takes time as compared to automated bitumen decanter.

3. Mixing with Chemicals & Storage in Specialized Heat-Managed Tanks:

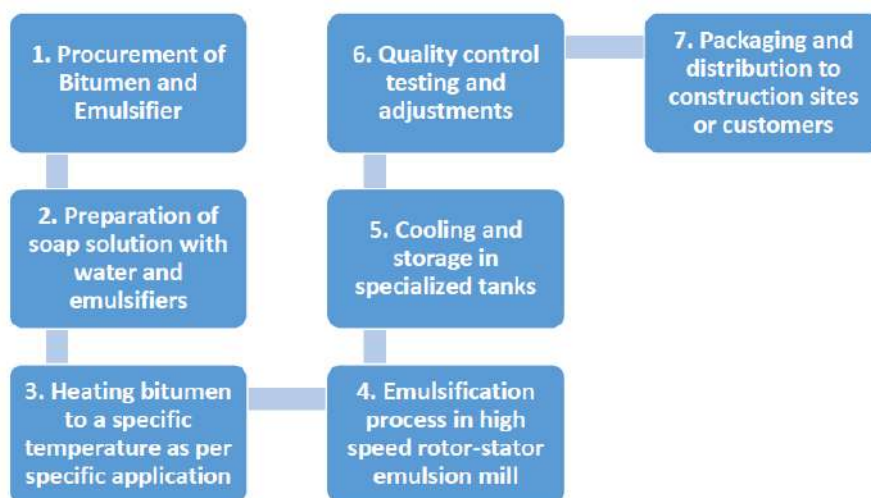

Once the bitumen reaches the desired temperature and shifted to storage tanks, specific chemicals are added to modify its properties. These chemicals can include polymers, anti-stripping agents, rejuvenators and other additives that enhance the performance characteristics of the bitumen. The heated bitumen and additives are thoroughly mixed using high-shear mixers or other mechanical agitators. This ensures that the chemicals are evenly distributed throughout the bitumen, resulting in a uniform product of the desired grade.

The modified bitumen is stored in specialized storage tanks. These tanks are designed to maintain the bitumen at a constant high temperature, preventing it from solidifying. The tanks are equipped with heating elements and temperature control systems to keep the bitumen within the optimal range for both storage and later transport. Before loading, a final quality check is performed in in-house lab, to ensure that the bitumen meets the purchaser's specifications.

4. Loading into Specialized Tankers & Transportation

When an order is ready to be fulfilled, the bitumen is loaded into specialized tankers. These tankers are insulated, and these tankers also have their own heating systems (used in case of long journeys or long holds) to maintain the bitumen at the required temperature during transit. The bitumen is transported in the specialized tankers to the road construction site. During transit, the temperature is carefully monitored and maintained. Upon arrival on the site, the tankers unloaded into site storage tanks or directly into the equipment used for road construction, depending on the requirements of the construction project.

PROCESS FLOW CHART OF BITUMEN EMULSION

1. Raw Material Acquisition

Raw Bitumen of the required grade is acquired and the same is heated and stored in tanks where it is kept heated to ensure it remains in a liquid state. Specific chemicals known as emulsifiers are procured. These are essential for the emulsification process and help in stabilizing the bitumen particles in the aqueous medium. Clean water is used as the dispersion medium for the bitumen emulsion.

2. Preparation of Soap Solution

Water is mixed with emulsifiers and other additives (e.g., acids, salt, solvents or bases) to create a soap solution. The composition of the soap solution depends on the type of emulsion (anionic or cationic). The soap solution is often heated to a specific temperature (usually between 50°C to 70°C) to enhance the emulsification process and give desired results.

3. Emulsification Process

The heated bitumen and the soap solution are fed into an emulsion mill. The mill consists of a high-speed rotor-stator system that shears the bitumen into tiny droplets and disperses them into the aqueous phase. The bitumen droplets are coated with emulsifier molecules, preventing them from coalescing and ensuring a stable dispersion. This results in the formation of a bitumen emulsion.

4. Cooling and Storage

The bitumen emulsion is cooled to ambient temperature before storage. This prevents premature breaking of the emulsion and ensures stability. The cooled emulsion is stored in specially designed tanks that maintain the integrity and stability of the emulsion. These tanks are usually equipped with agitators to keep the emulsion uniformly mixed.

5. Quality Control

Samples of the bitumen emulsion are taken and tested for various parameters, including particle size distribution, viscosity, stability, and breaking behaviour. This ensures the emulsion meets the required specifications.

6. Packaging and Distribution

The bitumen emulsion is filled into drums, containers, or bulk tankers for transportation. The containers are labeled with relevant information, including the type of emulsion, batch number, and storage instructions. The packaged bitumen emulsion is transported to construction sites, storage facilities, or directly to customers.

PROCESS FLOW OF TRADING

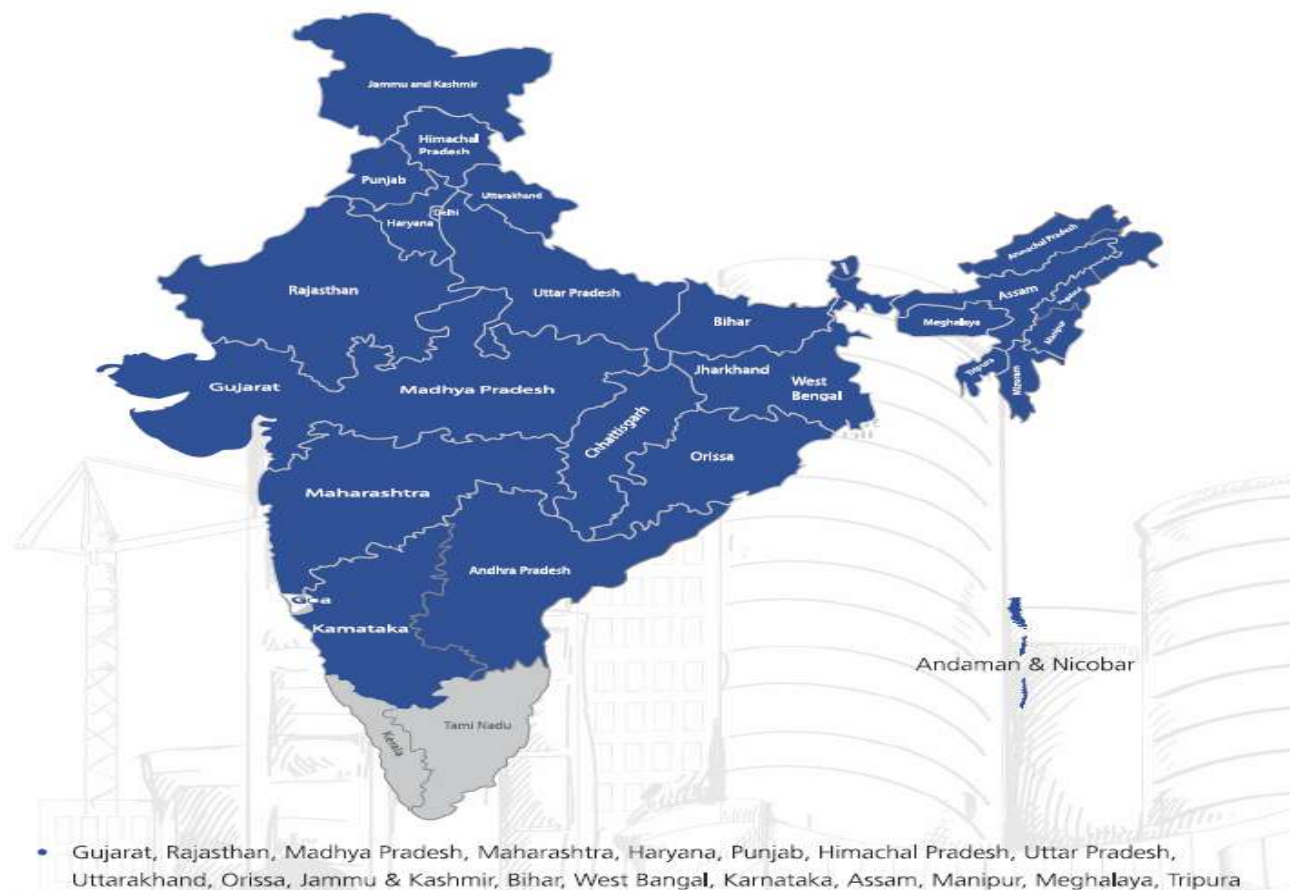

The detailed process in trading of goods involve following steps:

- **Sourcing and Procurement:** Fuel oils are sourced from refineries, petrochemical plants, or other suppliers, either locally or internationally. Similarly, bitumen is typically sourced from refineries or specialized bitumen suppliers. It is usually produced as a byproduct of crude oil refining.
- **Quality Control and Inspection:** Both fuel oils and bitumen undergo quality control checks to ensure they meet the required specifications for trading. This may include laboratory testing for viscosity, sulfur content, flashpoint, and other parameters. For bitumen, quality checks are especially important to ensure proper consistency and performance for construction and road paving applications.
- **Storage:** Once procured, fuel oils are stored in large tanks or storage facilities. Similarly, bitumen may be stored in heated tanks to maintain the proper consistency, as bitumen can solidify at lower temperatures.
- **Logistics and Transportation:** The fuel oils are transported via pipelines, rail, tanker trucks, or ships (for international trade) to distribution points or end customers. Depending on the type of fuel, they may be transported in bulk or in smaller quantities. Bitumen is typically transported in bulk via tankers, railcars, or specialized trucks to construction sites or distributors.
- **Sales and Distribution:** We sell the fuel oils or bitumen to a range of customers, including industrial users, retail outlets, construction companies, and government entities. Sales can be done through direct contracts or via trading platforms. For Fuel Oils, the sale may involve spot contracts, long-term supply agreements, or hedging to manage price volatility. Bitumen is

primarily sold for construction and road-building purposes, and traders may enter into long-term contracts with construction companies or government agencies for large projects.

1. Market Identification

Geographical Focus: The company first identifies regions and states with high demand for bitumen. This is primarily driven by infrastructure projects and road construction activities.

Demand Analysis: The focus is on areas where there are ongoing or upcoming infrastructure projects, especially related to road and highway construction.

2. Customer Identification

Marketing Team Role: The marketing team is responsible for identifying potential new customers using both online and offline methods.

Online Sources: Research on digital platforms, industry databases, and relevant websites.

Offline Sources: Examination of tender documentation and details of registered government contractors, particularly those associated with Roads & Buildings (R&B) departments and highways authorities.

3. Tender and Bidding Tracking

Ongoing Monitoring: The marketing team keeps a close watch on their respective markets for any ongoing or upcoming tenders.

Tender Analysis: Once tenders are identified, the bidding process is tracked to understand market dynamics and customer requirements.

4. Approach and Engagement

Winning Bidders: Upon identifying the winners of tenders, the company directly approaches these contractors to offer bitumen and establish a working relationship.

Global petrochemical giants continue to dominate the market due to their vast resources, integrated operations, and expansive global reach, enabling them to exert significant influence on pricing, supply chains, and technological advancements.

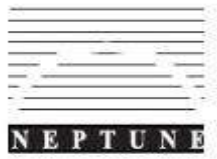

On the domestic front, competition is heightened by well-established players with deep-rooted distribution networks and localized expertise, enabling them to capture market share in specific regions. These firms often benefit from long-standing relationships with key customers and suppliers, further reinforcing their market position.

In addition to established competitors, the industry landscape is increasingly shaped by the rise of smaller companies that are leveraging innovations in technology, such as digitalization and advanced manufacturing techniques, to disrupt traditional business models. These new entrants are often more agile, able to quickly adapt to shifting market conditions, and capitalize on niche opportunities.

The Company was originally formed as Partnership Firm under the Indian Partnership Act, 1932 (“Partnership Act”) in the name and style of “M/s. While the intent was to transfer all business operations from the proprietorship to the partnership firm, practical challenges delayed the full transition, considering sequential nature of essential registrations and licenses, existing contracts with vendors, change notifications to vendors and customers, import formalities etc. In the meanwhile, the partnership firm applied for conversion into a Private Limited Company under the Companies Act. The Certificate of Incorporation (COI) for the new entity was obtained on October 21, 2021.

However, due to the ongoing practical constraints, business operations continued under the proprietorship firm gradually and were moved in a structured and phased manner, into the Company. The Pro Forma Financial Statements have been prepared to give effect to the transition phase and reflect the nature of operations. Starting FY22-23, the business was completely moved into the Company.

Subsequently, the Company was converted into a Public Limited Company and the name of our Company was changed from “Neptune Petrochemicals Private Limited” to “Neptune Petrochemicals Limited” vide fresh Certificate of Incorporation dated July 16, 2024 issued by the Registrar of Companies, Central Processing Centre. The company has a broad range of products tailored to the needs of the road construction and infrastructure industries.

The registered office of the company is at Block-B, Office No. 606, Mondeal Heights, Nr. Panchratna Party Plot, S. G. Highway, Ahmedabad, Gujarat – 380015.

The Company was originally formed as Partnership Firm under the Indian Partnership Act, 1932 ("Partnership Act") in the name and style of "M/s. Neptune Tradelink" pursuant to a Deed of Partnership dated April 03, 2021. The Partnership firm was formed by acquiring the business of M/s. Neptune Tradelink, sole proprietorship concern of our promoter Mr. Pareshkumar Subodhchandra Shah which was incorporated in 2004. "M/s. Neptune Tradelink" was thereafter converted from a Partnership firm to a Private Limited Company in the name and Style of "Neptune Petrochemicals Private Limited" under the provisions of Companies Act, 2013 vide certificate of incorporation dated October 21, 2021 issued by Registrar of Companies, Central Registration Centre bearing Corporate Identification Number (CIN) U24299GJ2021PTC126567.

While the intent was to transfer all business operations from the proprietorship to the partnership firm, practical challenges delayed the full transition, considering sequential nature of essential registrations and licenses, existing contracts with vendors, change notifications to vendors and customers, import formalities etc. In the meanwhile, the partnership firm applied for conversion into a Private Limited Company under the Companies Act. The Certificate of Incorporation (COI) for the new entity was obtained on October 21, 2021.

However, due to the ongoing practical constraints, business operations continued under the proprietorship firm gradually and were moved in a structured and phased manner, into the Company. Accordingly, during FY21-22, the business has been booked in both Proprietorship firm and the Company. The Pro Forma Financial Statements have been prepared to give effect to the transition phase and reflect the nature of operations. Starting FY22-23, the business was completely moved into the Company.

The Company was originally formed as Partnership Firm under the Indian Partnership Act, 1932 ("Partnership Act") in the name and style of "M/s. Neptune Tradelink, sole proprietorship concern of our promoter Mr. Pareshkumar Subodhchandra Shah which was incorporated in 2004. "M/s. Neptune Tradelink" was thereafter converted from a Partnership firm to a Private Limited Company in the name and style of "Neptune Petrochemicals Private Limited" under the provisions of Companies Act, 2013 vide certificate of incorporation dated October 21, 2021 issued by Registrar of Companies, Central Registration Centre bearing Corporate Identification Number (CIN) U24299GJ2021PT126567.

While the intent was to transfer all business operations from the proprietorship to the partnership firm, practical challenges delayed the full transition, considering sequential nature of essential registrations and licenses, existing contracts with vendors, change notifications to vendors and customers, import formalities etc. In the meanwhile, the partnership firm applied for conversion into a Private Limited Company under the Companies Act. The Proforma Financial Statements have been prepared to give effect to the transition phase and reflect the nature of operations. Starting FY22-23, the business was completely moved into the Company.

Subsequently, the Company was converted into a Public Limited Company and the name of our Company was changed from "Neptune Petrochemicals Private Limited" to "Neptune Petrochemicals Limited" vide fresh Certificate of Incorporation dated July 16, 2024 issued by the Registrar of Companies, Central Processing Centre. The Corporate Identification Number is U24299GJ2021PLC126567.

Fiscal 2024 compared with Fiscal 2023

Revenue from Operation

Revenue from operations had decreased by 5.66% from ₹ 70,782.29 lakhs in FY 2022-23 to ₹ 66,773.77 lakhs in FY 2023-24. This reduction in revenue from the operation is primarily due to the reduction in the commodity price of bitumen on account of global factors affecting bitumen pricing which is moderately correlated with crude oil prices, however the Company has grown its revenue in terms of volume.

Despite the lower prices in bitumen, the Company has successfully delivered volume growth, the Company has handled turnover of 1,72,712.79 MT bitumen in the FY 2023-24 as against 1,66,459.14 MT in the FY 2022-23, which forms major part of the revenue of the Company.

Other Income

Other income increased by 454%, from ₹148.56 lakhs in FY 2022-23 to ₹823.02 lakhs in FY 2023-24. This sharp growth is primarily attributed to gains from foreign exchange fluctuations, with the company reporting a forex gain of ₹549.96 lakhs in FY 2023-24, compared to a forex loss of ₹72.25 lakhs in FY 2022-23. As the company sources the majority of its raw materials from the global market and imports them into India, it regularly takes forward hedging contracts based on market assessments to protect against currency risks. In FY23, the Indian Rupee (INR) depreciated significantly against the USD and AED, while in FY24, the depreciation was far less pronounced.

This substantial increase in other income has positively impacted overall financial performance, enhancing profitability despite a decrease in turnover.

Employee Benefit Expenses

Employee benefit expenses had increased to ₹ 345.29 lakhs in the FY 2023-24 from ₹ 324.76 lakhs in the FY 2022-23 showing an increase of 10.87 %, which constitutes 0.51 % and 0.46 % of revenue from operation. The increase in Employee Benefit expenses was mainly attributable to an increase in employee head count and their increments during the FY 2023-24. Employee Benefit Expenses mainly include Salary and wages, Gratuity, and staff welfare expenses.

Finance Cost

Finance cost expenses were ₹ 25.64 lakhs in FY 2023-24 as against ₹ 52.53 lakhs in FY 2022-23. The primary reason for the decrease in finance costs is due to the fact that the Company has reduced and repaid portion of Unsecured Loans of Directors. Finance costs mainly include interest cost on borrowings and other Borrowing costs such as Processing and renewal charges, bank charges on remittances of import payments, etc.

Depreciation and Amortization Expenses

The Depreciation and amortization expense for FY 2023-24 was ₹ 16.53 lakhs as against ₹ 6.90 lakhs for FY 2022-23 showing an increase of 139.57%. The primary reason for the increase in the depreciation and Amortization Expenses is due to increase in the block, on account of addition of fixed assets, in all the Company invested ₹267.22 lakhs in FY 2023-24, compared to ₹72.33 lakhs in FY 2022-23 in the Property, Plants & Equipment.

Tax Expenses

The PAT margin improved from 1.47% to 3.12% despite a decline in total revenue. This improvement is primarily attributed to the Company's focus on enhancing profitability, wherein it has been able to achieve higher gross margin by reduction in the material cost as a percentage of revenue from operations, lowering it from 93.15% in FY23 to 91.64% in FY24. Additionally, the Company managed to lower its finance costs, which decreased from ₹52.53 Lakhs in FY23 to ₹25.64 Lakhs in FY24. Moreover, a significant contributor to the increased PAT was a forex gain of ₹549.96 Lakhs reported in FY24, compared to a forex loss of ₹72.25 Lakhs in FY23. The company sources the majority of its raw materials from the global market and imports them into India, it regularly takes forward hedging contracts based on market assessments to protect against currency risks. In addition, the Indian Rupee (INR) depreciation against the USD and AED in FY24 was less severe as compared to FY23, leading to favourable forex outcomes.

During FY2021-22, the Company was originally formed as Partnership Firm under the Indian Partnership Act, 1932 ("Partnership Act") in the name and style of "M/s. Neptune Tradelink" pursuant to a Deed of Partnership dated April 03, 2021. The Partnership

firm was formed by acquiring the business of M/s. Neptune Tradelink, sole proprietorship concern of our promoter Mr. Pareshkumar Subodhchandra Shah which was incorporated in 2004. "M/s. Neptune Tradelink" was thereafter converted from a Partnership firm to a Private Limited Company in the name and Style of "Neptune Petrochemicals Private Limited" under the provisions of Companies Act, 2013 vide certificate of incorporation dated October 21, 2021 issued by Registrar of Companies, Central Registration Centre bearing Corporate Identification Number (CIN) U24299GJ2021PTC126567.

Due to the practical constraints such as sequential nature of essential registrations and licenses, existing contracts with vendors, change notifications to vendors and customers, import formalities etc., business operations continued under the erstwhile proprietorship firm and were moved in a structured and phased manner into the Company. Accordingly, during FY21-22, the business has been booked in both Proprietorship firm and the Company, and at time simultaneously as well. The Proforma Financial Statements have been prepared to give effect to the transition phase and reflect the nature of operations. Starting FY22-23, the business was completely moved into the Company. (referred to as "business transition")

Revenue from Operation

Revenue from operations had increased from ₹ 8,116.33 Lakhs in the FY 2021-22 to ₹ 70,782.29 Lakhs in FY 2022-23. This sharp jump is due to the business transition from M/s Neptune Tradelink (erstwhile proprietorship firm) to the Company during FY2021-22.

Likewise the Other Income for complete FY 2021-22 as per Proforma Financial Statements is ₹749.77 Lakhs which reduce to ₹148.56 Lakhs in FY2022-23 due to foreign exchange fluctuations.

Employee benefit expenses stood at ₹ 324.76 lakhs in the FY 2022-23 and at ₹ 21.02 lakhs in the FY 2021-22. Employee Benefit Expenses increase also due to increase in Salary and wages, Gratuity, and staff welfare expenses.

Finance costs mainly include interest costs on borrowings and other Borrowing costs such as Processing and renewal charges, bank charges on remittances of import payments, etc.

Depreciation and Amortization Expenses

The Depreciation and amortization expense for FY 2022-23 was ₹ 6.90 lakhs as against ₹ 0.02 lakhs for FY 2021-22 is primarily due to the business transition from M/s Neptune Tradelink (proprietorship firm of Pareshkumar Subodhchandra Shah) to the current corporate entity in FY 2021-22.

The Depreciation and amortization expense as per Proforma Financial Statements is ₹114.12 Lakhs for FY 2021-22. The reason for this is higher depreciation booked in the erstwhile Proprietorship firm M/s Neptune Tradelink, as some of the personal nature assets of the Proprietorship firm were not transferred into the Company.

The primary reason in the drastic changes is due to gradual shift of Property, Plant & Equipment into the company.

Additionally, other expenses (without freight expenses) have been reduced from ₹ 1,357.65 lakhs in FY22 to ₹ 980.18 lakhs in FY23. If at any time the share capital is divided into different classes of shares, the rights attached to any class (unless otherwise provided by the terms of issue of the shares of that class) may, subject to the provisions of section 48 and whether or not the company is being wound up, be varied with the consent in writing of the holders of three-fourths of the issued shares of that class or with the sanction of a special resolution passed at a separate meeting of the holders of the shares of that class. To every such separate meeting, the provisions of these regulations relating to general meetings shall mutatis mutandis apply, but so that the necessary quorum shall be at least two persons holding at least one-third of the issued shares of the class in question.
7.	The rights conferred upon the holders of the shares of any class issued with preferred or other rights shall not, unless otherwise expressly provided by the terms of issue of the shares of that class, be deemed to be varied by the creation or issue of further shares ranking pari passu therewith.
8.	Subject to the provisions of section 55, any preference shares may, with the sanction of an ordinary resolution, be issued on the terms that they are to be redeemed on such terms and in such manner as the company may, before the issue of the shares, determine by special resolution.
	<i>Lien</i>
9.	The company shall have a first and paramount lien on every share (not being a fully paid share) for all monies (whether presently payable or not) called or payable at a fixed time in respect of that share and on all shares (not being fully paid shares) standing registered in the name of a single person for all monies presently payable by

	him or his estate to the company. Provided that the Board of Directors may at any time declare any share to be wholly or in part exempt from the provisions of this clause. The company's lien, if any, on a share shall extend to all dividends payable and bonuses declared from time to time in respect of such shares.
10.	The company may sell, in such manner as the Board thinks fit, any shares on which the company has a lien, provided that no sale shall be made a) unless a sum in respect of which the lien exists is presently payable, or b) until the expiration of fourteen days after a notice in writing stating and demanding payment of such part of the amount in respect of which the lien exists as is presently payable has been given to the registered holder for the time being of the share or the person entitled thereto by reason of his death or insolvency.
11.	To give effect to any such sale, the Board may authorise some person to transfer the shares sold to the purchaser thereof. The purchaser shall be registered as the holder of the shares comprised in any such transfer. The purchaser shall not be bound to see to the application of the purchase money, nor shall his title to the shares be affected by any irregularity or invalidity in the proceedings in reference to the sale.
12.	The proceeds of the sale shall be received by the company and applied in payment of such part of the amount in respect of which the lien exists as is presently payable. The residue, if any, shall, subject to a like lien for sums not presently payable as existed upon the shares before the sale, be paid to the person entitled to the shares at the date of the sale.
	<i>Calls on Shares</i>
13.	The Board may from time to time make calls upon the members in respect of any monies unpaid on their shares (whether on account of the nominal value of the shares or by way of premium) and not by the conditions of allotment thereof made payable at fixed times. Provided that no call shall exceed one-fourth of the nominal value of the share or be payable at less than one month from the date fixed for the payment of the last preceding call. Each member shall, subject to receiving at least fourteen days' notice specifying the time or times and place of payment, pay to the company at the time or times and place so specified the amount called on his shares. A call may be revoked or postponed at the discretion of the Board.
14.	A call shall be deemed to have been made at the time when the resolution of the Board authorizing the call was passed and may be required to be paid by instalments.
15.	The joint holders of a share shall be jointly and severally liable to pay all calls in respect thereof.
16.	If a sum called in respect of a share is not paid before or on the day appointed for payment thereof, the person from whom the sum is due shall pay interest thereon from the day appointed for payment thereof to the time of actual payment at ten per cent per annum or at such lower rate, if any, as the Board may determine. The Board shall be at liberty to waive payment of any such interest wholly or in part.
17.	Any sum which by the terms of issue of a share becomes payable on allotment or at any fixed date, whether on account of the nominal value of the share or by way of premium, shall for the purposes of these regulations be deemed to be a call duly made and payable on the date on which, by the terms of issue, such sum becomes payable. In case of non-payment of such sum, all the relevant provisions of these regulations as to payment of interest and expenses, forfeiture, or otherwise shall apply as if such sum had become payable by virtue of a call duly made and notified
18.	The Board a) may, if it thinks fit, receive from any member willing to advance the same all or any part of the monies uncalled and unpaid upon any shares held by him, and b) upon all or any of the monies so advanced may (until the same would but for such advance become presently payable) pay interest at such rate not exceeding, unless the company in general meeting shall otherwise direct, twelve per cent per annum as may be agreed upon between the Board and the member paying the sum in advance.
	<i>Transfer of Shares</i>
19.	The instrument of transfer of any share in the company shall be executed by or on behalf of both the transferor and transferee. The transferor shall be deemed to remain a holder of the share until the name of the transferee is entered in the register of members in respect thereof.
20.	The Board may, subject to the right of appeal conferred by section 58, decline to register the transfer of a share not being a fully paid share to a person of whom they do not approve or any transfer of shares on which the company has a lien.
21.	The Board may decline to recognise any instrument of transfer unless a) the instrument of transfer is in the form as prescribed in rules made under sub-section (1) of section 56, b) the instrument of transfer is accompanied by the certificate of the shares to which it relates and such other evidence as the Board may reasonably require to show the right of the transferor to make the transfer, and c) the instrument of transfer is in respect of only one class of shares.
22.	On giving not less than seven days' previous notice in accordance with section 91 and rules made thereunder, the registration of transfers may be suspended at such times and for such periods as the Board may from time to time determine, provided that such registration shall not be suspended for more than thirty days at any one time or for more than forty-five days in the aggregate in any year.

<i>Transmission of Shares</i>	
23.	On the death of a member, the survivor or survivors, where the member was a joint holder, and his nominee or nominees or legal representatives, where he was a sole holder, shall be the only persons recognised by the company as having any title to his interest in the shares. Nothing in this clause shall release the estate of a deceased joint holder from any liability in respect of any share which had been jointly held by him with other persons.
24.	Any person becoming entitled to a share in consequence of the death or insolvency of a member may, upon such evidence being produced as may from time to time properly be required by the Board, and subject as hereinafter provided, elect either to be registered himself as holder of the share or to make such transfer of the share as the deceased or insolvent member could have made. The Board shall, in either case, have the same right to decline or suspend registration as it would have had if the deceased or insolvent member had transferred the share before his death or insolvency.
25.	If the person so becoming entitled shall elect to be registered as holder of the share himself, he shall deliver or send to the company a notice in writing signed by him stating that he so elects. If the person aforesaid shall elect to transfer the share, he shall testify his election by executing a transfer of the share. All the limitations, restrictions, and provisions of these regulations relating to the right to transfer and the registration of transfers of shares shall be applicable to any such notice or transfer as aforesaid as if the death or insolvency of the member had not occurred and the notice or transfer were a transfer signed by that member.
26.	A person becoming entitled to a share by reason of the death or insolvency of the holder shall be entitled to the same dividends and other advantages to which he would be entitled if he were the registered holder of the share, except that he shall not, before being registered as a member in respect of the share, be entitled in respect of it to exercise any right conferred by membership in relation to meetings of the company. Provided that the Board may at any time give notice requiring any such person to elect either to be registered himself or to transfer the share, and if the notice is not complied with within ninety days, the Board may thereafter withhold payment of all dividends, bonuses, or other monies payable in respect of the share until the requirements of the notice have been complied with
27.	In the case of a One Person Company, on the death of the sole member, the person nominated by such member shall be the person recognised by the company as having title to all the shares of the member. The nominee, on becoming entitled to such shares in case of the member's death, shall be informed of such event by the Board of the company. Such nominee shall be entitled to the same dividends and other rights and liabilities to which such sole member of the company was entitled or liable on becoming a member. Such nominee shall nominate any other person with the prior written consent of such person who shall in the event of the death of the member become the member of the company.
<i>Forfeiture of Shares</i>	
28.	If a member fails to pay any call or instalment of a call on the day appointed for payment thereof, the Board may at any time thereafter, during such time as any part of the call or instalment remains unpaid, serve a notice on him requiring payment of so much of the call or instalment as is unpaid together with any interest which may have accrued.
29.	The notice aforesaid shall name a further day (not being earlier than the expiry of fourteen days from the date of service of the notice) on or before which the payment required by the notice is to be made, and state that in the event of non-payment on or before the day so named, the shares in respect of which the call was made shall be liable to be forfeited.
30.	If the requirements of any such notice as aforesaid are not complied with, any share in respect of which the notice has been given may at any time thereafter, before the payment required by the notice has been made, be forfeited by a resolution of the Board to that effect.
31.	A forfeited share may be sold or otherwise disposed of on such terms and in such manner as the Board thinks fit. At any time before a sale or disposal as aforesaid, the Board may cancel the forfeiture on such terms as it thinks fit.
32.	A person whose shares have been forfeited shall cease to be a member in respect of the forfeited shares but shall notwithstanding the forfeiture remain liable to pay to the company all monies which at the date of forfeiture were presently payable by him to the company in respect of the shares. The liability of such person shall cease if and when the company shall have received payment in full of all such monies in respect of the shares.
33.	A duly verified declaration in writing that the declarant is a director, the manager, or the secretary of the company and that a share in the company has been duly forfeited on a date stated in the declaration shall be conclusive evidence of the facts therein stated as against all persons claiming to be entitled to the share. The company may receive the consideration, if any, given for the share on any sale or disposal thereof and may execute a transfer of the share in favour of the person to whom the share is sold or disposed of. The transferee

	shall thereupon be registered as the holder of the share and shall not be bound to see to the application of the purchase money, if any, nor shall his title to the share be affected by any irregularity or invalidity in the proceedings in reference to the forfeiture, sale, or disposal of the share.
34.	The provisions of these regulations as to forfeiture shall apply in the case of non-payment of any sum which by the terms of issue of a share becomes payable at a fixed time, whether on account of the nominal value of the share or by way of premium, as if the same had been payable by virtue of a call duly made and notified.
	<i>Alteration of Capital</i>
35.	The company may from time to time by ordinary resolution increase the share capital by such sum to be divided into shares of such amount as may be specified in the resolution.
36.	Subject to the provisions of section 61, the company may by ordinary resolution consolidate and divide all or any of its share capital into shares of larger amount than its existing shares, convert all or any of its fully paid-up shares into stock, and reconvert that stock into fully paid-up shares of any denomination, sub-divide its existing shares or any of them into shares of smaller amount than is fixed by the memorandum, and cancel any shares which at the date of the passing of the resolution have not been taken or agreed to be taken by any person.
37.	Where shares are converted into stock, the holders of stock may transfer the same or any part thereof in the same manner as and subject to the same regulations under which the shares from which the stock arose might before the conversion have been transferred, or as near thereto as circumstances admit. Provided that the Board may from time to time fix the minimum amount of stock transferable, so however that such minimum shall not exceed the nominal amount of the shares from which the stock arose. The holders of stock shall, according to the amount of stock held by them, have the same rights, privileges, and advantages as regards dividends, voting at meetings of the company, and other matters as if they held the shares from which the stock arose, but no such privilege or advantage (except participation in the dividends and profits of the company and in the assets on winding up) shall be conferred by an amount of stock which would not, if existing in shares, have conferred that privilege or advantage. Such of the regulations of the company as are applicable to paid-up shares shall apply to stock, and the words "share" and "shareholder" in those regulations shall include stock and stock-holder respectively.
38.	The company may by special resolution reduce in any manner and with and subject to any incident authorised and consent required by law its share capital, any capital redemption reserve account, or any share premium account.

The sum aforesaid shall not be paid in cash but shall be applied, subject to the provision contained in clause (iii), either in or towards paying up any amounts for the time being unpaid on any shares held by such members, respectively paying up in full unissued shares of the company to be allotted and distributed, credited as fully paid-up to and amongst such members in the proportions aforesaid partly in the way specified in sub-clause (A) and partly in that specified in sub-clause (B). A securities premium account and a capital redemption reserve account may for the purposes of this regulation be applied in the paying up of unissued shares to be issued to members of the company as fully paid bonus shares. The Board shall give effect to the resolution passed by the company in pursuance of this regulation.
40.	Whenever such a resolution as aforesaid shall have been passed, the Board shall make all appropriations and applications of the undivided profits resolved to be capitalised thereby, and all allotments and issues of fully paid shares, if any, and generally do all acts and things required to give effect thereto. The Board shall have power to make such provisions by the issue of fractional certificates or by payment in cash or otherwise as it thinks fit for the case of shares becoming distributable in fractions, and to authorise any person to enter on behalf of all the members entitled thereto into an agreement with the company providing for the allotment to them respectively credited as fully paid-up of any further shares to which they may be entitled upon such capitalisation, or as the case may require, for the payment by the company on their behalf by the application thereto of their respective proportions of profits resolved to be capitalised of the amount or any part of the amounts remaining unpaid on their existing shares. Any agreement made under such authority shall be effective and binding on such members.
